This document has three tables of contents:

I believe this document is most useful when the reader reviews the relevant portion of the full table of contents throughout the research process.

 (Printed January 25, 2024.) This is not intended to be comprehensive; many portions only lightly touch the surface; and not all of the issues are updated at the same time (in fact, the author does not systematically refresh citations), so some parts may be less current than others. The author invites suggested changes, whether substantive or to point out typos (the author does not have a second set of eyes reviewing the author's work). The views expressed herein reflect the author's preliminary thoughts when initially written and are not necessarily those of Thompson Coburn LLP (or even of the author). Before using any information contained in these materials, a taxpayer should seek advice based on the taxpayer's particular circumstances from an independent tax advisor. Tax advisors should research these issues independently rather than rely on these materials.

This document may be cited as Gorin, [number and name of part as shown in the Table of Contents], "Structuring Ownership of Privately-Owned Businesses: Tax and Estate Planning Implications" (printed 1/25/2024), available by emailing the author at sgorin@thompsoncoburn.com. The author refers to this document not as a "treatise" or "book" but rather as his "materials," because the author views this as a mere compilation of preliminary ideas (albeit a large compilation) and not as a scholarly work. Structuring Ownership of Privately-Owned Businesses:

Tax and Estate Planning Implications

by Steven B. Gorin[*]

I. Introduction

This document discusses how federal income, employment and transfer taxes and estate planning and trust administration considerations affect how one might structure a business and then transition the business through ownership changes, focusing on structural issues so that readers can plan the choice of entity or engage in estate planning with an eye towards eventual transfer of ownership in the business.

With rapid changes in our global economy, flexibility in structuring a business entity is more important than ever. This document focuses on income tax flexibility in buying into a business and also exiting from or dividing a business, also discussing particular aspects of the taxation of operations, as well as individual and fiduciary income taxation (including the 3.8% tax on net investment income) on the income relating to a business entity that is taxable to them. It also discusses estate planning issues, including transfer tax issues and drafting and administering trusts to hold business interests. In addition to the issues covered in this document, consider whether a family-controlled entity requires a legitimate and significant nontax reason.[1]

II. Income Tax Flexibility

Income tax flexibility is divided into general considerations for corporations, LLCs and partnerships; buying into a business; income taxation of operations; and exiting from or dividing a business.

For an excellent overview of choice-of-entity issues, see "Selected Issues Relating to Choice of Business Entity," The Joint Committee on Taxation, JCX-66-12 (7/27/2012), https://www.jct.gov/publications.html?func=startdown&id=4478, which was scheduled for a public hearing before the Senate Finance Committee on August 1, 2012. See also McNulty and Kwon, "Tax Considerations in Choice of Entity Decisions," *Business Entities* (Jan./Feb. 2014).

II.A. Corporation

II.A.1. C Corporation

II.A.1.a. C Corporations Generally

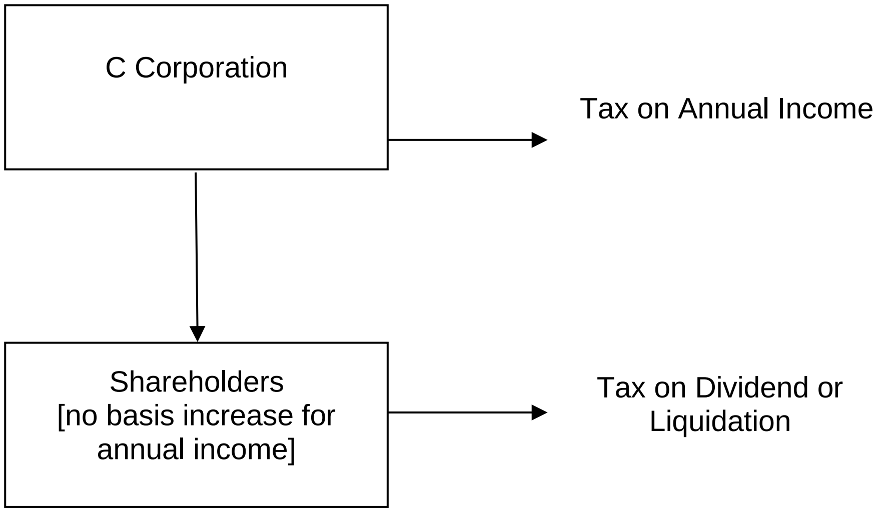
A C corporation is a corporation[2] that is not taxed as an S corporation.[3] It pays income taxes on its own earnings, and its shareholders pay income tax on any dividends they receive. Corporations whose stock is publicly traded are C corporations.

---

within three years of death. See fns. 91-92 in part II.A.2.d.i Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders.

[2] Including a limited liability company, partnership, or other entity that elects taxation as a corporation. Reg. § 301.7701-3.

[3] S corporations are described in part II.A.2 S Corporation.



Some corporations are C corporations simply because they were formed before S corporation taxation was even available. They may have ignored or been unaware of tax planning opportunities. Or, they may not be eligible to be taxed as an S corporation, because they have too many shareholders, shareholders who are not eligible to own stock in an S corporation, or a capital structure that is inconsistent with an S corporation's requirement that all shares of stock have the same distribution and liquidation rights.

Other corporations are C corporations to minimize taxes. C corporations now pay a flat 21% federal rate,[4] and they may also pay state income tax. Shareholders are not subject to income tax or self-employment tax on the reinvested income. More fringe benefits are allowed to C corporation shareholders than the owners of any other entity. C corporations do not receive capital gain rates on the sale of capital assets or business assets,[5] so C corporations used to pay higher taxes on the business' sale of such assets than do owners of S corporations or partnerships.[6] However, now C corporations tend to have lower rates on not only ordinary income but also capital gain inside the corporation.

If the shareholders do not take dividends, and later sell the company, even the wealthiest taxpayer could eventually pay federal capital gains tax of only 23.8% (20% plus 3.8% tax on net investment income). Some special rules provide an exclusion on the sale of certain stock in a C corporation;[7] however, this exclusion is not necessarily the advantage that one might initially think.[8] See also parts II.G.11 Personal Service Corporations and II.G.12 Planning for C Corporation Using the Lowest Corporate Brackets and Is Owned by Taxpayer with Modest Wealth.

---

[4] Code § 11 provides C corporations' income tax rates. All references to a "Code" section are to the Internal Revenue Code, 26 U.S.C.

[5] For the sale of business assets, see part II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business, especially fn. 1483 (business assets often are not capital assets and therefore require a special provision to receive capital gain tax rates).

[6] Code § 1(h).

[7] See part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

[8] See part II.Q.7.k.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership?

Corporations may exclude from income 50%-100% of dividends received from most other corporations.[9] For taxable years beginning after December 31, 2017, the following deductions are allowed against taxable dividends from a domestic[10] corporation:

- 100% for a dividend received within certain affiliated groups[11] or by small business investment company operating under the Small Business Investment Act of 1958.
- 65% for a dividend received from a 20%-owned corporation,[12] which effectively reduces the tax rate to 7.35% (21% corporation tax rate multiplied by the 35% excess of 100% over 65%).
- 50% for a dividend received from other corporations,[13] which effectively reduces the tax rate to 10.5% (21% corporation tax rate multiplied by 50%).

Generally, a corporation can be formed tax-free,[14] but distributions may trigger taxation at the corporate level, shareholder level, or both.[15] Prof. Sam Donaldson compared a C corporation to a roach motel – easy to get in but difficult to leave.[16]

II.A.1.b. C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment

For tax years beginning before January 1, 2018: To take advantage of low corporate income tax rates, C corporations often pay just enough compensation to take advantage of the lowest corporate brackets. However, all of the taxable income of a "qualified personal service corporation" is taxed at a flat 35%;[17] see part II.G.11 Personal Service Corporations. For the latter, zeroing out taxable income is frequently the goal.

For tax years beginning after December 31, 2017, all taxable income of every corporation is taxed at 21%.[18] Given that federal income rates that apply to individuals exceed those of corporations, in the short run one may be less inclined to pay as much compensation to shareholder-employees. Consider the following factors:

---

[9] Code § 243.

[10] Code § 243(e) provides:

> *Certain dividends from foreign corporations*. For purposes of subsection (a) and for purposes of section 245, any dividend from a foreign corporation from earnings and profits accumulated by a domestic corporation during a period with respect to which such domestic corporation was subject to taxation under this chapter (or corresponding provisions of prior law) shall be treated as a dividend from a domestic corporation which is subject to taxation under this chapter.

[11] Code § 243(a)(3), (b).

[12] Code § 243(c)(1). Code § 243(c)(2) looks to whether the taxpayer owns 20% or more of the stock of the payor corporation (by vote and value).

[13] Code § 243(a)(1).

[14] See part II.M.2 Buying into or Forming a Corporation.

[15] See part II.Q.7 Exiting from or Dividing a Corporation.

[16] Remarks at the 2016 Heckerling Institute on Estate Planning.

[17] Code § 11(b)(2).

[18] Code § 11(b).

- The top individual federal income tax rate is higher than the corporate income tax rate. Remember also to compare state and local income tax rates imposed on corporations and individuals.

- Compensation is subject to FICA.[19]

- A corporation is not limited to the amount of state income tax it may deduct. For any taxable year beginning after December 31, 2017 and before January 1, 2026, Code § 164(b)(6) limits an individual's deduction for state and local income and property tax to $10,000 ($5,000 for married filing separately), but it does not apply this limit to property taxes attributable to Code § 212 trade or business (which generally would be rental real estate, if it is a trade or business).[20]

- When the shareholder-employee would like to receive the business' earnings. See part II.A.1.b C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment. Also consider part II.E.2 Comparing Exit Strategies from C Corporations and Pass-Through Entities.

A business may deduct "a reasonable allowance for salaries or other compensation for personal services actually rendered", with compensation deductible if "reasonable" and "purely for services."[21] Corporate officers are employees, subject to certain exceptions; see part II.A.2.c Avoiding Double Taxation and Self-Employment Tax.

"Any amount paid in the form of compensation, but not in fact as the purchase price of services, is not deductible."[22] Payments may be disguised dividends[23] or purchase price for the business.[24] "The IRS' determination of constructive dividend income is a determination of unreported income."[25] "Once the IRS has produced evidence linking the taxpayer with an income-producing activity, the burden of proof shifts to the taxpayer to prove by a

---

[19] See part II.L.1 FICA: Corporation. For the amount of wages subject to the highest FICA rates (the taxable wage base), see fn 3393 in part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax.

[20] For more details about my comment on real estate as a trade or business, see part II.E.1.e Whether Real Estate Qualifies as a Trade or Business.

[21] Reg. § 1.162-7(a).

[22] Reg. § 1.162-7(b)(1).

[23] Reg. § 1.162-7(b)(1), providing:

> An ostensible salary paid by a corporation may be a distribution of a dividend on stock. This is likely to occur in the case of a corporation having few shareholders, practically all of whom draw salaries. If in such a case the salaries are in excess of those ordinarily paid for similar services and the excessive payments correspond or bear a close relationship to the stockholdings of the officers or employees, it would seem likely that the salaries are not paid wholly for services rendered, but that the excessive payments are a distribution of earnings upon the stock.

[24] Reg. § 1.162-7(b)(1), providing:

> An ostensible salary may be in part payment for property. This may occur, for example, where a partnership sells out to a corporation, the former partners agreeing to continue in the service of the corporation. In such a case it may be found that the salaries of the former partners are not merely for services, but in part constitute payment for the transfer of their business.

[25] *Pacific Management Group v. Commissioner*, T.C. Memo. 2018-131, citing and elaborating:

> *See Coastal Heart Med. Grp., Inc. v. Commissioner*, T.C. Memo. 2015-84, 109 T.C.M. (CCH) 1424, 1429. The Ninth Circuit has held that the IRS must provide some reasonable foundation connecting the taxpayer with the income-producing activity. *See Weimerskirch v. Commissioner*, 596 F.2d 358, 360 (9th Cir. 1979), *rev'g* 67 T.C. 672 (1977).

preponderance of the evidence that the IRS' determinations are arbitrary or erroneous."[26] A noncompensatory taxable payment from a C corporation to a shareholder is presumed to be a dividend unless the taxpayer proves the corporation had insufficient earnings and profits.[27] Such a payment made to an entity owned by shareholders generally would be a taxable dividend to those shareholders.[28]

"While any form of contingent compensation invites scrutiny as a possible distribution of earnings of the enterprise, it does not follow that payments on a contingent basis are to be treated fundamentally on any basis different from that applying to compensation at a flat rate."[29]

---

[26] *Pacific Management Group v. Commissioner*, T.C. Memo. 2018-131, citing *Helvering v. Taylor*, 293 U.S. 507, 515 (1935).

[27] *Pacific Management Group v. Commissioner*, T.C. Memo. 2018-131, stating:

> Sections 301 and 316 govern the characterization for Federal income tax purposes of corporate distributions of property to shareholders. If the distributing corporation has sufficient earnings and profits (E&P), the distribution is a dividend that the shareholder must include in gross income. Sec. 301(c)(1). If the distribution exceeds the corporation's E&P, the excess represents a nontaxable return of capital or capital gain. Sec. 301(c)(2) and (3).
>
> The taxpayer bears the burden of proving that the corporation lacks sufficient E&P to support dividend treatment at the shareholder level. *Truesdell v. Commissioner*, 89 T.C. 1280, 1295-1296 (1987); *Fazzio v. Commissioner*, T.C. Memo. 1991-130, *aff'd*, 959 F.2d 630 (6th Cir. 1992); *Zalewski v. Commissioner*, T.C. Memo. 1988-340; *Delgado v. Commissioner*, T.C. Memo. 1988-66. Petitioners produced no evidence concerning the Water Companies' E&P during the years at issue and have thus failed to satisfy their burden of proof. See *Truesdell*, 89 T.C. at 1295-1296; *Vlach v. Commissioner*, T.C. Memo. 2013-116, 105 T.C.M. (CCH) 1690, 1694 n.23. We therefore deem the Water Companies to have had, after add-back of the disallowed deductions for bonuses and factoring fees, sufficient E&P in each year to support dividend treatment.

[28] *Pacific Management Group v. Commissioner*, T.C. Memo. 2018-131, reasoning:

> Dividends may be formally declared or constructive. A constructive dividend is an economic benefit conferred upon a shareholder by a corporation without an expectation of repayment. *Truesdell*, 89 T.C. at 1295 (citing Noble v. Commissioner, 368 F.2d 439, 443 (9th Cir. 1966), *aff'g* T.C. Memo. 1965-84). "Corporate expenditures constitute constructive dividends only if (1) the expenditures do not give rise to a deduction on behalf of the corporation and (2) the expenditures create `economic gain, benefit, or income to the owner-taxpayer." *P.R. Farms, Inc. v. Commissioner*, 820 F.2d 1084, 1088 (9th Cir. 1987) (quoting *Meridian Wood Prods. Co. v. United States*, 725 F.2d 1183, 1191 (9th Cir. 1984)), *aff'g* T.C. Memo. 1984-549.
>
> Corporate payments to third parties may constitute constructive dividends if they are made on behalf of a shareholder or for his economic benefit. *United States v. Mews*, 923 F.2d 67, 68 (7th Cir. 1991); see, *e.g.*, *Grossman v. Commissioner*, 182 F.3d 275 (4th Cir. 1999) (corporate payments for family vacations), *aff'g* T.C. Memo. 1996-452; *Noble*, 368 F.2d at 441 (corporate payment for repairs and painting of shareholder's residence and for shareholder's travel expenses). The amount of the constructive dividend equals the fair market value of the benefit received *Challenge Mfg. Co. v. Commissioner*, 37 T.C. 650, 663 (1962); *Schank v. Commissioner*, T.C. Memo. 2015-235, 110 T.C.M. (CCH) 542, 548. Whether corporate expenditures are disguised dividends presents a question of fact. *DKD Enters. v. Commissioner*, 685 F.3d 730, 735 (8th Cir. 2012), *aff'g* in part, *rev'g* in part, T.C. Memo. 2011-29; *Schank*, 110 T.C.M. (CCH) at 548.
>
> In disallowing the Water Companies' deductions for factoring fees and the bulk of PACE's claimed deductions for bonuses, we have determined that none of these expenditures "give[s] rise to a deduction on behalf of the corporation." *P.R. Farms, Inc. v. Commissioner*, 820 F.2d at 1088. The remaining question is whether these expenditures "create[d] `economic gain, benefit, or income to the owner-taxpayer." *Ibid*. We find that they did.

[29] Reg. § 1.162-7(b)(2), providing:

One may not deduct compensation in excess of "what is reasonable under all the circumstances." [30]

For compensating shareholders for financial risk, see part III.B.1.a.ii.(d) Income Tax Consequences Involving Loan Guarantees.

II.A.1.b.i. Compensating Individuals

Because an independent investor would require a return on investment, a C corporation needs to be wary of relying too much on this strategy, which has been a point of contention in many cases over the years.[31]

> Generally speaking, if contingent compensation is paid pursuant to a free bargain between the employer and the individual made before the services are rendered, not influenced by any consideration on the part of the employer other than that of securing on fair and advantageous terms the services of the individual, it should be allowed as a deduction even though in the actual working out of the contract it may prove to be greater than the amount which would ordinarily be paid.

[30] Reg. § 1.162-7(b)(3), providing:

> It is, in general, just to assume that reasonable and true compensation is only such amount as would ordinarily be paid for like services by like enterprises under like circumstances. The circumstances to be taken into consideration are those existing at the date when the contract for services was made, not those existing at the date when the contract is questioned.

[31] Code § 162 requires any business deduction to be reasonable and necessary. If the future payments relate to compensation earned in the current year, then the taxpayer must prove that (a) the total compensation (current and deferred payments) earned that year is reasonable (to obtain a Code § 162 deduction) and (b) that it was entered into before January 1 of calendar year in which the services were provided (to satisfy Code § 409A(a)(4)(B)(i) and Reg. § 1.409A-2(a)(1)). For a summary of cases, see Looney and Levitt, "Compensation Reclassification Risks for C and S corporations," *Journal of Taxation* (May 2015); Moran, "The Independent Investor Test for Reasonable Compensation: Lens, Laser or Labyrinth?" *TM Memorandum* (BNA) (12/26/2016); and Adams, Inger and Mackfessel, "Reasonable Compensation: Circuit Court Differences Create Confusion and Inconsistency," *ATA Journal of Legal Tax Research* (Vol. 20, No. 1, Fall 2022, pp. 1-29). Abstract of the latter includes:

> The courts have generally followed two approaches: a multi-factor test and an independent investor test. We provide an in-depth exploration of reasonable compensation case law with a focus on disparity within and across court circuits. We supplement this exploration with an analysis of whether multi-factor determined court outcomes would have changed under the independent investor test.

In *Mulcahy, Pauritsch, Salvador & Co., Ltd. v. Commissioner*, 680 F.3d 867 (7th Cir. 2012), affirming 20% penalty on excess compensation, Judge Posner pointed out that a going concern with value requires a reasonable return as an investor. He commented:

> We note in closing our puzzlement that the firm chose to organize as a conventional business corporation in the first place. But that was in 1979 and there were fewer pass-through options then than there are now; a general partnership would have been the obvious alternative but it would not have conferred limited liability, which protects members' personal assets from a firm's creditors. Why the firm continued as a C corporation and sought to avoid double taxation by overstating deductions for business expenses, when reorganizing as a passthrough entity would have achieved the same result without inviting a legal challenge, see 1 Boris I. Bittker & James S. Eustice, *Federal Income Taxation of Corporations and Shareholders* ¶ 5.01[5], p. 5-8 (7th ed. 2006), is a greater puzzle. But "while a taxpayer is free to organize his affairs as he chooses, nevertheless, once having done so, he must accept the tax consequences of his choice, whether contemplated or not," *Commissioner v. National Alfalfa Dehydrating & Milling Co.*, 417 U.S. 134, 149 (1974)—consequences that in this case include a large tax deficiency and a

The IRS' web page on "Valuation of Assets"[32] includes:

- "Reasonable Compensation - Job Aid for IRS Valuation Professionals"[33]

---

hefty penalty. The Tax Court was correct to disallow the deduction of the "consulting fees" from the firm's taxable income and likewise correct to impose the 20 percent penalty.

That an *accounting* firm should so screw up its taxes is the most remarkable feature of the case.

Cases discussing reasonable compensation include *Davis v. Commissioner*, T.C. Memo. 2011-286 ($37 million deduction relating to stock option was reasonable), *aff'd* 111 A.F.T.R.2d 2013-1979 (11th Cir. 2013); *Multi-Pak Corporation v. Commissioner*, T.C. Memo. 2010-139, following *Elliotts, Inc. v. Commissioner*, 716 F.2d 1241 (9th Cir. 1983), which reversed T.C. Memo 1980-282 (although ultimately the Tax Court applied the Ninth Circuit's standards to arrive at the same result – T.C. Memo 1984-516); *Trucks, Inc. v. U.S.*, 588 F.Supp. 638 (D. Neb. 1984), aff'd 763 F.2d 339 (8th Cir. 1985) (reasonable compensation not an issue presented on appeal); *Owensby & Kritikos, Inc. v. Commissioner*, 819 F.2d 1315 (5th Cir. 1987); *Shaf stall Corp. v. U.S.*, 639 F.Supp. 1041 (S.D. Ind. 1986); *Donald Palmer Co., Inc. v. Commissioner*, 84 F.3d 431 (5th Cir. 1996); *Rapco, Inc. v. Commissioner*, 85 F.3d 950 (2nd Cir. 1996); *Alpha Medical, Inc. v. Commissioner*, 172 F.3d 942 (6th Cir. 1999); *Dexsil Corp. v. Commissioner*, 147 F.3d 96 (2nd Cir. 1998); *Exacto Spring Corp. v. Commissioner*, 196 F.3d 833 (7th Cir. 1999); *Labelgraphics, Inc. v. Commissioner*, 221 F.3d 1091 (9th Cir. 2000); *Eberl's Claim Service, Inc. v. Commissioner*, 249 F.3d 994 (10th Cir. 2001); *Haffner's Service Stations v. Commissioner*, 326 F.3d 1 (1st Cir. 2003); *Menard, Inc. v. Commissioner*, 560 F.3d 620 (7th Cir. 2009); *K & K Veterinary Supply, Inc.* v. *Commissioner*, T.C. Memo. 2013-84 (considering employee qualifications; the nature, extent, and scope of the employee's work; the size and complexity of the business; prevailing general economic conditions; the employee's compensation as a percentage of gross and net income; the employee shareholders' compensation compared with distributions to shareholders; the employee-shareholders' compensation compared with that paid to non-shareholder-employees; prevailing rates of compensation for comparable positions in comparable concerns; and comparison of compensation paid to a particular shareholder-employee in previous years where the corporation has a limited number of officers, citing *Charles Schneider & Co. v. Commissioner*, 500 F.2d 148, 151-152 (8th Cir. 1974), *aff'g* T.C. Memo. 1973-130); *Midwest Eye Center, S.C. v. Commissioner*, T.C. Memo. 2015-53 (C corp. zeroed out taxable income by paying compensation; 7th Cir. independent investor test provides rebuttable presumption that the compensation payment was reasonable; parties agreed that the presumption did not apply; taxpayer failed to provide evidence of "would ordinarily be paid for like services by like enterprises under like circumstances" under Reg. § 1.162-7(b)(3); negligence penalty imposed); *Brinks Gilson & Lione A Professional Corporation v. Commissioner*, T.C. Memo. 2016-20 (independent investor test makes zeroing out taxable income prima facie unreasonable, citing *Elliotts, supra*; court accepted IRS' use of cash basis balance sheet net worth to infer reasonable dividends; note that *Pediatric Surgical Associates P.C. v. Commissioner*, T.C. Memo. 2001-81, found ridiculous the taxpayer's argument that a medical practice earned no profits on its physician-employees' work). Also, Code § 162(m) limits publicly-traded corporations generally to a $1 million deduction unless they follow certain procedures. See also McCoskey, "Reasonable Compensation: Do You Know Where Your Circuit Stands?" *Journal of Taxation*, October 2008. Downs and Stetson, "Interpreting 'Reasonable' Compensation," *Practical Tax Strategies* (Jan. 2011), concludes that generally the Tax Court finds reasonable compensation when:

- The taxpayer pays dividends and earns a high return on equity.
- General economic conditions are not favorable, but the taxpayer's return on equity is at least positive.
- The taxpayer pays dividends to outside stockholders and earns a relatively high rate of return.

- “Appendix to Reasonable Compensation - Job Aid for IRS Valuation Professionals”[34]

H.W. Johnson, Inc. v. Commissioner, T.C. Memo. 2016-95, approved millions of dollars of compensation when the corporation reported only a few hundred thousand dollars in base compensation and perhaps a couple hundred thousand in dividends. It set forth the test it applied:[35]

> The Court of Appeals for the Ninth Circuit, to which an appeal in this case would normally lie, applies five factors to determine the reasonableness of compensation, with no factor being determinative: (1) the employee’s role in the company; (2) a comparison of compensation paid by similar companies for similar services; (3) the character and condition of the company; (4) potential conflicts of interest; and (5) the internal consistency of compensation arrangements.

In analyzing the officer-shareholders’ role in the company, the court pointed to not only their reputation for excellence and hands-on management but also their guaranteeing the corporation’s indebtedness to purchase materials and supplies.[36]

In comparing compensation to other taxpayers, the court said:

> This factor compares the employee’s compensation with that paid by similar companies for similar services. *Elliotts, Inc. v. Commissioner*, 716 F.2d at 1246; sec. 1.162-7(b)(3), Income Tax Regs. Respondent concedes that petitioner’s performance so exceeded that of any of the companies identified by the parties’ experts as comparable that compensation comparisons are not meaningful. Petitioner’s expert calculated that petitioner’s officers’ compensation as a percentage of gross revenue was 18.4% and 20.9% for 2003 and 2004, respectively, whereas the industry average for those years was 2.2%. Petitioner contends that its performance so exceeded the industry average that the divergence of its compensation from the average is justified. On this record we lack any reliable benchmarks from which to assess petitioner’s claim and therefore find it unpersuasive. In view of this and respondent’s concession, we conclude that this factor is essentially neutral. See *Multi-Pak Corp. v. Commissioner*, T.C. Memo. 2010-139.

The court suggested that “conflict of interest” factor cited above applies when the shareholders are the officers being compensated, in such a case the court should scrutinize the issue, applying the independent investor test. The court rejected the IRS’ expert’s reliance on (a) ”guideline” companies that the court found not to be comparable, (b) Risk Management

[35] At the end of the quote below, the court continued:

> *Elliotts v. Commissioner*, 716 F.2d at 1245-1247. In analyzing the fourth factor, the Court of Appeals emphasizes evaluating the reasonableness of compensation payments from the perspective of a hypothetical independent investor, focusing on whether the investor would receive a reasonable return on equity after payment of the compensation. *Id.* At 1247; see also *Metro Leasing Dev. Corp. v. Commissioner*, 376 F.3d 1015, 1019 (9th Cir. 2004), aff’g T.C. Memo. 2001-119.

[36] When mentioning the latter, the court cited *Leonard Pipeline Contractors, Ltd. v. Commissioner*, T.C. Memo. 1998-315, *aff’d* without published opinion, 210 F.3d 384 (9th Cir. 2000); *Owensby & Kritikos, Inc. v. Commissioner*, T.C. Memo. 1985-267, *aff’d*, 819 F.2d 1315 (5th Cir. 1987).

Association's annual statement that RMA itself cautions might include small sample sizes, (c) the Construction Financial Management Association's annual financial survey, the court commenting that many of the companies in that data sample operated in industries dissimilar from the taxpayer's, and (d) a "market required return on equity" that the IRS' expert derived from data published by Ibbotson Associates, which data the court characterized and being from companies engaged in the construction industry generally, not the concrete contracting sector of which the taxpayer is a part. Instead, the court found credible the taxpayer's expert's use of Integra data from 33 companies falling under the SIC code that closely described the taxpayer's line of business. In response to the taxpayer's contention that its return on equity was in line with the industry average and therefore would have satisfied an independent investor, the court said:

> We agree with petitioner. Respondent cites no authority for the proposition that the required return on equity for purposes of the independent investor test must significantly exceed the industry average when the subject company has been especially successful, and we have found none in the caselaw. Instead, in applying the independent investor test the courts have typically found that a return on equity of at least 10% tends to indicate that an independent investor would be satisfied and thus payment of compensation that leaves that rate of return for the investor is reasonable. See, *e.g.*, *Thousand Oaks Residential Care Home I, Inc. v. Commissioner*, T.C. Memo. 2013-10; *Multi-Pak Corp. v. Commissioner*, T.C. Memo. 2010-139. Indeed, compensation payments that resulted in a return on equity of 2.9% have been found reasonable. *Multi-Pak Corp. v. Commissioner*, T.C. Memo. 2010-139. It is compensation that results in returns on equity of zero or less than zero that has been found to be unreasonable. See, *e.g.*, *Mulcahy, Pauritsch, Salvador & Co., Ltd. v. Commissioner*, 680 F.3d 867 (7th Cir. 2012), *aff'g* T.C. Memo. 2011-74; *Multi-Pak Corp. v. Commissioner*, T.C. Memo. 2010-139. We consequently find that petitioner's returns on equity of 10.2% and 9% for 2003 and 2004, respectively, tend to show that the compensation paid to Donald and Bruce for those years was reasonable. As petitioner's expert points out, mere reductions in their collective compensation of $9,847 and $75,277 in 2003 and 2004, respectively — differences of approximately 1% — would have placed petitioner's return on equity at exactly the average for comparable companies in the concrete business. Consequently, this factor favors a finding that the compensation at issue was reasonable.

The court said that the internal consistency of compensation factor focuses on whether the compensation was paid pursuant to a structured, formal, and consistently applied program and that bonuses not awarded under such plans are suspect. In this case, the taxpayer had such a program in effect for a dozen years before the years at issue.

In addition to upholding the compensation deduction, the court upheld a $500,000 fee paid to a concrete supply company formed by the two brothers whose compensation was at issue. The court noted that the supply company had significant outside investors who performed essential functions, that the supply company provided unique benefits to the taxpayer that provided a significant advantage over its competitors, and rebuffed the IRS' criticism that the fee was not pursuant to a written agreement:

> In view of the foregoing, respondent's contention that petitioner's payment to DBJ was voluntary, given the absence of a written agreement or evidence of an oral agreement to compensate DBJ, is unavailing. "Closely held corporations, as is well known, often act informally, their decisions being made in conversations, and oftentimes recorded not in

> the minutes, but by action." *Levenson & Klein, Inc. v. Commissioner*, 67 T.C. 694, 714 (1977) (quoting *Reub Isaacs & Co. v. Commissioner*, 1 B.T.A. 45, 48 (1924)). We are satisfied that petitioner's board, including majority shareholder Margaret, concluded at the close of 2004 that the $500,000 payment to DBJ was appropriate to compensate Bruce and Donald for the substantial benefit they conferred on petitioner in their individual capacities. In short, the action in making the payment undoubtedly reflected an informal understanding among petitioner's shareholders, Margaret, Bruce, and Donald, that the latter two ought to be compensated for their individual efforts and their assumption of the risks entailed in averting the consequences of a concrete shortage for petitioner during 2004.

Leaving that case, consider that a taxpayer who litigates this issue needs to coordinate the statute of limitations on the corporation's and employee's income and payroll tax returns. *K & K Veterinary Supply, Inc.*, T.C. Memo. 2013-84 denied equitable recoupment, holding:[37]

> In order to establish that equitable recoupment applies, a party must prove the following elements: (1) the overpayment or deficiency for which recoupment is sought by way of offset is barred by an expired period of limitation; (2) the time-barred overpayment or deficiency arose out of the same transaction, item, or taxable event as the overpayment or deficiency before the Court; (3) the transaction, item, or taxable event has been inconsistently subjected to two taxes; and (4) if the transaction, item, or taxable event involves two or more taxpayers, there is sufficient identity of interest between the taxpayers subject to the two taxes that the taxpayers should be treated as one.

The court agreed with the IRS' citation of a case holding that an S corporation and its shareholder were two separate taxpayers that should not be treated as one.[38] The court pointed out that, if an S corporation should be treated as separate from its shareholder, then a C corporation certainly would also be treated as separate, given that the C corporation is not even a pass-through entity.

A 2016 Tax Court case penalized a personal service corporation that had significant net assets and zeroed out its taxable income.[39] Another one penalized a wholesaler that paid the founder's sons compensation based on skilled officer positions when the sons actually had little skill and mainly did menial work.[40]

---

[37] The court cited as authority for the quoted analysis:

[38] *Catalano v. Commissioner*, T.C. Memo. 1998-447, *aff'd* 240 F.3d 842 (9th Cir. 2001).

[39] *Brinks Gilson & Lione A Professional Corporation v. Commissioner*, T.C. Memo. 2016-20, discussed in fn. 31.

[40] *Transupport, Inc. v. Commissioner*, T.C. Memo. 2016-216, stated:

> In *Transupport I*, we quoted portions of the testimony of each of the Foote sons in which each denied knowledge of principles basic to the performance of his respective functions on behalf of petitioner. Because petitioner ignores the evidence, we repeat our observations here: K. Foote worked closely with purchases and sales but had "no clue" as to how much the inventory was worth and did not know how costs of goods sold were determined. J. Foote, who acted as petitioner's chief financial officer, testified that he had "no idea" or "not a clue" about petitioner's inventory at cost in 2007. J. Foote provided to petitioner's accountant the numbers used in

In *Pacific Management Group v. Commissioner*, T.C. Memo. 2018-131, the officers formed a partnership to which the corporation paid management fees for their services. The Tax Court looked through the partnership to determine whether the officers' compensation was reasonable.[41] Applying Ninth Circuit law,[42] the court allowed only part of the bonuses paid to the officers:

> preparing petitioner's tax returns, but he had no idea whether the amounts reported on the *returns were correct. W. Foote, whose duties included inventory management, asserted that* "nobody understands … our inventory" or that nobody can put a total valuation on it. As to a specific part in the inventory, he had "no earthly clue" as to the purchase price.
>
> None of the Foote sons had special experience or educational background. Each of the four sons testified that they had overlapping duties, but those duties included menial tasks as well as managerial ones because there were no other employees. Foote testified that he intended to treat his sons equally, that he alone determined their compensation, and that he was aware of their marginal tax rates, obviously intending to minimize petitioner's tax liability. The amounts and equivalency of the brothers' compensation, the proportionality to their stock interests, the disproportionality to Foote's compensation, the manner in which Foote alone dictated the amounts, the reduction of reported taxable income to minimal amounts, and the admissions in the promotional materials relating to their compensation all justify skepticism toward petitioner's assertions that the amounts claimed on the returns are reasonable.

In this case, the taxpayers arbitrarily and grossly overstated their cost of goods sold, and their compensation experts testified as if the sons had skill sets they clearly did not. This was a horrible set of facts, and the court called "nonsense" the taxpayer's comparison of its case to *H.W. Johnson, Inc. v. Commissioner*, T.C. Memo. 2016-95:

> The circumstances in *H.W. Johnson* are dissimilar and clearly distinguishable. In that case the company had over 200 employees, and the sons of the founder each supervised over 100 employees. Compensation was determined by a formula consistently applied by the board of directors, and, upon the advice of the company accountant, cash dividends were paid.

The First Circuit affirmed, 121 A.F.T.R.2d 2018-XXXX (2/14/2018).

[41] The court reasoned:

> In form, the Water Companies paid management fees to PMG. PMG was a paper entity, and its partners-the five S corporations-were likewise paper entities. Neither PMG nor the S corporations provided the Water Companies with actual management services of any kind Rather, they were simply vehicles for supplying the personal services of the five principals, who performed for the Water Companies during 2002-2005 essentially the same services they had performed as direct employees of the Water Companies previously. In assessing the reasonableness of the "management fees," therefore, the question is whether those sums represented reasonable compensation for the personal services rendered by five principals or instead represented (at least in part) nondeductible distributions of corporate profits.

[42] The court stated:

> The Court of Appeals for the Ninth Circuit, the appellate venue in these cases absent stipulation to the contrary, applies five factors to determine the reasonableness of compensation: (1) the employee's role in the company, (2) a comparison of the employee's salary with salaries paid by similar companies for similar services, (3) the character and condition of the company, (4) potential conflicts of interest, and (5) the internal consistency of the company's compensation arrangement. *Elliotts, Inc. v. Commissioner*, 716 F.2d 1241, 1245-1247 (9th Cir. 1983), *rev'g* and remanding T.C. Memo. 1980-282. The Ninth Circuit also considers whether the amounts paid would be regarded as reasonable by a hypothetical independent investor See *Metro Leasing & Dev. Corp. v. Commissioner*, 376 F.3d 1015, 1019 (9th Cir. 2004), aff'g 119 T.C. 8 (2002); *Elliotts Inc.*, 716 F.2d at 1247 ("If the bulk of the corporation's earnings [pg. 1108] are being paid out in the form of compensation, so that the corporate profits, after payment of the compensation, do not represent a reasonable return on the shareholder's equity in the corporation, then an independent shareholder would probably not approve of the compensation arrangement.").

Allowing bonuses of this magnitude leaves sufficient profits in PACE to provide shareholder returns on equity of 17.2%, 11.3%, and 11.4% for 2003, 2004, and 2005, respectively. The data supplied by Mr. Atkins suggest that these returns would be deemed adequate by a hypothetical investor in a company like PACE. We accordingly find and hold that PACE is entitled to deductions under section 162 for bonus expenses of $134,276 for 2003, $626,581 for 2004, and $547,971 for 2005. The balances of the bonuses paid - $165,724 for 2003, $623,419 for 2004, and $1,517,029 for 2005 - do not represent bona fide compensation for services rendered but rather constituted nondeductible distributions of corporate profits.

Aspro, Inc. v. Commissioner, T.C. Memo. 2021-8, concluded its analysis:

e. Comparison of Salary to Distributions to Stockholders and Retained Earnings

As discussed above, the failure to pay more than a minimal number of dividends may suggest that some of the amount paid as shareholder-employee compensation is a dividend. See *Charles Schneider & Co. v. Commissioner*, 500 F.2d 148. A corporation is not required to pay dividends, however; shareholders may be equally content with appreciation of their stock. See *Home Interiors & Gifts, Inc. v. Commissioner*, 73 T.C. at 1161. The independent investor test is used often to assess whether the amount of shareholder compensation was reasonable in the light of the return on equity the corporation's shareholders received during the same timeframe. *Miller & Sons Drywall, Inc. v. Commissioner*, 2005 WL 1200189, at *5 (citing *Rapco, Inc. v. Commissioner*, 85 F.3d 950, 955 (2d Cir. 1996), *aff'g* T.C. Memo. 1995-128).

Petitioner never paid dividends. And while petitioner argues correctly that it was not required to pay dividends, it did not show that the shareholders received a fair return on account of their shares. Petitioner did not present evidence or expert witness testimony regarding what return on equity an independent investor might find reasonable. And while we can calculate petitioner's return on equity, we do not have sufficient information to assess whether such a return was adequate for petitioner's industry. See *id.* at *13 n.4 (calculating return on equity by dividing the year's net income by the year's beginning shareholders equity).[7]

[7] Here, that formula indicates returns of approximately 1% for tax year 2012, !1% for tax year 2013, and 7% for tax year 2014.

Additionally, the Nunes report contains data and analysis that indicates that petitioner's shareholder compensation scheme did not allow for adequate shareholder returns. The Nunes report concludes that petitioner's operating income margins were significantly below those of its industry peers. The top quarter of petitioner's industry peers had operating margins of 6% of revenue during the years in issue, while half had operating margins of more than 2.5%. Petitioner's operating margins before paying management fees were strong compared to those of its industry peers (4.4% in tax year 2012, 7.6% in tax year 2013, and 8.1% in tax year 2014) but were relatively very weak once management fees were paid (negative 0.1%, negative 0.2%, and 0.4%), as computed by the Nunes report. While the Nunes report does not compare petitioner's return on equity to those of its industry peers, we find its conclusions regarding petitioner's operating margins illuminating. By paying such high shareholder compensation, petitioner was less profitable as illustrated by its lower operating income margins] compared to those of its industry peers. Low profitability led to relatively lower retained earnings and,

> consequently, low returns for the hypothetical independent investor. At bottom, petitioner has not shown that a hypothetical independent investor in its stock would find its investment returns reasonable with the shareholder compensation.[8] Accordingly, we find that this factor weighs heavily in favor of respondent.
>
> [8] And we think that conclusion applies equally to management fees paid to all three shareholders, not just Mr. Dakovich.
>
> In sum, petitioner has not carried its burden of showing that the management fees paid to Mr. Dakovich were reasonable. They were not for any services beyond his responsibilities as president, and respondent has provided persuasive expert testimony that Mr. Dakovich was already overcompensated by his salary and bonus alone. As we concluded above, there are numerous indicia that the management fees paid to Mr. Dakovich were simply disguised distributions; and much of the evidence supports the conclusion that the management fees paid to him were not reasonable. Finally, petitioner never paid dividends to its shareholders and presented no evidence showing that an independent investor would have been satisfied with investment returns after shareholder compensation.

In affirming the Tax Court, the Eighth Circuit, 32 F.4th 673 (2022), generally agreed with the above and added:

> Furthermore, the payments made to Dakovich were a disguised distribution and were not purely for services. See *David E. Watson*, 668 F.3d. at 1019. As with Jackson Enterprises Corp. and Manatt's Enterprises, Ltd., Aspro paid the management fees as lump sums at the end of the tax year even though the purported services were performed throughout the year, had an unstructured process of setting the management fees that did not relate to the services performed, and had a relatively small amount of taxable income after deducting the management fees. See *Nor-Cal Adjusters*, 503 F.2d at 362-63. Therefore, the tax court did not clearly err in finding that Aspro failed to carry its burden of showing that the management fees were reasonable and purely for services actually performed.

Clary Hood, Inc. v. Commissioner, T.C. Memo. 2022-15, commented on employee-shareholders:

> Another consideration is whether the employee was also a shareholder of the corporation. Where officer-shareholders are in control of a closely held corporation and set their own compensation, careful scrutiny is required to determine whether the alleged deductible compensation is in fact a nondeductible dividend. *Richlands Med. Ass'n v. Commissioner*, 953 F.2d 639, 1992 WL 14603, at *2 (4th Cir. 1992), *aff'g per curiam* T.C. Memo. 1990-660; *Estate of Wallace v. Commissioner*, 95 T.C. at 556. An "ostensible salary" paid by a closely held corporation to one of its few shareholders is likely to constitute a disguised dividend where the amount is "in excess of those ordinarily paid for similar services and the excessive payments correspond or bear a

> close relationship to the stockholdings of the officers or employees". Sec. 1.162-7(b)(1), Income Tax Regs.

In that case, the Tax Court explained the Fourth Circuit's approach:

> The U.S. Court of Appeals for the Fourth Circuit, the court to which an appeal of this case would lie, see sec. 7482(b), requires consideration of multiple factors in determining reasonable compensation (multifactor approach): the employee's qualifications; the nature, extent, and scope of the employee's work; the size and complexities of the business; a comparison of salaries paid with gross income and net income; the prevailing general economic conditions; comparison of salaries with distributions to stockholders; the prevailing rates of compensation for comparable positions in comparable concerns; and the salary policy of the taxpayer as to all employees. *Richlands Med. Ass'n v. Commissioner*, 1992 WL 14603, at *2.
>
> In the context of small corporations with a limited number of officers, additional factors may include the amount of compensation paid to the particular employee in the previous years, *Mayson Mfg. Co. v. Commissioner*, 178 F.2d 115, 119 (6th Cir. 1949), *rev'g* and remanding a Memorandum Opinion of this Court dated Nov. 16, 1948, and personal guaranties of debts or other obligations of the corporation, *E.J. Harrison & Sons, Inc. v. Commissioner*, T.C. Memo. 2003-239, 2003 WL 21921049, at *14-*16, *aff'd in part, rev'd in part and remanded on another issue*, 138 F. App'x 994 (9th Cir. 2005).
>
> No single factor is decisive; instead, we must consider and weigh the totality of the facts and circumstances when making a decision. *Martens v. Commissioner*, 1991 WL 87160, at *9. In doing so, we may find certain factors less relevant or helpful than other factors when considering the facts necessary to reach a conclusion. See *Medina v. Commissioner*, T.C. Memo. 1983-253.

The Tax Court declined to follow the independent investor test:

> Petitioner contends that we should follow the independent investor test in determining whether the purported compensation paid to Mr. Hood in the years at issue was reasonable. While at least one Court of Appeals has found value in this approach, the U.S. Court of Appeals for the Fourth Circuit has not adopted any iteration of the independent investor test. Moreover, we generally apply the multifactor approach unless a case is appealable to a Court of Appeals which has expressly applied the independent investor test. *See, e.g., Pepsi-Cola Bottling Co. of Salina v. Commissioner*, 61 T.C. 564, 567 (1974) (noting that it is "well settled" that the Court should consider the multifactor approach in reasonable compensation cases), *aff'd*, 528 F.2d 176, 179 (10th Cir. 1975); *Beiner, Inc. v. Commissioner*, T.C. Memo. 2004-219, 2004 WL 2164888, at *15 (refusing to apply the independent investor test exclusively by finding comparative industry salaries the most relevant factor in that case); *Metro Leasing & Dev. Corp. v. Commissioner*, 2001 WL 530694, at *9 (concluding that it was not "appropriate to rely solely on the independent investor test to reach our findings and/or holding"). Accordingly, we will apply the multifactor approach to determine the reasonableness of petitioner's purported compensation paid to Mr. Hood on the basis of the precedent of this Court and, more importantly, of the Court of Appeals for the Fourth Circuit. See *Golsen v. Commissioner*, 54 T.C. 742, 757 (1970), *aff'd*, 445 F.2d 985 (10th Cir. 1971).

The court also sustained the substantial understatement penalty for 2016 but found it did not apply to 2015. Although the court found that it was reasonable to rely on the tax preparers for 2015, it found different facts for 2016:

> Petitioner contends that it also reasonably relied on professional advice in awarding Mr. Hood the 2016 amount. In contrast to the detailed record surrounding the advice given to determine the 2015 amount, petitioner provided almost no evidence with respect to the advice it may have received to determine the 2016 amount. Mr. Phillips prepared an updated compensation due spreadsheet for the 2016 amount; however, there is no evidence that petitioner's board of directors considered or relied on his worksheet when deciding to award Mr. Hood the 2016 amount. Mr. Phillips and Mr. Stokes each testified that an analysis similar to the one performed for the 2015 amount was undertaken in 2016, but there is no evidence in the record of any communication between petitioner and its advisers that would credibly support a finding that advice was actually rendered with respect to the 2016 amount. This absence becomes even more critical when considering that (1) in awarding Mr. Hood the 2015 amount, the record does not reflect that petitioner still believed Mr. Hood remained entitled to additional backpay compensation for the review period and (2) in awarding Mr. Hood the 2016 amount, the board minutes did not attempt to address why it felt the 2015 amount had been insufficient in this regard. If this changing view was based on advice petitioner received during its 2016 tax year, we would need to know what that specific advice was and who provided it. Without such facts we cannot properly apply the *Neonatology Assocs., P.A.* factors to determine whether any such advice was reasonable and followed by petitioner in good faith as to the 2016 amount. See *Higbee v. Commissioner*, 116 T.C. at 446-447.

Perhaps one might be able to reward the original owners for prior services rendered,[43] but at some point one should consider an S election to be able to avoid double taxation on distributions.[44] As to prior services rendered, *Clary Hood, Inc. v. Commissioner*, T.C. Memo. 2022-15, commented:

> An employer may deduct compensation paid to an employee in a year although the employee may have performed the services in a prior year.[14] *Lucas v. Ox Fibre Brush Co.*, 281 U.S. 115, 119 (1930), *aff'g Ox Fibre Brush Co. v. Blair*, 32 F.2d 42 (4th Cir. 1929), *rev'g* 8 B.T.A. 422 (1927); *R.J. Nicoll Co. v. Commissioner*, 59 T.C. 37, 50 (1972). The employer must show that the employee was not sufficiently compensated in the prior year and that the current year's compensation was in fact to compensate for that underpayment. *Estate of Wallace v. Commissioner*, 95 T.C. 525, 553-554 (1990), *aff'd*, 965 F.2d 1038 (11th Cir. 1992).
>
> [14] Respondent does not argue that any portion of the compensation paid to Mr. Hood should have been reported in a year other than the years at issue.

In applying this prior services theory to the case at hand, the Tax Court commented:

> Where a large salary increase is in issue (as in the case at hand), it may be useful to compare past and present duties and salary payments, *Elliotts, Inc. v. Commissioner*, 716 F.2d at 1245, to determine whether and to what extent the current payments

[43] See part II.Q.1.d.ii Using Nonqualified Deferred Compensation to Facilitate a Sale.
[44] See parts II.A.2.b Existing Corporation - Paying Retired Shareholder-Officers and II.P.3.b Conversion from C Corporation to S Corporation.

> represent compensation for services performed in prior years that can be currently deductible, *Lucas v. Ox Fibre Brush Co.*, 281 U.S. at 119-120.
>
> Mr. Hood's total purported compensation increased over 300% in petitioner's 2015 tax year, its most profitable year to date, yet there was no corresponding increase in Mr. Hood's duties or responsibilities in that year. See *Miles-Conley Co. v. Commissioner*, 173 F.2d 958, 960 (4th Cir. 1949) (finding that where a taxpayer's sole stockholder had been paid much less for his service in the same position in previous years, and his compensation increased dramatically when the corporation's profits increased, an inference is warranted that the taxpayer's sole stockholder was attempting to drain off the corporate profits in the guise of salary), *aff'g* 10 T.C. 754 (1948). The stated justification per the corporate minutes for this increase is that Mr. Hood was undercompensated in prior years. While we do not disagree that Mr. Hood was undercompensated in certain years of the review period, this does not entitle petitioner to carte blanche in deducting Mr. Hood's backpay bonus amount, see *Owensby & Kritikos, Inc. v. Commissioner*, 819 F.2d at 1325 ("[L]imits to reasonable compensation exist even for the most valuable employees."), and we view board minutes statements like these with a certain degree of skepticism, see *United States v. Smith*, 418 F.2d 589, 593-594 (5th Cir. 1969). Moreover, petitioner did not sufficiently demonstrate through reliable means how the full amount of each of the 2015 and 2016 amounts was proportionate in value to each of the purported past services rendered by Mr. Hood. See *Botany Worsted Mills v. United States*, 278 U.S 282, 293 (1929); *Estate of Wallace v. Commissioner*, 95 T.C. at 553-554; *Woesner Abstract & Title Co. v. Commissioner*, T.C. Memo. 1983-764.

When reviewing reasonable compensation, *Clary Hood, Inc. v. Commissioner*, 131 A.F.T.R.2d 2023-XXXX (4th Cir. 5/31/2023), explained:

> To make this determination, we apply a standard of reasonableness "under all the circumstances," taking into account practices and payments "by like enterprises under like circumstances." 26 C.F.R. § 1.162-7(b)(3). This, we conclude, calls for application of a multifactor approach that assesses the reasonableness of compensation under the totality of the circumstances. *See, e.g., Charles Schneider & Co. v. Comm'r*, 500 F.2d 148, 151- 52 (8th Cir. 1974); *Kennedy v. Comm'r*, 671 F.2d 167, 173-74 (6th Cir. 1982); *Elliotts, Inc. v. Comm'r*, 716 F.2d 1241, 1245 (9th Cir. 1983); *B.B. Rider Corp. v. Comm'r*, 725 F.2d 945, 952 (3d Cir. 1984); *Owensby & Kritikos, Inc. v. Comm'r*, 819 F.2d 1315, 1323 (5th Cir. 1987); *Dexsil Corp.*, 147 F.3d at 100; *Eberl's Claim Serv., Inc. v. Comm'r*, 249 F.3d 994, 999 (10th Cir. 2001); *Haffner's Serv. Stations, Inc. v. Comm'r*, 326 F.3d 1, 3-5 (1st Cir. 2003). As we have previously explained, albeit in an unpublished opinion, under the multifactor approach, no single factor is decisive, but rather we consider numerous factors, such as
>
> > the employee's qualifications; the nature, extent and scope of the employee's work; the size and complexities of the business; a comparison of salaries paid with gross income and net income; the prevailing general economic conditions; comparison of salaries with distributions to stockholders; the prevailing rates of compensation for comparable positions in comparable concerns; [and] the salary policy of the taxpayer as to all employees.
>
> *Richlands Med. Ass'n v. Comm'r*, 953 F.2d 639, 1992 WL 14603, at *2 (4th Cir. 1992) (unpublished) (per curiam) (quoting *Owensby & Kritikos, Inc.*, 819 F.2d at 1323). And in

> the context of small corporations that have a limited number of officers, additional factors may be considered, such as the amount of compensation paid to the officer in previous years, see *Mayson Mfg. Co. v. Comm'r*, 178 F.2d 115, 119 (6th Cir. 1949), and whether the officer personally guaranteed debts or other obligations of the corporation, see *Owensby & Kritikos, Inc.*, 819 F.2d at 1325 n.33. Moreover, we find appropriate the suggestion of some other courts of appeal that the various relevant factors may be reviewed through the "lens" of, *Dexsil Corp.*, 147 F.3d at 101, or "from the perspective of," a hypothetical independent investor by asking "whether [such an] investor would be willing to compensate the employee as he was compensated," *Elliotts, Inc.*, 716 F.2d at 1245.
>
> Hood, Inc. contends that because we have not formally adopted the multifactor test, the Tax Court erred in applying it here and that we should consider the adoption of a singular "independent investor" test, which establishes a rebuttable presumption that an executive's compensation is reasonable if the corporation's shareholders are receiving a sufficiently high rate of return on their equity investment. See *Menard, Inc. v. Comm'r*, 560 F.3d 620, 622-23 (7th Cir. 2009); *Exacto Spring Corp. v. Comm'r*, 196 F.3d 833, 839 (7th Cir. 1999). Hood, Inc. reasons that under that test we should approve Mr. Hood's bonuses because Hood, Inc. generated a 22% return on equity for its shareholders in 2015 and a 36% return in 2016 after accounting for Mr. Hood's total compensation.
>
> While it might be reasonable to consider the Seventh Circuit's independent investor test along with other factors relevant to the totality of the circumstances, we conclude that solely using that test to establish a presumption of reasonableness, as Hood, Inc. urges, would be too narrow in light of the regulatory demand that we consider "what is reasonable under all the circumstances." 26 C.F.R. § 1.162-7(b)(3). For instance, under the independent investor test, an executive's compensation could be presumed to be reasonable even if it exceeded the amount that was genuinely compensation "for personal services actually rendered," 26 U.S.C. § 162(a)(1), and that "would ordinarily be paid for like services by like enterprises under like circumstances," 26 C.F.R. § 1.162-7(b)(3). By contrast, the multifactor test allows for consideration of the numerous other relevant factors. Accordingly, we conclude that it is the appropriate test to apply and that the Tax Court did not err in applying it here.

The Court of Appeals then reviewed how the Tax Court applied that test:

> Finding no legal error in the Tax Court's use of the multifactor approach, we review the Tax Court's findings made under that test for clear error. See *Miles-Conley Co. v. Comm'r*, 173 F.2d 958, 960 (4th Cir. 1949).
>
> Hood, Inc. contends that the Tax Court did not adequately account for the return on equity generated for the company's shareholders; that it did not appropriately credit Mr. Hood's extraordinary performance and recognize that such performance could justify compensation in excess of the norm; and that it placed too much emphasis on the comparison of Mr. Hood's compensation with that of similarly situated executives in the industry. These arguments, however, simply raise questions regarding the weight to assign the factors, as the Tax Court considered them among the many factors it addressed in its extensive opinion.
>
> As a starting point, the Tax Court recognized that Mr. Hood was "extraordinarily talented in his industry," served as the company's "key employee and driving force from its

inception," and that the company's business of land excavation and grading was "more complex than that of a general construction company." The court also acknowledged that the trend of Hood, Inc.'s increasing revenue, culminating with an annual revenue of roughly $69 million in 2016, "[could] not be credited to economic conditions alone" and that Mr. Hood was instrumental in transitioning the business to more profitable projects. The court took account of these factors as well as others in its opinion, allowing reasonable compensation to Mr. Hood for his personal services in this regard.

The Tax Court also recognized that it was permissible for Hood, Inc. to compensate Mr. Hood for undercompensation in prior years, as explained in *Alpha Medical, Inc. v. Commissioner*, 172 F.3d 942, 950 (6th Cir. 1999). In Alpha Medical, the court noted that "[a] taxpayer making such a claim must show: (1) the insufficiency of the officer's compensation in the previous year[s]; and (2) the amount of the current year's compensation that was intended as compensation for that underpayment." 172 F.3d at 950. Thus, the Tax Court agreed with Mr. Hood that he was entitled to some degree of additional compensation for the services rendered in prior years.

But, focusing in large part on comparative compensation paid by relevant enterprises, as required by regulation, the court did not agree that a $5 million bonus was appropriate for either year, even when including amounts for previous undercompensation as well as a bonus for the current year. In reaching that conclusion, the court pointed to several relevant factors that indicated overpayment.

First, the court noted that Hood, Inc. had never declared or paid a cash dividend to its shareholders, even after it began to accumulate significant capital during the period from 2013 to 2016. Although companies are not required to pay dividends, a court may nonetheless consider a profitable corporation's failure to do so in determining the reasonableness of compensation paid to its shareholder-employees. *See Miles-Conley Co.*, 173 F.2d at 960; *see also Paul E. Kummer Realty Co. v. Comm'r*, 511 F.2d 313, 315 (8th Cir. 1975). In this case, the Tax Court agreed that Hood, Inc. had advanced persuasive reasons for not declaring dividends for many years, such as 2010, when business was slow and capital needs were high. It also recognized, as Hood, Inc. pointed out, that Hood, Inc.'s business was capital-intensive due to the cost of obtaining and maintaining heavy equipment. But the court noted that this rationale became less persuasive in later years given that Hood, Inc.'s year-end shareholder equity value had increased nearly sixfold, from approximately $5.5 million in 2010 to over $31 million in 2016. Yet the company opted to pay out large bonuses to Mr. Hood rather than paying any dividends. And the lack of dividends became especially suspect in light of Mr. Hood's testimony that in 2015, he was aware that he needed to start making preparations from an "income tax" perspective for "*getting money out of [the] corporation*" in preparation for "a changing of the guard." (Emphasis added).

Second, the Tax Court noted that Hood, Inc. had "no structured system in place" for determining compensation and that Mr. Hood's compensation was set by himself and his wife. "Bonuses that have not been awarded under a structured, formal, consistently applied program generally are suspect ...." *Elliotts, Inc.*, 716 F.2d at 1247. Moreover, "salaries paid to controlling shareholders are open to question if, when compared to salaries paid non-owner management, they indicate that the level of compensation is a *function of ownership*, not corporate management responsibility." *Id*. (emphasis added). Thus, the Tax Court's suspicion was enhanced by the fact that in 2015 and 2016, Mr. Hood's compensation represented almost 90% of the total compensation that Hood, Inc.

paid to its officers, despite the fact that other non-shareholder officers worked similar hours and shared similar responsibilities. While some of that discrepancy could have been attributed to the need to remedy Mr. Hood's past undercompensation, it was nonetheless glaring that Hood, Inc.'s other officers each received a bonus of $100,000 or less for the 2015 and 2016 tax years, while Mr. Hood received a bonus of $5 million for each year.

Finally, the Tax Court placed considerable weight on the comparison of Mr. Hood's compensation with that paid to similarly situated executives in comparable companies. While no single factor is decisive under the multifactor test, such comparisons have been described as "a most significant factor." *Aspro, Inc. v. Comm'r*, 32 F.4th 673, 680 (8th Cir. 2022) (quoting *Charles Schneider & Co.*, 500 F.2d at 154); see also 26 C.F.R. § 1.162-7(b)(3) (requiring consideration of what "would ordinarily be paid for like services by like enterprises under like circumstances"). Relying on survey data included in Fuller's expert report about comparably sized site-preparation contractors and their compensation of employee-shareholders, the Tax Court noted that for the years 2013 through 2016, Fuller treated Mr. Hood as meriting compensation in the 99th percentile based on the company's success and still found that the compensation actually paid to Mr. Hood exceeded what was reasonable. Instead, relying on this comparative data, the Fuller report calculated that reasonable compensation for Mr. Hood would amount to $3,681,269 for 2015 and $1,362,831 for 2016. The Tax Court found these calculations to be "the most credible and complete source of data, analyses, and conclusions." At the same time, the court discounted the testimony of Hood, Inc.'s expert witnesses because they "did not provide satisfactory countervailing evidence ... that would credibly support a greater allowable amount." It noted, for example, that one of Hood, Inc.'s expert reports based its analysis on survey data for CEO compensation from 2011 to 2016 for companies with a revenue of up to $500 million, which, the Tax Court concluded, was a poor match for both Hood, Inc.'s size and the relevant time period at issue.

At bottom, the Tax Court held that a reasonable total compensation for Mr. Hood was $3,681,269 for 2015 and $1,362,831 for 2016, and that a $5 million bonus for each year - on top of his salary - was excessive.

We find that Hood, Inc. has not demonstrated that the Tax Court's factual findings were clearly erroneous or that its reliance on Fuller's report was inappropriate. The court explained its reason for relying on Fuller and rejecting Hood, Inc.'s experts, and we see no basis to disturb that determination. See *United States v. Hall*, 664 F.3d 456, 462 (4th Cir. 2012) ("Evaluating the credibility of experts and the value of their opinions is ... a function best committed to the district courts, and one to which appellate courts must defer, and we should be especially reluctant to set aside a finding based on the trial court's evaluation of conflicting expert testimony" (cleaned up))…..

Mr. Hood's business acumen and his contribution to Hood, Inc.'s prosperity was fully recognized by the Tax Court, and the Tax Court thus concluded that Hood, Inc. was entitled to compensate Mr. Hood well. And we agree.

This case is not about such compensation but rather about whether the amount paid was entirely for Mr. Hood's personal services or whether it included profits distributable to him as a function of his ownership of the company. To make that determination, the Tax Court took a multifactor approach designed to measure the portion of compensation that was attributable only to Mr. Hood's personal services and concluded that not all his

> compensation was so attributable. We now affirm the court's decision with respect to that finding.
>
> Nonetheless, we agree that Hood, Inc. used a consistent methodology to determine the amount of Mr. Hood's bonuses for both 2015 and 2016 with the advice of independent accountants, and therefore, the reasons that the Tax Court gave for not imposing a substantial underpayment penalty for 2015 likewise provided an adequate defense against imposing a similar penalty for 2016.

As the concluding paragraph quoted above confirmed, the Fourth Circuit held that no penalties applied, given that the company provided complete information to the CPAs and reasonably relied on their advice.

II.A.1.b.ii. Compensating Owner(s) with Management Fees

Aspro, Inc. v. Commissioner, T.C. Memo. 2021-8, involved a C corporation that had as owners two entities and one individual that the Tax Court held sought to distribute its profits by compensating the owners. Before getting to details below, let's discuss some strategy:

- After paying tax or making tax distributions to owners, most businesses reinvest part or all of their income and distribute the rest.

- For income that is being distributed, pass-through taxation tends to be best. For income that is reinvested, C corporation taxation tends to be best. See parts II.E.1.a Taxes Imposed on C Corporations and II.E.1.b Taxes Imposed on S Corporations, Partnerships, and Sole Proprietorships, subject to the strategic considerations (including exit strategies) discussed in parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart.

- One might try to find a middle ground through part II.E.4 Reaping C Corporation Annual Taxation Benefits Using Hybrid Structure. But such a structure would lock the business into a given mixture of distribution and reinvestment, which may seem good when set but might turn out to be much less than ideal as time goes by.

Given the latter point, one might find C corporations trying a more flexible approach of compensating owners and giving performance bonuses. However, owners' annual performance metrics may differ from their ownership percentages, and the owners might prefer to have that variability reflected in compensation for not just services but also capital. Then the IRS and courts evaluate how much of these payments are compensation for deductible services and how much as a nondeductible return on capital. Also, be careful that whoever actually earns the income is the one who reports it – see part II.G.24 Taxing Entity or Individual Performing Services.

A corporate subsidiary cannot deduct an ostensible management fee paid to its parent unless the parent actually provides services.[45]

[45] *Home Team Transition Management v. Commissioner*, T.C. Memo. 2017-51, holding:

> In this case, we have four individuals who were equal corporate shareholders in a home care business, petitioner, that they had acquired in 1994. During 2010 the same four shareholders

Aspro, Inc. v. Commissioner, T.C. Memo. 2021-8, upheld the IRS' disallowance of management fees paid to two entities that owned the taxpayer C corporation:

> Petitioner has not shown that the management fees were paid "purely for services." See sec. 1.162-7(a), Income Tax Regs. To the contrary, most of the evidence indicates that petitioner paid the management fees to its three shareholders as disguised distributions. See *id*. para. (b)(1). Petitioner made no distributions to its three shareholders but paid management fees each year. Indeed, no evidence indicates that petitioner ever made distributions to its shareholders during its entire corporate history. This indicates a lack of compensatory purpose. See *id*.; see also *Paul E. Kummer Realty Co. v. Commissioner*, 511 F.2d 313, 315 (8th Cir. 1975) ("[T]he absence of dividends to stockholders out of available profits justifies an inference that some of the purported compensation really represented a distribution of profits as dividends."), *aff'g* T.C. Memo. 1974-44; *Nor-Cal Adjusters v. Commissioner*, 503 F.2d 359, 362-363 (9th Cir. 1974) (holding that the complete absence of formal dividend distributions was an indication that compensation paid to shareholders was disguised distributions), *aff'g* T.C. Memo. 1971-200; *Charles Schneider & Co. v. Commissioner*, 500 F.2d at 153 ("Perhaps most important [in finding purported shareholder compensation represented disguised distributions] is the fact that no dividends were ever paid by any of these companies during … [the years in issue], even though they enjoyed consistent profits and immense success in the industry.").
>
> Although the management fees were not exactly pro rata among the three shareholders, the two large shareholders always got equal amounts, and the percentages of management fees all three shareholders received roughly correspond to their respective ownership interests. This equal distribution supports an inference that petitioner paid management fees to Mr. Dakovich, Jackson Enterprises Corp., and Manatt's Enterprises, Ltd., as distributions of profits. See sec. 1.162-7(b)(1), Income Tax Regs.; see also *Paul E. Kummer Realty Co. v. Commissioner*, 511 F.2d at 316 (stating that the fact that amounts received by shareholders were "almost identical" to the percentage of stock held by each shareholder was indicative of disguised distributions). The management fees paid have a close relationship with each shareholder's stockholding in petitioner….

---

incorporated another corporation, Sacer Cor, in which they were equal shareholders, and Sacer Cor acquired ownership of petitioner, the existing home healthcare business. Two of the shareholders were employees of petitioner, and they were paid for their services, which included day-to-day operation of petitioner. The other two shareholders were not employees of petitioner. None of the four shareholders were employees of Sacer Cor, and no one, including the four shareholders, was paid a salary for any services rendered to or on behalf of Sacer Cor. Periodically, the four shareholders of Sacer Cor were paid equal amounts as director's fees. There is no credible evidence showing that any management services were performed by the shareholders or other employees of Sacer Cor for petitioner.
Given those facts, petitioner has failed to meet its burden of showing that the deducted management fees it paid to Sacer Cor were for services rendered and/or "reasonable" within the meaning of section 162. Exacerbating those circumstances are the facts that the alleged management fees were originally booked as loan payments and that the amounts corresponded to petitioner's ability to pay; *i.e.*, they varied depending on petitioner's revenues. We accordingly hold that respondent's disallowance of the management fee deductions that petitioner claimed for 2011, 2012, and 2013 is not in error and is sustained.

The fact that petitioner paid Jackson Enterprises Corp. and Manatt's Enterprises, Ltd., instead of the entities and individuals actually performing services indicates a lack of compensatory purpose. If petitioner was concerned with paying for services, it very easily could have paid the service providers directly whether that was Cedar Valley Corp., Manatt's, Inc., Tim Manatt, or someone else. But instead, petitioner paid entities that did not directly perform any of the services that it argues justify the management fees.

Also, petitioner paid management fees as lump sums at the end of the tax year, rather than throughout the year as the services were performed, even though many services were performed throughout, or early in, the tax year. For example, petitioner argues that the management fees paid to Jackson Enterprises Corp. are partly attributable to the human resources assistance Ms. Robinson provided and that the management fees paid to Manatt's Enterprises, Ltd., were partly attributable to environmental assistance Ms. Bond provided. But petitioner paid nothing for those services until the very end of the tax year. This practice indicates a lack of compensatory purpose. See *Nor-Cal Adjusters v. Commissioner*, 503 F.2d at 362-363 (holding that taxpayer's payments of compensation to shareholders in lump sums rather than as services were performed was an indication that payments were disguised distributions); *Heil Beauty v. Commissioner*, 199 F.2d at 195 (concluding that the taxpayer's payment scheme was indicative of a disguised distribution of profit where the shareholder was paid in one lump sum each year as opposed to throughout the year as services were rendered).

Another indication that the management fees were disguised distributions to the shareholders is the fact that petitioner had relatively little taxable income after deducting the management fees. See *Owensby & Kritikos, Inc. v. Commissioner*, 819 F.2d 1315, 1325-1326 (5th Cir. 1987) (stating that considering compensation as a percentage of taxable income before deducting the compensation in question is an accurate gauge of whether a corporation is disguising distributions of dividends as compensation), *aff'g* T.C. Memo. 1985-287 [sic, 1985-267]; *Nor-Cal Adjusters v. Commissioner*, 503 F.2d at 362-363 (holding that the fact that the taxpayer consistently had negligible taxable income was an indication that compensation paid to shareholders was disguised distributions); *Wycoff v. Commissioner*, T.C. Memo. 2017-203, at *46-*49 (holding that shareholder compensation paid was unreasonable when it depleted "most, if not all" of the company's profits, an indication that the compensation was a disguise for nondeductible profit distributions). Without deducting management fees petitioner would have had taxable income of $1,307,712 for tax year 2012, $2,031,371 for tax year 2013, and $2,324,358 for tax year 2014. The management fees of $1,166,000 for tax year 2012, $1,750,000 for tax year 2013, and $1,800,000 for tax year 2014 thus eliminated 89%, 86%, and 77% of what would have been petitioner's taxable income for tax years 2012 through 2014, respectively. One of petitioner's board members, Brad Manatt, credibly testified that he understood a dividend to be a "distribution of profits"; and when he was asked to describe his understanding of the difference between a dividend and a management fee, he testified that "a management fee is a distribution from the company that's not taxed by the company and a distribution is a [sic] after-tax distribution of profits.… They're both distributions." It is not a stretch to infer that petitioner was using management fee payments to lower its taxable income while getting cash to its three shareholders.

Lastly, petitioner's process of setting management fees was unstructured and had little if any relation to the services performed. The fees for services were not set in advance of the services being provided. None of the witnesses could explain how petitioner determined the management fees. And there was contradictory testimony on who proposed the initial amount of management fees at the board meetings: For instance, Mr. Dakovich recalled that the amounts of the management fees were determined by the board after a discussion. On the other hand some board members testified that Mr. Dakovich made a recommendation of the amount of the management fees at the board meeting, and after a brief discussion they would be approved. Some board members understood that the management fees had been determined before the board meetings and did not recall discussions about the different services performed. Tim Manatt vaguely speculated that the higher fees in 2013 were to make up for the lack of fees in 2010, but on brief petitioner was unable to stitch together any more evidentiary support. Petitioner did not attempt to value the individual services attributable to the management fees paid to Jackson Enterprises Corp. and Manatt's Enterprises, Ltd. And Mr. Dakovich conceded that his management fees were not paid for any specific services he performed beyond his duties as petitioner's president. This unstructured process for setting management fees indicates that petitioner paid management fees as a way to distribute earnings to its shareholders and not to compensate them for services rendered. See *Nor-Cal Adjusters v. Commissioner*, 503 F.2d at 362-363 (holding that an unstructured system of setting shareholder compensation, with no preset criteria, indicated that the shareholder compensation was actually disguised distributions).

The numerous indicia of disguised distributions show that the management fees paid to the three shareholders were not "in fact payments purely for services." See secs. 1.162-7(a) and (b)(1), Income Tax Regs. Accordingly, we hold that the management fees are not deductible, even if petitioner could show the amounts were reasonable. See *Charles Schneider & Co. v. Commissioner*, 500 F.2d at 153 (stating that compensation paid to shareholders who set their own compensation "may be distributions of earnings rather than payments of compensation for services rendered; even if they are reasonable, they would not be deductible")….

Petitioner also failed to meet its burden of showing that the management fees paid to Jackson Enterprises Corp. and Manatt's Enterprise, Ltd., were ordinary, necessary, and reasonable. First, the parties did nothing to document a service relationship between petitioner and either Jackson Enterprises Corp. or Manatt's Enterprises, Ltd. There were no written management services agreements outlining what services were to be performed. No evidence—documentary or otherwise—outlines the cost or value of any particular service. Neither corporate shareholder billed or sent invoices for services rendered. See *ASAT, Inc. v. Commissioner*, 108 T.C. 147, 174-175 (1997) (holding that the taxpayer was not entitled to deduct consulting fees where there was no written contract, no evidence regarding how the fees were determined, almost no detail in the billing invoices, and indications that the parties were not dealing at arm's length); see also *Fuhrman v. Commissioner*, T.C. Memo. 2011-236, 2011 WL 4502290, at *2-*3 (holding that the taxpayer was not entitled to deduct management fees paid to an affiliate when there was no written management services contract or other contemporaneous documentation, and the invoices had no details as to the services provided or the derivation of the invoiced amounts).

Additionally, petitioner presented no evidence showing how management fee amounts were determined. See *Fuhrman v. Commissioner*, 2011 WL 4502290, at *2-*3 (holding that the taxpayer was not entitled to deduct management fees paid to an affiliate when the taxpayer failed to demonstrate how the management fees were determined). As we observed above, the testimony about how the amounts of management fees were set was vague and contradictory. No witness could explain how much any particular service cost. No witness could explain how the lump-sum management fee amounts paid to each of Jackson Enterprises Corp. and Manatt's Enterprises, Ltd., were determined. No witness could explain what portion of each management fee paid to either Jackson Enterprises Corp. or Manatt's Enterprises, Ltd., was attributable to any given service.

Reasonable compensation is only the amount that would ordinarily be paid for like services by like enterprises under like circumstances. Sec. 1.162-7(b)(3), Income Tax Regs. Petitioner presented no evidence concerning what like enterprises would pay for like services. Petitioner and its corporate shareholders made no attempt, either during the years in issue or later at trial, to attach dollar values to the individual services provided, let alone demonstrate that like enterprises would pay that amount for such services. Petitioner failed to introduce any expert testimony to aid us in assessing the reasonableness of amounts paid for the various services. And petitioner failed to establish the nature, occurrence, and frequency of most of the services that it argues "justify" the management fees paid to its corporate shareholders. Indeed, petitioner's rationale for the management fees appears to be a last-minute scramble to list everything anyone remotely associated with either corporate shareholder did for petitioner. Neither Jackson Enterprises Corp. nor Manatt's Enterprises, Ltd., actually performed any of the "personal services" that petitioner argues justify payment of management fees. See sec. 162(a)(1) (providing for a deduction for compensation paid for "personal services" actually rendered). Neither corporate shareholder was in the business of providing management services or even was in a business related to that of petitioner's. Jackson Enterprises Corp. was a holding company, and Manatt's Enterprises, Ltd., was a farming business. Instead, the services were performed by individuals who worked for different entities. For example, the environmental advice, safety advice, and best practices meetings were provided by employees of MAS, Ltd., or Manatt's, Inc., not Manatt's Enterprises, Ltd. The alternate bid advice, human resources assistance, and equipment advice were performed by employees of Cedar Valley Management Corp., not Jackson Enterprises Corp. Petitioner glosses over this by referring to the "Jackson family of companies" and the "Manatt's family of companies."

We have held that management fees paid to an affiliate are only necessary and reasonable - and therefore, deductible - if the affiliate provided the management services. See *Elick v. Commissioner*, T.C. Memo. 2013-139, at *11-*12 (holding that the taxpayer was not entitled to deduct management fees paid to affiliate when the taxpayer failed to show that management services outlined in management services agreement were actually performed by the affiliate), *aff'd*, 638 F. App'x 609 (9th Cir. 2016); *Weekend Warrior Trailers, Inc. v. Commissioner*, T.C. Memo. 2011-105, 2011 WL 1900159, at *19-*21 (holding that management fees paid to an affiliate were not deductible when the evidence did not adequately establish the services performed and who performed them). Petitioner offered no evidence that the entities or individuals providing the services did so on behalf of the shareholders and were compensated for those services; in effect we are asked to imagine their relationships. Petitioner cites no authority for the proposition that it can claim a deduction for management fees paid to its corporate shareholders just because individuals employed by other entities in the "Jackson family of companies" or "Manatt's family of companies" may have done something of value for petitioner. Petitioner has to connect the dots between the services performed and the management fees it paid. Petitioner failed to do so.

> Petitioner's arguments are even less convincing when we consider each "service" it asserts "justifies" the management fees paid to each corporate shareholder….
>
> We cannot identify any "personal services" performed by Manatt's Enterprises, Ltd., or Jackson Enterprises Corp., and petitioner did not establish what amounts of the management fees paid to each shareholder were to compensate for these "services" and whether such amounts would have been paid by like enterprises under like circumstances.

Aspro, Inc. v. Commissioner, T.C. Memo. 2021-8, also upheld the IRS' disallowance of management fees paid to an individual shareholder of the taxpayer C corporation:

> We now turn to whether the management fees paid to Mr. Dakovich, petitioner's president, were ordinary, necessary, and reasonable. Unlike the two corporate shareholders, Mr. Dakovich was an employee of petitioner, providing personal services on an ongoing basis. We do not see any reason to question whether it was ordinary or necessary for petitioner to compensate its president. But his total compensation still must be reasonable.
>
> In the case of shareholder-employee compensation, courts have considered the following factors: the employee's qualification; the nature, extent, and scope of the employee's work; the size and complexities of the business; a comparison of salaries paid with the gross income and the net income; the prevailing general economic conditions; a comparison of salaries with distributions to stockholders; the prevailing rates of compensation for comparable positions in comparable [*40] concerns; the taxpayer's salary policy for all employees; and in the case of small corporations with a limited number of officers, the amount of compensation paid to the particular employee in previous years. *Charles Schneider & Co. v. Commissioner*, 500 F.2d at 152; *Mayson Mfg. Co. v. Commissioner*, 178 F.2d 115, 119 (6th Cir. 1949), *rev'g* a Memorandum Opinion of this Court; *Home Interiors & Gifts, Inc. v. Commissioner*, 73 T.C. at 1155-1156. No single factor is dispositive of the issue; instead, the Court's decision must be based on a careful consideration of applicable factors in the light of the relevant facts. See *Mayson Mfg. Co. v. Commissioner*, 178 F.2d at 119.
>
> Some courts have supplemented or completely replaced the multifactor approach for analyzing shareholder-employee compensation with the independent investor test. See *Mulcahy, Pauritsch, Salvador & Co. v. Commissioner*, 680 F.3d 867 (7th Cir. 2012), *aff'g* T.C. Memo. 2011-. The Court of Appeals for the Eighth Circuit has not opined on this test yet. But in cases appealable to that Court of Appeals, we have applied the independent investor test as a way to view each factor. See *Wagner Constr., Inc. v. Commissioner*, T.C. Memo. 2001-160, 2001 WL 739234, at *22 (examining the factors from the perspective of an independent investor). The independent investor test asks whether an inactive, independent investor would have been willing to pay the amount of disputed shareholder-employee compensation considering the particular facts of each case. *Miller & Sons Drywall, Inc. v. Commissioner*, T.C. Memo. 2005-114, 2005 WL 1200189, at *5. In assessing whether Mr. Dakovich's management fees were reasonable in amount, we find respondent's expert witness report prepared by Ken Nunes (Nunes report) helpful and persuasive. Mr. Nunes is a chartered financial analyst, and we recognized him as an expert in business valuation with experience in valuing compensation arrangements…

The court then discussed “the employee’s qualifications and the nature, extent, and scope of employee’s work,” that “a company’s performance in the context of prevailing general economic conditions reveals some information about the effectiveness of management,” and a comparison of the shareholder-employee compensation with prevailing rates of compensation paid to individuals in similar positions in comparable companies within the same industry, then continued:

> Courts also have compared compensation paid to shareholder-employees to gross income and net income in deciding whether compensation is reasonable. See *Owensby & Kritikos, Inc. v. Commissioner*, 819 F.2d at 1322-1323; *Wagner Constr., Inc. v. Commissioner*, 2001 WL 739234, at *25. Computing shareholder compensation paid as a percentage of net income before shareholder compensation is paid often is more probative as it can show whether the shareholder compensation is actually a disguised distribution of profits. *Wagner Constr., Inc. v. Commissioner*, 2001 WL 739234, at *25 (citing *Owensby & Kritikos, Inc. v. Commissioner*, 819 F.2d at 1325-1326).
>
> Petitioner’s total shareholder compensation[5] was 90%[6] of net income for tax year 2012, over 100% of net income for tax year 2013, and 67% of net income for tax year 2014. We hold that this factor weighs against petitioner. See *Miller & Sons Drywall, Inc. v. Commissioner*, 2005 WL 1200189, at *13 (holding that this factor weighed in favor of the Commissioner when shareholder compensation was 89%, 108%, and 74% of net income before taxes and shareholder compensation for the years in issue).
>
> [5] Total shareholder compensation is Mr. Dakovich’s total compensation (salary, bonus, and management fees) plus the management fees paid to the other two shareholders, which was $1,705,760 for tax year 2012, $2,103,560 for tax year 2013, and $2,287,649 for tax year 2014.
>
> [6] To compute these percentages, we divided the total shareholder compensation each year by the sum of (i) the net income reported on petitioner’s audited financial statements and (ii) total shareholder compensation. Petitioner had net income of $192,608 for 2013, a net loss of $131,710 for 2013, and net income of $1,103,149 for 2014.
>
> **e. Comparison of Salary to Distributions to Stockholders and Retained Earnings**
>
> As discussed above, the failure to pay more than a minimal amount of dividends may suggest that some of the amount paid as shareholder-employee compensation is a dividend. See *Charles Schneider & Co. v. Commissioner*, 500 F.2d 148. A corporation is not required to pay dividends, however; shareholders may be equally content with appreciation of their stock. See *Home Interiors & Gifts, Inc. v. Commissioner*, 73 T.C. at 1161. The independent investor test is used often to assess whether the amount of shareholder compensation was reasonable in the light of the return on equity the corporation’s shareholders received during the same timeframe. *Miller & Sons Drywall, Inc. v. Commissioner*, 2005 WL 1200189, at *5 (citing *Rapco, Inc. v. Commissioner*, 85 F.3d 950, 955 (2d Cir. 1996), *aff’g* T.C. Memo. 1995-128).
>
> Petitioner never paid dividends. And while petitioner argues correctly that it was not required to pay dividends, it did not show that the shareholders received a fair return on account of their shares. Petitioner did not present evidence or expert witness testimony regarding what return on equity an independent investor might find reasonable. And

while we can calculate petitioner's return on equity, we do not have sufficient information to assess whether such a return was adequate for petitioner's industry. See *id*. at *13 n.4 (calculating return on equity by dividing the year's net income by the year's beginning shareholders equity).[7]

[7] Here, that formula indicates returns of approximately 1% for tax year 2012, 11% for tax year 2013, and 7% for tax year 2014.

Additionally, the Nunes report contains data and analysis that indicates that petitioner's shareholder compensation scheme did not allow for adequate shareholder returns. The Nunes report concludes that petitioner's operating income margins were significantly below those of its industry peers. The top quarter of petitioner's industry peers had operating margins of 6% of revenue during the years in issue, while half had operating margins of more than 2.5%. Petitioner's operating margins before paying management fees were strong compared to those of its industry peers (4.4% in tax year 2012, 7.6% in tax year 2013, and 8.1% in tax year 2014) but were relatively very weak once management fees were paid (negative 0.1%, negative 0.2%, and 0.4%), as computed by the Nunes report. While the Nunes report does not compare petitioner's return on equity to those of its industry peers, we find its conclusions regarding petitioner's operating margins illuminating. By paying such high shareholder compensation, petitioner was less profitable as illustrated by its lower operating income margins [*48] compared to those of its industry peers. Low profitability led to relatively lower retained earnings and, consequently, low returns for the hypothetical independent investor. At bottom, petitioner has not shown that a hypothetical independent investor in its stock would find its investment returns reasonable with the shareholder compensation.[8] Accordingly, we find that this factor weighs heavily in favor of respondent.

[8] And we think that conclusion applies equally to management fees paid to all three shareholders, not just Mr. Dakovich.

In sum, petitioner has not carried its burden of showing that the management fees paid to Mr. Dakovich were reasonable. They were not for any services beyond his responsibilities as president, and respondent has provided persuasive expert testimony that Mr. Dakovich was already overcompensated by his salary and bonus alone. As we concluded above, there are numerous indicia that the management fees paid to Mr. Dakovich were simply disguised distributions; and much of the evidence supports the conclusion that the management fees paid to him were not reasonable. Finally, petitioner never paid dividends to its shareholders and presented no evidence showing that an independent investor would have been satisfied with investment returns after shareholder compensation.

The management fee and employment arguments arise in a similar context. Because each separate employer generally must pay FICA, if a person works for more than one related company then one company might pay the compensation to the person and collect a management fee (or fees under an employee leasing arrangement) from the other related companies. For an example of how sloppiness in doing that can get a taxpayer into trouble, see *Blossom Day Care Centers, Inc. v. Commissioner*, T.C. Memo. 2021-86, in part II.A.2.c Avoiding Double Taxation and Self-Employment Tax.

II.A.1.c. Using a C Corporation to Facilitate Future Public Offering

Generally, when a company goes public, it does so as a C corporation. Entrepreneurs with that dream are tempted to do business using a C corporation.

As part II.E Recommended Structure for Entities discusses, using an LLC taxed as a sole proprietorship or partnership tends to be best. When planning to go public, one needs to view that as any other sale and consider part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations – the sale of a partnership interest generates an insider basis step-up, whereas the sale of C corporation stock does not. The purchaser of a partnership interest should be willing to pay more for a partnership interest than would the purchaser of stock in a C corporation, because the purchase of a partnership interest generates the tax benefit of inside basis step-up that the purchase of stock in a C corporation.

The "Up-C" structure takes advantage of this difference:[46] First, the owners of a partnership orchestrate a public offering of a C corporation shell. The C corporation uses the proceeds to buy the LLC interests. The resulting inside basis step-up[47] generates valuable tax benefits. Generally, the market supports a tax reimbursement agreement (TRA) passing along to the selling LLC owners about 85% of the tax benefits. By increasing the purchase price, the TRA generates even more tax benefits – a taxpayer-friendly circular calculation.

Entrepreneurs also like the idea of attracting venture capital investors. Some VC investors appreciate the tax benefits of a partnership. Others might set up a C corporation to own the LLC so that the corporation pays all of the taxes and the investment does not complicate the VC investors' tax returns. Sometimes the VC investors force the business to be a C corporation. As described in part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation, founders and others to whom a C corporation issues stock may exclude a portion of their gain from income.[48] Founders may get the best tax results under that exclusion by starting as a partnership and then converting to that partnership just over 5 years before they cash out.[49]

II.A.1.d. Lending Securities

II.A.1.d.i. Code § 1058 Loan of Securities

Predating Code § 1058 is a common stock brokerage practice that Rev. Rul. 57-451 approved as not being a taxable disposition:

---

[46] See Polsky and Rosenzweig, "The Up-C Revolution" (10/13/2016), University of Georgia School of Law Legal Studies Research Paper No. 2016-40, available at SSRN: https://ssrn.com/abstract=2851872. See also Bilsky and Goodman, "An Alternate Route to an IPO: Up-C Partnership Tax Considerations," Parts 1 and 2 in the November 2015 and December 2015 issues of *The Tax Adviser*.
[47] See part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.
[48] Partnerships and S corporations have less need for this exclusion than do C corporations, because reinvested earnings increase the outside basis of the owners of partnerships and S corporations, whereas reinvested earnings do not have that effect of C corporation shareholders. For a comparison of taxation of gain not reflected by reinvested earnings, see part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis.
[49] See part II.Q.7.k.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership? for that recommendation.

The Internal Revenue Service has been requested to determine whether the situations described below involve the "disposition" of stock acquired pursuant to a restricted stock option within the meaning of section 421(d)(4) of the Internal Revenue Code of 1954.

(1) The stockholder deposits his stock with a bank or trust company in an "agency" account and authorizes such company to collect the dividends thereon. Although the stock certificate remains in the stockholder's name, for convenience the stockholder signs a stock assignment form in blank, enabling the bank or trust company to dispose of the shares upon subsequent order of the stockholder.

(2) The stockholder deposits his stock with his broker in a "safekeeping" account and, at the time of deposit, endorses the stock certificates and then authorizes the broker to "lend" such certificates in the ordinary course of the broker's business to other customers of the broker. The broker has the certificates cancelled and new ones reissued in his own name.

(3) Same as (2) above, except that the stockholder does not authorize the broker to "lend" the securities to other customers and the certificates remain in the stockholder's name.

Section 421 of the Internal Revenue Code of 1954 provides for the Federal income tax treatment of restricted stock options. In addition to defining a restricted stock option, section 421 sets forth the tax consequences of the receipt and subsequent exercise or disposition of the stock option and the tax consequences of the sale or other disposition of the stock obtained by exercise of the option. Subsection (d)(4) defines the term "disposition" as a sale, exchange, gift, or transfer of legal title but not, among other things, an exchange to which section 1036 of the Code applies.

The phrase "transfer of legal title" is defined neither in section 421 nor in the proposed regulations under that section. However, the phrase has been frequently considered in connection with Federal and State stock transfer taxation; and, in the absence of a definition of "transfer of legal title" in section 421, the construction placed upon the phrase by courts in the area of stock transfer taxes will be relied upon.

Courts, in cases concerning stock transfer taxes, have observed that the expression "legal title" is frequently used in stock transactions to describe a naked appearance of title, or a limited title appearing complete on its face. See *William P. Bonbright & Co. v. New York*, 165 App. Div. 640, 151 N. Y. Supp. 35 (1915); and *Travis v. Ann Arbor Co.*, 180 App. Div. 799, 168 N.Y.Supp. 53 (1917), *affirmed without opinion*, 227 N.Y. 640, 126 N.E. 925 (1919). On this basis, it has been held, in cases constructing the Federal stock transfer tax provisions of the Code, that a nominee in whose name stock is registered on the books of the corporation holds legal title to such stocks. See *Founders General Corp. v. Hoey*, 300 U.S. 268, Ct. D. 1209, C. B. 1937-1, 344; and *Nee v. United Funds, Inc.*, 169 Fed.(2) 33. However, in *Selected American Shares, Inc. v. United States*, 196 Fed.(2) 473, the court viewed a mere custodian of stock as the alter ego of the true owner and as taking no legal title to stock deposited with it for safe-keeping where the stock, accompanied by a blank assignment, was not reissued in the custodian's name so as to necessitate a retransfer by the custodian in the event of a subsequent sale by the true owner.

From the foregoing, it is held in the first and third situations described above, that where certificates representing shares of stock received by an optionee under a restricted stock option are endorsed or assigned in blank by such optionee and are deposited with a custodian, such as a bank or trust company or a broker, under a written agreement between the parties providing that such stock is to be held or disposed of by such custodian for, and subject at all times to the instructions of, the optionee, who remains the registered owner of such certificates on the books of the corporation, such deposit does not constitute a "disposition" of the stock within the meaning of section 421(d)(4) of the Internal Revenue Code of 1954.

The second situation described above, wherein the optionee authorizes the broker to "lend" his stock certificates to other customers in the ordinary course of business, presumably anticipates the "loan" of the stock to others for use in satisfying obligations incurred in short sale transactions. In such a case, all of the incidents of ownership in the stock and not mere legal title, pass to the "borrowing" customer from the "lending" broker. For such incidents of ownership, the "lending" broker has substituted the personal obligation, wholly contractual, of the "borrowing" customer to restore him, on demand, to the economic position in which he would have been as owner of the stock, had the "loan" transaction not been entered into. See *Provost v. United States*, 269, U.S. 443, T.D. 3811, C.B. V-1, 417 (1926). Since the "lending" broker is not acting as the agent of the optionee in such a transaction, he must have necessarily obtained from the optionee all of the incidents of ownership in the stock which he passes to his "borrowing" customer.

Section 1036 of the Code, which relates to the exchange of stock for stock, provides as follows:

(a) *General Rule*. No gain or loss shall be recognized if common stock in a corporation is exchanged solely for common stock in the same corporation, or if preferred stock in a corporation is exchanged solely for preferred stock in the same corporation.

Section 1.1036-1(a) of the Income Tax Regulations provides that the exchange referred to in section 1036 is not limited to a transaction between a stockholder and a corporation but also includes an exchange between two individual stockholders.

If this transaction, when completed, amounts to an exchange between two stockholders of common stock for other common stock (or preferred stock for preferred stock) in the same corporation, there would be no "disposition" of the optionee's stock within section 421. If, for example, by exercise of a restricted stock option, an optionee obtains a certificate for 100 shares of common stock in M Corporation, and if he then endorses the certificate, deposits it with his broker, and authorizes the broker to "lend" the stock to other customers, there would be no "disposition" of the stock for purposes of section 421 if the broker satisfies his resulting obligation to the optionee by transferring to him 100 shares of common stock in M Corporation. If the broker, on the other hand, satisfies his obligation by delivering to the optionee stock or other property which does not bring the transaction within the scope of section 1036, the optionee makes a "disposition" of his stock for purposes of section 421 as of that time.

That the delivery of shares of stock by the optionee to his broker and the satisfaction by the latter of the resulting obligation to replace them may constitute an exchange is

> supported by authority. A simultaneous delivery of property is not essential to an exchange. If the parties so intend, title to property delivered on one side may pass even though the contract remains executory on the other side.
>
> Accordingly, it is concluded that the delivery of endorsed certificates of stock by the optionee to a broker, the latter being authorized to "lend" the certificates to his customers in the ordinary course of trade or business and having such certificates cancelled and new ones reissued in his own name, and the satisfaction by the broker of the resulting obligation to replace such certificates, will not constitute a "disposition" if the broker satisfies such obligation with certificates representing shares of stock of such kind and amount as to bring the then-completed exchange within the scope of section 1036 of the Code.

Anschutz Co. v. Commissioner, 135 T.C. 78, 81-82 (2010), *aff'd* 664 F3d 313 (10th Cir. 2011), described share lending:

> Share-lending agreements are often entered into by equity holders who have taken a long position with respect to a stock and plan on holding it for an extended period. The equity owner can agree to lend the stock to a counterparty, who can then use the borrowed shares to increase market liquidity and facilitate stock sales. For example, the equity owner can lend shares to an investment bank, which could then use the lent shares to execute short sales on behalf of its clients.
>
> The borrower will normally pledge cash collateral, and the lender will derive a profit lending the shares by retaining a portion of the interest earned by this cash collateral. At the end of the lending period, the counterparty will return the borrowed shares to the equity owner/lender.

Code § 1058, "Transfers of securities under certain agreements," codifies Rev. Rul. 57-451[50] by providing in subsection (a):

> *General rule*. In the case of a taxpayer who transfers securities (as defined in section 1236(c)) pursuant to an agreement which meets the requirements of subsection (b), no gain or loss shall be recognized on the exchange of such securities by the taxpayer for an obligation under such agreement, or on the exchange of rights under such agreement by that taxpayer for securities identical to the securities transferred by that taxpayer.

Code § 1236(c) defines "security" as "any share of stock in any corporation, certificate of stock or interest in any corporation, note, bond, debenture, or evidence of indebtedness, or any evidence of an interest in or right to subscribe to or purchase any of the foregoing."

Given that Code § 1058(a) provides no gain or loss, Code § 1058(c), "Basis," provides, "Property acquired by a taxpayer described in subsection (a), in a transaction described in that subsection, shall have the same basis as the property transferred by that taxpayer."[51]

---

[50] Referring to this as a codification was *Calloway v. Commissioner*, 135 T.C. 26, 43 (2010) (a reviewed opinion), *aff'd* 691 F3d 1315 (11th Cir. 2012)
[51] Prop. Reg. § 1.1058-1(c), "Basis," provides:

Code § 1058(b) requires an agreement to:

(1) provide for the return to the transferor of securities identical to the securities transferred.

(2) require that payments shall be made to the transferor of amounts equivalent to all interest, dividends, and other distributions which the owner of the securities is entitled to receive during the period beginning with the transfer of the securities by the transferor and ending with the transfer of identical securities back to the transferor;

(3) not reduce the risk of loss or opportunity for gain of the transferor of the securities in the securities transferred; and

(4) meet such other requirements as the Secretary may by regulation prescribe.

Promulgated in 1983, with no substantive explanation in its preamble, Prop. Reg. § 1.1058-1(b), "Agreement requirements," provides:

> The agreement between the borrower and lender described in paragraph (a) of this section must be in writing and must -
>
> (1) Require the borrower to return to the lender securities identical to those which were lent to the borrower. For the purposes of this section securities are defined in section 1236(c). Identical securities are securities of the same class and issue as the securities lent to the borrower. If, however, the agreement permits the borrower to return equivalent securities in the event of reorganization, recapitalization or merger of the issuer of the securities during the term of the loan, this requirement will be deemed to be satisfied.
>
> (2) Require the borrower to make payments to the lender of amounts equivalent to all interest, dividends, and other distributions which the owner of the securities is entitled to for the period during which the securities are borrowed.

> (1) *Lender's basis in securities*. If this section applies, the lender's basis in the identical securities returned by the borrower shall be the same as the lender's basis in the securities lent to the borrower.
> (2) *Lender's basis in contractual obligation*. If this section applies, the lender's basis in the contractual obligation received from the borrower in exchange for the lender's securities is equal to the lender's securities is equal to the lender's basis in the securities exchanged.

Prop. Reg. § 1.1058-1(g) refers to Prop. Reg. § 1.1223-2 regarding the lender's holding period. Prop. Reg. § 1.1223-2(a), "General rule," provides:

> In the case of a transfer of securities pursuant to an agreement which meets the requirements of section 1058 (relating to transfers of securities under certain agreements), the holding period in the hands of the lender of the securities received by the lender from the borrower shall include -
> (1) The period for which the lender held the securities which were transferred to the borrower; and
> (2) The period between the transfer of the securities from the lender to the borrower and the return of the securities to the lender.

(3) Not reduce the lender's risk of loss or opportunity for gain. Accordingly, the agreement must provide that the lender may terminate the loan upon notice of not more than 5 business days.

> See section 512(a)(5) and the regulations thereunder for additional requirements with respect to loans of securities made by exempt organizations.

Prop. Reg. § 1.1058-1(d), "Treatment of payments to lender," provides:

> Except as otherwise provided in section 512(a)(5), a payment of amounts required to be paid by the borrower that are equivalent to all interest, dividends, and other distributions as provided in paragraph (b)(2) of this section, shall be treated by the lender as a fee for the temporary use of property. Thus, for example, an amount received by the lender that is equivalent to a dividend paid during the term of the loan shall not constitute a dividend to the lender for purposes of the Internal Revenue Code, but shall be taken into account as ordinary income.

Prop. Reg. § 1.1058-1(e), "Noncompliance with section 1058," provides:[52]

(1) If a transfer of securities is intended to comply with section 1058 and fails to do so because the contractual obligation does not meet the requirements of section 1058(b) and § 1.1058-1(b), gain or loss is recognized in accordance with section 1001 and § 1.1001-1(a) upon the initial transfer of the securities. However, see section 1091 of the Code for disallowance of loss from wash sales of stock or securities.

(2) If securities are transferred pursuant to an agreement which meets the requirements of section 1058(b) and § 1058-1(b) and the borrower fails to return to the lender securities identical to the securities transferred as required by the agreement, or otherwise defaults under the agreement, gain or loss is recognized on the day the borrower fails to return identical securities as required by the agreement, or otherwise defaults under the agreement. However, see section 1091 of the Code for disallowance of loss from wash sales of stock or securities.

When the loaned securities are involved in a corporate restructuring, Prop. Reg. § 1.1058-1(f), "Special rule," explains:

---

[52] Reg. § 1.1223-2(a), "Failure to comply with section 1058," provides holding period rules:

(1) If a transfer of securities is intended to comply with section 1058 and fails to do so because the contractual obligation does not meet the requirements of section 1058(b) and §1.1058-1(b), the holding period in the hands of the lender of the securities transferred to the borrower, shall terminate on the day the securities are transferred to the borrower and the holding period in the hands of the borrower of the property transferred to it shall begin on the date that the securities are delivered pursuant to the transfer loan agreement.

(2) If securities are transferred pursuant to an agreement which meets the requirements of section 1058(b) and § 1.1058-1(b) and the borrower fails to return identical securities as required by the agreement or otherwise defaults under the agreement, the holding period in the hands of the lender of the securities transferred to the borrower shall terminate on the day the borrower fails to return identical securities as required by the agreement or otherwise defaults under the agreement, and the holding period in the hands of the borrower of the securities transferred to it shall begin on the day the borrower fails to return identical securities as required by the agreement or otherwise defaults under the agreement.

> For purposes of determining the tax consequences to the lender of securities when a merger, recapitalization or reorganization (including, but not limited to, a reorganization described in section 368(a)(1) of the Internal Revenue Code) of the issuer occurs during the term of a loan to which section 1058 applies, the section 1058 loan transaction is deemed terminated immediately prior to the merger, recapitalization or reorganization and a second section 1058 transaction is deemed entered into immediately following the merger, recapitalization or reorganization. Therefore, the borrower of the securities is deemed to have returned the securities to the lender immediately prior to the merger, recapitalization or reorganization and immediately following the merger, recapitalization or reorganization the lender and borrower are deemed to have entered into a second section 1058 loan transaction, on terms identical to the original section 1058 loan transaction. The special rule in this paragraph (f) shall not apply in the case where the lender ultimately is repaid with securities identical to the securities originally transferred.

Prop. Reg. § 1.1058-2 provides examples illustrating Prop. Reg. § 1.1058-1.

Prop. Reg. § 1.1058-2, Example (1), provides:

> A owns 1,000 shares of XYZ common stock. A instructs A's broker, B, to sell the XYZ stock. B sells to C. After the sale, B learns that A will not be able to deliver to B certificates representing the 1,000 shares in time for B to deliver them to C on the settlement date. B decides to effect the delivery by borrowing stock from a third party. To this end, B enters into a written agreement with D, an non-exempt corporation having a large stock portfolio of XYZ common stock. The agreement includes the following terms:
>
> (i) D will transfer to B certificates representing 1,000 shares of XYZ common stock.
>
> (ii) B will pay D an amount equivalent to any dividends or other distributions paid on the XYZ stock during the period of the loan.
>
> (iii) Regardless of any increases or decreases in the market value of XYZ common stock, B will transfer to D 1,000 shares of XYZ common stock of the same issue as that of the XYZ common stock transferred from D to B.
>
> (iv) B agrees that upon notice of 5 business days, B will return identical securities to D.
>
> The agreement between B and D satisfies the requirements of paragraph (b) of § 1.1058-1. The agreement is in writing. It requires the borrower, B, to return to the lender, D, identical securities and to pay to the lender, D, amounts equivalent to any dividends or other distributions paid on the stock during the period of the loan. It does not reduce D's risk of loss or opportunity for gain because, regardless of fluctuations in the market value of XYZ common stock, B is obligated to return 1,000 shares of XYZ common stock.

Prop. Reg. § 1.1058-2, Example (2), provides:

> Assume the same facts as in Example (1) except that the agreement between B and D includes the following additional terms:

(1) Upon D's transfer to B of the certificates representing the 1,000 shares of XYZ common stock, B will transfer to D, cash equal to the market value of the XYZ common stock on the business day preceding the transfer, as collateral for the stock. The collateral will be increased or decreased daily to reflect increases or decreases in the market value of the XYZ stock during the period of the loan.

(2) B agrees that upon notice of 5 business days, B will return to D 1,000 shares of XYZ common stock, or the equivalent thereof in the event of reorganization, recapitalization, or merger of XYZ during the term of the loan. Upon delivery of the stock to D, D will return the cash collateral to B.

The agreement between B and D satisfies the requirements of paragraph (b) of this section. If XYZ is merged into another corporation and B returns to D an equivalent amount of stock in the resulting corporation, paragraph (f) of this section provides that the section 1058 transaction is deemed terminated immediately before the merger. Thus, D is deemed to be the owner of the XYZ common stock at the time of the merger. Furthermore, paragraph (a) of this section provides that D does not recognize gain or loss upon the transfer of the XYZ common stock to B or upon the return of the stock of the resulting corporation to D. Nonetheless, gain or loss may be recognized with respect to the merger. If the merger is described in section 368(a)(1), gain will be recognized to the extent section 354(a)(2) or 356 applies to the merger. If the merger is not described in section 368(a)(1), D generally will recognize the entire gain or loss with respect to such stock as a result of the merger.

Prop. Reg. § 1.1058-2, Example (3), provides:

Assume the same facts as in example (2) and in addition that on March 1, D transfers certificates representing 1,000 shares of XYZ common stock to B. D's basis in the stock is $60,000. On the business day preceding the transfer, the stock has a market value of $75 a share. Consequently, B transfers to D $75,000 as collateral for the stock. B then uses the certificates to complete a timely delivery to C. On March 20, when the market value of XYZ common stock is $69 a share, D gives B notice of termination. On March 24, B delivers to D 1,000 shares of XYZ common stock of the same issue as that of the XYZ common stock transferred to B on March 1. D returns the $69,000 cash collateral to B. (Because the market value of the stock had declined during the period of the loan, the collateral was adjusted to reflect the new market value and the $6,000 had previously been returned to B.) Because the agreement between B and D contains the provisions required by paragraph (b) of § 1.1058-1 and such provisions were complied with, D does not recognize gain on the transfer of the XYZ common stock to B. Nor does D recognize gain upon the return of XYZ common stock. D's basis in the XYZ common stock returned to it by B is $60,000. As to the holding period of the XYZ common stock returned to D, see § 1.1223-2(a).

Prop. Reg. § 1.1058-2, Example (4), provides:

Assume the same facts as in example (3) and in addition that on March 3, XYZ pays a dividend on its common stock. B pays to D an amount equivalent to the dividend. The amount paid by B does not constitute a dividend to D, but rather constitutes a fee for the temporary use of property as provided in § 1.1058-1(d).

Prop. Reg. § 1.1058-2, Example (5), provides:

> (i) Assume the same facts as in example (3) except that on March 24 B notifies D that delivery of the 1000 shares of XYZ common stock, of the same issue as that of the XYZ common stock transferred to B on March 1, cannot be completed on March 24. Assume further that B informs D that delivery would be completed on March 27.
>
> (ii) If B and D agree to extend the time period in which B is to return the identical securities to D till March 27, then the section 1058 agreement will not be treated as breached when B delivers the securities on March 27, pursuant to the modified section 1058 agreement. As a result, D does not recognize gain on the transfer of XYZ common stock to B. Nor does D recognize gain upon the return of XYZ common stock.
>
> (iii) If B and D do not agree to extend the time period, in which B is to return the identical securities to D, then as of March 25 B's failure to transfer the identical securities as required by the agreement will be treated as a breach of the agreement. As a result D will be treated as selling the XYZ common stock on March 25. D must then recognize gain or (subject to 1091) loss, whichever is appropriate, on the sale of the securities.

Rev. Proc. 2008-63, § 1, "Purpose," provides:

> This revenue procedure provides guidance with respect to the application of § 1058(a) of the Internal Revenue Code to situations in which securities are originally transferred pursuant to an agreement that meets the requirements of § 1058(b), the transferee subsequently defaults under the agreement as a direct or indirect result of its bankruptcy (or the bankruptcy of an affiliate), and as soon as is commercially practicable (but in no event more than 30 days following the default), the transferor uses collateral provided pursuant to the agreement to purchase identical securities.

Rev. Proc. 2008-63, § 3, "Background," provides:

> .01. Section 1058(a) provides that in the case of a taxpayer who transfers securities (as defined in § 1236(c)) pursuant to an agreement which meets the requirements of § 1058(b), no gain or loss shall be recognized on the exchange of such securities by the taxpayer for an obligation under such agreement, or on the exchange of rights under such agreement by that taxpayer for securities identical to the securities transferred by that taxpayer.
>
> .02. In adding § 1058 to the Code, Congress intended to provide nonrecognition treatment to securities loans in which "the contractual obligation [to return identical securities] does not differ materially either in kind or in extent from the securities exchanged...." S. Rep. No. 762, 95th Cong., 2d Sess. 7 (1978); 1978-2 C.B. 357, 361 ("Senate Report"). Congress also sought to encourage securities holders to make their securities available for loans. Congress explained:
>
>> Under present law, uncertainty has developed as to the correct income tax treatment of certain securities lending transactions. As a result, some owners of securities are reluctant to enter into such transactions.

Senate Report at 3; 1978-2 C.B. 359.

> Because of time delays which a broker may face in obtaining securities (from the seller or transfer agent) to deliver to a purchaser, brokers are frequently required to borrow securities from organizations and individuals with investment portfolios for use in completing these market transactions. It is generally thought to be desirable to encourage organizations and individuals with securities holdings to make the securities available for such loans since the greater the volume of securities available for loan the less frequently will brokers fail to deliver a security to a purchaser within the time required by the relevant market rules.

Senate Report at 5; 1978-2 C.B 360.

.03. Recently, a significant number of securities loans have terminated as a result of a default by the borrower of the securities. These defaults are often the direct or indirect result of the bankruptcy of the borrower (or an affiliate of the borrower). For example, the bankruptcy of the borrower might, by itself, constitute an event of default under the securities loan agreement. Likewise, the bankruptcy of an affiliate of the borrower might indirectly prevent the borrower from returning identical securities upon notice of termination by the lender, if, for example, such a bankruptcy affects the borrower's liquidity and practical ability to acquire identical securities in the secondary market. In many of these situations, the lender thereafter purchases identical securities and applies collateral provided by the borrower pursuant to the securities loan agreement against the purchase price (and the borrower's obligation to return identical securities is terminated).

Rev. Proc. 2008-63, § 3, "Scope," provides:

This revenue procedure applies to taxpayers ("Lenders") who have transferred securities to an unrelated person ("Borrower") in a securities loan in which –

.01. The securities loan agreement ("Agreement") satisfies the requirements of § 1058(b);

.02. The Agreement requires that the Borrower transfer collateral to secure the Borrower's obligations under the Agreement;

.03. The Borrower defaults under the Agreement as a direct or indirect result of its bankruptcy (or the bankruptcy of an affiliate); and

.04. As soon as is commercially practicable after the default (but in no event more than 30 days following the default), the Lender applies collateral provided under the Agreement (or cash generated by the sale of such collateral) to the purchase of identical securities.

Rev. Proc. 2008-63, § 4, "Application," provides:

For taxpayers within the scope of this revenue procedure, the Internal Revenue Service will treat the purchase described in section 3.04 of this revenue procedure as an

> exchange of rights under the Agreement for identical securities to which § 1058(a) applies.

Samueli v. Commissioner, 132 T.C. 37 (2009), had the following Official Tax Court Syllabus:

> Ps-S purchased an approximate $1.64 billion of securities from F in October 2001 and simultaneously transferred the securities back to F pursuant to F's promise to transfer identical securities to Ps-S on Jan. 15, 2003. The agreement between Ps-S and F allowed Ps-S to require an earlier transfer of the identical securities only by terminating the transaction on July 1 or Dec. 2, 2002. Ps-S did not require an earlier transfer and sold the securities to F on Jan. 15, 2003. Ps treated the transaction as a securities lending arrangement subject to sec. 1058, I.R.C., and Ps-S reported an approximate $50.6 million long-term capital gain on the sale. Ps also deducted millions of dollars of interest related to the transaction. R determined that the transaction was not a securities lending arrangement subject to sec. 1058, I.R.C. Instead, R determined that Ps-S purchased the securities from and immediately sold the securities to F in 2001 at no gain or loss and then repurchased from (pursuant to a forward contract) and immediately resold the securities to F in 2003 realizing an approximate $13.5 million short-term capital gain. R also disallowed all of Ps' interest deductions because the corresponding debt that Ps claimed was related to the transaction did not exist.
>
> *Held*: The transaction is not a securities lending arrangement subject to sec. 1058, I.R.C., because the ability of Ps-S to cause F to transfer the identical securities to Ps-S on only three of the approximate 450 days during the transaction period reduced their "opportunity for gain … in the transferred securities" under sec. 1058(b)(3), I.R.C. The substance of the transaction was the purchases and sales that R determined.
>
> *Held, further*, Ps are not entitled to their claimed interest deductions because the debt Ps claimed was related to the transaction did not exist.

Samueli v. Commissioner, 132 T.C. 37 (2009), *aff'd* 661 F3d 399 (9th Cir. 2011), held:

> The primary issue under section 1058(b)(3) is ripe for summary judgment. That issue turns on the interpretation of section 1058(b)(3), and the parties agree on all material facts relating to the issue. Thus, to decide the issue we need only interpret the plain meaning of the text "not reduce the … opportunity for gain of the transferor of the securities in the securities transferred" and apply that interpretation to the agreed-upon facts. See *Glass v. Commissioner*, 124 T.C. 258, 281 (2005), *affd*. 471 F.3d 698 (6th Cir. 2006). We interpret that text as written in the setting of the statute as a whole. See *Fla. Country Clubs, Inc. v. Commissioner*, *supra* at 75-76; see also *Huffman v. Commissioner*, 978 F.2d 1139, 1145 (9th Cir. 1992), *affg*. T.C. Memo. 1991-144. We focus on the meaning of the phrase "not reduce the … opportunity for gain of the transferor of the securities in the securities transferred." We understand the verb "reduce" to mean "to diminish in size, amount, extent, or number." *Webster's Third New International Dictionary* 1905 (2002). We understand the noun "opportunity" to mean "a combination of circumstances, time, and place suitable or favorable for a particular activity or action" and to be synonymous with the word "chance." *Id*. at 1583. We therefore read the relevant phrase in the context of the statutory scheme to mean that the Agreement will not meet the requirement set forth in section 1058(b)(3) if the Agreement diminished the Samuelis' chance to realize a gain that was present in the Securities during the transaction period. Stated differently, the Samuelis' opportunity for

gain as to the Securities was reduced on account of the Agreement if during the transaction period their ability to realize a gain in the Securities was less with the Agreement than it would have been without the Agreement.

We conclude that the Agreement reduced the Samuelis' opportunity for gain in the Securities for purposes of section 1058(b)(3) because the Agreement prevented the Samuelis on all but three days of the approximate 450-day transaction period from causing Refco to transfer the Securities to the Samuelis. Absent the Agreement, the Samuelis could have sold the Securities and realized any inherent gain whenever they wanted to simply by instructing their broker to execute such a sale. With the Agreement, however, the Samuelis' ability to realize such an inherent gain was severely reduced in that the Samuelis could realize such a gain only if the gain continued to be present on one or more of the three stated days. Stated differently, the Samuelis' opportunity for gain was reduced by the Agreement because the Agreement limited their ability to sell the Securities at any time that the possibility for a profitable sale arose.[10]

[10] Petitioners concede that the Agreement increased the Samuelis' risk of loss because the Samuelis could not terminate the Transaction at any time. We infer from this concession that the Agreement also reduced the Samuelis' opportunity for gain as to the Securities.

In so concluding, we reject petitioners' argument that they always retained the opportunity for gain in the Securities by continuing to own the Securities from the day they purchased them until the day they sold them. A taxpayer's opportunity for gain under petitioners' theory is not reduced for section 1058 purposes if the taxpayer retains the opportunity for gain as of the end of a loan period. The statute does not speak to retaining the opportunity for gain. It speaks to whether the opportunity for gain was reduced.

In addition, we read the relevant requirement differently from petitioners to measure a taxpayer's opportunity for gain as of each day during the loan period. A taxpayer has such an opportunity for gain as to a security only if the taxpayer is able to effect a sale of the security in the ordinary course of the relevant market (*e.g.*, by calling a broker to place a sale) whenever the security is in-the-money. A significant impediment to the taxpayer's ability to effect such a sale, e.g., as occurred here through the specific 3-day limit as to when the Samuelis could demand that Refco transfer the Securities to them, is a reduction in a taxpayer's opportunity for gain.

Nor did the Samuelis' opportunity for gain turn, as petitioners would have it, on the consequences of the Samuelis' variable rate financing arrangement. Petitioners assert that their opportunity for gain as to the Securities depended entirely on whether their fixed return on the Securities was greater than their financing expense (i*.e.*, the variable rate fee paid to Refco) and conclude that the Agreement did not reduce this opportunity because they continued to retain this opportunity throughout the transaction period. Section 1058(b)(3) speaks solely to the transferor's "opportunity for gain … in the securities transferred" and does not implicate the consideration of any independent gain that the transferor may realize outside of those securities (*e.g.*, through a favorable financing arrangement). Thus, while the profitability of the Transaction may have depended on the return that the Samuelis earned on the Securities vis-a-vis the amount of the variable rate fee that they paid to Refco, the Samuelis' opportunity for gain in the transferred securities rested on the fluctuation in the value of the Securities.

We also reject petitioners' assertion that the Samuelis could have locked in their gain in the Securities on any day of the transaction period simply by entering in the marketplace into a financial transaction that allowed them to fix their gain, *e.g.*, by purchasing an option to sell the Securities at a fixed price. This assertion has no direct bearing on our inquiry. Section 1058 concerns itself only with the agreement connected with the transfer of the securities. Whether the Samuelis could have entered into another agreement to lock in their gain is of no moment.[11]

[11] Petitioners also assert that the Transaction is a routine securities lending transaction in the marketplace. We disagree. A lender could terminate a security loan on any business day under the standard form used in the marketplace. The parties to the Transaction, however, modified the standard form to eliminate that standard provision and to prevent the Samuelis from demanding that the Securities be transferred to them during the transaction period, except on the three specific days.

We also reject petitioners' argument that section 1058(b)(3) cannot contain a requirement that loaned securities be returned to the lender upon the lender's demand at any time because section 512(a)(5)(B) specifically contains such a requirement. Section 512(a)(5)(A) generally defines the phrase "payments with respect to securities loans" by reference to "a security … transferred by the owner to another person in a transaction to which section 1058 applies." Section 512(a)(5)(B) adds that section 512(a)(5)(A) shall apply only where the agreement underlying the transaction "provides for … termination of the loan by the transferor upon notice of not more than 5 business days." Petitioners argue that sections 512(a)(5)(B) and 1058(b)(3) were enacted in the same legislation and that Congress is presumed not to have included unnecessary words in a statute. See, *e.g.*, *Kawaauhau v. Geiger*, 523 U.S. 57, 62 (1998); *Johnson v. Commissioner*, 441 F.3d 845, 850 (9th Cir. 2006). Petitioners conclude that part of section 512(a)(5)(B) would be surplusage were a prompt return of a security already a requirement of section 1058(b). Again, we disagree.

Our reading of section 1058(b)(3) to require that the lender be able to demand a prompt return of the loaned securities does not render any part of section 512(a)(5)(B) surplusage. Section 1058(b)(3) does not require explicitly that a securities loan be terminable within a set period akin to the 5-day period of section 512(a)(5)(B). It does not necessarily follow, however, as petitioners ask us to conclude, that section 1058(b)(3) fails to require that the lender be able to demand a prompt return of the loaned securities. The firmly established law at the time of the enactment of those sections provided that a lender in a securities loan arrangement be able to terminate the loan agreement upon demand and require a prompt return of the securities to the lender. We read nothing in the statute or in its history that reveals that Congress intended to overrule that firmly established law by enacting sections 512(a)(5)(B) and 1058(b)(3). We decline to read such an intent into the statute. Such is especially so given the plain reading of the terms "reduce" and "opportunity for gain" and our finding that the Agreement reduced the Samuelis' opportunity for gain by limiting their ability to sell the Securities at any time that the possibility for a profitable sale arose.

We recognize that unequivocal evidence of a clear legislative intent may sometimes override a plain meaning interpretation and lead to a different result. See *Consumer Prod. Safety Commn. v. GTE Sylvania, Inc.*, 447 U.S. 102, 108 (1980); see also *Albertson's, Inc. v. Commissioner*, 42 F.3d 537, 545 (9th Cir. 1994), *affg*. 95 T.C. 415 (1990). The legislative history of the applicable statute supports the plain meaning of the relevant text and does not override it. Congress enacted section 1058 mainly to clarify the then-existing law that applied to the loan of securities by regulated investment companies and tax-exempt entities, on the one hand, and by general security lenders, on the other hand. See S. Rept. 95-762, at 4 (1978). The former group of lenders was concerned that payments made to them by the borrowers of securities could be considered unrelated business taxable income. See *id*. The latter group of lenders was concerned that a securities loan could be considered a taxable disposition. See *id*. at 5-6. Congress added section 1058 to the Code to address each of these concerns, explicitly providing through the statute that payments from borrowers to tax-exempt entities were considered investment income to the tax-exempt entities and clarifying that the existing law that applied to lenders of securities in general continued to apply. *See id*. at 6-7.

The Senate Committee on Finance noted that owners of securities were reluctant under existing law to enter into securities lending transactions because the income tax treatment of those transactions was uncertain. See *id.* at 4. The committee also noted that the Commissioner apparently agreed that a securities lending transaction was not a taxable disposition of the loaned securities and that the transaction did not interrupt the lender's holding period, but that the Commissioner had recently declined to issue rulings stating as much. See *id*. at 4. The committee believed a clarification of existing law was required to encourage organizations and individuals with securities holdings to enter into securities lending transactions so as to allow the lendee brokers to deliver the securities to a purchaser of the securities within the time required by the relevant market rules. See *id*. at 5. The committee explained that section 1058 codified the existing law on securities lending arrangements that required that a contractual obligation subject to that law did not differ materially either in kind or in extent from the securities exchanged. See *id*. at 7.

This legislative history is consistent with our analysis. The legislative history explains that section 1058 codified the firmly established law requiring that a securities loan agreement keep the lender in the same economic position that the lender would have been in had the lender not entered into the agreement. For example, the lender must possess all of the benefits and burdens of ownership of the transferred securities and be able to terminate the loan agreement upon demand. The firmly established law came from the United States Supreme Court in *Provost v. United States*, 269 U.S. 443 (1926). There, the taxpayers sought to recover the cost of internal revenue stamps affixed by them to "tickets" that evidenced transactions where shares of stock were "loaned" to brokers or returned by the borrower to the lender, each in accordance with the rules and practice of the Stock Exchange. See *id*. at 449. The Court held that those transfers of stock were taxable transfers within the meaning of the applicable Revenue Acts because "both the loan of stock and the return of the borrowed stock involve 'transfers of legal title to shares of stock'." *Id*. at 456. The Court noted that a lender of securities under a loan agreement retained all of the benefits and burdens of the loaned stock throughout the loan period, as though the lender had retained the stock, and that both parties to the loan agreement could terminate the agreement on demand and thus cause a return of the stock to the lender.[12] See *id*. at 452-453.

[12] The Commissioner later ruled similarly in Rev. Rul. 57-451, 1957-2 C.B. 295. That ruling, which is referenced in the legislative history to sec. 1058, see S. Rept. 95-762, at 4 (1978), states in relevant part:

The second situation described above, wherein the optionee authorizes the broker to "lend" his stock certificates to other customers in the ordinary course of business, presumably anticipates the "loan" of the stock to others for use in satisfying obligations incurred in short sale transactions. In such a case, all of the incidents of ownership in the stock and not mere legal title, pass to the "borrowing" customer from the "lending" broker. For such incidents of ownership, the "lending" broker has substituted the personal obligation, wholly contractual, of the "borrowing" customer to restore him, on demand, to the economic position in which he would have been as owner of the stock, had the "loan" transaction not been entered into. See *Provost v. United States*, 269, U.S. 443, T.D. 3811, C.B. V-1, 417 (1926). Since the "lending" broker is not acting as the agent of the optionee in such a transaction, he must have necessarily obtained from the optionee all of the incidents of ownership in the stock which he passes to his "borrowing" customer.

We conclude that the Transaction was not a securities lending arrangement subject to section 1058 and that the underlying transfers of the Securities in 2001 and 2003 were therefore taxable events. Respondent determined and argues that the Samuelis' transfer of the Securities to Refco in 2001 was in substance a sale of the Securities by the Samuelis in exchange for the $1.64 billion they received as cash collateral and that Refco's purchase of the Securities in 2003 was a second sale of the Securities by the Samuelis in exchange for the money wired to them on January 16, 2003. For Federal tax purposes, the characterization of a transaction depends on economic reality and not just on the form employed by the parties to the transaction. See *Frank Lyon Co. v. United States*, 435 U.S. 561, 572-573 (1978).

We agree with respondent that the economic reality of the Transaction establishes that the Transaction was not a securities lending arrangement as structured but was in substance two separate sales of the Securities without any resulting debt obligation running between petitioners and Refco from October 2001 through January 15, 2003.[13] The transfers in 2001 were in substance the Samuelis' purchase and sale of the Securities at the same price of $1.64 billion. The Samuelis therefore did not realize any gain in 2001 as to the Securities. The transfers in 2003 were in substance the Samuelis' purchase of the Securities from Refco at $1.68 billion (the purchase price determined in accordance with the terms of the Addendum, which operated as a forward contract), followed immediately by the $1.69 billion market-price sale of the Securities by the Samuelis back to Refco. The Samuelis therefore realized a capital gain on the sale in 2003 equal to the difference between the purchase and sale prices. See sec. 1001. That capital gain is taxed as a short-term capital gain because the Samuelis held the Securities for less than a year.[14] See sec. 1222.

[13] The Transaction is similar to the transactions involved in a long line of cases involving M. Eli Livingstone, a broker and securities dealer who aspired to create debt through initial steps that completely offset each other. Courts consistently disregarded those offsetting steps because they left the parties to the transactions in the same position they were in before the steps were taken. See, *e.g.*, *Cahn v. Commissioner*, 358 F.2d 492 (9th Cir. 1966), *affg*. 41 T.C. 858 (1964); *Jockmus v. United States*, 335 F.2d 23, 29 (2d Cir. 1964); *Rubin v. United States*, 304 F.2d 766 (7th Cir. 1962); *Lynch v. Commissioner*, 273 F.2d 867, 872 (1st Cir. 1959), *affg*. 31 T.C. 990 (1959) and *Julian v. Commissioner*, 31 T.C. 998 (1959); *Goodstein v. Commissioner*, 267 F.2d 127, 131 (2d Cir. 1959), *affg*. 30 T.C. 1178 (1958); *MacRae v. Commissioner*, 34 T.C. 20, 26 (1960), *affd*. on this issue 294 F.2d 56 (9th Cir. 1961).

The courts did not disregard the transactions entirely as shams or as lacking economic substance. The courts disregarded the initial steps and recast the transactions as exchanges of promises for future performance. The transaction in one case was even recast where the taxpayer made an economic profit. See *Rubin v. United States*, *supra*.

[14] Petitioners argue they still prevail even if we accept, as we do, respondent's characterization of the Transaction. Petitioners assert that their sale of the Securities in 2003 was in consideration for their surrender of their contractual right to receive the Securities. Petitioners assert that this contractual right was a long-term asset acquired in October 2001 and that they may offset the $1.69 billion sale proceeds by their $1.64 billion basis in that long-term asset. We disagree with this argument. The Securities were the subject of the sale in 2003, not the surrender of a contractual right as petitioners assert. In addition, the Samuelis transferred the $1.64 billion to Refco in 2001 to purchase the Securities.

Samueli v. Commissioner, 661 F3d 399 (9th Cir. 2011), *aff'g* 132 T.C. 37 (2009), held:

Third, and most importantly, our conclusion that the transaction at issue in this case reduced Taxpayers' opportunity for gain does not necessarily imply a conclusion that a securities loan must be terminable upon demand to satisfy the requirements of § 1058(b)(3). In 1983, the Department of the Treasury considered adopting implementing regulations for § 1058(b)(3). that would have incorporated the five-business-days' notice requirement. The proposed regulations were never adopted, but the debate surrounding them is illuminating. Specifically, proposed 26 C.F.R. 1.1058-1(b)(3) would have provided that a qualifying agreement must "[n]ot reduce the lender's risk of loss or opportunity for gain. Accordingly, the agreement must provide that the lender may terminate the loan upon notice of not more than 5 business days." Transfers of Securities Under Certain Agreements, 48 Fed. Reg. 33912, 33913 (proposed July 26, 1983). In response to the proposed regulation, the American Bar Association's Committee on Financial Transactions (the "ABA Committee") issued a report objecting to the requirement, in part because it would prevent parties from lending securities for fixed terms longer than five days. The ABA Committee advocated instead a "facts and circumstances" test to address 1058(b)(3) rather than a bright-line rule and suggested that such a "facts and circumstances" test should "take into account both the length of time until the debt investment security matures and the length of the time the security is borrowed." ABA Committee Reports on Securities Lending Transactions ("ABA Report"), 91 Tax Notes Today 107-33 (May 15, 1991), Section IV.2.

The ABA Committee's concern that 1058 not be construed in such a way as to exclude all loans for fixed terms was echoed in a report that the Tax Section of the New York State Bar Association (the "NYSBA Committee") issued in response to several recent decisions of the Tax Court, including its decision now on appeal in this case. Report of the Tax Section of the New York State Bar Association on Certain Aspects of the Taxation of Securities Loans and the Operation of Section 1058 (June 9, 2011) ("NYSBA Report"), at 10-11. We are cognizant that a holding that no securities loan for a fixed term can qualify for § 1058 nonrecognition "could affect commonplace market transactions in a manner that arguably violates the overarching policy of section 1058." *Id*. at 10. But we do not so hold today because the resolution of this case does not require us to do so. First, as will be discussed more thoroughly in the next section of this opinion, we believe this transaction falls outside "the overarching policy of section 1058."

> Second, the transaction at issue here would fail the "facts and circumstances" test that the ABA Committee proposed as an alternative to a rule that would exclude all fixed-term loans from the scope of 1058. Taxpayers' inability to terminate the loan except on one of three dates is clearly not "consistent with the continued evolution of commercial practices," ABA Report, Section = IV.2, because the current standard practice for loans of bonds like the Securities is to allow termination by the lender on three days' notice (as is evidenced by the terms of the standard form Loan Agreement in this transaction, which were overridden by the Addendum). The length of the loan term under the Addendum (approximately 450 days), the fact that the loan term extended almost to the maturity date of the Securities, and Taxpayers' inability to terminate the loan on any but two dates during that term all severely hampered Taxpayers' ability to take advantage of market fluctuations in the price of the Securities. Moreover, Refco's option to purchase the Securities at the LIBOR formula price meant that Taxpayers' ability to liquidate the Securities at the actual market price was limited even further.
>
> As the NYSBA noted, the question of whether securities loans for shorter fixed terms, made for the purposes animating 1058, qualify for nonrecognition treatment is more appropriately settled by further guidance from the Department of the Treasury and the IRS. NYSBA Report, at 10. The present case does not require us to settle this question; thus, we decline to address it.

Anschutz Co. v. Commissioner, 135 T.C. 78 (2010), distinguished between a loan and a sale:[53]

> To determine whether an agreement transfers substantially all of the incidents of ownership, we look at all of the facts and circumstances surrounding the transfer, relying on objective evidence of the parties' intentions provided by their overt acts. *Ragghianti v. Commissioner*, 71 T.C. 346, 349-350 (1978); *Pac. Coast Music Jobbers, Inc. v. Commissioner*, 55 T.C. 866, 874 (1971), *affd*. 457 F.2d 1165 (5th Cir. 1972); *Dunne v. Commissioner*, T.C. Memo. 2008-63.
>
> In *Dunne v. Commissioner*, *supra*, we compiled the following nonexclusive factors that are evaluated in determining whether a transaction transfers the accoutrements of stock ownership:
>
> (1) Whether the taxpayer has legal title or a contractual right to obtain legal title in the future;
>
> (2) whether the taxpayer has the right to receive consideration from a transferee of the stock;
>
> (3) whether the taxpayer enjoys the economic benefits and burdens of being a shareholder;
>
> (4) whether the taxpayer has the power to control the company;
>
> (5) whether the taxpayer has the right to attend shareholder meetings;

[53] In affirming the decision, the Tenth Circuit used different factors. See fn 56 in part II.A.1.d.ii Monetizing Founder's Remaining Shares After Going Public.

(6) whether the taxpayer has the ability to vote the shares;

(7) whether the stock certificates are in the taxpayer's possession or are being held in escrow for the benefit of that taxpayer;

(8) whether the corporation lists the taxpayer as a shareholder on its tax return;

(9) whether the taxpayer lists himself as a shareholder on his individual tax return;

(10) whether the taxpayer has been compensated for the amount of income taxes due by reason of shareholder status;

(11) whether the taxpayer has access to the corporate books; and

(12) whether the taxpayer shows by his overt acts that he believes he is the owner of the stock. No one factor is necessarily determinative, and the weight of a factor in each case depends on the surrounding facts and circumstances. *Id.*

The official Tax Court syllabus of *Calloway v. Commissioner*, 135 T.C. 26 (2010) (reviewed case), *aff'd* 691 F3d 1315 (11th Cir. 2012) provides:

> In August 2001 P entered into an agreement with Derivium whereby P transferred 990 shares of IBM common stock to Derivium in exchange for $93,586.23. The terms of the agreement characterized the transaction as a loan of 90 percent of the value of the IBM stock pledged as collateral. The purported loan was nonrecourse and prohibited P from making any interest or principal payments during the 3-year term of the purported loan. The terms of the agreement allowed Derivium to sell the stock, which it did immediately upon receipt. At maturity P had the option of either paying the balance due and having an equivalent amount of IBM stock returned to him, renewing the purported loan for an additional term, or satisfying the "loan" by surrendering any right to receive IBM stock. At maturity in August 2004 the balance due was $40,924.57 more than the then value of the IBM stock. P elected to satisfy his purported loan by surrendering any right to receive IBM stock. P was not required to and did not make any payments toward either principal or interest on the purported loan.
>
> 1. *Held*: The transaction between P and Derivium in August 2001 was a sale. P transferred all the benefits and burdens of ownership of the stock to Derivium for $93,586.23 with no obligation to repay that amount.
>
> 2. Held, further, the transaction was not analogous to the securities lending arrangement in Rev. Rul. 57-451, 1957-2 C.B. 295, nor was it equivalent to a securities lending arrangement under sec. 1058, I.R.C.
>
> 3. Held, further, Ps are liable for an addition to tax under sec. 6651(a)(1), I.R.C., for the late filing of their 2001 Federal income tax return.
>
> 4. Held, further, Ps are liable for the accuracy-related penalty pursuant to sec. 6662, I.R.C.

Calloway, 135 T.C. at 33-34, looked at whether the purported loan was a sale:

> "The term 'sale' is given its ordinary meaning for Federal income tax purposes and is generally defined as a transfer of property for money or a promise to pay money." *Grodt & McKay Realty, Inc. v. Commissioner*, 77 T.C. 1221, 1237 (1981) (citing *Commissioner v. Brown*, 380 U.S. 563, 570-571 (1965)). Since the economic substance of a transaction, rather than its form, controls for tax purposes, the key to deciding whether the transaction was a sale or other disposition is to determine whether the benefits and burdens of ownership of the IBM stock passed from petitioner to Derivium. Whether the benefits and burdens of ownership have passed from one taxpayer to another is a question of fact that is determined from the intention of the parties as established by the written agreements read in the light of the attending facts and circumstances. See *Arevalo v. Commissioner*, 124 T.C. 244, 251-252 (2005), *affd*. 469 F.3d 436 (5th Cir. 2006). Factors the courts have considered in making this determination include: (1) Whether legal title passes; (2) how the parties treat the transaction; (3) whether an equity interest in the property is acquired; (4) whether the contract creates a present obligation on the seller to execute and deliver a deed and a present obligation on the purchaser to make payments; (5) whether the right of possession is vested in the purchaser; (6) which party pays the property taxes; (7) which party bears the risk of loss or damage to the property; and (8) which party receives the profits from the operation and sale of the property. See *id*. at 252; see also *Grodt & McKay Realty, Inc. v. Commissioner*, *supra* at 1237-1238.

After reviewing those factors, the *Calloway* Tax Court held that the arrangement was not a loan:

> At best the master agreement gave petitioner an option to repurchase IBM stock from Derivium at the end of the 3 years;[9] however, this option depended on Derivium's ability to acquire IBM stock in 2004. The foregoing factors indicate that the transaction was a sale of IBM stock in 2001.
>
> [9] *Welch*, 204 F.3d at 1230-31.
>
> In the context of taxation, courts have defined a loan as "an agreement, either express or implied, whereby one person advances money to the other and the other agrees to repay it upon such terms as to time and rate of interest, or without interest, as the parties may agree." *Welch v. Commissioner*, 204 F.3d 1228, 1230 (9th Cir. 2000) (quoting *Commissioner v. Valley Morris Plan*, 305 F.2d 610, 618 (9th Cir. 1962)), *affg*. T.C. Memo. 1998-121; see also *Talmage v. Commissioner*, T.C. Memo. 2008-34. For a transaction to be a bona fide loan the parties must have actually intended to establish a debtor-creditor relationship at the time the funds were advanced. *Fisher v. Commissioner*, 54 T.C. 905, 909-910 (1970). "Whether a bona fide debtor-creditor relationship exists is a question of fact to be determined upon a consideration of all the pertinent facts in the case." *Id*. at 909. "For disbursements to constitute true loans there must have been, at the time the funds were transferred, an unconditional obligation on the part of the transferee to repay the money, and an unconditional intention on the part of the transferor to secure repayment." *Haag v. Commissioner*, 88 T.C. 604, 615-616 (1987), *affd*. without published opinion 855 F.2d 855 (8th Cir. 1988).
>
> Courts have considered various factors in determining whether a transfer constitutes genuine indebtedness. No one factor is necessarily determinative, and the factors considered do not constitute an exclusive list. See *Ellinger v. United States*,

470 F.3d 1325, 1333-1334 (11th Cir. 2006) (listing a nonexclusive list of 13 factors); *Welch v. Commissioner*, *supra* at 1230.[10] Often it comes down to a question of substance over form requiring courts to "look beyond the parties' terminology to the substance and economic realities". *BB&T Corp. v. United States*, 523 F.3d 461, 476 (4th Cir. 2008) (quoting *Halle v. Commissioner*, 83 F.3d 649, 655 (4th Cir. 1996), *revg*. *Kingstowne L.P. v. Commissioner*, T.C. Memo. 1994-630). Our analysis of the factors relevant to this case leads to the conclusion that even though the documents prepared by Derivium use the term "loan", the transaction lacked the characteristics of a true loan.

[10] *Id*.; *United Natl.*, 33 B.T.A. at 796.

The transaction was structured so that petitioner could receive 90 percent of the value of his IBM stock. Petitioner would have no personal liability to pay principal or interest to Derivium, and it would have made no sense to do so unless the value of the stock had substantially appreciated. Petitioner transferred ownership of the stock to Derivium, who received all rights and privileges of ownership and was free to sell the stock. Derivium did immediately sell the stock and immediately passed 90 percent of the proceeds to petitioner. The only right petitioner retained regarding shares of IBM stock was an option, exercisable 3 years later, in 2004, to require Derivium to acquire 990 shares of IBM stock and deliver them to him in 2004. Petitioner's right to exercise this option in 2004 was wholly contractual because he had already transferred all of the incidents of ownership to Derivium, which had immediately sold the 990 shares.[11] See *Provost v. United States, 269 U.S. 443 [5 AFTR 5681] (1926). Petitioner engaged in the transaction because* he thought that the "loan" characterization would allow him to realize 90 percent of the value of the stock, whereas a "sale" would have netted only 80 percent of the stock's value after payment of tax on the gain. After the transfer petitioners did not conduct themselves as if the transaction was a loan. Petitioners did not report dividends earned on the 990 shares of IBM stock on their Federal income tax returns. When petitioners decided not to "repay the loan" in 2004, they did not report a sale of the stock on their 2004 Federal income tax return and failed to report any discharge of indebtedness income. This failure was totally inconsistent with petitioners' "loan" characterization.

[11] *Welch*, 204 F.3d at 1230.

As to Derivium, immediately upon its receipt of petitioner's stock, it sold the stock in order to fund the "loan". It did not hold the stock as collateral for a loan. In an ordinary lending transaction the risk of loss to a lender is that the borrower might not repay the loan. In contrast to the ordinary risk assumed by a lender, Derivium's only risk of loss would have arisen if petitioner had actually repaid the "loan". Petitioner would very likely have exercised his option to "repay the loan" if the value of the 990 shares of IBM stock, in August 2004, had exceeded the balance due. However, if petitioner had exercised his option under those circumstances, Derivium would have been required to acquire 990 shares of IBM stock at a cost exceeding the amount it would have received from petitioner. On the basis of all of these factors we must conclude that Derivium did not expect or want the "loan" to be repaid. Of course if the value of the IBM stock had been less than the "loan" balance in 2004, it would have been foolish for petitioner to pay the "loan" balance. As petitioner explained at trial, he did not exercise his right to "buy back my shares" because it would have cost more than the shares were worth.

We hold that the transaction was not a loan and that petitioner sold his IBM stock for $93,586.23 in 2001.[12]

[12] *United Natl.*, 33 B.T.A. at 797; *Fisher*, 30 B.T.A. at 441.

This case presents an issue of first impression in this Court. However, two other Federal courts have recently considered whether the transfer of securities to Derivium under its 90-percent-stock-loan program was a sale for Federal tax purposes. In each of those cases the courts, using essentially the same facts and applying the same legal standards that are found in cases such as *Grodt & McKay Realty, Inc. v. Commissioner*, 77 T.C. at 1237-1238, and *Welch v. Commissioner*, 204 F.3d at 1230, found that the 90-percent-stock-loan-program transactions were sales of securities and not bona fide loans. See *Nagy v. United States*, 104 AFTR 2d 2009-7789, 2010-1 USTC par. 50,177 (D.S.C. 2009) (in an action involving section 6700 promoter penalties, Chief Judge Norton for the U.S. District Court for the District of South Carolina granted the Government's motion for partial summary judgment, holding that the 90-percent-stock-loan-program transactions offered by Derivium were sales of securities, not bona fide loans); *United States v. Cathcart*, 104 A.F.T.R.2d 2009-6625, 2009-2 USTC par. 50,658 (N.D. Cal. 2009) (in an action to enjoin defendants from continuing to promote Derivium's 90-percent-stock-loan program, Judge Hamilton of the U.S. District Court for the Northern District of California granted the Government's motion for partial summary judgment, holding that the 90-percent-stock-loan-program transactions offered by Derivium were sales of securities, not bona fide loans). Subsequently, the District Court for the Northern District of California permanently enjoined Charles Cathcart from, directly or indirectly, by use of any means or instrumentalities:

1. Organizing, promoting, marketing, selling, or implementing the "90% Loan" program that is the subject of the complaint herein;

2. Organizing, promoting, marketing, selling, or implementing any program, plan or arrangement similar to the 90% Loan program that purports to enable customers to receive valuable consideration in exchange for stocks and other securities that are transferred or pledged by those customers, without the need to pay tax on any gains because the transaction is characterized as a loan rather than a sale; *United States v. Cathcart*, No. 4:07-CV-04762-PJH (N.D. Cal. Nov. 23, 2009). We note that Mr. Cathcart stipulated to the entry of this permanent injunction.

With respect to Derivium, a magistrate judge for the District Court for the Northern District of California recommended that "injunctive relief against Derivium is 'necessary or appropriate for the enforcement of the Internal laws." *United States v. Cathcart*, 105 AFTR 2d 2010-Revenue 1287, at 2010-1292 (N.D. Cal. 2010). District Court Judge Hamilton adopted the magistrate judge's recommendations, finding that the report was well reasoned and thorough in every respect. *United States v. Cathcart*, 105 AFTR 2d 2010-1293 (N.D. Cal. 2010).[13]

[13] *Welch*, 204 F.2d at 1230; *United Natl.*, 33 B.T.A. at 794; *Fisher*, 30 B.T.A. at 440; see also *Grodt & McKay Realty, Inc. v. Commissioner*, 77 T.C. 1221, 1237 (1981).

Sollberger v. Commissioner, 691 F.3d 1119, 1126 (9th Cir. 2012), held:

> Section 1058 exempts certain transfers of securities from the capital gains tax so long as the transferor is entitled to receive payments in amounts equivalent to all interest that the owner of the securities is entitled to receive, and provided that the transfer does "not reduce the risk of loss or opportunity for gain of the transferor." See 26 U.S.C. § 1058(b)(2), (3). Even assuming Sollberger did not waive this argument below, the Master Agreement gave Optech the right to receive all dividends and interest on the FRNs. The nonrecourse nature of the loan eliminated any risk that Sollberger would receive less than the loan amount, and the seven-year term during which Sollberger could not pay off the loan and receive the FRNs back eliminated his opportunity for gain for at least seven years. Thus, Sollberger is not eligible for the safe harbor because he fails to meet § 1058's requirements. See *Calloway*, 135 T.C. at 43-45; see also *Samueli v. Comm'r*, 661 F.3d 399, 407 (9th Cir. 2011) (agreeing that a transaction did not meet the requirements of § 1058 where the taxpayers relinquished all control over securities for all but 2 days in a term of approximately 450 days).

See also part III.B.1.a.i.(a) Loans Must be Bona Fide.

On its own, a share-lending arrangement can be relatively innocuous. However, coupled with other transactions, it can cause a sale to be deemed to occur. See the cases described in part II.A.1.d.ii Monetizing Founder's Remaining Shares After Going Public.

II.A.1.d.ii. Monetizing Founder's Remaining Shares After Going Public

A founder or other person with low basis stock might agree to deliver shares at a future date in exchange for cash now, which cash could be used to buy a diversified portfolio of stock. Also, the cash proceeds may be transferred using leveraged estate planning tools, while maintaining a security interest in the founder's stock.[54]

This agreement regarding the low basis shares might be done in a way that is not an installment sale that produces income in respect of a decedent but rather an open transaction that generates a basis step-up in the shares that have not yet been delivered. (Note that part of the proceeds of a founder's stock in a qualified C corporation might be excluded from regular taxation.)[55]

Rev. Rul. 2003-7 involved the following transaction:

> An individual ("Shareholder") held shares of common stock in Y corporation, which is publicly traded. Shareholder's basis in the shares of Y corporation is less than $20 per share. On September 15, 2002 (the "Execution Date"), Shareholder entered into an arm's length agreement (the "Agreement") with Investment Bank, at which time a share of common stock in Y corporation had a fair market value of $20. Shareholder received $z of cash upon execution of the Agreement. In return, Shareholder became obligated to deliver to Investment Bank on September 15, 2005 (the "Exchange Date"), a number of shares of common stock of Y corporation to be determined by a formula. Under the formula, if the market price of a share of Y corporation common stock is less

[54] See part II.H.10 Extracting Equity to Fund Large Gift.
[55] See part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

> than \$20 on the Exchange Date, Investment Bank will receive 100 shares of common stock. If the market price of a share is at least \$20 and no more than \$25 on the Exchange Date, Investment Bank will receive a number of shares having a total market value equal to \$2000. If the market price of a share exceeds \$25 on the Exchange Date, Investment Bank will receive 80 shares of common stock. In addition, Shareholder has the right to deliver to Investment Bank on the Exchange Date cash equal to the value of the common stock that Shareholder would otherwise be required to deliver under the formula.
>
> In order to secure Shareholder's obligations under the Agreement, Shareholder pledged to Investment Bank on the Execution Date 100 shares (that is, the maximum number of shares that Shareholder could be required to deliver under the Agreement). Shareholder effected this pledge by transferring the shares in trust to a third-party trustee, unrelated to Investment Bank. Under the declaration of trust, Shareholder retained the right to vote the pledged shares and to receive dividends.
>
> Under the Agreement, Shareholder had the unrestricted legal right to deliver the pledged shares, cash, or shares other than the pledged shares to satisfy its obligation under the Agreement. Shareholder is not otherwise economically compelled to deliver the pledged shares. At the time Shareholder and Investment Bank entered into the Agreement, however, Shareholder intended to deliver the pledged shares to Investment Bank on the Exchange Date in order to satisfy Shareholder's obligations under the Agreement.

Rev. Rul. 2003-7 analyzed the situation as follows, citing *Miami National Bank v. Commissioner*, 67 T.C. 793 (1977), *Richardson v. Commissioner*, 121 F.2d 1 (2nd Cir.), *cert. denied*, 314 U.S. 684 (1941), and *Hope v. Commissioner*, 55 T.C. 1020 (1971), *aff'd*, 471 F.2d 738 (3rd Cir.), *cert. denied*, 414 U.S. 824 (1973):

> In the present case, on the Execution Date, Shareholder received a fixed payment without any restriction on its use and also transferred in trust the maximum number of shares that might be required to be delivered under the Agreement. Like the taxpayers in *Miami National Bank* and *Richardson*, but unlike the taxpayer in *Hope*, Shareholder retained the right to receive dividends and exercise voting rights with respect to the pledged shares. Also unlike *Hope*, the legal title to, and actual possession of, the shares were transferred to an unrelated trustee rather than to Investment Bank. Moreover, Shareholder was not required by the terms of the Agreement to surrender the shares to Investment Bank on the Exchange Date. Rather, Shareholder had a right, unrestricted by agreement or economic circumstances, to reacquire the shares on the Exchange Date by delivering cash or other shares. See *Miami National Bank* and *Richardson*. Accordingly, the execution of the Agreement did not cause a sale or other disposition of the shares.
>
> A different outcome may be warranted if a shareholder is under any legal restraint or requirement or under any economic compulsion to deliver pledged shares rather than to exercise a right to deliver cash or other shares. For example, restrictions placed upon a shareholder's right to own pledged common stock after the Exchange Date, or an expectation that a shareholder will lack sufficient resources to exercise the right to deliver cash or shares other than pledged shares, would be significant factors to be weighed in determining whether a sale has occurred.

> Section 1259(a)(1) provides that, if there is a constructive sale of an appreciated financial position, the taxpayer shall recognize gain as if such position were sold, assigned, or otherwise terminated at its fair market value on the date of such constructive sale. Under § 1259(b), the term "appreciated financial position" means any position with respect to any stock, debt instrument, or partnership interest if there would be gain were such position sold, assigned, or otherwise terminated at its fair market value. Furthermore, for purposes of § 1259, the term "position" means an interest, including a futures or forward contract, short sale, or option. Under § 1259(c)(1)(C), a taxpayer is treated as having made a constructive sale of an appreciated financial position if the taxpayer (or a related person) enters into a futures or forward contract to deliver the same or substantially identical property. The term "forward contract" is defined under § 1259(d)(1) as a contract to deliver a substantially fixed amount of property (including cash) for a substantially fixed price. The legislative history indicates that a forward contract that provides for the delivery of an amount of stock that is subject to "significant variation" under the terms of the contract is not within the statutory definition of a forward contract. S. Rep. No. 33, 105th Cong., 1st Sess. 125-26 (1997), 1997-4 (Vol. 2) C.B. 1067, 1205-06.
>
> Under these facts, the Agreement does not cause a constructive sale of the shares under § 1259(c)(1)(C). According to the Agreement, delivery of a number of shares, which may vary between 80 and 100 shares, depends on the fair market value of the stock on the Exchange Date. Because this variation in the number of shares that may be delivered under the Agreement is a significant variation, the Agreement is not a contract to deliver a substantially fixed amount of property for purposes of § 1259(d)(1). As a result, the Agreement does not meet the definition of a forward contract under § 1259(d)(1) and does not cause a constructive sale under § 1259(c)(1)(C).
>
> **Holding**
>
> Shareholder has neither sold stock currently nor caused a constructive sale of stock if Shareholder receives a fixed amount of cash, simultaneously enters into an agreement to deliver on a future date a number of shares of common stock that varies significantly depending on the value of the shares on the delivery date, pledges the maximum number of shares for which delivery could be required under the agreement, retains an unrestricted legal right to substitute cash or other shares for the pledged shares, and is not economically compelled to deliver the pledged shares.

Anschutz Co. v. Commissioner, 135 T.C. 78, 111-112 (2010), *aff'd* 664 F3d 313 (10th Cir. 2011), described Code § 1259:

> … a forward contract is treated as a constructive sale if it is for a substantially fixed amount of property for a substantially fixed price. Sec. 1259(c)(1)(C), (d)(1). Section 1259 does not define the terms "substantially fixed amount of property" or "substantially fixed price". Section 1259 gives the Secretary two sources of authority for issuing regulations to carry out Congress' intent— section 1259(c)(1)(E) and (f)—but no regulations have been issued defining either phrase.
>
> The legislative history provides some guidance as to determining whether a transaction is treated as a constructive sale under section 1259. The Senate Finance Committee report, S. Rept. 105-33, at 125-126 (1997), 1997-4 C.B. (Vol. 2) 1067, 1205-1206, in stating that a forward contract results in a constructive sale only if it provides for delivery

of a substantially fixed amount of property at a substantially fixed price, goes on to say that “a forward contract providing for delivery of an amount of property, such as shares of stock, that is subject to significant variation under the contract terms does not result in a constructive sale.” The report does not define or provide any guidance relative to the term “significant variation” and the Secretary has not issued any regulations interpreting this term.

The Senate Finance Committee report provides more detailed guidance when discussing the Secretary’s regulatory authority under section 1259(c)(1)(E) to issue regulations to carry out the purpose of section 1259. *Id.* at 126, 1997-4 C.B. (Vol. 2) at 1206. Congress anticipated that the Secretary would use his authority to issue regulations treating as constructive sales financial transactions which, like those listed in section 1259(c)(1), have the effect of eliminating “substantially all of the taxpayer’s risk of loss and opportunity for income or gain” with respect to the appreciated financial position. *Id.* However, transactions in which the taxpayer eliminated his risk of loss, or opportunity for income or gain, but not both, were not to be treated as constructive sales under section 1259. *Id.*

The report goes on to state that it is not intended that risk of loss and opportunity for gain be considered separately. If a transaction has the effect of eliminating substantially all of the taxpayer’s risk of loss and substantially all of the taxpayer’s opportunity for gain with respect to an appreciated financial position, it is intended that the Secretary’s regulations would treat the transaction as a constructive sale. *Id.* Again, however, section 1259 and the legislative history do not define “substantially all”.

Rev. Rul. 2003-7, *supra*, provides some limited guidance in evaluating whether TAC’s PVFCs trigger constructive sale treatment. In that revenue ruling the taxpayer entered into a forward contract to deliver a variable number of shares of stock, depending on the fair market value of the stock on the delivery date. The taxpayer received an upfront payment in exchange for his obligation to deliver stock at a later date. The taxpayer’s delivery obligation varied by 20 shares: the taxpayer would have to deliver no fewer than 80, and no more than 100, shares of the stock at issue. The revenue ruling held that the taxpayer had not entered into a constructive sale under section 1259(c)(1)(C) because the variation in the number of shares deliverable, 20, was significant, and the agreement was not a contract to deliver a substantially fixed amount of property for purposes of section 1259(d)(1).

TAC’s stock transactions were not forward contract constructive sales because they were not forward contracts as defined in section 1259(d)(1) - they did not provide for delivery of a substantially fixed amount of property for a substantially fixed price. Section 1259 does not define the term “substantial”, and the Secretary has not issued regulations providing any additional guidance. TAC’s ultimate delivery obligation may vary by as much as 33.3 percent; this is in excess TAC may ultimately of the variance in Rev. Rul. 2003-7, *supra*. deliver between 6,025,261 and 9,037,903 shares of stock to settle the PVFCs. We find this variance in TAC’s delivery obligation to be substantial. TAC did not cause a constructive sale under section 1259(c)(1)(C).

The official Tax Court syllabus of *Anschutz Co. v. Commissioner*, 135 T.C. 78, *aff’d* 664 F3d 313 (10th Cir. 2011), provides:

> P-PA, an individual, owned P-AC, an S corporation. TAC is a wholly owned qualified subch. S subsidiary of P-AC, and its items of income and gain are reported on P-AC's Federal tax return. P-PA used TAC as an investment vehicle. TAC held the stock of companies that P-PA decided to invest in. TAC entered into a master stock purchase agreement (MSPA) for the sale of some of those corporate stocks in 2000 and 2001 to DLJ, an investment bank. The MSPA consisted of forward contracts and share-lending agreements. The forward contracts were prepaid in cash and would be settled with variable numbers of shares of stock. The share-lending agreements called for TAC to lend the shares of stock subject to the forward contracts to DLJ.
>
> P-PA and P-AC treated the MSPA as an open transaction and did not report any gain or loss on the transfers of stock. R determined that the MSPA was a sale of stock and that P-AC was liable for built-in gains tax pursuant to sec. 1374, I.R.C., as a result of TAC's income and gain being reported on P-AC's return. R also determined that there were deficiencies in the personal income tax of P-PA, the sole shareholder of P-AC, as a result of adjustments including in his income a distributive share of the built-in gain.
>
> Under sec. 1058, I.R.C., no gain or loss is recognized by a taxpayer who transfers securities pursuant to an agreement that meets the requirements of sec. 1058(b), I.R.C. Sec. 1259, I.R.C., provides for constructive sale treatment if a taxpayer enters into a transaction listed in sec. 1259(c)(1), I.R.C.
>
> *Held*: The MSPA constituted a sale and TAC and P-AC must recognize gain to the extent of the upfront cash payments received in 2000 and 2001; the MSPA called for the lending of shares but did not meet the requirements of sec. 1058(b), I.R.C., because it limited TAC's risk of loss.
>
> Held, further: TAC did not engage in constructive sales of stock in 2000 and 2001 pursuant to sec. 1259, I.R.C.

Anschutz Co. v. Commissioner, 664 F3d 313 (10th Cir. 2011), discussed what constitutes a sale:[56]

> For purposes of the IRC, the term "sale" is given its ordinary meaning and is generally defined as a transfer of property for money or a promise to pay money. *Commissioner v. Brown*, 380 U.S. 563, 570-71 (1965). Whether a sale has occurred depends upon whether, as a matter of historical fact, there has been a transfer of the benefits and burdens of ownership. *Grodt & McKay Realty, Inc. v. Commissioner*, 77 T.C. 1221, 1237 (1981). "Some of the factors that have been considered by courts in making this determination are: (1) Whether legal title passes; (2) how the parties treat the transaction; (3) whether an equity was acquired in the property; (4) whether the contract creates a present obligation on the seller to execute and deliver a deed and a present obligation on the purchaser to make payments; (5) whether the right of possession is vested in the purchaser; (6) which party pays the property taxes; (7) which party bears the risk of loss or damages to the property; and (8) which party receives the profits from the operation and sale of the property." *Id.* (internal citations omitted). With respect to stock transactions in particular, the following factors are also considered relevant to this determination: "(i) whether the purchaser bears the risk of loss and opportunity for gain;

[56] The *Anschutz* Tax Court used a different list of factors. See fn 53 in part II.A.1.d.i Code § 1058 Loan of Securities.

> (ii) which party receives the right to any current income from the property; (iii) whether legal title has passed; and (iv) whether an equity interest was acquired in the property." *H.J. Heinz Co. and Subsidiaries v. United States*, 76 Fed. Cl. 570, 581 (Fed. Cl. 2007).

Anschutz Co. v. Commissioner, 135 T.C. 78, 108 (2010), *aff'd* 664 F3d 313 (10th Cir. 2011), discussed that coupling a PVFC with a share-lending agreement (SLA) can cause a transaction to be taxed as closed:

> The parties entered into an agreement to sell and lend shares by integrated transactions. The PVFCs and SLAs were clearly related. One could not occur without the other. To the extent that petitioners argue TAC and DLJ could have entered into the PVFCs without corresponding share-lending agreements, that hypothetical transaction is not before the Court. The transaction before the Court transferred the benefits and burdens of ownership of the lent shares, and petitioners do not satisfy the section 1058 safe harbor.

In affirming the Tax Court, the Tenth Circuit reasoned and held:

> The problem with petitioners' reliance on Revenue Ruling 2003-7 is that the transactions at issue in this case, considered as a whole, are different from the entirety of the transactions at issue in Revenue Ruling 2003-7. Whereas the circumstances underlying Revenue Ruling 2003-7 involved only a VPFC, in the instant case the parties entered into a series of related transactions that included not only a VPFC, but also the MSPA and the Share-Lending Agreements. The result of these related transactions was that DLJ obtained possession, and most of the incidents of ownership, of TAC's pledged shares. TAC, in turn, obtained cash payments and an elimination of any risk of loss in the pledged stock's value at the end of the term of the transactions. Thus, we conclude that petitioners' reliance on Revenue Ruling 2003-7 is misplaced….
>
> For the reasons we have already discussed, we conclude that the transactions at issue in this case cannot satisfy the requirements set forth in § 1058(b)(2) or (3). To begin with, the transactions at issue did not ensure that TAC would receive "amounts equivalent to all interest, dividends, and other distributions" to which TAC was otherwise entitled on the pledged stock. 26 U.S.C. § 1058(b)(2). Further, the transactions at issue effectively "reduce[d] [TAC's] risk of loss [and] opportunity for gain" in the pledged shares. 26 U.S.C. § 1058(b)(3). Indeed, as we have discussed, the transactions effectively eliminated TAC's risk of loss and substantially reduced TAC's opportunity for gain. Consequently, petitioners are not entitled to the so-called "safe harbor" afforded by § 1058.

This "open transaction" concept is related to the income in respect of a decedent concept described in part II.Q.4.e.i Life Insurance Basis Adjustment on the Death of an Owner Who Is Not the Insured, fns 4434-4436.

The Syllabus to *Estate of McKelvey v. Commissioner*, 161 T.C. No. 9 (2023), described the case:

> Decedent (D) entered into variable prepaid forward contracts (first set of VPFCs) with two investment banks in 2007. Pursuant to the terms of the first set of VPFCs, the investment banks made cash payments to D, and D was obligated to deliver variable quantities of stock or their cash equivalent to the investment banks on specified future

settlement dates in 2008 (original settlement dates). Treating the execution of the first set of VPFCs as an open transaction, D did not report any gain or loss for 2007 in connection with entering into the first set of VPFCs.

In 2008, before the original settlement dates, D paid consideration to the investment banks to exchange the first set of VPFCs for an amended set of VPFCs that had settlement dates in 2010 (second set of VPFCs). Treating the first set of VPFCs as remaining open after the exchanges, D did not report any gain or loss for 2008 with respect to those VPFCs as a result of the exchange. Later in 2008, and after the exchanges, D passed away. R determined with respect to D’s 2008 tax year that the exchanges of the VPFCs constituted sales or exchanges of property under 26 U.S.C. § 1001, that the exchanges also resulted in constructive sales under 26 U.S.C. § 1259 of the stock shares D used to collateralize the first set of VPFCs, and that, as a result, D should have reported gain from the transactions.

In *Estate of McKelvey v. Commissioner* (*Estate of McKelvey I*), 148 T.C. 312 (2017), we held that D’s treatment of the first set of VPFCs as remaining open after the exchanges was appropriate and that the exchanges constituted neither the sale nor the exchange of property under 26 U.S.C. § 1001 nor resulted in constructive sales of stock under 26 U.S.C. § 1259. Consequently, we concluded D did not have gain from the exchanges with respect to 2008. In *Estate of McKelvey v. Commissioner* (*Estate of McKelvey II*), 906 F.3d 26 (2d Cir. 2018), the U.S. Court of Appeals for the Second Circuit reversed, determining that the exchanges of the VPFCs terminated the first set of VPFCs and resulted in the constructive sale of stock under 26 U.S.C. § 1259. The Second Circuit remanded for us to determine whether the exchanges terminated D’s underlying obligations with respect to the first set of VPFCs for purposes of 26 U.S.C. § 1234A and, if so, the amount of D’s gain from the termination. The Second Circuit also remanded for us to determine D’s gain with respect to the constructive sale of stock under 26 U.S.C. § 1259, an amount which the parties subsequently stipulated.

In the light of the Second Circuit’s decision in Estate of McKelvey II, we reach the following holdings.

Held: Upon the exchange of the first set of VPFCs for the second set of VPFCs, the first set of VPFCs was closed and D’s underlying obligations with respect to that first set terminated for purposes of 26 U.S.C. § 1234A.

Held, further, D realized $71,668,034 of short-term capital gain for tax year 2008 from the exchange of VPFCs.

The court’s “Supplemental Opinion” began:

This case is before the Court on remand from the U.S. Court of Appeals for the Second Circuit for further consideration consistent with its opinion in *Estate of McKelvey v. Commissioner* (*Estate of McKelvey II*), 906 F.3d 26 (2d Cir. 2018), reversing and remanding our decision in *Estate of McKelvey v. Commissioner* (*Estate of McKelvey I*), 148 T.C. 312 (2017).

In *Estate of McKelvey I*, we considered whether Andrew J. McKelvey (decedent) realized over $200 million in short-term and long-term capital gain pursuant to sections 1001 and 1259, respectively, by executing amendments extending two variable prepaid forward contracts (VPFCs) in 2008 (year at issue).[3] In so doing, we rejected respondent's contention that decedent's execution of the extensions constituted taxable exchanges of "property" under section 1001. *Estate of McKelvey I*, 148 T.C. at 320-32. We also rejected his contention that the extensions resulted in constructive sales under section 1259 of the collateralized stock shares decedent pledged under the VPFCs. *Estate of McKelvey I*, 148 T.C. at 332-33. We thus concluded that the extensions did not trigger any capital gain for the year at issue. *Id.* at 320-33.

[3] Unless otherwise indicated, statutory references are to the Internal Revenue Code, Title 26 U.S.C. (Code), in effect at all relevant times, regulation references are to the Code of Federal Regulations, Title 26 (Treas. Reg.), in effect at all relevant times, and Rule references are to the Tax Court Rules of Practice and Procedure. Some monetary amounts are rounded to the nearest dollar.

In *Estate of McKelvey II*, the Second Circuit agreed with us that decedent's execution of the extensions did not constitute exchanges of "property," such that no short-term capital gain was triggered pursuant to section 1001. *Estate of McKelvey II*, 906 F.3d at 34. However, it also considered a new, alternative argument by respondent that the extensions nevertheless triggered short-term capital gain under section 1234A by terminating decedent's obligations under the original VPFCs.[4] *Estate of McKelvey II*, 906 F.3d at 34-35. With respect to this argument, the Second Circuit concluded that, although not exchanges of "property" for purposes of section 1001, the original VPFCs were exchanged for amended VPFCs. *Estate of McKelvey II*, 906 F.3d at 34-35. It correspondingly remanded the case for us to determine "whether the replacement of the obligations in the original VPFCs with the obligations in what we hold are new contracts satisfies the criteria for a termination of obligations that gives rise to taxable income, presumably capital gain, and the amount of such gain." *Id*. at 35; see also *id*. at 41 (directing the Court, more succinctly, to determine "whether the termination of obligations that occurred when the amended contracts were executed resulted in taxable short-term capital gains").

[4] The parties agreed the Second Circuit could consider this argument because petitioner had asserted before this Court that the extensions did not result in a termination of decedent's obligations under the original VPFCs. *Estate of McKelvey II*, 906 F.3d at 34.

Additionally, the Second Circuit reversed our holding as to section 1259, concluding that the extensions did result in constructive sales of the collateralized shares that triggered long-term capital gains. *Estate of McKelvey II*, 906 F.3d at 40-41. In the light of this conclusion, the Second Circuit further mandated that we calculate the amount of such gain. *Id*. at 41. The parties having subsequently stipulated that amount as $102,406,962.12, only the issues identified by the Second Circuit with respect to the "replacement of the obligations in the original VPFCs with the obligations in...[the] new contracts" remain.

In the light of the Second Circuit's holdings, we will refer to the transactions at issue as "replacements" or "exchanges" for the remainder of this Opinion.

The court reasoned in its opinion titled “Discussion”:

I. *Taxability of the Replacement of Obligations*

The first question we have been asked to address is whether a taxable termination of obligations occurred when decedent exchanged VPFCs with BofA and MSI, resulting in taxable gain. The Second Circuit opined briefly on the exchanges, holding that the extensions of the valuation dates resulted in the replacement of the original contracts. *Estate of McKelvey II*, 906 F.3d at 35. More specifically, the Second Circuit concluded that extending the valuation dates by an additional 17 months for the BofA contracts and 16 months for the MSI contracts resulted in amended contracts that replaced the original contracts. *Id*. The Second Circuit reasoned that the parties “changed the bets that the VPFCs represented”, which it determined to be a “fundamental change,” invoking a phrase from Revenue Ruling 90-109, 1990-2 C.B. 191. *Estate of McKelvey II*, 906 F.3d at 35. Revenue Ruling 90-109 discusses a change in contractual terms that causes an old contract to be “treated as if” it was actually exchanged for a new one. See Rev. Rul. 90-109, 1990-2 C.B. at 192 (“A change in contractual terms effected through an option provided in the original contract is treated as an exchange under section 1001 if there is a sufficiently fundamental or material change that the substance of the original contract is altered through the exercise of the option. Under such circumstances, the old contract is treated as if it were actually exchanged for a new one.”); see also *id*. (referring to the exercise of the option as resulting in a change that is “substantively the same as an actual exchange” and as obviating the need for an “actual exchange” but effecting a “de facto exchange”). The revenue ruling employed the phrase “sufficiently fundamental or material change” to indicate the point at which the original contracts had been exchanged for new contracts, a gain recognition event as an exchange under section 1001. Id. The Second Circuit ultimately concluded that the extension resulted in an exchange of the first set of contracts for new contracts, as well as an exchange of the underlying obligations. *Estate of McKelvey II*, 906 F.3d at 35.

The Second Circuit stopped short, however, of reaching a holding on whether a termination of obligations occurred. Id. On appeal, respondent raised an alternative claim that the exchanges resulted in the termination of derivative obligations with respect to capital assets. *Id.* at 34-35. Respondent argued that such a termination of obligations resulted in short-term capital gain under section 1234A. *Estate of McKelvey II*, 906 F.3d at 34-35. The parties acknowledged that respondent was entitled to raise the new claim, and the Second Circuit left for us to address on remand the issue of whether decedent realized short-term capital gain under section 1234A.

A. *Termination of the Obligations Under the VPFCs*

The Second Circuit described the exchanges as a “replacement of the obligations,” establishing that by executing the transactions, decedent surrendered one set of obligations and cash in an exchange for an entirely separate set of obligations that, in turn, represented fundamentally changed bets. *Estate of McKelvey II*, 906 F.3d at 35; see Rev. Rul. 90-109. In order to determine whether such an exchange qualifies as a taxable termination of the first set of obligations, we turn to guidance regarding the treatment of options contracts.[17] Broadly speaking, an option is the right to buy or sell a stock at a certain price within a set period and involves a buyer (or holder) and a seller (also known as a writer or grantor). *Laureys v. Commissioner*, 92 T.C. 101, 102 (1989). Revenue Ruling 90-109 applies sale or exchange treatment to fundamental changes in the terms of options contracts. See *Estate of McKelvey II*, 906 F.3d at 35. The revenue ruling states that where a change to contractual terms effected through an option provided in the original contract is so substantial as to amount to a fundamental or material change, the "old contract is treated as if it were actually exchanged for a new one." Rev. Rul. 90-109, 1990-2 C.B. at 192. Such treatment is "substantively the same as an actual exchange of contracts and is a sale or other disposition for purposes of section 1001." *Id*.; see *supra* p. 11.

[17] The Second Circuit left the issue of "whether the replacement of obligations...*satisfies the criteria for a termination* of obligations that gives rise to taxable income" to be decided by this Court. *Estate of McKelvey II*, 906 F.3d at 35 (emphasis added). The Second Circuit also directed this Court to determine "whether *the termination of obligations that occurred* when the amended contracts were executed resulted in taxable short-term capital gains." *Id*. at 41 (emphasis added). In the light of the former statement and discussion by the Second Circuit, we understand the latter statement to not be a conclusion with respect to whether a termination occurred for purposes of section 1234A.

While VPFCs are not options themselves, options are similar, open transactions from which principles can be applied to VPFCs, a shared treatment acknowledged through prior IRS guidance and the Second Circuit. See Rev. Rul. 78-182, 1978-1 C.B. 265; Rev. Rul. 58-234, 1958-1 C.B. 279; see also *Estate of McKelvey II*, 906 F.3d at 35 ("The new valuation dates in the amended contracts resulted in new contracts just as new expiration dates for option contracts result in new option contracts."). From the grantor's perspective, the obligations under an option contract terminate, in relevant part, through the grantor's repurchase of the option from the holder or the grantor's purchase of an option with terms identical to the original option granted and designating the purchase as a closing transaction. *Laureys*, 92 T.C. at 102-04; Treas. Reg. § 1.1234-3(b)(1). Each option has its own identity and is a separate asset from all other options, so the holding period of an option does not relate back to prior option contracts. *Reily v. Commissioner*, 53 T.C. 8, 12 (1969). The time factor goes to the very essence of options contracts. *Id.*

The Second Circuit held that decedent's extensions of the VPFCs represented such fundamental changes as to warrant treatment as if actual exchanges of the old and new contracts had occurred. *Estate of McKelvey II*, 906 F.3d at 35. In treating decedent's extensions of the contracts as if the first set of VPFCs was actually exchanged for the second set of VPFCs, the exchange takes the form of an option repurchase. Decedent made payments to MSI and BofA and undertook obligations as part of the new contracts, in exchange for the termination of the prior contracts. Decedent repurchased the options held by MSI and BofA, thereby executing closing transactions that terminated his obligations with respect to the first set of contracts. See Treas. Reg. § 1.1234-3(b)(1)(i); see also *Laureys*, 92 T.C. at 102-04. Decedent's obligations under the first set of VPFCs do not relate forward to his separate obligations under the second set of VPFCs, and likewise the obligations under the second set of VPFCs do not relate back to his obligations under the first set. See *Reily*, 53 T.C. at 12. We therefore find that, upon executing the exchanges, decedent terminated the obligations under the first set of VPFCs.

B. ***Sale Treatment Under Section 1234A***

Although entry into a VPFC is not a taxable event, its termination and replacement are another matter. The Second Circuit established its agreement with our conclusion in *Estate of McKelvey I* that, at the time the VPFCs were extended, decedent did not have any rights in the VPFCs that could constitute property; but instead all that remained were his obligations to deliver Monster shares (or their cash equivalent) such that there was no taxable exchange of "property" for purposes of section 1001. It remanded, however, for us to consider the exchanges of the original VPFCs for the amended contracts in the context of section 1234A.[18] *Estate of McKelvey II*, 906 F.3d at 34-35. Section 1234A, in relevant part, determines the taxable treatment of the termination of obligations with respect to capital assets, providing:

> Gain or loss attributable to the cancellation, lapse, expiration, or other termination of -
>
> (1) a right or obligation...with respect to property which is (or on acquisition would be) a capital asset in the hands of the taxpayer....
>
> shall be treated as gain or loss from the sale of a capital asset.

[18] In so doing, the Second Circuit was careful to note the parties' agreement that the case concerns contracts that are not debt instruments and that it was making "no implication as to the tax consequences of fundamental changes in debt instruments." *Estate of McKelvey II*, 906 F.3d at 35 n.13.

Thus, by its terms, section 1234A(1) applies to the termination of obligations with respect to capital assets, which include derivative or contractual rights to buy or sell such assets. *Pilgrim's Pride Corp. v. Commissioner*, 779 F.3d 311, 317 (5th Cir. 2015), *rev'g on other grounds* 141 T.C. 533 (2013); see also *Estate of McKelvey II*, 906 F.3d at 34 (citing same for its interpretation of section 1234A(1)). A "capital asset" for the purposes of section 1234A means any property held by the taxpayer, with certain exclusions that do not apply here. § 1221(a). And the Second Circuit, to which appeal would lie, has opined that "a gain or loss from the cancellation of a futures or forward contract would result in capital gain or loss pursuant to [section] 1234A." *Wolff v. Commissioner*, 148 F.3d 186, 188 (2d Cir. 1998), *rev'g and remanding on other grounds* T.C. Memo. 1994-196.

Decedent held obligations with respect to Monster shares, which are capital assets under section 1221(a). As the exchanges resulted in the termination of those obligations, we hold that section 1234A(1) applies to the exchanges. Therefore, any gain that decedent realized from the exchanges shall be treated as gain from the sale of a capital asset. "Short-term capital gain" is defined as the gain from the sale or exchange of a capital asset held not more than 1 year. § 1222(1). The period for which a taxpayer has held an option, rather than the property that is the subject of the option, determines whether the capital gain is short term or long term. See Treas. Reg. § 1.1234-1(a)(1). Decedent terminated the first set of VPFCs after holding them for less than one year, and consequently any gain that decedent realized from the exchange is short-term capital gain.

II. *Open Transaction Doctrine*

As previously mentioned, VPFCs are afforded open transaction treatment upon execution. *Burnet v. Logan*, 283 U.S. 404 (1931); Rev. Rul. 2003-7, 2003-1 C.B. 363. Petitioner contends the replacement of VPFCs requires equal treatment under the doctrine. The open transaction doctrine finds its origins in the Code, which generally concerns itself only with realized gains or losses or with unrealized gains or losses that are reasonably certain and ascertainable. *Lucas v. Am. Code Co.*, 280 U.S. 445, 449 (1930). The doctrine governs transactions where the realization of income is so uncertain or contingent as to prevent accurate gain or loss calculations. *Burnet v. Logan*, 283 U.S. 404. Such limitations mean that the open transaction doctrine applies only when we cannot determine the value of either of the exchanged assets. *Davis v. Commissioner*, 210 F.3d 1346, 1348 (11th Cir. 2000), *aff'g* T.C. Memo. 1998-248; see also *United States v. Davis*, 370 U.S. 65 (1962). In scenarios where the value of only one asset is ascertainable, the exchanged assets are deemed to be of equal value. *Davis v. Commissioner*, 210 F.3d at 1348; see also *Davis*, 370 U.S. at 72.

Petitioner contends that the open transaction doctrine applies to the transactions before us. Petitioner argues that in the exchanges of VPFCs, VPFCs in the second set are open, which renders any gain calculation from the exchanges an impossibility at that time. Petitioner continues that, regardless of whether the Court deems them extensions or replacements, the gain amount, identity, and cost basis of the property to be delivered remained undetermined when the amendments were executed. By reiterating that the ultimate exchange of cash or property for the prepayment is what is relevant, petitioner makes clear the view that rigid adherence to the settlement options contemplated in the original contracts is the only way that parties to the contracts may calculate their gain.

A. *Applicability of* Virginia Iron *and* Hicks

Petitioner attempts to support the position that the open transaction doctrine applies with various options-writing cases, primarily relying on *Virginia Iron Coal & Coke Co. v. Commissioner*, 37 B.T.A. 195 (1938), *aff'd*, 99 F.2d 919 (4th Cir. 1938), and *Hicks v. Commissioner*, T.C. Memo. 1978-373, 37 T.C.M. (CCH) 1540. Each case evaluates written call options that were extended at or after expiration, and in each case the Court held that gain or loss was not realized upon extension as uncertainty remained regarding what property would be delivered to the taxpayers' counterparties. *Va. Iron*, 37 B.T.A. 195; *Hicks*, 37 T.C.M. (CCH) 1540. *Virginia Iron*, in relevant part, concerns an option that the taxpayer wrote for a third party to purchase land and mineral rights owned by the taxpayer's subsidiary or stock in the subsidiary owned by the taxpayer. *Va. Iron*, 37 B.T.A. at 196. The option retained the third party's purchase rights for one year in exchange for an up-front payment of $300,000; the purchase rights could be renewed annually on August 1 for the following five years at a rate of $125,000 per year. *Id*. The third party failed to make a payment on August 1 of the second year, letting the option lapse, but on September 21 of that year entered into a supplemental contract, continuing the option with some modifications. *Id*. The following year, the third party formally declined to exercise the option. *Id*. at 197. The Board of Tax Appeals (BTA) held that the up-front and renewal payments to the taxpayer were not income for the years in which received, but rather income for the year when the option was declined because only then could "a satisfactory determination of their character" be made. *Id*. at 198.

Hicks, in relevant part, concerned two real property parcels that the taxpayer and a business partner agreed to sell to a developer. *Hicks*, 37 T.C.M. (CCH) at 1541. The purchase agreement, signed in December 1972, dictated that the developer would purchase the first parcel for $208,598, and would make a downpayment of $25,000 for the second parcel, plus an interest-bearing note for the balance of $189,162. Id. The purchase agreement stated that the closing for the second parcel would not be more than one year after the closing for the first parcel; however, the developer could reconvey the second parcel to the taxpayer and his partner at no additional cost. Id. If the developer decided to exercise its option to reconvey the second parcel, the taxpayer and his partner would keep the downpayment. *Id*. In November 1973 the developer reconveyed the second parcel, and the parties voided the note for $189,162 and agreed to grant the developer for $10 an option to repurchase the second parcel (purchase option). *Id*. at 1542. The purchase option provided for the developer to purchase the parcel for $204,000 between January 15, 1974, and June 7, 1975, plus $1,200 per month after January 15, 1974. *Id*. The downpayment of $25,000 would be credited against the purchase price if the developer exercised the purchase option. Id. The Court held that any gain recognition for the taxpayer with respect to the downpayment should be delayed until the extended option was exercised or lapsed, on the basis that the character of the payment could not be determined until then. *Id*. at 1544.

In citing *Virginia Iron* and *Hicks*, petitioner encourages the Court to ignore whether obligations are “continuing” or “replaced,” proposing that such terms are merely irrelevant formalisms. Instead, per petitioner, we should focus exclusively on whether it is possible to determine the amount and character of any gain or loss. While we agree with maintaining a focus on whether the amount and character of any gain or loss is determinable, we disagree that doing so requires us to act as though the Second Circuit’s holding that the obligations were replaced is “irrelevant” and ultimately unnecessary. The option contracts at issue in Virginia Iron and in Hicks bear a few notable differences from the VPFCs at hand, the first of which is that the BTA in Virginia Iron and the Court in Hicks did not establish that the expiration and subsequent renewal of the option was a replacement of the option. Indeed, as petitioner stated on brief, the BTA was not focused on such details and did not provide any opinion on the distinction between “continuing” and “replacing” the contract. We, on the other hand, are operating under the established decision that decedent replaced the original set of VPFCs with a distinct second set.

The second difference arises from the underlying property to which the derivative contracts relate. In both *Virginia Iron* and *Hicks*, the options concerned the rights to purchase defined plots of real property for a fixed amount set at the signing of each contract. *Va. Iron*, 37 B.T.A. at 196; *Hicks*, 37 T.C.M. (CCH) at 1541. As time passed, the underlying real property the parties contemplated did not vary in amount or price. Consequently, the bet that the parties made upon signing resembled the position that they continued to hold in subsequent years; the land values did not significantly change and the acres subject to the options remained fixed. *Va. Iron*, 37 B.T.A. at 196; *Hicks*, 37 T.C.M. (CCH) at 1544. The BTA, and later the Court, found that the option renewals left each taxpayer holding an obligation that had not materially changed from what it was before the renewal. *Va. Iron*, 37 B.T.A. at 196; *Hicks*, 37 T.C.M. (CCH) at 1541. The same cannot be said of decedent’s obligations. As respondent’s expert witness, Henrick Bessembinder, revealed, the VPFCs carried substantially different values depending on the length of time remaining on the contract and on the share price relative to the set strike price. With an eye toward those variables and the depressed value of the Monster shares at the time of extension, the Second Circuit agreed that the change in expiration dates fundamentally altered the bets that the VPFCs represented. As these fundamental changes were not considerations in *Virginia Iron* and *Hicks*, we find those cases to be factually distinct and noncontrolling.[19]

[19] This Court relied on *Virginia Iron* in *Estate of McKelvey I* to conclude that open transaction treatment applied to the first set of VPFCs so long as uncertainty existed with respect to the second set of VPFCs. In the light of the Second Circuit's holding that the exchanges terminated the first set of VPFCs and created a second set of VPFCs that represented different bets, we no longer find *Virginia Iron* to dictate that conclusion in this case.

B. *Open Transaction Doctrine as Applied to Exchanged Contracts*

Having established that we are not bound to the holdings in Virgina Iron and Hicks, we turn to petitioner's argument that the VPFCs remained open through their replacement because the gain or loss decedent would realize from the second set of VPFCs could not be calculated at the time of replacement. Petitioner asserts, and we agree, that the first set of VPFCs held uncertainty regarding the property to be delivered at settlement, which led to further uncertainty regarding decedent's tax basis in any gain or loss calculation. However, petitioner also asserts that the replacement of the first set of VPFCs by the second set does not resolve any of this uncertainty as it does not identify or determine decedent's cost basis in the property eventually used to settle the second set of VPFCs. In essence, petitioner's argument is that gain cannot be calculated on the then-closed first set of VPFCs because gain could not yet be determined on the second set of VPFCs; uncertainty replaced with uncertainty does not close the transaction. This argument is at odds with the mechanics of the open transaction doctrine.

As mentioned above, the open transaction doctrine applies only when it is impossible to determine the value of either asset exchanged. *Davis v. Commissioner*, 210 F.3d at 1348. It says nothing of requiring certainty in calculating the eventual gain of every asset or obligation involved. We therefore look to when it is first possible to determine the value of either asset exchanged.

Petitioner points out that, at the time of the exchange, the parties had yet to resolve the contracts in the manner originally contemplated and the stock or cash equivalent remained undelivered. The issue petitioner highlights on brief is whether the exchange "resolved the uncertainties regarding the amount, identity and cost basis of the money or other property to be delivered in exchange for the prepayment," arguing it did not. But the Second Circuit has already made clear that rigid adherence to the original design of the VPFCs is not the only acceptable conclusion to the contracts. By extending the contracts, the parties replaced the first set of VPFCs with the second set, transactions the Second Circuit held to be exchanges of contracts. *Estate of McKelvey II*, 906 F.3d at 35. The exchanges were a trade of decedent's obligations under the first set of VPFCs for decedent's obligations under the second set of VPFCs, plus additional payments of $8,190,640 to MSI and $3,477,950 to BofA. This termination of the first set of VPFCs also terminated the uncertainty that existed with respect to the identity and the cost basis of the property to be delivered in exchange for the prepayment under those contracts. Decedent satisfied the obligations from the first set of VPFCs by delivering a combination of cash and new obligations to which he was bound. Together, the cash and the new obligations establish a value and a tax basis sufficient to calculate any gain or loss derived from the first set of VPFCs.

It has long been established that gain is not exclusively derived from cash-settled transactions, but rather that gain may be realized from the "exchange of property, payment of the taxpayer's indebtedness, relief from a liability, or other profit realized from the completion of a transaction." *Helvering v. Bruun*, 309 U.S. 461, 469 (1940). Thus, the fact that gain is a portion of the value of property received in the transaction does not negate its realization. *Id*. Decedent made such an exchange of obligations and property between the first and second set of VPFCs and consequently realized the gains or losses from those transactions. As it is possible to determine the values of property and obligations exchanged, and from there to determine the realized gain, the open transaction doctrine does not apply.

Petitioner is correct that the second set of VPFCs, at the time of the exchange, existed as an open transaction. At the time of the exchange, it would have been impossible to calculate the gain from those VPFCs, as decedent was still free to settle the transaction in cash or shares. However, we are not addressing decedent's possible gain from the second set of VPFCs; instead, we merely need their value at the time of the exchanges. The Second Circuit is not directing us to determine decedent's gain with respect to all VPFCs, merely those terminated by way of the exchanges.

III. *Calculation of Gain*

A. *Applicability of Section 1001*

Having established that the open transaction doctrine does not apply, and that any gain derived from the transactions is classified as short-term capital gain, we turn to the calculation of decedent's gain at the moments of the exchanges. Section 1001 dictates the method for calculating such gain:

> The gain from the sale or other disposition of property shall be the excess of the amount realized therefrom over the adjusted basis provided in section 1011 for determining gain, and the loss shall be the excess of the adjusted basis provided in such section for determining loss over the amount realized.

§ 1001(a).

Problems arise in applying that introductory computation paragraph to our facts as the section limits its scope to gain from the sale or other disposition of property. See *id*. Both the Second Circuit and this Court have ruled that decedent's positions with respect to the VPFCs are not property, but rather obligations. *Estate of McKelvey II*, 906 F.3d at 34; *Estate of McKelvey I*, 148 T.C. at 322. The capital gain calculation as codified under section 1001 requires the sale or exchange of property, and decedent's gain from the VPFCs, while derived from a sale or exchange, would seem to be omitted as nonproperty.

Yet strict adherence to the idea that such wording exempts sales or exchanges of VPFCs from gain calculation leaves a gap in the Code's application of capital gain tax treatment when it comes to VPFCs and other nonproperty derivatives. With respect to the treatment of derivatives elsewhere in the Code, the character of the gain and loss does not turn on the classification of the taxpayer's position with respect to the derivative, but rather the property to which the contract relates. Gain or loss attributable to the sale or exchange of a securities futures contract is considered gain or loss from the sale or exchange of the underlying property for purposes of determining the character of the gain or loss, and the property or nonproperty nature of the taxpayer's position does not dictate taxability. § 1234B. The same holds true for the taxability of derivatives as capital assets. Gain or loss from the cancellation or lapse of an obligation with respect to property that is a capital asset in the hands of the taxpayer is treated as gain or loss from the sale of a capital asset, disregarding the nonproperty nature of the obligation. § 1234A. For options holders, gain or loss from the sale or exchange of options in property is considered to have the same character as gain or loss derived from the sale of the underlying property. § 1234(a). For options writers, the gain or loss is treated as gain or loss from the sale or exchange of a capital asset without regard to whether the position is property or an obligation in the hands of the writer. § 1234(b).

These examples paint a clear picture of the Code's priorities when it comes to taxing the gains or losses of derivatives: The nature of the underlying property controls. Even when it is well established that the taxpayer's position with respect to a derivative is not property, the Code dictates that any gain or loss is treated as if derived from property. We will continue to evenly apply that principle to the VPFCs in question. Consequently, the applicability of section 1001(a) is not affected by the nonproperty nature of decedent's position with respect to the VPFCs, but rather by the fact that the underlying shares are property. The underlying Monster shares are property in the hands of decedent, and therefore section 1001(a) applies to gain from the sale or other disposition of derivatives relating to those shares. Where section 1001 restricts gain calculations, either to property or otherwise, we will look to the nature of the underlying shares as a basis for the section's applicability, rather than to the nature of the taxpayer's position.

B. *Gain Calculation Under Section 1001*

The gain from the exchange is determined under section 1001 and is calculated as the excess of the amount realized over decedent's adjusted basis in the VPFCs. See § 1001(a). The amount realized from the exchange is defined as the sum of any money received plus the fair market value of any property received other than money. § 1001(b). Gain or loss is realized from the exchange of property for other property differing materially either in kind or extent and is treated as income or loss sustained. Treas. Reg. § 1.1001-1(a); see *Helvering v. Bruun*, 309 U.S. at 468-69 (applying section 22 of the Revenue Act of 1932, ch. 209, 47 Stat. 169, 178, the predecessor of the current section 61(a), and holding that gain may be derived from the exchange of property, payment of a taxpayer's indebtedness, relief from liability, or other profit realized from the completion of a transaction). When property is exchanged for property in a taxable exchange, the taxpayer is taxed on the difference between the adjusted basis of the property given and the fair market value of the property received. *Williams v. Commissioner*, 37 T.C. 1099, 1106 (1962) (citing *Phila. Park Amusement Co. v. United States*, 126 F. Supp. 184, 188 (Ct. Cl. 1954)).

We calculate decedent's amount realized by taking the prepayment amount he received and subtracting his basis in the transactions, which consists of his payments to the VPFC holders and decedent's outstanding liability as a result of the second set of VPFCs in the moment immediately following the exchanges.

II.A.1.e. Personal Holding Company Tax

Code § 541 provides that any personal holding company is taxed on 20% of its undistributed personal holding company income.

Code § 541 is intended to require most C Corporations with excess investment income to pay dividends.[57] "Undistributed personal holding company income" is the excess of a personal holding company's adjusted taxable income[58] over dividends paid or deemed paid.[59] Dividends paid or deemed paid include dividends paid during or shortly after[60] the taxable year, consent dividends[61] for the taxable year, and dividends carried over from a prior year[62] for purposes of this test.[63]

---

[57] "Dividend" means a taxable dividend paid from the corporation's current or accumulated earnings and profits. Code § 562(a). Preferred dividends do not count, except from a publicly offered regulated investment company or a publicly offered REIT. Code § 562(c)(1).

[58] Code § 545(b) adjusts taxable income for various federal income tax and similar taxes, adjusts the charitable contribution deduction, disallows certain dividend-received deductions, adjusts the deduction for net operating losses, deducts U.S. net after-tax capital gain, and limits depreciation to that allowed with respect to rental income.

[59] Code § 545(a).

[60] Code § 563 allows a corporation to elect to treat a dividend paid after the close of any taxable year and on or before the 15th day of the fourth month following the close of such taxable year to be considered as paid on the last day of that taxable year. However, the amount so elected cannot exceed either the corporation's undistributed personal holding company income for the taxable year, computed without regard to this rule, or 20% of the sum of the dividends paid during the taxable year, computed without regard to this rule.

[61] A corporation and its shareholders may agree to deem dividends as paid on the last day of the corporation's taxable year, Code § 565(a), and contributed to the capital of the corporation by the shareholder on that last day. Code § 565(c). However, generally the deemed dividend must qualify under fn 57. Code § 565(b).

[62] Code § 564(b) determines the dividend carryover as follows:

(1) For each of the 2 preceding taxable years there shall be determined the taxable income computed with the adjustments provided in section 545 (whether or not the taxpayer was a personal holding company for either of such preceding taxable years), and there shall also be determined for each such year the deduction for dividends paid during such year as provided in section 561 (but determined without regard to the dividend carryover to such year).

(2) There shall be determined for each such taxable year whether there is an excess of such taxable income over such deduction for dividends paid or an excess of such deduction for dividends paid over such taxable income, and the amount of each such excess.

(3) If there is an excess of such deductions for dividends paid over such taxable income for the first preceding taxable year, such excess shall be allowed as a dividend carryover to the taxable year.

(4) If there is an excess of such deduction for dividends paid over such taxable income for the second preceding taxable year, such excess shall be reduced by the amount determined in paragraph (5), and the remainder of such excess shall be allowed as a dividend carryover to the taxable year.

(5) The amount of the reduction specified in paragraph (4) shall be the amount of the excess of the taxable income, if any, for the first preceding taxable year over such deduction for dividends paid, if any, for the first preceding taxable year.

[63] Code § 561.

Code § 542(a) provides that, unless excluded from this tax,[64] a corporation is a "personal holding company" if:

(1) *Adjusted ordinary gross income requirement*. At least 60 percent of its adjusted ordinary gross income (as defined in section 543(b)(2)) for the taxable year is personal holding company income (as defined in section 543(a)), and

(2) *Stock ownership requirement*. At any time during the last half of the taxable year more than 50 percent in value of its outstanding stock is owned, directly or indirectly, by or for not more than 5 individuals. For purposes of this paragraph, an organization described in section 401(a), 501(c)(17), or 509(a) or a portion of a trust permanently set aside or to be used exclusively for the purposes described in

---

[64] Code § 542(c) excludes the following:
- (1) a corporation exempt from tax under subchapter F (sec. 501 and following);
- (2) a bank as defined in section 581, or a domestic building and loan association within the meaning of section 7701(a)(19);
- (3) a life insurance company;
- (4) a surety company;
- (5) a foreign corporation,
- (6) a lending or finance company if-
  - (A) 60 percent or more of its ordinary gross income (as defined in section 543(b)(1)) is derived directly from the active and regular conduct of a lending or finance business;
  - (B) the personal holding company income for the taxable year (computed without regard to income described in subsection (d)(3) and income derived directly from the active and regular conduct of a lending or finance business, and computed by including as personal holding company income the entire amount of the gross income from rents, royalties, produced film rents, and compensation for use of corporate property by shareholders) is not more than 20 percent of the ordinary gross income;
  - (C) the sum of the deductions which are directly allocable to the active and regular conduct of its lending or finance business equals or exceeds the sum of-
    - (i) 15 percent of so much of the ordinary gross income derived therefrom as does not exceed $500,000, plus
    - (ii) 5 percent of so much of the ordinary gross income derived therefrom as exceeds $500,000; and
  - (D) the loans to a person who is a shareholder in such company during the taxable year by or for whom 10 percent or more in value of its outstanding stock is owned directly or indirectly (including, in the case of an individual, stock owned by members of his family as defined in section 544(a)(2)), outstanding at any time during such year do not exceed $5,000 in principal amount;
- (7) a small business investment company which is licensed by the Small Business Administration and operating under the Small Business Investment Act of 1958 (15 U.S.C. 661 and following) and which is actively engaged in the business of providing funds to small business concerns under that Act. This paragraph shall not apply if any shareholder of the small business investment company owns at any time during the taxable year directly or indirectly (including, in the case of an individual, ownership by the members of his family as defined in section 544(a)(2)) a 5 per centum or more proprietary interest in a small business concern to which funds are provided by the investment company or 5 per centum or more in value of the outstanding stock of such concern; and
- (8) a corporation which is subject to the jurisdiction of the court in a title 11 or similar case (within the meaning of section 368(a)(3)(A)) unless a major purpose of instituting or continuing such case is the avoidance of the tax imposed by section 541.

Code § 542(d) further describes Code § 542(c)(6).

section 642(c) or a corresponding provision of a prior income tax law shall be considered an individual.

In calculating adjusted ordinary gross income, any business income is based on gross receipts, not net income.[65]

Code § 543(a) provides that "personal holding company income" means the portion of the adjusted ordinary gross income consisting of:

(1) *Dividends, etc.* Dividends, interest, royalties (other than mineral, oil, or gas royalties or copyright royalties), and annuities. This paragraph shall not apply to-

(A) interest constituting rent (as defined in subsection (b)(3)),

(B) interest on amounts set aside in a reserve fund under chapter 533 or 535 of title 46, United States Code,

(C) dividends received by a United States shareholder (as defined in section 951(b)) from a controlled foreign corporation (as defined in section 957(a)).

(D) active business computer software royalties (within the meaning of subsection (d)), and

(E) interest received by a broker or dealer (within the meaning of section 3(a)(4) or (5) of the Securities and Exchange Act of 1934) in connection with-

(i) any securities or money market instruments held as property described in section 1221(a)(1),

(ii) margin accounts, or

(iii) any financing for a customer secured by securities or money market instruments.

(2) *Rents*. The adjusted income from rents; except that such adjusted income shall not be included if-

(A) such adjusted income constitutes 50 percent or more of the adjusted ordinary gross income, and

(B) the sum of-

(i) the dividends paid during the taxable year (determined under section 562),

---

[65] Reg. § 1.542-2 begins:

> To meet the gross income requirement it is necessary that at least 80 percent of the total gross income of the corporation for the taxable year be personal holding company income as defined in section 543 and §§1.543-1 and 1.543-2. For the definition of "gross income" see section 61 and §§1.61-1 through 1.61-14. Under such provisions gross income is not necessarily synonymous with gross receipts.

The latter refers to the fact that basis, cost of goods sold, and similar items are subtracted.

(ii) the dividends considered as paid on the last day of the taxable year under section 563(d) (as limited by the second sentence of section 563(b)), and

(iii) the consent dividends for the taxable year (determined under section 565),

equals or exceeds the amount, if any, by which the personal holding company income for the taxable year (computed without regard to this paragraph and paragraph (6), and computed by including as personal holding company income copyright royalties and the adjusted income from mineral, oil, and gas royalties) exceeds 10 percent of the ordinary gross income.

(3) *Mineral, oil, and gas royalties*. The adjusted income from mineral, oil, and gas royalties; except that such adjusted income shall not be included if-

(A) such adjusted income constitutes 50 percent or more of the adjusted ordinary gross income,

(B) the personal holding company income for the taxable year (computed without regard to this paragraph, and computed by including as personal holding company income copyright royalties and the adjusted income from rents) is not more than 10 percent of the ordinary gross income, and

(C) the sum of the deductions which are allowable under section 162 (relating to trade or business expenses) other than-

(i) deductions for compensation for personal services rendered by the shareholders, and

(ii) deductions which are specifically allowable under sections other than section 162,

equals or exceeds 15 percent of the adjusted ordinary gross income.

(4) *Copyright royalties*. Copyright royalties; except that copyright royalties shall not be included if-

(A) such royalties (exclusive of royalties received for the use of, or right to use, copyrights or interests in copyrights on works created in whole, or in part, by any shareholder) constitute 50 percent or more of the ordinary gross income,

(B) the personal holding company income for the taxable year computed-

(i) without regard to copyright royalties, other than royalties received for the use of, or right to use, copyrights or interests in copyrights in works created in whole, or in part, by any shareholder owning more than 10 percent of the total outstanding capital stock of the corporation,

(ii) without regard to dividends from any corporation in which the taxpayer owns at least 50 percent of all classes of stock entitled to vote and at least 50 percent of the total value of all classes of stock and which corporation meets the requirements of this subparagraph and subparagraphs (A) and (C), and

(iii) by including as personal holding company income the adjusted income from rents and the adjusted income from mineral, oil, and gas royalties,

is not more than 10 percent of the ordinary gross income, and

(C) the sum of the deductions which are properly allocable to such royalties and which are allowable under section 162, other than-

(i) deductions for compensation for personal services rendered by the shareholders,

(ii) deductions for royalties paid or accrued, and

(iii) deductions which are specifically allowable under sections other than section 162,

equals or exceeds 25 percent of the amount by which the ordinary gross income exceeds the sum of the royalties paid or accrued and the amounts allowable as deductions under section 167 (relating to depreciation) with respect to copyright royalties.

For purposes of this subsection, the term “copyright royalties” means compensation, however designated, for the use of, or the right to use, copyrights in works protected by copyright issued under title 17 of the United States Code and to which copyright protection is also extended by the laws of any country other than the United States of America by virtue of any international treaty, convention, or agreement, or interests in any such copyrighted works, and includes payments from any person for performing rights in any such copyrighted work and payments (other than produced film rents as defined in paragraph (5)(B)) received for the use of, or right to use, films. For purposes of this paragraph, the term “shareholder” shall include any person who owns stock within the meaning of section 544. This paragraph shall not apply to active business computer software royalties.

(5) *Produced film rents*.

(A) Produced film rents; except that such rents shall not be included if such rents constitute 50 percent or more of the ordinary gross income.

(B) For purposes of this section, the term “produced film rents” means payments received with respect to an interest in a film for the use of, or right to use, such film, but only to the extent that such interest was acquired before substantial completion of production of such film. In the case of a producer who actively participates in the production of the film, such term includes an interest in the proceeds or profits from the film, but only to the extent such interest is attributable to such active participation.

(6) *Use of corporate property by shareholder*.

(A) Amounts received as compensation (however designated and from whomever received) for the use of, or the right to use, tangible property of the corporation in any case where, at any time during the taxable year, 25 percent or more in value of the outstanding stock of the corporation is owned, directly or indirectly, by or for an individual entitled to the use of the property (whether such right is obtained directly from the corporation or by means of a sublease or other arrangement).

(B) Subparagraph (A) shall apply only to a corporation which has personal holding company income in excess of 10 percent of its ordinary gross income.

(C) For purposes of the limitation in subparagraph (b), personal holding company income shall be computed-

(i) without regard to subparagraph (A) or paragraph (2),

(ii) by excluding amounts received as compensation for the use of (or right to use) intangible property (other than mineral, oil, or gas royalties or copyright royalties) if a substantial part of the tangible property used in connection with such intangible property is owned by the corporation and all such tangible and intangible property is used in the active conduct of a trade or business by an individual or individuals described in subparagraph (A), and

(iii) by including copyright royalties and adjusted income from mineral, oil, and gas royalties.

(7) *Personal service contracts*.

(A) Amounts received under a contract under which the corporation is to furnish personal services; if some person other than the corporation has the right to designate (by name or by description) the individual who is to perform the services, or if the individual who is to perform the services is designated (by name or by description) in the contract; and

(B) amounts received from the sale or other disposition of such a contract.

This paragraph shall apply with respect to amounts received for services under a particular contract only if at some time during the taxable year 25 percent or more in value of the outstanding stock of the corporation is owned, directly or indirectly, by or for the individual who has performed, is to perform, or may be designated (by name or by description) as the one to perform, such services.

(8) *Estates and trusts*. Amounts includible in computing the taxable income of the corporation under part I of subchapter J (sec. 641 and following, relating to estates, trusts, and beneficiaries).

Code § 543(b)(2) provides that ordinary gross income is adjusted as follows to determine “adjusted ordinary gross income”:

(A) *Rents*. From the gross income from rents (as defined in the second sentence of paragraph (3) of this subsection) subtract the amount allowable as deductions for-

(i) exhaustion, wear and tear, obsolescence, and amortization of property other than tangible personal property which is not customarily retained by any one lessee for more than three years,

(ii) property taxes,

(iii) interest, and

(iv) rent,

to the extent allocable, under regulations prescribed by the Secretary, to such gross income from rents. The amount subtracted under this subparagraph shall not exceed such gross income from rents.

(B) *Mineral royalties, etc.* From the gross income from mineral, oil, and gas royalties described in paragraph (4), and from the gross income from working interests in an oil or gas well, subtract the amount allowable as deductions for—-

(i) exhaustion, wear and tear, obsolescence, amortization, and depletion,

(ii) property and severance taxes,

(iii) interest, and

(iv) rent,

to the extent allocable, under regulations prescribed by the Secretary, to such gross income from royalties or such gross income from working interests in oil or gas wells. The amount subtracted under this subparagraph with respect to royalties shall not exceed the gross income from such royalties, and the amount subtracted under this subparagraph with respect to working interests shall not exceed the gross income from such working interests.

(C) *Interest*. There shall be excluded-

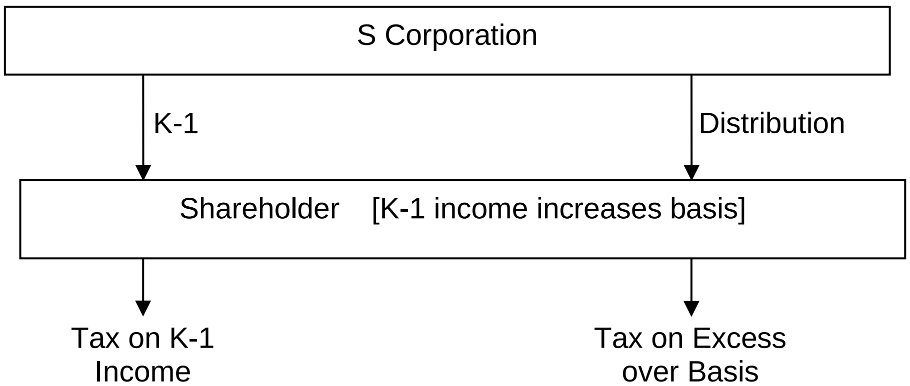
(i) interest received on a direct obligation of the United States held for sale to customers in the ordinary course of trade or business by a regular dealer who is making a primary market in such obligations, and

(ii) interest on a condemnation award, a judgment, and a tax refund.

(D) *Certain excluded rents*. From the gross income consisting of compensation described in subparagraph (d) of paragraph (3) subtract the amount allowable as deductions for the items described in clauses (i), (ii), (iii), and (iv) of subparagraph (A) to the extent allocable, under regulations prescribed by the Secretary, to such gross income. The amount subtracted under this subparagraph shall not exceed such gross income.

II.A.2. S Corporation

An S corporation is an entity taxed as a corporation whose income generally is taxed to its owners rather than being taxed to the entity itself;[66] the entity issues a Schedule K-1 to its owners each year to report the income. If the entity was never a C corporation:



Rather than using a corporation as the state law entity, consider using a limited liability company (or other unincorporated entity) that elects taxation as an S corporation.[67] Compared to a traditional corporation, an LLC or other unincorporated entity might offer better protection from an owner's creditors,[68] provide more flexibility in making distributions to pay the seller's taxes after a change in control,[69] allow the parties to control future actions,[70] and provide a nongrantor trust a better opportunity to materially participate[71] to avoid the 3.8% tax on net investment income.[72] However, there might be a slight risk that the LLC might not qualify for the S corporation exemption from self-employment tax.[73]

Note that, in the case of a seller-financed sale of goodwill, using a C corporation causes a triple tax, an S corporation causes a double tax, and a partnership causes a single tax.[74] When an owner dies, the assets of a sole proprietorship (including an LLC owned by an individual that has not elected corporate taxation) or a partnership (including an LLC owned by more than one person that has not elected corporate taxation) can obtain a basis step-up (or down) when an owner dies, whereas the assets of a C corporation or an S corporation do not receive a new basis.[75] For what might be an ideal structure, see part II.E Recommended Structure for Entities.

Below are some examples of when it is possible that an S corporation may be appropriate.

---

[66] Code § 1363. See Hill and Anderson, "Computing S corporation Taxable Income: Unraveling the Mysteries of Section 1363(b)," *Business Entities* (WG&L), July/Aug. 2009.
[67] See text accompanying fn. 359 for how such an entity makes an S election.
[68] See part II.F.1 Business Entities and Creditors Generally.
[69] See part III.B.2.j.ii.(f) Distribution after Transfer.
[70] See part II.F.3 Limited Partnerships and LLCs as Control Vehicles.

[75] See part II.H.2 Basis Step-Up Issues.

II.A.2.a. Existing Corporation - Avoiding Double Taxation

An existing corporation would like to start paying dividends to its shareholders. However, as a regular corporation (described by tax practitioners as a C corporation), it would pay tax on its earnings, and its shareholders would pay tax on the dividends. The shareholders make an S election, so that they (rather than the corporation itself) are taxed on the corporation's earnings. The shareholders will not be taxed on dividends, to the extent that the dividends represent earnings that constitute reinvested earnings while the corporation was an S corporation.[76]

II.A.2.b. Existing Corporation - Paying Retired Shareholder-Officers

One of the shareholders decides to retire but would still like the company to pay him the substantial salary he is used to receiving. The shareholders have never formally agreed what would happen when one of them retires. If the company pays "compensation" to a shareholder who is not working, the IRS could try to disallow a deduction for the payment, claiming that it is really a dividend. The shareholders make an "S" election, so that they (rather than the corporation itself) are taxed on the corporation's earnings. Each shareholder receives a pro rata share of the corporation's earnings. The shareholders will not be taxed on dividends, to the extent that the dividends represent earnings while the corporation was an S corporation. At the same time, the shareholders agree on a formula for how much compensation each shareholder-officer will receive, so that the retired shareholder can be sure that the remaining shareholders do not receive all of the profits through compensation.

II.A.2.c. Avoiding Double Taxation and Self-Employment Tax

As new business owners, clients should be concerned with double taxation - once when the company earns profits, and again when the company pays dividends. Even if a reduced capital gain tax rate applies to dividends, one must add up two levels of federal income tax and two levels of state income tax. However, partnership income tax might not be desirable, either, since the owners generally must pay self-employment tax (under which the owner in effect pays the company's and the employee's share of Social Security and Medicare tax) on all of her share of the company's earnings. Instead, the client might want to pay payroll taxes on only what they receive as compensation and not pay self-employment tax on money that is reinvested in the business. As the business grows, clients do not want to pay self-employment tax on a return of their investment, just on compensation they receive for services they perform. It is possible that an S corporation may be an appropriate entity. However, in many cases taxpayers are better off starting as an LLC taxed as a partnership until undistributed self-employment earnings become material, then switch to a limited partnership with an S corporation general partner. See part II.E Recommended Structure for Entities, especially parts II.E.2.b and II.E.7.b Flowcharts: Migrating LLC into Preferred Structure.

Some tax professionals advise using an S corporation instead of a partnership to avoid Self-Employment (FICA) tax.[77] We will see later how a partnership is a much better entity for exit strategies than is a C corporation or even an S corporation.[78] Furthermore, aggressively

---

[76] See part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally, especially fn. 4874.

[77] For a discussion of SE tax and FICA generally, see part II.L Self-Employment Tax (FICA). Within that, see parts II.L.1 FICA: Corporation and II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker.

[78] See part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis.

characterizing payments to employee-shareholders as distributions rather than compensation can lead to penalties[79] and potentially loss of the tax preparer's license;[80] to avoid that problem, consider using a partnership of S corporations, so that any income that each corporation accumulates is not subject to FICA/self-employment tax and any payments actually made to the owner are subjected to FICA to the extent they constitute reasonable compensation.[81]

---

[79] For a summary of cases, see Looney and Levitt, "Compensation Reclassification Risks for C and S corporations," *Journal of Taxation* (May 2015). Note the tips provided by Kirkland, "Helping S corporations avoid unreasonable compensation audits: Find out what entries on Forms 1120S may trigger these audits," *Journal of Accountancy* (6/1/2015). See IRS Fact Sheet 2008-25, "Wage Compensation for S corporation Officers," http://www.irs.gov/uac/Wage-Compensation-for-S-Corporation-Officers and "S Corporation Compensation and Medical Insurance Issues," https://www.irs.gov/businesses/small-businesses-self-employed/s-corporation-compensation-and-medical-insurance-issues (lasted visited 9/2/2017), as well as http://www.irs.gov/Businesses/Valuation-of-Assets (which includes reasonable compensation issues); Rev. Rul. 74-44; *Radtke v. U.S.*, 895 F.2d 1196 (7th Cir. 1990) (law firm); *Joly v. Commissioner*, T.C. Memo 1998-361 (20% penalty assessed when S corporation treated compensation as loans); *Spicer Accounting, Inc. v. U.S.*, 918 F.2d 90 (9th Cir. 1990) (accounting firm); *Dunn & Clark, P.A. v. Commissioner*, 853 F.Supp. 365 (D. Idaho 1994) (law firm); *Wiley L. Barron, CPA, Ltd. v. Commissioner*, T.C. Summary Opinion 2001-10 (CPA firm); *Yeagle Drywall Co. v. Commissioner*, T.C. Memo. 2001-284 (drywall construction business); *Veterinary Surgical Consultants P.C. v. Commissioner*, 117 T.C. 141 (2001) (consulting and surgical services provided to veterinarians); *Joseph M. Grey, P.C. v. Commissioner*, 119 T.C. 121 (2002) (accounting firm); *Nu-Look Design Inc. v. Commissioner*, 356 F.3d 290 (3rd Cir. 2004) (residential home improvement company); see *Herbert v. Commissioner*, T.C. Summary Opinion 2012-124 (taxpayer claimed only $2,400 of compensation; IRS alleged $55,000 in compensation; court used taxpayer's approximately $30,000 average annual compensation; penalties do not appear to have been imposed on wages but were imposed on other items); *Sean McAlary Ltd, Inc. v. Commissioner*, T.C. Summary Opinion 2013-62 (taxpayer penalized for failing to report any compensation; court reject IRS' expert's reliance on merely a percentage of gross receipts, instead computing an hourly wage based on its view of the cases: "the employee's qualifications, the nature, extent, and scope of the employee's work, the size and complexity of the business, prevailing general economic conditions, the employee's compensation as a percentage of gross and net income, the employee/shareholder's compensation compared with distributions to shareholders, the employee/shareholder's compensation compared with that paid to non-shareholder/employees, prevailing rates of compensation for comparable positions in comparable concerns, and comparable compensation paid to a particular shareholder/employee in previous years where the corporation has a limited number of officers"). The IRS might even recharacterize purported repayments of open account indebtedness as compensation, even when the amounts significantly exceed the K-1 income; see *Glass Blocks Unlimited v. Commissioner*, T.C. Memo. 2013-180, discussed in fn. 1220. For more detailed summaries and additional cases, see Christian & Grant, "¶34.06. Reasons for Payment of Salaries," *Subchapter S Taxation* (WG&L). However, it appears that, in a professional services firm, the IRS might concede that a significant portion of distributions are not subject to FICA. See footnote 3502.

[80] *In the matter of Biyu Wong*, Case No. AC-2009-26, found at https://www.google.com/url?q=http://www.dca.ca.gov/cba/communications-and-outreach/meetings/materials/2010/mat0510cba.pdf&sa=U&ved=0ahUKEwiPjb-kqdrVAhVh2oMKHY7EDfoQFggLMAI&client=internal-uds-cse&usg=AFQjCNEKVa2vuUQVwhUrMuW3rKtQeAffag, the California Board of Accountancy, Department of Consumer Affairs, suspended a CPA for preparing an S corporation's return that reported "minimal or no officer compensation," resulting in the corporation being "assessed significant payroll taxes and penalties." Wong's license was revoked, but the revocation was stayed and Wong was suspended from practice for 60 days and placed on probation for 3 years.

[81] See part II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker.

At http://www.irs.gov/Businesses/Small-Businesses-&-Self-Employed/S-Corporation-Compensation-and-Medical-Insurance-Issues (IRS last reviewed or updated 4/20/2022) (not precedent), the IRS commented:

> The key to establishing reasonable compensation is determining what the shareholder-employee did for the S corporation by looking to the source of the S corporation's gross receipts.
>
> The three major sources are:
>
> 1. Services of shareholder
> 2. Services of non-shareholder employees or
> 3. Capital and equipment
>
> To the extent gross receipts are generated by services of non-shareholder employees and capital and equipment, payments to the shareholder would properly be treated as non-wage distributions that are not subject to employment taxes.
>
> But to the extent gross receipts are generated by the shareholder's personal services, then payments to the shareholder-employee should be classified as wages that are subject to employment taxes.
>
> In addition to gross receipts generated directly by the shareholder-employee, the shareholder-employee should also be subject to wage treatment for administrative work performed by him for the other income-producing employees or assets. For example, a manager may not directly produce gross receipts, but he assists the other employees or assets which are producing the day-to-day gross receipts.
>
> Some factors in determining reasonable compensation:
>
> - Training and experience
> - Duties and responsibilities
> - Time and effort devoted to the business
> - Dividend history
> - Payments to non-shareholder employees
> - Timing and manner of paying bonuses to key people
> - What comparable businesses pay for similar services
> - Compensation agreements
> - The use of a formula to determine compensation

Some owners who are also officers try to pay themselves outside of the payroll system and call it nonemployee compensation. However, as officers, they are employees,[82] and payments to them for services are wages.[83] Rev. Rul. 82-83 held that a corporation that treats officers as independent contractors rather than as employees when they are performing duties normally within the scope of duties of a corporate officer is absolutely not entitled to relief under section 530 of the Revenue Act of 1978:

> Sections 3121(d) and 3401(c) of the Internal Revenue Code, applicable to the Federal Insurance Contributions Act and income tax withholding, respectively, provide that the

---

[82] Reg. § 31.3121(d)-1(b) provides:

> *Corporate officers*. Generally, an officer of a corporation is an employee of the corporation. However, an officer of a corporation who as such does not perform any services or performs only minor services and who neither receives nor is entitled to receive, directly or indirectly, any remuneration is considered not to be an employee of the corporation. A director of a corporation in his capacity as such is not an employee of the corporation.

Rev. Rul. 71-86 addressed the following:

> *A*, an individual, is the president of the *N* Corporation and is the sole stockholder thereof with the exception of qualifying shares. In his capacity as president, *A* fixes the amount of his salary and hours of employment and prescribes his own duties. He is not responsible to anyone with respect to his activities.

The ruling concluded:

> Accordingly, it is held that *A* is an employee of the N Corporation for purposes of chapters 21, 23, and 24 of the Code. The fact that the *N* Corporation is a closely held corporation and that *A* is the sole stockholder and is in charge of its activities is immaterial since *A*'s services are material to the operation of the corporation and he is entitled to and receives remuneration for the services from the corporation.

Rev. Rul. 73-361 also applies this rule to the majority shareholder who was an officer of an S corporation and performed substantial services for the corporation in that capacity for which he received remuneration:

> Accordingly, the "wages" he received in 1972 for his services as an officer are subject to the taxes imposed by the Federal Insurance Contributions Act. This conclusion is also applicable for purposes of the Federal Unemployment Tax Act and the Collection of Income Tax at Source on Wages (chapters 23 and 24, respectively, subtitle C of the Code).

In denying relief under section 530 of the Revenue Act of 1978, which allows independent contractor treatment for those meeting certain longstanding industry practiced, Rev. Rul. 82-83 held:

> It is a question of fact in all cases whether officers of a corporation are performing services within the scope of their duties as officers or whether they are performing services as independent contractors. Here, the duties being performed customarily fall within the scope of duties of corporate officers. Involved are fundamental decisions regarding the operation of the corporation. Such decisions are rarely delegated to independent contractors, and are customarily made by corporate officers or other employees. Thus, since the officers are performing substantial services typical of officers and are paid for those services, they are employees of the corporation for purposes of federal tax law. Therefore, even though the corporation calls the officers' pay "draws" rather than "salaries," there is no reasonable basis for treating the officers as other than employees, even under a liberal application of the reasonable basis rule of section 530 of the Act.

Directors are independent contractors who may be in a trade or business of being a director. See Rev. Ruls. 68-595 (serving on committee of a board of directors), 72-86 (attending quarterly board meetings), and 80-87 (honorary directors who previously performed service but are now compensated whether or not they attend meetings).

[83] See fn. 82 and *Veterinary Surgical Consultants P.C. v. Commissioner*, 117 T.C. 141 (2001) (consulting and surgical services provided to veterinarians); *Spicer Accounting, Inc. v. U.S.*, 918 F.2d 90 (9th Cir. 1990) (accounting firm); *Durando v. U.S.*, 70 F.3d 548 (9th Cir. 1995) (amount shown on Form 1099-MISC did not constitute earnings that a shareholder could use to create a self-employed person's retirement plan).

> term “employee” includes any officer of a corporation. Section 3306(i), applicable to the Federal Unemployment Tax Act, includes within the meaning of the term “employee” the meaning assigned by section 3121(d).
>
> Section 31.3121(d)-1(b) of the Employment Tax Regulations states that, generally, an officer of a corporation is an employee of the corporation. However, an officer of a corporation who as such does not perform any services or performs only minor services and who neither receives nor is entitled to receive, directly or indirectly, any pay is considered not to be an employee of the corporation. For instance, directors of corporations in their capacity as such are not employees of the corporations.
>
> Rev. Rul. 71-86, 1971-1 C.B. 285, holds that when an individual who is the president and sole shareholder, except for qualifying shares, of a closely held corporation performs services as an officer of the corporation, the president is an employee for purposes of employment taxes and income tax withholding, even though all services performed and the amount of compensation for them are under the individual’s complete control.
>
> Rev. Rul. 73-361, 1973-2 C.B. 331, holds that a stockholder-officer of an electing small business corporation who performs substantial services as an officer of the corporation is its employee for purposes of the FICA, the FUTA, and income tax withholding.
>
> In *Royal Theatre Corp. v. United States*, 66 F.Supp. 301 (D. Kan. 1946), the sole shareholder and president of two corporations contracted with each for him to manage each corporation’s operations and to determine matters of policy for each corporation. The court observed that compensation an officer receives for services as an officer is subject to social security taxes, and held that the contracts by which the president of each corporation purportedly managed the affairs of each corporation as an independent contractor could be disregarded in determining the reality of the situation.
>
> It is a question of fact in all cases whether officers of a corporation are performing services within the scope of their duties as officers or whether they are performing services as independent contractors. Here, the duties being performed customarily fall within the scope of duties of corporate officers. Involved are fundamental decisions regarding the operation of the corporation. Such decisions are rarely delegated to independent contractors, and are customarily made by corporate officers or other employees. Thus, since the officers are performing substantial services typical of officers and are paid for those services, they are employees of the corporation for purposes of federal tax law. Therefore, even though the corporation calls the officers’ pay “draws” rather than “salaries,” there is no reasonable basis for treating the officers as other than employees, even under a liberal application of the reasonable basis rule of section 530 of the Act.

The Redi Foundation, Inc. v. Commissioner, T.C. Memo. 2022-34, held:

> Turning next to petitioner’s initial argument, we find that petitioner has pointed to no credible evidence that Mr. Abraham worked for or was engaged by petitioner in a capacity other than as an officer. See *Joseph M. Grey Pub. Acct., P.C.*, 119 T.C. at 130; Rev. Rul. 82-83, 1982-1 C.B. 151, 152 (stating that an officer’s potential dual capacity is “a question of fact” and concluding that officer was statutory employee when duties involved “fundamental decisions regarding the operation of the corporation”). The only

> items in the record that could suggest a separate independent contractor relationship are the Form 1099-MISC reporting nonemployee compensation and Mr. Abraham's own testimony that he served petitioner in a dual capacity. Without support from other evidence - such as a written service contractor agreement between petitioner and Mr. Abraham - the Form 1099-MISC and the self-serving testimony are entitled to little evidentiary weight and cannot sustain petitioner's burden. See *Joseph M. Grey Pub. Acct., P.C.*, 119 T.C. at 130; see also *Blossom Day Care Centers, Inc. v. Commissioner*, T.C. Memo. 2021-86, at *13–14; *Cent. Motorplex, Inc. v. Commissioner*, T.C. Memo. 2014-207, at *9; *Veterinary Surgical Consultants, P.C. v. Commissioner*, 2003 WL 548572, at *7.
>
> Mr. Abraham was the sole person in charge of overseeing and executing the online course (petitioner's only business activity); he necessarily provided a wide variety of services to petitioner, including managerial decisions about the content, marketing, and enrollment of the online course. See *Joseph M. Grey Pub. Acct., P.C.*, 119 T.C. at 129-30 & n.7 (rejecting dual capacity argument where officer was sole provider of managerial and accounting services to petitioner, and stating that "fundamental decisions regarding the operation of the corporation...are customarily made by corporate officers or other employees" (quoting *Van Camp & Bennion v. United States*, 251 F.3d 862, 866 (9th Cir. 2001))); see also *Spicer Acct., Inc. v. United States*, 918 F.2d 90, 95 (9th Cir. 1990) ("[A] corporation's sole full-time worker must be treated as an employee."). On the record before us, we see no clear distinction between Mr. Abraham's role as a corporate officer and his provision of services to the corporation. We conclude that petitioner has failed to carry its burden of establishing that Mr. Abraham was engaged in dual roles as both an employee and an independent contractor.

The court rejected the argument that the taxpayer had a reasonable basis for treating the officer as an independent contractor due to a purportedly longstanding industry practice:

> But it is well settled by this Court that the scope of Act section 530 relief is limited to common law worker classification determinations. See *Joseph M. Grey Pub. Acct., P.C.*, 119 T.C. at 132; see also *Charlotte's Office Boutique*, 121 T.C. at 109 n. 10. In providing Act section 530 relief, Congress did not intend for relief to be available in situations where an individual - such as a corporate officer - was already classified as an employee by statute.[6] See *Joseph M. Grey Pub. Acct., P.C.*, 119 T.C. at 132-33 (analyzing legislative history and concluding that section 530 relief was not available for statutory employees). Because we conclude that Mr. Abraham is a statutory employee under section 3121(d)(1), Act section 530 relief is not available to petitioner. *See*, *e.g.*, *Loughman v. Commissioner*, T.C. Memo. 2018-85, at *11–12; *Donald G. Cave A Pro. Law Corp. v. Commissioner*, T.C. Memo. 2011-48, 2011 WL 802696, at *13, *aff'd per curiam*, 476 F. App'x 424 (5th Cir. 2012).
>
>> [6] With *certain limited statutory exceptions*, the classification of particular workers or classes of workers as employees...for purposes of Federal employment taxes must be made under common law rules...The bill provides an interim solution for controversies between the [IRS] and taxpayers involving whether certain individuals are employees *under interpretations of the common law*....
>>
>> H. R. Rep. No. 95-1748, at 3, 4 (1978) (emphasis added).

Based on a couple of dismissals it procured,[84] the IRS takes the position that the Tax Court has no jurisdiction to review the IRS' determinations of employment taxes on shareholder-employees and has instructed its examiners how to attain this result;[85] the IRS asserts that the

[84] About 15 months after the IRS issued PMTA cited in fn 85, in *Azarian, P.A. v. Commissioner*, 897 F.3d 943 (2018), the Eighth Circuit agreed with the Tax Court that the Tax Court had no jurisdiction when the amount of wages was an issue and the service provider was admittedly an employee.

[85] PMTA 2017-05, "Notice of Employment Tax Determination under IRC §7436 - Additional Compensation to Officer Employees," POSTN-110684-17 (written 3/30/2017 and released 4/5/2017):

> In the scenario you provided, there is no dispute that the corporate officers are employees of the taxpayer under section 3121(d)(1) and that certain amounts were treated as wages for employment tax purposes. Rather, the dispute is limited to the correct amount of payments required to be treated as "wages" for employment tax purposes, *i.e.* whether the additional payments constitute wages, rather than dividends or distributions, return of capital, loan repayments, distributions in excess of reasonable compensation, or other non-service related type payments. Nor is there any dispute concerning entitlement to Section 530 relief.
>
> Accordingly, the Service is not making a determination regarding the employment status of the corporate officers when it recharacterizes certain payments as wages that were not treated as wages. The Service is also not making a determination with respect to the taxpayer's entitlement to Section 530 relief. Since the Service has not made a determination with respect to either of the two requisite matters specified in § 7436(a)(1) or (2), the Tax Court lacks jurisdiction to determine the correct amount of employment taxes due as a result of the employment tax assessment under section 6201 on the additional wages.
>
> The position taken in this memorandum is consistent with two recent Tax Court Orders with respect to cases described below. (Copies of the Orders are attached to this memorandum).
>
> In *Martin S. Azarian, P.A. v. Commissioner*, Docket No. 28957-15, Petitioner, an S corporation, treated its sole owner and officer, Mr. Azarian, as an employee during the taxable periods at issue and reported wages paid to Mr. Azarian on Forms W-2. Respondent sent petitioner Forms 4668, Employment Tax Examination Changes Report, which (1) concluded that petitioner failed to report reasonable compensation paid to Mr. Azarian for the taxable periods at issue, (2) proposed increased annual wages to Mr. Azarian for those periods, and (3) concluded that petitioner was liable for proposed employment tax increases and additions to tax. Respondent did not issue a Letter 3523 to petitioner.
>
> Nevertheless, petitioner filed a petition requesting the Court overturn respondent's findings. Respondent filed a Motion to Dismiss for Lack of Jurisdiction on the grounds that (1) no Notice of Determination of Worker Classification was sent to petitioner, and (2) no other determination was made by respondent which would confer jurisdiction on the Court.[3]
>
> > [3] Motions to dismiss for lack of jurisdiction, citing the grounds that a Notice of Determination of Worker Classification was not issued, were filed in several cases before the Service concluded that such notices were no longer a jurisdictional prerequisite to Tax Court Review in line with the Court's decision in *SECC*. See Chief Counsel Notice 2016-002.
>
> On February 21, 2017, the Tax Court issued an Order dismissing the case for lack of jurisdiction. The Court found that respondent did not make a determination under section 7436(a)(2) regarding whether petitioner was entitled to relief under Section 530. The Court also found that since petitioner consistently treated Mr. Azarian as an employee for the taxable periods at issue, respondent did not make a determination that Mr. Azarian was an employee of petitioner under section 7436(a)(1). The Court stated, "Section 7436(a)(1) only confers jurisdiction upon this Court to determine the ["]correct and the proper amount of employment tax["] when respondent makes a worker classification determination, not when respondent concludes that petitioner underreported reasonable wage compensation, as is the case here."
>
> Similarly, in *Patricia Arroyo DDS, Corp., Alex Mansilla and Mercedes P. Arroyo v. Commissioner* , Docket No. 5874-15, the Tax Court dismissed the case with respect to Patricia Arroyo DDS Corp. (DDS Corp.) for lack of jurisdiction finding that the Service had not made any determinations for purposes of section 7436. In this case the Service determined that the amounts treated as

analysis does not change when the service recipient uses a professional employer organization (PEO) to pay compensation to its sole corporate officer, even when the PEO issues Forms W-2 using its own EIN.[86] In this context, employment taxes mean Federal Insurance Contributions

---

> salaries paid to the corporate officers and reported on Form W-2 as wages were artificially low, recharacterized higher amounts as salaries, and thus as wages, based on nationwide market information, and assessed additional employment taxes. Petitioners asserted that the amounts treated as salaries paid by DDS Corp were appropriate and contended the Court had jurisdiction as to the amount of employment taxes owed.
>
> On February 23, 2017, the Tax Court issued an Order dismissing the case for lack of jurisdiction. The Tax Court stated that petitioner consistently treated the corporate officers as employees and contested only respondent's determination that the compensation paid to the corporate officers was inadequate. The Court stated that because respondent did not make a determination with respect to either of the two requisite matters specified in section 7436(a)(1) or (2), the Court lacked jurisdiction to determine the correct amount of employment taxes due as a result of respondent's determination that DDS Corp under-reported corporate officers' wages during the tax years at issue.

[86] CCA 201735021, in which:

> The duties of the PEO under the contract include: 1) administering Taxpayer payroll, designated benefits, and personnel policies and procedures related to the Assigned Employees; 2) providing human resource administration and payroll administration with respect to the Assigned Employees; 3) furnishing and keeping workers compensation insurance covering the Assigned Employees; 4) processing and paying wages from its own accounts to the Assigned Employees based on the hours and wage information reported by the Taxpayer and 5) filing all employment tax returns (i.e., Form 940, Employer's Annual Federal Unemployment (FUTA) Tax Return, and Form 941, Employer's Quarterly Federal Tax Return) with the Government and furnishing information returns to the workers.
>
> The PEO's duties under the contract, however, were limited to only those wages that were reported and verified by the Taxpayer to the PEO for each pay period. In the event the Taxpayer paid wages to the Assigned Employees that were not reported to the PEO, the contract provides that the Taxpayer will be "solely responsible for damages of any nature out of the Client's failure to report payment of unreported wages to any of the Assigned Employees".
>
> For the taxable quarters included in the [Redacted Text] taxable year, as well as the [Redacted Text] taxable year, the Taxpayer's corporate officer received wage payments through the PEO. These wages were reported on a Form W-2, Wage and Tax Statement, issued by the PEO (under the PEO's EIN) and included on Forms 940 and 941 filed under the PEO's EIN. During this same year, the corporate officer also received distributions directly from the Taxpayer reported on a Schedule K-1 (Form 1120S), Shareholder's Share of Income, Deductions, Credits, etc., under the Taxpayer's EIN. The distributions were not reported or verified by the Taxpayer to the PEO as wages so were not included on the employment tax returns filed under the PEO EIN.

The CCA asserted:

> For [Redacted Text], the corporate officer also received a Form W-2 reporting wages for services rendered to the Taxpayer, and the wages were also reported on Forms 940 and 941, however, the Forms were filed under the PEO's EIN and not the Taxpayer's. The use of a PEO by the Taxpayer as a conduit for paying wages to its corporate officer, however, does not affect whether the audit for [Redacted Text] with respect to the distribution made by the Taxpayer to its corporate officer is considered a worker classification audit. The contractual arrangement demonstrates that no underlying issue of employment tax classification status exists because the Taxpayer specifically contracted with the PEO to fulfill its obligations as an employer with respect to the treatment of the corporate officer as its employee. Thus, the dispute is not whether the corporate officer performed more than minor services for the Taxpayer and received compensation for those services, *i.e.*, whether the corporate officer was an employee. Rather, the dispute is limited to the amount of compensation required to be treated as "wages" paid to the corporate officer - including distributions paid directly by the Taxpayer that did not flow through

Act (FICA) taxes, Federal Unemployment Tax Act (FUTA) taxes, and Federal income tax withholding.[87] Rev. Proc. 2022-13, § 3.01, "Jurisdictional requirements," assets:

> The Tax Court has jurisdiction under § 7436 only if all the following four requirements are satisfied:
>
> (1) the IRS conducts an examination in connection with an audit of any person;
>
> (2) as part of the audit, the IRS determines that
>
> (a) one or more individuals performing services for the person are employees of the person for purposes of subtitle C (worker reclassification), or
>
> (b) the person is not entitled to the relief under section 530(a) with respect to such an individual (section 530 relief);
>
> (3) there is an "actual controversy" involving the determination as part of an examination; and
>
> (4) the person for whom the services at issue were performed files an appropriate pleading in the Tax Court.

Ward v. Commissioner, T.C. Memo. 2021-32, reasoned and held:

> For all years at issue in these cases, the Commissioner argues that the firm did not pay employment taxes on all the wages that Ward received. The disagreement is largely about what the firm calls the "officer compensation" that it paid Ward.[8] The firm acknowledges that some of this compensation was salary or wages, but says the rest constituted distributions of the firm's earnings and profits.[9]

---

the PEO - for employment tax purposes, *i.e.* whether the additional payments constitute wages, rather than distributions.

[87] Footnote 1 of PMTA 2017-05, cited in fn. 85. Regarding the 0.9% additional Medicare tax on earned income over $250,000 (married filing jointly), $125,000 (married filing separately), or $200,000 (all others), PMTA 2019-006 (6/28/2019) concluded:

1. Yes. The "Additional Medicare Tax" imposed under I.R.C. § 1401(b)(2) is subject to the deficiency procedures under sections 6211-6213 since it is an income tax imposed under subtitle A of the Internal Revenue Code.
2. No. The "Additional Medicare Tax" imposed under I.R.C. § 3101(b)(2) is not subject to the deficiency procedures under sections 6211-6213 since it is a tax imposed under subtitle C of the Internal Revenue Code.
3. The filing of the Form 1040, U.S. Individual Income Tax Return, starts the running of the period of limitations for assessment with respect to the "Additional Medicare Tax" imposed under section 3101(b)(2).
4. Form SS-10, Consent to Extend the Time to Assess Employment Taxes, should be used to extend the period of limitations for assessment with respect to the employer's withholding liability pursuant to section 3102. To extend the period of limitations for assessment with respect to the employee's liability for "Additional Medicare Tax" imposed under section 3101(b)(2), the best practice is to use the Form 872, Consent to Extend the Time to Assess Tax.

The reference to Code § 3101(b)(2) is employee withholding and to Code § 1401 is to self-employment tax; see part II.L Self-Employment Tax (FICA).

[8] The firm didn't claim to pay any "officer compensation" in 2013. Ward instead claimed $48,136 as "Wages/Draws" on her personal return. Like the officer compensation from the previous two years, the Commissioner argues it's all wages.

[9] The firm also says that portions of those distributions should not be taxed because they were returns of Ward's basis in the firm. Under section 1368(a) and (b) an S corporation shareholder doesn't have to include distributions from the corporation in income if she has basis in the corporation that exceeds the amount distributed. Unfortunately for the firm, even if we were to accept that it paid Ward distributions in any amount, there is no evidence of what basis, if any, she had in the firm for any of the years before us.

The parties now agree that Ward is indeed an employee of the firm. (Under the Code, officers are employees. Sec. 3121(d)(1).) Any compensation paid to Ward in her role as an officer is considered wages. See *Joseph M. Grey Pub. Accountant, P.C. v. Commissioner*, 119 T.C. 121, 129-130 (2002), *aff'd*, 93 F. App'x 473 (3d Cir. 2004). It's settled law that the firm is liable for employment taxes on these wages.

The firm offers no evidence other than Ward's own testimony that any of these payments were anything but compensation. The firm, therefore, is liable for employment taxes on all amounts that the Commissioner identified as officer compensation.[10]

[10] The firm, while acknowledging that Ward was an employee who received compensation, nonetheless requests at various points in its brief that Ward's compensation be taxed directly to her as self-employment income. Since there's no evidence that Ward's work for the firm was as anything other than its officer, we deny this request.

Section 530 of the Revenue Act of 1978 relieves some firms from liability in situations somewhat like this. A firm that has consistently not treated an individual as an employee isn't liable for employment tax on compensation paid to that individual unless the firm had no reasonable basis for not treating the individual as an employee. See Revenue Act of 1978, Pub. L. No. 95-600, sec. 530(a)(1) and (2), 92 Stat. at 2885-86; see also *Donald G. Cave a Prof'l Law Corp. v. Commissioner*, T.C. Memo. 2011-48, 101 T.C.M. (CCH) 1224, 1231 (2011), *aff'd per curiam*, 476 F. App'x 424 (5th Cir. 2012). Here, though, we find the firm had no reasonable basis for treating Ward as anything other than an employee. The Code is clear that officers are employees. See sec. 3121(d)(1). Ward stated that she was an employee. And by filing Forms 941, the firm showed it was aware that it had to pay employment taxes on wages.

Here are some ways that taxpayers trip themselves up:

- Sometimes they try to deduct various expenses on Schedule C, which reports income as a sole proprietor. This position asserts that expenses are netted against their income.
    - The IRS will say that the income constitutes Form W-2 wages, and the expenses are deductible as employee business expenses (Form 2106). Employee business expenses constitute miscellaneous itemized deductions, from which 2% of the taxpayer's adjusted gross income is subtracted. This reduced number is subject to other limitations imposed on itemized deductions and is disallowed in computing alternative minimum tax.

- If the owner-employee had run these expenses through the company using an "accountable plan,"[88] then they would be fully deductible (subject to any limitations imposed on business deductions) and netted against business income. By not using this mechanism, the owner-employee forgoes the benefits of an accountable plan.

- Qualified retirement plans (including Code § 401(k) plans) provide current deductions and provide tax-deferred income and growth (as well as protection from creditors). For an S corporation, contributions are based only on wage income (as one taxpayer discovered the hard way).[89] Properly declaring wages gives the owner-employee an opportunity to develop a thoughtful qualified retirement plan.

Because each separate employer generally must pay FICA, if a person works for more than one related company then one company might pay the compensation to the person and collect a management fee (or fees under an employee leasing arrangement) from the other related companies. When doing so, carefully document the arrangements, to avoid mistakes like what the taxpayer made in *Blossom Day Care Centers, Inc. v. Commissioner*, T.C. Memo. 2021-86, which reasoned and held:

> **II. Worker Classification**
>
> For the purposes of respondent's determination, "employee" is defined for FICA and FUTA purposes to include "any officer of a corporation". See secs. 3121(d)(1) and (2), 3306(i). For purposes of income tax withholding under section 3402, the term "employee" also includes "an officer of a corporation". See sec. 3401(c). FICA and FUTA impose "employment taxes" that employers must pay and are obligated to withhold in addition to income tax withholding under section 3402. Employers are required to make periodic deposits of amounts withheld from employees' wages and amounts corresponding to the employer's share of FICA and FUTA tax. Secs. 6302, 6157; secs. 31.6302-1, 31.6302(c)-3, Employment Tax Regs.
>
> **III. Petitioner's Corporate Officers**
>
> An officer of a corporation who performs more than minor services and receives remuneration for such services is a "statutory" employee for employment tax purposes. See *Joseph M. Grey Pub. Accountant, P.C. v. Commissioner*, 119 T.C. 121, 126 (2002), *aff'd*, 93 F. App'x 473 (3d Cir. 2004); *Central Motorplex, Inc. v. Commissioner*, T.C. Memo. 2014-207; *Glass Blocks Unlimited v. Commissioner*, T.C. Memo. 2013-180; *Nu-Look Design, Inc. v. Commissioner*, T.C. Memo. 2003-52, 85 T.C.M. (CCH) 927, 931 (2003), *aff'd*, 356 F.3d 290 (3d Cir. 2004); secs. 31.3121(d)-1(b), 31.3306(i)-1(c), 31.3401(c)-1(f), Employment Tax Regs. An officer can escape statutory employee status only if he performs no services (or only minor services) for that corporation and neither receives nor is entitled to receive any remuneration, directly or indirectly, for services performed. See *Veterinary Surgical Consultants, P.C. v. Commissioner*, 117 T.C. 141, 144-145 (2001), *aff'd sub nom. Yeagle Drywall Co. v. Commissioner*, 54 F. App'x 100 3d Cir. 2002); secs. 31.3121(d)-1(b), 31.3306(i)-1(e), 31.3401(c)-1(f), Employment Tax Regs.

---

[88] Reg. § 1.62-2.

[89] *Durando v. U.S.*, 70 F.3d 548 (9th Cir. 1995) (amount shown on Form 1099-MISC did not constitute earnings that a shareholder could use to create a self-employed person's retirement plan).

Petitioner has stipulated that the Hackers were corporate officers during all of the calendar quarters and years 2005 through 2008. Both provided substantial services far beyond minor services, and both directly and indirectly received remuneration for their services. Mrs. Hacker was petitioner's 51% shareholder and acted as president of the corporation and director of curriculum and education for all six child care locations and supervised over 90 employees and students of those centers. See *Nu-Look Design, Inc. v. Commissioner*, 85 T.C.M. (CCH) at 931-932 (characterizing as statutory employee S corporation shareholder who served as corporation's president). Mr. Hacker was 49% shareholder and acted as vice president, secretary, and treasurer; as director of Blossom Day Care Centers; and as director of accounting and finance for petitioner. Both Mr. and Mrs. Hacker had check-signing authority over petitioner's bank accounts and credit card authorization in their corporate capacity.

In addition, Mr. Hacker's daily responsibilities included but were not limited to depositing parents' payments for child care and personally writing all of the payroll checks to petitioner's 90 employees. Both Mr. and Mrs. Hacker provided numerous services to petitioner, any one of which could be considered substantial. Both received direct and indirect remuneration in the form of cars for themselves, a Lexus and a Hummer; cars for their children and relatives; credit cards; and access to all cash distributions.

Petitioner has asserted that it operates under an oral management contract and pays management fees to a related S corporation, Hacker Corp., to provide services, and that the Hackers, as employees of Hacker Corp., provide services to petitioner and its day care centers. Whether a corporate officer is performing services in his capacity as an officer is a question of fact. Joseph M. Grey Public Accounting, P.C. v. Commissioner, 119 T.C. at 129-130; Rev. Rul. 82-83, 1982-1 C.B. 151, 152. The conclusion that a corporate officer is a statutory employee may not apply to the extent that he or she performs services in some other capacity. *Nu-Look Design, Inc. v. Commissioner*, 85 T.C.M. (CCH) at 931-932.

Petitioner did pay Hacker Corp. money classified as management fees on its general ledger for the years at issue in the following amounts: $382,650 in 2005, $378,484 in 2006, $0 in 2007, and $204,514 in 2008. From these management fees, Hacker Corp. paid Form W-2 wages to the Hackers for 2005 through 2008 of $73,848, $40,000, $53,847, and $58,462, supposedly for the services the Hackers were to render to petitioner under an oral management contract. Petitioner has submitted no evidence of a management agreement, either written or oral, with Hacker Corp. Likewise, petitioner has submitted no evidence, written or otherwise, as to a service agreement directing the Hackers to perform substantial services on behalf of Hacker Corp. to benefit petitioner, or even a service or employment agreement between the Hackers and Hacker Corp. Therefore, there is no evidence in the record that Mr. Hacker or Mrs. Hacker performed services in a capacity other than as a corporate officer.

The Court finds that the Hackers were both "statutory" employees of petitioner for employment tax purposes for all calendar quarters and years of 2005 through 2008. Having made that determination, the Court is not required to consider whether they would also be classified as "employees" under the common law test. See *Nu-Look Design, Inc. v. Commissioner*, 356 F.3d at 293.

IV. Reasonableness of Compensation

> Petitioner also contends that, even if the Court determines that its corporate officers are statutory employees, the determination of additional wages paid to the Hackers should be no more than the difference between what was paid to the Hackers as Form W-2 employees of Hacker Corp. and the reasonable wage determinations of respondent. Petitioner's arguments are misguided in that wages paid by Hacker Corp. do not offset reasonable compensation requirements for the services provided by petitioner's corporate officers to petitioner. Whatever wages paid for whatever purposes by Hacker Corp. to the Hackers as employees of the S corporation will be better addressed in relation to respondent's notice of deficiency for the Hackers' individual income tax, in consideration that Hacker Corp. is a wholly owned S corporation.
>
> Additionally, petitioner contends that the notice of determination is flawed in that the determined compensation reflects requirements of higher educational qualifications than either Mr. Hacker or Mrs. Hacker has achieved, since Mr. Hacker did not graduate from college and Mrs. Hacker has only an associate's degree in child development. While petitioner has not further developed this contention in its briefs and there was limited trial testimony on the topic, whatever higher educational qualifications might be required have been far eclipsed by the Hackers' practical experience, professional qualifications, success in running day care centers, and ownership prerogatives.
>
> Reasonableness of compensation is a question determined by all the facts and circumstances of the case. *E.g.*, *Glass Blocks Unlimited v. Commissioner*, at *13; *Joly v. Commissioner*, T.C. Memo. 1998-361, 1998 WL 712528, at *4, *aff'd without published opinion*, 211 F.3d 1269 (6th Cir. 2000). Factors affecting the reasonableness of compensation include the employee's role in the company, comparisons of the employee's salary to those paid by similar companies for similar services, and the character and condition of the company. *Elliotts, Inc. v. Commissioner*, 716 F.2d 1241, 1245-1246 (9th Cir. 1983), *rev'g* T.C. Memo. 1980-282; see also *Pepsi-Cola Bottling Co. of Salina, Inc. v. Commissioner*, 528 F.2d 176, 179 (10th Cir. 1975), *aff'g* 61 T.C. 564 (1974). The Court does not find persuasive petitioner's evidence that the services provided by the Hackers were worth something less than respondent's determination. Once again, although the issue was passingly addressed in evidence at trial, petitioner's briefs have failed to show why respondent's determination is unreasonable and, accordingly, petitioner has not carried its burden to show that the amounts respondent determined are unreasonable compensation.

The court then imposed penalties. Note that the taxpayer claimed that essentially the officers were leased employees because the corporation paid a related company that employed them a management fee that covered their services. The court rejected that argument, because there was no evidence of a management agreement, either written or oral, with that related company and no evidence, written or otherwise, as to a service agreement directing the officers to perform substantial services on behalf of the related company to benefit the corporation, or even a service or employment agreement between the officers and the related company. This failure to document the basis for a management agreement was also the taxpayers' downfall in a C corporation dividend case decided the same year as this case; see part II.A.1.b.ii Compensating Owner(s) with Management Fees.

For the S corporation's earnings to avoid self-employment tax, the S corporation must actually have received the income. See part II.G.24 Taxing Entity or Individual Performing Services.

II.A.2.d. Estate Planning Strategies Available Only for S Corporation Shareholders

II.A.2.d.i. Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders

A trust owning stock in an S corporation may be converted into a QSST – a trust in which the beneficiary pays the tax on the trust's current and accumulated income.[90] See part III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs for discussions of how to:

- Tax the beneficiary on the trust's taxable income to avoid it being taxed at the trust's high income tax rates, a tax differential that has become more pronounced after 2012.

- Avoid unfavorable income taxation of a trust for a spouse after divorce.

- Sell the beneficiary's assets to a trust to freeze the beneficiary's estate while allowing the beneficiary to benefit from the assets' income.

For nontax issues, an unincorporated entity may be more attractive than a state law corporation. See part II.F.1 Business Entities and Creditors Generally.

The courts have created special rules expanding Code § 2036 to cause partnerships to be disregarded for estate tax purposes, artificially increasing the value included in the owner's estate unless the taxpayer proves that each entity was created for a "legitimate and significant nontax reason;"[91] this increase may cause double inclusion of the appreciation of the retained

[90] See part III.A.3.e QSSTs and ESBTs for a description of how QSSTs work and creative planning opportunities.
[91] For *Bongard* and related cases regarding scrutiny of a family business entity for estate tax purposes, see part III.C.1 Whether Code § 2036 Applies.

partnership interest.[92] S corporation owners can avoid this issue by retaining voting stock and transferring nonvoting stock.[93]

Although the "check-the-box" rules generally apply for all tax purposes,[94] an LLC case held that state law property attributes control for gift tax purposes.[95] "Partnership" and "corporation" are not defined for gift and estate purposes, so it is unclear how the rules described in the prior paragraph may apply to an LLC taxed as an S corporation. To deal with that uncertainty, consider converting the LLC to a corporation taxed as an S corporation (or a single member disregarded entity of such a corporation) in a tax-free organization as described in part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization and elaborated upon in part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

Code § 6166 provides estate tax deferral for closely-held businesses.[96] Tiered structures create significant limitations on the election and sometimes uncertainty as to whether the election is available.[97] However, if an S corporation is structured with multiple wholly owned subsidiaries, the parent of all of the subsidiaries should be treated as one entity for purposes of Code § 6166;[98] no authority directly addresses this conclusion, so one might consider obtaining

---

[92] *Estate of Powell v. Commissioner*, 148 T.C. No. 18 (5/18/2017) (contrast majority and concurring opinions). Footnote 7 of the majority opinion stated:

> More precisely, the net inclusion required by applying sec. 2036(a) to a transfer to a family limited partnership would equal any discounts applied in valuing the partnership interest the decedent received plus any appreciation (or less any depreciation) in the value of the transferred assets between the date of the transfer and the decedent's date of death. Changes in the value of the transferred assets would affect the required inclusion because sec. 2036(a) includes in the value of decedent's gross estate the date-of-death value of those assets while sec. 2043(a) reduces the required inclusion by the value of the partnership interest on the date of the transfer. To the extent that any post-transfer increase in the value of the transferred assets is reflected in the value of the partnership interest the decedent received in return, the appreciation in the assets would generally be subject to a duplicative transfer tax. (Conversely, a post-transfer decrease in value would generally result in a duplicative reduction in transfer tax.) In the present cases, however, the parties appear to have agreed to disregard any change in the value of the cash and securities transferred to NHP between the date of their transfer, on August 8, 2008, and decedent's death one week later. See infra note 12. Therefore, if no discount appropriately applies to value the interest in NHP issued in exchange for decedent's cash and securities, as respondent claimed in the estate tax notice of deficiency, then the application of either sec. 2036(a) or sec. 2038(a) to the transfer of those assets to NHP would add nothing to her gross estate.

[93] See part II.A.2.i.i Voting and Nonvoting Stock, especially part II.A.2.i.i.(b) Why Nonvoting Shares Are Needed for Estate Planning.

[94] See part II.B Limited Liability Company (LLC).

[95] *Pierre*, a 2009 reviewed Tax Court opinion described in fn. 4041, held that, for gift tax purposes, the transfer of a partial interest in an LLC must be valued as an interest in the LLC as an entity rather than an interest in the underlying assets, even though before the transfer all of the assets were deemed owned directly by the sole member for income tax purposes. *Pierre* squarely held that the check-the-box rules do not override property rights, because state law property rights are fundamental to gift taxation. See part III.B.1.e Valuation Issues. *Mirowski v. Commissioner*, T.C. Memo. 2008-74, approved the nontax reasons for forming a single member LLC that was disregarded for income tax purposes, which approval was helpful when gifts of LLC interests were made later. *Mirowski* did not address the check-the-box rules.

[96] See part III.B.5.e.ii Code § 6166 Deferral.

[97] See part III.B.5.e.ii.(b) Tiered Structures.

[98] See part II.A.2.g Qualified Subchapter S Subsidiary, especially the text accompanying fns. 178-187.

a private letter ruling confirming this result (if the IRS is willing to rule on this issue, which likely would be only for a decedent).[99]

II.A.2.d.ii. Estate Planning and Income Tax Disadvantages of S Corporations

S corporations include the following disadvantages relative to partnership taxation:

- Perhaps more difficult to deduct start-up losses.[100]
- Less advantageous seller-financed sales to key employees or others.[101]
- No inside basis step-up when an owner sells in a taxable sale or dies.[102]
- Possible unavailability of a tax-free split-up of the entity, which might be very important when a trust terminates and is divided among beneficiaries.[103]
- The sale of S corporation stock and an S corporation's actual or deemed sale of its assets constitute unrelated business income per se, so charitable strategies are much less attractive.[104] Same with any K-1 income from an S corporation; if a marital trust terminates in favor of charity, consider converting the S corporation to an LLC taxed as an S corporation, so that the S corporation can be liquidated into a partnership or disregarded entity retroactive to immediately after the surviving spouse's death by the LLC revoking its election to be taxed as a corporation within 75 days after death.[105]

A structure that avoids these concerns, saves self-employment tax the way an S corporation would, and reduces the possibility of the 3.8% tax on net investment income being imposed on rent income is described in part II.E Recommended Structure for Entities. This structure is a limited partnership that has an S corporation general partner, which can avoid Code § 2036 issues and provide a limited partnership's superior income tax attributes. Owners of entities taxed as partnerships and owners of S corporations should consider migrating towards this structure.[106]

---

[99] Rev. Proc. 2016-3, Section 3.1(118) says that the IRS will not rule on Code § 6166 "if there is no decedent."
[100] See part II.G.4.c Basis Limitations for Deducting Partnership and S Corporation Losses.
[101] See part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis.
[102] See parts II.H.2 Basis Step-Up Issues and II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation.
[103] See generally part II.Q.7 Exiting from or Dividing a Corporation; for the steps required to have a tax-free corporate split-up, see part II.Q.7.f.ii Code § 355 Requirements. For partnership divisions, see part II.Q.8 Exiting From or Dividing a Partnership.
[104] See part II.Q.6 Contributing a Business Interest to Charity to place context to part II.Q.6.d.ii UBTI Related to an S Corporation. Also, a charitable remainder trust cannot hold stock in an S corporation. See fn. 4908 in part II.Q.7.c S Corporation Owned by a Trust Benefitting Charity.
[105] Reg. § 301.7701-3(c)(iii).
[106] For migrating an S corporation, see parts II.Q.7.h Distributing Assets; Drop-Down into Partnership and II.E.9 Real Estate Drop Down into Preferred Limited Partnership.

II.A.2.d.iii. Which Type of Entity for Which Situation?

For a business' original owner, generally exit strategies and inside basis step-up suggest using the partnership structure described in part II.E Recommended Structure for Entities.

When that owner dies, one can take another look at the merits of each type of business entity. If an S corporation is ideal, then:

- If the limited partnership has owners other than the deceased owner or if the deceased owner's successors differ regarding whether to use an S corporation, those deceased owner's successors who wish S corporation treatment can simply assign their limited partnership interest into their own new S corporation.

- If the limited partnership has no other owners and all of the deceased owner's successors want S corporation status, then the limited partnership could elect S corporation status; note, however, that a limited partnership must have at least two separate owners – a general partner and a limited partner.[107] However, because an S corporation cannot have another S corporation as a shareholder unless the other latter is the former's sole shareholder,[108] the general partner needs to be dissolved, which would be a taxable event.[109]

For additional considerations, see part III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs, including part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts.

II.A.2.d.iv. Asset Protection: Which State Law Entity Should Be Used for S Corporation Income Taxation

For asset protection planning purposes,[110] consider using a limited liability limited partnership (LLLP) that makes an S election.[111] An LLLP is a limited partnership that uses the registration process for a limited liability partnership to protect the general partner from liability.

To avoid creating a second class of stock, be careful not to include partnership capital account provisions in the partnership agreement.[112]

An existing corporation may convert to such an entity on a tax-free basis.[113]

---

[107] See part II.C.12 Limited Partnership.
[108] See part II.A.2.e.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity.
[109] See part II.Q.7.a.vii Corporate Liquidation.
[110] See part II.F Asset Protection Planning.
[111] For why I suggest a limited partnership over an LLC, see part II.L.5.b Self-Employment Tax Caution Regarding Unincorporated Business That Makes S Election.

[113] Code § 368(a)(1)(F), described more fully in part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

II.A.2.e. Making the S Election

II.A.2.e.i. Try to Make as of Date Entity is Taxed as a Corporation

Converting from C corporation to S corporation might generate tax immediately or over the course of several years. See part II.P.3.b Conversion from C Corporation to S Corporation.

Also, distributions from a former C corporation may be taxable dividends, if they exceed certain S corporation earnings. See part II.Q.7.b.iv.(a) S corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations. If the S election is not made effective until after the entity is first taxed as a C corporation, then one needs to determine whether the entity earned any earning and profits as a C corporation that generate a taxable dividend for distributions in excess of those S corporation earnings.[114]

II.A.2.e.ii. Procedure for Making the S Election; Relief for Certain Defects in Making the Election

S elections are made on IRS Form 2553, filed no later than two months and 15 days after the beginning of the tax year the election is to take effect;[115] an S corporation elects to treat its subsidiary as a disregarded entity[116] using Form 8869, with the same deadline and similar relied for later filing. The instructions to IRS Form 2553 and 8869 discuss when an extension of time to file might be granted. The S election may be rescinded during the period during which an election could have been made timely.[117]

Directing the IRS to provide relief for mistakes in making or preserving an S election if doing so will not whipsaw the government, Code § 1362(f), "Inadvertent invalid elections or terminations," provides:

> If -
>
> (1) an election under subsection (a) or section 1361(b)(3)(B)(ii) by any corporation -

---

[114] *Franklin v. Commissioner*, T.C. Memo. 2016-207, explained:

> An S corporation may have accumulated earnings and profits from a variety of sources, including (1) as a carryover from years in which it was a C corporation, before it became as S corporation, see *Cameron v. Commissioner*, 105 T.C. 380, 384 (1995), *aff'd sub nom. Broadaway v. Commissioner*, 111 F.3d 593 (8th Cir. 1997), and (2) as the result of certain reorganizations and the like, see sec. 1371(c)(2); see also James S. Eustice, Joel D. Kuntz, and John A. Bogdanski, *Federal Income Taxation of S Corporations*, para. 8.04[8][b], at 8-74 (5th ed. 2015). FDI was incorporated on March 24, 1989, and elected S corporation status effective March 27, 1989. Given the three-day period between its incorporation and S election, it is likely that FDI never accumulated earnings and profits as a C corporation. Moreover, although the record is silent, from the nature of its business as construction/contractor it also seems likely that it was never involved in reorganizations or other transactions referred to in section 1371(c)(2). See *Briggs v. Commissioner*, T.C. Memo. 2000-380, 2000 WL 1847580, at *4 n. 9. We find, accordingly, that FDI had no accumulated earnings and profits.

[115] The procedure for corporations electing S corporation status also applies to unincorporated entities, which do not need to (and usually should not) elect corporate income taxation before making the S election. See text accompanying fns. 359-360 in part II.B Limited Liability Company (LLC).

[116] See fn. 139, which also recommends that the corporate subsidiary convert into a limited liability company that is treated a disregarded entity to avoid potential issues relating to future ownership.

[117] See text accompanying fns. 4055-4057.

(A) as not effective for the taxable year for which made (determined without regard to subsection (b)(2)) by reason of a failure to meet the requirements of section 1361(b) or to obtain shareholder consents, or

(B) was terminated under paragraph (2) or (3) of subsection (d) or section 1361(b)(3)(C),

(2) the Secretary determines that the circumstances resulting in such ineffectiveness or termination were inadvertent,

(3) no later than a reasonable period of time after discovery of the circumstances resulting in such ineffectiveness or termination, steps were taken—

(A) so that the corporation for which the election was made or the termination occurred is a small business corporation or a qualified subchapter S subsidiary, as the case may be, or

(B) to acquire the required shareholder consents, and

(4) the corporation for which the election was made or the termination occurred, and each person who was a shareholder in such corporation at any time during the period specified pursuant to this subsection , agrees to make such adjustments (consistent with the treatment of such corporation as an S corporation or a qualified subchapter S subsidiary, as the case may be) as may be required by the Secretary with respect to such period,

then, notwithstanding the circumstances resulting in such ineffectiveness or termination, such corporation shall be treated as an S corporation or a qualified subchapter S subsidiary, as the case may be, during the period specified by the Secretary.

For relief when one makes mistakes when trying to comply with what is described below in this part II.A.2.e.ii, see part II.A.2.e.vi Relief for Inadvertent Errors or Omissions on Form 2553 or Form 8869.

An election on Form 2553 is valid only if all persons who are shareholders[118] in the corporation on the day on which such election is made consent to such election.[119] An executor or administrator of the shareholder's estate may consent to a new S^selection on behalf of a decedent.[120] When a married couple owns stock as tenants in common, joint tenants, or

---

[118] A person who has beneficial ownership of stock might be considered a shareholder, even if no stock certificates were issued to that person. *Cabintaxi Corp. v. Commissioner*, 63 F.3d 614 (7th Cir. 1995) (nevertheless holding that the persons in question did not count), *aff'g* T.C. Memo. 1994-316.

[119] Code § 1362(a)(2). An executor or administrator of the shareholder's may consent to a new S election on behalf of a decedent. Rev. Rul. 92-82.

[120] Rev. Rul. 92-82, which addressed the following facts:

> X is a small business corporation described in section 1361(b) of the Code. X's taxable year is the calendar year. A, an eligible S corporation shareholder and an owner of X stock, died on March 1, 1991. A's stock in X passed to A's estate; however, E, the executor of A's estate, was not appointed until April 1, 1991. On March 15, 1991, X filed Form 2553, Election by a Small Business Corporation, electing to be an S corporation effective January 1, 1991. Except for A

tenants by the entirety, each tenant in common, joint tenant and tenant by the entirety must consent to the election.[121] Although the consent of each spouse who has a community property interest is required,[122] the IRS waives the consent requirement if certain procedures are followed, the election failed to include the signature of a community property spouse who was a shareholder solely pursuant to state community property law, and both spouses have reported all their K-1 items on all affected federal income tax returns.[123] The deemed owner (whether the grantor or, in the case of a QSST election, the beneficiary) of a grantor trust must sign the consent,[124] even if the trust is an ESBT (but the trustee of the ESBT must also sign).[125]

Until Rev. Proc. 2022-19 was issued: One may verify that Form 2553 was filed by filing Form 8821 with the Internal Revenue Service.[126] Obtain a signed Form 8821, call the IRS, then

---

> and A's estate, all of the persons who held stock in X on March 15, 1991, or during 1991 and before that date, consented to the election.

It held:

> In this case, E, like the executors in the revenue rulings discussed above, acts in a fiduciary capacity on behalf of both A and A's estate and, as such, is in the position to decide whether to consent to X's S corporation election on behalf of both A and A's estate. Thus, consistent with the extension of rights and privileges to a fiduciary under section 6903 of the Code, E may consent to X's S corporation election on behalf of both A and A's estate. Furthermore, even though E was not appointed until April 1, 1991, the consents E provides on behalf of A and A's estate will be considered made for X's taxable year beginning January 1, 1991, upon the approval by the Service of an application for an extension of time for filing consents under section 18.1362-2(c) of the temporary regulations.
>
> Accordingly, X's S corporation election will be valid for X's taxable year beginning January 1, 1991, so long as (1) the Service grants an extension of time to file the consents to the election, (2) E consents to the election on behalf of both A and A's estate, and (3) consents are filed within the extended time period granted by the Service by all persons (other than A) who were shareholders of X at any time during the period beginning January 1, 1991, and ending on the date the Service grants an extension of time.
>
> If the stock instead had been held by A and A's spouse as joint tenants with the right of survivorship or as tenants by the entirety, the result would be similar. Upon A's death, the X stock would pass directly to A's spouse. X's S corporation election would be effective for X's taxable year beginning January 1, 1991, if: (1) A's spouse consents to the election (A's spouse's consent would apply to both the interest in X stock A's spouse would have owned as a joint tenant or as a tenant by the entirety before A's death and the interest in X stock A's spouse would own after A's death); and (2) E consents to the election on behalf of A (E would not have to consent on behalf of A's estate because the estate would not be a shareholder of X at any time).

[121] Reg. § 1.1362-6(b)(2)(i).

[122] Reg. § 1.1362-6(b)(2)(i). For a community property trust's eligibility to hold stock, see fn. 5857, found in part III.A.3.a.i Qualifying as a Wholly Owned Grantor Trust.

[123] Rev. Proc. 2004-35. Letter Ruling 201644003 granted relief where the spouses had failed to sign and the number of shares owned by each shareholder was inaccurate. Letter Ruling 202105005 granted retroactive relief when some spouses of shareholders located in community property states at the time of the election failed to properly consent to the S election.

[124] Letter Ruling 201516009.

[125] Reg. § 1.1362-6(b)(2)(iv) provides:

> In the case of an ESBT, the trustee and the owner of any portion of the trust that consists of the stock in one or more S corporations under subpart E, part I, subchapter J, chapter 1 of the Internal Revenue Code must consent to the S corporation election. If there is more than one trustee, the trustee or trustees with authority to legally bind the trust must consent to the S corporation election.

[126] When I checked 6/7/2016, the Instructions for Form 8821 (Rev. 3-2015) listed Form 2553 as one of the items for which Form 8821, Line 4, Specific Use Not Recorded on CAF, can be completed.

fax Form 8821 to the person who will provide the verification.[127] Now that Rev. Proc. 2022-19 has been issued, first look to part II.A.2.e.vii Missing Administrative Acceptance Letter for S Election or QSub Election.

An election that is timely filed for any taxable year and that would be valid except for the failure of any shareholder to file a timely consent can be granted additional time to file by the district director or director of the service center with which the corporation files its income tax return if (1) there was reasonable cause for the failure to file the consent, (2) the request for the extension of time is made within a reasonable time under the circumstances, and (3) treating the election as valid will not jeopardize the government's interest.[128] Consents must be filed within the extended period of time by all persons who have not previously consented to the election and were shareholders of the corporation at any time during the period beginning as of the date of the invalid election and ending on the date on which an extension of time is granted.[129]

For the statute authorizing relief and the importance of provisions in a shareholders' agreement ensuring that this relief would be available, see part II.A.2.h Important Protections for S Corporation Shareholder Agreements.

Letter Ruling 201644003 granted an extension of time to file Forms 8869 that inadvertently were not filed. It also held that, when Form 8869 was validly filed but ineffective because the parent's Form 2553 was defective, Form 8869 was effective retroactive to the originally intended date

---

[127] ACTEC Fellow Robert L. Hallenberg reported success using this method when he called the IRS at 513-977-8237. I am not sure when he called the IRS and have not checked this process myself.

[128] Reg. § 1.1362-6(b)(3)(iii)(A). For IRS processing procedures, see IRM 3.13.2.22.1 (01-01-2015). Regarding whether the government's interests are prejudiced, Letter Ruling 200333017 denied relief under the following circumstances:

> [Corporation] X generated a loss in Year 1 and a gain in Year 2. Shareholder claimed the loss in Year 1, which reduced his reported tax liability, but because X claimed the same loss as a carryforward in Year 2, its tax liability was also reduced. If the relief is granted, the loss claimed on Shareholder's Year 1 return would be validated. In addition, if relief is granted, Shareholder should be required to take into account his distributive share of X's Year 2 income calculated without regard to the inappropriate carryforward loss. However, because the statute of limitations on assessment has expired, Shareholder's Year 2 return cannot be adjusted. Thus, if the relief is granted, Shareholder will have a lower aggregate tax liability than if the election had been timely made.

If the government's interests are not prejudiced, the IRS might be required to grant consent. See *Kean v. Commissioner*, 469 F.2d 1183 (9th Cir. 1972) (prior regulations) (needed to provide additional time to make election once who was required to sign was determined), *rev'g* 51 T.C. 337 (1968) (Tax Court rejected consent as not being authorized without addressing granting additional time to consent) as to that issue. Letter Ruling 202240015 (issued before Rev. Proc. 2022-19), provide relief as of Date 1 when:

> X's sole shareholders, A and B, intended for X to elect S corporation status for federal tax purposes effective Date 1. However, X failed to timely file the Form 2553, Election by a Small Business Corporation, for X effective Date 1. Additionally, X inadvertently filed Form 1120, U.S. Corporation Income Tax Return, for X's Year 1 taxable year rather than Form 1120S, U.S. Income Tax Return for an S Corporation. Nevertheless, A and B have filed tax returns consistent with X being an S corporation effective Date 1 and thereafter. Upon discovery of the error, X sought relief under Rev. Proc. 2013-30, 2013- 36 I.R.B. 173 to make a late S corporation election effective Date 1. However, the Service granted relief effective Date 2, the first date that X was eligible for relief under Rev. Proc. 2013-30. Therefore, X requests a private letter ruling under § 1362(b)(5) that its S corporation election will be treated as timely made effective Date 1.

[129] Reg. § 1.1362-6(b)(3)(iii)(B).

when the defects to Form 2553 were cured under the extension to file Form 2553 that the ruling also granted.

Letter Ruling 201714014 provided relief for a late S election and a late QSub[130] election. The following paragraphs are the facts, followed by a description of the effect of following through with the granted extensions of time to file (skipping what was in between):

> X was formed on D1 under the laws of State. X's initial shareholders are trusts that X represents are eligible S corporation shareholders. X represents that it filed Form 2553, Election by a Small Business Corporation, to be treated as an S corporation effective D2. However, X received no acceptance notice from the service center and does not know whether the service center received the election.
>
> On D3, an unrelated S corporation, Y, acquired shares of stock in X. Because Y is an ineligible S corporation shareholder, X's S corporation election, had it been effective, would have terminated on D3. In D4, X learned that Y is an ineligible S corporation shareholder and that as of D3 it no longer qualified as an S corporation. On D5, the trusts transferred their X stock to Y in exchange for Y stock. Y plans to elect under § 1361(b)(3) to treat wholly owned X as a qualified subchapter S subsidiary (QSub) effective D5.
>
> … if X makes an election to be an S corporation by filing a completed Form 2553 with the appropriate service center effective D2, within 120 days from the date of this letter, then such election will be treated as timely made.
>
> X failed to timely file an election to be treated as an S corporation effective D2. Had X timely filed the election, it would have terminated on D3 when shares of X stock were transferred to Y, an ineligible S corporation shareholder. Based solely on the facts submitted and representations made, we conclude that X's S corporation election terminated on D3 when shares of X stock were transferred to Y. However, we conclude that the circumstances surrounding the termination were inadvertent within the meaning of § 1362(f). Pursuant to the provisions of § 1362(f), X will be treated as continuing to be an S corporation from D3 to D5, provided that X's S corporation election is otherwise valid and was not otherwise terminated under § 1362(d).

If the corporation comes in for relief for late filing due to mistakes and not all eligible shareholders have consented, the IRS might grant relief while requiring the corporation to work out with the District Director those eligible shareholders' late consents.[131]

If the corporation has an ineligible shareholder at the time of the election and does not realize the issue, the election is invalid, but inadvertent termination relief would give the S election retroactive application if the ineligible shareholder is eliminated.[132]

---

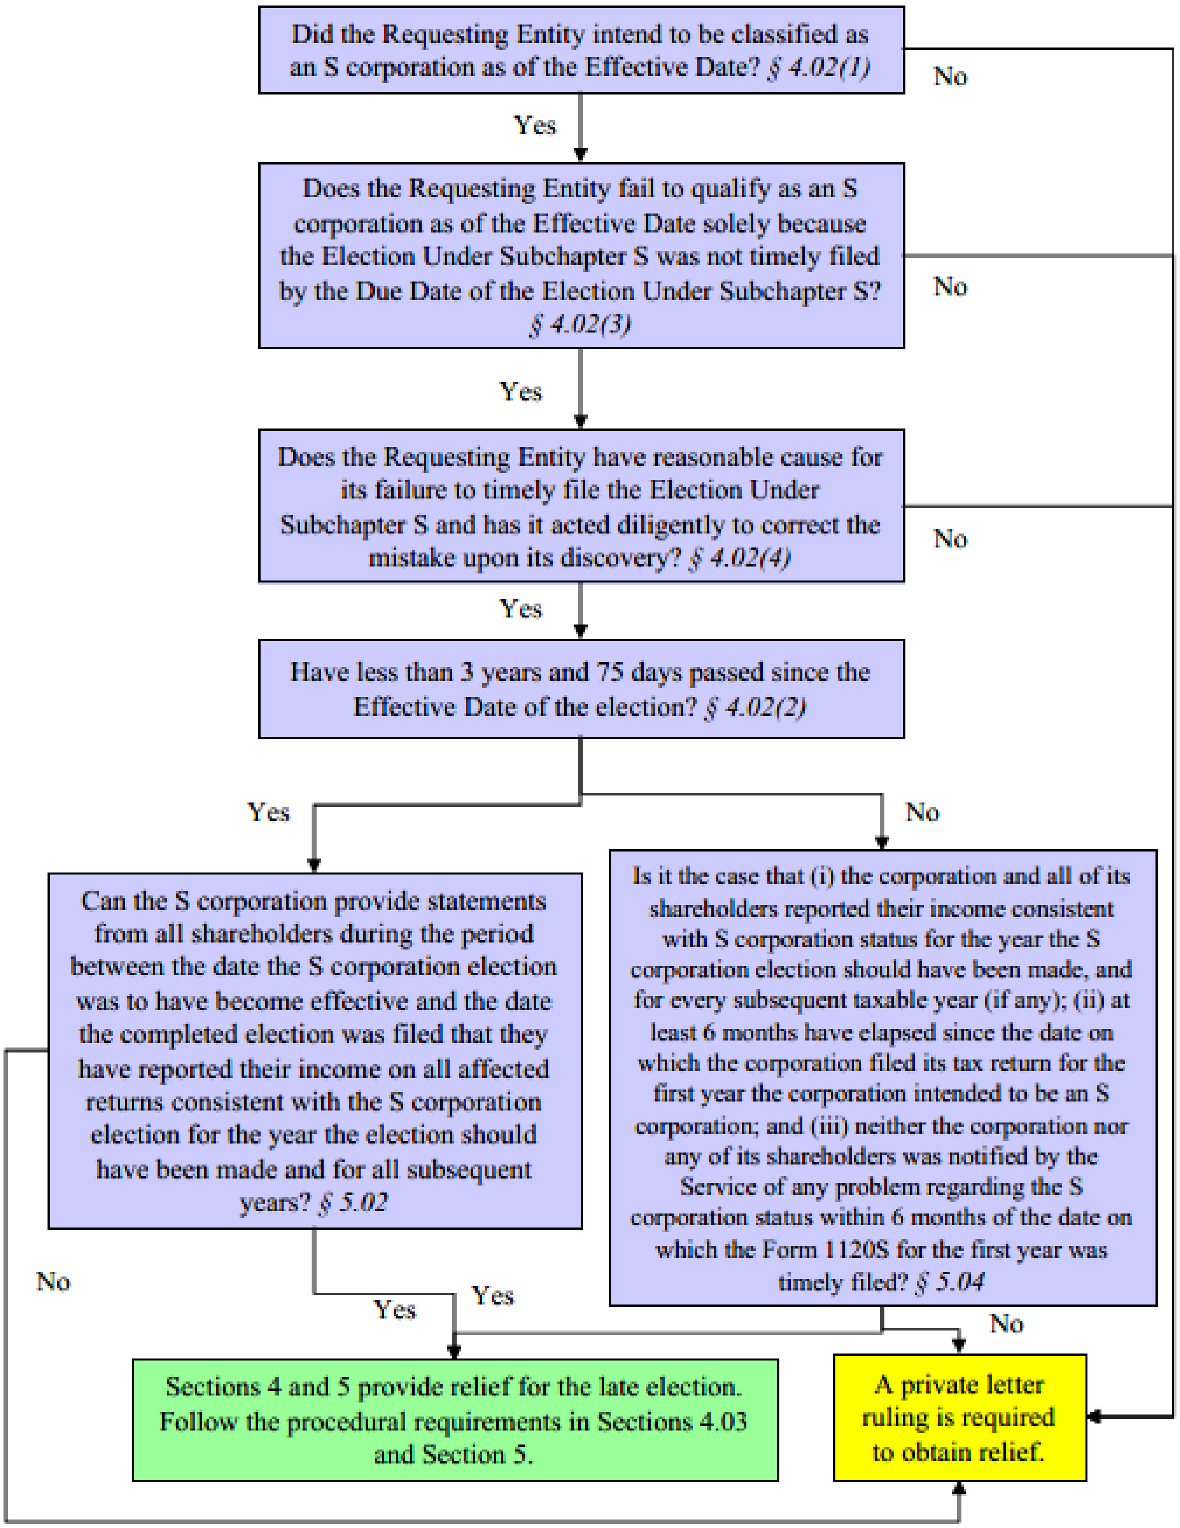
[130] See part II.A.2.g Qualified Subchapter S Subsidiary (QSub).
[131] Letter Ruling 201714018, referring to the relief in the text accompanying fns. 128-129.
[132] Letter Rulings 201427007 and 201427017, which also included relief for possible flaws in the single class of stock rules that were cured.

The following parts reproduce in their entirety (including apparently non-substantive typos) flowcharts the IRS kindly provided when it kindly gave taxpayers 3 years and 75 days from the effective date of the S election,[133] then discuss other relief that may be more far-reaching.

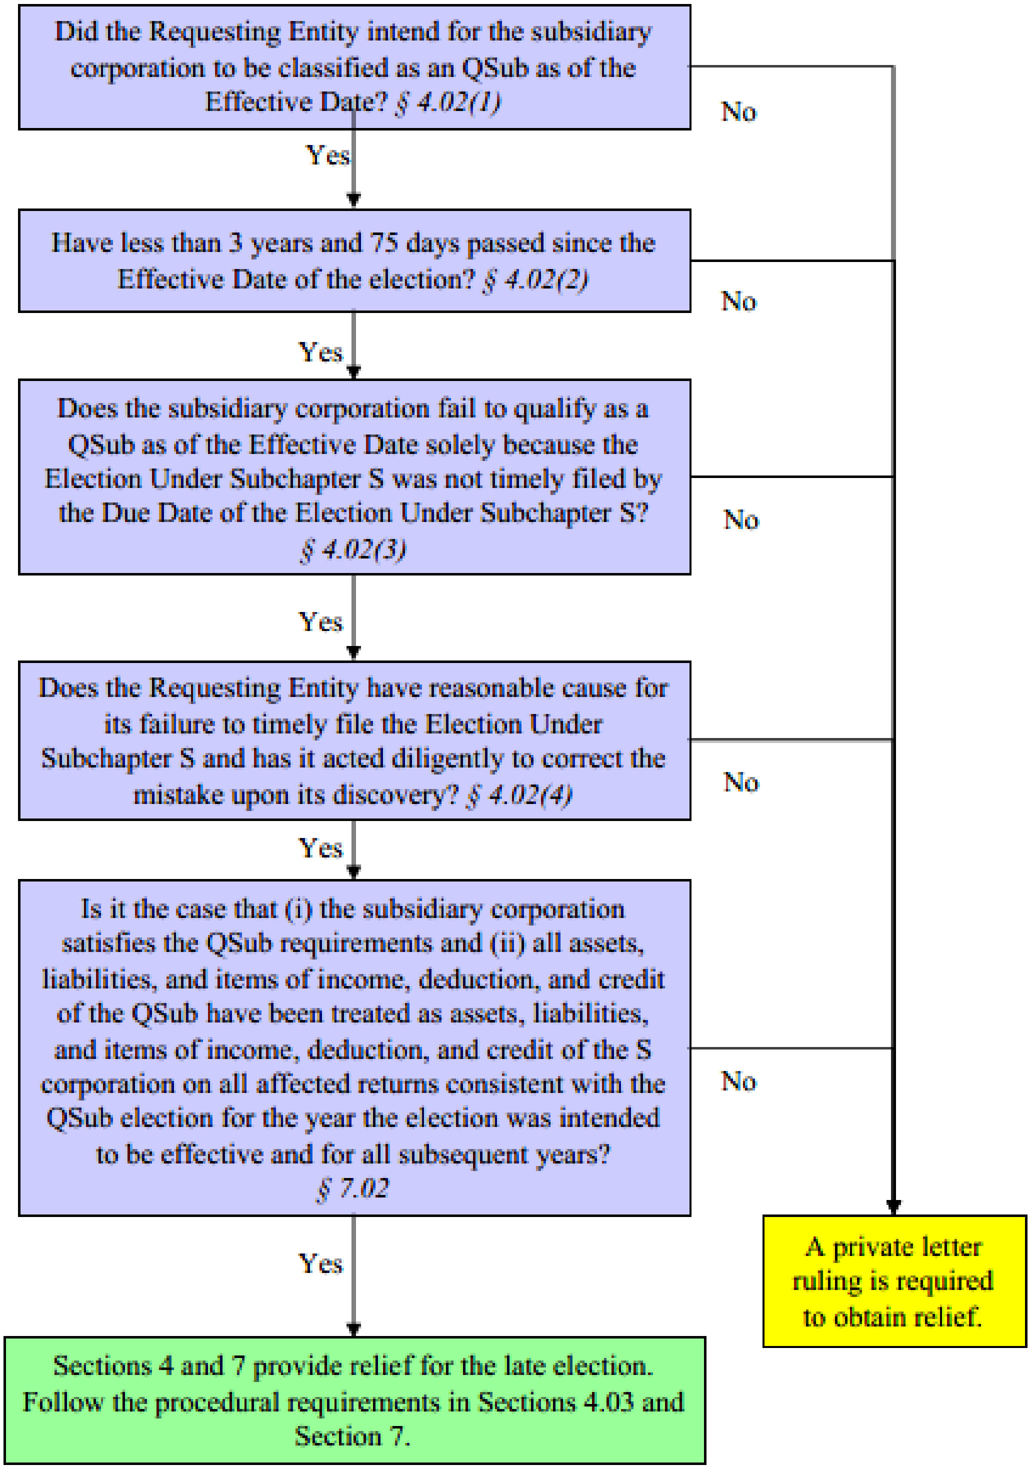
For a webinar (not free) describing the automatic relief provided by Rev. Procs. 2013-30 and 2022-19, see https://new.leimbergservices.com/wdev/register.cfm?id=2078.

[133] Rev. Proc. 2013-30, modifying and superseding Rev. Procs. 97-48, 2003-43, and 2004-49. One might consider checking the most recent annual Revenue Procedure for issuing letter rulings, the successor to Rev. Proc. 2015-1. The relevant IRS web page is https://www.irs.gov/businesses/small-businesses-self-employed/late-election-relief.

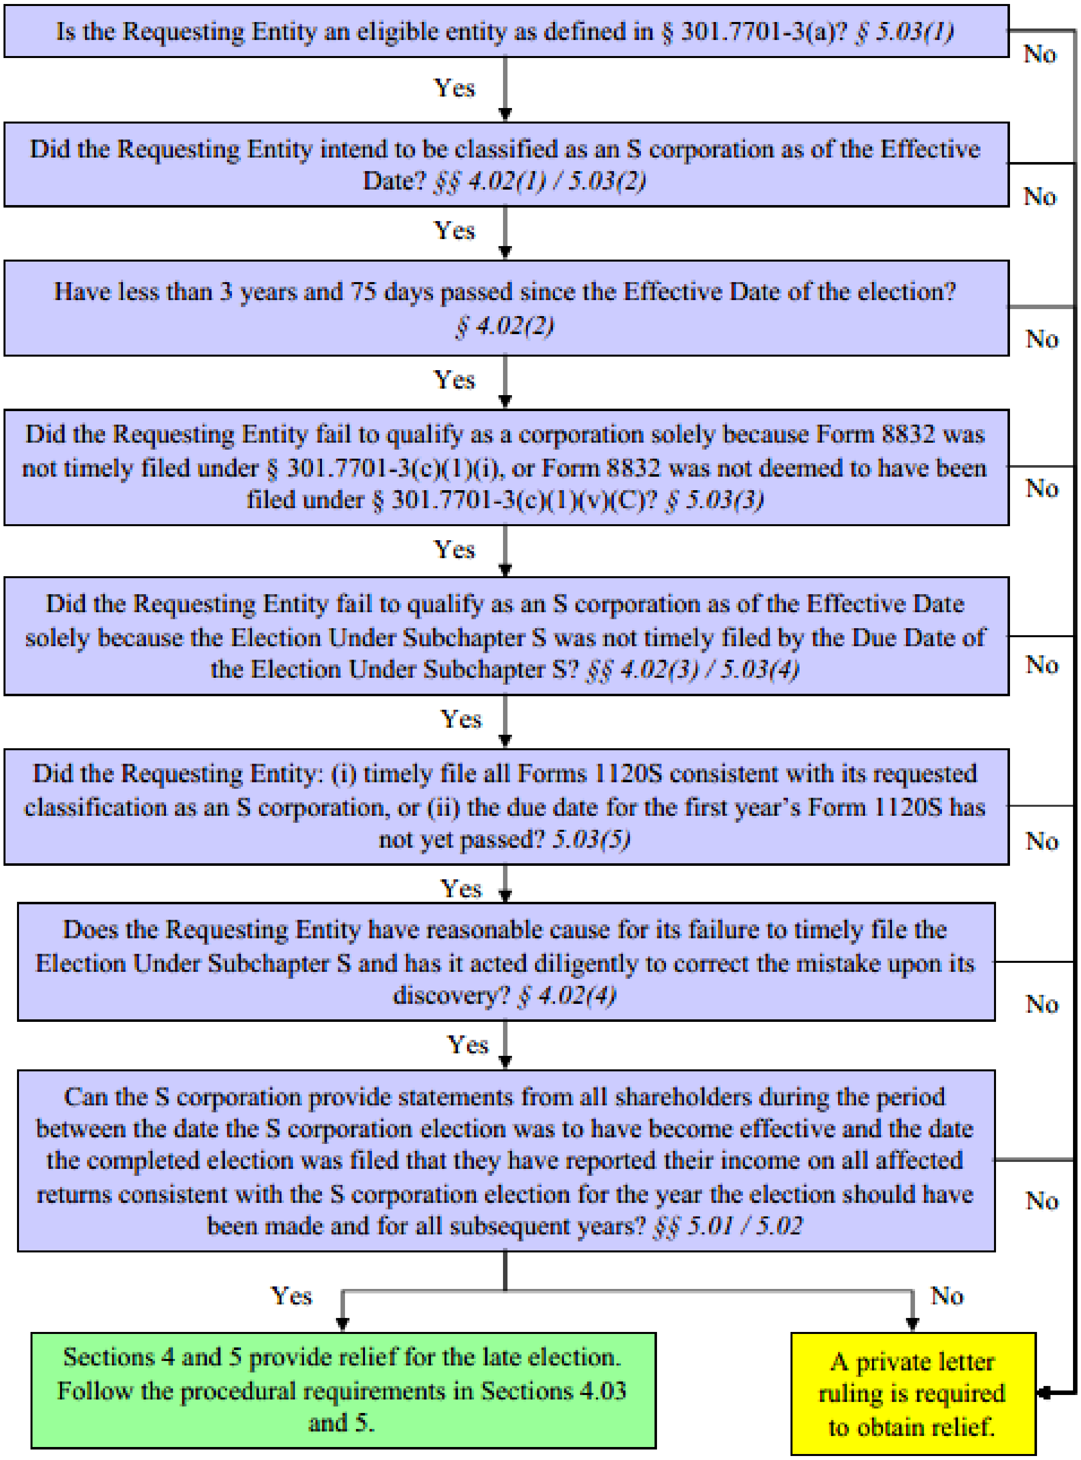
II.A.2.e.iii. Relief for Late S corporation Elections Within 3+ Years



II.A.2.e.iv. Relief for Late QSub Elections



II.A.2.e.v. Relief for Late S Corporation and Entity Classification Elections for the Same Entity



II.A.2.e.vi. Relief for Inadvertent Errors or Omissions on Form 2553 or Form 8869

This relates to parts II.A.2.e.ii Procedure for Making the S Election; Relief for Certain Defects in Making the Election (done on Form 2553) and II.A.2.g Qualified Subchapter S Subsidiary (QSub) (done on Form 8869).

Rev. Proc. 2022-19, § 2.03(3), "Certain inadvertent errors or omissions on Form 2553 or Form 8869," provides:

> An inadvertent error or omission on Form 2553 or Form 8869 does not invalidate an S election or a QSub election, unless the error or omission is with respect to a shareholder consent, a selection of a permitted year (as defined in § 1378(b) and § 1.1378-1(b)), or an officer's signature. See generally § 1362(a)(2) (an S election is valid " only if all persons who are shareholders in such corporation on the day on which such election is made consent to such election"), § 1.1378-1 (requiring that the taxable year of an S corporation must be a permitted year, which is defined to include a calendar year or any other taxable year for which the corporation establishes a business purpose to the satisfaction of the Commissioner), and § 1.1361-3(a)(2) (a QSub election form must be signed by a person authorized to sign the S corporation return). See section 3.03 of this revenue procedure (providing procedures for a taxpayer to correct, without the receipt of a PLR, an error, an omission, or a missing required consent on a Form 2553 or Form 8869).

Rev. Proc. 2022-19, § 3.03(1), "Correction of a missing shareholder consent," provides:

> An S election that fails to include the consent of a shareholder may be corrected pursuant to the following:
>
> a Section 1.1362-6(b)(3)(iii) (providing an extension of time for filing a shareholder consent to an S election);
>
> b Rev. Proc. 2013-30 (providing a simplified method for taxpayers to request relief for late S elections);
>
> c Rev. Proc. 2004-35, 2004-1 C.B. 1029 (providing automatic relief for certain taxpayers requesting relief for late shareholder consents for S elections in community property States); or
>
> d If the remedies listed in section 3.03(1)(a) through (c) of this revenue procedure do not apply, a taxpayer or the taxpayer's authorized representative may request relief by submitting a request for a PLR under § 1362(f) to the Associate Chief Counsel (Passthroughs and Special Industries).

Rev. Proc. 2022-19, § 3.03(2), "Correction of an error with regard to a permitted year," provides:

> A Form 2553 that contains an inadvertent error with regard to a permitted year may be corrected pursuant to Rev. Proc. 2013-30 (providing a simplified method for taxpayers to request relief for late S elections). If a taxpayer is not eligible for relief under Rev. Proc. 2013-30, a correction may be obtained through the receipt of a PLR under § 1362(f) from the Associate Chief Counsel (Passthroughs and Special Industries).

Rev. Proc. 2022-19, § 3.03(3), "Correction of missing officer's signature," provides:

> A Form 2553 or Form 8869 that is missing the signature of an authorized officer of the S corporation that affects the validity of the S election or QSub election may be corrected pursuant to Rev. Proc. 2013-30 (providing a simplified method for taxpayers to request relief for late S elections and QSub elections). If a taxpayer is not eligible for relief under Rev. Proc. 2013-30, a correction may be obtained through the receipt of a PLR under § 1362(f) from the Associate Chief Counsel (Passthroughs and Special Industries).

Rev. Proc. 2022-19, § 3.03(4), "Correction of other inadvertent errors or omissions," provides:

> Errors and omissions on Form 2553 or Form 8869, other than those addressed in section 3.03(1) through (3) of this revenue procedure, may be corrected by explaining in writing the error(s) or omission(s) and the necessary correction(s) and submitting the written explanation to one of the following addresses (depending on the Internal Revenue Submission Processing Center with which the S corporation files its Form 1120-S) or any successor address the IRS may provide:
>
> a Internal Revenue Service, MS 6055, 333 W. Pershing Rd., Kansas City, MO 64108.
>
> b Internal Revenue Service, MS 6273, 1973 N. Rulon White Blvd., Ogden, UT 84404.

Rev. Proc. 2022-19, § 3.03(5), "Unavailability of a PLR for certain inadvertent errors, omissions, or missing required consents," provides:

> The IRS will not issue a PLR under § 1362(f) regarding any error or omission described in section 3.03(4) of this revenue procedure. Such inadvertent errors or omissions do not impact a corporation's S election or QSub election. See section 2.03(3) of this revenue procedure. The IRS will also not issue a PLR under § 1362(f) for a missing required consent, errors with regard to a permitted year, or a missing officer's signature where the taxpayer qualifies for relief under any of the means of relief identified in section 3.03(1) through (3) of this revenue procedure. The Associate Chief Counsel (Passthroughs and Special Industries) will consider the issuance of a PLR only if the error or omission concerns a shareholder consent, the selection of a permitted year, or a missing officer's signature, and the taxpayer has no other means of requesting relief. See section 4.02(2) of this revenue procedure.

II.A.2.e.vii. Missing Administrative Acceptance Letter for S Election or QSub Election

Rev. Proc. 2022-19, § 2.03(4), "Missing administrative acceptance letter for S election or QSub election," provides:

> Generally, within 90 days after the IRS receives a corporation's Form 2553, the IRS mails a CP261 Notice as an acknowledgment to the corporation that the IRS has accepted the corporation's filing. For QSub elections filed on Form 8869, the IRS mails a CP279 Notice to the filer and a CP279A Notice to the subsidiary, generally within 60 days after the IRS accepts the QSub election. A lack of written acknowledgement that the IRS has accepted the corporation's S election or its subsidiary's QSub election (for example, because it was lost or never received) creates uncertainty for some taxpayers about the validity of the election. However, neither subchapter S of the Code nor the

Income Tax Regulations thereunder provide that a lack of possession of a CP261 Notice, CP279 Notice, or CP279A Notice affects the validity of an S election or a QSub election, respectively. Rather, such notices are merely administrative acknowledgments of an effective election that can be reproduced upon the taxpayer's request. See section 3.04 of this revenue procedure (providing procedures to replace a missing CP261 Notice, CP279 Notice, or CP279A Notice).

Rev. Proc. 2022-19, § 3.03(4), "Missing administrative acceptance letter for S election or QSub election," provides:

(1) *Availability of replacement letters*. With regard to a missing administrative acceptance letter for an S election or an administrative acceptance letter for a QSub election, as appropriate, a replacement letter may be requested:

a For an S corporation and shareholders of an S corporation, by contacting the IRS Business and Specialty Tax Line at 800-829-4933; and

b For practitioners, by contacting the IRS Practitioner Priority Service at 866 860 4259.

(2) *Unavailability of a PLR*. The IRS will not issue a PLR under § 1362(f) with regard to any missing administrative acceptance letter described in section 3.04(1) of this revenue procedure. See section 4.01(2) of this revenue procedure. A missing administrative acceptance letter does not impact an S election or a QSub election. See section 2.03(4) of this revenue procedure.

II.A.2.e.viii. Tax Return Filing Inconsistent with an S Election or a QSub Election

Rev. Proc. 2022-19, § 2.03(5), "A Federal income tax return filing inconsistent with an S election or a QSub election," provides:

Occasionally, a corporation files a Federal income tax return that is inconsistent with the corporation's status as an S corporation or a QSub (for example, an S corporation files a Form 1065, *U.S. Return of Partnership Income*, or Form 1120, *U.S. Corporation Income Tax Return*, instead of Form 1120-S, *U.S. Income Tax Return for an S Corporation*). Although an inconsistent Federal income tax return filing can create several complications for the filer, nothing in the Code or Income Tax Regulations thereunder provides that such a filing affects the validity of a corporation's S election or QSub election. For example, neither § 1362(d) nor § 1.1361-5(a) lists an inconsistent Federal income tax return filing as an event that gives rise to a termination of an S election or a QSub election. See section 3.05 of this revenue procedure (providing procedures for taxpayers to address, without the receipt of a PLR, a Federal income tax return filing inconsistent with an S election or a QSub election, as appropriate).

For what is a Qsub election, see part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

Rev. Proc. 2022-19, § 3.05, "Procedures for Addressing a Federal Income Tax Return Filing Inconsistent with an S Election or a QSub Election," provides:

(1) *Filing a corrected original return or an amended return*. An S corporation, or a parent S corporation of a QSub, that files a Federal income tax return for a taxable year that

is inconsistent with the status of the corporation as an S corporation, or inconsistent with the status of a subsidiary of the parent S corporation as a QSub, must file a Federal income tax return for open taxable years consistent with its status, as appropriate -

a to reflect the status of the corporation as an S corporation or parent of a QSub; or

b to reflect the status of the subsidiary as a QSub.

(2) *Unavailability of a PLR*. The IRS will not issue a PLR under § 1362(f) with regard to any inconsistent return filing described in section 3.05(1) of this revenue procedure. See section 4.01(2) of this revenue procedure. Such an inconsistent return filing does not impact an S election or a QSub election. See section 2.03(5) of this revenue procedure.

(3) *Federal income tax effect of a corporation's prior transactions*. Because a corporation is not treated as having terminated its S election or QSub election, as appropriate, merely due to the filing of one or more Federal income tax returns inconsistent with its S election or QSub election, the corporation's distributions and other transactions will be treated consistent with its status as an S corporation or a QSub, as appropriate. Thus, a QSub's income or deductions will be treated as income or deductions of the parent S corporation and distributions between the QSub and its parent will be disregarded.

II.A.2.f. Shareholders Eligible to Hold S Corporation Stock

To be eligible for an S election, a corporation must be a domestic corporation that is not an ineligible corporation and does not have:[134]

- more than 100 shareholders,[135]

[134] Code § 1361(b)(1).

[135] Of course, it must have at least one shareholder – meaning someone who owns the entity. *Deckard v. Commissioner*, 155 T.C. No. 8 (2020), held:

> As a Kentucky nonstock, nonprofit corporation subject to the provisions of the Act, Waterfront had no stock and could issue no stock. Consequently, petitioner does not fall within the four corners of the regulation which "[o]rdinarily" treats as an S corporation shareholder "the person who would have to include in gross income dividends distributed with respect to the stock of the corporation (if the corporation were a C corporation)". Sec. 1.1361-1(e)(1), Income Tax Regs. (emphasis added).
>
> Furthermore, petitioner did not otherwise possess an ownership interest in Waterfront equivalent to that of a shareholder. Because he was president and a director of Waterfront, the Act, along with Waterfront's articles of incorporation, expressly prohibited any part of Waterfront's income or profit from being distributed to him or inuring to his benefit. See Ky. Rev. Stat. Ann. sec. 273.237. 10 In the light of this nondistribution constraint, treating petitioner as a shareholder of Waterfront would be fundamentally incompatible with the purpose and operation of subchapter S, which generally taxes an S corporation's income currently at the shareholder level.
>
> Furthermore, petitioner lacked dissolution rights in Waterfront typical of a shareholder. None of Waterfront's assets could be distributed to him upon Waterfront's dissolution. See Ky. Rev. Stat. Ann. sec. 273.303. 11 Consistent with the constraints of the Act, Waterfront's articles of incorporation provide that, upon its dissolution, its assets shall be distributed for exempt purposes

- a shareholder who is a person (other than an estate, an eligible trust,[136] or a qualified retirement plan[137] or charity[138]) who is not an individual,[139]

- a nonresident alien as a shareholder, and

- more than 1 class of stock.

However, a domestic trust that is an electing small business trust (ESBT)[140] may have a nonresident alien (NRA) as a permissible current distributee.[141] Thus, one may give or

---

> within the meaning of section 501(c)(3) or shall be distributed to an entity established for public purposes.
>
> Petitioner asserts that in August 2012 he "assumed complete control over the planning of the fashion week event" and began "treating … [it] as a for-profit business". Even assuming that this is true, any such actions would not give rise to ownership rights in Waterfront greater than those afforded by the Act and Waterfront's articles of incorporation. Control over Waterfront was vested in its three directors, as fiduciaries entrusted with the duties and powers imposed upon them by the Act and the articles of incorporation. See Ky. Rev. Stat. Ann. sec. 273.215(1); *Ballard v. 1400 Willow Council of Co-Owners, Inc.*, 430 S.W.3d 229, 241 (Ky. 2013).
>
> In the light of these various considerations, we conclude that petitioner, as an officer and director of Waterfront, subject to the constraints of the Act and Waterfront's articles of incorporation, lacked ownership rights in Waterfront equivalent to those of a shareholder for purposes of applying subchapter S.

[136] Code § 1361(c)(2) describes eligible trusts, which are described in more detail in part III.A.3 Trusts Holding Stock in S Corporations.

[137] Described in Code § 401(a) and exempt from taxation under Code § 501(a). An IRA is not an eligible shareholder; see Code § 1361(e)(1)(A)(i) and Letter Rulings 202010001 (granting inadvertent termination relief when an LLC taxed as an S corporation issued a membership interest to an IRA) and 202105005 (granting inadvertent termination relief when a corporation did not realize it had allowed an individual to transfer his stock to his IRA).

[138] Described in Code § 501(c)(3) and exempt from taxation under Code § 501(a).

[139] Reg. § 1.1361-1(f), "Shareholder must be an individual or estate," provides:

> Except as otherwise provided in paragraph (e)(1) of this section (relating to nominees), paragraph (h) of this section (relating to certain trusts), and, for taxable years beginning after December 31, 1997, section 1361(c)(6) (relating to certain exempt organizations), a corporation in which any shareholder is a corporation, partnership, or trust does not qualify as a small business corporation.

Although a corporation cannot hold stock in an S corporation, a parent S corporation may elect to treat its wholly owned subsidiary as a "qualified subchapter S subsidiary," which is treated as a disregarded entity. See part II.A.2.g Qualified Subchapter S Subsidiary.

[140] See part III.A.3.e.ii Electing Small Business Trusts (ESBTs.

[141] Code § 1361(c)(2)(B)(v) provides:

> In the case of a trust described in clause (v) of subparagraph (A), each potential current beneficiary of such trust shall be treated as a shareholder; except that, if for any period there is no potential current beneficiary of such trust, such trust shall be treated as the shareholder during such period. This clause shall not apply for purposes of subsection (b)(1)(C).

The first sentence states that each person who may receive a distribution for the current taxable year is counted as a shareholder, so that an ESBT cannot have any such beneficiaries whose stock ownership would make the S corporation ineligible. However, 2017 tax reform added the last sentence, stating the usual disqualification of an NRA does not apply if the NRA is merely a beneficiary of an ESBT.

Reg. § 1.1361-1(m)(1)(ii)(D), "Nonresident aliens," provides:

> A nonresident alien (NRA), as defined in section 7701(b)(1)(B), is an eligible beneficiary of an ESBT and an eligible potential current beneficiary.

Reg. § 1.1361-1(m)(2)(ii)(E)(2) provides:

bequeath stock to an NRA by making sure the gift or bequest is to a trust that has an ESBT election in place. If and to the extent that the NRA is the deemed owner of the ESBT, for "all ESBTs after December 31, 2017"[142] the items of income, deduction, and credit from that grantor portion must be reallocated from the grantor portion to the S portion of the ESBT,[143] thereby being subjected to U.S. income tax.

As mentioned above, a person who does not hold formal legal title but has a community property interest in stock is counted as a shareholder whose consent is required.[144] Accordingly, consider making sure that the spouse of each shareholder, who lives or has lived

---

> All potential current beneficiaries of the trust meet the shareholder requirements of section 1361(b)(1); for the purpose of this paragraph (m)(2)(ii)(E)(2), an NRA potential current beneficiary does not violate the requirement under section 1361(b)(1)(C) that an S corporation cannot have an NRA as a shareholder.

See fn 6017 in part III.A.3.e.ii.(a) Qualification as an ESBT where the last two sentences of Reg. § 1.1361-1(m)(4)(i) provide that NRAs count toward the 100-shareholder limit but do not count for purposes of the prohibition against NRA shareholders.

[142] Reg. § 1.641(c)-1(k).

[143] Reg. § 1.641(c)-1(b) provides:

(1) *Grantor portion* -
  - (i) *In general*. Subject to paragraph (b)(1)(ii) of this section, the grantor portion of an ESBT is the portion of the trust that is treated as owned by the grantor or another person under subpart E of the Code.
  - (ii) *Nonresident alien deemed owner*. If, pursuant to section 672(f)(2)(A)(ii), the deemed owner of a grantor portion of the ESBT is a nonresident alien, as defined in section 7701(b)(1)(B) (NRA), the items of income, deduction, and credit from that grantor portion must be reallocated from the grantor portion to the S portion, as defined in paragraph (b)(2) of this section, of the ESBT.

(2) *S portion*
  - (i) *In general*. Subject to paragraph (b)(2)(ii) of this section, the S portion of an ESBT is the portion of the trust that consists of S corporation stock and that is not treated as owned by the grantor or another person under subpart E of the Code.
  - (ii) *NRA deemed owner of grantor portion*. The S portion of an ESBT also includes the grantor portion of the items of income, deduction, and credit reallocated under paragraph (b)(1)(ii) of this section from the grantor portion of the ESBT to the S portion of the ESBT.

Reg. § 1.641(c)-1(*l*)(6) provides:

> *Example 6*: *NRA as potential current beneficiary*. Domestic Trust (DT) has a valid ESBT election in effect. DT owns S corporation stock. The S corporation owns U.S. and foreign assets. The foreign assets produce foreign source income. B, an NRA, is the grantor and the only trust beneficiary and potential current beneficiary of DT. B is not a resident of a country with which the United States has an income tax treaty. Under section 677(a), B is treated as the owner of DT because, under the trust documents, income and corpus may be distributed only to B during B's lifetime. Paragraph (b)(2)(ii) of this section requires that the S corporation income of the ESBT that otherwise would have been allocated to B under the grantor trust rules must be reallocated from B's grantor portion to the S portion of DT. In this example, the S portion of DT is treated as including the grantor portion of the ESBT, and thus all of DT's income from the S corporation is taxable to DT.

Presumably the Example refers to a domestic trust, because a foreign trust is never an eligible shareholder. See fn 5901 in part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation. I seriously doubt that a revocable trust created by an NRA can ever qualify as a domestic trust, but I have not researched the issue.

[144] See part II.A.2.e.ii Procedure for Making the S Election; Relief for Certain Defects in Making the Election, especially fns. 122-123.

in a community property state, is not and does not become a nonresident alien.[145] *Deckard v. Commissioner*, 155 T.C. No. 8 (2020), explained:

> The subchapter S regulations provide: "Ordinarily, the person who would have to include in gross income dividends distributed with respect to the stock of the corporation (if the corporation were a C corporation) is considered to be the shareholder of the corporation." Sec. 1.1361-1(e)(1), Income Tax Regs. Citing this regulation, one court has observed that "the question whether a person was a shareholder on the date of the election to be taxed under Subchapter S is equivalent to the question whether, had there been a valid election, he would have been required to report as personal income profits earned by the corporation on that date." *Cabintaxi Corp. v. Commissioner*, 63 F.3d 614, 616 (7th Cir. 1995), *aff'g in part*, *rev'g in part on other grounds* T.C. Memo. 1994-316. The resolution of this question depends on whether the person "would have been deemed a beneficial owner of shares in the corporation, entitled therefore to demand from the nominal owner the dividends or any other distributions of earnings on those shares." *Id*.
>
> The courts look to State law to determine whether a person is a beneficial owner of corporate shares:
>
>> [A]lthough the meaning of "shareholder" for purposes of Subchapter S election has been said to be a matter of federal law rather than of state law, this means only that it is federal law which determines which kind of shareholder - namely, beneficial rather than record - is required to elect in order for the corporation to achieve

---

[145] Reg. § 1.1361-1(g)(1)(i) provides:

> A corporation having a shareholder who is a nonresident alien as defined in section 7701(b)(1)(B) does not qualify as a small business corporation. If a U.S. shareholder's spouse is a nonresident alien who has a current ownership interest (as opposed, for example, to a survivorship interest) in the stock of the corporation by reason of any applicable law, such as a state community property law or a foreign country's law, the corporation does not qualify as a small business corporation from the time the nonresident alien spouse acquires the interest in the stock. If a corporation's S election is inadvertently terminated as a result of a nonresident alien spouse being considered a shareholder, the corporation may request relief under section 1362(f).

Reg. § 1.1361-1(g)(1)(ii) provides examples illustrating this rule:

> *Example (1)*. In 1990, W, a U.S. citizen, married H, a citizen of a foreign country. At all times H is a nonresident alien under section 7701(b)(1)(B). Under the foreign country's law, all property acquired by a husband and wife during the existence of the marriage is community property and owned jointly by the husband and wife. In 1996 while residing in the foreign country, W formed X, a U.S. corporation, and X simultaneously filed an election to be an S corporation. X issued all of its outstanding stock in W's name. Under the foreign country's law, X's stock became the community property of and jointly owned by H and W. Thus, X does not meet the definition of a small business corporation and therefore could not file a valid S election because H, a nonresident alien, has a current interest in the stock.
>
> *Example (2)*. Assume the same facts as Example 1, except that in 1991, W and H filed a section 6013(g) election allowing them to file a joint U.S. tax return and causing H to be treated as a U.S. resident for purposes of chapters 1, 5, and 24 of the Internal Revenue Code. The section 6013(g) election applies to the taxable year for which made and to all subsequent taxable years until terminated. Because H is treated as a U.S. resident under section 6013(g), X does meet the definition of a small business corporation. Thus, the election filed by X to be an S corporation is valid.

Letter Ruling 202149004 provided inadvertent termination relief in a situation similar to Example (1).

> Subchapter S status. Whether a particular investor was a shareholder of that kind—in this case was a beneficial shareholder of … [the corporation] on the date of the election—is an issue of state law. [Citation omitted.]

Id. at 617 (citing *United States v. Nat'l Bank of Commerce*, 472 U.S. 713, 722 (1985), *Aquilino v. United States*, 363 U.S. 509, 513 (1960), and *United States v. Denlinger*, 982 F.2d 233, 235 (7th Cir. 1992)); *accord Pahl v. Commissioner*, 150 F.3d 1124, 1129 (9th Cir. 1998), *aff'g* T.C. Memo. 1996-176; see *Swenson v. Commissioner*, 37 T.C. 124, 131 (1961) ("In determining when petitioner acquired the stock in question, we must look to the applicable State law."), *rev'd on other grounds*, 309 F.2d 672 (8th Cir. 1962).

Consistently with these precepts, in deciding whether a person is properly treated as an S corporation shareholder, courts have frequently considered whether the person is a beneficial owner of the corporation's stock. See, *e.g.*, *Pahl v. Commissioner*, 150 F.3d 1124; *Cabintaxi Corp. v. Commissioner*, 63 F.3d 614; *Wilson v. Commissioner*, 560 F.2d 687 (5th Cir. 1977), *aff'g* T.C. Memo. 1975-92; *Hook v. Commissioner*, 58 T.C. 267 (1972); *Beirne v. Commissioner*, 52 T.C. 210 (1969); *Hoffman v. Commissioner*, 47 T.C. 218 (1966), *aff'd per curiam*, 391 F.2d 930 (5th Cir. 1968); *Hightower v. Commissioner*, T.C. Memo. 2005-274, *aff'd*, 266 F. App'x 646 (9th Cir. 2008).

If an individual holds S corporation stock through a disregarded entity, the individual and not the disregarded entity is treated as the shareholder, whether the disregarded entity is a single member LLC,[146] is a partnership of disregarded entities all taxed to the same person (and therefore the partnership itself is disregarded),[147] or is an unincorporated entity owned by a married couple as community property that the couple elects to treat as disregarded.[148] Note, of course, that such a disregarded entity[149] or nominee[150] could easily be transformed into a

---

[146] Letter Rulings 9739014 and 200008015, which are implicitly reinforced by fn. 150.

[147] Letter Rulings 200008015 and 200513001 (the latter expressly mentioning that Rev. Rul. 2004-77 disregards a partnership of disregarded entities all taxed to the same person), which are implicitly reinforced by the part of Reg. § 1.1361-1(e)(1) that is reproduced in fn. 150. Also see fn. 330 in part II.B Limited Liability Company (LLC), discussing generally when an LLC with more than one member constitutes a disregarded entity.

[148] Letter Ruling 201610007. For disregarding such an entity, see Rev. Proc. 2002-69, which is described in fn. 348, found in part II.B Limited Liability Company (LLC). Rev. Proc. 2002-69 allows a married couple to disregard the entity by reporting its activity directly on their tax returns. In Letter Ruling 201610007, the couple filed partnership tax returns, which the Letter Ruling ruled was an inadvertent termination. The IRS approved the S election so long as the couple elected to disregard the entity as provided in Rev. Proc. 2002-69 for all open taxable years.

[149] Regarding a partnership of disregarded entities, Letter Ruling 201730002 granted inadvertent termination relief for the following:

> On Date 2, A, the sole shareholder of X, transferred A's entire interest in X to Y, a limited liability company wholly owned by A and treated as a disregarded entity for federal tax purposes. On Date 3, A transferred a n% interest in Y to Trust, a grantor trust that was treated (under subpart E of part I of subchapter J of chapter 1) as entirely owned by A. Trust was an eligible shareholder under § 1361(c)(2)(A)(i). On Date 4, A died, causing Trust to cease being a grantor trust. On Date 4, X's S corporation election terminated as Y, the sole owner of X, became a partnership for federal tax purposes, an ineligible shareholder. On Date 5, Y redeemed the shares of Estate (which were received by Estate at A's death), causing Y to be treated as a disregarded entity owned by Trust for federal tax purposes.

[150] Reg. § 1.1361-1(e)(1), added by T.D. 8600 (7/20/1995), includes:

partnership, thereby becoming an ineligible shareholder; however, inadvertent termination relief may be available.[151] Bequeathing a partnership interest to the only other partner through one's will generally is not enough to prevent the partnership from being a separate entity, because the process of estate administration causes the estate itself to have a legal life.[152] Query whether a nonprobate transfer through a transfer on death statute[153] might be considered instantaneous, because any claims are asserted after the transfer to the beneficiary, not before. Having the partnership term end upon the death of the grantor of multiple grantor trusts that are the sole partners might prevent the stock from being considered owned by a partnership,[154] but I would

---

> The person for whom stock of a corporation is held by a nominee, guardian, custodian, or an agent is considered to be the shareholder of the corporation for purposes of this paragraph (e) and paragraphs (f) and (g) of this section. For example, a partnership may be a nominee of S corporation stock for a person who qualifies as a shareholder of an S corporation. However, if the partnership is the beneficial owner of the stock, then the partnership is the shareholder, and the corporation does not qualify as a small business corporation.

In light of the regulation expressly authorizing nominees, the Letter Rulings in fns. 146 and 147 ignoring disregarded entities seem doubly well-grounded (grounded in the check-the-box regulations and this regulation).

Note also that a partnership that has long ago wound up its operations might be an eligible shareholder. See fn. 154.

[151] Letter Ruling 200841007 granted relief as follows:

> A, an individual, owned X stock indirectly through Y, A's wholly-owned limited liability company, which was a disregarded entity for federal tax purposes. On D2 of Year 1, A transferred interests in Y to each of Trust 1, Trust 2, Trust 3, Trust 4, and Trust 5 (collectively, the Trusts), which are represented as having been wholly-owned grantor trusts under § 671 with respect to A. A died on D3 of Year 1 and Y became a partnership for federal tax purposes. A partnership is not an eligible S corporation shareholder and therefore, X's S corporation election terminated on D3 of Year 1. On D4 of Year 1, Y liquidated and distributed its X stock among the Trusts.
>
> … we conclude that X's S corporation election terminated on D3 of Year 1 and that the termination was inadvertent within the meaning of § 1362(f). We further hold that, pursuant to the provisions of § 1362(f), X will be treated as continuing to be an S corporation from D3 to D4 of Year 1 and thereafter….

Letter Rulings 201801007, 201709015, 200237011 200237014, and 202003001 also granted inadvertent termination relief for a partnership owning S corporation stock. In granting relief, Letter Ruling 201709015 treated the partners as the shareholders, allowing QSST and ESBT elections retroactive to when the partnership first obtained the stock; Letter Ruling 202003001 took a somewhat similar position involving a complex set of facts.

Letter Rulings 8948015 (partnership and individuals transfer to empty shell), 8934020 (transfer to empty shell), 8926016 (transfer to empty shell), 9010042 (transfer to empty shell), and 9421022 (transfer to empty shell) ignored transitory ownership by a partnership of an S corporation as part of a series of immediately effective transactions. See also parts II.A.2.j.ii Disregarding Transitory Owners and II.P.3.c.i Formless Conversion, text accompanying fn. 3992 (formless conversion of a partnership to an S corporation the same as a Code § 351 followed by a liquidation of the partnership, and the transitory ownership of the S corporation by the partnership is disregarded).

[152] Rev. Rul. 62-116.

[153] See, *e.g.*, RSMo Chapter 461.

[154] *Guzowski v. Commissioner*, T.C. Memo. 1967-145, approved ownership of S corporation stock by a partnership that had terminated, but its termination had occurred long before the S election was made:

> In the final analysis, our decision turns on whether paper transfer of the shares from the Partnership to the individual Guzowskis was required. The Partnership discontinued manufacturing operations by February 28, 1953 and all other operations by June 30, 1953. Sometime after that date all of the assets were disposed of. The term of the Partnership expired on January 2, 1957, and there is not one scintilla of evidence that there was any intent or action on the part of the partners to extend the term. Long prior to September 2, 1958—the critical date

not recommend that in planning mode. Rather than hold S corporation stock in a partnership that is a disregarded entity and risk the need for an inadvertent termination ruling, consider whether the S corporation's business can be moved to a partnership;[155] such an arrangement can be done seamlessly via merger or conversion statutes through a reorganization under Code § 368(a)(1)(F),[156] and the IRS generally accepts using a partnership to avoid concerns over ineligible shareholders.[157]

If an S corporation that is a partner in a partnership gives its stock to an employee of the partnership as compensation, which presumably would be treated as contributing the stock to the partnership and the partnership then transferring the stock as compensation to the employee,[158] the partnership will not be treated as a momentary owner of the S corporation stock.[159]

In counting the number of shareholders, Reg. § 1.1361-1(e)(1) provides the following regarding trusts and estates:

> Except as otherwise provided in paragraphs (h) and (j) of this section, and for purposes of this paragraph (e) and paragraphs (f) and (g) of this section, if stock is held by a decedent's estate or a trust described in section 1361(c)(2)(A)(ii) or (iii), the estate or

---

> for our purposes—the Partnership was in limbo. The only possible remaining vestige of partnership identity stems from the fact that a certificate for 100,000 shares of stock of the Corporation was registered in the name of the Partnership. Even assuming that this certificate had not been cancelled and new certificates had not been issued in the names of the individual partners—as to which there was considerable confusing and conflicting testimony—we are satisfied that the ownership of the stock had passed to the partners individually. Stock certificates and stock record books are only one indication of who the real shareholders are. *Bijou Park Properties*, 47 T.C. 207 (1966). Sections 761 and 7701 define "partnership" as an unincorporated organization "through or by means of which any business, financial operation, or venture is carried on." *Cf.* sec. 1.708-1, Income Tax Regs. The touchstone of a partnership is activity. *Cf. Seattle Renton Lumber Co. v. United States*, 135 F.2d 989 (C.A. 9, 1943); *Albert Bettens*, 19 B.T.A. 1166 (1930); *Royal Wet Wash Laundry, Inc.*, 14 B.T.A. 470 (1928). Mere common ownership of property is not to be equated with the existence of a partnership. *Cf. George Rothenberg*, 48 T.C. — (June 21, 1967); see 6 Mertens, *Law of Federal Income Taxation* (Zimet Revision), sec. 35.02.
>
> We have previously held that the absence of formal steps to change the identity of a stockholder is not critical in determining the applicability of Subchapter S. *Old Virginia Brick Co.*, 44 T.C. 724 (1965), *affd.* 367 F.2d 276 (C.A. 4, 1966). We hold that, under the circumstances of this case, the stock of the corporation was owned by the four Guzowskis in their individual capacities at all times from and after September 2, 1958 and that the Subchapter S election was valid.

This case preceded Reg. § 1.1361-1(e)(1), which allows a partnership to hold S corporation stock as a nominee; see fn. 150.

[155] As described in parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart, a partnership (whether LLC or limited partnership) generally has tax characteristics better than that of an S corporation.

[156] See part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure, especially part II.E.7.c.i.(b) Use F Reorganization to Form LLC. See also part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

[157] See part II.A.2.j.i Using a Partnership to Avoid S Corporation Limitations on Identity or Number of Owners or to Permit Non-Pro Rata Equity Interests.

[158] Presumably such a transfer would be analogous to a shareholder's transfer of stock to an employee of the corporation described in part II.M.4.c.i When a Gift to a Service Provider Is Compensation and Not a Gift, fn. 3671.

[159] Letter Ruling 200009029.

> trust (and not the beneficiaries of the estate or trust) is considered to be the shareholder; however, if stock is held by a subpart E trust (which includes a voting trust) or an electing QSST described in section 1361(d)(1), the deemed owner of the trust is considered to be the shareholder. If stock is held by an ESBT described in section 1361(c)(2)(A)(v), each potential current beneficiary of the trust shall be treated as a shareholder, except that the trust shall be treated as the shareholder during any period in which there is no potential current beneficiary of the trust. If stock is held by a trust described in section 1361(c)(2)(A)(vi), the individual for whose benefit the trust was created shall be treated as the shareholder. See paragraph (h) of this section for special rules relating to trusts.

Reg. § 1.1361-1(e)(2), "Special rules relating to stock owned by husband and wife," provides:

> For purposes of paragraph (e)(1) of this section, stock owned by a husband and wife (or by either or both of their estates) is treated as if owned by one shareholder, regardless of the form in which they own the stock. For example, if husband and wife are owners of a subpart E trust, they will be treated as one individual. Both husband and wife must be U.S. citizens or residents, and a decedent spouse's estate must not be a foreign estate as defined in section 7701(a)(31). The treatment described in this paragraph (e)(2) will cease upon dissolution of the marriage for any reason other than death.

Special family attribution rules ameliorate the 100-shareholder limitation.[160]

---

[160] Code § 1361(c)(1). See 2004 Blue Book (General Explanation of Tax Legislation Enacted in the 108th Congress), p. 189, footnote 321. Reg. § 1.1361-1(e)(3)(i) interprets the family attribution rule:

> *In general*. For purposes of paragraph (e)(1) of this section, stock owned by members of a family is treated as owned by one shareholder. Members of a family include a common ancestor, any lineal descendant of the common ancestor (without any generational limit), and any spouse (or former spouse) of the common ancestor or of any lineal descendants of the common ancestor. An individual shall not be considered to be a common ancestor if, on the applicable date, the individual is more than six generations removed from the youngest generation of shareholders who would be members of the family determined by deeming that individual as the common ancestor. For purposes of this six-generation test, a spouse (or former spouse) is treated as being of the same generation as the individual to whom the spouse is or was married. This test is applied on the latest of the date the election under section 1362(a) is made for the corporation, the earliest date that a member of the family (determined by deeming that individual as the common ancestor) holds stock in the corporation, or October 22, 2004. For this purpose, the date the election under section 1362(a) is made for the corporation is the effective date of the election, not the date it is signed or received by any person. The test is only applied as of the applicable date, and lineal descendants (and spouses) more than six generations removed from the common ancestor will be treated as members of the family even if they acquire stock in the corporation after that date. The members of a family are treated as one shareholder under this paragraph (e)(3) solely for purposes of section 1361(b)(1)(A), and not for any other purpose, whether under section 1361 or any other provision. Specifically, each member of the family who owns or is deemed to own stock must meet the requirements of sections 1361(b)(1)(B) and (C) (regarding permissible shareholders) and section 1362(a)(2) (regarding shareholder consents to an S corporation election). Although a person may be a member of more than one family under this paragraph (e)(3), each family (not all of whose members are also members of the other family) will be treated as one shareholder. For purposes of this paragraph (e)(3), any legally adopted child of an individual, any child who is lawfully placed with an individual for legal adoption by that individual, and any eligible foster child of an individual (within the meaning of section 152(f)(1)(C)), shall be treated as a child of such individual by blood.

In counting the number of shareholders, the following are treated as 1 shareholder:[161]

- a husband and wife (and their estates), and
- all members of a family (and their estates).

The term "members of a family" means a common ancestor, any lineal descendant of such common ancestor, and any spouse or former spouse of such common ancestor or any such lineal descendant.[162]

An individual is considered to be a common ancestor only if, on the applicable date, the individual is not more than six generations removed from the youngest generation of shareholders who otherwise would be members of the family.[163] "Applicable date" means the latest of the date the S election is made, the earliest date that a member of the family holds stock in the S corporation, or October 22, 2004.[164] The test is only applied as of the applicable date, and lineal descendants (and spouses) more than six generations removed from the common ancestor will be treated as members of the family even if they acquire stock in the corporation after that date.[165]

The members of a family are treated as one shareholder solely for purposes of counting shareholders.[166] Each member of the family who owns or is deemed to own stock must be an eligible shareholder.[167] Although a person may be a member of more than one family under these rules, each family (not all of whose members are also members of the other family) will be treated as one shareholder.[168]

In counting shareholders, the estate or grantor trust of a deceased member of the family will be considered to be a member of the family during the period in which the estate or trust (such trust during the two years the trust is eligible) holds stock in the S corporation, and the members of the family also include:[169]

- In the case of an ESBT, each potential current beneficiary who is a member of the family;
- In the case of a QSST, the income beneficiary who makes the QSST election, if that income beneficiary is a member of the family;
- In the case of a qualified voting trust, each beneficiary who is a member of the family;

[161] Code § 1361(c)(1)(A).
[162] Code § 1361(c)(1)(B)(i). Any legally adopted child of an individual, any child who is lawfully placed with an individual for legal adoption by the individual, and any eligible foster child of an individual (under Code § 152(f)(1)(C)), shall be treated as a child of such individual by blood. Code § 1361(c)(1)(C).
[163] Code § 1361(c)(1)(B)(ii). For purposes of the preceding sentence, a spouse (or former spouse) shall be treated as being of the same generation as the individual to whom such spouse is (or was) married.
[164] Code § 1361(c)(1)(B)(iii).
[165] Reg. § 1.1361-1(e)(3)(i).
[166] Reg. § 1.1361-1(e)(3)(i).
[167] Reg. § 1.1361-1(e)(3)(i).
[168] Reg. § 1.1361-1(e)(3)(i).
[169] Reg. § 1.1361-1(e)(3)(ii).

- The deemed owner of a grantor trust if that deemed owner is a member of the family; and

- The owner of an entity disregarded as an entity separate from its owner under the check-the-box rules, if that owner is a member of the family.

II.A.2.g. Qualified Subchapter S Subsidiary (QSub)

An S corporation can own a wholly[170] owned subsidiary, which the Code calls a "qualified subchapter S subsidiary"[171] and the regulations and this author refer to as a QSub.[172] A Qsub may own another QSub, in which case the ultimate parent makes the Qsub election at every level.[173]

A QSub is any domestic corporation that is not an ineligible corporation,[174] is wholly owned by an S corporation, and that the parent elects to treat as a QSub.[175] The parent files Form 8869 no more than 12 months before or 2 months and 15 days after the election's effective date.[176] For relief for a late election, see parts II.A.2.e.ii Procedure for Making the S Election; Relief for Certain Defects in Making the Election (especially part II.A.2.e.iv Relief for Late QSub Elections) and II.A.2.e.vi Relief for Inadvertent Errors or Omissions on Form 2553 or Form 8869. If a QSub was timely but was ineffective due to the subsidiary's failure to meet all the requirements of Code § 1361(b)(3)(B) at the time the election was made, relief for inadvertent ineffectiveness may be available,[177] but first see part II.A.2.e.vi Relief for Inadvertent Errors or Omissions on Form 2553 or Form 8869.

---

170 If an S corporation owns less than all of another corporation, that other corporation is not eligible to be an S corporation; however, inadvertent termination relief may be available. Letter Ruling 202017020.

171 Code § 1361(b)(3), especially Code § 1361(b)(3)(B).

172 Reg. § 1.1361-2(a).

173 Reg. § 1.1361-2(d), Example (1).

174 Referring to Code § 1362(b)(2), which provides that the following are ineligible to make an S election:

(A) a financial institution which uses the reserve method of accounting for bad debts described in section 585,
(B) an insurance company subject to tax under subchapter L,
(C) a corporation to which an election under section 936 applies, or
(D) a DISC or former DISC.

175 Code § 1361(b)(3)(B); Reg. § 1.1361-2(a). Letter Ruling 201821011 granted relief when a Qsub did not meet the requirements when the Qsub election was made:

> On Date 4, incident to what A represents was part of a reorganization under § 368(a)(1)(F), Shareholder 1 and Shareholder 2 contributed all of their stock in B to A, resulting in A wholly owning B. On Date 6, B merged into C. In a letter dated Date 7, A sent the Internal Revenue Service a Form 8869, Qualified Subchapter S Subsidiary Election, effective on Date 4. A later discovered that its election to treat B as a Qualified Subchapter S Subsidiary (QSub) was ineffective due to B's failure to meet all the requirements of § 1361(b)(3)(B) and § 1.1361-3(a)(1) of the Income Tax Regulations at the time the election was made.
>
> A represents that its ineffective QSub election for B was inadvertent. A further represents that no federal tax return of any person has been filed inconsistent with a valid QSub election having been made for B effective Date 4. B and A have agreed to make any adjustments required by the Service consistent with the treatment of B as a QSub.

176 Reg. § 1.1361-3(a)(4). If the parent is a newly formed holding company and the subsidiary is electing to be a QSub, see fn 4078 in part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

177 Letter Ruling 202015003.

A QSub is not treated as a separate corporation, and all of the QSub's assets, liabilities, and items of income, deduction, and credit are treated as assets, liabilities, and such items (as the case may be) of its parent;[178] this treatment applies for all purposes of the Code, except as provided in regulations.[179] Reg. § 1.1361-4(a)(1) states that this rule applies "for Federal tax purposes," except for certain provisions it references:[180]

- If the parent or a QSub is a bank, then the special bank rules govern items of income, deduction, and credit at the bank entity level; however, after applying those rules, all of the QSub's assets, liabilities, and items of income, deduction, and credit, as determined in accordance with the special bank rules, are treated as the parent's.[181]

- A QSub is treated as a separate corporation for purposes of its Federal tax liabilities with respect to any taxable period for which the QSub was treated as a separate corporation, Federal tax liabilities of any other entity for which the QSub is liable, and refunds or credits of Federal tax.[182]

- A QSub is treated as a separate corporation for purposes of Federal employment taxes and withholding.[183]

---

[178] CCA 201552026 asserts that a parent may not take a Code § 165(g)(3) worthless stock deduction with respect to its QSub's stock.
[179] Code § 1361(b)(3)(A).
[180] Rev. Rul. 2008-18 explains:

> For tax years beginning after December 31, 2004, Congress amended § 1361(b)(3)(E) to provide that, except to the extent provided by the Secretary, QSubs are not disregarded for purposes of information returns under part III of subchapter A of chapter 61. Further, QSubs are not disregarded for certain other purposes as provided in regulations. For example, § 1.1361-4(a)(7) provides that a QSub is treated as a separate corporation for purposes of employment tax and related reporting requirements (effective for wages paid on or after January 1, 2009), and § 1.1361-4(a)(8) provides that a QSub is treated as a separate corporation for purposes of certain excise taxes (effective for liabilities imposed and actions first required or permitted in periods beginning on or after January 1, 2008).

[181] Reg. § 1.1361-4(a)(3), especially Reg. § 1.1361-4(a)(3)(ii), Example (2).
[182] Reg. § 1.1361-4(a)(6).
[183] Reg. § 1.1361-4(a)(7) provides:

> (i) *In general*. A QSub is treated as a separate corporation for purposes of Subtitle C - Employment Taxes and Collection of Income Tax (Chapters 21, 22, 23, 23A, 24, and 25 of the Internal Revenue Code).
>
> (ii) *Effective/applicability date*. This paragraph (a)(7) applies with respect to wages paid on or after January 1, 2009.

- A QSub is treated as a separate corporation for purposes of certain excise taxes,[184] none of which seem to have anything to do with estate, gift, or generation-skipping transfer taxes.[185]

- QSubs separately file certain information returns,[186] none of which seem to have anything to do with estate, gift, or generation-skipping transfer taxes.[187]

Consistent with the above and elaborating on the results of some transactions listed later in this part II.A.2.g, Reg. § 301.6109-1(i), "Special rule for qualified subchapter S subsidiaries (QSubs)," describes a current or former QSub's tax ID:

(1) *General rule*. Any entity that has an employer identification number (EIN) will retain that EIN if a QSub election is made for the entity under § 1.1361-3 or if a QSub election that was in effect for the entity terminates under § 1.1361-5.

---

[184] Reg. § 1.1361-4(a)(8) provides:

(i) *In general*. A QSub is treated as a separate corporation for purposes of—

(A) Federal tax liabilities imposed by Chapters 31, 32 (other than section 4181), 33, 34, 35, 36 (other than section 4461), 38, and 49 of the Internal Revenue Code, or any floor stocks tax imposed on articles subject to any of these taxes;

(B) Collection of tax imposed by Chapters 33 and 49 of the Internal Revenue Code;

(C) Registration under sections 4101, 4222, and 4412;

(D) Claims of a credit (other than a credit under section 34), refund, or payment related to a tax described in paragraph (a)(8)(i)(A) of this section or under section 6426 or 6427; and

(E) Assessment and collection of an assessable payment imposed by section 4980H and reporting required by section 6056.

(ii) *Effective/applicability date*.

(A) Except as provided in this paragraph (a)(8)(ii), paragraph (a)(8) of this section applies to liabilities imposed and actions first required or permitted in periods beginning on or after January 1, 2008.

(B) References to Chapter 49 in paragraph (a)(8) of this section apply to taxes imposed on amounts paid on or after July 1, 2012.

(C) Paragraph (a)(8)(i)(E) of this section applies for periods after December 31, 2014.

Reg. § 1.1361-4T(a)(8)(iii)(A) treated a QSub as a separate corporation for purposes of Chapter 49, the latter of which imposed a tax on indoor tanning services. Reg. § 1.1361-4T(a)(8)(iii)(C) provided that Reg. § 1.1361-4T(a)(8)(iii)(A) expired June 22, 2015.

[185] Estate, gift, or generation-skipping transfer taxes are imposed by Chapters 11, 12, and 13, respectively. Special valuation rules are in Chapter 14. Code §§ 6161, 6163, 6165 and 6166, relating to estate tax extensions, are in Chapter 62. Liens, including Code §§ 6324, 6324A, and 6324B (relating to estate and gift taxes, Code § 6166 deferral, and special use valuation) are in Chapter 64.

[186] Reg. § 1.1361-4(a)(9) provides:

(i) *In general*. Except to the extent provided by the Secretary or Commissioner in guidance (including forms or instructions), paragraph (a)(1) of this section shall not apply to part III of subchapter A of chapter 61, relating to information returns.

(ii) *Effective/applicability date*. This paragraph (a)(9) is effective on August 14, 2008.

[187] Part III of subchapter A of chapter 61 consists of Code §§ 6031-6060. Although Code §§ 6034, 6034A, and 6035 deal with information returns filed by trusts and estates, they are meaningless in a QSub context because a trust or estate would own the parent, not the QSub (given that a QSub must be wholly owned by a parent corporation). Estate and gift tax returns are required by Code §§ 6018 and 6019, respectively, which are in Part II, not Part III, of subchapter A of chapter 61. Generation-skipping transfer tax returns are required by Code § 2662, which is in Chapter 13.

(2) *EIN while QSub election in effect*. Except as otherwise provided in regulations or other published guidance,[188] a QSub must use the parent S corporation's EIN for Federal tax purposes.

(3) *EIN when QSub election terminates*. If an entity's QSub election terminates, it may not use the EIN of the parent S corporation after the termination. If the entity had an EIN prior to becoming a QSub or obtained an EIN while it was a QSub in accordance with regulations or other published guidance, the entity must use that EIN. If the entity had no EIN, it must obtain an EIN upon termination of the QSub election.

(4) *Effective date*. The rules of this paragraph (i) apply on January 20, 2000.

If a corporation becomes a QSub as the result of an S corporation in which its new parent obtains the subsidiary's former tax attributes, it needs to keep its EIN for two purposes:[189]

- A QSub is treated as a separate corporation for certain federal tax purposes, such as employment and various excise taxes.[190]

- As described in Reg. § 301.6109-1(i)(3) above, it must use its old tax ID when its QSub status terminates.[191]

---

[188] [my footnote – not in the regulation itself:] See fn 180 and accompanying text.

[189] See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization, especially fn .

[190] See fn 180 and accompanying text. Rev. Rul. 2008-18, Situation 2, involves the following facts:

> C, an individual owns all of the stock of Z, an S corporation. Z's EIN is 33-3333333. In Year 1, Z forms Newco, which in turn forms Mergeco. Pursuant to a plan of reorganization, Mergeco merges with and into Z, with Z surviving and C receiving solely Newco stock in exchange for Z stock. Newco meets the requirements for qualification as a small business corporation and timely elects to treat Z as a QSUB, effective immediately following the transaction. The transaction meets the requirements of a reorganization under § 368(a)(1)(F).

Rev. Rul. 2008-18, Situation 2, concludes:

> In Situation 2, consistent with Rev. Rul. 64-250, Z's original S election does not terminate but continues for Newco. Newco must obtain a new EIN. Z must retain its EIN (EIN 33-3333333) even though a QSub election is made for Z and must use its original EIN any time the QSub is otherwise treated as a separate entity for federal tax purposes (including for employment and certain excise taxes) or if the QSub election terminates.

[191] Rev. Rul. 2008-18, Situation 1, involves the following facts:

> B, an individual, owns all of the stock in Y, an S corporation. Y's EIN is 22-2222222. In Year 1, B forms Newco and contributes all of the Y stock to Newco. Newco meets the requirements for qualification as a small business corporation and timely elects to treat Y as a qualified subchapter S subsidiary (QSub), effective immediately following the transaction. The transaction meets the requirements of a reorganization under § 368(a)(1)(F). In Year 2, Newco sells a 1% interest in Y to D.

Rev. Rul. 2008-18, Situation 1, concludes:

> In Situation 1, consistent with Rev. Rul. 64-250, Y's original S election does not terminate but continues for Newco. Newco must obtain a new EIN. Y must retain its EIN (EIN 22-2222222) even though a QSub election is made for it and must use its original EIN any time the QSub is otherwise treated as a separate entity for federal tax purposes (including for employment and certain excise taxes) or if the QSub election terminates. In Year 2, when Newco sells a 1% interest of Y to D, Y's QSub election terminates pursuant to § 1361(b)(3)(C). Y must use its original EIN of 22-2222222 following the termination of Y's QSub election.

- None of this changes the QSub's need to use its parent's tax ID for regular federal income tax purposes, as described in Reg. § 301.6109-1(i)(3) above.

QSubs have some nice uses. First, suppose one would like to drop all of an S corporation's assets into a partnership, per part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons. The shareholders can contribute their stock to a new corporation and make a QSub election for the old S corporation, both as part of a tax-free reorganization,[192] then merge the QSub into a new disregarded LLC as a disregarded transaction, even if the new LLC converts to a partnership immediately thereafter;[193] this transaction is diagrammed and explained in part II.E.7.c.i.(b) Use F Reorganization to Form LLC. A QSub might also allow a tiered structure to qualify for Code § 6166 estate tax deferral[194] when it might not have qualified or on more favorable terms than might otherwise have applied.[195] It might also be used to preserve the AAA of a corporation whose S election is revoked.[196] In the latter case, following the recommended reorganization the QSub election could be immediately terminated;[197] terminating it the same day as the day the QSub election is

---

[192] See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization, especially fn. 4078, which includes the procedure when one combines such a reorganization with a QSub election. Consider whether the election to treat the old S corporation as a QSub should be made before merging into the LLC, out of concern that the surviving LLC is not taxed as a corporation and therefore can no longer make a QSub election on behalf of the old S corporation. See Letter Rulings 201501007 and 201724013.

[193] Reg. § 1.1361-5(b)(3), Example (2) clarifies that the merger into a wholly owned LLC has no federal income tax consequences, even if immediately thereafter the LLC is converted into a partnership, with the partnership tax rules governing the formation of such a partnership:

(i) X, an S corporation, owns 100 percent of the stock of Y, a corporation for which a QSub election is in effect. As part of a plan to sell a portion of Y, X causes Y to merge into T, a limited liability company wholly owned by X that is disregarded as an entity separate from its owner for Federal tax purposes. X then sells 21 percent of T to Z, an unrelated corporation, for cash. Following the sale, no entity classification election is made under § 301.7701-3(c) of this chapter to treat the limited liability company as an association for Federal tax purposes.

(ii) The merger of Y into T causes a termination of Y's QSub election. The new corporation Newco) that is formed as a result of the termination is immediately merged into T, an entity that is disregarded for Federal tax purposes. Because, at the end of the series of transactions, the assets continue to be held by X for Federal tax purposes, under step transaction principles, the formation of Newco and the transfer of assets pursuant to the merger of Newco into T are disregarded. The sale of 21 percent of T is treated as a sale of a 21 percent undivided interest in each of T's assets. Immediately thereafter, X and Z are treated as contributing their respective interests in those assets to a partnership in exchange for ownership interests in the partnership.

(iii) Under section 1001, X recognizes gain or loss from the deemed sale of the 21 percent interest in each asset of the limited liability company to Z. Under section 721(a), no gain or loss is recognized by X and Z as a result of the deemed contribution of their respective interests in the assets to the partnership in exchange for ownership interests in the partnership.

[194] See part III.B.5.e.ii Code § 6166 Deferral, especially part III.B.5.e.ii.(b) Tiered Structures.

[195] See part II.A.2.d.i Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders, especially the text accompanying fns. 96-99.

[196] See part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation, especially fns. 3977-3979.

[197] Reg. § 1.1361-3(b), "Revocation of QSub election," provides in paragraphs (1) and (2):

(1) *Manner of revoking QSub election*. An S corporation may revoke a QSub election under section 1361 by filing a statement with the service center where the S corporation's most recent tax return was properly filed. The revocation statement must include the names, addresses,

made prevents the 5-year waiting period for re-electing QSub status[198] from applying.[199] The revocation of the QSub election is treated as forming a new C corporation.[200]

---

and taxpayer identification numbers of both the parent S corporation and the QSub, if any. The statement must be signed by a person authorized to sign the S corporation's return required to be filed under section 6037.

(2) *Effective date of revocation*. The revocation of a QSub election is effective on the date specified on the revocation statement or on the date the revocation statement is filed if no date is specified. The effective date specified on the revocation statement cannot be more than two months and 15 days prior to the date on which the revocation statement is filed and cannot be more than 12 months after the date on which the revocation statement is filed. If a revocation statement specifies an effective date more than two months and 15 days prior to the date on which the statement is filed, it will be effective two months and 15 days prior to the date it is filed. If a revocation statement specifies an effective date more than 12 months after the date on which the statement is filed, it will be effective 12 months after the date it is filed.

[198] Reg. § 1.1361-5(c)(1). Code § 1361(b)(3)(D) provides:

> *Election after termination*. If a corporation's status as a qualified subchapter S subsidiary terminates, such corporation (and any successor corporation) shall not be eligible to make-
>
> (i) an election under subparagraph (B)(ii) to be treated as a qualified subchapter S subsidiary, or
>
> (ii) an election under section 1362(a) to be treated as an S corporation,
>
> before its 5th taxable year which begins after the 1st taxable year for which such termination was effective, unless the Secretary consents to such election.

[199] Reg. § 1.1361-3(b)(4) provides:

> *Revocation before QSub election effective*. For purposes of Section 1361(b)(3)(D) and § 1.1361-5(c) (five-year prohibition on re-election), a revocation effective on the first day the QSub election was to be effective will not be treated as a termination of a QSub election.

Eustice, Kuntz & Bogdanski, *Federal Income Taxation of S Corporations* (WG&L), ¶ 3.08[3][g][ii] Revocation, includes this example:

> X, an S corporation, files a proper qualified subchapter S subsidiary election for its wholly owned subsidiary, S, on January 1, 2016, effective on that date. On March 10 of the same year, while S is still an eligible qualified subchapter S subsidiary, X changes its mind and files a revocation of the election, effective January 1. Because the intended effective date is less than two months and fifteen days prior to the filing of the revocation statement, the revocation is effective, as stated, on January 1. Because this was also the first day on which the election was to be effective, S is not barred from being a qualified subchapter S subsidiary, or an S corporation, in the years 2016 to 2020.

RIA Checkpoint ¶ 254:182 Termination by Revocation includes an example making the same point. See Reg. § 1.1361-3(b)(2) in fn 197, supporting retroactive revocation in this manner.

[200] Reg. § 1.1361-5(b)(1)(i) provides:

> *In general*. If a QSub election terminates under paragraph (a) of this section, the former QSub is treated as a new corporation acquiring all of its assets (and assuming all of its liabilities) immediately before the termination from the S corporation parent in exchange for stock of the new corporation. The tax treatment of this transaction or of a larger transaction that includes this transaction will be determined under the Internal Revenue Code and general principles of tax law, including the step transaction doctrine. For purposes of determining the application of section 351 with respect to this transaction, instruments, obligations, or other arrangements that are not treated as stock of the QSub under § 1.1361-2(b) are disregarded in determining control for purposes of section 368(c) even if they are equity under general principles of tax law.

Reg. § 1.1361-5(b)(3), Example (5) provides:

> X, an S corporation, owns 100 percent of the stock of Y, a corporation for which a QSub election is in effect. X subsequently revokes the QSub election. Y is treated as a new corporation acquiring all of its assets (and assuming all of its liabilities) immediately before the revocation from its S corporation parent in a deemed exchange for Y stock. On a subsequent date, X sells 21 percent

If the parent later owns less than all of the stock of the subsidiary, the subsidiary becomes a C corporation.[201] Consider merging a QSub into a wholly owned LLC that is a disregarded entity, so that its pass-flow status is not lost if ownership of part of the entity is transferred or if potential changes in capital structure cause equity to be deemed to be issued (it was suggested to me that an underpriced warrant issued in a financing might cause problems), but beware state income taxation if a state in which the company is subject to income tax does not treat a QSub as a disregarded entity[202] and that a disregarded entity subsidiary might not have as strong an argument that Code § 6166 estate tax deferral applies.[203]

On the reverse side, if an S corporation makes a valid QSub election with respect to a subsidiary, the subsidiary is deemed to have liquidated into the S corporation in a generally tax-free transaction.[204]

A Qsub might be spun off. Bloomberg BNA's Tax Management Weekly Report (11/11/2019) described Letter Ruling 201945016:

> The IRS issued 13 rulings on an S corporation's ("Distributing") proposed reorganization entailing a transfer of assets to a controlled qualified subchapter S subsidiary with Controlled then assuming certain liabilities (the "Contribution"), and distribution of all of the Controlled stock proportionately to each of a group of "Split-Off Shareholders" in exchange for all of their Distributing stock, pursuant to equalization of the value of Controlled and Distributing (the "Distribution"). Ruling (1) Upon the Distribution, Controlled will no longer be a QSub. Ruling (2) The Contribution followed by the Distribution will qualify as a reorganization under tax code Section 368(a)(1)(D), with Distributing and Controlled each "a party to a reorganization" within the meaning of Section 368(b). Rulings (3), (4), (7), (8) No gain or loss will be recognized by relevant

---

of the stock of Y to Z, an unrelated corporation, for cash. Assume that under general principles of tax law including the step transaction doctrine, the sale is not taken into account in determining whether X is in control of Y immediately after the deemed exchange of assets for stock. The deemed exchange by X of assets for Y stock and the deemed assumption by Y of its liabilities qualify under section 351 because, for purposes of that section, X is in control of Y within the meaning of section 368(c) immediately after the transfer.

[201] Reg. § 1.1361-5(a)(1)(iii) and Code § 1361(b)(3)(b)(i). Reg. § 1.1361-5(b)(3), Example (1) provides: X, an S corporation, owns 100 percent of the stock of Y, a corporation for which a QSub election is in effect. X sells 21 percent of the Y stock to Z, an unrelated corporation, for cash, thereby terminating the QSub election. Y is treated as a new corporation acquiring all of its assets (and assuming all of its liabilities) in exchange for Y stock immediately before the termination from the S corporation. The deemed exchange by X of assets for Y stock does not qualify under section 351 because X is not in control of Y within the meaning of section 368(c) immediately after the transfer as a result of the sale of stock to Z. Therefore, X must recognize gain, if any, on the assets transferred to Y in exchange for its stock. X's losses, if any, on the assets transferred are subject to the limitations of section 267.

[202] On the other hand, converting sooner rather than later might save higher state income tax on some later event, if the state does not recognize QSubs.

[203] See part II.A.2.d.i Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders, especially the text accompanying fns. 96-98.

[204] Reg. § 1.1361-4(a)(2)(i), which further provides that, subject to certain transition rules that apply to pre-2001 QSub elections, "the tax treatment of the liquidation or of a larger transaction that includes the liquidation will be determined under the Internal Revenue Code and general principles of tax law, including the step transaction doctrine." Reg. § 1.1361-4(a)(2)(ii) illustrates this liquidation concept, including the Example (1) a liquidation that under Code §§ 332 and 337 is tax-free to the parent and subsidiary, respectively. For the latter, see part II.Q.7.a.vii Corporate Liquidation.

entities in the Contribution or the Distribution. Rulings (5), (9) The basis of assets transferred in the Contribution and in the Distribution won't change upon the moment of transfer. Rulings (6), (10) The holding period for the recipient for a given asset will include that of the previous owner in the Contribution and in the Distribution. Rulings (11),(12) Any earnings and profits will be allocated between Distributing and Controlled in accordance with Section 312(h) and regulations, and Distributing's accumulated adjustments account will be allocated between Distributing and Controlled in a similar manner. Ruling (13) Distributing's momentary ownership of Controlled stock won't cause Controlled to have an ineligible shareholder for any portion of its first taxable year under Section 1361(b)(1)(B); therefore Controlled will be permitted to elect to be an S corporation for its first taxable year provided it otherwise qualifies and makes such election effective immediately upon its QSub termination.

II.A.2.h. Important Protections for S Corporation Shareholder Agreements

Always provide that stock cannot be transferred to any person if such a transfer would make the corporation fail to be a "small business corporation" under Code § 1361(b)(1).[205] Because the tax laws change, the restriction should be as simple and broad as the preceding sentence. Define "transfer" to be any event that causes federal tax law to treat ownership as having changed, which might include a trust no longer being a wholly-owned grantor trust[206] even though shares have not changed hands.

Notwithstanding these protections, problems might occur – especially if the company does not have a qualified tax advisor approve every transfer other than to an individual who is a US citizen. The consequences of losing an S election are harsh,[207] including loss of AAA[208] and possible built-in gain tax.[209]

Fortunately, Code § 1362(f), "Inadvertent invalid elections or terminations," provides that a corporation "shall be treated as an S corporation or a qualified subchapter S subsidiary, as the case may be, during the period specified by the Secretary" if:

(1) an election under subsection (a) or section 1361(b)(3)(B)(ii) by any corporation -

> (A) was not effective for the taxable year for which made (determined without regard to subsection (b)(2)) by reason of a failure to meet the requirements of section 1361(b) or to obtain shareholder consents, or
>
> (B) was terminated under paragraph (2) or (3) of subsection (d) or section 1361(b)(3)(C),

(2) the Secretary determines that the circumstances resulting in such ineffectiveness or termination were inadvertent,

---

205 See part II.A.2.f Shareholders Eligible to Hold S Corporation Stock.
206 See part III.A.3.a Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures.
207 See parts II.E.2.b Converting from S Corporation to C Corporation and II.P.3.d Conversion from S Corporation to C Corporation.
208 See parts II.Q.7.b Redemptions or Distributions Involving S Corporations and II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation.
209 See part II.P.3.b.ii Built-in Gain Tax on Former C Corporations under Code § 1374.

(3) no later than a reasonable period of time after discovery of the circumstances resulting in such ineffectiveness or termination, steps were taken -

(A) so that the corporation for which the election was made or the termination occurred is a small business corporation or a qualified subchapter S subsidiary, as the case may be, or

(B) to acquire the required shareholder consents, and

(4) the corporation for which the election was made or the termination occurred, and each person who was a shareholder in such corporation at any time during the period specified pursuant to this subsection , agrees to make such adjustments (consistent with the treatment of such corporation as an S corporation or a qualified subchapter S subsidiary, as the case may be) as may be required by the Secretary with respect to such period.

Reg. § 1.1362-4(b), "Inadvertent termination or inadvertently invalid election," provides:

> For purposes of paragraph (a) of this section, the determination of whether a termination or invalid election was inadvertent is made by the Commissioner. The corporation has the burden of establishing that under the relevant facts and circumstances the Commissioner should determine that the termination or invalid election was inadvertent. The fact that the terminating event or invalidity of the election was not reasonably within the control of the corporation and, in the case of a termination, was not part of a plan to terminate the election, or the fact that the terminating event or circumstance took place without the knowledge of the corporation, notwithstanding its due diligence to safeguard itself against such an event or circumstance, tends to establish that the termination or invalidity of the election was inadvertent.

The legislative history to Code § 1362(f) explains:[210]

> If the Internal Revenue Service determines that a corporation's subchapter S election is inadvertently terminated, the Service can waive the effect of the terminating event for any period if the corporation timely corrects the event and if the corporation and the shareholders agree to be treated as if the election had been in effect for such period.
>
> The committee intends that the Internal Revenue Service be reasonable in granting waivers, so that corporations whose subchapter S eligibility requirements have been inadvertently violated do not suffer the tax consequences of a termination if no tax avoidance would result from the continued subchapter S treatment. In granting a waiver, it is hoped that taxpayers and the government will work out agreements that protect the revenues without undue hardship to taxpayers. For example, if a corporation, in good faith, determined that it had no earnings and profits, but it is later determined on audit that its election terminated by reason of violating the passive income test for three consecutive years because the corporation in fact did have accumulated earnings, if the shareholders were to agree to treat the earnings as distributed and include the dividends in income, it may be appropriate to waive the terminating events, so that the election is treated as never terminated. Likewise, it may be appropriate to waive the terminating

[210] Senate Explanation of the Subchapter S Revision Act, P.L. 97-354 (10/19/82), "(e) Inadvertent terminations (secs. 1362(f))."

> event when the one class of stock requirement was inadvertently breached, but no tax avoidance had resulted. It is expected that the waiver may be made retroactive for all years, or retroactive for the period in which the corporation again became eligible for subchapter S treatment, depending on the facts.

Accordingly, the IRS provides retroactive relief, so long as taxpayers cannot get some benefit they would have not received had they not followed the rules. Therefore, the IRS may require adjustments to avoid unfair benefits.[211] By allowing retroactive reinstatement, the IRS is allowing the corporation to avoid corporate level tax; it would not be difficult to imagine a shareholder disagreeing with the relief and refusing to pay tax on K-1 income, whipsawing the IRS for having allowed the corporation to avoid tax. To avoid this whipsaw, everyone who might be affected by the relief must consent. Reg. § 1.1362-4(e), "Corporation and shareholder consents," provides:

> The corporation and all persons who were shareholders of the corporation at any time during the period specified by the Commissioner must consent to any adjustments that the Commissioner may require. Each consent should be in the form of a statement agreeing to make the adjustments. The statement must be signed by the shareholder (in the case of shareholder consent) or a person authorized to sign the return required by section 6037 (in the case of corporate consent). See § 1.1362-6(b)(2) for persons required to sign consents. A shareholder's consent statement should include the name, address, and taxpayer identification numbers of the corporation and shareholder, the number of shares of stock owned by the shareholder, and the dates on which the shareholder owned any stock. The corporate consent statement should include the name, address, and taxpayer identification numbers of the corporation and each shareholder.

If caught and corrected soon enough (generally 3 years and 75 days after the transfer), one can obtain automatic relief;[212] otherwise, correction might require an expensive and potentially time-consuming private letter ruling.[213] As described above, either relief has the stated requirement that all shareholders consent to relief for inadvertent termination. Obtaining such consent might be difficult, for example, if the owner is no longer a shareholder or is incapacitated, deceased, or

---

[211] Reg. § 1.1362-4(d), "Adjustments," provides:

> The Commissioner may require any adjustments that are appropriate. In general, the adjustments required should be consistent with the treatment of the corporation as an S corporation or QSub during the period specified by the Commissioner. In the case of stock held by an ineligible shareholder that causes an inadvertent termination or invalid election for an S corporation under section 1362(f), the Commissioner may require the ineligible shareholder to be treated as a shareholder of the S corporation during the period the ineligible shareholder actually held stock in the corporation. Moreover, the Commissioner may require protective adjustments that prevent the loss of any revenue due to the holding of stock by an ineligible shareholder (for example, a nonresident alien).

[212] Rev. Proc. 2013-30, which is described in other parts of this document. The relevant IRS web page is https://www.irs.gov/businesses/small-businesses-self-employed/late-election-relief.

[213] See parts II.A.2.e.ii Procedure for Making the S Election; Relief for Certain Defects in Making the Election (and its companion parts II.A.2.e.iii Relief for Late S corporation Elections Within 3+ Years, II.A.2.e.iv Relief for Late QSub Elections, and II.A.2.e.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity) and III.A.3.c.iii.(a) General Description of Deadlines for QSST and ESBT Elections (and its companion, part III.A.3.c.iii.(b) Flowchart Showing Relief for Late QSST & ESBT Elections).

simply uncooperative. A shareholder agreement should grant the company an irrevocable[214] durable power of attorney to sign such consents.

The shareholder agreement should also prohibit any shareholder from intentionally revoking the S election unless a particular threshold vote is attained. Consider addressing not only express revocations but also allowing the corporation's S election to be terminated by excess passive income. See part II.A.2.k Terminating an S Election.

A shareholder agreement might also address allocations of income upon a change in ownership or termination of the S election. Generally, S corporation allocations of income are pro-rata, per-share, per-day, which can cause unexpected results if income (including from a sale of the business) is not earned evenly throughout the year. See part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

Consider using provisions found in the ACTEC Shareholders Agreement Form 2007,[215] which uses as a general reference the ACTEC Shareholders Agreement Outline 2011.[216]

II.A.2.i. Single Class of Stock Rule

S corporations cannot have more than one class of stock.[217] Please read this part II.A.2.i.iv in the context of part II.A.2.i.xii Automatic Relief If Governing Provisions Violate Single Class of Stock Rule.

Use great caution to strip any partnership tax and accounting provisions from any operating agreement or partnership agreement forms if an unincorporated entity makes the election.[218] Letter Ruling 200548021 refers to the operating agreement as a governing provision for purposes of Reg. § 1.1361-1(*l*)(2)(i). Letter Rulings 201136004 and 201351017 allowed relief for inadvertent ineligibility to make an S election where perhaps the capital account partnership provisions had not been stripped out and were later caught; same with Letter Rulings 201528025, 202203004and 202235003, which definitely involved capital account partnership provisions that had not been stripped out and were later caught.[219] Letter Ruling 201822003 implicitly took the position that the presence of such provisions is disqualifying only when an LLC no longer has only one owner. Letter Ruling 201949009 involved not only partnership provisions but also issued profits interests that needed to be cured to cure the S election being ineffective due to those provisions. Same with Letter

---

214 Generally, a principal may revoke a durable power of attorney. However, a power coupled with an interest, such as in a shareholder agreement, may be irrevocable.

216 http://apps.americanbar.org/webupload/commupload/RP519000/relatedresources/ACTEC-ShareholdersAgreementOutline_12.27.11.pdf
217 Code § 1361(b)(1)(D).
218 For how to make the election and related strategy, see fns 359-363 and accompanying text in part II.B Limited Liability Company (LLC).
219 Letter Ruling 202110010 said that among offending provisions that was later removed to qualify for inadvertent termination relief was:

> … in the event X is liquidated within the meaning of § 1.704-1(b)(2)(ii)(g) of the Income Tax Regulations, distributions shall be made to the members who have positive capital accounts in compliance with § 1.704-1(b)(2)(ii)(b)(2).

Ruling 202124002, which included curative action regarding profits interests issued to employees:

> Company and its shareholders represent that Company and its shareholders will file amended returns for Years as needed to reflect units that vested in Years and as necessary to reflect additional income and taxes resulting from the vesting of those units. Company also represents that it will amend Agreement to provide for identical rights to distribution and liquidation proceeds in accordance with § 1.1361-1(*l*).

The IRS will not rule on whether a state law limited partnership violates the single class of stock rule. Rev. Proc. 2021-3, § 3.01(106), which rule originated in Rev. Proc. 99-51.

Preferred stock having been issued when an S election is made makes the election ineffective, but the IRS may grant relief retroactively if all defects are cured.[220] Similarly, preferred stock being issued after an S election is made can be cured.[221]

---

[220] Letter Rulings 201716009 and 201751007.

[221] Letter Ruling 201949003, with the following fixes having occurred in addition to the usual representations of inadvertence and promise to make any adjustments the IRS requires:

> X represents that on or about Date 5 it became aware that the issuance of the preferred stock may have inadvertently terminated its S corporation election. X represents that on Date 6 it took corrective action and (1) converted the preferred stock to common stock, (2) voted to cancel and retire all preferred stock, and (3) amended and restated its Articles of Incorporation to authorize only a single class of stock. X represents that as of Date 6 all issued and outstanding shares of preferred stock have been cancelled and retired. X also represents that its shareholders have taken into account their pro rate shares of X's separately and non-separately computed items pursuant to § 1366 and have made any adjustments to stock basis as required under § 1367. Furthermore, X represents that its shareholders have accounted for any distributions made under § 1368.

Issuing a profits interest[222] would violate the single class of stock rule, but it can qualify for inadvertent termination relief.[223] If a profits interest is desirable, the S corporation should form an LLC subsidiary[224] and have the LLC issue profits interests.

Letter Ruling 202149004 provided inadvertent termination relief for the following:

> On Date 3, X entered into an agreement with C, a shareholder in X, to purchase additional shares of stock in X. The agreement contained an anti-dilution provision with respect to C's shares in X such that C would maintain a fixed ownership percentage in X. X represents that the agreement is a governing provision within the meaning of § 1.1361-1(l)(2)(i) of the Income Tax Regulations and that the effect of the anti-dilution provision in the agreement caused X to have more than one class of stock. Consequently, had X's S corporation election been effective Date 1, it would have terminated on Date 3. Upon learning that it had more than one class of stock, X amended the agreement with C pursuant to which the anti-dilution provision was stricken, and B's ownership interest was adjusted to exclude the application of the anti-dilution provision.

II.A.2.i.i. Voting and Nonvoting Stock

The issues discussed in this part II.A.2.i.i apply to C corporations as well, except to the extent they specify S corporations.

II.A.2.i.i.(a). Nonvoting Stock Permitted for S Corporations

Differences in voting rights do not by themselves create a second class of stock.[225] Generally, if all outstanding shares of stock confer identical rights to distribution and liquidation proceeds, a corporation is treated as having only one class of stock.[226] Thus, the corporation may issue

---

222 For profits interests, see part II.M.4.f Issuing a Profits Interest to a Service Provider.

223 In Letter Ruling 201949009, an LLC made an S election. Later:

> On Date 3, X's Operating Agreement included provisions regarding partnerships. Section 4(j) of the Operating Agreement provides, in part, that it is intended that X will be treated as a partnership for federal income tax purposes and that each Member will be treated as a partner of a partnership for tax purposes. Section 4(a) provides, in part, that X shall have two (2) classes of Units: Class A Units and Profits Units. Sections, 4, 8, and 19 of the Operating Agreement state that a Profits Interest only shares in liquidation proceeds due to profits earned after the issuance of the Profit Unit. On Date 4 and Date 5, X issued Profits Interests.
>
> When X's shareholders discovered the effect of the partnership provisions and the issuance of the Profits Interests, X canceled the Profits Interests between Date 6 and Date 7. X amended its operating agreement on Date 8 to remove the partnership provisions and the Profits Interest provisions and to provide identical distribution and liquidation rights to X's shareholders.

The ruling held:

> Based solely on the facts submitted and representations made, we conclude that X's S corporation election terminated on Date 3 because X had more than one class of stock due to the provisions in the Operating Agreement. We also conclude that the termination of X's S corporation was inadvertent within the meaning of § 1362(f). Accordingly, under the provisions of § 1362(f), X will be treated as an S corporation from Date 3 until Date 9, provided that X's S corporation election was otherwise valid and not otherwise terminated under § 1362(d).

224 See part II.E.7.c.i Corporation Forms New LLC.

225 Code § 1361(c)(4).

226 Reg. § 1.1361-1(*l*)(1), which provides:

voting and nonvoting stock, each of which confers identical rights to distribution and liquidation proceeds. This capital structure also avoids gift and estate tax problems under the anti-freeze valuation rules of Chapter 14.[227]

A shareholder being wrongfully shut out from participating in management did not cause the shareholder to lose status as a shareholder when the shareholder continued to enjoy the financial benefits of being a shareholder.[228]

II.A.2.i.i.(b). Why Nonvoting Shares Are Needed for Estate Planning

The retention of the right to vote (directly or indirectly) shares of stock of a "controlled corporation" causes estate inclusion of the transferred stock.[229]

> *General rule*. A corporation that has more than one class of stock does not qualify as a small business corporation. Except as provided in paragraph (*l*)(4) of this section (relating to instruments, obligations, or arrangements treated as a second class of stock), a corporation is treated as having only one class of stock if all outstanding shares of stock of the corporation confer identical rights to distribution and liquidation proceeds. Differences in voting rights among shares of stock of a corporation are disregarded in determining whether a corporation has more than one class of stock. Thus, if all shares of stock of an S corporation have identical rights to distribution and liquidation proceeds, the corporation may have voting and nonvoting common stock, a class of stock that may vote only on certain issues, irrevocable proxy agreements, or groups of shares that differ with respect to rights to elect members of the board of directors.

[227] Code § 2701(a)(2)(C) provides that Code § 2701 does not apply to such a capital structure.

[228] *Enis v. Commissioner*, T.C. Memo. 2017-222, reasoning:

> In determining stock ownership for Federal income tax purposes, the Court must look to the beneficial ownership of shares, not mere legal title. See *Ragghianti v. Commissioner*, 71 T.C. 346, 349 (1978), *aff'd*, 652 F.2d 65 (9th Cir. 1981). Cases concluding that a shareholder did not have beneficial ownership have considered both agreements between shareholders that removed ownership and provisions in the corporation's governing articles affecting ownership rights. See *Dunne v. Commissioner*, 2008 WL 656496, at *9. Mere interference with a "shareholder's participation in the corporation as a result of a poor relationship between the shareholders … does not amount to a deprivation of the economic benefit of the shares." *Id*. (citing *Hightower v. Commissioner*, T.C. Memo. 2005-274, *aff'd* without published opinion, 266 F.App'x 646 (9th Cir. 2008)); *Kumar v. Commissioner*, T.C. Memo. 2013-184.
>
> Petitioners contend that while Mrs. Enis was issued NLS shares, the removal of her power to exercise shareholder rights, as well as the actions of Dr. Ginsburg, removed the beneficial ownership of her shares. Petitioners, therefore, assert that they are not required to include pro rata shares of NLS' income. Petitioners identified no agreement or provisions in the corporation's governing articles removing beneficial ownership. *Kumar* does not support their position that a violation of the shareholders agreement could deprive them of the beneficial ownership of their shares. In *Kumar* we found that in the absence of an agreement passing the taxpayer's rights to his stock to another shareholder, a poor relationship between shareholders does not deprive one shareholder of the economic benefit of his shares. *Kumar v. Commissioner*, at *3. We, therefore, held that the taxpayer retained beneficial ownership. *Id*.
>
> Further, petitioners cited no authority, nor are we aware of any, that allows shareholders to exclude their shares of an S corporation's income because of poor relationships with other shareholders. While the relationships among the shareholders of NLS deteriorated, those poor relationships did not deprive Mrs. Enis of the economic benefit of her NLS shares. Indeed, ultimately, she sold her shares in 2014 for $436,165.

[229] Code § 2036(b)(1). TAM 199938005 argued that decedent's authority as general partner attributed to him the right to vote voting stock help by a limited partnership. Given that an entity taxed as a partnership cannot hold S corporation stock, that TAM may seem irrelevant, but it does support the conclusion that

A corporation is a “controlled corporation” if, at any time after the transfer of the property and during the 3-year period ending on the date of the decedent’s death, the decedent owned (or was deemed to own under certain income tax family attribution rules), or had the right (either alone or in conjunction with any person) to vote, stock possessing at least 20% of the total combined voting power of all classes of stock.

If the trustee consults with the grantor regarding how to vote stock the trust owns, the IRS may take the position that the grantor has indirectly retained the right to vote in conjunction with the trustee and that therefore the stock is includible in the grantor’s estate for estate tax purposes.[230] If the grantor is the trustee over transferred nonvoting stock, the fact that nonvoting stock can vote in extraordinary matters, such as mergers or liquidations, will not cause Code § 2036 inclusion.[231]

However, if the grantor transfers nonvoting stock and retains the voting stock, the transferred nonvoting stock will not be includible in the grantor’s estate for estate tax purposes.[232] *U.S. v. Byrum*, 408 U.S. 125 (1972), reasoned:

---

the grantor should keep ownership simple, holding voting stock in her own revocable trust and transferring nonvoting stock.

[230] Rev. Rul. 80-346. TAM 9515003 argued that a taxpayer could not invoke Rev. Rul. 80-346 to argue for estate inclusion of voting stock:

> As the court noted in *In re Steen v. United States*, *supra*, allowing a taxpayer to disavow the form of the transaction (in this case, the explicit terms of the trust instrument) under these circumstances, would encourage inappropriate tax planning and unwarranted litigation and places the Service in an untenable administrative position. Accordingly, we doubt that a court would allow a taxpayer to disavow the trust instrument under the circumstances presented here.[2]
>
> [2] We note that the Tax Court has held that a taxpayer is precluded from even arguing against the form of the transaction in the absence of strong proof. Other courts have adopted an even more restrictive rule. *Estate of Robinson v. Commissioner*, 101 T.C. 499, 513-514 (1993).

The TAM concluded:

> However, we doubt that the decedent detrimentally “relied” on the revenue ruling and structured the transaction to ensure that the transferred stock would be includible in the gross estate on his death. On the contrary, the decedent was advised by counsel and, no doubt, created the trust in order to EXCLUDE the stock from his gross estate. If the intent was to ensure the stock was included in the gross estate, the trust instrument would have expressly provided for the decedent’s retention of voting rights. Further, if the decedent had in some way relied on Rev. Rul. 80-346 in creating the trust, then consistency would require that the transfer be reported on the gift tax return as a transfer with a retained interest. This was not done.
>
> Finally, even though A, as executrix, followed the revenue ruling in including the stock in the gross estate, nonetheless, we do not believe that, as discussed above, the estate can gain a tax advantage by now disavowing the form of the transaction.

For more about the TAM and arguing estate tax inclusion, see fn 5699 in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership’s Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

[231] Prop. Reg. § 20.2036-2(a) (concluding two sentences).

[232] See Code § 2036(b) (transfers of voting stock in a controlled corporation can be included in the transferor’s estate for estate tax purposes if the transferor retains strings such as voting rights), Rev. Rul. 80-346 (even informal strings on voting stock held in trust can bring it into the settlor’s estate), and both Rev. Rul. 81-15 (revoking a ruling that had held that the settlor’s retention of voting stock outside of a trust will not cause the Code § 2036(b) inclusion of nonvoting stock transferred in trust) and Prop. Reg. § 20.2036-2 (the settlor’s retention of voting stock outside of a trust will not cause the Code § 2036(b) inclusion of nonvoting stock transferred in trust); *Boykin v. Commissioner*, T.C.

It must be conceded that Byrum reserved no such "right" in the trust instrument or otherwise. The term "right," certainly when used in a tax statute, must be given its normal and customary meaning. It connotes an ascertainable and legally enforceable power, such as that involved in *O'Malley*.[9] Here, the right ascribed to Byrum was the power to use his majority position and influence over the corporate directors to "regulate the flow of dividends" to the trust. That "right" was neither ascertainable nor legally enforceable and hence was not a right in any normal sense of that term.[10]

[9] Although Mr. Justice White's dissent argues that the use of the word "power" in O'Malley implies that the Court's concern was with practical reality rather than legal form, an examination of that opinion does not indicate that the term was used other than in the sense of legally empowered. At any rate, the "power" was a right reserved to the settlor in the trust instrument itself.

[10] The "control" rationale, urged by the Government and adopted by the dissenting opinion, would create a standard—not specified in the statute—so vague and amorphous as to be impossible of ascertainment in many instances. See n. 13, infra. Neither the Government nor the dissent sheds light on the absence of an ascertainable standard. The Government speaks vaguely of drawing the line between "an unimportant minority interest" (whatever that may be) and "voting control." The dissenting opinion does not address this problem at all. See Comment, Sale of Control Stock and the Brokers, Transaction Exemption—Before and After the Wheat Report, 49 Tex. L. Rev. 475, 479-481 (1971).

Byrum did retain the legal right to vote shares held by the trust and to veto investments and reinvestments. But the corporate trustee alone, not Byrum, had the right to pay out or withhold income and thereby to designate who among the beneficiaries enjoyed such income. Whatever power Byrum may have possessed, with respect to the flow of income into the trust, was derived not from an enforceable legal right specified in the trust instrument, but from the fact that he could elect a majority of the directors of the three corporations. The power to elect the directors conferred no legal right to command them to pay or not to pay dividends. A majority shareholder has a fiduciary duty not to misuse his power by promoting his personal interests at the expense of corporate interests.[11] Moreover, the directors also have a fiduciary duty to promote the interests of the corporation.[12] However great Byrum's influence may have been with the corporate directors, their responsibilities were to all stockholders and were enforceable according to legal standards entirely unrelated to the needs of the trust or to Byrum's desires with respect thereto.

[11] Such a fiduciary relationship would exist in almost every, if not every State. Ohio, from which this case arises, is no exception:

Memo. 1987-134 (same conclusion as Rev. Rul. 81-15 but without citing it). Rev. Rul. 81-15 does not appear to recognize that even nonvoting stock has some limited voting rights; fortunately, Prop. Reg. § 20.2036-2(a) seems to recognize and approve of such a retention, as mentioned in fn. 231. Given that estate tax definitions regarding business entities tend to be sparse, one might also look to income tax rules regarding when the right to vote is significant. For purposes of determining whether a corporation was eligible to file a consolidated return, which turned on the presence of voting stock, voting for directors constituted a critical part of the right to vote. *Alumax Inc. v. Commissioner*, 109 T.C. 133 (1197), *aff'd* 165 F.3d 822 (11th Cir. 1999).

"[I]f the majority undertakes, either directly or indirectly, through the directors, to conduct, manage, or direct the corporation's affairs, they must do so in good faith, and with an eye single to the best interests of the corporation. It is clear that the interests of the majority are not always identical with the interests of all the shareholders. The obligation of the majority or of the dominant group of shareholders acting for, or through the corporation, is fiduciary in nature. A court of equity will grant appropriate relief where the majority or dominant group of shareholders act in their own interest or in the interest of others so as to oppress the minority or commit a fraud upon their rights." 13 Ohio Jurisprudence 2d. § 662, at 90-91 (footnotes omitted).

See *Overfield v. Pennroad Corp.*, 42 F. Supp. 586 (ED Pa. 1941); rev'd on other grounds, 146 F. 2d 889 (CA3 1944).

[12] "The directors of the corporation represent the corporation, not just one segment of it, but all of it. The fiduciary nature of the directors' obligation requires that, in the management of the corporation's affairs, they do not presume to play favorites among the shareholders or among the classes of shareholders." 12 Ohio Jurisprudence, 2d, §497, at 618.

The Government seeks to equate the de facto position of a controlling stockholder with the legally enforceable "right" specified by the statute. Retention of corporate control (through the right to vote the shares) is said to be "tantamount to the power to accumulate income" in the trust which resulted in estate tax consequences in *O'Malley*. The Government goes on to assert that "through exercise of that retained power [Byrum] could increase or decrease corporate dividends, and thereby shift or defer the beneficial enjoyment of the trust."[13] This approach seems to us not only to depart from the specific statutory language,[14] but also to misconceive the realities of corporate life.

[13] The Government uses the terms "control" and "controlling stockholder" as if they were words of art with a fixed and ascertainable meaning. In fact, the concept of "control" is a nebulous one. Although in this case Byrum possessed "voting control" of the three corporations (in view of his being able to vote more than 50% of the stock in each), the concept is too variable and imprecise to constitute the basis per se for imposing tax liability under §2036 (a). Under most circumstances, a stockholder who has the right to vote more than 50% of the voting shares of a corporation "controls it" in the sense that he may elect the board of directors. But such a stockholder would not control, under the laws of most States, certain corporate transactions such as mergers and sales of assets. Moreover, control - in terms of effective power to elect the Board under normal circumstances - may exist where there is a right to vote far less than 50% of the shares. This will vary with the size of the corporation, the number of shareholders and the concentration (or lack of it) of ownership. See generally 2 L. Loss., Securities Regulation, 770-783 (1961). Securities law practitioners recognize that possessing 10% or more of voting power is one of the factors on which the Securities and Exchange Commission relies as an indicia of control. SEC, Disclosure to Investors - The Wheat Report, 245-247 (1969).

[14] In advocating this de facto approach, the Government relies on our opinion in *Commissioner v. Sunnen*, 333 U.S. 591 (1948). *Sunnen* was a personal income tax case in which the Court found the taxpayer had made an assignment of income. The reasoning relied on the de facto power of a controlling shareholder to regulate corporate business for his personal objectives. This case is an estate tax case, not an

income tax case. Moreover, unlike assignment of income cases, in which the issue is who has the power over income, this case concerns a statute written in terms of the "right" to designate the recipient of income. The use of the term "right" implies that restraints on the exercise of power are to be recognized and that such restraints deprive the person exercising the power of a "right" to do so.

There is no reason to suppose that the three corporations controlled by Byrum were other than typical small businesses. The customary vicissitudes of such enterprises - bad years; product obsolescence; new competition; disastrous litigation; new, inhibiting Government regulations; even bankruptcy - prevent any certainty or predictability as to earnings or dividends. There is no assurance that a small corporation will have a flow of net earnings or that income earned will in fact be available for dividends. Thus, Byrum's alleged de facto "power to control the flow of dividends" to the trust was subject to business and economic variables over which he had little or no control.

Even where there are corporate earnings, the legal power to declare dividends is vested solely in the corporate board. In making decisions with respect to dividends, the board must consider a number of factors. It must balance the expectation of stockholders to reasonable dividends when earned against corporate needs for retention of earnings. The first responsibility of the board is to safeguard corporate financial viability for the long term. This means, among other things, the retention of sufficient earnings to assure adequate working capital as well as resources for retirement of debt, for replacement and modernization of plant and equipment, and for growth and expansion. The nature of a corporation's business, as well as the policies and long range plans of management, are also relevant to dividend payment decisions.[15] Directors of a closely-held, small corporation must bear in mind the relatively limited access of such an enterprise to capital markets. This may require a more conservative policy with respect to dividends than would be expected of an established corporation with securities listed on national exchanges.[16]

[15] The spectrum of types of corporation businesses, and of permissible policies with respect to the retention of earnings, is broad indeed. It ranges from the public utility with relatively assured and stable income to the new and speculative corporation engaged in a cyclical business or organized to exploit a new patent or unproved technology. Some corporations pay no dividends at all, as they are organized merely to hold static assets for prolonged periods (*e.g.*, land, mineral resources, and the like). Corporations which emphasize growth tend to low dividend payments, whereas mature corporations may pursue generous dividend policies.

[15] *Thomas v. Matthews*, 94 Ohio St. 32, 55-56, 113 N.E. 669 (1916):

"[I]t is the duty of the directors, in determining the amount of net earnings available for the payment of dividends, to take into account the needs of the company in its business and sums necessary in the operation of its business until the income from further operations is available, the amount of its debts, the necessity or advisability of paying its debts or at least reducing them within the limits of the company's credit, the preservation of its capital stock as represented in the assets of the company as a fund for the protection of its creditors and the character of its surplus assets, whether cash, credits or merchandise."

Nor do small corporations have the flexibility or the opportunity available to national concerns in the utilization of retained earnings. When earnings are substantial, a decision not to pay dividends may result only in the accumulation of surplus rather than growth through internal or external expansion. The accumulated earnings may result in the imposition of a penalty tax.[17]

[17] Internal Revenue Code of 1954, Subch. G, pt. I §§ 531-537, 26 U.S.C. §§ 531-537.

These various economic considerations are ignored at the directors' peril. Although vested with broad discretion in determining whether, when, and what amount of dividends shall be paid, that discretion is subject to legal restraints. If, in obedience to the will of the majority stockholder, corporate directors disregard the interests of shareholders by accumulating earnings to an unreasonable extent, they are vulnerable to a derivative suit.[18] They are similarly vulnerable if they make an unlawful payment of dividends in the absence of net earnings or available surplus,[19] or if they fail to exercise the requisite degree of care in discharging their duty to act only in the best interest of the corporation and its stockholders.

[18] Had Byrum caused the Board to follow a dividend policy, designed to minimize or cut off income to the trust, which resulted in the imposition of the penalty for accumulated earnings not distributed to shareholders, there might be substantial grounds for a derivative suit. A derivative suit also would have been a possibility had dividends been paid imprudently to increase the trust's income at the expense of corporate liquidity. Minority shareholders in Ohio may bring derivative suits under Ohio R. Civ. P. 23.1.

[19] In most States, the power to declare dividends is vested solely in the directors. 11 Fletcher Cyclopedia Corporations, c. 58, §5320. Ohio is no exception, and it limits the authority of directors to pay dividends depending on available corporate surplus. 17 Page's Ohio Code Ann. § 1701.33. Although liability generally exists irrespective of a statute, nearly all States have statutes regulating the liability of directors who participate in the payment of improper dividends. 12 Fletcher Cyclopedia Corporations; c. 58, §5432. Again, Ohio is no exception. 17 Page's Ohio Rev. Code Ann. § 1701.95.

Byrum was similarly inhibited by a fiduciary duty from abusing his position as majority shareholder for personal or family advantage to the detriment of the corporation or other stockholders. There were a substantial number of minority stockholders in these corporations who were unrelated to Byrum.[20] Had Byrum and the directors violated their duties, the minority shareholders would have had a cause of action under Ohio law.[21] The Huntington National Bank, as trustee, was one of the minority stockholders, and it had both the right and the duty to hold Byrum responsible for any wrongful or negligent action as a controlling stockholder or as a director of the corporations.[22] Although Byrum had reserved the right to remove the trustee, he would have been imprudent to do this when confronted by the trustee's complaint against his conduct. A successor trustee would succeed to the rights of the one removed.

[20] Appendix, 30-32. In *Byrum Lithographing Co., Inc.*, none of the other 11 stockholders appears to be related by name to Byrum. In *Bychrome Co.* five of the eight stockholders appear to be unrelated to the Byrums; and in *Graphic Realty Co.* 11 of the 14 stockholders appear to be unrelated.

[21] See *Wilberding v. Miller*, 90 Ohio St. 28, 42, 106 N.E. 665 (1914):

"An arbitrary disregard of the rights of stockholders to dividends or other improper treatment of the assets of the company will be relieved against."

[22] The trust instrument, n. 1, supra, explicitly granted the trustee the power "To enforce, abandon, defend against, or have adjudicated by legal proceedings, arbitration or by compromise, any claim or demand whatsoever arising out of or which may exist against the Trust Estate."

We conclude that Byrum did not have an unconstrained de facto power to regulate the flow of dividends to the trust, much less the "right" to designate who was to enjoy the income from trust property. His ability to affect, but not control trust income, was a qualitatively different power from that of the settlor in *O'Malley*, who had a specific and enforceable right to control the income paid to the beneficiaries.[23] Even had Byrum managed to flood the trust with income, he had no way of compelling the trustee to pay it out rather than accumulate it. Nor could he prevent the trustee from making payments from other trust assets,[24] although admittedly there were few of these at the time of Byrum's death. We cannot assume, however, that no other assets would come into the trust from reinvestments or other gifts.[25]

[23] The Government cites two other opinions of this Court, in addition to O'Malley, to support its argument. In both *Commissioner v. Estate of Holmes*, 326 U.S. 480 (1946), and *Lober v. United States*, 346 U.S. 335 (1953), the grantor reserved to himself the power to distribute to the beneficiaries the entire principal and accumulated interest of the trust at any time. This power to terminate the trust and thereby designate the beneficiaries at a time selected by the settlor, is not comparable to the powers reserved by Byrum in this case.

[24] While the trustee could not acquire or dispose of investments without Byrum's approval, he was not subject to Byrum's orders. Byrum could prevent the acquisition of an asset, but he could not require the trustee to acquire any investment. Nor could he compel a sale, although he could prevent one. Thus, if there were other income-producing assets in the trust, Byrum could not compel the trustee to dispose of them.

[25] In purporting to summarize the basis of our distinction of O'Malley, the dissenting opinion states:

"Now the majority would have us accept the incompatible position that a settlor seeking tax exemption may keep the power of income allocation by rendering the trust dependent on an income flow he controls because the general fiduciary obligations of a director are sufficient to eliminate the power to designate within the meaning of §2036 (a)(2)." Post, at—.

This statement, which assumes the critical and ultimate conclusion, incorrectly states the position of the Court. We do not hold that a settlor "may keep the power of income allocation" in the way Mr. Justice White sets out; we hold, for the reasons stated in this opinion, that this settlor did not retain the power to allocate income within the meaning of the statute.

> We find no merit to the Government's contention that Byrum's de facto "control," subject as it was to the economic and legal constraints set forth above, was tantamount to the right to designate the persons who shall enjoy trust income, specified by §2036(a)(2).[26]
>
> > [26] The dissenting opinion's view of the business world will come as a surprise to many. The dissent states:
> >
> > "Thus by declaring or not declaring dividends in the controlled corporations Byrum was able to open or close the spigot, through which the income flowed to the trust's life tenant." Post, at—.
> >
> > This appears to assume that all corporations including the small family type involved in this case, have a regular and dependable flow of earnings available for dividends, and that if there is a controlling stockholder he simply turn the "spigot" on or off as dividends may be desired. For the reasons set forth in this opinion, no such dream world exists in the life of many corporations. But whatever the situation may be generally, the fallacy in the dissenting opinion's position here is that the record simply does not support it. This case was decided on a motion for summary judgment. The record does not disclose anything with respect to the earnings or financial conditions of these corporations. We simply do not know whether there were any earnings for the years in question, whether there was an earned surplus in any of the corporations, or whether - if some earnings be assumed - they were adequate in light of other corporate needs to justify dividend payments. Nor can we infer from the increase in dividend payments in the year following Byrum's death that higher dividends could have been paid previously. The increase could be explained as easily by insurance held by the corporations on Byrum's life.

The Court rebuffed the IRS' argument that, "by retaining control, Byrum guaranteed himself continued employment and remuneration, as well as the right to determine whether and when the corporations would be liquidated or merged" and therefore Byrum retained enjoyment of the transferred stock:

> Even if Byrum had transferred a majority of the stock, but had retained voting control, he would not have retained "substantial present economic benefits." The Government points to the retention of two "benefits." The first of these, the power to liquidate or merge, is not a present benefit; rather, it is a speculative and contingent benefit which may or may not be realized. Nor is the probability of continued employment and compensation the substantial "enjoyment of ... [the transferred] property" within the meaning of the statute. The dominant stockholder in a closely held corporation, if he is active and productive, is likely to hold a senior position and to enjoy the advantage of a significant voice in his own compensation. These are inevitable facts of the free enterprise system, but the influence and capability of a controlling stockholder to favor himself are not without constraints. Where there are minority stockholders, as in this case, directors may be held accountable if their employment, compensation and retention of officers violates their duty to act reasonably in the best interest of the corporation and all of its stockholders.[35] Moreover, this duty is policed, albeit indirectly, by the Internal Revenue Service, which disallows the deduction of unreasonable compensation paid to a corporate executive as a business expense.[36] We conclude that Byrum's retention of voting control was not the retention of the enjoyment of the transferred property within the meaning of the statute.

[35] Directors of Ohio corporations have been held liable for payment of excessive compensation. *Berkwitz v. Humpherey*, 163 F. Supp. 78 (ND Ohio 1958).

[36] 26 U.S.C. § 162 (a)(1) permits corporations to deduct "reasonable" compensation as business expenses. If the Internal Revenue Service determines that compensation exceeds the bounds of reason, it will not permit a deduction. See, *e.g.*, *Botany Worsted Mills v. United States*, 278 U.S. 282 (1929).

Typically, the S corporation starts with one type of voting stock. Then it issues a stock dividend of nonvoting stock. The stock dividend does not constitute a taxable distribution.[233] The author's tendency is to distribute 19 shares of nonvoting stock for each share of voting stock. This allows the voting stock to retain a significant portion yet allows the original owner to shift 95% of the distribution and liquidation rights when transferring the nonvoting stock to the next generation.

II.A.2.i.i.(c). Cautions in Issuing Nonvoting Stock

One should consider filing Form 8937 to report the issuance of nonvoting shares.[234] It is due 45 days after issuing the shares or, if earlier, on January 15 following the calendar year of the issuance.[235] However, "an S corporation can satisfy the reporting requirement for any organizational action that affects the basis if it reports the effect of the organizational action on a timely filed Schedule K-1 (Form 1120S) for each shareholder and timely gives a copy to all proper parties."[236] These deadlines and exceptions are from the December 2011 instructions to Form 8937; be sure to check the instructions, as well as the IRS' webpage for future developments regarding Form 8937.[237]

Issuing more shares might increase the corporation's franchise tax. Check not only the state in which the corporation was formed but also each state in which the corporation registers to do business. If the issuance would increase franchise tax, consider doing a reverse split to decrease the number of shares before issuing the nonvoting stock.

Issue nonvoting shares will not remove grandfathering from Code § 2703.[238]

If the corporation is a C corporation, then the stock issuance will not blow the Code § 1202 exclusion of gain on sale of qualified small business stock.[239]

---

[233] Code § 301(a) taxes only a distribution of property, and refers to the Code § 317(a) definition of "property." Code § 317(a) provides that "property" does not include stock in the corporation making the distribution.
[234] Code § 6045(g).

II.A.2.i.i.(d). Reallocations between Voting and Nonvoting Stock

Future reallocations between voting and nonvoting stock would not create income tax consequences.[240] However, to avoid a taxable gift, a swap of voting for nonvoting stock (or vice versa) should consider the disparity in their values.[241] It is not unusual for even minority voting shares to have 3%-5% more value than nonvoting shares, so one might consider consulting a qualified appraiser when doing a swap like this.

A redemption plan did not cause second-class-of-stock issues when its purposes were to ensure that voting power and economic ownership between A and A's family and B and B's family remain approximately equal and to prevent an individual shareholder from owning a disproportionate amount of voting versus nonvoting common stock.[242]

II.A.2.i.i.(e). Example of Recapitalizing Voting and Nonvoting

Suppose there were 100 shares – all voting – and the grantor gave 20 shares to the trust.

Here are the steps:

1. Amend articles of incorporation to allow nonvoting

2. Give 19 shares of nonvoting for every share of voting, meaning:

   a. Grantor has 80 voting and 1,520 nonvoting

   b. Trust has 20 voting and 380 voting

3. Then grantor transfers to the trust nonvoting shares pursuant to a formula[243] (which will likely be 21 shares) in exchange for all of the trust's 20 voting shares.

Code § 1036[244] allows step 4 to be income tax-free, even if the trust is not a grantor trust.

II.A.2.i.ii. Temporary Timing Differences; Other Varying Differences

Please read this part II.A.2.i.ii in the context of parts II.A.2.i.xiii Automatic Relief If Disproportionate Distributions Violate Single Class of Stock Rule and II.A.2.i.xii Automatic Relief If Governing Provisions Violate Single Class of Stock Rule, which generally confirm my approach that the issues described in this part II.A.2.i.ii are best handled by administrative procedures that are not contractually agreed to by the shareholders.

Suppose an S corporation has two equal shareholders, A and B. Under its bylaws, A and B are entitled to equal distributions. The corporation distributes $50,000 to A in the current year but does not distribute $50,000 to B until one year later. The circumstances indicate that the

---

[240] Code § 1036. Voting trust certificates are also eligible for an income tax-free swap. Letter Ruling 200618004.

[241] *Bosca v. Commissioner*, T.C. Memo. 1998-251.

[242] Letter Ruling 201506003.

[243] Use the principles of part III.B.3.e Disclaimers, found in part III.B.3 Defined Value Clauses in Sale or Gift Agreements or in Disclaimers.

[244] See fn 6638 in part III.B.2.h.iii Swap Power (Code § 1036 generally) and fn 678 in part II.D.4.a.i Classifying an Investment Trust (voting trust certificates).

difference in timing did not occur by reason of a binding agreement relating to distribution or liquidation proceeds. The difference in timing of the distributions to A and B does not cause the corporation to be treated as having more than one class of stock; Reg. § 1.1361-1(l)(2)(i), "In general," provides:

> The determination of whether all outstanding shares of stock confer identical rights to distribution and liquidation proceeds is made based on the corporate charter, articles of incorporation, bylaws, applicable state law, and binding agreements relating to distribution and liquidation proceeds (collectively, the governing provisions). A commercial contractual agreement, such as a lease, employment agreement, or loan agreement, is not a binding agreement relating to distribution and liquidation proceeds and thus is not a governing provision unless a principal purpose of the agreement is to circumvent the one class of stock requirement of section 1361(b)(1)(D) and this paragraph (l). Although a corporation is not treated as having more than one class of stock so long as the governing provisions provide for identical distribution and liquidation rights, any distributions (including actual, constructive, or deemed distributions) that differ in timing or amount are to be given appropriate tax effect in accordance with the facts and circumstances.

Reg. § 1.1361-1(*l*)(2)(vi), Example (2), "Distributions that differ in timing," provides:

> (i) S, a corporation, has two equal shareholders, A and B. Under S's bylaws. A and B are entitled to equal distributions. S distributes $50,000 to A in the current year but does not distribute $50,000 to B until one year later. The circumstances indicate that the difference in timing did not occur by reason of a binding agreement relating to distribution or liquidation proceeds.
>
> (ii) Under paragraph (l)(2)(i) of this section, the difference in timing of the distributions to A and B does not cause S to be treated as having more than one class of stock. However, section 7872 or other recharacterization principles may apply to determine the appropriate tax consequences.

The single class of stock rule is not violated by a governing provision providing that, "as a result of a change in stock ownership, distributions in a taxable year are to be made on the basis of the shareholders' varying interests in the S corporation's income in the current or immediately preceding taxable year."[245] For example, distributions in year 2 to pay taxes on income earned in year 1 that are based on ownership in year 1 will not violate the single class of stock rules; note, however, that the corporation would need to satisfy any state law restrictions on the timing of setting the record date for such distributions.

Paying state taxes might lead to temporary timing differences, if the shareholders have different state income tax situations. As long as any resulting disproportionate distributions are only temporary, the timing differences should not jeopardize the S election.[246] Letter

[245] Reg. § 1.1361-1(*l*)(2)(iv), which further provides:

> If distributions pursuant to the provision are not made within a reasonable time after the close of the taxable year in which the varying interests occur, the distributions may be recharacterized depending on the facts and circumstances, but will not result in a second class of stock.

[246] Reg. § 1.1361-1(*l*)(2)(ii) provides:

> *State law requirements for payment and withholding of income tax*. State laws may require a corporation to pay or withhold state income taxes on behalf of some or all of the corporation's

Ruling 201608007 approved correction of disproportionate distributions related to composite state income tax filings, and the corporation implemented policies and procedures to ensure that future state composite and withholding taxes paid by the corporation for the benefit of the applicable shareholders will be equalized annually with reciprocal cash distributions to the other shareholders. So did Letter Ruling 201633017, in which the corporation treated excess distributions as interest-free loans that were not necessarily repaid; the ruling pointed out, however, that disproportionate and corrective distributions must be given appropriate tax effect.

Letter Ruling 200944018 held that, when disproportionate distributions were made in one year, corrective action taken in the following year should cure any inadvertent termination that might have occurred.[247] The fact that the corrective action was necessarily non-pro-rata did not itself cause any second-class-of stock problem.

Letter Ruling 201444020 allowed two years of disproportionate distributions to be cured in the third year. In year Y1, an S corporation made disproportionate distributions to its shareholders by failing to make certain distributions to certain of its shareholders. The corporation discovered this in year Y2 and has rectified the situation by making the necessary corrective distributions. The IRS concluded that X's S election may have terminated because X may have had more than one class of stock. It further ruled, however, that, if the S election was terminated, such a termination was inadvertent. Further, the IRS held that the corrective action taken by the corporation and the shareholders for Y1 does not create a second class of stock. Consequently, it ruled that the corporation will be treated as continuing to be an S corporation from when it first became an S corporation, and thereafter, provided that the S election otherwise is not terminated for any other reason.

Letter Rulings 201236003 and 201608006 authorized an unspecified number of years of disproportionate distributions to be corrected when the governing documents did not permit disproportionate distributions.

Alternatively, excess distributions might be characterized as advances, then documented as loans and repaid with interest.[248]

The determination of whether all outstanding shares of stock confer identical rights to distribution and liquidation proceeds is made based on the corporate charter, articles of incorporation, bylaws, applicable state law, and binding agreements relating to distribution and liquidation proceeds (collectively, the governing provisions).[249] A buy-sell

shareholders. Such laws are disregarded in determining whether all outstanding shares of stock of the corporation confer identical rights to distribution and liquidation proceeds, within the meaning of paragraph (*l*)(1) of this section, provided that, when the constructive distributions resulting from the payment or withholding of taxes by the corporation are taken into account, the outstanding shares confer identical rights to distribution and liquidation proceeds. A difference in timing between the constructive distributions and the actual distributions to the other shareholders does not cause the corporation to be treated as having more than one class of stock.

247 Letter Ruling 201220024 had a similar result.

248 Letter Ruling 201150030.

249 Reg. § 1.1361-1(l)(2)(i).

redemption/distribution agreement unrelated to employment[250] may violate the single class of stock rules.[251]

A commercial contractual agreement, such as a lease, employment agreement, or loan agreement, is not a binding agreement relating to distribution and liquidation proceeds and thus is not a governing provision unless a principal purpose of the agreement is to circumvent the one class of stock requirement.[252]

Although a corporation is not treated as having more than one class of stock so long as the governing provisions provide for identical distribution and liquidation rights, any distributions (including actual, constructive, or deemed distributions) that differ in timing or amount are to be given appropriate tax effect in accordance with the facts and circumstances.[253]

This ruling reinforced my view that the IRS does not appear to be concerned with temporary timing differences, so long as they are corrected promptly after being discovered, presumably when the corporation's income tax return is prepared.

The IRS has also approved a mechanism for addressing varying interests in stock. In Letter Ruling 200709004, the shareholders agreement contained provisions relating to minimum distributions to shareholders by Company. Distributions under those provisions are to be made based on the shareholders' varying interests in company's income in the current or immediately preceding taxable year (or earlier if such earlier year's taxable income is adjusted by company or the IRS) ("Varying Interests Distributions"). The Varying Interests Distributions entail year-end and quarterly distributions that enable shareholders to make timely estimated and final tax payments. The distributions are made directly to the shareholders rather than to their respective taxing authorities on behalf of the shareholders.

In addition to Varying Interests Distributions, the corporation would declare dividends and make pro rata distributions to its shareholders based on the number of shares owned by the shareholders as of the record date ("Record Date Distributions"). Record Date Distributions are to be made in accordance with the corporate laws of State, which provides that all shares of the same class are equal. The shareholders agreement and applicable state corporate law constituted the governing provisions of Company.

The IRS concluded that the governing provisions relating to Varying Interests Distributions and to Record Date Distributions did not cause the corporation to have more than one class of stock.

---

[250] See part II.A.2.i.iv Providing Equity-Type Incentives without Violating the Single Class of Stock Rules.

[251] Letter Ruling 201919005 granted inadvertent termination relief after finding that on Date 4 a violation occurred (fortunately, no shares were sold after Date 4 and before the offending provision was removed):

> A, B, and C have been the only shareholders of X since Date 3; A and B each own g% of the shares and C owns h% of the shares.
>
> On Date 4, X's shareholders entered into Agreement. Agreement provided that: (1) if a shareholder's voting stock is sold, a corresponding percentage of such shareholder's non-voting stock must be cancelled, and in the event that the remaining shareholders have other than equal ownership of the remaining shares of non-voting stock, those shareholders would be entitled to distributable earnings pro rata in accordance with the shares of non-voting stock; and (2) in the event of a sale of X, C would be entitled to receive from the proceeds a payment in excess of the payments to A and B.

[252] Reg. § 1.1361-1(l)(2)(i).

[253] Reg. § 1.1361-1(l)(2)(i).

Letter Ruling 201017019 took this concept one step further in approving distributions: (1) made in accordance with the shareholders' respective interests in taxable income or loss for that taxable year; (2) that may take into account any interest, penalties, or the like attributable to a post-filing adjustment; and (3) that will be made at a reasonable time after the relevant post-filing adjustment is finally determined. Similarly, Letter Ruling 201306005 approved an agreement under which the corporation will make distributions (including to enable shareholders to pay their quarterly estimated taxes) based on the shareholders' varying interests in its income in the current or immediately preceding taxable year or earlier if such earlier year's taxable income is adjusted after X's original return for the such earlier year is filed. Be sure, however, to check whether applicable state law permits such a lengthy delay from the record date to the distribution date.

Unfortunately, the IRS has not issued any formal guidance upon which taxpayers are permitted to rely, as Letter Rulings do not bind the IRS. From a tax perspective, the safest approach is to mandate pro rata distributions and be silent about what happens if the distributions are not pro rata. This is important not only for income tax purposes but also to fall within the Code § 2701(a)(2)(B) safe harbor for valuing transfers of interests in family businesses. Then one would administratively fix any noncompliance that might occur, and generally these fixes would be required under state law and respected by the IRS because pro rata distributions are legally mandated under the governing instruments.

If one wishes to adopt more elaborate formal procedures, one should consider obtaining a Letter Ruling, with one exception: state law requirements for payment and withholding of income tax. Regulations recognize that state laws might require a corporation to pay or withhold state income taxes on behalf of some or all of the corporation's shareholders. Such laws are disregarded in determining whether all outstanding shares of stock of the corporation confer identical rights to distribution and liquidation proceeds, so long as the deemed distributions and actual distributions wind up being pro rata in the aggregate. A difference in timing between the constructive distributions and the actual distributions to the other shareholders does not cause the corporation to be treated as having more than one class of stock.[254]

What if these tax payments are disproportionate and the corporation does not realize they need to be fixed? In Letter Ruling 201129023, for several years the corporation intentionally made disproportionate distributions to defray shareholders' income taxes. Eventually, the corporation learned that it shouldn't have been doing that, so it made a corrective distribution to make up for the cumulative disproportionate distributions. Without ruling whether the distributions violated the single class of stock rule, IRS granted inadvertent termination relief, just in case a violation had occurred.

Letter Ruling 202103010 involved the following:

> The information submitted states that X was formed on Date 1 under the laws of State, and elected to be classified as an S corporation effective Date 2. X's articles of incorporation provide that X shall maintain only one class of stock with identical rights to distributions and liquidation proceeds.
>
> X states that, beginning on Date 3, it made annual non-resident income tax payments to certain states on behalf of its shareholders, and that these payments were disproportionate to the shareholders' ownership interests. X represents that these

[254] Reg. § 1.1361-1(l)(2)(ii).

> payments created a second class of stock, and thus, caused the termination of X's S corporation election effective Date 3.

Letter Ruling 202103010 held:

> Based solely on the facts submitted and the representations made, we conclude that X's S corporation election terminated on Date 3 as a result of X having more than one class of stock. We further conclude that this termination was inadvertent within the meaning of § 1362(f).
>
> X has taken corrective action so that it meets the requirements of a small business corporation under § 1361(b). Therefore, we determine that pursuant to the provisions of § 1362(f), X will be treated an S corporation effective Date 3 and thereafter, provided that its S corporation election has not otherwise terminated under § 1362(d).

Note that the corporation represented that these payments created a second class of stock and caused the termination of X's S corporation election. Presumably that representation was required to get the ruling because if a skittish tax advisor. The articles incorporation had the required language, and the principles described in fn 255 and the rest of part II.A.2.i.iii Disproportionate Distributions provide that this situation did not involve a second class of stock.

II.A.2.i.iii. Disproportionate Distributions (Not Temporary)

Please read this part II.A.2.i.iii in the context of parts II.A.2.i.xiii Automatic Relief If Disproportionate Distributions Violate Single Class of Stock Rule and II.A.2.i.xii Automatic Relief If Governing Provisions Violate Single Class of Stock Rule, which generally confirm my approach that the issues described in this part II.A.2.i.ii are best handled by administrative procedures that are not contractually agreed to by the shareholders.

Disproportionate distributions that are not contemplated by the governing provisions do not necessarily violate the rules against a second class of stock.[255] They are often fixed by make-up distributions to those who received less; see part II.A.2.i.ii Temporary Timing Differences.

In *Minton v. Commissioner*,[256] the Tax Court held, and the Fifth Circuit affirmed, that distributions that were allegedly disproportionate did not violate the rules against a second class of stock because the shareholders that received the alleged distributions were not legally entitled to receive disproportionate distributions; that case involved minority shareholders arguing that the corporation's S election had terminated.[257] *Kumar v. Commissioner*[258] held that a shareholder who was effectively shut out of management remained a shareholder of record and was taxed on his distributive share of income. Same with *Mowry v. Commissioner*,[259] in which the minority shareholder also did not prove transfer of his shares to the majority

[256] 562 F.3d 730 (5th Cir. 2009) (per curiam), *aff'g* T.C. Memo. 2007-372.
[257] *Minton* is summarized in Steve Leimberg's Business Entities Email Newsletter - Archive Message #124.
[258] T.C. Memo. 2013-184.
[259] T.C. Memo. 2018-105. The case is also discussed in fn 5699 in part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, in the context of when the taxpayer can use form over substance.

shareholder, the latter who was allegedly stealing from the company.[260] However, in Letter Ruling 202103010, the taxpayer represented that disproportionate distributions (annual non-resident income tax payments to certain states on behalf of its shareholders) created a second class of stock, for which the ruling provided inadvertent termination relief; see the end of part II.A.2.i.ii Temporary Timing Differences; Other Varying Differences.

Furthermore, when some shareholders of an S corporation sought compensation for financial damages they sustained due to some inadequate advice the corporation had received, the corporation's payments to compensate them did not constitute issuance of a second class of stock.[261]

Similarly, when a trust agreement specifies to whom distributions from an S corporation pass, that is an internal trust matter and is not a governing provision that is required to be taken into account under Reg. § 1.1361-1(l)(2)(i).[262]

II.A.2.i.iv. Providing Equity-Type Incentives without Violating the Single Class of Stock Rules

As discussed earlier, S corporations cannot have more than one class of stock.[263] The single-class-of-stock rules focus on rights to distribution and liquidation proceeds.[264] However, many techniques allow employees to be compensated in a manner similar to a shareholder without being considered to be a shareholder. Or, employees could hold actual stock whose liquidation rights materially differ from the other stock but is not deemed a second class of stock because of special exceptions that apply only to shareholders who are employees. For additional aspects of equity compensation or issuing stock to employees, see part II.M.4.b.ii Income Tax Recognition Timing Rules re Equity Incentives, especially part II.M.4.e.i Issuing Stock to an Employee - Generally (particularly noting fns. 3710-3715).

Please read this part II.A.2.i.iv in the context of part II.A.2.i.xii Automatic Relief If Governing Provisions Violate Single Class of Stock Rule.

---

[260] See part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy, with fns 1563-1564 addressing acts needed to abandon an asset. *Mowry* held:

> Petitioner testified that G. Mowry never paid him for his shares, and petitioners did not report a sale of stock on their 2012 return. For 2012 they continued to list Mowry Rebar as an entity in which they held an interest. That petitioner quit his employment with Mowry Rebar does not necessarily indicate that he ceased to hold his ownership interest in the company.

[261] Letter Ruling 201016040.

[262] Letter Ruling 201834007, saying that "the Trust Agreement is disregarded in determining whether the outstanding shares of X stock confer identical rights to distributions and liquidation proceeds" and therefore the following facts did not concern the IRS:

> Some or all distributions received by the Trust from X will be used by the trustee of Trust to make required payments on the liabilities against which the X stock is pledged, and those payments will be made equally from A's share and B's share. In exchange for B agreeing to have the liabilities be paid from B's Share, A's Share will issue to B's Share a promissory note for amounts paid out of B's share with respect to the liabilities. Additionally, although distributions from X to Trust will be applied equally to each share, A will have a right to certain distributions from Trust that will not be shared by B.

[263] Code § 1361(b)(1)(D).

[264] Reg. § 1.1361-1(*l*)(1), which is reproduced in fn 226 in part II.A.2.i.i.(a) Nonvoting Stock Permitted for S Corporations.

Certainly, an employer can give an employee a bonus based on the company's profitability. Reg. § 1.1361-1(b)(4) provides:[265]

> *Treatment of deferred compensation plans*. For purposes of subchapter S, an instrument, obligation, or arrangement is not outstanding stock if it -
>
> (i) Does not convey the right to vote;
>
> (ii) Is an unfunded and unsecured promise to pay money or property in the future;
>
> (iii) Is issued to an individual who is an employee in connection with the performance of services for the corporation or to an individual who is an independent contractor in connection with the performance of services for the corporation (and is not excessive by reference to the services performed); and
>
> (iv) Is issued pursuant to a plan with respect to which the employee or independent contractor is not taxed currently on income.
>
> A deferred compensation plan that has a current payment feature (e.g., payment of dividend equivalent amounts that are taxed currently as compensation) is not for that reason excluded from this paragraph (b)(4).

Beyond that, how far can an employer go in providing compensation that functions like stock ownership without actually being stock? (See part II.M.4 Providing Equity to Key Employees and an Introduction to Code § 409A Nonqualified Deferred Compensation Rules.)

- An employment agreement is not a binding agreement relating to distribution and liquidation proceeds (and therefore is not a second class of stock) unless a principal purpose of the agreement is to circumvent the single class of stock rules.[266] Even if the IRS finds that one shareholder's compensation is excessive, that finding will not violate the single class of stock rules unless a principal purpose of the agreement is to circumvent those rules.[267] Same with disparate fringe benefits;[268] however, if an employer treats a compensatory split-

---

[265] This is important for Reg. § 1.1361-1(*l*)(3), which is reproduced in fn 3715 in part II.M.4.e.i Issuing Stock to an Employee - Generally.

[266] Reg. § 1.1361-1(l)(2)(i). See also Letter Ruling 200924019 ("informal unwritten employment agreement" did not constitute a "governing provision" under this regulation and therefore did not create a second class of stock.

[267] Reg. § 1.1361-1(l)(2)(v), Example (3); Letter Ruling 201607001 (at will employee without a written compensation agreement). Example (3), "Treatment of excessive compensation," provides:

(i) S, a corporation, has two equal shareholders, C and D, who are each employed by S and have binding employment agreements with S. The compensation paid by S to C under C's employment agreement is reasonable. The compensation paid by S to D under D's employment agreement, however, is found to be excessive. The facts and circumstances do not reflect that a principal purpose to D's employment agreement is to circumvent the one class of stock requirement of section 1361(b)(1)(D) and this paragraph (l).

(ii) Under paragraph (l)(2)(i) of this section, the employment agreements are not governing provisions. Accordingly, S is not treated as having more than one class of stock by reason of the employment agreements, even though S is not allowed a deduction for the excessive compensation paid to D.

[268] Reg. § 1.1361-1(l)(2)(v), Example (4), "Agreement to pay fringe benefits," which provides:

dollar agreement as distributions rather than compensation, the employer risks the IRS making a second-class-of-stock challenge if the employer does not properly adjust distributions to take into account the resulting disproportionate distributions.[269]

- If a call option issued to an employee does not constitute excessive compensation, the option is not treated as a second class of stock if it is nontransferable and does not have a readily ascertainable fair market value when issued.[270] However, if the strike price is substantially below the stock's fair market value when the option becomes transferable, it may be treated as a second class of stock if the option is materially modified or transferred to an ineligible shareholder.[271] The safest course of action would be to (1) make the option always be nontransferable without a readily ascertainable fair market value as described above, or (2) start with an option that is transferable only to eligible shareholders and has a strike price that, at inception, is at least 90% of the stock's fair market value.[272]

- Providing a key employee with certain payments upon certain liquidity events did not constitute an issuance of equity to that employee, even though deferred payments may be secured by stock.[273]

(i) S, a corporation, is required under binding agreements to pay accident and health insurance premiums on behalf of certain of its employees who are also shareholders. Different premium amounts are paid by S for each employee-shareholder. The facts and circumstances do not reflect that a principal purpose of the agreements is to circumvent the one class of stock requirement of section 1361(b)(1)(D) and this paragraph (l).

(ii) Under paragraph (l)(2)(i) of this section, the agreements are not governing provisions. Accordingly, S is not treated as having more than one class of stock by reason of the agreements. In addition, S is not treated as having more than one class of stock by reason of the payment of fringe benefits.

Letter Ruling 200914019 (equity split-dollar where corporation is reimbursed the term cost and receives cash value when agreement terminates).

[269] See text accompanying fn 4473 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.

[270] Reg. § 1.1361-1(l)(4)(iii)(B)(2).

[271] Reg. § 1.1361-1(l)(4)(v), Example (2). Letter Ruling 200724010 held than an option to acquire stock in an S corporation without an exercise price being required constituted a second class of stock.

[272] Reg. § 1.1361-1(l)(4)(iii)(C).

[273] Letter Ruling 201926008 involved the following facts:

At all relevant times, X had one shareholder, A, an individual. X engaged another individual, B, through a State 3 corporation, Y, in marketing various business services and products to its merchant clients. On Date 2, X, A, B, and Y entered into Agreement 1, which provided for the sale of N1 percent of the stock of X held by A upon the satisfaction of certain conditions. On Date 3, X, A, B, and Y terminated Agreement 1 at a time when no stock had been transferred pursuant to Agreement 1 and entered into Agreement 2, which provided B with certain payment rights upon the occurrence of a Liquidity Event. Under the terms of Agreement 2, a Liquidity Event generally included a sale of a majority of X's assets, the transfer of rights to control over any use of all or substantially all of X's assets under a lease, exchange, license or similar agreement, a merger or consolidation in which X's shareholders own less than 50% of the voting securities of the surviving company or an IPO of X stock.

Agreement 2 contemplated that X, A, B, and Y may agree to a buy-out of B's rights under Agreement 2 prior to the occurrence of a Liquidity Event. In the case of a buy-out, N2 percent of the amount owed was to be paid within N3 days of the determination of the amount owed and the remainder was payable in equal monthly installments over N4 months, including N5 percent

Reg. § 1.1361-1(b)(3) provides:[274]

> *Treatment of restricted stock*. For purposes of subchapter S, stock that is issued in connection with the performance of services (within the meaning of § 1.83-3(f)) and that is substantially nonvested (within the meaning of § 1.83-3(b)) is not treated as outstanding stock of the corporation, and the holder of that stock is not treated as a shareholder solely by reason of holding the stock, unless the holder makes an election with respect to the stock under section 83(b). In the event of such an election, the stock is treated as outstanding stock of the corporation, and the holder of the stock is treated as a shareholder for purposes of subchapter S. See paragraphs (*l*)(1) and (3) of this section for rules for determining whether substantially nonvested stock with respect to which an election under section 83(b) has been made is treated as a second class of stock.

Under certain circumstances, an employer may issue stock to an employee and repurchase it at a bargain price without violating the single class of stock rules:[275]

> Bona fide agreements to redeem or purchase stock at the time of death, divorce, disability, or termination of employment are disregarded in determining whether a corporation's shares of stock confer identical rights. In addition, if stock that is substantially nonvested (within the meaning of section 1.83-3(b))[276] is treated as outstanding under these regulations, the forfeiture provisions that cause the stock to be substantially nonvested are disregarded.

The company can redeem an employee's stock for an amount significantly below its fair market value on the termination of employment or if the company's sales fall below certain levels, when the employee did not receive the stock in connection with his performing services and a principal purpose of the agreement is not to circumvent the single class of stock rules.[277] Could a sale price that is nominal be considered not to be bona fide or be considered to make the stock forfeitable, throwing it into the rules that apply to forfeitable stock? The author has not researched whether this is a legitimate issue, but generally would feel comfortable with a

---

> interest on the outstanding balance. Monthly installment payments were to be secured by a pledge of not less than N1 percent of the X stock held by A.

Citing Reg. § 1.1361-1(b)(4), Letter Ruling 201926008 held:

> Based solely on the facts submitted and the representations made, we conclude that Agreement 1 and Agreement 2 satisfy the requirements of § 1.1361-1(b)(4). Accordingly, Agreement 1 and Agreement 2 are not considered outstanding stock, and X's S corporation election was not terminated by virtue of the existence of Agreement 1 or Agreement 2.

[274] See part II.M.4.e.i Issuing Stock to an Employee - Generally, especially text accompanying fns. 3710-3715.

[275] Reg. § 1.1361-1(l)(2)(iii)(B). But see Letter Ruling 200632004, in which the IRS ruled that a bargain repurchase of stock held by a director would constitute a second class of stock.

[276] See part II.M.4.b When is an Award or Transfer to an Employee Includible in the Employee's Income.

[277] Reg. § 1.1361-1(l)(2)(vi), Example (9). However, this rule does not appear to apply to directors: Letter Ruling 200632004 rejected a mandatory redemption agreement for directors, where they were required to sell stock in termination of their relationship with the company for the same price for which they bought it. The ruling did not mention whether the price was above or below book value; however, it's not difficult to imagine situations in which the book value increases in the future above the original purchase price. As a condition to a favorable ruling, the IRS required the mandatory redemption to be at fair market value.

redemption price at book value,[278] because Reg. § 1.1361-1(*l*)(2)(iii)(A) provides (emphasis added):

> Buy-sell agreements among shareholders, agreements restricting the transferability of stock, and redemption agreements are disregarded in determining whether a corporation's outstanding shares of stock confer identical distribution and liquidation rights unless --
>
> (1) A principal purpose of the agreement is to circumvent the one class of stock requirement of section 1361(b)(1)(D) and this paragraph (l), and
>
> (2) The agreement establishes a purchase price that, at the time the agreement is entered into, is significantly in excess of or below the fair market value of the stock.
>
> **Agreements that provide for the purchase or redemption of stock at book value or at a price between fair market value and book value are not considered to establish a price that is significantly in excess of or below the fair market value of the stock and, thus, are disregarded in determining whether the outstanding shares of stock confer identical rights.** For purposes of this paragraph (*l*)(2)(iii)(A), a good faith determination of fair market value will be respected unless it can be shown that the value was substantially in error and the determination of the value was not performed with reasonable diligence. Although an agreement may be disregarded in determining whether shares of stock confer identical distribution and liquidation rights, payments pursuant to the agreement may have income or transfer tax consequences.

Such a price would prevent the terminated employee from benefiting from valuation methods based on earnings or unrealized appreciation in the company's tangible or intangible assets. Also, the IRS approved a bonus plan to be funded by a portion of any future recovery from a claim against a third party; the plan would award certain of its employees for their work on the matter relating to that claim.[279]

The shareholder agreement can go even further and provide that an employee's shares are to be redeemed at less than fair market value on the termination of employment or if the corporation's sales fall below certain levels, even though the shares were not issued to the employee, in connection with the performance of services; the regulations permit this unless a principal purpose of that portion of the agreement is to circumvent the one class of stock requirement.[280] Stock issued to key employees may be subjected to transfer restrictions and service-related risks of forfeiture.[281] Letter Ruling 201918013 held that the transfer restrictions and repurchase provisions in the following Agreement and Plan will be disregarded in determining whether X's shares of stock confer identical rights:

---

[278] Letter Ruling 200708018 approved a stock option plan where the employee could buy at book value and the corporation could repurchase at the same value one year later if the employee transferred the stock. The corporation also had an ongoing right to redeem the shares; the ruling did not disclose the redemption price.
[279] Letter Ruling 201309003.
[280] Reg. § 1.1361-1(l)(2)(vi), Ex. (9).
[281] Letter Ruling 201405005 involved a corporation's redemption of its two only shareholders in exchange for installment notes issued to each. Key employees were issued stock with the restrictions and made Code § 83(b) elections so that the stock was considered outstanding. It is a good example of a transition plan.

> Under an agreement entered into by X and its shareholders, the Agreement, shares generally may not be transferred without the prior written consent of the Chairman of the Board of Directors of X.
>
> X has adopted an equity compensation plan, the Plan, which authorizes X to sell shares of X's stock to key employees of X or to grant shares or options to purchase shares to such employees. Shares acquired under the Plan are subject to the same transfer restrictions set forth in the Agreement. In addition, shares held by employees may be repurchased under certain circumstances by X (generally, upon termination of employment) at either the "non-forfeiture repurchase price," which equals the fair market value of the shares, or the "forfeiture repurchase price," which is the lesser of: (i) the fair market value of the shares or (ii) the price paid, if any, to acquire the shares. Depending on the circumstances, the forfeiture repurchase price could be as low as zero. The repurchase price of the shares will only be the forfeiture repurchase price if the employee has engaged in activity meeting the definition of "cause" in the Plan, which generally only includes theft or fraud by the employee that materially harms X.
>
> Some employees of X have requested (i) permission to transfer their shares of X to a trust for the benefit of themselves and/or their family members, or (ii) that the shares of X that would otherwise be issued to them pursuant to the Plan instead be issued to such a trust. X will confirm that the trusts are eligible S corporation shareholders. Shares held in such trusts will be subject to the same restrictions under the Agreement and the Plan as shares directly held by employees.
>
> X represents that the Agreement and the Plan were not created as a plan to circumvent the one class of stock requirement for S corporations.

Letter Ruling 9413023 approved the following plan as not causing second-class-of-stock issues:

> Based on representations made and information submitted, X is a closely held corporation that was incorporated on May 25, 1955, and X has filed an S election effective for the tax year beginning September 27, 1993. Since its incorporation, X has entered into a buy-sell agreement and a split-dollar life insurance arrangement with shareholders A and B, respectively.
>
> X entered into the buy-sell agreement with A on October 31, 1980. The buy-sell agreement was the result of arm's length business negotiations, and it established a purchase price that reflected fair market value less a minority discount.
>
> Under the split-dollar life insurance arrangement with B, X pays the premiums on the policies. To the extent that the premium confers an economic benefit on B, X reports the amount as taxable compensation to B, and B reports the benefit as taxable income. B works exclusively in the business operations of X.
>
> In addition, X proposes to adopt for the benefit of its employees a plan that X refers to as a stock appreciation rights plan (Plan). Under the Plan, full-time employees who have satisfied certain requirements may acquire non-transferrable Certificates either by purchase or award. A Certificate's value equals the book value of a share of X's stock as of the appropriate valuation date (generally, the last day of X's preceding fiscal year). Book value is determined in accordance with provisions in the Plan.

> The Plan provides an annual 30-day window period when eligible employees may purchase a limited number of Certificates. Once a Participant has held these Certificates for 24 months, the Participant may voluntarily surrender them for immediate payment. No waiting period applies for payments made in the event of an Unforeseen Emergency, as defined in the Plan, and all purchased Certificates must be surrendered for immediate payment upon Separation of Service, even if Separation of Service occurs before the end of the 24 month waiting period. The amount due a Participant with respect to the surrender of purchased Certificates will be the greater of the amount equal to the purchase price paid by the Participant or the book value of the surrendered Certificates determined as of the appropriate valuation date.
>
> Awarded Certificates are purchased by X on behalf of selected awardees and subsequently delivered to them. These Certificates may not be redeemed for two years after the date of X's purchase of them unless the awardee Separates from Service or experiences an Unforeseen Emergency. Payment made in connection with the surrender of an awarded Certificate will equal the book value of a share of X's stock as of a stipulated valuation date.
>
> Certificates are nontransferable and nonassignable. They do not provide voting rights or dividend rights. Under the Plan, X's obligation to pay constitutes a mere unsecured promise and a participant's rights are no greater than those of a general creditor of X.

Letter Ruling 9413023 analyzed the timing of the employees recognizing income under the constructive receipt rule of Reg. § 1.451-2(a):[282]

> The Code and regulations do not define the phrase "substantial limitation or restriction." Both the courts and the Internal Revenue Service have recognized that such a restriction exists if the taxpayer must surrender or forfeit a valuable right to receive the income. *Hales v. Commissioner*, 40 BTA 1245 (1939), *acq.*, 1940-1 C.B. 2; *Knapp v. Commissioner*, 41 BTA 23 (1940).
>
> Rev. Rul. 80-300, 1980-2 C.B. 165, as amplified by Rev. Rul. 82- 121, 1982-1 C.B. 79, finds the right to enjoy appreciation of the employer's stock without making any capital investment in the stock is a valuable right and holds that an employee is not in constructive receipt before such stock appreciation rights (SARs), previously granted, are exercised. In the revenue ruling, surrender of the SARs resulted in the loss of the right to further appreciation without risking capital. Upon withdrawal, the employee received only an amount representing appreciation. The subsequent purchase of an interest providing similar rights to appreciation would require the investment of additional capital by the employee.
>
> Similarly, the profit sharing plan in *Knapp* provided a unique economic opportunity that could not be duplicated upon withdrawal. Under the profit sharing plan, profits were allocated pro rata based on the participants' deposits the preceding year. A participant who had completed a specified number of years of service was entitled to withdraw all the money credited to his account. However, when a participant withdrew from the plan, he could not participate in the plan in the future.

---

[282] Reg. § 1.451-2(a) is reproduced in the text accompanying fns 4205-4206 in part II.Q.1.e Trying to Avoid Possible Ordinary Income on the Sale of a Partnership or S Corporation.

> The Plan in this case although termed a stock appreciation rights plan is in reality a phantom stock or shadow stock plan and not a stock appreciation rights plan as described in Rev. Rul. 80-300 and Rev. Rul. 82-121, because Participants receive more than the value of appreciation on redemption. Additionally, Participants give up no valuable rights when they redeem Certificates. Because they receive the full value of a share of X's stock upon redemption, nothing restricts Participants from reinvesting these amounts in substantially similar products available to the public. Redemption does not cause a Participant to forfeit the right to acquire additional Certificates in the future.
>
> On these facts, a participant reporting his or her income on the cash receipts and disbursements method of accounting will not be in constructive receipt of income when Certificates are purchased or awarded because amounts are not available so that they can be drawn upon by the participant. However, amounts will be includible in income on the earlier of the expiration of the waiting period, Separation of Service, or the determination of an Unforeseen Emergency.

Letter Ruling 9413023 then evaluated any interplay with the second-class-of-stock rule:

> The facts reveal that the buy-sell agreement with A established a purchase price of fair market value less a minority discount. When a purchase price is the result of arm's length business negotiations, the mere presence, or absence, of a minority discount does not cause an agreement to establish a purchase price that is significantly in excess of or below the fair market value of the stock. Therefore, the agreement will be disregarded in determining whether X's shares of stock confer identical distribution and liquidation rights.
>
> Rev. Rul. 91-26, 1991-1 C.B. 185, states that the Service does not consider payments of accident and health insurance premiums by an S corporation on behalf of 2-percent shareholder-employees to be distributions for purposes of the single class of stock requirement of section 1361(b)(1)(D).
>
> Like the payment of accident and health insurance premiums described in Rev. Rul. 91-26, X's payment of premiums under the split-dollar life insurance agreement is a fringe benefit to B, not a vehicle for the circumvention of the one class of stock requirement. Therefore, the agreement will be disregarded in determining whether X's shares of stock confer identical distribution and liquidation rights.
>
> Section 1.1361-1(b)(4) provides that an instrument, obligation, or arrangement is not treated as outstanding stock if it: (i) does not convey the right to vote; (ii) is an unfunded and unsecured promise to pay compensation; (iii) is issued to an employee in connection with the performance of services for the corporation or to an individual who is an independent contractor in connection with the performance of services for the corporation (and is not excessive by reference to the services performed); and (iv) is issued under a plan with respect to which the employee or independent contractor is not taxed currently on income. Furthermore, the mere inclusion of a current payment feature in such an instrument, obligation, or arrangement does not change this conclusion.
>
> The Plan does not grant participants common shares of stock. The Plan units constitute unfunded and unsecured promises to pay compensation in the future that are not taxed currently as income. Furthermore, the Plan does not convey the right to vote, and it is issued to employees in connection with the performance of services for the corporation.

> Accordingly, pursuant to section 1.1361-1(b)(4), the Plan units are not treated as outstanding stock.

Letter Ruling 9413023 concluded:

> Based solely on the representations made and the information submitted, we conclude the following:
>
> 1) the buy-sell agreement, the split-dollar arrangement, and the Plan will not create more than one class of stock within the meaning of section 1361(b)(1)(D); and
>
> 2) a Plan participant reporting his or her income on the cash receipts and disbursements method of accounting will not be in constructive receipt of income when Certificates are purchased or awarded because amounts are not available so that they can be drawn upon by the participant. However, amounts will be includible in income on the earlier of the expiration of the waiting period, Separation of Service, or the determination of an Unforeseen Emergency.
>
> Pursuant to section 3.01(32) of Rev. Proc. 93-3, 1993-1 I.R.B. 71, 76, this ruling is not applicable to any participant who is a controlling shareholder of taxpayer. If the proposed Plan is substantially amended, this ruling may not remain in effect.

II.A.2.i.v. Discounts in Redeeming Minority Shareholders

Citing Reg. § 1.1361-1(*l*)(2)(iii)(A),[283] Letter Ruling 9433024 held that the following redemption agreement described below would be "disregarded in determining whether X's shares of stock confer identical rights":

> X is a corporation organized under the laws of A. X filed a subchapter S election effective January 31, 1983. X's capital structure consists of a single class of common stock, 65% owned by the Majority Shareholder, Y, and 35% owned by 10 other shareholders (collectively, Minority Shareholders).
>
> Presently, X is negotiating a sale of substantially all of its assets to an unrelated third party. In the event a sale takes place, it is represented that each minority shareholder, pursuant to a Redemption Agreement, has agreed to allow X to purchase their stock at a price equal to the proportionate share of the net fair market value of X's assets attributable to their block of X stock, subject to a minority discount. However, the Redemption Agreement establishes a minimum purchase price equal to the book value of the minority shareholders' stock as of the date the agreement is entered into.

II.A.2.i.vi. Post-Redemption or Post-Sale Price Adjustments

Relying on Reg. § 1.1361-1(*l*)(2)(iii)(A), Letter Ruling 201218004 allowed redemption proceeds to be adjusted such that the redeemed shareholders would receive additional payments if the corporation engages in certain sales transactions specified in the redemption agreement. Similarly, Letter Ruling 201309003 approved a clause allowing the value of a certain claim against a third party to benefit members who sold their interest if any recovery is made and

[283] Reg. § 1.1361-1(*l*)(2)(iii)(A) is reproduced in part II.A.2.i.iv Providing Equity-Type Incentives without Violating the Single Class of Stock Rules.

allows a person to purchase the S corporation's stock without requiring the selling original shareholder and purchaser to come to an agreement on the value of the claim.

II.A.2.i.vii. Adjustments in Code § 338(h)(10) Sales

Reg. § 1.1361-1(l)(2)(v), "Special rule for section 338(h)(10) elections," provides:

> If the shareholders of an S corporation sell their stock in a transaction for which an election is made under section 338(h)(10) and § 1.338(h)(10)-1, the receipt of varying amounts per share by the shareholders will not cause the S corporation to have more than one class of stock, provided that the varying amounts are determined in arm's length negotiations with the purchaser.

See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

II.A.2.i.viii. Special Price Protection for Leveraged ESOP Approved

Letter Ruling 201038001 involved the following regarding an ESOP:[284]

> On Date4, Company undertook a series of transactions that resulted in ESOP becoming the sole owner of Company's outstanding stock. First, Company made a loan, secured by Company stock, to ESOP (ESOP Loan). Next, ESOP used the ESOP Loan proceeds to purchase all of the remaining outstanding shares of Company stock (Second Purchase Shares).
>
> Among its provisions, ESOP provides generally that benefits are distributed to participants at stated periods of time following their termination of employment due to retirement, disability, death, or other reason. Provision A of ESOP provides generally that for purposes of distributions under the plan, the value of the shares held by ESOP is determined by an independent appraiser. The independent appraiser calculates the fair market value of ESOP's assets and reduces that value by any liabilities of ESOP, including the outstanding balance of the ESOP Loan.
>
> Provision B of ESOP provides a special valuation rule with respect to First Purchase Shares for purposes of distributions under the plan. Provision B provides that the value of Company shares purchased in connection with the First Purchase Shares will not be decreased or otherwise affected by the outstanding balance of the ESOP Loan proceeds used to purchase the Second Purchase Shares.
>
> Company represents that the purpose of Provision B is to protect the value of the First Purchase Shares from a steep decline in value that is normally associated with a highly leveraged employee stock ownership plan transaction. Company further represents that a serious employee relations problem would have occurred if a voluntary corporate action had the effect of reducing the value of First Purchase Shares already owned by ESOP. This would have negatively impacted employees who were close to retirement or who had previously terminated employment and were waiting for distributions. According to Company, First Purchase Shares continue to fluctuate in value with the fortunes of

[284] See part II.G.21 Employee Stock Ownership Plans (ESOPs) and Other Code § 401(a) Qualified Retirement Plans Investing in Businesses.

Company and general market conditions, as would occur in the absence of a leveraged employee stock ownership plan transaction.

Because the ESOP participants were employee-shareholders rather than investor shareholders, Reg. § 1.1361-1(*l*)(2)(iii)(B) caused Provision B to be disregarded in determining whether the outstanding shares of Company stock confer identical rights.

II.A.2.i.ix. Warrants Designed to Restore Original Shareholders' Equity Position

As described by a court:[285]

> During the late 1990s, the national accounting firm KPMG, LLP ("KPMG") developed a tax shelter product known as the S Corporation Charitable Contribution strategy ("SC2"). Pursuant to SC2, an S corporation's shareholders temporarily transfer most of the corporation's stock to a tax-exempt charitable entity via a "donation." Because an S corporation's annual income is "passed through" to its shareholders on a pro rata basis for purposes of calculating taxes, the effect of this transfer is to render most of the corporation's income tax-exempt. The "donated" shares to remain "parked" in the charity for a pre-determined period of time. During this period, the S corporation's income accumulates in the corporation; distributions are minimized or avoided. After the pre-determined period of time has elapsed, the charity sells the "donated" shares back to the original shareholders. Tax has been avoided for the period of time that the shares were "parked" in the charity, and the accumulated income of the S corporation may be distributed to the original shareholders either tax-free or at the favorable long-term capital gains rate.
>
> The original shareholders retain control over the S corporation by donating only non-voting stock while retaining all shares of voting stock. Moreover, to protect against the possibility that the donee charity might refuse to sell its majority stock back to the original shareholders after the agreed-upon length of time, warrants are issued to the original shareholders prior to the "donation." The warrants enable the original shareholders to purchase a large number of new shares in the corporation; if exercised, the warrants would dilute the stock held by the charity to such an extent that the original shareholders would end up owning approximately ninety percent of the outstanding shares. Thus the warrants allow the original shareholders to retain their equity interest in the corporation even though the charity nominally is the majority shareholder.

The court concluded that the warrants constituted a second class of stock:[286]

> The warrants obviously were designed to permit the Schott family to retain nominal ownership of approximately 90% of the corporation even though 90% of the actual shares had been "donated" to LAPF [a governmental pension fund]. If LAPF refused to sell the shares back, the Schotts could exercise the warrants, thereby diluting LAPF's 900 shares such that LAPF would go from owning ninety percent to approximately ten percent of the outstanding shares. Accordingly, it fairly may be said that the warrants "constitute equity," and were intended to prevent LAPF from enjoying the rights of distribution or liquidation that ordinarily would come with ownership of the majority of a successful company's shares. There is no evidence that the warrants were issued for

[285] *Santa Clara Valley Housing Group, Inc. v. U.S.*, 108 AFTR.2d 2011-6361 (N.D. CA 2012).
[286] Pursuant to Reg. § 1.1361-1(l)(4)(ii).

> any purpose other than to protect the Schott family's equity in Santa Clara for the period of time that the majority shares were "parked" in LAPF.

That tax shelter idea no longer works,[287] but the idea that one cannot retain too many strings on transferred stock remains an important point.[288]

II.A.2.i.x. Straight Debt

"Straight debt" does not constitute a second class of stock[289] (or as stock for purposes of subchapter S).[290] This rule applies notwithstanding part II.A.2.i.xi Debt.[291]

"Straight debt" means a written unconditional obligation, regardless of whether embodied in a formal note, to pay a sum certain on demand, or on a specified due date, if it:[292]

(A) Does not provide for an interest rate or payment dates that are contingent on profits, the borrower's discretion, the payment of dividends with respect to common stock, or similar factors;

(B) Is not convertible (directly or indirectly) into stock or any other equity interest of the S corporation; and

(C) Is held by an individual (other than a nonresident alien), an estate, or a trust described in section 1361(c)(2).

Code § 1361(c)(2) is described in part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation. Clause (C) above omits another type of creditor who qualifies under Code § 1361(c)(5)(B)(iii): "a person which is actively and regularly engaged in the business of lending money." The regulation quoted above was promulgated before the statute referred to commercial lenders; legislative history suggests that commercial lender qualification not include individuals who are commercial lenders.[293]

Being subordinated to other debt does not prevent the obligation from qualifying as straight debt.[294]

---

[287] See fn 4716 in part II.Q.6.d.ii UBTI Related to an S Corporation.
[288] See part II.Q.6.f.ii Forced Sale to Related Party for Note.
[289] Reg. § 1.1361-1(l)(5)(i).
[290] Reg. § 1.1361-1(b)(5) provides:

> *Treatment of straight debt*. For purposes of subchapter S, an instrument or obligation that satisfies the definition of straight debt in paragraph (*l*)(5) of this section is not treated as outstanding stock.

This is important for Reg. § 1.1361-1(*l*)(3), which is reproduced in fn 3715 in part II.M.4.e.i Issuing Stock to an Employee - Generally.
[291] Reg. § 1.1361-1(l)(5)(i).
[292] Reg. § 1.1361-1(l)(5)(i).
[293] House Report 104-586 (5/20/1996) for P.L. 104-188 (the Small Business Job Protection Act of 1996) expressed an intent that this cover "creditors, other than individuals, that are actively and regularly engaged in the business of lending money."
[294] Reg. § 1.1361-1(l)(5)(ii).

An obligation can lose its "straight debt" qualification by being materially modified or transferred to a third party who is not an eligible shareholder.[295]

Being "considered equity under general principles of Federal tax law"[296] does not disqualify the obligation from being straight debt under this rule.[297] Thus, interest on a straight debt obligation is generally treated as interest by the corporation and the recipient and does not constitute a distribution.[298] However, if the interest rate is unreasonably high, an appropriate portion of the interest may be recharacterized and treated as a payment that is not interest (without resulting in a second class of stock).[299]

Conversion from C corporation status to S corporation status is not treated as an exchange of debt for stock with respect to "straight debt" that is considered equity under general principles of Federal tax law.[300]

II.A.2.i.xi. Debt other than Straight Debt

Reg. § 1.1361-1(l)(2)(i) provides a safe harbor for a:

> commercial contractual agreement, such as a … loan agreement, … unless a principal purpose of the agreement is to circumvent the one class of stock requirement….

However, debt is treated as a second class of stock of the corporation if it constitutes equity or otherwise results in the holder being treated as the owner of stock under general principles of Federal tax law and a principal purpose of creating the debt is to circumvent the rights to distribution or liquidation proceeds conferred by the outstanding shares of stock or to circumvent the limitation on eligible shareholders.[301] This rule does not apply to unwritten advances from a shareholder that do not exceed $10,000 in the aggregate at any time during the taxable year of the corporation, are treated as debt by the parties, and are expected to be repaid within a reasonable time.[302] It also does not apply to obligations of the same class that are owned solely by the owners of, and in the same proportion as, the outstanding stock of the corporation, are not treated as a second class of stock.[303] Obligations that are considered equity that do not meet this safe harbor will not result in a second class of stock unless a principal purpose of the obligations is to circumvent the rights of the outstanding shares of stock or the limitation on eligible shareholders.[304]

A convertible debt instrument is considered a second class of stock if it (A) would be treated as a second class of stock under provisions relating to instruments, obligations, or arrangements treated as equity under general principles, or (B) embodies rights equivalent to those of a call option that would be treated as a second class of stock under provisions relating to certain call

[304] Reg. § 1.1361-1(l)(4)(ii)(B)(2).

options, warrants, and similar instruments.[305] Allowing for conversion of debt to equity using the stock's value at the time the debt instrument is issued is not a second class of stock under this rule.[306]

II.A.2.i.xii. Automatic Relief If Governing Provisions Violate Single Class of Stock Rule

Rev. Proc. 2022-19, § 2.03(1), "One class of stock requirement and governing provisions, including 'principal purpose' conditions," provides:

(a) *Overview*. Pursuant to § 1361(b)(1)(D) and § 1.1361-1(*l*)(1), a corporation that has more than one class of stock does not qualify as a small business corporation. Section 1.1361-1(*l*)(1) provides generally that a corporation is treated as having only one class of stock if all outstanding shares of stock confer identical rights to distribution and liquidation proceeds.

(b) *Governing provisions*. Section 1.1361-1(*l*)(2)(i) provides that the determination of whether all outstanding shares of stock confer identical rights to distribution and liquidation proceeds is made based on the corporate charter, articles of incorporation, bylaws, applicable State law, and binding agreements relating to distribution and liquidation proceeds (collectively, governing provisions). A commercial contractual agreement is not a binding agreement relating to distribution and liquidation proceeds, and therefore is not a governing provision, unless a principal purpose of the agreement is to circumvent the one class of stock requirement. See § 1.1361-1(*l*)(2)(i).

(c) *Other agreements and arrangements*. The Income Tax Regulations identify a number of other agreements and arrangements between or among an S corporation and its shareholders that may or may not be treated as second classes of stock depending in part on whether a principal purpose of the agreement or arrangement was to circumvent the one class of stock requirement or otherwise alter shareholders' rights to distribution and liquidation proceeds. See § 1.1361-1(l)(2)(iii)(A) (buy-sell agreements among shareholders, agreements restricting the transferability of stock, and redemption agreements), § 1.1361-1(l)(4)(ii)(A) (special rules for instruments, obligations, or arrangements treated as equity under general principles of Federal tax law), § 1.1361-1(l)(4)(ii)(B)(1) (short-term unwritten advances that fail the safe harbor described in § 1.1361-1(l)(4)(ii)(B)(1)), and § 1.1361-1(l)(4)(ii)(B)(2) (obligations of the same class that are considered equity under general principles of Federal tax law but fail the safe harbor described in § 1.1361-1(l)(4)(ii)(B)(2)). See section 3.01 of this revenue procedure (providing that the IRS will not treat taxpayers who have entered into the agreements or arrangements described in this section 2.03(1)(c) as violating the one class of stock requirement of § 1361(b)(1)(D) so long as there was no principal purpose to use the agreement or arrangement as a means to circumvent the one class of stock requirement).

Rev. Proc. 2022-19, § 3.01, "Agreements and Arrangements with No Principal Purpose to Circumvent One Class of Stock Requirement," provides:

---

[305] Reg. § 1.1361-1(l)(4)(iv).
[306] Letter Ruling 201326012.

> Certain agreements and arrangements described in section 2.03(1)(c) of this revenue procedure are not governing provisions and are not treated as second classes of stock so long as there was no principal purpose to use the agreement as a means to circumvent the one class of stock requirement. Accordingly, the IRS will not treat an S corporation as violating the one class of stock requirement of § 1361(b)(1)(D) as a result of an agreement or arrangement identified in section 2.03(1)(c) of this revenue procedure that does not have a principal purpose to circumvent the one class of stock requirement. Because entering into these specific agreements in these circumstances will not result in termination of S corporation status, taxpayers do not need to seek relief from the IRS. For this reason, and because the existence of a principal purpose is inherently factual in nature, the IRS will not rule in these situations. See section 4.01(1) of this revenue procedure.

Suppose one is concerned whether an agreement described above might constitutes a "governing provision." Presumably, not satisfying the principal purpose test would make such an agreement constitute a "governing provision," which would violate the single class of stock requirement as non-identical governing provision. Consider terminating the concerning arrangement and obtaining the relief provided below.

Rev. Proc. 2022-19, § 2.03(6), "Non-identical governing provisions," provides:

> (a) *Overview*. Section 1361(b)(1)(D) requires an S corporation to have only one class of stock. Section 1.1361-1(*l*) provides that a corporation is treated as having only one class of stock if all outstanding shares of the corporation's stock confer identical rights to distribution and liquidation proceeds and if the corporation has not issued any instrument or obligation, or entered into any arrangement, that is treated as a second class of stock. An S corporation in compliance with § 1.1361-1(*l*) is commonly referred to as having "identical governing provisions." The term "non-identical governing provision" means a governing provision, as defined by § 1.1361-1(*l*)(2)(i), on its own or as part of another governing provision, that for Federal income tax purposes results in the S corporation having more than one class of stock under § 1.1361-1(*l*)(1) (even if the S corporation never made a non-pro rata distribution or liquidating distribution).
>
> (b) *Consequences of non-identical governing provisions*. If an entity files an S election when it has more than a single class of stock, the entity does not meet the requirements to be an S corporation and its attempted election is invalid. See § 1361(a)(1). If a valid S corporation later provides for more than a single class of stock, its S election automatically terminates on the day the disqualifying event occurs. See § 1362(d)(2). See section 3.06 of this revenue procedure (providing procedures for correcting, without the receipt of a PLR, the validity or continuation of an S election with regard to one or more non identical governing provisions, as defined in section 2.03(6)(a) of this revenue procedure).

Rev. Proc. 2022-19, § 3.06, "Procedures for Retroactively Correcting One or More Non-Identical Governing Provisions," provides:

> (1) *Definitions*. For purposes of this section 3.06:

a Applicable shareholder. The term “applicable shareholder” means a current or former shareholder of a corporation who owns or owned stock of the corporation at any time during the period:

(i) Beginning on the date on which the non-identical governing provision was adopted (on its own or as part of another governing provision); and

(ii) Ending on the date on which the non-identical governing provision was removed or modified in a manner such that the governing provision complies with the one class of stock requirement.

(b) *Discovered by the IRS*. The term “discovered by the IRS” has the meaning given the term in § 301.9100-3(b)(1)(i) of the Procedure and Administration Regulations (26 CFR part 301).

(c) *Disproportionate distribution*. The term “disproportionate distribution” is defined in section 2.03(2) of this revenue procedure.

(d) *Non-identical governing provision*. The term “non-identical governing provision” is defined in section 2.03(6)(a) of this revenue procedure.

(2) *Retroactive corrective relief procedures*.

(a) *Retroactive continuing validity of S election*. If an S corporation and its applicable shareholders meet the requirements of this section 3.06, an S election that is invalid or terminated solely as the result of one or more non-identical governing provisions will be treated for Federal income tax purposes as continuing from the date on which the first non-identical governing provision that invalidated or terminated the corporation’s S election was adopted.

(b) *Eligibility*. A small business corporation and each applicable shareholder of the corporation are eligible for corrective relief under this section 3.06 if the following requirements are satisfied:

(i) The corporation has or had one or more non-identical governing provisions;

(ii) The corporation has not made, and for Federal income tax purposes is not deemed to have made, a disproportionate distribution to an applicable shareholder;

(iii) The corporation timely filed a return on Form 1120-S (as required under § 6037 of the Code and § 1.6037-1 of the Income Tax Regulations) for each taxable year of the corporation beginning with the taxable year in which the first non-identical governing provision was adopted and through the taxable year immediately preceding the taxable year in which the corporation made a request for corrective relief under this section 3.06 (a corporation is treated as having timely filed a required Form 1120-S under this section 3.06(2)(b)(iii) if the Form 1120-S is filed within six months after its original due date, excluding extensions); and

(iv) Before any non-identical governing provision is discovered by the IRS, all of the requirements described in section 3.06(2)(c) of this revenue procedure are satisfied.

(c) *Corrective relief statements*.

(i) *Corporate governing provision and shareholder statements*. The corporation must complete a Corporate Governing Provision Statement in accordance with section 3.06(2)(c)(ii) of this revenue procedure and a Shareholder Statement signed by each applicable shareholder in accordance with section 3.06(2)(c)(iii) of this revenue procedure.

(ii) *Corporate Governing Provision Statement*. The Corporate Governing Provision Statement, a sample of which is provided in Appendix A, must be completed in accordance with this section 3.06(2)(c)(ii).

(A) *Designation*. The Corporate Governing Provision Statement must state at the top of the document: "CORPORATE GOVERNING PROVISION STATEMENT PURSUANT TO REV. PROC. 2022-19, SECTION 3.06(2)(c)(ii)" .

(B) *Information*. The Corporate Governing Provision Statement must provide the following information:

(1) The date of the Corporate Governing Provision Statement, the corporation's name, employment identification number (EIN), address, date of formation or incorporation, and State of formation or incorporation;

(2) The actual or intended effective date of the corporation's S election filed on Form 2553 (see Form 2553, Part I, line E) that is the subject of the request for corrective relief under this section 3.06;

(3) The name, address, and social security number or taxpayer identification number of each applicable shareholder; and

(4) To establish an inadvertent termination or invalidation of the S election of the corporation, a description of all relevant facts regarding why each non-identical governing provision was adopted, how each non identical governing provision was discovered, and each action taken to correct or remove each non-identical governing provision before any non-identical governing provision is discovered by the IRS. This description must include each action taken by the corporation and each applicable shareholder to establish that the corporation and each applicable shareholder acted reasonably and in good faith in correcting or removing each non-identical governing provision upon discovery to demonstrate reasonable cause for relief.

(C) *Representations*. Except as provided in section 3.06(2)(c)(ii)(D), the corporation must provide the following four representations:

(1) “The corporation’s S election was inadvertently invalid or terminated solely because of the adoption of one or more non-identical governing provisions.” ;

(2) “The corporation and each applicable shareholder satisfy all of the requirements set forth in section 3.06 of Rev. Proc. 2022-19.”;

(3) “The corporation responds in the negative to each requested statement set forth in section 7.01(4) or (5) of Rev. Proc. 2022-1, or any successor revenue procedure (statements regarding whether the same or a similar issue was previously ruled on or whether a request involving the same or a similar issue was submitted or is currently pending).”; and

(4) “The corporation and each applicable shareholder acted reasonably and in good faith in correcting or removing each non-identical governing provision upon discovery.”

(D) *Explanation regarding previously ruled on, submitted, or pending PLRs*. If the corporation cannot respond in the negative to any requested statement set forth in section 7.01(4) or (5) of Rev. Proc. 2022 1, or any successor revenue procedure (and therefore cannot make the representation described in section 3.06(2)(c)(ii)(C)(3) of this revenue procedure), the corporation must provide an explanation for each such response as part of the description of all relevant facts required by section 3.06(2)(c)(ii)(B)(4) of this revenue procedure.

(E) *Statements*. The corporation must provide the statements set forth in section 3.06(2)(c)(ii)(E)(1) through (3) of this revenue procedure:

(1) “The corporation acknowledges that the relief provided by section 3.06 of Rev. Proc. 2022-19 is limited solely to each non-identical governing provision described in this Corporate Governing Provision Statement.” ;

(2) “The corporation acknowledges that the relief provided by section 3.06 of Rev. Proc. 2022-19 is based solely on the information, representations, and other statements provided by the corporation pursuant to section 3.06 of Rev. Proc. 2022-19, each of which is subject to verification during IRS examination.” ; and

(3) “During the period between the date on which the non-identical governing became effective and the date on which all of the procedures described in section 3.06 of Rev. Proc. 2022-19 are completed, each applicable shareholder has reported their income on all affected returns consistent with the S corporation election for the taxable year the non-identical governing provision became effective and for all subsequent years for which each applicable shareholder owned shares of the corporation.”.

(F) *Signature*. The Corporate Governing Provision Statement must be signed under penalties of perjury by a person authorized to sign the corporation's Federal income tax return under § 6062 of the Code. The penalties of perjury statement must be provided in the following format: " Under penalties of perjury, I declare that I have examined this Corporate Governing Provision Statement for corrective relief for one or more non-identical governing provisions, as provided by Rev. Proc. 2022-19, section 3.06, including accompanying documents, and, to the best of my knowledge and belief, the request contains all the relevant facts, and such facts are true, correct, and complete."

(iii) *Shareholder Statement*. The Shareholder Statement, a sample of which is provided in Appendix B, must be completed in accordance with this section 3.06(2)(c)(iii).

(A) *Designation*. The Shareholder Statement must state at the top of the document: "SHAREHOLDER STATEMENT PURSUANT TO REV. PROC. 2022-19, SECTION 3.06(2)(c)(iii)".

(B) *Information*. The Shareholder Statement must provide:

(1) The date of the Shareholder Statement, the corporation's name, EIN, address, date of formation or incorporation, and State of formation or incorporation;

(2) The name and address of each applicable shareholder;

(3) The social security number or taxpayer identification number of each applicable shareholder;

(4) The number of shares of stock or, in the case of a limited liability company, percentage of ownership each applicable shareholder owns or owned and the date(s) the stock was acquired and, if applicable, transferred; and

(5) The date that each applicable shareholder provided their signature, as required by section 3.06(2)(c)(iii)(D) of this revenue procedure.

(C) *Statement of consent*. Each applicable shareholder must provide the following statement of consent: "Under penalties of perjury, I declare that I consent to the election of [insert corporation's name], referred to herein as "the Corporation," located at [insert the Corporation's address], whose employment identification number (EIN) is [insert the Corporation's EIN], to be an S corporation under § 1362(a)(1) of the Code. I have examined this consent statement, including accompanying documents, and, to the best of my knowledge and belief, the request for corrective relief contains all the relevant facts, and such facts are true, correct, and complete. I understand that my consent is binding and may not be withdrawn after the Corporation receives relief pursuant to Rev. Proc. 2022-19, section 3.06. I also declare under penalties of perjury that I have reported my income on all affected returns consistent with the Corporation's election to be an S corporation for the taxable year for which the election would have been in effect but for the non-identical governing provision(s) described in the Corporate Governing Provision Statement for corrective relief and for all subsequent years I have owned shares of the Corporation."

(D) *Signature*. The Shareholder Statement must be signed under penalties of perjury by each applicable shareholder.

(d) *Record retention* requirement. The corporation is required to retain the Corporate Governing Provision Statement, the Shareholder Statement(s), and the revised governing provisions in accordance with § 6001 of the Code and the Income Tax Regulations thereunder. The Corporate Governing Provision Statement, the Shareholder Statement(s), and the revised governing provisions must be retained by the corporation for inspection by authorized Internal Revenue officers or employees, and must be retained so long as the contents thereof may become material in the administration of any provision of the Code or the Income Tax Regulations. See § 1.6001-1(e).

(e) *Alternative relief*.

(i) *General rule*. An S corporation or applicable shareholder that does not qualify for corrective relief under this section 3.06 may seek corrective relief through a request submitted by the S corporation, applicable shareholder, or authorized representative (as appropriate) to the Associate Chief Counsel (Passthroughs and Special Industries) for a PLR. The request must provide the required explanation described in section 3.06(2)(e)(ii) of this revenue procedure. See generally Rev. Proc. 2022-1 (or any successor revenue procedure).

(ii) *Required explanation*. A request for a PLR by an S corporation or applicable shareholder, or authorized representative, under section 3.06(2)(e)(i) of this revenue procedure must include an explanation regarding each reason why the requirements for corrective relief under this section 3.06 could not be satisfied.

II.A.2.i.xiii. Automatic Relief If Disproportionate Distributions Violate Single Class of Stock Rule

The discussion below follows up on parts II.A.2.i.ii Temporary Timing Differences; Other Varying Differences and II.A.2.i.iii Disproportionate Distributions (Not Temporary).

Rev. Proc. 2022-19, § 2.03(2), "Disproportionate distributions," provides:

> A "disproportionate distribution" is any distribution (including an actual distribution, a constructive distribution, or a deemed distribution) of property by a corporation with respect to shares of its stock that differs in timing or amount from the distribution with respect to any other shares of its stock. See § 1.1361 1(l)(1) and (2). Section 1.1361 1(l)(2)(i) provides that, "[a]lthough a corporation is not treated as having more than one class of stock so long as the governing provisions provide for identical distribution and liquidation rights, any distributions (including actual, constructive, or deemed

> distributions) that differ in timing or amount are to be given appropriate tax effect in accordance with the facts and circumstances." Despite this regulation providing that "a corporation is not treated as having more than one class of stock so long as the governing provisions provide for identical distribution and liquidation rights," taxpayers and practitioners have indicated concern with the language of § 1.1361-1(*l*)(2)(i). The articulated concern is that the word "although" in combination with the subsequent language requiring that certain disproportionate distributions "be given appropriate tax effect" creates uncertainty as to whether an S corporation has created a second class of stock – even though the governing provisions provide identical distribution and liquidation rights with respect to each share. Practitioners suggest that the language in § 1.1361-1(*l*)(2)(i) could be clarified by removing the word "[a]lthough" and point to inconsistency in PLRs in the treatment of disproportionate distributions. See section 3.02 of this revenue procedure (providing that the IRS will not treat any disproportionate distributions by a corporation as violating the one class of stock requirement of § 1361(b)(1)(D) so long as the corporation's governing provisions provide for identical distribution and liquidation rights).

Rev. Proc. 2022-19, § 3.02, "Governing Provisions That Provide for Identical Distribution and Liquidation Rights," provides:

> As outlined in section 2.03(2) of this revenue procedure, § 1.1361-1(*l*)(2)(i) provides that a corporation is not treated as having more than one class of stock so long as the governing provisions provide for identical distribution and liquidation rights. Accordingly, the IRS will not treat any disproportionate distributions made by a corporation as violating the one class of stock requirement of § 1361(b)(1)(D) so long as the governing provisions of the corporation provide for identical distribution and liquidation rights. Because disproportionate distributions made in these circumstances will not result in the termination of S corporation status, taxpayers do not need to seek relief from the IRS and the IRS will not rule in these situations. See section 4.01(2)(a) of this revenue procedure.

II.A.2.j. Overcoming Above Rules

II.A.2.j.i. Using a Partnership to Avoid S Corporation Limitations on Identity or Number of Owners or to Permit Non-Pro Rata Equity Interests

The S corporation can contribute its assets to an entity taxed as a partnership with an ineligible shareholder as a member,[307] with another S corporation as a member (to avoid the limitation on

[307] Reg. § 1.701-2(d), Example (2).

number of shareholders),[308] with profits interests issued to (former) employees,[309] or with an investor who wants a non-pro rata equity interest in the business.

II.A.2.j.ii. Disregarding Transitory Owners

In corporate reorganizations, sometimes transitory entities are created, or transitory stock ownership occurs, to achieve some state law objective. For example:[310]

> …the creation of Y followed by the merger of Y into X with A exchanging X stock for Y stock, with the minority shareholders receiving cash and the conversion of the Y stock into X stock is disregarded for Federal income tax purposes. Rev. Rul. 73-427. The transaction is treated as if A never transferred any X stock, with the net effect that the minority shareholders of X received cash in exchange for their stock. Such cash is treated as received by the minority shareholders as distributions in redemption of their X stock subject to the provisions and limitations of section 302 of the Code.

If a corporation owns stock in an S corporation that is undergoing such a transaction so that the ownership is transitory, the transaction's being disregarded also means that the transitory stock ownership does not terminate the S corporation's S election.[311]

For disregarding transitory partnerships that own S corporation stock, see part II.A.2.f Shareholders Eligible to Hold S Corporation Stock, especially fn. 151.

II.A.2.k. Terminating an S Election

For the effects of terminating an S election, see part II.P.3.d Conversion from S Corporation to C Corporation.

---

[308] Rev. Rul. 94-43, which Letter Ruling 201544020 cited as authority for holding that the following did not cause a violation of the 100-shareholder limit:

> X was incorporated under State law on D1 and elected to be treated as an S corporation effective D2. Y and Z were both incorporated under State law on D3 and elected to be treated as S corporations effective D3. X currently has close to 100 shareholders.
>
> The shareholders of X plan to restructure its business by undertaking several steps, the result of which is that X will become a general partnership under State law, and Y and Z together will own all of the interests in X (the "Restructuring"). The shareholders of X will become shareholders in either Y or Z, and Y and Z will be governed by identical boards of directors pursuant to a voting agreement entered into by their shareholders. Following the Restructuring, the parties anticipate that both Y and Z will issue additional shares to new shareholders over time, so that the total number of shareholders in Y and Z together may exceed 100. However, neither Y nor Z will separately have more than 100 shareholders.

It is unclear whether whatever steps they took to have the shareholders divide their shares into two companies were nontaxable; see part II.Q.7.f Corporate Division. Generally, I would have envisioned the old corporation contributing its assets to a partnership and new shareholders forming a new corporation that contributed cash to the partnership, which generally would have been nontaxable under part II.M.3 Buying into or Forming a Partnership. Perhaps one or more shareholders in X wanted to sell the shareholder's shares to multiple unrelated parties.

[309] For profits interests, see part II.M.4.f Issuing a Profits Interest to a Service Provider.

[310] Rev. Rul. 78-250.

[311] Letter Ruling 201330018. See also Letter Ruling 201314031 (transitory ownership in a split-off). For a discussion of F reorganizations, see part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization, especially fn. 4078.

Code § 1362(d) terminates an S election if:

(1) Shareholders holding more than one-half of the shares consent to the revocation.[312] Generally, instead of revoking the S election, consider reorganizing the entity into an S corporation parent with a C corporation subsidiary.[313]

(2) The corporation ceases to be eligible.[314]

(3) The corporation has prior C corporation earnings and profits at the close of each of three consecutive taxable years and has gross receipts for each of such taxable years more than 25% of which are passive investment income.[315]

Do the tax benefits of an S election constitute an asset of the corporation, so that a corporate bankruptcy places a "stay" that prevents shareholders from revoking the S election? A 2017

[312] Code § 1362(d)(1)(B). Reg. § 1.1362-6(a)(3), "Revocation of S election," provides:

(i) *Manner of revoking election*. To revoke an election, the corporation files a statement that the corporation revokes the election made under section 1362(a). The statement must be filed with the service center where the election was properly filed. The revocation statement must include the number of shares of stock (including non-voting stock) issued and outstanding at the time the revocation is made. A revocation may be made only with the consent of shareholders who, at the time the revocation is made, hold more than one-half of the number of issued and outstanding shares of stock (including non-voting stock) of the corporation. Each shareholder who consents to the revocation must consent in the manner required under paragraph (b) of this section. In addition, each consent should indicate the number of issued and outstanding shares of stock (including non-voting stock) held by each shareholder at the time of the revocation.

(ii) *Time of revoking election*. For rules concerning when a revocation is effective, see § 1.1362-2(a)(2).

(iii) *Examples*. The principles of this paragraph (a)(3) are illustrated by the following examples:

Example (1). *Revocation; consent of shareholders owning more than one-half of issued and outstanding shares*. A calendar year S corporation has issued and outstanding 40,000 shares of class A voting common stock and 20,000 shares of class B non-voting common stock. The corporation wishes to revoke its election of subchapter S status. Shareholders owning 11,000 shares of class A stock sign revocation consents. Shareholders owning 20,000 shares of class B stock sign revocation consents. The corporation has obtained the required shareholder consent to revoke its subchapter S election because shareholders owning more than one-half of the total number of issued and outstanding shares of stock of the corporation consented to the revocation.

Example (2). *Effective prospective revocation*. In June 1993, a calendar year S corporation determines that it will revoke its subchapter S election effective August 1, 1993. To do so it must file its revocation statement with consents attached on or before August 1, 1993, and the statement must indicate that the revocation is intended to be effective August 1, 1993.

[313] That structure can be superior for the reasons described in fns 3977-3985 in part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation.

[314] Code § 1362(b)(2).

[315] Code § 1362(b)(3). See part II.P.3.b.iii Excess Passive Investment Income.

case said that bankruptcy does not place such a stay,[316] after citing mixed authority that tended to the opposite conclusion.[317]

If an S election has been terminated under Code § 1362(d), the corporation may not make another S election under before its fifth taxable year which begins after the first taxable year for which such termination is effective, unless the IRS consents to such election.[318] In the case of a voluntary termination, presumably this waiting period can be avoided as described in fn 313.

If an S corporation intentionally permits an ineligible shareholder because a third party prevented it from making tax distributions, the IRS will not consent to making the S election again until this waiting period has run.[319]

On the other hand, when eligible shareholders sold stock to ineligible shareholders without anyone intending to terminate the S election, the IRS consented to waiving the waiting period.[320] But when the sole shareholder sold all of the stock in the S corporation to an ineligible shareholder, the IRS denied the waiver.[321]

---

[316] *In re Health Diagnostic Laboratory, Inc.*, 578 B.R. 552 (Bankr. E.D. Va. 2017) held:

> After weighing all the factors, this Court will adopt the holding of the Court of Appeals for the Third Circuit that S corporation status is not property under federal tax law. See *In re Majestic Star Casino, LLC*, 716 F.3d 736 (3d Cir. 2013) (concluding that S corporation status was not "property" under the Bankruptcy Code and sharply disagreeing with In re Trans-Line West and the cases that followed). Although a corporation and its shareholders can elect to use S corporation status in order to avoid double taxation, that factor alone is not enough to outweigh all the remaining characteristics essential to qualify tax status as a property right. Accordingly, this Court holds that S corporation status is not "property" under federal tax law, and thus cannot be considered "property" for the purposes of sections 544(b) and 548(a)(1) of the Bankruptcy Code.

[317] *In re Health Diagnostic Laboratory, Inc.*, 578 B.R. 552 (Bankr. E.D. Va. 2017) summarized prior cases before going into details about their reasoning and why the court concluded as it did:

> The issue whether S corporation status constitutes property of the estate in bankruptcy is a matter of first impression within the Fourth Circuit. Only a handful of courts outside the Fourth Circuit have considered this issue in the context of fraudulent transfers. See *Majestic Star Casino, LLC v. Barden Dev., Inc.* (*In re Majestic Star Casino, LLC*), 716 F.3d 736 (3d Cir. 2013); *Halverson v. Funaro* (*In re Frank Funaro, Inc.*), 263 B.R. 892 (B.A.P. 8th Cir. 2001); *Parker v. Saunders* (*In re Bakersfield Westar*), 226 B.R. 227 (B.A.P. 9th Cir. 1998); *Hanrahan v. Walterman* (*In re Walterman Implement, Inc.*), No. 05-07284, 2006 WL 1562401 (Bankr. N.D. Iowa May 22, 2006); *Guinn v. Lines* (*In re Trans-Line West, Inc.*), 203 B.R. 653 (Bankr. E.D. Tenn. 1996). Of these courts, only the Court of Appeals for the Third Circuit has concluded that S corporation status does not constitute a property right in bankruptcy. See *In re Majestic Star Casino*, 716 F.3d at 758; see also *Official Comm. Unsecured Creditors v. Forman* (*In re Forman Enterprises, Inc.*), 281 B.R. 600, 612 (Bankr. W.D. Pa. 2002) ("[W]e are reluctant to believe that a post-bankruptcy revocation of S status could, under the tax laws of the United States, be utilized to undo previously executed acts. Humpty Dumpty could not be restructured using this scenario."). All of the other courts that have addressed the issue have found S corporation status to be a property right in bankruptcy. See *In re Frank Funaro, Inc.*, 263 B.R. at 898; *In re Bakersfield Westar*, 226 B.R. at 234; *In re Walterman Implement, Inc.*, 2006 WL 1562401 at *3; *In re Trans-Line West, Inc.*, 203 B.R. at 662.

[318] Code § 1362(g).

[320] Letter Ruling 201550022.

[321] Letter Ruling 201636033.

The entire day on which the election terminates is treated as the first day of the C corporation year.[322]

A Code § 1362(d) termination generates a pro-rata, per-share, per-day allocation,[323] except that an accounting cut-off applies:

- To the extent that the corporation is deemed to have sold its assets under Code § 338 (see, *e.g.*, part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold),[324] or

- If the shareholders elect to use an accounting cut-off.[325]

[322] Code § 1362(e)(1), "In general," provides:

In the case of an S termination year, for purposes of this title -

(A) *S short year*. The portion of such year ending before the 1st day for which the termination is effective shall be treated as a short taxable year for which the corporation is an S corporation.

(B) *C short year*. The portion of such year beginning on such 1st day shall be treated as a short taxable year for which the corporation is a C corporation.

[323] Code § 1362(e)(2).

[324] Code § 1362(e)(6)(C); Reg. § 1.1362-3(b)(2).

[325] Reg. § 1.1362-3(b)(1).

II.B. Limited Liability Company (LLC)

A limited liability company (LLC) is a business entity[326] that generally has liability protection similar to that of a corporation. However, for federal tax purposes,[327] an LLC is treated as follows[328] (with specific rules for series LLCs):[329]

---

[326] Reg. § 301.7701-2(a) provides:

> For purposes of this section and § 301.7701-3, a business entity is any entity recognized for federal tax purposes (including an entity with a single owner that may be disregarded as an entity separate from its owner under § 301.7701-3) that is not properly classified as a trust under § 301.7701-4 or otherwise subject to special treatment under the Internal Revenue Code.

[327] For some examples of federal civil procedure and state real estate transfer tax issues involving single-member LLCs, see Kleinberger and Bishop, "The Single-Member Limited Liability Company as Disregarded Entity: Now You See It, Now You Don't," *Business Law Today* (8/2/2010), found at http://www.abanet.org/buslaw/blt/content/articles/2010/08/0002.html. For creditor issues, see part II.F Asset Protection Planning.

[328] TD 8697 (12/17/1996) explains:

> Any business entity that is not required to be treated as a corporation for federal tax purposes (referred to in the regulation as an eligible entity) may choose its classification under the rules of § 301.7701-3. Those rules provide that an eligible entity with at least two members can be classified as either a partnership or an association, and that an eligible entity with a single member can be classified as an association or can be disregarded as an entity separate from its owner. However, if the single owner of a business entity is a bank (as defined in section 581), then the special rules applicable to banks will continue to apply to the single owner as if the wholly owned entity were a separate entity.
>
> In order to provide most eligible entities with the classification they would choose without requiring them to file an election, the regulations provide default classification rules that aim to match taxpayers' expectations (and thus reduce the number of elections that will be needed). The regulations adopt a passthrough default for domestic entities, under which a newly formed eligible entity will be classified as a partnership if it has at least two members, or will be disregarded as an entity separate from its owner if it has a single owner. The default for foreign entities is based on whether the members have limited liability. Thus a foreign eligible entity will be classified as an association if all members have limited liability. A foreign eligible entity will be classified as a partnership if it has two or more members and at least one member does not have limited liability; the entity will be disregarded as an entity separate from its owner if it has a single owner and that owner does not have limited liability. Finally, the default classification for an existing entity is the classification that the entity claimed immediately prior to the effective date of these regulations. An entity's default classification continues until the entity elects to change its classification by means of an affirmative election.

[329] REG-119921-09 (9/14/2010) proposes regulations recognizing series as separate entities. Prop. Reg. § 301.7701-1(a)(5)(x), Example (1) provides (emphasis added):

> Domestic Series LLC. (i) Facts. Series LLC is a series organization (within the meaning of paragraph (a)(5)(viii)(A) of this section). Series LLC has three members (1, 2, and 3). Series LLC establishes two series (A and B) pursuant to the LLC statute of state Y, a series statute within the meaning of paragraph (a)(5)(viii)(B) of this section. Under general tax principles, Members 1 and 2 are the owners of Series A, and Member 3 is the owner of Series B. **Series A and B** are not described in § 301.7701-2(b) or paragraph (a)(3) of this section and **are not trusts within the meaning of § 301.7701-4**.
>
> (ii) Analysis. Under paragraph (a)(5)(i) of this section, Series A and Series B are each treated as an entity formed under local law. The classification of Series A and Series B is determined under paragraph (b) of this section. The default classification under §301.7701-3 of Series A is a partnership and of Series B is a disregarded entity.

- **Disregarded Entity**. If it has only one member (owner),[330] it is disregarded for federal tax purposes unless it elects otherwise.[331] If the sole member sells the LLC, the sole member is deemed to have sold the LLC's assets;[332] thus, generally, the owner of the LLC is deemed to directly own the LLC's assets for income tax purposes.[333] If a charity is the sole owner of

---

The language emphasized above implies that a series LLC might establish an entity that is taxed as a trust. I know someone who talked with the person who did substantially all of the work in drafting the proposed regulation. The person who did that drafting confirmed my reading of the above language and stated that this inference was not intended. Hopefully this will be clarified in the final regulations.

[330] An entity is treated as a disregarded entity if it has two owners for state law purposes that are considered to be the same entity for tax purposes. Rev. Rul. 2004-77, interpreting Reg. § 301.7701-2(c)(2); see also Letter Rulings 201349001 and 200102037, as well as the authority in fn. 147 (disregarded entity with more than one owner is not an ineligible shareholder of an S corporation by reason of having more than one state law owner).

Reg. § 1.6031(a)-1(d)(1) provides that, for purposes of the partnership filing requirements, a partnership is defined in Reg. § 1.761-1(a). Reg. § 1.761-1(a) refers to the entity classification rules under Reg. §§ 301.7701-1, 301.7701-2, and 301.7701-3. Thus, Rev. Rul. 2004-77 determines whether a partnership income tax return is appropriate for the LLC.

What are the consequences if an entity that Rev. Rul. 2004-77 deems disregarded files partnership tax returns? Although I am unaware of any penalties for doing so, I am concerned about how the IRS might treat elections that have particular deadlines and are made on such a return rather than on the true owner's tax return. I am also concerned that taxpayers might not think to consider issues relevant to partnership formation when the owners are no longer treated as the same taxpayer, such as when a grantor trust loses its grantor trust status.

[331] Reg. § 301.7701-3(b)(1)(ii), which provides that such an entity is "Disregarded as an entity separate from its owner if it has a single owner," was upheld as valid by *Littriello v. United States*, 99 A.F.T.R.2d 2007-2210 (6th Cir. 2007), and *McNamee v. Dept. of Treasury*, 99 AFTR.2d 2007-2871 (2nd Cir. 2007). Cancellation of a disregarded single member LLC's debt is taxable to its deemed owner. *Jacobowitz v. Commissioner*, T.C. Memo. 2023-107. See part II.G.31.b Debt Forgiveness.

Reg. § 301.7701-2(a) provides:

> A business entity with only one owner is classified as a corporation or is disregarded; if the entity is disregarded, its activities are treated in the same manner as a sole proprietorship, branch, or division of the owner. But see paragraphs (c)(2)(iii) through (vi) of this section for special rules that apply to an eligible entity that is otherwise disregarded as an entity separate from its owner.

Because an entity may use a different accounting method for each separate trade or business, a single member LLC that is a disregarded entity may use a different accounting method than its parent if the single member LLC engages in a separate trade or business. CCA 201430013, applying Code § 446(d). See fn 813 in part II.E.1.c.iii.(b) Multiple Trades or Businesses Within an Entity – Identification of Businesses and Allocation of Items.

[332] See part II.P.3.f Conversions from Partnership to Sole Proprietorships and Vice Versa, fns. 4033-4034. However, the parties can avoid this result; see fns. 4035-4038.

[333] AM 2012-001 reasoned:

> Rev. Rul. 99-5 does not ever mention a taxpayer's outside basis in his disregarded entity interest, because the owner of a disregarded entity has no outside basis in the entity for federal tax purposes. Therefore, outside basis has no relevance to a taxpayer's disposition of his interest in a disregarded entity.
>
> Likewise, a disregarded entity cannot make distributions in a manner where the federal income tax consequences would turn on the member's nonexistent outside basis. Section 301.7701-2(a) provides that if the entity is disregarded, its activities are treated in the same manner as a sole proprietorship, branch, or division of the owner. For federal tax purposes, the member already owns all of the disregarded entity's property. Therefore, while a preferred interest in an eligible entity may entitle the owner of the preferred interest to preferential distribution or liquidation rights under state law, such preferences have no meaning for federal tax purposes while the same taxpayer owns one-hundred percent of all classes of interests.

an LLC, then contributions to the LLC are deductible.[334] An S corporation that has a Qualified Subchapter S Subsidiary should convert the subsidiary to a single member LLC if the conversion is not more trouble than it's worth.[335] Ordinarily, a disregarded entity uses its owner's taxpayer ID.[336] However, if it has employees (other than the owner), the LLC has the same employment filing requirements as a corporation,[337] but that separate status has no effect on the fact that the entity is disregarded in determining self-employment income[338] or its employees' eligibility for the employer's benefit plans.[339] It is also treated as a separate taxpayer for purposes of certain excise taxes[340] and for certain other purposes as well.[341] However, in valuing the transfer of an interest in a single-member LLC, the interest in the LLC – and not just the LLC's assets themselves – must be valued[342] before applying

---

A grantor's payment of rent to an LLC wholly owned by a trust deemed owned by the grantor for income tax purposes is disregarded for income tax purposes. Letter Ruling 200102037.

334 Notice 2012-52, expanding the scope of Ann. 99-102. The Notice requested the charity owning the LLC "to disclose, in the acknowledgment or another statement, that the SMLLC is wholly owned by the U.S. charity and treated by the U.S. charity as a disregarded entity." This Notice cleared up longstanding concern. See Vishnepolskaya, "Deductibility of Gifts to Domestic, Single-Member LLCs as Contributions 'to the Charity' Under Recent Guidance," *The Exempt Organization Tax Review*, vol. 69, no. 2, at 135-147 (Feb. 2012). Ann. 99-102 provides that "an owner that is exempt from taxation under section 501(a) of the Internal Revenue Code must include, as its own, information pertaining to the finances and operations of a disregarded entity in its annual information return." Also note that IRS Information Letter 2010-0052, which described itself as "a well-established interpretation or principle of tax law" but also as a document that cannot be relied on the way a Revenue Ruling can be, stated that a contribution to an LLC wholly owned by a public charity generally will be treated as a qualifying distribution to the public charity for purposes of Code § 4942 and as a distribution with respect to which a grant-making private foundation will not be required to exercise expenditure responsibility under Code § 4945(d). For an LLC qualifying as a charity by its own merits, see text accompanying fn 355.

335 See text accompanying fn. 139 for the reason and consequences.

336 Reg. § 301.6109-1(h), T.D. 8844 (preamble) (11/29/99), and IRS Notice 99-6. Form SS-4's instructions (Rev. 1/2011) authorize obtaining an EIN for a disregarded entity only for employment and excise taxes or for non-federal purposes such as a state requirement.

337 Reg. § 301.7701-2(c)(2)(iv), reproduced in fn 3448 in part II.L.3 Self-Employment Tax: General Partner or Sole Proprietor. Under a prior version of that regulation, the sole member of an LLC and the LLC itself were personally liable for purposes of employment tax reporting and wages paid before January 1, 2009. *Costello, LLC v. Commissioner*, T.C. Memo. 2016-184, citing *Med. Practice Sols., LLC v. Commissioner*, 132 T.C. 125, 127 (2009), *aff'd without published opinion sub nom. Britton v. Shulman*, 2010 U.S. App. LEXIS 19925 (1st Cir. 2010).

338 Reg. § 301.7701-2T(c)(2)(iv)(C)(2), reproduced in fn 3447 in part II.L.3 Self-Employment Tax: General Partner or Sole Proprietor. For more on self-employment tax, see that part and part II.L.4 Self-Employment Tax Exclusion for Limited Partner.

339 CCA 201634021 held that employees of an LLC disregarded from its Code § 501(c)(3) parent could participate in the parent's Code § 457(b) retirement plan.

340 Reg. § 301.7701-2(c)(2)(v).

341 The check-the-box regulations do not apply to tax administered by the Alcohol and Tobacco Tax and Trade Bureau (TTB) or the U.S. Customs and Border Protection (Customs), because rules in 26 CFR part 301 generally do not apply for purposes of those taxes. See T.D. 9553 (effective 10/26/2011). For treatment of otherwise-disregarded single member LLCs under the TEFRA partnership audit rules, see fn. 1718 in part II.G.19.c.i Overview of Rules Before and After TEFRA Repeal.

342 *Pierre*, a reviewed Tax Court opinion, held that, for gift tax purposes, the transfer of a partial interest in an LLC must be valued as an interest in the LLC as an entity rather than an interest in the underlying assets, even though before the transfer all of the assets were deemed owned directly by the sole member for income tax purposes; *Pierre* is described in part III.B.1.e Valuation Issues. *RERI Holdings I, LLC v. Commissioner*, 143 T.C. 41 (2014), held that the gift tax rule applied for income tax purposes as well – for purposes of the charitable deduction, a gift of the sole member interest in an LLC needed to have the LLC

the results of that transfer to each asset.[343] Query how the at-risk rules of Code § 465 treat a disregarded LLC.[344]

- **Partnership**. If it has more than one member[345] for tax purposes, it is taxed as a partnership for federal tax purposes, unless it elects otherwise[346] or is publicly traded.[347] However, if the sole owners are a married couple, then the LLC may be treated as a disregarded entity if it held as community property.[348] For information on co-ownership rising to the level of a partnership and the consequences of failing to file partnership returns, see part II.C.10 Whether Tenancy-in-Common or other Arrangement Constitutes a Partnership. In Missouri, an LLC is assumed owned equally by the members unless they agree otherwise or make different contributions.[349]

- **Corporation**. An LLC can elect to be taxed as a corporation for federal tax purposes.[350]

  - LLCs electing taxation as a C corporation must file IRS Form 8832[351] no later than 75 days after the effective date of an election for an LLC to be taxed as a corporation (or

---

member interest valued. However, listing the LLC on Form 8283 (substantiation for a noncash charitable contribution) and the possibility that the sole member interest in an LLC might have a value identical to that of the underlying assets were enough to make proper substantiation a fact issue rather than a matter of summary judgment. Ultimately, the taxpayer lost for other reasons and was penalized; see part II.J.4.c Charitable Distributions.

[343] See fn. 332-333, the former re: selling an interest in a single member LLC that was a disregarded entity before the sale.

[344] See part II.G.4.j At Risk Rules.

[345] See text accompanying fn 380 in part II.C.1 General Overview of Partnerships.

[346] Reg. § 301.7701-3(b)(1)(i).

[347] See part II.C.2 Publicly Traded Partnerships for when a corporate treatment is mandated for a publicly traded partnership.

[348] Rev. Proc. 2002-69, relating to community property ownership of 100% of an entity that the taxpayers may treat as a disregarded entity. That Rev. Proc. applies only to community property ownership, not to joint tenants or tenants-by-the-entirety (TBE). A number of years ago, I called the author of the Rev. Proc. and asked why limit to community property when TBE was an even stronger unity of interest, and he said that people in community property states couldn't always determine whether property transferred to a single member LLC was separate property or community property, and the Rev. Proc. was offered to avoid inadvertently violating the rules. He said the IRS was not even considering extending it to joint or TBE property. Query whether this rule would be extended to registered domestic partners under California law under Letter Ruling 201021048 and CCAs 201021049 and 201021050 or under similar laws; Rev. Rul. 2013-17 makes me assume (announcing the IRS' response to the *Windsor* case recognizing same-sex marriages but not civil unions) that will not be the case. The IRS informally takes the position that an LLC does not qualify to be disregarded as a qualified joint venture under this provision; see fn. 612.

[349] An operating agreement is required, RSMo § 347.081.1, found at http://www.moga.mo.gov/mostatutes/stathtml/34700000811.html. However, it may be oral, RSMo § 347.015(13), found at http://www.moga.mo.gov/mostatutes/stathtml/34700000151.html. I would assume that everything was equal, unless evidence suggests otherwise. RSMo §§ 347.101 and 347.111, found at http://www.moga.mo.gov/mostatutes/stathtml/34700001011.html and http://www.moga.mo.gov/mostatutes/stathtml/34700001111.html.

[350] Reg. § 301.7701-3(c)(1)(i) provides that the election is made on IRS Form 8832.

[351] If the IRS accepts Forms 1120 filed by an LLC, the IRS is not estopped from treating the LLC as a disregarded entity because it failed to file Form 8832. *Costello, LLC v. Commissioner*, T.C. Memo. 2016-184.

for a foreign unincorporated entity to be taxed as a partnership),[352] signed correctly.[353] However, if a taxpayer has reasonable cause for failing to meet the deadline, the taxpayer might be able to file IRS Form 8832 as late as 3 years after its due date.[354] An LLC that has been determined to be, or claims to be, exempt from taxation under Code § 501(a) is treated as having made an election under this section to be classified as a corporation;[355] the IRS outlines its view on how an LLC can qualify as a tax-exempt entity at https://www.irs.gov/charities-non-profits/other-non-profits/exempt-organization-sample-questions-limited-liability-company and in Notice 2021-56.

- Generally, if an eligible entity elects to change its classification, the entity cannot change its classification by election again during the 60 months succeeding the effective date of the election.[356] However, the IRS may permit the entity to change its classification by election within the 60 months if more than 50% of the ownership interests in the entity as of the effective date of the subsequent election are owned by persons that did not own any interests in the entity on the filing date or on the effective date of the entity's prior

---

352 Reg. § 301.7701-3(c)(1)(i) provides:

In general. Except as provided in paragraphs (c)(1)(iv) and (v) of this section, an eligible entity may elect to be classified other than as provided under paragraph (b) of this section, or to change its classification, by filing Form 8832, Entity Classification Election, with the service center designated on Form 8832. An election will not be accepted unless all of the information required by the form and instructions, including the taxpayer identifying number of the entity, is provided on Form 8832. See section 301.6109-1 for rules on applying for and displaying Employer Identification Numbers.

Reg. § 301.7701-3(c)(1)(ii) provides:

Further notification of elections. An eligible entity required to file a Federal tax or information return for the taxable year for which an election is made under § 301.7701-3(c)(1)(i) must attach a copy of its Form 8832 to its Federal tax or information return for that year. If the entity is not required to file a return for that year, a copy of its Form 8832 (``Entity Classification Election'') must be attached to the Federal income tax or information return of any direct or indirect owner of the entity for the taxable year of the owner that includes the date on which the election was effective. An indirect owner of the entity does not have to attach a copy of the Form 8832 to its return if an entity in which it has an interest is already filing a copy of the Form 8832 with its return. If an entity, or one of its direct or indirect owners, fails to attach a copy of a Form 8832 to its return as directed in this section, an otherwise valid election under § 301.7701-3(c)(1)(i) will not be invalidated, but the non-filing party may be subject to penalties, including any applicable penalties if the Federal tax or information returns are inconsistent with the entity's election under § 301.7701-3(c)(1)(i). In the case of returns for taxable years beginning after December 31, 2002, the copy of Form 8832 attached to a return pursuant to this paragraph (c)(1)(ii) is not required to be a signed copy.

353 Reg. § 301.7701-3(c)(2) provides:

In general. In general. An election made under paragraph (c)(1)(i) of this section must be signed by -

(A) Each member of the electing entity who is an owner at the time the election is filed; or

(B) Any officer, manager, or member of the electing entity who is authorized (under local law or the entity's organizational documents) to make the election and who represents to having such authorization under penalties of perjury.

354 Rev. Proc. 2009-41.

355 Reg. § 301.7701-3(c)(1)(v)(A), which further provides:

Such election will be effective as of the first day for which exemption is claimed or determined to apply, regardless of when the claim or determination is made, and will remain in effect unless an election is made under paragraph (c)(1)(i) of this section after the date the claim for exempt status is withdrawn or rejected or the date the determination of exempt status is revoked.

356 Reg. § 301.7701-3(c)(1)(iv).

election.[357] An election by a newly formed eligible entity that is effective on the date of formation is not considered a change for purposes of this rule.[358]

- LLCs electing taxation as an S corporation file Form 2553 without needing to file Form 8832.[359] Generally, it's better to file only Form 2553 so that a failure of Form 2553 to be valid will revert the LLC back to a flow-through entity; this reversion applies to only the failure of the initial election and not to any subsequent terminating events, the latter which would convert the LLC to a C corporation unless cured.[360]

- Note that every unit of ownership must have identical rights to distributions and liquidation proceeds (the "single-class-of-stock" rule).[361] If the LLC had been taxed as a partnership, make sure that distributions upon liquidation are made pro rata instead of according to capital accounts; if a partnership with non-pro rata capital accounts is making an S election, consider issuing notes in the amount of the non-pro rata amounts. Various employment agreements and other side agreements among owners generally do not violate the single-class-of-stock rule, but that's because they are not part of the governing documents;[362] make sure that such agreements are not part of the operating agreement, which may cause them to fall outside the scope of the regulations' protection.

- Be sure to consider part II.A.2.h Important Protections for S Corporation Shareholder Agreements.

- Regulations appear to question whether an LLC that makes an S election is subject to self-employment tax, but those regulations appear to be obsolete.[363]

Information on conversions by LLCs to corporate tax status is covered at part II.P.3.c Conversions from Partnerships and Sole Proprietorships to C Corporations or

---

[357] Reg. § 301.7701-3(c)(1)(iv).
[358] Reg. § 301.7701-3(c)(1)(iv).
[359] Reg. § 301.7701-3(c)(1)(v)(C). The instructions to IRS Form 2553 originally provided that, to be taxed as an S corporation, an LLC must elect taxation as an association under IRS Form 8832 and make the S election using IRS Form 2553. Reg. § 301.7701-3(c)(1)(v)(C) changed that and allows LLCs that file Form 2553 to skip the step of filing IRS Form 8832. Reg. § 301.7701-3(h)(3) allows taxpayers who filed Form 2553 before the July 20, 2004 effective date of Reg. § 301.7701-3(c)(1)(v)(C) to treat that regulation as effective.
[360] Reg. § 301.7701-3(c)(1)(v)(C) provides:

> *S corporations*. An eligible entity that timely elects to be an S corporation under section 1362(a)(1) is treated as having made an election under this section to be classified as an association, provided that (as of the effective date of the election under section 1362(a)(1)) the entity meets all other requirements to qualify as a small business corporation under section 1361(b). Subject to § 301.7701-3(c)(1)(iv), the deemed election to be classified as an association will apply as of the effective date of the S corporation election and will remain in effect until the entity makes a valid election, under § 301.7701-3(c)(1)(i), to be classified as other than an association.

For cures, see part II.A.2.e Making the S Election and III.A.3.c.iii Deadlines for QSST and ESBT Elections.
[361] See part II.A.2.i Single Class of Stock Rule.
[362] See parts II.A.2.i.ii Temporary Timing Differences; Other Varying Differences (especially fns 249-253) and II.A.2.i.iii Disproportionate Distributions.
[363] See part II.L.5.b Self-Employment Tax Caution Regarding Unincorporated Business That Makes S Election.

S Corporations. To the extent that a topic is not fully covered there, consider reading, “Now You See It, Now You Don’t: The Comings and Goings of Disregarded Entities.”[364]

Below are examples of situations when an LLC taxed as a sole proprietorship or partnership might be the best bet.

- **Real Estate - Sole Owner**. A client holds one or more parcels of real estate. The client would like to insulate his/her other assets from liability for what occurs on his/her real estate. Furthermore, the client would like each parcel to be insulated from liability for what happens on each other parcel. A possible solution may be to form a separate LLC to hold each parcel. Because each LLC would be disregarded for federal tax purposes, forming the LLCs would not complicate his/her tax situation. However, if the client holds the property for investment (and is not a dealer) but later wants to develop the property, the client should consider some pre-development tax planning.[365]

- **Real Estate - Co-Owners**. A client owns real estate with one or more other co-owners. One of the client’s co-owners manages the property, or perhaps the client has a management company manage the property. In some situations, co-ownership is considered a general partnership even if no formal partnership agreement exists.[366]

  If the client is considered a general partner under state law, the client is jointly and severally liable for acts or omissions by the client’s co-owners or those the client’s “partnership” hires. Furthermore, if most, but not all, of the co-owners agree to sell or lease the property, the sale or lease cannot proceed without unanimous consent or court action. One dissenter could cause the client to lose valuable business opportunities. Finally, if a co-owner gets into creditor problems, the creditor may take his place and try to sell the property prematurely, perhaps even going to court to force a sale.

  A possible solution may be to form an LLC to hold the property. The LLC may relieve the client from joint and several liability and provide a mechanism for a majority to control the property. Any creditor who obtains an interest in the LLC would have no right to vote on how the LLC is run and should not be able to get a court order to sell the property. Rarely is

[364] McMahon, pages 259-307 of the *Tax Lawyer*, Vol. 65, No. 2 (Winter 2012).
[365] See part II.G.26.c, Future Development of Real Estate If the client started with a single-member LLC before making these plans, the client might sell his/her interest in the LLC to an S corporation.
[366] In addition to state law liability, for federal income tax purposes a tenancy-in-common might be treated as a partnership. See part II.C.10 Whether Tenancy-in-Common or other Arrangement .

a corporation an appropriate entity for real estate;[367] however, his analysis does not consider foreign tax issues.[368]

- **Sole Proprietorship - Unsure of Best Entity for Tax Purposes**. A client starts his/her own business. Initially, the client wants to keep it simple, as a sole proprietorship. Later, the client may want to become an S corporation to avoid self-employment tax or a C corporation after making a public offering. The client starts as an LLC. Instead of transferring all of his/her assets to a new corporation when he/she later decides to change the LLC's tax treatment, he/she simply makes an election for the LLC to be taxed as an S corporation or a C corporation.

- **Sole Proprietorship - Future Co-Owner**. A client starts his/her own business. Hershey expect to eventually have co-owners as his/her business grows. However, the client does not want to have to re-title assets when he/she adds his/her first co-owner. Perhaps the client has a valuable lease, patent, copyright, franchise right, etc. that would be difficult to transfer. The client may want to start as an LLC and admit his/her new co-owners as members of the LLC.

- **Multiple Owners, Coming and Going**: In a client's profession or industry, it is common for new people to invest in his/her business or perhaps even to become co-owners without investing any cash (providing services instead). Similarly, it is possible that the business may split up some time in the future, each person taking his/her own share of the business with him/her, as often happens in professional firms. For federal tax purposes, partnership income tax may provide the most opportunity to minimize tax on new co-owners or on split-ups. As the only business entity taxed as a partnership in which generally no co-owner is personally liable, it is possible that an LLC may be appropriate.

- **One Business, Multiple Locations**. A client's business has several locations, whether in the same city or even in different states. He or she would like each location to be insulated

---

[367] If the owners want to go in separate directions without a current taxable event, each shareholder must receive an interest in an active business that has been carried for five years (among many other requirements of Code § 355). A distribution of real estate from a corporation to a shareholder is taxed as a sale of the distributed property (see part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders), even if the corporation is an S corporation; if the corporation converted from a C corporation to an S corporation during the past 10 years, built-in gain tax might apply, as described in part II.P.3.b.ii Built-in Gain Tax. If the shareholders disagree on whether to do a like-kind exchange, it is difficult to satisfy all parties. When a shareholder dies, the real estate does not receive a basis step-up. However, see part II.G.26.c, Future Development of Real Estate, discussing tax strategies for converting investment real estate into property that is subdivided and held for sale. For a possible opportunity to replicate a basis step-up by liquidating the S corporation in the same year all of its assets are sold to an unrelated third party, see part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation.

[368] See, e.g., Lipton and McDonald, "Planning Can Minimize U.S. Taxation of Foreign Investment in U.S. Real Estate," *Journal of Taxation* (Sept. 2010), suggesting:

> In considering how to structure a foreign investor's ownership of U.S. real estate, various alternatives must be considered. These depend on whether U.S. tax will be paid directly by the foreign investor or by a U.S. or foreign entity. Other factors, including the status of the investor (e.g., individual or corporation) and the existence of an income tax treaty between the U.S. and the investor's country under which U.S. withholding or tax rates might be reduced, also must be taken into account.

from the liabilities of other locations. His or her business could set up a separate LLC for each location, but for federal income tax purposes nothing has changed.

- **Bankruptcy-Remote LLC to Facilitate Borrowing**. The lender insists that legal title be held by a bankruptcy remote entity. To satisfy this requirement, the borrower forms an LLC between the borrower and a corporation wholly owned by the borrower. To protect the lender's interest, one of the members of the corporation's board of directors will be a representative of the lender. The corporation has management rights only in certain events, and all of the LLC's profits, losses, and credits will be allocated to the borrower. Also, all distributions of net cash flow and capital proceeds will be made entirely to the borrower. Furthermore, when the dissolves, the borrower will wind up the LLC's affairs in any manner permitted or required by law, but the payment of any outstanding obligations owed to the lender will have priority over all other expenses or liabilities. The borrower is treated as owning the LLC's property directly.[369]

- **Facilitating Transfers**. Sometimes transfers need to be done expeditiously, and some assets are difficult to move around. For example:

  - Suppose private equity is being transferred to a GRAT,[370] and part of it needs to be transferred back to the donor to make annuity payments. Effectuating transfers working with the private equity fund might prove cumbersome. Putting the private equity in an LLC and transferring LLC interests back to the donor might be easier. Furthermore, formula transfers[371] of LLC interests might be done, whereas a formula transfer of the private equity fund might be awkward to explain and for which to obtain consent.

  - Suppose some pre-mortem planning needs to be done and the banks are not open or setting up new accounts takes more time than one has. LLC assignments, however, do not depend on working through financial institutions.

  - LLCs can be used to centralize management of assets when a trust is distributed to its remaindermen.[372]

  - An LLC might avoid a state's rule against perpetuities (RAP). For example, a perpetual trust buys real estate in a state that imposes the RAP. That state's laws might very well

---

[369] Letter Ruling 199911033, which also held that the borrower could use the LLC's property for a Code § 1031 nontaxable deferred exchange (See part II.G.16 Like-Kind Exchanges). The lender's consent was required for the LLC to:

> (1) file or consent to the filing of a bankruptcy or insolvency petition or otherwise institute insolvency proceedings; (2) dissolve, liquidate, merge, consolidate, or sell substantially all of its assets; (3) engage in any business activity other than those specified in its Certificate of Formation; (4) borrow money or incur indebtedness other than the normal trade accounts payable and any other indebtedness expressly permitted by the documents evidencing and securing the loan from Lender; (5) take or permit any action that would violate any provision of any of the documents evidencing or securing the loan from Lender; (6) amend the Certificate of Formation concerning any of the aforesaid items; or (7) amend any provision of the [Operating] Agreement concerning any of the aforesaid items.

See also Letter Rulings 199914006 and 200201024.

[370] See part III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust.

[371] See part III.B.3 Defined Value Clauses in Sale or Gift Agreements or in Disclaimers.

[372] In Letter Ruling 201421001, a trust used two series LLCs – one invested in equities (X) and the other in fixed income securities (Y) – to distribute its investment assets to remaindermen. For details, see fn. 3875, found in part II.P.1.a.i.(b) Special Rules for Allocations of Income in Securities Partnerships.

cause the real estate (and perhaps proceeds from its sale) to be subject to the RAP. Suppose instead that the trust forms an LLC to hold the real estate. The LLC constitutes personal property, so that the trust never owns real estate in that state. Presumably that state would not be able to impose the RAP against the real estate.

- An LLC might facilitate community property (CP) or tenants by the entirety (TBE) treatment. Suppose a married couple lives in a state that recognizes CP or TBE and wants its real estate to be owned as CP or TBE. However, the couple wants to buy real estate in a state that does not recognize CP or TBE. To try to obtain CP or TBE treatment for the real estate, the couple might form an LLC in its home state, perhaps register the LLC to do business in the other state, and then have the LLC buy the real estate. The extent to which CP or TBE would be recognized depends on conflict of laws issues, but presumably the couple would be better off with the LLC than without the LLC.

- An LLC might also help when a person living in a state that does not impose estate tax buys real estate in a state that does impose an estate tax. Real estate in the latter state would be subject to estate tax. However, if the person owns the property through an LLC, the person has converted the real property to personal property, as far as his estate's legal title is concerned. Beware that, just as the federal and most states' income tax laws disregard single member LLCs, state estate taxing authorities would also tend to disregard a single member LLC[373] –perhaps disregarding even an LLC owned by more than one person if the state views the LLC as a mere tax avoidance measure.

These are just some of the possible reasons to consider forming an LLC. Consider clients' business objectives and estate planning goals, the latter as pass-through entities often are ideal for transferring interests free from estate and gift taxes.

Although it is not uncommon for operating agreements to refer to LLC units, the nomenclature of units might mislead members into believing that their ownership is treated as stock rather than as a partnership interest, so I prefer to avoid that practice.[374]

An LLC can be managed by its members or managers. To simplify signature lines, I use the manager-managed model.[375] Death or other dissociation can cause voting and other rights to

[373] See, *e.g.*, New York State Department of Taxation and Finance, Office of Counsel, Advisory Opinion Unit, opinion no. TSB-A-15(1)M (5/29/2015) found at http://www.tax.ny.gov/pdf/advisory_opinions/estate_&_gift/a15_1m.pdf; however, opinion no. TSB-A-08(1)M (10/24/2008) held that, if the owner elects to treat the LLC as a corporation, New York would treat the LLC as personal property. If the latter strategy is pursued, consider using an S corporation whose only asset is that property (and an associated bank account through which to conduct the LLC's business), as described in part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation (discussing how an S corporation owning a single asset can capture the federal tax effect of an inside basis step-up on the sale of the asset, but also warning of a state income tax mismatch in part II.H.8.a.ii State Income Tax Disconnect).

[374] Immerman, "Is There Any Such Thing As An LLC Unit?" *Business Entities* (WG&L), July/Aug. 2009.

[375] When a revocable trust is a member, having the trustee sign on behalf of the trust, which signs on behalf of the LLC is more complicated than simply naming the trustee as manager in that person's capacity as an individual. If the members want to manage the LLC themselves, the operating agreement can provide that each member is a manager. Then, when a member does estate planning, the operating agreement can be amended without needing to amend the articles of organization.

lapse. This is especially a concern for a single-member LLC owned by an individual, so be sure to plan for how the governing documents handle that situation.[376]

An LLC formed in Missouri needs to register with the Secretary of State at inception. Future registrations are not necessary, except to the extent that the registration information changes. Missouri follows federal tax laws.

An LLC formed in Missouri can do business in another state. It just needs to register with that other state, and such foreign registrations generally are as simple as if the LLC had been formed in that state originally. Missouri apportions its state income tax consistent with the way many other states do. If all the business activities are conducted in that other state, generally the other state, not Missouri, would tax those activities.

Some states impose high annual registration fees, and registered agent fees can also mount. To make registration easier, some states (including Missouri) offer "Series LLCs," in which one registration is done describing various compartments, each of which is treated as a separate entity for liability protection purposes.[377] The IRS appears to be willing to respect these "Series" as separate entities.[378] Whether other states would respect this compartmentalization of groups of assets is uncertain in many states.[379] Although generally I do not recommend them, in some cases their use may be appropriate.

[376] See Manns and Todd, "Issues Arising Upon The Death Of The Sole Member Of A Single Member LLC," 99 *Marquette Law Review* 725 (2016), available at https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2805469. The article also discusses whether transfer on death provisions will be respected under various state laws.

[377] For a list of jurisdictions, see fn. 379.

[378] REG-119921-09 (9/14/2010) proposes regulations recognizing series as separate entities, with special rules for the insurance area; see Prop. Reg. § §301.7701-1(a)(5)(viii)(A). Letter Ruling 200803004 previously indicated the IRS' willingness to respect these "Series" as separate entities. See also Rev. Rul. 2008-8, Notice 2008-19, and Letter Rulings 200241008 and 200241009.

[379] Rutledge, "The Internal Affairs Doctrine And Limited Liability Of Individual Series Within A Series LLC - Never The Twain Shall Meet?" *Business Entities* (WG&L) (May/June 2015), concluding, "It remains to be resolved whether the limited liability shield afforded to a series in the state of organization will be respected in a state that does not similarly provide for series, and how that analysis should be undertaken is open to dispute," and listing in fn. 1 of his article the jurisdictions that offer series LLCs:

> The LLC acts that authorize series are: Alabama (Ala. Code §10A-5A-11.01); District of Columbia (D.C. Code §29-802.06); Illinois (805 ILCS 180/37-40); Iowa (Iowa Code Ann. §489.1201); Kansas (Kan. Stat. Ann. §17-76,143); Missouri (Mo. Rev. Stat. §347.186); Montana (Mont. Code Ann. §35-8-304(4)); Nevada (Nev. Rev. Stat. § 86.296.3); Oklahoma (18 Okla. Stat. §18-2054.4B); Puerto Rico (P.R. Laws Ann. Tit. 14, §3967 (General Corporations Act 2009)); Tennessee (Tenn. Code Ann. §48-249-309); Texas (Tex. Bus. Org. §101.601); Utah (Utah Code Ann. §48-3-1201). Series are also provided for in the ABA's Revised Prototype Limited Liability Act, 67 Bus. Law. 117 (November 2011) at §§1101 through 1116. Delaware alone has series limited partnerships. See Del. Code Ann. Tit. 6, §17-218. Several other states have series in their business/statutory trust acts: Conn. Gen. Stat. §§34-5167(b)(2), §34-502(b); Del. Code Ann. tit. 12, §§3804(a), 3805(h), 3806(b); D.C. Code §29-1204.01 et seq.; Ky. Rev. Stat. Ann. §§386A.4-010 through 386A.4-110; Va. Code Ann. §§13.1-1219, 13.1-1231, 13.1-1240; Wyo. Stat. §§17-23-106, 17-23-108. See also the Revised Uniform Statutory Trust Entity Act (2009). The Uniform Law Commission has in place a series statute drafting committee, which presented a first draft of its work at the 2014 annual meeting. While the present author is a member of that drafting committee, all views expressed herein are his own.

II.C. Partnership

II.C.1. General Overview of Partnerships

Clients doing business as a partnership (whether an intentional or not, the latter as described in part II.C.10 Whether Tenancy-in-Common or other Arrangement), who are concerned about protection from liabilities incurred by the business, might consider whether registering as an LLP, converting to an LLC, converting a general partner to an LLC, or forming one or more LLC subsidiaries might be an appropriate strategy.

A partnership must have more than one owner. How small can a minority interest be for purposes of that rule? This answer is uncertain and has been the subject of several articles.[380] *Peking Investment Fund LLC v. Commissioner*, Tax Court Docket No. 12772-09 Order 2/13/2018, noted:

> In fact, under ruling guidelines issued under the entity classification regulations in effect before 1997, the Internal Revenue Service generally required the general partner of a limited partnership to maintain an interest of at least 1% in each material item of partnership income, gain, loss, deduction, or credit. See Rev. Proc. 89-12, sec. 4.01, 1989-1 C.B. 798, 800. Those guidelines, though no longer in effect, provide historical support for the proposition that a 1% interest in a partnership cannot be disregarded as *de minimis*.

Some federal tax incentives encourage the use of partnerships that reward investors with tax creditors in exchange for the capital needed to fulfill the program's purpose. For example:

- Rev. Proc. 2020-12 establishes a safe harbor for using partnerships to allocate the credit for carbon oxide sequestration under Code § 45Q, under which the developer has at least a 1% and each investor has at least 5%.[381] As background, Rev. Proc. 2020-12, § 2.05 explained:

  > A partnership exists when two or more "parties in good faith and acting with a business purpose intended to join together in the present conduct of the enterprise." *Commissioner v. Culbertson*, 337 U.S. 733, 742 (1949). In making this determination, courts "look not so much at the labels used by the partnership but at true facts and circumstances" to determine whether a partner has a "meaningful stake in the success or failure" of the enterprise. *TIFD III-E, Inc. v. United States*, 459 F.3d 220, 231 and 241 (2d Cir. 2006). A purported partner in a partnership may in substance be more properly viewed as a lender to the partnership or purchaser of partnership assets if the purported partner lacks "any meaningful downside risk or any meaningful upside potential in" the partnership. *Historic Boardwalk Hall, LLC v. Commissioner*, 694 F.3d 425, 455 (3d Cir. 2012).

---

[380] See Shop Talk, "The 1% Standard: Back from the Dead?," 120 JTAX 317 (June 2014); "Revisiting the 1% Minimum Ownership Interest in Safe Harbors," 132 JTAX 38 (May 2020); "More on the 1% Minimum Ownership Interest Standard in Safe Harbors: A Drafter Responds," 133 JTAX 35 (August 2020); and "How Small Can a Partner's Interest Be: Did "Small" Just Get Smaller?" 137 JTAX No. 2 (August 2022). Fn 345 in part II.B Limited Liability Company (LLC) mentions that an LLC with one member is disregarded, whereas an LLC with more than one member is taxed as a partnership.
[381] T.D. 9944 (1/15/2021) cited with approval Rev. Proc. 2020-12.

- Rev. Proc. 2007-65 provides a safe harbor with respect to respect the allocation of Code § 45 wind energy production tax credits by partnerships. Its safe harbor is similar to that of Rev. Proc. 2020-12.

- In response to concern about *Historic Boardwalk*, Rev. Proc. 2014-12 provides a safe harbor regarding the allocation of Code § 47 rehabilitation credits. Among other requirements, Section 4.02(1) of the Rev. Proc. requires the principal to have at least a 1% interest in each material item of partnership income, gain, loss, deduction, and credit at all times during the partnership's existence, and Section 4.02(2) requires to investor to have, at all times during the period it owns an interest in the partnership, a minimum interest in each material item of Partnership income, gain, loss, deduction, and credit equal to at least 5% of the investor's percentage interest in each such item for the taxable year for which the investor's percentage share of that item is the largest (as adjusted for sales, redemptions, or dilution of the investor's interest) and must participate in profits in a manner that is not limited to a preferred return that is in the nature of a payment for capital.

- A case that was not an IRS controversy, *SunAmerica Housing Fund 1050 v. Pathway of Pontiac, Inc*., 6th Cir. No. 21-1243 (file 22a0100p.06) (5/10/2022), explains how a low-income housing tax credit (LIHTC) partnerships work:

> A typical arrangement under LIHTC proceeds as follows. See generally Off. of the Comptroller of the Currency, *Low-Income Housing Tax Credits: Affordable Housing Investment Opportunities for Banks* 6–9 (Mar. 2014), https://www.occ.gov/publications-and-resources/publications/community-affairs/community-developments-insights/pub-insights-mar-2014.pdf (providing general overview of the mechanics of LIHTC). A low-income housing developer first applies to a state housing credit agency for an award of federal tax credits. If the state agency grants the application, the developer then enters into a limited partnership as a general partner with a private investor as a limited partner. Often, the investor is a bank or another financial entity that has ample annual tax liability of its own that makes acquiring the nonrefundable tax credits a worthwhile investment. The limited partner investor then provides the capital needed to build and develop the low-income housing development. In return, the partnership allocates the vast majority (usually 99.99%) of tax credits and other tax benefits to the investor. These benefits alone provide the investor with a significant return on investment that makes the arrangement attractive and worthwhile to the investor. *See, e.g.*, Ernst & Young, Low-Income Housing Tax Credit Assessment Survey 6 (2009), https://www.nahma.org/wp-content/uploads/files/member/Tax%20Credit/Legislative%20Study_FINAL%2009250 9.pdf (finding average annual post-tax rate of return on investment to be approximately 10%).

SunAmerica explained how Congress limited the tax credit investors' upside through a right of first refusal (ROFR) authorized by Code § 42(i)(7)[382] that was built into the limited partnership agreement (LPA):

[382] Code § 42(i)(7), "Impact of tenant's right of 1st refusal to acquire property," provides:

(A) *In general*. No Federal income tax benefit shall fail to be allowable to the taxpayer with respect to any qualified low-income building merely by reason of a right of 1st refusal held by the

As discussed earlier, Congress enacted § 42(i)(7) to create a mechanism through which properties could be transferred to nonprofit organizations to ensure that the housing remains affordable over the long term. It chose to do so by allowing nonprofits to retain a ROFR at a below-market price. See 26 U.S.C. § 42(i)(7). During Congress's early discussions of LIHTC, the initial thought was to grant nonprofit organizations an option to purchase the property at a below-market price. S. 980, 101st Cong., § 2(y) (1989) (proposed bill). Lawmakers raised concerns, however, that nonprofit organizations would then be deemed the true owners of the property and the IRS could reclaim the tax credits that were needed to attract private investor limited partners. See *Frank Lyon Co.*, 435 U.S. at 571-73. Congress chose to avoid that problem by enacting a safe harbor for the ROFR, recognizing that a nonprofit could not unilaterally exercise the ROFR in the same way that an option could be exercised.

As the Massachusetts Supreme Court explained,

> Section 42(i)(7) therefore represents a compromise, facilitating the inexpensive transfer of property to nonprofit organizations, but in a way that does the least violence to the traditional rules of tax law. The right of first refusal described in § 42(i)(7) is not a typical right of first refusal, for the obvious reason that it favors the nonprofit organization with a statutorily prescribed, often below-market price. At common law, a right of first refusal allows the holder to purchase the property only by matching the price offered by a third party. In contrast, a right of first refusal under § 42(i)(7) allows the holder to purchase the property at the § 42 price, even if it is far below the third-party offer. Yet, a right of first refusal under § 42(i)(7) is not completely unanchored from its common-law meaning. In enacting § 42(i)(7), Congress relied on the common-law distinction between an option to purchase, which can be unilaterally exercised, and a right of first refusal, which cannot. Congress specifically chose to allow one but not the other, recognizing that a right of first refusal - which cannot be exercised until the owner decides to sell - is for that very reason a less serious curtailment on ownership rights.

Homeowner's Rehab, Inc. v. Related Corporate V SLP, LP, 99 N.E.3d 744, 757-58 (Mass. 2018) (internal citations omitted).

The ROFR contemplated by § 42 varies markedly from a ROFR in a "typical" real estate transaction, where the holder of the ROFR can purchase the property if he or she is willing to match the price of a third-party offer. In that context, as explained earlier, the bona fide offer requirement functions to allow the third-party bidder to prevail by offering a high price that cannot be matched, if that offer is, in fact, genuine and made in good

---

tenants (in cooperative form or otherwise) or resident management corporation of such building or by a qualified nonprofit organization (as defined in subsection (h)(5)(C)) or government agency to purchase the property after the close of the compliance period for a price which is not less than the minimum purchase price determined under subparagraph (B).

(B) *Minimum purchase price*. For purposes of subparagraph (A), the minimum purchase price under this subparagraph is an amount equal to the sum of-

(i) the principal amount of outstanding indebtedness secured by the building (other than indebtedness incurred within the 5-year period ending on the date of the sale to the tenants), and

(ii) all Federal, State, and local taxes attributable to such sale.

Except in the case of Federal income taxes, there shall not be taken into account under clause (ii) any additional tax attributable to the application of clause (ii) .

faith. The “bona fide” offer requirement, therefore, operates to protect the ROFR holder from an unreasonable offer it cannot beat that would preclude it from exercising its contractual right of first refusal. By contrast, the ROFR in the LPA and under § 42(i)(7) eliminates that possibility because the holder need not match the price. The § 42-established ROFR defines ex ante the price at which the nonprofit will purchase the project: the outstanding debt on the property plus any “exit taxes” that result from the sale (sometimes referred to as “debt plus taxes”). See 26 U.S.C. § 42(i)(7)(B); *AMTAC Holdings 227, LLC v. Tenants’ Dev. II Corp.*, 15 F.4th 551, 557 (1st Cir. 2021). In this respect, § 42(i)(7) clearly deviates from the general “common law” definition of ROFRs. To implement the LIHTC, Congress therefore chose to employ a statutorily-specified ROFR that differs from that contemplated under general common law. See *Homeowner’s Rehab, Inc.*, 99 N.E.3d at 757-58 (holding that importing common law bona fide offer requirements into a § 42(i)(7) ROFR would “contravene the purpose of § 42(i)(7)”); *Opa-Locka Cmty. Dev. Corp. v. HK Aswan, LLC*, No. 2019-16912-CA-01, 2020 WL 4381624, at *9 (Fla. Cir. Ct. July 7, 2020) (declining to read a bona fide offer requirement into § 42(i)(7) because doing so was not consistent with § 42).

We cannot impress the general common law meaning of bona fide offer on the term as it is used in the LPA that was created to accord with the LIHTC program. To do so would, in essence, contravene the purpose of § 42(i)(7). A practical example reveals why: based on the common law, no reasonable buyer, much less a serious buyer, would offer to buy a property knowing full well that a third-party (here, Presbyterian) would win the deal no matter how good the offer was. In these circumstances, soliciting an offer from a serious buyer that knew the ROFR-holder would exercise its right, as the General Partners did, may well be the only way to trigger the ROFR. Wholesale importation of the common law understanding of bona fide offer into the plain language of the LPA, therefore, would make the ROFR provision, as specified in the LIHTC, meaningless. See *Klapp v. United Ins. Grp. Agency, Inc.*, 663 N.W.2d 447, 468 (Mich. 2003) (declining to construe provision of contract in a way that would render the provision meaningless).

Not only would it contravene Congress’s intentions, but it also would contravene the Partners’ bargained-for exchange under the LIHTC arrangement. The purpose of the Partnership arrangement was for SunAmerica to reap the benefits from the housing tax credits, not from the Property’s long-term appreciation gains. See, *e.g.*, LPA §§ 4.02(a)-(c), (j), 8.02(a) (requiring “best efforts” to produce for SunAmerica’s benefit “maximum allowable” Housing Credits). That purpose is further evinced by the fact that SunAmerica’s role in the Partnership was meant to be entirely passive. *Id*. at § 10.01 (stating that “No Limited Partner shall take part in the management or control of the business of the Partnership nor transact any business in the name of the Partnership.”). By gaining the tax credit, SunAmerica received its benefit of the bargain.

SunAmerica argues that because the LIHTC program does not mandate that the Property be conveyed to a nonprofit or even require that a ROFR be granted in LIHTC transactions, Congress had no intention to “transfer” the property back to a nonprofit. In addition, SunAmerica contends that the General Partners and Presbyterian’s understanding treats the ROFR as a transfer provision, which would also render the Option provision meaningless. Thus, they argue, the common law understanding is appropriate here. But the fact that Congress did not require the LIHTC program to transfer the property makes no difference here because § 42(i)(7) specified a certain ROFR - one that allows the parties to negotiate a below-market price for the property - and the parties agreed to incorporate that statutory provision into the LPA. When

> interpreting such an ROFR provision, we must account for Congress's goals expressed in LIHTC, including its intention to make it easier for nonprofits to regain ownership of the property and continue the availability of low-income housing. Thus, those Congressional intentions confirm that the general common law understanding of bona fide offer cannot be substituted for the ROFR mechanism created by Congress in LIHTC.
>
> To SunAmerica's second point, the bona fide offer requirement operates as a condition precedent that works to distinguish it from the Option in the LPA. The Option could become relevant if none of the General Partners, manifested an intent to sell the Property and if they never received a bona fide offer to satisfy that condition precedent. In that circumstance, Presbyterian could still acquire the property via the Option mechanism in the LPA. Recognizing the nature of the statutory ROFR does not transform the ROFR provision into an Option; unlike the Option, the ROFR has additional condition precedents, including the "bona fide offer" requirement.
>
> In light of the foregoing, this court cannot impress the general common law meaning of "bona fide offer" on an ROFR and LPA that expressly incorporated the LIHTC program and thus was created to accord with the LIHTC program. Nevertheless, the undisputed facts in the record do not clearly resolve the meaning of the term - "bona fide offer" - as it is to be construed under the LIHTC. We, therefore, find that the term as it is used in the LPA is ambiguous. Accordingly, there are disputed issues of material fact concerning the meaning of the term in the LPA - specifically, how the term "bona fide offer" in the LPA is to be formulated to accord with the Congressional expressions of intent in the LIHTC-promulgated ROFR - and whether that condition has been satisfied. These are matters that are better developed at trial and decided by a jury. See *Klapp*, 663 N.W.2d at 454-55 ("[T]he meaning of an ambiguous contract is a question of fact that must be decided by the jury.").

Now that we have reviewed elements of entrepreneurial risk and benefits required to have a partnership, let's look at some strategic issues regarding using partnerships.

Note that, in the case of a seller-financed sale of goodwill, using a C corporation causes a triple tax, an S corporation causes a double tax, and a partnership causes a single tax.[383] When an owner dies, the assets of a sole proprietorship (including an LLC owned by an individual that has not elected corporate taxation) or a partnership (including an LLC owned by more than one person that has not elected corporate taxation) can obtain a basis step-up (or down) when an owner dies, whereas the assets of a C corporation or an S corporation do not receive a new basis.[384] For what might be an ideal structure involving a partnership, see part II.E Recommended Structure for Entities.

Generally, partnership formation and distributions from a partnership are tax-free, but very notable exceptions apply. See parts II.M.3 Buying into or Forming a Partnership and II.Q.8 Exiting From or Dividing a Partnership. Increasing the basis of the partnership's assets when a partnership interest is sold or otherwise exchanged or passes by reason of death

[383] See part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis.

[384] See part II.H.2 Basis Step-Up Issues.

is a big advantage of partnerships relative to corporations. See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

A partnership needs to account for built-in gain and loss not only with respect to assets contributed to the partnership but also for assets that the partnership owns when partners come and go. See parts II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them), II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, and II.P.1.a.i.(b) Special Rules for Allocations of Income in Securities Partnerships. Also, contributions of cash within two years before or after a distribution of property raises issues described in part II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner, and contributions of property within two years before or after a distributions of cash raises issues described in part II.M.3.e Exception: Disguised Sale Rules. Furthermore, the preceding sentence describes presumptions rather than safe harbors.

For other aspects when a partnership interest's owner changes for income tax purposes, see generally parts II.P.1.a.i Allocations of Income in Partnerships and III.B.2.j.iii Allocations upon Change of Interest in a Partnership regarding allocating income.

Special rules apply if a partnership interest is created by gift. See part III.B.1.a.iv.(b) Income Tax Aspects of Family Partnerships.

This document covers other partnership tax issues in many other places.

II.C.2. Publicly Traded Partnerships

If interests in a partnership are traded on an established securities market or are readily tradable on a secondary market (or the substantial equivalent thereof), then the partnership constitutes a "publicly traded partnership"[385] and may be taxed as a corporation.[386]

If, for the taxable year and each preceding taxable year beginning after December 31, 1987 during which the partnership (or any predecessor) existed, 90% or more of the gross income of a publicly traded partnership consists of qualifying income, the rule mandating corporate treatment may not apply.[387]

"Qualifying income" generally includes most interest, dividends, real property rents, gain from the sale of real property, income and gains from various energy or natural resource activities, any gain from the sale or disposition of a capital asset (or property described in Code § 1231(b))[388] held for the production of income described above, and certain income and gain related to commodities.[389]

[385] Code § 7704(b).
[386] Code § 7704(a).
[387] Code § 7704(c).
[388] See part II.G.6.a Code § 1231 Property.
[389] Code § 7704(d).

II.C.3. Allocating Liabilities (Including Debt)

How debt is allocated is central to partnership income tax. Debt allocations interact with allocations of income and loss[390] and the consequences of entering into, exiting from, dividing, or merging a partnership.

"New Partnership Regulations under Sections 707 and 752," a discussion at the January 2017 meeting of the ABA's Section on Taxation that included those who write the regulations, discussed 2016 changes to regulations and included slides with charts explaining some key changes.[391] Regulations under Code § 752 have been issued since then.

Resources available to IRS examiners include those in part II.G.2.e IRS Practice Units.

II.C.3.a. Basic Consequences of Changes in Liability Allocations

Any increase in a partner's share of the liabilities of a partnership, or any increase in a partner's individual liabilities by reason of the assumption by such partner of partnership liabilities, is deemed a contribution of money by such partner to the partnership.[392]

Any decrease in a partner's share of the liabilities of a partnership, or any decrease in a partner's individual liabilities by reason of the assumption by the partnership of such individual liabilities, is deemed a distribution of money to the partner by the partnership.[393]

In applying the above rules, a liability to which property is subject is, to the extent of the fair market value of such property, deemed a liability of the owner of the property.[394]

When a partnership interest is sold or exchanged, liabilities are treated in the same manner as liabilities in connection with the sale or exchange of property not associated with partnerships.[395]

II.C.3.b. What Is a "Liability"

An obligation is a liability for purposes of part II.C.3 Allocating Liabilities (Including Debt) only if, when, and to the extent that incurring the obligation:[396]

(A) Creates or increases the basis of any of the obligor's assets (including cash);

(B) Gives rise to an immediate deduction to the obligor; or

---

390 See part II.G.4.e Basis Limitations for Partners in a Partnership and text accompanying and the extensive discussion following fn 3811 in part II.P.1.a.i.(a) General Rules for Allocations of Income in Partnerships. The latter coordinates with part II.C.3.c.ii.(a) Permanent Rules Allocating Economic Risk of Loss to Recourse Liabilities.

391 The text above references a two-part panel discussion chaired by Eric Sloan. The slides, "New Partnership Regulations under Sections 707 and 752," are saved as Thompson Coburn LLP doc. no. 6591807.

392 Code § 752(a).

393 Code § 752(b).

394 Code § 752(c).

395 Code § 752(d).

396 Reg. § 1.752-1(a)(4)(i).

(C) Gives rise to an expense that is not deductible in computing the obligor's taxable income and is not properly chargeable to capital.

An "obligation" is:[397]

> any fixed or contingent obligation to make payment without regard to whether the obligation is otherwise taken into account for purposes of the Internal Revenue Code. Obligations include, but are not limited to, debt obligations, environmental obligations, tort obligations, contract obligations, pension obligations, obligations under a short sale, and obligations under derivative financial instruments such as options, forward contracts, futures contracts, and swaps.

See part II.G.20.b When Debt Is Recharacterized as Equity, especially fn. 1853.

LB&I Concept Unit, "Recourse vs. Nonrecourse Liabilities," Document Control Number (DCN) PAR-C-003 (last updated 9/29/2020) (the "Concept Unit"), explains in its Detailed Explanation of the Concept "Liabilities Defined":

> The IRC 752 regulations speak of both "obligations" and "partnership liabilities." "Obligations" are an umbrella term that includes partnership liabilities. However, not all obligations are partnership liabilities. Only partnership liabilities can increase a partner's outside basis.
>
> An obligation is an IRC 752 liability only if, when, and to the extent that incurring the obligation does the following:
>
> 1. Creates or increases the basis of the obligor's assets (including cash);
>
> 2. Gives rise to an immediate deduction to the obligor; or
>
> 3. Gives rise to an immediate expense that is not deductible in computing the obligor's taxable income and is not chargeable to the obligor's capital.
>
> In this context, the term "obligor" refers to the partnership which is borrowing money, generally from a third-party creditor or a partner acting in the capacity of a creditor. The following slides articulate this concept in terms of debits and credits reflected in the partnership's accounting records.
>
> If a partnership borrows the purchase price of an asset, rather than using its own cash to buy the asset, then the loan meets the definition of a liability for IRC 752 purposes.
>
> A liability of $100 that currently creates or increases the basis of any of the obligor's assets (including cash) would be booked as follows:
>
> Debit Asset Purchased $100
>
> Credit Loan to Purchase Asset $100

[397] Reg. § 1.752-1(a)(4)(ii).

If an accrual basis partnership obtains $500 worth of services today, and under the service agreement is billed for those services later, then the account payable meets the definition of a liability for IRC 752 purposes.

Assuming such a liability gives rise to an immediate deduction, it would be booked as follows:

Debit Expense for General and Administrative Services $500

Credit Accounts Payable to Service Provider $500

CAUTION: A cash basis partnership's accounts payable are not partnership liabilities under IRC 752 as discussed in Rev. Rul. 88-77, 1988-2 CB 129.

A liability that gives rise to an expense that is not deductible in computing the obligor's taxable income, and is not chargeable to the obligor's capital, meets the definition of liability under IRC 752.

For example, if an accrual basis partnership charges $1,800 in country club membership dues on a credit card, then the expense is not deductible under IRC 274(a)(3). However, the credit card charge would still meet the definition of a liability for IRC 752 purposes, and would be booked as follows:

Debit Expense for Country Club Dues $1,800

Credit to Credit Card Charge Payable $1,800

As previously stated, not all obligations are partnership liabilities as defined by IRC 752. Confusingly, the regulations use the term "liability" when discussing non-liability obligations. Examples of this are Treas. Reg. 1.752-6 liabilities (partnership's assumption of partner's contingent liability after October 18, 1999, and before June 24, 2003) and Treas. Reg. 1.752-7 liabilities (partnership's assumption of partner's contingent liability on or after June 24, 2003). Treas. Reg. 1.752-7 non-liability obligations, known in the regulations as 1.752-7 liabilities, are discussed on the next slide.

Treas. Reg. 1.752-7 prevents the duplication or acceleration of loss from transfers and assumptions of obligations that are not liabilities for IRC 752 purposes. When a partnership assumes a Treas. Reg. 1.752-7 liability from a partner, that partner's outside basis is reduced, but the reduction is deferred until a triggering event affects the partner's share of the liability.

A common example of a Treas. Reg. 1.752-7 liability is an environmental remediation liability. A partnership may have booked a $100,000 liability to clean up pollution on its property from a time when the business improperly disposed of hazardous chemicals in its production processes. That $100,000 was deductible for Generally Accepted Accounting Principles (GAAP) purposes but was not allowed as an immediate deduction on its tax return. The partnership should have reported the environmental remediation expense on Schedule M-1 as an expense allowed for books but not for tax. Although the environmental remediation liability appears on the partnership's GAAP balance sheet in the liability section, it is a non-liability obligation for IRC 752 purposes.

II.C.3.c. Allocations of Recourse and Nonrecourse Liabilities

T.D. 9877 (10/9/2019) explains:

> Section 752 separates partnership liabilities into two categories: Recourse liabilities and nonrecourse liabilities. Section 1.752-1(a)(1) provides that a partnership liability is a recourse liability to the extent that any partner or related person bears the economic risk of loss (EROL) for that liability under § 1.752-2. Section 1.752-1(a)(2) provides that a partnership liability is a nonrecourse liability to the extent that no partner or related person bears the EROL for that liability under § 1.752-2.
>
> A partner generally bears the EROL for a partnership liability if the partner or related person has an obligation to make a payment to any person within the meaning of § 1.752-2(b). For purposes of determining the extent to which a partner or related person has an obligation to make a payment, an obligation to restore a deficit capital account upon liquidation of the partnership under the section 704(b) regulations is taken into account (deficit restoration obligation). Further, for this purpose, § 1.752-2(b)(6) of the existing regulations presumes that partners and related persons who have payment obligations actually perform those obligations, irrespective of their net worth, unless the facts and circumstances indicate a plan to circumvent or avoid the obligation (the satisfaction presumption). However, the satisfaction presumption is subject to an anti-abuse rule in § 1.752-2(j) pursuant to which a payment obligation of a partner or related person may be disregarded or treated as an obligation of another person if facts and circumstances indicate that a principal purpose of the arrangement is to eliminate the partner's EROL with respect to that obligation or create the appearance of the partner or related person bearing the EROL when the substance is otherwise. Under the existing rules, the satisfaction presumption is also subject to a disregarded entity net value requirement under § 1.752-2(k) pursuant to which, for purposes of determining the extent to which a partner bears the EROL for a partnership liability, a payment obligation of a disregarded entity is taken into account only to the extent of the net value of the disregarded entity as of the allocation date that is allocated to the partnership liability.

The rest of this part II.C.3.c describes regulations under Code § 752. Given that changes in liabilities may constitute deemed cash payments, allocation of debt is also important when applying the disguised sale rules; see part II.M.3.e.i.(a) Distributions Presumed to Be Disguised Sales. For regulations under Code § 704(b), see part II.P.1.a.i.(a) General Rules for Allocations of Income in Partnerships.

LB&I Concept Unit, "Determining Liability Allocations," Document Control Number (DCN) PAR-C-004 (last updated 9/15/20) (the "LB&I Concept Unit"), in its "General Overview" explains "Determining Liability Allocations":

> The concept of liability allocation is covered under IRC 752 and the related regulations.
>
> Partnership liability allocations have a major impact on the computation of a partner's basis in his partnership interest (outside basis). A partner must calculate outside basis in many situations, including when he receives a routine distribution of money, when he is allocated a loss, when the partnership redeems his interest in a liquidating distribution, or when he sells his interest in the partnership.

> The partnership reports each partner's share of partnership liabilities at the end of the year on Schedule K-1 Part II, Section K. Liabilities are reported on Schedule K-1 in three categories: recourse, nonrecourse, and qualified nonrecourse. Qualified nonrecourse financing is nonrecourse financing borrowed for use in an activity of holding real property and is primarily relevant for purposes of the at-risk rules (which are beyond the scope of this practice unit). The subchapter K rules for allocating liabilities to partners distinguish only between nonrecourse and recourse debts.
>
> An increase in a partner's share of partnership liabilities is treated as a contribution of money by the partner to the partnership and thus increases his outside basis. A decrease in a partner's share of partnership liabilities is treated as a distribution of money to the partner and thus decreases his outside basis. IRC 752(a) and (b).
>
> Not all liabilities shown on a partnership's tax return balance sheet (Form 1065, Schedule L) are recognized as liabilities for tax purposes.
>
> Treas. Reg. 1.752-1 defines partnership liabilities. In general, for a liability to be recognized for tax purposes, it must (1) create or increase the basis of any of the partnership's assets, (2) give rise to a tax deduction, or (3) give rise to an expense not properly deductible or chargeable to capital. With some liabilities such as environmental obligations, tort obligations, contract obligations, and pension obligations, the obligation might be recognized for Generally Accepted Accounting Principles (GAAP) purposes but do not meet the tests set forth in Treas. Reg. 1.752-1 and do not affect basis for tax purposes until satisfied. For additional information, see the Practice Unit on Recourse vs. Nonrecourse Liabilities.

The LB&I Concept Unit, in its part on Determining Liability Allocations, explains in its Analysis of "Allocating Recourse Liabilities":

> Publication 541 and Treas. Reg 1.752-2 discuss the allocation rules for recourse liabilities.
>
> A partnership liability is a recourse liability to the extent that any partner or a related person has an economic risk of loss for that liability. A partner's share of a recourse liability equals his economic risk of loss for that liability. A partner has an economic risk of loss if that partner or a related person would be obligated, whether by agreement or law, to make a payment to the creditor or a contribution to the partnership with respect to the liability if the partnership were constructively liquidated. A partner who is the creditor for a liability that would otherwise be a nonrecourse liability of the partnership has an economic risk of loss in that liability.
>
> In sum, a partner bears the economic risk of loss if the partner or related person (1) has a payment obligation, Treas. Reg 1.752-2(b) (except for 1.752-2(d)(2)); (2) is a lender to the partnership, 1.752-2(c) (except for 1.752-2(d)(1)); (3) guarantees payment of interest, 1.752-2(e); or (4) pledges property as security for a partnership liability, 1.752-2(h).

Referring to Reg. §§ 1.1001-2, 1.752-4(b), 1.752-2(b)(4),and 1.752-2(d)(2), that analysis continues:

> A partner has an economic risk of loss if that partner or a related person would be obligated, whether by agreement or law, to make a payment to the creditor or a contribution to the partnership with respect to the liability if the partnership were constructively liquidated. This constructive liquidation test is a mechanical test used to quantify the extent of each partner economic risk.
>
> The constructive liquidation test has the following steps that are deemed to occur at the same time:
>
> 1. The partnership liabilities are due and payable in full.
>
> 2. Except for property contributed to secure a partnership liability, the assets held by the partnership are assumed to be worthless (including cash).
>
> 3. The assets are sold in a taxable exchange for zero sales proceeds.
>
> 4. The resulting losses and other attributes are allocated to the partners based on the partnership agreement.
>
> 5. The partnership liquidates.
>
> The result of this hypothetical liquidation will normally produce deficits in the capital accounts of one or more partners. The extent to which a partner would be required to contribute capital to eliminate these deficits represents the extent to which the partner is economically at risk on the recourse debt.

Referring to Reg. §§ 1.752-2(e), 1.704-2(b)(4), and 1.752-2(c), that analysis continues:

> In limited liability companies (LLCs), LLC members are usually not economically at risk on LLC debt, absent a deficit-restoration obligation or member-level guarantee. If, however, an LLC member is economically at risk on an LLC liability, the constructive liquidation test will indicate the extent to which the LLC liability is allocated to that member under the recourse liability rules.
>
> A partner's nonrecourse loan to a partnership is a recourse loan to the partner to the extent another partner does not bear the economic risk of loss.

The LB&I Concept Unit, in its part on Determining Liability Allocations, referring to Reg. § 1.752-2(e), explains in its Analysis of "Allocating Nonrecourse Liability With a Greater Than 25% Interest Guaranteed by a Partner":

> If partner or related person guarantees the payment of more than 25% of the total interest that will accrue on the partnership nonrecourse liability, and the guarantor will be required to pay substantially all of the guaranteed future interest if the partnership fails to do so, then the liability is treated as two separate partnership liabilities. The partner or related person is treated as bearing the economic risk of loss for the liability to the extent of the present value of the guaranteed future interest. The remainder of the stated principal amount of the liability constitutes a nonrecourse liability. This rule does not apply for guarantees that do not exceed the lesser of five years or one-third of the term of the liability. Under a de minimis exception, this rule also does not apply if a partner or

related person is a 10 percent or less partner any year when a partner and guarantees the interest on a partnership loan that is qualified nonrecourse financing.

The LB&I Concept Unit, in its part on Determining Liability Allocations, referring to Reg. § 1.752-3 and 1.752-1(a)(2) and Code § 704(b), (c), explains in its Analysis of "Nonrecourse Debt":

> A partnership liability is a nonrecourse liability if no partner or related person has an economic risk of loss for that liability.
>
> A partner's share of a nonrecourse liability is the sum of the following three components determined in the following order:
>
> 1. The partner's share of partnership IRC 704(b) minimum gain (the amount by which nonrecourse debt exceeds the book basis of property securing the debt)
>
> 2. The partner's share of IRC 704(c) minimum gain. IRC 704(c) minimum gain is amount by which the nonrecourse debt exceeds the tax basis of property securing the debt. This gain is generally allocated to the partner who contributed encumbered property.
>
> 3. The partner's share of excess nonrecourse liabilities (the amount of debt not allocated by steps one and two above).

The LB&I Concept Unit, in its part on Determining Liability Allocations, referring to Code § 704(b) and Reg. §§ 1.704-2, 1.704-1, and 1.752-3(a)(1), explains in its Analysis of "Minimum Gain":

> Determining a partner's share of "minimum gain" is the first of the three steps in determining if nonrecourse debts are allocated properly to a partner.
>
> Minimum gain with respect to each nonrecourse loan is the amount of hypothetical gain (if any) that the partnership would realize if it disposed of the property subject to that liability for no consideration other than full satisfaction of the liability. The amount outstanding on each nonrecourse loan is treated as sales proceeds for property securing the loan. For purposes of this hypothetical sale, the property's basis is the book basis and not the tax basis.
>
> Minimum gain commonly occurs when:
>
> 1. Depreciation deductions on the property securing the debt reduce the property's basis below the balance on the debt;
>
> 2. The partnership refinances the debt or takes out additional nonrecourse loans using partnership property as collateral; or
>
> 3. The partnership makes a nonrecourse distribution to its partners. This occurs when the partnership borrows against the property on a nonrecourse basis and distributes the proceeds to is partners. If the resulting liability exceeds the securing property's book basis, the difference will result in minimum gain.

Consider whether a book-up with certain partnership changes may affect this allocation.[398] If that causes an unfavorable impact, consider a different way to document reverse-Code § 704(c) allocations.[399]

The LB&I Concept Unit, in its part on Determining Liability Allocations, referring to Code § 704(c) and Reg. § 1.752-3(a)(2), explains in its Analysis of "Nonrecourse Liability Allocation Under IRC 704(c) IRC 704(c) Minimum Gain":

> The second of the three steps in determining if a partnership has allocated nonrecourse liabilities correctly is to see if there is any IRC 704(c) minimum gain. IRC 704(c) minimum gain usually occurs when a partner contributes property subject to nonrecourse debt and the fair market value of the property is greater than its tax basis. This "built in" gain is known as IRC 704(c) gain. The excess of the nonrecourse debt over the tax basis of the contributed property is the amount of IRC 704(c) minimum gain. That is, it is the amount of IRC 704(c) gain that the contributing partner would recognize if the lender foreclosed on the contributed property and the partnership received nothing other than relief of the liability.
>
> One way to determine if a partner contributed built-in gain property is to review the partners' Schedules K-1 and see if Part II, Section M indicates that the partner contributed property with a built-in gain or loss.

The LB&I Concept Unit, in its part on Determining Liability Allocations, referring to Reg. § 1.752-3(a)(3) and Rev. Rul. 95-41, explains in its Analysis of "Excess Nonrecourse Liabilities":

> The third of the three steps in allocating nonrecourse liabilities is to allocate the excess nonrecourse liabilities; i.e., the amount left over after allocating under the first and second steps.
>
> Generally, excess nonrecourse liabilities are allocated to the partners in proportion to how they share profits.
>
> The partnership may specify in the partnership agreement each partner's share of profits for purposes of allocating excess nonrecourse liabilities. The shares specified must be consistent with allocations of other significant items of partnership income and gain having substantial economic effect. All the facts and circumstances of the economic arrangement of the partners must be taken into account.
>
> The partnership can also allocate excess nonrecourse liabilities in the same manner it reasonably expects to allocate deductions attributable to the nonrecourse liabilities.

The LB&I Concept Unit, in its part on Determining Liability Allocations, provides an example of "Allocation of a Nonrecourse Liability":

> X and Y form Partnership XY, a general partnership. X contributes $40 and Y contributes $360.

---

[398] See Reg. § 1.704-1(b)(2)(iv)(f), which is reproduced in fn 507 in part II.C.7 Maintaining Capital Accounts.
[399] See text accompanying fn in part .

Partnership XY purchases a building for $2,000 and obtains a loan of $1,600 with the building securing the loan.

Depreciation expense is $180 per year and is allocated 75% to X and 25% to Y. All other expenses are allocated 50% to each partner.

Partnership XY pays only interest on the loan for the first 5 years. As of the end of year 3, the building has an adjusted tax basis of $1,460 ($2,000 original cost basis – $540 tax depreciation).

Because Partnership XY made no principal payments on the loan, the balance of the loan is still $1,600. The reduction in adjusted tax basis below the loan balance results in IRC 704(b) “minimum gain” of $140 ($1,600 loan balance - $1,460 tax basis).

1. The liability is first allocated in accordance with how the partners share minimum gain. The minimum gain resulted from nonrecourse depreciation deductions (75%/25%). X’s share of minimum gain = $105 ($140 multiplied by 75%) and Y’s share = $35 ($140 multiplied by 25%).

2. Since the building was purchased by the partnership, it was not contributed by either partner. Under these facts, there is no IRC 704(c) minimum gain.

3. The partnership allocates the remaining liability, $1,460 ($1,600 total balance minus $140 minimum gain) equally based on how the partners share items other than depreciation, $730 each.

The result is that X’s share of nonrecourse liabilities is $835 ($105 minimum gain plus $730 excess nonrecourse liabilities) and Y’s share is $765 ($35 minimum gain plus $730 excess nonrecourse liabilities).

The LB&I Concept Unit, in its part on Determining Liability Allocations, provides an example of “Allocation of a Recourse Liability”:

A and B form Partnership AB, a general partnership. A contributes $40,000 and B contributes $40,000.

The partnership borrows $120,000 on a fully recourse basis and purchases a building for $200,000. Partnership AB allocates losses 90% to A and 10% to B.

Both A and B are jointly and severally liable for the loan and the partnership agreement provides each has a full deficit restoration obligation.

In a constructive liquidation, Partnership AB’s assets are deemed worthless and “sold” in a taxable transaction resulting in a loss of $200,000 (the basis of the building).

The resulting loss of $200,000 is allocated as follows:

A $180,000 ($200,000 multiplied by 90%).

B $20,000 ($200,000 multiplied by 10%).

The impact of the loss on the partners’ capital accounts is as follows:

	Partner A	Partner B
Beginning Capital	$40,000	$40,000
Loss on hypothetical sale	($180,000)	($20,000)
Ending Capital	($140,000)	$20,000

> The extent to which any partner is required to restore a negative capital account reflects the extent the partner's economic risk on the recourse debt. All facts and circumstances must be developed in the analysis, as other items may affect the requirement to restore the deficit. Such items may include contractual obligations outside of the partnership agreement (e.g. indemnification agreements, loss limiting arrangements, etc.).

II.C.3.c.i. Definition of "Recourse" or "Nonrecourse"

"A partnership liability is a recourse liability to the extent that any partner or related person bears the economic risk of loss" under Reg. § 1.752-2.[400]

"A partnership liability is a nonrecourse liability to the extent that no partner or related person bears economic risk of loss for that liability" under Reg. § 1.752-2.[401]

"A partner's share of a recourse partnership liability equals the portion of that liability, if any, for which the partner or related person bears the economic risk of loss."[402]

LB&I Concept Unit, "Recourse vs. Nonrecourse Liabilities," Document Control Number (DCN) PAR-C-003 (last updated 9/29/2020) (the "Concept Unit"), explains in its General Overview of "Recourse vs. Nonrecourse Liabilities":

> This Practice Unit addresses the definition of liabilities for federal income tax purposes in the context of partnerships. Both recourse and nonrecourse liabilities are discussed in this Unit. Rules for allocating partnership liabilities among the partners are covered in a separate Concept Unit, Determining Liability Allocation.
>
> Understanding partnership liabilities is critical to understanding a partner's outside basis. Outside basis is a partner's basis in his partnership interest. A partner's outside basis is the sum of his capital account plus his share of the partnership's liabilities. A separate Practice Unit, Partner's Outside Basis, provides an overview of how to calculate a partner's outside basis in a partnership interest.
>
> As previously stated, a partner's outside basis in his partnership interest is the sum of his capital account plus his share of the partnership's liabilities. An increase in a partner's share of partnership liabilities is treated as a contribution of money by the partner to the partnership and thus increases his outside basis. A decrease in a partner's share of partnership liabilities is treated as a distribution of money to the partner and thus decreases his outside basis. IRC 752(a) and (b). Each partnership liability is part of at least one partner's outside basis.

---

[400] Reg. § 1.752-1(a)(1).
[401] Reg. § 1.752-1(a)(2).
[402] Reg. § 1.752-2(a).

> Liabilities affect partnerships and their partners (and limited-liability companies treated as partnerships and their members) differently from any other types of flow-through entity. Generally, S corporation shareholders and owners of interests in trusts cannot include the respective entity's liabilities in calculating their ownership basis in the entity.

The Concept Unit's definition of liabilities is quoted in part II.C.3.b What Is a "Liability".

Referring to the IRS' Practice Unit, "Partner's Outside Basis," the Concept Unit, in its "Detailed Explanation of the Concept" focusing on "Recourse vs. Nonrecourse Liabilities," explains in its analysis of "Recourse vs. Nonrecourse Liabilities":

> After determining that a partnership's obligation is an IRC 752 liability, the next step is to determine if the liability is recourse or nonrecourse.
>
> There are two important reasons to make this determination:
>
> 1. A partner's allocable share of partnership liabilities increases outside basis. The amount of outside basis has significant tax consequences in several situations. See Practice Unit, Partner's Outside Basis. However, recourse and nonrecourse liabilities are allocated among partners under two different regimes.
>
> 2. Unrepaid recourse debt forgiven by a creditor gives rise to ordinary cancellation-of-debt income. Nonrecourse debt forgiven by a creditor is generally treated as an amount realized on the sale or exchange of the asset securing the nonrecourse debt. The debt forgiveness can potentially result in taxable gain.

Referring to Reg. § 1.752-2, the Concept Unit, in its "Detailed Explanation of the Concept" focusing on "Recourse vs. Nonrecourse Liabilities," explains in its analysis of "Recourse Liabilities":

> A partnership liability is a recourse liability to the extent a partner or related person bears the economic risk of loss for the liability. In other words, if the partnership were unable to pay the creditor, the extent to which a partner would be obligated to pay the debt from personal funds, with no right of reimbursement from another partner, indicates the partner's economic risk of loss.
>
> To determine each partner's economic risk of loss, the regulations post a worst-case scenario in which all of the partnership's assets (including cash) become worthless and the partnership's liabilities become due and payable. In this worst-case scenario, the partnership sells its assets for no consideration and liquidates. The impact of the partnership's allocations on the partners' capital accounts indicates the partners' economic risk of loss. The extent to which a partner must contribute to the partnership to eliminate a capital account deficit or directly pay the partnership's creditors represents the partner's economic risk of loss.
>
> It is important to note that all the facts and circumstances come into play in this worst-case scenario. In addition to the terms of the partnership agreement and the terms of the partnership's loan agreement(s), there may be other documents that impact the partner's ultimate risk of loss, for example:
>
> - Side agreements;

- Reimbursement agreements;
- Guarantees;
- Indemnification agreements;
- Provision of applicable state law.

That analysis continues, referring to *Uniform Partnership Act*, Part III, Sec. 15, Nature of Partner's Liability; *Revised Uniform Partnership Act*, Article 3, Sec. 306, Partner's Liability; *Uniform Limited Partnership Act*, Sec. 7, Limited Partner Not Liable to Creditors; *Revised Uniform Limited Partnership Act*, Sec. 303, No Liability as Limited Partner for Limited Partnership; and *Uniform Limited Liability Company* Act, Sec. 304, Liability of Members and Managers:

> In a general partnership, state law ordinarily provides that the partners are personally liable for the partnership liabilities, except for those that are expressly nonrecourse. For example, in the case of a recourse mortgage on real property, if the partnership was unable to pay the mortgage and the lender foreclosed, the partners would be obligated to pay any deficiency out of their own assets.
>
> Similarly, in a limited partnership, state law generally provides that the general partners are personally liable for partnership liabilities. Limited partners are not personally liable for any unpaid debts of the partnership, except to the extent they have a deficit restoration obligation.
>
> Members of a limited liability company (LLC) taxed as a partnership are generally treated under state law as limited partners in a limited partnership. LLC liabilities are generally allocated to partners in a manner similar to nonrecourse liabilities.
>
> While the resources in the right pane lists various provisions of "uniform" statutes for partnerships and LLCs, it is critically important to research the state law that applies to the entity under examination to determine which uniform statute provisions the applicable state adopted. The entity's operating agreement should specify which state law applies.

Referring to Reg. § 1.752-2, that analysis continues:

> As previously stated, it is important to review all of the facts and circumstances when determining a partner's economic risk of loss. For example, a partner may actually bear economic risk of loss even if a debt is labeled as nonrecourse. Debt labeled as nonrecourse is treated as recourse if:
>
> 1. The partner is also the creditor; i.e., the partner lent money to the partnership;
> 2. The partner is related to the creditor; or
> 3. The partner guarantees an otherwise nonrecourse liability.

Referring to Reg. § 1.752-3, the Concept Unit, in its “Detailed Explanation of the Concept” focusing on “Recourse vs. Nonrecourse Liabilities,” explains in its analysis of “Nonrecourse Liabilities”:

> A partnership liability is nonrecourse if no partner, or person related to a partner, bears the economic risk of loss. In the partnership context, a nonrecourse liability is only paid in full out of the partnership’s profits.
>
> There are generally two types of nonrecourse liabilities:
>
> 1. Unsecured liabilities.
>
> 2. Secured Liabilities, such as automobile loans, that are secured by property.
>
> Unsecured liabilities are not backed by any collateral. In this situation, the lender has limited protection against any default. While the lender may sell the debt on the secondary market and report the default to credit agencies, the lender may not enforce payment against the partners. However, if the nonrecourse debt is collateralized by property, the lender may foreclose on the property. Nonrecourse debt in the context of real estate partnership is typically secured by the underlying property.
>
> A detailed discussion of qualified nonrecourse liabilities is beyond the scope of this Practice Unit. In most cases, qualified nonrecourse financing involves nonrecourse liabilities secured by real estate used in the activity of holding real property, most commonly nonrecourse real estate mortgages.

Referring to Reg. § 1.752-2, the Concept Unit, in its “Detailed Explanation of the Concept” focusing on “Recourse vs. Nonrecourse Liabilities,” explains in its analysis of “Bifurcated Liability”:

> A liability can be both recourse and nonrecourse; this is known as a bifurcated liability. For example, a partnership borrows $1,000,000 on a nonrecourse basis and a partner guarantees $100,000 of the liability. The liability is therefore bifurcated into a nonrecourse portion and a recourse portion that increases the guaranteeing partner’s outside basis.

Referring to Reg. § 1.752-2, the Concept Unit, in its “Detailed Explanation of the Concept” focusing on “Recourse vs. Nonrecourse Liabilities,” explains in its analysis of “Bottom Dollar Payment Obligation”:

> Prior to October 4, 2016, partners were able to engage in “bottom dollar” payment obligations. Using the above example, the partner would only be liable to pay the $100,000 guaranteed amount after the creditor had collected on the first $900,000. Although this was unlikely, the “bottom dollar guarantee” or payment obligation of $100,000 was still allocated to the guaranteeing partner as a recourse debt. In many situations, the guaranteeing partner did not truly bear an economic risk of loss. For obligations entered into after October 4, 2016, the creditor must be able to immediately enforce payment on the guaranteeing partner in order for the partnership to allocate that debt as recourse.

> Guarantees entered into in a binding contract before October 5, 2016, are excepted from this requirement. Also, any obligation may be a bottom dollar payment liability if it is deficit restoration obligation under Treas. Reg. 1.704-1(b).

Referring to IRS AM 2016-001, the Concept Unit, in its “Detailed Explanation of the Concept” focusing on “Recourse vs. Nonrecourse Liabilities,” explains in its analysis of “Bad Boy Guarantees”:

> Generally, “bad boy guarantees” do not convert nonrecourse debt to recourse debt for federal income tax purposes. A bad boy guarantee occurs when a partner’s guarantee of partnership nonrecourse debt is conditioned on certain “nonrecourse carve-out” events described below.
>
> The Associate Chief Counsel (Passthroughs and Special Industries) has identified at least seven nonrecourse carve-out events contained in bad boy guarantees: (1) the borrower fails to obtain the lender’s consent before obtaining subordinate financing or transfer of the secured property; (2) the borrower files a voluntary bankruptcy petition; (3) any person in control of the borrower files an involuntary bankruptcy petition against the borrower; (4) any person in control of the borrower solicits other creditors of the borrower to file an involuntary bankruptcy petition against the borrower; (5) the borrower consents to or otherwise acquiesces or joins in an involuntary bankruptcy or insolvency proceeding; (6) any person in control of the borrower consents to the appointment of a receiver or custodian of assets; or (7) the borrower makes an assignment for the benefit of creditors, or admits in writing or in any legal proceeding that it is insolvent or unable to pay its debts as they come due. IRS AM 2016-001.
>
> Consistent with commercial practices of not treating these guarantees as creating recourse debt, the IRS does not treat bad boy guarantees as creating recourse debt unless the condition actually occurs.

Referring to Reg. § 1.752-2(c), the Concept Unit, in its “Detailed Explanation of the Concept” focusing on “Recourse vs. Nonrecourse Liabilities,” explains in its analysis of “Wrapped Debt”:

> Wrapped debt is a partnership liability owed to a partner or related person that includes (*i.e.*, is wrapped around) underlying debt that a partner or related person owes to an unrelated lender. If the debt is wrapped around a nonrecourse obligation secured by partnership property that is owed to another person, then the partnership liability is treated as two separate liabilities.
>
> Generally, wrapped debt situations occur when a partner contributes real estate to a partnership secured by a pre-existing nonrecourse mortgage. The partnership may not want to pay off the existing mortgage as its interest rate may be very low. The partnership enters into a loan agreement with equivalent terms to the original mortgage and the debtor-partner remains liable for the original mortgage. The original mortgage is the wrapped debt and the partnership loan payable to the partner is the wraparound debt.
>
> Although owed to a partner, the wraparound debt assumes the characteristics of the wrapped debt. Since in this example, the wrapped debt is a nonrecourse mortgage, the wraparound debt is also treated as a nonrecourse liability, even though owed to a partner.

The Concept Unit provides "Examples of the Concept":

> <u>Example 1</u>
>
> Mr. Apple and Mrs. Pear form a partnership to operate a restaurant. Mr. Apple is a general partner who contributes $100,000. Mrs. Pear is a limited partner who contributes $500,000. The partnership buys restaurant equipment for $500,000, which is subject to a note for $400,000. The additional $500,000 that Mrs. Pear contributed is used for working capital. As the general partner, Mr. Apple may be held personally liable for payments on the equipment note. Since Mr. Apple bears the economic risk of loss on the note, the equipment note is a recourse liability.
>
> <u>Example 2</u>
>
> Assume the same facts as in Example 1, except that the equipment was purchased with a nonrecourse note, the seller of the equipment is limited to repossessing the equipment in the event of default on the note, and the seller cannot collect any balance owed from either partner. As neither partner bears the economic risk for the loan (only the lender does), the equipment note is nonrecourse.

II.C.3.c.ii. Allocating Economic Risk of Loss to Recourse Liabilities

LB&I Concept Unit, "Determining Liability Allocations," Document Control Number (DCN) PAR-C-004 (last updated 9/15/20) (the "LB&I Concept Unit"), includes allocating economic risk of loss to recourse liabilities and is reproduced in part II.C.3.c Allocations of Recourse and Nonrecourse Liabilities.

II.C.3.c.ii.(a). Permanent Rules Allocating Economic Risk of Loss to Recourse Liabilities

Reg. § 1.752-2(b)(1) provides that, generally:

> A partner bears the economic risk of loss for a partnership liability to the extent that, if the partnership constructively liquidated, the partner or related person would be obligated to make a payment to any person (or a contribution to the partnership) because that liability becomes due and payable and the partner or related person would not be entitled to reimbursement from another partner or person that is a related person to another partner. Upon a constructive liquidation, all of the following events are deemed to occur simultaneously:
>
> (i) All of the partnership's liabilities become payable in full;
>
> (ii) With the exception of property contributed to secure a partnership liability (see § 1.752-2(h)(2)), all of the partnership's assets, including cash, have a value of zero;
>
> (iii) The partnership disposes of all of its property in a fully taxable transaction for no consideration (except relief from liabilities for which the creditors' right to repayment is limited solely to one or more assets of the partnership);
>
> (iv) All items of income, gain, loss, or deduction are allocated among the partners; and
>
> (v) The partnership liquidates.

In an earlier taxable year to which the above regulation applied as quoted, *Bordelon v. Commissioner*, T.C. Memo. 2020-26 reasoned:[403]

> During the relevant years, Mr. Bordelon was the majority member—a 90% member—of Kilgore LLC. Kilgore LLC reported losses for 2008, and Mr. Bordelon claimed a deduction for 90% of those losses on his 2008 return. The Commissioner disallowed the deduction for lack of basis in the partnership, and Mr. Bordelon agreed to the adjustment for 2008, acknowledging that he had a zero basis in Kilgore LLC. The losses became suspended until such time as Mr. Bordelon acquired a basis in Kilgore LLC.
>
> In 2011 Kilgore LLC borrowed $550,000 from HFB. The loan had a three-year term and a 36-month payment schedule. Mr. Bordelon personally guaranteed the loan. There were no other guarantors on the loan, and no other member of Kilgore LLC had personal liability for any amount of the loan. Nothing in the record indicates that the terms of the loan, including its 36-month payment schedule and three-year term, were not honored; nothing in the record indicates that Mr. Bordelon withdrew his guarantee or was released from his guarantee; and nothing in the record indicates the loan was paid in full before its maturity date in 2014.[13]
>
> > [13] The Commissioner argued that Mr. Bordelon failed to show that the loan was outstanding in 2011. We are persuaded that the loan remained outstanding at the end of 2011. The only means by which the loan could not have remained outstanding in 2011 would be payment in full before the end of 2011 - which we do not find occurred in these cases. Moreover, if we presumed full repayment did in fact occur, then we would further presume repayment would have resulted in a partnership item reported by Kilgore LLC as a distribution to Mr. Bordelon for relief of his recourse liability—a liability which the parties stipulated. See sec. 752(b); see also 26 C.F.R. sec. 301.6231(a)(3)-1(a)(4), Proced. & Admin. Regs. However, neither party provided partnership returns indicating such a discrepancy or issue concerning partnership items relevant to these cases, and the Commissioner failed to raise or present any issue as to any such item or a pending partnership audit (which under TEFRA would preclude us from deciding the instant cases until the TEFRA partnership case was resolved), and thus we hold the matter to be conceded.
>
> Applying the "constructive liquidation" test to these facts, we do not perceive any scenario in which Mr. Bordelon could not be considered economically at risk for the HFB debt to the full extent of his guarantee. There were no other partnership assets securing any of the debt; no other partner was liable for any portion of the debt; and if the debt were due in full, HFB would certainly have sought payment directly from Mr. Bordelon. Thus, we are persuaded that when Mr. Bordelon guaranteed the loan in 2011, it became a recourse obligation to Mr. Bordelon and increased his basis in Kilgore LLC by $550,000,[14] which then allowed him to deduct the same amount in Kilgore LLC losses carried forward from 2008.
>
> > [14] The Commissioner has made no argument (other than disputing that the debt was recourse) against the contention that, when Mr. Bordelon guaranteed the Kilgore Loan in 2011, his basis increased by the full $550,000.

---

[403] *Bordelon* is further discussed in part II.G.4.j At Risk Rules (Including Some Related Discussion of Code § 752 Allocation of Liabilities) in the text accompanying fn 1292.

The following rules apply in computing gain or loss on the deemed disposition of the partnership's assets:

- If the creditor's right to repayment of a partnership liability is limited solely to one or more assets of the partnership, gain or loss is recognized in an amount equal to the difference between the amount of the liability that is extinguished by the deemed disposition and the tax basis[404] in those assets.[405]

- A loss is recognized equal to the remaining tax basis[406] of all the partnership's assets not taken into account in the bullet point above.[407]

T.D. 9877, "Liabilities Recognized as Recourse Partnership Liabilities Under Section 752," RIN 1545-BM83 (10/9/2019), explains in its "Summary of Comments and Explanations of Revisions":

> ***1. Bottom Dollar Payment Obligations***
>
> **A. Obligations Treated as Bottom Dollar Payment Obligations**
>
> The 752 Temporary Regulations provide that a bottom dollar payment obligation is not recognized as a payment obligation for purposes of § 1.752-2. The 752 Temporary Regulations provide that a bottom dollar payment obligation is the same as or similar to one of the following three types of payment obligations or arrangements: (1) With respect to a guarantee or similar arrangement, any payment obligation other than one in which the partner or related person is or would be liable up to the full amount of such partner's or related person's payment obligation if, and to the extent that, any amount of the partnership liability is not otherwise satisfied; (2) with respect to an indemnity or similar arrangement, any payment obligation other than one in which the partner or related person is or would be liable up to the full amount of such partner's or related person's payment obligation, if, and to the extent that, any amount of the indemnitee's or benefited party's payment obligation is recognized; and (3) an arrangement with respect to a partnership liability that uses tiered partnerships, intermediaries, senior and subordinate liabilities, or similar arrangements to convert what would otherwise be a single liability into multiple liabilities if, based on the facts and circumstances, the liabilities were incurred pursuant to a common plan, as part of a single transaction or arrangement, or as part of a series of related transactions or arrangements, and with a principal purpose of avoiding having at least one of such liabilities or payment obligations with respect to such liabilities being treated as a bottom dollar payment obligation. A payment obligation is not a bottom dollar payment obligation merely because a maximum amount is placed on the partner's or related person's payment obligation, a partner's or related person's payment obligation is stated as a fixed

---

404 Or book value, to the extent Code § 704(c) or Reg. § 1.704-1(b)(4)(i) applies. See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.
405 Reg. § 1.752-2(b)(2)(i).
406 Or book value, to the extent Code § 704(c) or Reg. § 1.704-1(b)(4)(i) applies. See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.
407 Reg. § 1.752-2(b)(2)(ii).

percentage of every dollar of the partnership liability, or there is a right of proportionate contribution running between partners or related persons who are co-obligors with respect to a payment obligation for which each of them is jointly and severally liable. The 752 Temporary Regulations also provide an exception to the non-recognition rule of bottom dollar payment obligations. That is, a bottom dollar payment obligation is recognized when a partner or related person is liable for at least 90 percent of the partner's or related person's initial payment obligation despite an indemnity, a reimbursement agreement, or a similar arrangement.

One commenter stated that the 752 Temporary Regulations are conceptually flawed, result in inconsistent answers, and are directly contrary to Congressional intent. That commenter explained that the prior regulations appropriately followed Congress's mandate that debt is allocated by a partnership to the partners who bear the EROL with respect to the debt. See Section 79 of the Deficit Reduction Act of 1984 (Pub. L. 98-369) overruling the decision in *Raphan v. United States*, 3 Cl.Ct. 457 (1983) (holding that a guarantee on a partnership liability by a general partner did not require that partner to be treated as personally liable for that liability and did not preclude the other partners who did not guarantee the loan from sharing in the step up in basis on account of the debt). The commenter argued that the 752 Temporary Regulations instead treat all guarantees as bottom dollar payment obligations which do not create EROL unless the partner is liable for the full amount of that partner's or related person's payment obligation if, and to the extent that, any amount of the partnership liability is not otherwise satisfied. The commenter asserted that, under the 752 Temporary Regulations, all guarantees below 90 percent of a payment obligation are ignored, even if the partnership and the partners believe that the guaranteeing partner bears the EROL with respect to the payment obligation.

As an example of these concerns, the commenter pointed to the different results in Examples 10 and 11 in § 1.752-2T(f). In Examples 10 and 11, A, B, and C are equal members of a partnership, ABC. ABC borrows $1,000 from Bank. In Example 10, A guarantees up to $300 of the liability if any amount of the $1,000 liability is not recovered by Bank, while B guarantees payment of up to $200, but only if Bank otherwise recovers less than $200. In Example 11, C additionally agrees to indemnify A for up to $100 that A pays with respect to A's guarantee. The comment explained that, in Example 10, $300 of the liability is recognized and allocated (to A), but in Example 11, only $100 is recognized and allocated (in the amount indemnified by C). The full $300 payment obligation would have been recognized and allocated if made by one partner, but splitting it across two partners caused $200 of the collective payment obligation to be ignored. This result is notwithstanding that $300 of the same first-dollars of the $1,000 partnership liability in the example was guaranteed by the partners.

Although recommending revocation of the 752 Temporary Regulations, this commenter recognized that prior regulations under section 752 allow partners that have no practical economic risk to be allocated debt. As a compromise, this commenter proposed that if the Treasury Department and the IRS are concerned with bottom dollar payment obligations that lack economic reality, the temporary regulations should be replaced with a rule that does not recognize obligations below a certain threshold. The commenter recommended, as an example, that obligations limited to the bottom one-third of a debt obligation not be recognized, but once the obligation is above that threshold, the entire obligation is recognized. The commenter argued that such a rule would provide greater certainty than the 752 Temporary Regulations and recognize that the guarantor has risk.

The 752 Temporary Regulations and these final regulations implement Congressional intent. Bottom dollar payment obligations do not represent real EROL because those payment obligations are structured to insulate the obligor from having to pay their obligations. Moreover, bottom dollar guarantees are not relevant to loan risk underwriting generally. These obligations generally lack a significant non-tax commercial business purpose. Therefore, bottom dollar payment obligations should not be recognized as payment obligations. Despite the commenter's assertion that there could be some risk to partners with bottom dollar payment obligations, the Treasury Department and the IRS received no comments (including from this commenter) on the 752 Temporary Regulations or the 752 Proposed Regulations demonstrating that bottom dollar payment obligations have a significant non-tax commercial business purpose. Nor did any commenter propose an alternative that resolves the concerns raised in the preamble to the 752 Temporary Regulations that, under the prior section 752 regulations, partners and related persons entered into payment obligations that were not commercial solely to achieve an allocation of a partnership liability. The compromise proposal offered by this commenter would significantly lower the threshold for the amount required to be economically at risk from 90 percent of a partner's or related person's initial payment obligation to 33 percent without explaining why the lower threshold is more appropriate. Indeed, the compromise could still allow a partner with no practical economic risk to be allocated debt. These final regulations comport with Congress' directive in response to *Raphan*. Moreover, Examples 10 and 11 in § 1.752-2(f) are not inconsistent with one another, but show how an otherwise recognized payment obligation can become a bottom dollar payment obligation when the initial payment obligor no longer bears the real EROL as a result of a subsequent indemnity. For these reasons, the Treasury Department and the IRS do not adopt the commenter's suggestions.

The 752 Temporary Regulations further require taxpayers to disclose bottom dollar payment obligations by filing Form 8275, Disclosure Statement, or any successor form, with the return of the partnership for the taxable year in which a bottom dollar payment obligation is undertaken or modified. These final regulations clarify that identifying the payment obligation with respect to which disclosure is made includes stating whether the obligation is a guarantee, a reimbursement, an indemnity, or deficit restoration obligation.

B. Capital Contribution and Deficit Restoration Obligations

Generally, the regulations under section 752 provide a description of obligations recognized as payment obligations under § 1.752-2(b)(1). The 752 Temporary Regulations further provide that all statutory and contractual obligations relating to the partnership liability are taken into account for purposes of applying § 1.752-2, including obligations to the partnership that are imposed by the partnership agreement, such as the obligation to make a capital contribution and a deficit restoration obligation. See § 1.752-2T(b)(3).

A commenter expressed concerns that, although it is clear that a capital contribution obligation and a deficit restoration obligation are types of payment obligations to which § 1.752-2 applies, the definition of a bottom dollar payment obligation provides no guidance as to how to determine whether a capital contribution obligation or a deficit restoration obligation is a bottom dollar payment obligation. For example, a deficit restoration obligation does not relate to a particular partnership liability and the proceeds of the deficit restoration obligation may be paid to creditors of the partnership or distributed to other partners. See § 1.704-1(b)(2)(ii)(b)(3). These final regulations thus revise the definition of a bottom dollar payment obligation to specifically address capital contribution obligations and deficit restoration obligations. Section 1.752-2(b)(3)(ii)(C)(1)(iii) in these final regulations provides that a bottom dollar payment obligation includes, with respect to a capital contribution obligation and a deficit restoration obligation, any payment obligation other than one in which the partner is or would be required to make the full amount of the partner's capital contribution or to restore the full amount of the partner's deficit capital account.

C. Anti-Abuse Rule in § 1.752-2(j)(2)

The 752 Temporary Regulations provide that irrespective of the form of the contractual obligation, the Commissioner may treat a partner as bearing the EROL with respect to a partnership liability, or portion thereof, to the extent that: (1) The partner or related person undertakes one or more contractual obligations so that the partnership may obtain or retain a loan; (2) the contractual obligations of the partner or related person significantly reduce the risk to the lender that the partnership will not satisfy its obligations under the loan, or portion thereof; and (3) with respect to the contractual obligations described in (1) or (2), (i) one of the principal purposes of using the contractual obligation is to attempt to permit partners (other than those who are directly or indirectly liable for the obligation) to include a portion of the loan in the basis of their partnership interests, or (ii) another partner, or person related to another partner, enters into a payment obligation and a principal purpose of the arrangement is to cause the payment obligation to be disregarded. See § 1.752-2T(j)(2).

A commenter argued that because this anti-abuse rule is at the Commissioner's discretion, taxpayers are uncertain how to treat certain liabilities that would otherwise be bottom dollar payment obligations. One of the purposes of the 752 Temporary Regulations is to ensure that only genuine commercial payment obligations, including guarantees and indemnities, affect the allocation of partnership liabilities. Indeed, commenters to the 2014 Proposed Regulations noted that partners can manipulate contractual arrangements to achieve a federal income tax result that is not consistent with the economics of an arrangement. This is true both of a payment obligation that does not represent a real EROL as well as an agreement that purposefully creates the appearance of a bottom dollar payment obligation even if that taxpayer (or a person related to that taxpayer) bears the EROL. The anti-abuse rule, therefore, is appropriate. However, in response to comments regarding uncertainty caused because the anti-abuse rule in the 752 Temporary Regulations applied at the Commissioner's discretion, the final regulations remove the discretionary language consistent with the rule in the regulations under section 752 prior to the 752 Temporary Regulations.

D. Applicability Date and Transitional Rule

The 752 Temporary Regulations for bottom dollar payment obligations generally apply to liabilities incurred or assumed by a partnership and payment obligations imposed or undertaken with respect to a partnership liability on or after October 5, 2016, other than liabilities incurred or assumed by a partnership and payment obligations imposed or undertaken pursuant to a written binding contract in effect prior to that date. Under the 752 Temporary Regulations, a transitional rule applies to any partner whose allocable share of partnership liabilities under § 1.752-2 exceeded its adjusted basis in its partnership interest as determined under § 1.705-1 on October 5, 2016 (Grandfathered

Amount). To the extent of that excess, those partners may continue to apply the prior regulations under § 1.752-2 with respect to a partnership liability for a seven-year period. The amount of partnership liabilities subject to transition relief decreases for certain reductions in the amount of liabilities allocated to that partner under the transitional rule and, upon the sale of any partnership property, for any tax gain (including section 704(c) gain) allocated to the partner less that partner's share of amount realized.

A commenter explained that the rule in § 1.704-2(g)(3) regarding conversions of recourse or partner nonrecourse liabilities into nonrecourse liabilities may overlap and potentially conflict with the transitional rule. This commenter noted that the transitional rule may be unnecessary, but, regardless, believes that the transitional rule should be coordinated with § 1.704-2(g)(3).

Section 1.704-2(g)(3) provides that a partner's share of partnership minimum gain is increased to the extent provided in § 1.704-2(g)(3) if a recourse or partner nonrecourse liability becomes partially or wholly nonrecourse. If a recourse liability becomes a nonrecourse liability, a partner has a share of the partnership's minimum gain that results from the conversion equal to the partner's deficit capital account (determined under § 1.704-1(b)(2)(iv)) to the extent the partner no longer bears the economic burden for the entire deficit capital account as a result of the conversion. The determination of the extent to which a partner bears the economic burden for a deficit capital account is made by determining the consequences to the partner in the case of a complete liquidation of the partnership immediately after the conversion applying the rules described in § 1.704-1(b)(2)(iii)(c) that deem the value of partnership property to equal its basis, taking into account section 7701(g) in the case of property that secures nonrecourse indebtedness. If a partner nonrecourse debt becomes a nonrecourse liability, the partner's share of partnership minimum gain is increased to the extent the partner is not subject to the minimum gain chargeback requirement under § 1.704-2(i)(4). The commenter asserts that § 1.704-2(g)(3) increases a partner's share of minimum gain which increases the partner's capital account to reflect the same result as if nonrecourse deductions had been taken all along. The gain, if it would have been triggered as a result of a partner's negative section 704(b) account with no deficit reduction obligation, is deferred because under § 1.704-2(g)(3), the partner's share of minimum gain increases. The commenter argues that § 1.752-3(a)(1) or (2) would apply to allocate the nonrecourse liability to the partner and, therefore, the partner would still be allocated a share of the partnership liability eliminating the need for the transitional rule.

Notwithstanding the rule in § 1.704-2(g)(3), the transitional rule is necessary to address certain situations when § 1.704-2(g)(3) would not apply because, for example, before these regulations were finalized, a bottom dollar deficit restoration obligation is regarded for section 704 purposes, but is disregarded for section 752 purposes. In that case, a partner could recognize gain under section 731 without the transitional rule. Additionally, because § 1.752-3(a)(1) and (2) do not apply in determining a partner's share of a partnership nonrecourse liability for disguised sale purposes, a disguised sale could occur if a partner's share of liabilities under § 1.752-3(a)(3) does not cover the Grandfathered Amount.

To the extent that the transitional rule applies to a partner's share of a recourse partnership liability as a result of the partner bearing the EROL under § 1.752-2(b), the partner's share of the liability can continue to be determined under § 1.752-2 and is not converted into a nonrecourse liability under § 1.752-3. In this situation, because a recourse or partner nonrecourse liability does not become partially or wholly nonrecourse as a result of the transitional rule, the rule in § 1.704-2(g)(3) would not apply until the expiration of the seven-year period. If a partner does not want to apply the transitional rule in determining its share of a partnership liability because it believes that the rule in § 1.704-2(g)(3) effectively defers any negative tax consequences that could occur when a recourse or partner nonrecourse liability becomes partially or wholly nonrecourse, the partner must then apply the rules under § 1.752-2, as amended after October 5, 2016, in determining its share of a partnership liability.

This commenter also noted that the transitional rule should clarify whether it applies to refinanced liabilities. The bottom dollar payment obligation rules do not apply to liabilities incurred or assumed by a partnership and payment obligations imposed or undertaken pursuant to a written binding contract in effect before October 5, 2016. The preamble to the 752 Temporary Regulations explains that commenters on the 2014 Proposed Regulations had recommended that partnership liabilities or payment obligations that are modified or refinanced continue to be subject to the provisions of the previous regulations to the extent of the amount and duration of the pre-modification (or refinancing) liability or payment obligation. The preamble explains that the 752 Temporary Regulations do not adopt this recommendation as the terms of the partnership liabilities and payment obligations could be changed, which would affect the determination of whether or not an obligation is a bottom dollar payment obligation, but instead provided transition relief. Under the transitional rule, if a debt entered into before October 5, 2016, is not refinanced, these final regulations do not apply. If the debt is refinanced, then these regulations apply, but the partner could instead choose to apply the transitional rule to the extent of the Grandfathered Amount. Although the transitional rule in the 752 Temporary Regulations applies to modified or refinanced obligations, these final regulations further clarify that the transitional rule applies to modified and refinanced liabilities.

2. Additional Guidance on Disregarding Purported Payment Obligations

A. Deficit Restoration Obligation Factors

The 752 Proposed Regulations add a list of factors to § 1.704-1(b)(2)(ii)(c) that are similar to the factors in the proposed anti-abuse rule under § 1.752-2(j) (discussed in Section 2.B. of the Summary of Comments and Explanations of Revisions in this preamble), but specific to deficit restoration obligations, to indicate when a plan to circumvent or avoid an obligation exists. If a plan to circumvent or avoid an obligation exists, the obligation is disregarded for purposes of sections 704 and 752. Under proposed § 1.704-1(b)(2)(ii)(c), the following factors indicate a plan to circumvent or avoid an obligation: (1) The partner is not subject to commercially reasonable provisions for enforcement and collection of the obligation; (2) the partner is not required to provide (either at the time the obligation is made or periodically) commercially reasonable documentation regarding the partner’s financial condition to the partnership; (3) the obligation ends or could, by its terms, be terminated before the liquidation of the partner’s interest in the partnership or when the partner’s capital account as provided in § 1.704-1(b)(2)(iv) is negative; and (4) the terms of the obligation are not provided to all the partners in the partnership in a timely manner.

The Treasury Department and the IRS are aware that a partner's transfer of its deficit restoration obligation to a transferee who agrees to the same deficit restoration obligation could run afoul of the third factor and cause the partner's deficit restoration obligation to be disregarded. However, under these final regulations, the weight to be given to any particular factor depends on the particular facts and the presence or absence of any particular factor is not, in itself, necessarily indicative of whether or not the obligation is respected. The fact that a transferee agrees to the same deficit restoration obligation should be taken into account when determining whether a plan to circumvent or avoid an obligation exists. In addition, these final regulations add an exception to this factor when a transferee partner assumes the obligation.

B. Anti-Abuse Factors Under § 1.752-2(j)(3)

The 2014 Proposed Regulations included a list of factors to determine whether a partner's or related person's obligation to make a payment with respect to a partnership liability (excluding those imposed by state law) would be recognized for purposes of section 752. In response to comments, the 752 Proposed Regulations moved the list of factors to an anti-abuse rule in § 1.752-2(j)(3), other than the recognition factors concerning bottom dollar guarantees and indemnities, which are addressed in the 752 Temporary Regulations. Under the anti-abuse rule in the 752 Proposed Regulations, the following non-exclusive factors are weighed to determine whether a payment obligation should be respected: (1) The partner or related person is not subject to commercially reasonable contractual restrictions that protect the likelihood of payment, (2) the partner or related person is not required to provide commercially reasonable documentation regarding the partner's or related person's financial condition to the benefited party, (3) the term of the payment obligation ends prior to the term of the partnership liability, or the partner or related person has a right to terminate its payment obligation, (4) there exists a plan or arrangement in which the primary obligor or any other obligor with respect to the partnership liability directly or indirectly holds money or other liquid assets in an amount that exceeds the reasonable foreseeable needs of such obligor, (5) the payment obligation does not permit the creditor to promptly pursue payment following a payment default on the partnership liability, or other arrangements with respect to the partnership liability or payment obligation otherwise indicate a plan to delay collection, (6) in the case of a guarantee or similar arrangement, the terms of the partnership liability would be substantially the same had the partner or related person not agreed to provide the guarantee, and (7) the creditor or other party benefiting from the obligation did not receive executed documentation with respect to the payment obligation from the partner or related person before, or within a commercially reasonable period of time after, the creation of the obligation. The weight to be given to any particular factor depends on the particular case and the presence or absence of any particular factor, in itself, is not necessarily indicative of whether or not a payment obligation is recognized under § 1.752-2(b).

A commenter expressed concerns with the listed factors asserting that they are drafted to make an obligation fail (that the debt will be nonrecourse) because an obligation is unlikely to satisfy all seven factors. The commenter also argued that the factors are subject to manipulation by taxpayers who desire nonrecourse debt treatment. Finally, the commenter was concerned with the subjective and speculative inquiry regarding the fourth and sixth factors.

The seven factors are appropriate considerations in determining whether a plan to circumvent or avoid an obligation exists. The 2014 Proposed Regulations provided that a payment obligation with respect to a partnership liability was not recognized under § 1.752-2(b)(3) unless all of the factors were met. At commenters' requests and due to concerns that the rule was too strict, the 752 Proposed Regulations moved the list of factors from the operative rule to the anti-abuse rule where they are now just factors to examine in determining whether a plan to circumvent or avoid an obligation exists. In response to the comment on the 752 Proposed Regulations, however, these final regulations add clarification to the fourth factor that amounts are not held in excess of the reasonably foreseeable needs of an obligor if the partnership purchases standard commercial insurance, such as casualty insurance. Additionally, these final regulations list certain types of commercially reasonable documentation (balance sheets and financial statements) as examples of documents a lender would typically require.

A commenter also requested that the final regulations clarify how the assumption rule in § 1.752-1(d) relates to the factors in § 1.752-2(j). Under § 1.752-1(b), any increase in a partner's share of partnership liabilities, or any increase in a partner's individual liabilities by reason of the partner's assumption of partnership liabilities, is treated as a contribution of money by that partner to the partnership. Conversely, § 1.752-1(c) provides that any decrease in a partner's share of partnership liabilities, or any decrease in a partner's individual liabilities by reason of the partnership's assumption of the individual liabilities of the partner, is treated as a distribution of money by the partnership to that partner. The assumption rule in § 1.752-1(d) applies to determine whether a partner has assumed a partnership liability (treated as a contribution under section 752(a)), or the partnership has assumed a partner liability (treated as a distribution under section 752(b)). Generally under § 1.752-1(d), a person is considered to assume a liability only to the extent that (1) the assuming person is personally obligated to pay the liability; and (2) if a partner or related person assumes a partnership liability, the person to whom the liability is owed knows of the assumption and can directly enforce the partner's or related person's obligation for the liability, and no other partner or person that is a related person to another partner would bear the EROL for the liability immediately after the assumption. Sections 1.752-2 and 1.752-3 provide the rules for determining a partner's share of partnership recourse and nonrecourse liabilities.

The analysis for determining whether a partner or person that is a related person to a partner bears the EROL for a liability for purposes of the assumption rule in § 1.752-1(d) should be the same analysis for determining whether a partner or related person bears the EROL under § 1.752-2, including the factors in § 1.752-2(j) for payment obligations. Therefore, these final regulations add a cross reference in § 1.752-1(d) to clarify that an assumption will be treated as giving rise to a payment obligation only to the extent no other partner or a person related to another partner bears the EROL for the liability as determined under § 1.752-2.

C. Reasonable Expectation of Ability to Satisfy Obligation

The satisfaction presumption in § 1.752-2(b)(6) of the existing regulations is subject to a disregarded entity net value requirement under existing § 1.752-2(k). The 2014 Proposed Regulations expanded the scope of the net value requirement and provided that, in determining the extent to which a partner or related person other than an individual or a decedent's estate bears the EROL for a partnership liability other than a trade payable, a payment obligation is recognized only to the extent of the net value of the partner or related person that, as of the allocation date, is allocated to the liability, as determined under § 1.752-2(k). The 2014 Proposed Regulations also required a partner to provide a statement concerning the net value of a person with a payment obligation (a payment obligor) to the partnership. The preamble to the 2014 Proposed Regulations requested comments concerning whether the net value rule should also apply to individuals and estates and whether the regulations should consolidate these rules under § 1.752-2(k).

Comments on the 2014 Proposed Regulations suggested that if the net value rule is retained, § 1.752-2(k) should be extended to all partners and related persons other than individuals. A commenter expressed concerns that a partner who may be treated as bearing the EROL with respect to a partnership liability would have to provide information regarding the net value of a payment obligor, which is unnecessarily intrusive. Another commenter believed that if the rules requiring net value were extended to all partners in partnerships, the attempt to achieve more realistic substance would be accompanied by a corresponding increase in the potential for manipulation.

The preamble to the 752 Proposed Regulations explains that the Treasury Department and the IRS remain concerned with ensuring that a partner or related person be presumed to satisfy its payment obligation only to the extent that such partner or related person would be able to pay the obligation. After consideration of the comments to the 2014 Proposed Regulations, however, the Treasury Department and the IRS agreed that expanding the application of the net value rules under § 1.752-2(k) may lead to more litigation and may unduly burden taxpayers. Furthermore, net value as provided in § 1.752-2(k) may not accurately take into account future earnings of a business entity, which normally factor into lending decisions. Therefore, the 752 Proposed Regulations proposed to remove § 1.752-2(k) of the existing regulations and instead create a new presumption under the anti-abuse rule in § 1.752-2(j).

Under the presumption in the 752 Proposed Regulations, evidence of a plan to circumvent or avoid an obligation is deemed to exist if the facts and circumstances indicate that there is not a reasonable expectation that the payment obligor will have the ability to make the required payments if the payment obligation becomes due and payable (Presumed Anti-abuse Rule). A payment obligor includes disregarded entities (including grantor trusts). If evidence of a plan to circumvent or avoid the obligation exists or is deemed to exist, the obligation is not recognized under § 1.752-2(b) and therefore the partnership liability is treated as a nonrecourse liability under § 1.752-1(a)(2).

Commenters argued that § 1.752-2(k) should be retained, however, because it provides clarity and certainty to taxpayers. One commenter suggested that if the government believes that the Presumed Anti-abuse Rule is necessary, § 1.752-2(k) should still be retained, or, alternatively, expanded to all partners and related persons other than individuals. This commenter noted that the Presumed Anti-abuse Rule creates uncertainty as it is not clear that taxpayers may proactively assert the Presumed Anti-abuse Rule. The commenter suggested that the final regulations clarify that motive and intent are irrelevant in determining whether the Presumed Anti-abuse Rule applies and that no actual plan to circumvent or avoid an obligation needs to exist.

Expanding the application of § 1.752-2(k) in the existing regulations would unduly burden taxpayers and would not accurately reflect economics. A more accurate reflection of economics is to determine whether a debtor will have the ability to make payments when due, not necessarily to whether the debtor has sufficient assets to satisfy an obligation currently. The Treasury Department and the IRS agree with the commenter, however, that the Presumed Anti-abuse Rule could create confusion and uncertainty. These final regulations, therefore, amend § 1.752-2(k) and clarify how the satisfaction presumption in § 1.752-2(b)(6) relates to § 1.752-2(k) in these final regulations. Amended § 1.752-2(k) applies to all partners of a partnership, including partners that are disregarded entities or grantor trusts.

Under these final regulations, it is assumed that all payment obligors actually perform those obligations, irrespective of their actual net worth, unless the facts and circumstances indicate that at the time the partnership determines a partner's share of partnership liabilities under §§ 1.705-1(a) and 1.752-4(d) there is not a commercially reasonable expectation that the payment obligor will have the ability to make the required payments under the terms of the obligation if the obligation becomes due and payable. A partner or related person's ability to pay may be based on documents such as, but not limited to, balance sheets, income statements, cash flow statements, credit reports, and projected future financial results.

D. General Applicability Date

Except as provided in Section 1.D. of the Summary of Comments and Explanations of Revisions in this preamble relating to bottom dollar payments obligations, these final regulations apply to liabilities incurred or assumed by a partnership and to payment obligations imposed or undertaken with respect to a partnership liability on or after October 9, 2019, other than liabilities incurred or assumed by a partnership and payment obligations imposed or undertaken pursuant to a written binding contract in effect prior to that date.

3. Additional Issues Concerning Partnership Liabilities That Are Outside the Scope of These Regulations

A commenter recommended guidance in determining a partner's amount at risk under section 465 for deficit restoration obligations. This commenter noted that under *Hubert Enterprises, Inc. v. Commissioner*, T.C. Memo. 2008-46, a deficit restoration obligation was not treated as giving a partner at risk basis because the obligation was contingent (because it was dependent upon the partner liquidating his interest) and the amount was uncertain (the deficit restoration obligation covered only the deficit in the partner's capital account at the time of liquidation and did not cover the entire debt obligation at issue). The commenter also recommended providing guidance under section 465 similar to that provided in these final regulations regarding when guarantees will be recognized. Providing guidance concerning section 465 is beyond the scope of these regulations. The Treasury Department and the IRS request comments, however, concerning whether guidance is needed to address issues under section 465.

The commenter recommended that these regulations incorporate standards to determine when a debt is recourse to a partnership under section 1001. The commenter questioned whether that test under section 1001 is performed at the partnership or partner level. These final regulations provide guidance as to how liabilities are allocated

> to partners in a partnership and do not concern how liabilities are characterized to the partnership under section 1001. This comment is thus outside the scope of these regulations.
>
> This commenter also suggested that the Treasury Department and the IRS consider whether the rules in section 357(d) should have been adopted for partnerships since section 357(d)(3) states that the Secretary may also prescribe regulations which provide that the manner in which a liability is treated as assumed under section 357(d) is applied, where appropriate, elsewhere in Title 26. Section 357(d)(1)(A) provides that a recourse liability (or portion thereof) shall be treated as having been assumed if, as determined on the basis of all facts and circumstances, the transferee has agreed to, and is expected to, satisfy such liability (or portion), whether or not the transferor has been relieved of such liability. Section 357(d)(1)(B) provides that except as provided in section 357(d)(2), a nonrecourse liability shall be treated as having been assumed by the transferee of any asset subject to such liability. This recommended change is beyond the scope of these regulations, which are concerned with whether a partnership debt is recourse or non-recourse to a partner in the partnership.
>
> The 752 Proposed Regulations requested comments concerning exculpatory liabilities in response to comments received on the 2014 Proposed Regulations requesting guidance with respect to such liabilities. An exculpatory liability is a liability that is recourse to an entity under state law and section 1001, but no partner bears the EROL within the meaning of section 752. Thus, the liability is treated as nonrecourse for section 752 purposes. The Treasury Department and the IRS, after acknowledging that exculpatory liabilities are beyond the scope of the 752 Proposed Regulations, sought additional comments regarding the proper treatment of an exculpatory liability under regulations under section 704(b) and the effect of such a liability's classification under section 1001. Further, the Treasury Department and the IRS requested additional comments addressing the allocation of an exculpatory liability among multiple assets and possible methods for calculating minimum gain with respect to such liability, such as the so-called "floating lien" approach (whereby all the assets in the entity, including cash, are considered to be subject to the exculpatory liability) or a specific allocation approach. The Treasury Department and the IRS continue to consider the comments received concerning exculpatory liabilities under sections 704 and 752.

Regarding rules governing a bottom-dollar guarantee (BDG), Lipton & Schneider, "Replacing Certainty with Uncertainty-IRS Fumbles with the Final Regulations on Partnership Debt Guarantees," *Journal of Taxation* (1/2020), comment:

> The adoption of the final regulations on BDGs, to the extent that such final regulations merely followed the approach of the temporary regulations which had been in effect since 2016, was fully expected by tax practitioners. Indeed, if the final regulations had simply taken that step, there would have been little controversy.
>
> Although there are theoretical problems with the BDG limitation, in that it runs contrary to the presumption that all of a partnership's assets (including cash) are worthless in order to determine whether a partner bears any risk with respect to a liability, the fact is that most partnerships have been applying these rules for the past three years and were now accustomed to them. Specifically, most partners who previously had made or wanted to make a BDG changed to a vertical slice guarantee (VSG) in which the partner was liable for a percentage of the debt. Thus, if a partnership had $100 of nonrecourse debt that

was secured by Blackacre (which was worth $200), and a partner wanted to be allocated $10 of that debt, under a BDG the partner would have guaranteed the bottom $10, meaning that there was no liability as long as Blackacre had a value of at least $10. In other words, in order for the guarantor to have any loss under the BDG, Blackacre would have had to lose 95% of its value.

Under a VSG, the partner who guaranteed a 10% slice would bear $1 of liability for each $10 lost by the lender. However, because the loan-to-value ratio was 50%, the guarantor under the VSG would not suffer any loss as long as Blackacre was worth at least $100. And even if Blackacre declined in value to $90, the guarantor would, in that case, lose only $1. The risk under a VSG is real and begins with the first dollar of risk born by the lender, but is still modest as long as the debt is adequately collateralized, as this example shows. Thus, in the "real world," these VSGs are a good replacement to the BDGs while still including the "first dollar" risk sharing with the lender.

If the final regulations had stopped there, the adoption of the final regulations to replace the temporary regulations would have resulted in a workable solution for both the IRS and tax practitioners-these rules concerning BDGs have already been internalized by the tax community and are a part of routine transaction planning. However, the inclusion of the Factors Test in the final regulations is a horse of a completely different color.

The discussion of the Factors Test is further below.

Reg. § 1.752-2(b)(3), "Obligations recognized," provides:

(i) *In general*. The determination of the extent to which a partner or related person has an obligation to make a payment under § 1.752-2(b)(1) is based on the facts and circumstances at the time of the determination. To the extent that the obligation of a partner or related person to make a payment with respect to a partnership liability is not recognized under this paragraph (b)(3), § 1.752-2(b) is applied as if the obligation did not exist. All statutory and contractual obligations relating to the partnership liability are taken into account for purposes of applying this section, including—

(A) Contractual obligations outside the partnership agreement such as guarantees, indemnifications, reimbursement agreements, and other obligations running directly to creditors, to other partners, or to the partnership;

(B) Obligations to the partnership that are imposed by the partnership agreement, including the obligation to make a capital contribution and to restore a deficit capital account upon liquidation of the partnership as described in § 1.704-1(b)(2)(ii)(b)(3) (taking into account § 1.704-1(b)(2)(ii)(c)); and

(C) Payment obligations (whether in the form of direct remittances to another partner or a contribution to the partnership) imposed by state or local law, including the governing state or local law partnership statute.

(ii) *Special rules for bottom dollar payment obligations*.

(A) *In general*. For purposes of § 1.752-2, a bottom dollar payment obligation (as defined in paragraph (b)(3)(ii)(C) of this section) is not recognized under this paragraph (b)(3).

(B) *Exception*. If a partner or related person has a payment obligation that would be recognized under this paragraph (b)(3) (initial payment obligation) but for the effect of an indemnity, a reimbursement agreement, or a similar arrangement, such bottom dollar payment obligation is recognized under this paragraph (b)(3) if, taking into account the indemnity, reimbursement agreement, or similar arrangement, the partner or related person is liable for at least 90 percent of the partner's or related person's initial payment obligation.

(C) *Definition of bottom dollar payment obligation*.

(1) *In general*. Except as provided in paragraph (b)(3)(ii)(C)(2) of this section, a bottom dollar payment obligation is a payment obligation that is the same as or similar to a payment obligation or arrangement described in this paragraph (b)(3)(ii)(C)(1).

(i) With respect to a guarantee or similar arrangement, any payment obligation other than one in which the partner or related person is or would be liable up to the full amount of such partner's or related person's payment obligation if, and to the extent that, any amount of the partnership liability is not otherwise satisfied.

(ii) With respect to an indemnity or similar arrangement, any payment obligation other than one in which the partner or related person is or would be liable up to the full amount of such partner's or related person's payment obligation, if, and to the extent that, any amount of the indemnitee's or benefited party's payment obligation that is recognized under this paragraph (b)(3) is satisfied.

(iii) With respect to an obligation to make a capital contribution or to restore a deficit capital account upon liquidation of the partnership as described in § 1.704-1(b)(2)(ii)(b)(3) (taking into account § 1.704-1(b)(2)(ii)(c)), any payment obligation other than one in which the partner is or would be required to make the full amount of the partner's capital contribution or to restore the full amount of the partner's deficit capital account.

(iv) An arrangement with respect to a partnership liability that uses tiered partnerships, intermediaries, senior and subordinate liabilities, or similar arrangements to convert what would otherwise be a single liability into multiple liabilities if, based on the facts and circumstances, the liabilities were incurred pursuant to a common plan, as part of a single transaction or arrangement, or as part of a series of related transactions or arrangements, and with a principal purpose of avoiding having at least one of such liabilities or payment obligations with respect to such liabilities being treated as a bottom dollar payment obligation as described in paragraph (b)(3)(ii)(C)(1)(i), (ii), or (iii) of this section.

(2) *Exceptions*. A payment obligation is not a bottom dollar payment obligation merely because a maximum amount is placed on the partner's or related person's payment obligation, a partner's or related person's payment obligation is stated as a fixed percentage of every dollar of the partnership liability to which such obligation relates, or there is a right of proportionate

contribution running between partners or related persons who are co-obligors with respect to a payment obligation for which each of them is jointly and severally liable.

(3) *Benefited party defined*. For purposes of § 1.752-2, a benefited party is the person to whom a partner or related person has the payment obligation.

(D) *Disclosure of bottom dollar payment obligations*. A partnership must disclose to the Internal Revenue Service a bottom dollar payment obligation (including a bottom dollar payment obligation that is recognized under paragraph (b)(3)(ii)(B) of this section) with respect to a partnership liability on a completed Form 8275, Disclosure Statement, or successor form, attached to the return of the partnership for the taxable year in which the bottom dollar payment obligation is undertaken or modified, that includes all of the following information:

(1) A caption identifying the statement as a disclosure of a bottom dollar payment obligation under section 752.

(2) An identification of the payment obligation with respect to which disclosure is made (including whether the obligation is a guarantee, a reimbursement, an indemnity, or an obligation to restore a deficit balance in a partner's capital account).

(3) The amount of the payment obligation.

(4) The parties to the payment obligation.

(5) A statement of whether the payment obligation is treated as recognized for purposes of this paragraph (b)(3).

(6) If the payment obligation is recognized under paragraph (b)(3)(ii)(B) of this section, the facts and circumstances that clearly establish that a partner or related person is liable for up to 90 percent of the partner's or related person's initial payment obligation and, but for an indemnity, a reimbursement agreement, or a similar arrangement, the partner's or related person's initial payment obligation would have been recognized under this paragraph (b)(3).

(iii) *Special rule for indemnities and reimbursement agreements*. An indemnity, a reimbursement agreement, or a similar arrangement will be recognized under this paragraph (b)(3) only if, before taking into account the indemnity, reimbursement agreement, or similar arrangement, the indemnitee's or other benefited party's payment obligation is recognized under this paragraph (b)(3), or would be recognized under this paragraph (b)(3) if such person were a partner or related person.

A payment obligation is ignored if "subject to contingencies that make it unlikely that the obligation will ever be discharged."[408] Also, if a payment obligation "would arise at a future time

[408] Reg. § 1.752-2(b)(4).

after the occurrence of an event that is not determinable with reasonable certainty, the obligation is ignored until the event occurs."[409]

A partner's or related person's payment obligation with respect to a partnership liability is reduced to the extent that the partner or related person is entitled to reimbursement from another partner or a person who is a related person to another partner.[410] For purposes of determining the extent to which a partner or related person has a payment obligation and the economic risk of loss, it is assumed that all partners and related persons who have obligations to make payments (a payment obligor) actually perform those obligations, irrespective of their actual net worth, unless the facts and circumstances indicate (i)a plan to circumvent or avoid the obligation under Reg. § 1.752-2(j), or (ii) that there is not a commercially reasonable expectation that the payment obligor will have the ability to make the required payments under the terms of the obligation if the obligation becomes due and payable as described in Reg. § 1.752-2(k).[411]

If and to the extent that a partner or a related person makes (or acquires an interest in) a nonrecourse loan to the partnership and the economic risk of loss for a liability is not borne by another partner, that partner bears the economic risk of loss for that liability,[412] unless the partnership interest involved is no more than 10% and the loan is qualified nonrecourse financing.[413] However, wrapped debt nonrecourse debt is allocated to the partner involved only to the extent that the partner added to the amount advanced by the other lender.[414] On the other hand, substantial partners who guarantee the interest on a nonrecourse debt may be treated as having economic risk of loss of part of the loan.[415]

Reg. § 1.752-2(f)(10), Example (10), "Guarantee of first and last dollars," provides:

(i) A, B, and C are equal members of a limited liability company, ABC, that is treated as a partnership for federal tax purposes. ABC borrows $1,000 from Bank. A guarantees payment of up to $300 of the ABC liability if any amount of the full $1,000 liability is not recovered by Bank. B guarantees payment of up to $200, but only if the Bank otherwise recovers less than $200. Both A and B waive their rights of contribution against each other.

(ii) Because A is obligated to pay up to $300 if, and to the extent that, any amount of the $1,000 partnership liability is not recovered by Bank, A's guarantee is not a bottom dollar payment obligation under paragraph (b)(3)(ii)(C) of this section. Therefore, A's payment obligation is recognized under paragraph (b)(3) of this section. The amount of A's economic risk of loss under § 1.752- 2(b)(1) is $300.

(iii) Because B is obligated to pay up to $200 only if and to the extent that the Bank otherwise recovers less than $200 of the $1,000 partnership liability, B's guarantee is a bottom dollar payment obligation under paragraph (b)(3)(ii)(C) of this section and,

---

409 Reg. § 1.752-2(b)(4).
410 Reg. § 1.752-2(b)(5).
411 Reg. § 1.752-2(b)(6). Reg. § 1.752-2(k) is described further below in this part II.C.3.c.ii.
412 Reg. § 1.752-2(c)(1).
413 Reg. § 1.752-2(d)(1). Reg. § 1.752-2(d)(2) provides that guarantees of such loans related to such small ownership do not cause the partner to have economic risk of loss. The reference to qualified nonrecourse financing for the loan or guarantee refers to Code § 465(b)(6) but applies it without regard to the type of activity financed.
414 Reg. § 1.752-2(c)(2).
415 Reg. § 1.752-2(e).

therefore, is not recognized under paragraph (b)(3)(ii)(A) of this section. Accordingly, B bears no economic risk of loss under § 1.752-2(b)(1) for ABC's liability.

(iv) In sum, $300 of ABC's liability is allocated to A under § 1.752-2(a), and the remaining $700 liability is allocated to A, B, and C under § 1.752-3.

Reg. § 1.752-2(f)(11), Example (11), "Indemnification of guarantees," provides:

(i) The facts are the same as in paragraph (f)(10) of this section (Example 10), except that, in addition, C agrees to indemnify A up to $100 that A pays with respect to its guarantee and agrees to indemnify B fully with respect to its guarantee.

(ii) The determination of whether C's indemnity is recognized under paragraph (b)(3) of this section is made without regard to whether C's indemnity itself causes A's guarantee not to be recognized. Because A's obligation would be recognized but for the effect of C's indemnity and C is obligated to pay A up to the full amount of C's indemnity if A pays any amount on its guarantee of ABC's liability, C's indemnity of A's guarantee is not a bottom dollar payment obligation under paragraph (b)(3)(ii)(C) of this section and, therefore, is recognized under paragraph (b)(3) of this section. The amount of C's economic risk of loss under § 1.752-2(b)(1) for its indemnity of A's guarantee is $100.

(iii) Because C's indemnity is recognized under paragraph (b)(3) of this section, A is treated as liable for $200 only to the extent any amount beyond $100 of the partnership liability is not satisfied. Thus, A is not liable if, and to the extent, any amount of the partnership liability is not otherwise satisfied, and the exception in paragraph (b)(3)(ii)(B) of this section does not apply. As a result, A's guarantee is a bottom dollar payment obligation under paragraph (b)(3)(ii)(C) of this section and is not recognized under paragraph (b)(3)(ii)(A) of this section. Therefore, A bears no economic risk of loss under § 1.752-2(b)(1) for ABC's liability.

(iv) Because B's obligation is not recognized under paragraph (b)(3)(ii) of this section independent of C's indemnity of B's guarantee, C's indemnity is not recognized under paragraph (b)(3)(iii) of this section. Therefore, C bears no economic risk of loss under § 1.752-2(b)(1) for its indemnity of B's guarantee.

(v) In sum, $100 of ABC's liability is allocated to C under § 1.752-2(a) and the remaining $900 liability is allocated to A, B, and C under § 1.752-3.

Present value principles may reduce the amount of a payment obligation allocated to a partner if it is not required to be satisfied before the later of a reasonable time after the liability becomes due and payable, the end of the year in which the partner's interest is liquidated, or 90 days after the liquidation.[416]

Pledging property to secure a loan or contributing property to a partnership to secure a loan may cause part or all of the loan to be allocated to the partner who does this.[417]

[416] Reg. § 1.752-2(g).
[417] Reg. § 1.752-2(h).

Special rules apply to tiered partnerships.[418]

Within Reg. § 1.752-2(j), "Anti-abuse rules," Reg. § 1.752-2(j)(1), "In general," provides:

> An obligation of a partner or related person to make a payment may be disregarded or treated as an obligation of another person for purposes of this section if facts and circumstances indicate that a principal purpose of the arrangement between the parties is to eliminate the partner's economic risk of loss with respect to that obligation or create the appearance of the partner or related person bearing the economic risk of loss when, in fact, the substance of the arrangement is otherwise. Circumstances with respect to which a payment obligation may be disregarded include, but are not limited to, the situations described in paragraphs (j)(2) and (j)(3) of this section.

Reg. § 1.752-2(j)(2), "Arrangements tantamount to a guarantee," provides:

(i) *In general*. Irrespective of the form of a contractual obligation, a partner is considered to bear the economic risk of loss with respect to a partnership liability, or a portion thereof, to the extent that—

(A) The partner or related person undertakes one or more contractual obligations so that the partnership may obtain or retain a loan;

(B) The contractual obligations of the partner or related person significantly reduce the risk to the lender that the partnership will not satisfy its obligations under the loan, or a portion thereof; and

(C) With respect to the contractual obligations described in paragraphs (j)(2)(i)(A) and (B) of this section—

(1) One of the principal purposes of using the contractual obligations is to attempt to permit partners (other than those who are directly or indirectly liable for the obligation) to include a portion of the loan in the basis of their partnership interests; or

(2) Another partner, or a person related to another partner, enters into a payment obligation and a principal purpose of the arrangement is to cause the payment obligation described in paragraphs (j)(2)(i)(A) and (B) of this section to be disregarded under paragraph (b)(3) of this section.

(ii) *Economic risk of loss*. For purposes of this paragraph (j)(2), partners are considered to bear the economic risk of loss for a liability in accordance with their relative economic burdens for the liability pursuant to the contractual obligations. For example, a lease between a partner and a partnership that is not on commercially reasonable terms may be tantamount to a guarantee by the partner of the partnership liability.

[418] Reg. § 1.752-2(i).

Regarding the above anti-abuse rule, Lipton & Schneider, “Replacing Certainty with Uncertainty-IRS Fumbles with the Final Regulations on Partnership Debt Guarantees,” *Journal of Taxation* (1/2020) comment:

> The expansion of the BDG rule to cover DROs raised additional corollary problems. The regulations under Section 752 concerning the allocation of liabilities include a specific anti-abuse rule, Reg. 1.752-2(j)(2), under which the Commissioner may treat a partner as bearing the EROL with respect to a partnership liability, or portion thereof, to the extent that: (1) the partner or related person undertakes one or more contractual obligations so that the partnership may obtain or retain a loan; (2) the contractual obligations of the partner or related person significantly reduce the risk to the lender that the partnership will not satisfy its obligations under the loan, or portion thereof; and (3) with respect to the contractual obligations described in (1) or (2), (i) one of the principal purposes of using the contractual obligation is to attempt to permit partners (other than those who are directly or indirectly liable for the obligation) to include a portion of the loan in the basis of their partnership interests, or (ii) another partner, or person related to another partner, enters into a payment obligation and a principal purpose of the arrangement is to cause the payment obligation to be disregarded. (See Reg. 1.752-2T(j)(2).)
>
> However, this rule does not apply to a DRO. To address this problem, 752 Proposed Regulations added a list of factors to Reg. 1.704-1(b)(2)(ii)(c) that are similar to the factors in the anti-abuse rule under Reg 1.752-2(j) (discussed below), but specific to DROs, to indicate when a plan to circumvent or avoid an obligation exists. If a plan to circumvent or avoid an obligation exists, the obligation is disregarded for purposes of Sections 704 and 752 . Under proposed Reg. 1.704-1(b)(2)(ii)(c) , the following factors (the DRO Factors Test) indicate a plan to circumvent or avoid an obligation: (1) the partner is not subject to commercially reasonable provisions for enforcement and collection of the obligation; (2) the partner is not required to provide (either at the time the obligation is made or periodically) commercially reasonable documentation regarding the partner’s financial condition to the partnership; (3) the obligation ends or could, by its terms, be terminated before the liquidation of the partner’s interest in the partnership or when the partner’s capital account as provided in Reg. 1.704-1(b)(2)(iv) is negative; and (4) the terms of the obligation are not provided to all the partners in the partnership in a timely manner.
>
> The inclusion of these factors in determining whether a DRO is respected leads to the major problem in the final regulations-the Factors Test. The Factors Test is applied to determine whether or not an obligation is respected. In other words, if a partner guarantees a loan and the guarantee is not a BDG, so it is otherwise respected as creating a recourse liability, the 2014 Proposed Regulations included a list of factors to determine whether a partner’s or related person’s obligation to make a payment with respect to a partnership liability (excluding those imposed by state law) would be recognized for purposes of Section 752 .
>
> In response to comments, the 752 Proposed Regulations moved the list of factors to an anti-abuse rule in Reg. 1.752-2(j)(3) . Under the anti-abuse rule in the 752 Proposed Regulations, the following non-exclusive factors are weighed to determine whether a payment obligation should be respected: (1) the partner or related person is not subject to commercially reasonable contractual restrictions that protect the likelihood of payment, (2) the partner or related person is not required to provide commercially

reasonable documentation regarding the partner's or related person's financial condition to the benefited party, (3) the term of the payment obligation ends prior to the term of the partnership liability, or the partner or related person has a right to terminate its payment obligation, (4) there exists a plan or arrangement in which the primary obligor or any other obligor with respect to the partnership liability directly or indirectly holds money or other liquid assets in an amount that exceeds the reasonable foreseeable needs of such obligor, (5) the payment obligation does not permit the creditor to promptly pursue payment following a payment default on the partnership liability, or other arrangements with respect to the partnership liability or payment obligation otherwise indicate a plan to delay collection, (6) in the case of a guarantee or similar arrangement, the terms of the partnership liability would be substantially the same had the partner or related person not agreed to provide the guarantee, and (7) the creditor or other party benefiting from the obligation did not receive executed documentation with respect to the payment obligation from the partner or related person before, or within a commercially reasonable period of time after, the creation of the obligation. The weight to be given to any particular factor depends on the particular case and the presence or absence of any particular factor, in itself, is not necessarily indicative of whether or not a payment obligation is recognized under Reg. 1.752-2(b) .

Commenters to the 752 Proposed Regulations criticized the proposed Factors Test on the grounds that it was unlikely that any debt would satisfy all seven factors (including particularly the somewhat ridiculous sixth factor that the terms of the loan changed because of the guarantee). The IRS rejected all of these comments, stating that because the Factors Test was simply part of an anti-abuse rule in determining whether a plan to circumvent or avoid an obligation exists, they should not be of concern in most situations. The final regulations also clarified that (1) with respect to the fourth factor, amounts are not held in excess of the reasonably foreseeable needs of an obligor if the partnership purchases standard commercial insurance, such as casualty insurance and (2) with respect to the second factor, certain types of commercially reasonable documentation (balance sheets and financial statements) are examples of documents a lender would typically require.

Reg. § 1.752-2(j)(3), "Plan to circumvent or avoid an obligation," provides:

(i) G*eneral Rule*. An obligation of a partner or related person to make a payment is not recognized under paragraph (b) of this section if the facts and circumstances evidence a plan to circumvent or avoid the obligation.

(ii) *Factors indicating plan to circumvent or avoid an obligation*. In the case of a payment obligation, other than an obligation to restore a deficit capital account upon liquidation of a partnership, paragraphs (j)(3)(ii)(A) through (G) of this section provide a non-exclusive list of factors that may indicate a plan to circumvent or avoid the payment obligation. The presence or absence of a factor is based on all of the facts and circumstances at the time the partner or related person makes the payment obligation or if the obligation is modified, at the time of the modification. For purposes of making determinations under this paragraph (j)(3), the weight to be given to any particular factor depends on the particular case and the presence or absence of a factor is not necessarily indicative of whether a payment obligation is or is not recognized under paragraph (b) of this section.

(A) The partner or related person is not subject to commercially reasonable contractual restrictions that protect the likelihood of payment, including, for example, restrictions on transfers for inadequate consideration or distributions by the partner or related person to equity owners in the partner or related person.

(B) The partner or related person is not required to provide (either at the time the payment obligation is made or periodically) commercially reasonable documentation regarding the partner's or related person's financial condition to the benefited party, including, for example, balance sheets and financial statements.

(C) The term of the payment obligation ends prior to the term of the partnership liability, or the partner or related person has a right to terminate its payment obligation, if the purpose of limiting the duration of the payment obligation is to terminate such payment obligation prior to the occurrence of an event or events that increase the risk of economic loss to the guarantor or benefited party (for example, termination prior to the due date of a balloon payment or a right to terminate that can be exercised because the value of loan collateral decreases). This factor typically will not be present if the termination of the obligation occurs by reason of an event or events that decrease the risk of economic loss to the guarantor or benefited party (for example, the payment obligation terminates upon the completion of a building construction project, upon the leasing of a building, or when certain income and asset coverage ratios are satisfied for a specified number of quarters).

(D) There exists a plan or arrangement in which the primary obligor or any other obligor (or a person related to the obligor) with respect to the partnership liability directly or indirectly holds money or other liquid assets in an amount that exceeds the reasonably foreseeable needs of such obligor (but not taking into account standard commercial insurance, for example, casualty insurance).

(E) The payment obligation does not permit the creditor to promptly pursue payment following a payment default on the partnership liability, or other arrangements with respect to the partnership liability or payment obligation otherwise indicate a plan to delay collection.

(F) In the case of a guarantee or similar arrangement, the terms of the partnership liability would be substantially the same had the partner or related person not agreed to provide the guarantee.

(G) The creditor or other party benefiting from the obligation did not receive executed documents with respect to the payment obligation from the partner or related person before, or within a commercially reasonable period of time after, the creation of the obligation.

Regarding the above test, Lipton & Schneider, "Replacing Certainty with Uncertainty - IRS Fumbles with the Final Regulations on Partnership Debt Guarantees," *Journal of Taxation* (1/2020) comment:

> The Factors Test is the worst type of tax guidance because it adds both complexity and uncertainty. Every partnership is required to annually provide every partner with a

statement concerning that partner's share of the liabilities of the partnership, including a statement about the partner's share of the recourse and nonrecourse liabilities of the partnership. To make that determination, the partnership needs to know whether a liability is a recourse liability or a nonrecourse liability, since the rules for allocating such liabilities are different. Prior to the adoption of the Factors Test, this was always a straightforward determination because the operating rules were completely clear. The temporary regulations concerning BDGs did nothing to alter this certainty, because the BDG rules provided clear guidance when a liability must be treated as nonrecourse (instead of recourse) because a BDG would be disregarded.

The Factors Test completely alters this reality. The Factors Test sets forth seven individual points, but does not make clear whether any of these factors are more important than the others. Many of the factors have major problems.

To illustrate the problems, let's use a simple example (taken from a current transaction in which your authors are involved). A financial investor is contributing 80% of the equity to a new construction project, and the individual developer is contributing 20% of the equity; the development will be undertaken by an LLC formed for that purpose. The parties have engaged in multiple similar transactions over the past few decades. There will be a loan from either a third-party lender or, alternatively, the financial investor will make a loan to the LLC; if the lender is a third party, it might require a guarantee from the financial investor. In any event, the parties want to have the developer, which has put up 20% of the equity, also share in 20% of all deductions and credits from the project, so the developer will guarantee 20% of the loan, without regard to who the lender is. The guarantee is in the form of a VSG, so the developer is responsible for 20% of all losses to the lender; a copy of the guarantee is always provided to the lender. However, the developer does not provide an annual financial statement to the financial investor (or the lender) because they all know him and do not require it.

The first negative factor is the partner or related person is not subject to commercially reasonable contractual restrictions that protect the likelihood of payment, including restrictions on transfers for inadequate consideration or distributions by the partner to equity owners in the partner. As noted above, the developer in this example is an individual who did not provide a balance sheet to the lender. But what if an individual guarantor provides the lender with a copy of the guarantee and a balance sheet, but the guarantor does not promise he won't take vacations, does not promise not to send his kids to college, and also does not promise that he won't buy any jewelry for his wife? Does this mean that the guarantor has not agreed to "commercially reasonable contractual restrictions to protect the likelihood of payment" of the liability (whatever those are)? The regulations imply that any of these actions might be suspect, because they are all transfers for inadequate consideration by the partner who made the guaranty.

The second negative factor is if the partner or related person is not required to provide commercially reasonable documentation regarding the partner's or related person's financial condition to the benefitted party, including balance sheets and financial statements. Even though the developer/guarantor furnishes a copy of that guarantee to the lender, because the lender does not require a financial statement, the guarantee could be disregarded. This seems an odd result given that the lender knows it is better off with the guarantee than without it (without regard to the net worth of the guarantor).

The third factor applies if the term of the payment obligation ends prior to the term of the partnership liability, or the partner or related person has a right to terminate its payment obligation if the purpose of such limitation is to terminate such payment obligation prior to the occurrence of an event that increases the risk of economic loss to the guarantor or the benefitted party, although this factor is not present if the termination occurs because of an event that decreases the risk of loss, such as completion of construction or satisfaction of a coverage ratio. This factor is not as problematic as the others, because the termination of a guarantee makes the guarantee less worthwhile unless it is terminated for one of the specified events. In other words, the third factor is consistent with commercial reality.

The fourth factor applies if there exists a plan or arrangement in which the primary obligor or any other related person directly or indirectly holds money or other liquid assets in an amount that exceeds reasonably foreseeable needs of such obligor. Implicit in this factor is that if a lender makes a loan to a financially healthy obligor which has significant cash flow, any guarantee of that loan could be disregarded. Does this mean that the tax return preparer will need to examine the cash flow of every partnership which has a guaranteed loan in order to determine whether or not to respect a guarantee? And what if the guarantee is made in year one, when the venture has limited cash flow, but the venture is a success and by year two the partnership is rolling in cash-is the guarantee then disregarded because it is superfluous?

This factor is problematic in our example because the parties fully expect that there will be significant profits from this development-after all, they have done deals together for years, and they keep doing them together because they are profitable. There is a fully recourse VSG, but it might be disregarded because there was no financial need for the guarantee.

The fifth factor applies if the payment obligation does not permit the creditor to promptly pursue payment following a payment default on the partnership liability. This factor does not recognize the commercial reality that most guarantees address ultimate loss to the lender. A lender usually cannot pursue the guarantor of a loan unless and until the primary obligor has failed to pay and all remedies against the primary obligor have been exhausted, but the Factors Test states that a payment obligation must allow the creditor to promptly pursue payment from the guarantor upon a default-and without requiring the creditor to first seek payment from the primary obligor. No well-represented guarantor would ever agree to this request; your authors have been involved in hundreds of transactions in which third-party lenders have required guarantees, and the guarantees have always been of ultimate collection and not initial payment. This is a commercially unreasonable standard.

The most absurd provision in the Factors Test is the sixth factor, which is that in the case of a guarantee, the terms of the partnership liability would be substantially the same had the partner or related person not agreed to provide the guarantee. This determination can NEVER be made. Your authors have never, in decades of experience working with lenders, seen a loan term sheet where the interest rate is x% with a guarantee and y% without it. Instead, lenders may require a guarantee in order to make a loan, or make the loan without a guarantee, but in each case, the loan terms are what they are. There will never be a way for a partnership to establish in hindsight that the terms of the loan would have been different if the guarantee had not been made. So, the final regulations include a factor that can NEVER be satisfied.

Turning to the example, as noted previously, the parties have worked together for years. The lender might be an unrelated bank, or it could be the financial investor itself, but in no circumstances would there be a term sheet setting forth the terms of the financing with or without the guarantee from the developer. Thus, there is no possibility that the sixth factor will ever be satisfied even in a completely arms' length commercial setting.

The seventh factor provides the creditor or other party benefitting from the obligation did not receive executed documents with respect to the payment obligation from the partner or a related person before, or within a commercially reasonable time after, the creation of the obligation. This may be the most reasonable of the factors-it is appropriate for the guarantor to notify the lender of the guarantee. As noted above, in the hypothetical transaction, this requirement will be satisfied.

So two of the factors are reasonable-the others are all commercially unrealistic. A "standard" transaction such as described above will likely fail to meet four or five of the factors, which means there will be significant doubt as to the manner in which the guaranteed liability should be allocated.

The application of the Factors Test to loan guarantees is contrary to commercial reality. This problem is magnified by the IRS's inclusion of a similar test (the DRO Factors Test) in the final regulations to determine whether a DRO is respected. As noted above, the IRS could determine that there was a plan to circumvent an obligation if (1) the partner is not subject to commercially reasonable provisions for enforcement and collection of the obligation; (2) the partner is not required to provide (either at the time the obligation is made or periodically) commercially reasonable documentation regarding the partner's financial condition to the partnership; (3) the obligation ends or could, by its terms, be terminated before the liquidation of the partner's interest in the partnership or when the partner's capital account as provided in Reg. 1.704-1(b)(2)(iv) is negative; and (4) the terms of the obligation are not provided to all the partners in the partnership in a timely manner.

Notwithstanding that comments urged the IRS not to go down this path, the inclusion of the DRO Factors Test in the final regulations will again lead to uncertainty. Your authors have written or reviewed partnership or LLC agreements with DROs (they are not common, but they do happen), and not a single one would satisfy all four of these tests. Indeed, most partners refuse to sign an agreement that includes a DRO because of the economic risk which a DRO creates, yet the regulations do not recognize this reality. If a partner (including particularly an individual) is willing to sign a DRO that is included in the partnership agreement, that should be the end of the inquiry-the DRO should be respected because of the risk entailed. If the partner is not an individual, then the "net value" rule still would serve to address the IRS's concern that the DRO may be illusory. In other words, the DRO Factors Test creates uncertainty for a partnership which needs to determine how to allocate losses, and the partnership needs to take any DRO into account in making this determination.

The inclusion of the Factors Test and the DRO Factors Test in the final regulations is an example of poorly thought out regulatory rulemaking. Because these rules do not appear to take fully into account all of the comments which were made, and because they are arguably inconsistent with Congress' purpose when it provided in Section 752 that a liability must be allocated to the partner who bears the risk of loss, the validity of this aspect of the final regulations could be questioned. However, any argument that a

> regulation is invalid will usually be an uphill battle, and it would be better for the tax system (and the IRS's reputation) if it were to reconsider these rules. It would have been appropriate for the IRS to require that a loan guarantee (or a DRO) had to be provided to a lender (or the other partners) and could not be terminated at will-these are objective facts which are consistent with commercial reality. The remaining factors should be moved to the dustbin in which they belong.

Reg. § 1.752-2(j)(3) provides the following example illustrating the principles of Reg. § 1.752-2(j):

> (i) In 2020, A, B, and C form a domestic limited liability company (LLC) that is classified as a partnership for federal tax purposes. Also in 2020, LLC receives a loan from a bank. A, B, and C do not bear the economic risk of loss with respect to that partnership liability, and, as a result, the liability is treated as nonrecourse under § 1.752-1(a)(2) in 2020. In 2022, A guarantees the entire amount of the liability. The bank did not request the guarantee and the terms of the loan did not change as a result of the guarantee. A did not provide any executed documents with respect to A's guarantee to the bank. The bank also did not require any restrictions on asset transfers by A and no such restrictions exist.
>
> (ii) Under paragraph (j)(3) of this section, A's 2022 guarantee (payment obligation) is not recognized under paragraph (b)(3) of this section if the facts and circumstances evidence a plan to circumvent or avoid the payment obligation. In this case, the following factors indicate a plan to circumvent or avoid A's payment obligation: the partner is not subject to commercially reasonable contractual restrictions that protect the likelihood of payment, such as restrictions on transfers for inadequate consideration or equity distributions; the partner is not required to provide (either at the time the payment obligation is made or periodically) commercially reasonable documentation regarding the partner's or related person's financial condition to the benefited party; in the case of a guarantee or similar arrangement, the terms of the liability are the same as they would have been without the guarantee; and the creditor did not receive executed documents with respect to the payment obligation from the partner or related person at the time the obligation was created. Absent the existence of other facts or circumstances that would weigh in favor of respecting A's guarantee, evidence of a plan to circumvent or avoid the obligation exists and, pursuant to paragraph (j)(3)(i) of this section, A's guarantee is not recognized under paragraph (b) of this section. As a result, LLC's liability continues to be treated as nonrecourse.

Regarding the above example, Lipton & Schneider, "Replacing Certainty with Uncertainty-IRS Fumbles with the Final Regulations on Partnership Debt Guarantees," *Journal of Taxation* (1/2020) commented:

> This example is obviously somewhat unrealistic because A is attempting to rely upon a guarantee that was not provided to the lending institution. However, the example does not treat that factor as dispositive, raising the question whether the guarantee would have been respected if it had been provided to the bank but no documentation of the obligor's net worth was provided. The example also does not address whether A, an individual, had somehow limited the scope of his guarantee or whether all of A's assets, including his home and personal belongings, were available to the bank as a potential creditor. Thus, the example failed to address many of the important facts and focused

mostly on factors which are not meaningful, such as whether A was subject to commercially reasonable contractual restrictions on transfers of assets (ignoring that such transfers could result in an individual bankruptcy).

Tribune Media Company v. Commissioner, T.C. Memo. 2021-122, reasoned and held:

> Even if the business purpose requirement did not apply to the Cubs transaction as a whole, the Commissioner's attempt to discredit the senior debt guaranty is unpersuasive. The purpose of a guaranty is to provide an ultimate payor on a loan if the original obligor is unable to pay. A valid guaranty ensures that the guarantor will shoulder the ultimate economic burden of a debt. Because a guaranty certifies that a debt will be paid, it may convey additional benefits to the parties, such as a favorable interest rate, an improved credit standing, and a payment from the creditor to the guarantor. The Commissioner cites these benefits as proof of a guaranty's "business purpose," and insists that because the senior debt guaranty lacked these enhancements, it is not a valid guaranty. But a guaranty does not require a separate purpose other than pledging ultimate payment for a loan; additional perks may be desired but are not the purpose of the guaranty. Conditioning the validity of a guaranty on its provision of additional extrinsic benefits overlooks its essential function. The Commissioner's position is an incorrect analysis of the circumstances under which we will honor a guaranty. We honor a guaranty if the guarantor has ultimate economic responsibility for the loan. As we discussed at length, Tribune bore ultimate responsibility for the senior debt.
>
> The Commissioner's claim that the senior debt guaranty had no real-world consequences is similarly false. He argues that the senior debt guaranty lacked substance because Tribune did not report it on its financial statements per GAAP guidelines.[178] As Mr. Erickson, an expert for petitioners, credibly testified, Tribune properly followed these guidelines when it reported the guaranties had no contingent or noncontingent value but disclosed its economic exposure from the guaranties. Dr. Skinner, expert for the Commissioner, affirmed that Tribune accurately represented the guaranties on its financial statements. Mr. Erickson also credibly testified that the "GAAP value does not equate to the economic value" because the GAAP calculation measures the likelihood of payment, not the economic value of a guaranty. Dr. Skinner seemed to agree when he calculated the economic value of the guaranties at $6,120,000 to $18,860,000. The Commissioner's claim that Tribune's GAAP reporting reflects the guaranties' true lack of substance is thus inaccurate. The reporting indicates Tribune's assessment that the likelihood it would be called to service the guaranties was remote. As discussed above, a remote possibility that a guaranty will be called is still a possibility and does not invalidate a guaranty. Furthermore, the guaranties had economic value, and the senior debt guaranty is not a sham or an illusory agreement created solely for tax purposes.
>
> [178] The GAAP guidance relevant to Tribune's guaranties was the Financial 178 Accounting Standards Board's Interpretation No. 45 (FIN No. 45), "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including indirect Guarantees of Indebtedness of Others." FIN No. 45 specified that entities must recognize the fair value of guarantees as liabilities on their balance sheet for contingent and noncontingent components of the guarantees. If a guarantee does not have value, GAAP does not require the entity to report its value. But even if an entity's guarantees lack value, it must still disclose its guarantees on financial statements.

The guaranties affected Tribune's credit rating. The Commissioner claims that the credit agencies gave the guaranties "little or no credence," but that is not true. In its credit rating analyses of Tribune, S&P accounted for the guaranties when calculating Tribune's leverage and risk. In its 2016 credit report, it attributed $100 million of CBH's debt to Tribune as a result of the guaranties. According to Ms. Shoesmith, who worked on Tribune's credit report at S&P, this additional $100 million of attributable debt affected Tribune's credit rating by increasing its debt to earnings ratio by 0.4. Not only did S&P give more than "a little" credence to the guaranties, but the guaranties had a real-world effect on Tribune's credit rating. The senior debt guaranty had genuine consequences outside of its tax benefits.

The Commissioner makes two other arguments as to why the senior debt guaranty fails the general anti-abuse rule. First is the Commissioner's claim that the senior debt guaranty was a phony guaranty that was "trumped by the cash-backed competing guarantee of the Ricketts family," the operating support agreement. But the operating support agreement did not guarantee the senior debt and was established to fund necessary Cubs operating costs. In fact, the operating support agreement expressly prohibited CBH from using the operating support agreement funds to satisfy debts. This argument is not persuasive.

Second, the Commissioner states that the senior debt guaranty's status as a collection guaranty makes the likelihood of Tribune's ultimate payment too attenuated. He cites the protections embedded in the senior debt guaranty requiring the lenders to exhaust other legal remedies before seeking payment from Tribune and the protections in the debt structure that minimized the risk of the senior debt guaranty's being called. Collection guaranties are valid guaranties. The regulations in fact provide an example where the partner who has a guaranty of collection is allocated the debt as a recourse liability.[179] We will not invalidate a collection guaranty simply because the lenders must seek payment from other potential sources before turning to the guarantor. Similarly, we will not invalidate a guaranty because the borrowing entity structured its debt to mitigate the risk of default. An entity may (and is perhaps encouraged to) create a debt structure that maximizes its ability to satisfy the terms of its debt agreements. Tribune's foresight on this issue does not invalidate the senior debt guaranty.

[179] Sec. 1.752-2(j)(4), Income Tax Regs.

Reg. § 1.752-2(j)(4), "Example," provides:

(i) In 2020, A, B, and C form a domestic limited liability company (LLC) that is classified as a partnership for federal tax purposes. Also in 2020, LLC receives a loan from a bank. A, B, and C do not bear the economic risk of loss with respect to that partnership liability, and, as a result, the liability is treated as nonrecourse under § 1.752-1(a)(2) in 2020. In 2022, A guarantees the entire amount of the liability. The bank did not request the guarantee and the terms of the loan did not change as a result of the guarantee. A did not provide any executed documents with respect to A's guarantee to the bank. The bank also did not require any restrictions on asset transfers by A and no such restrictions exist.

(ii) Under paragraph (j)(3) of this section, A's 2022 guarantee (payment obligation) is not recognized under paragraph (b)(3) of this section if the facts and circumstances evidence a plan to circumvent or avoid the payment obligation. In this case, the following factors indicate a plan to circumvent or avoid A's payment obligation: the partner is not subject to commercially reasonable contractual restrictions that protect the likelihood of payment, such as restrictions on transfers for inadequate consideration or equity distributions; the partner is not required to provide (either at the time the payment obligation is made or periodically) commercially reasonable documentation regarding the partner's or related person's financial condition to the benefited party; in the case of a guarantee or similar arrangement, the terms of the liability are the same as they would have been without the guarantee; and the creditor did not receive executed documents with respect to the payment obligation from the partner or related person at the time the obligation was created. Absent the existence of other facts or circumstances that would weigh in favor of respecting A's guarantee, evidence of a plan to circumvent or avoid the obligation exists and, pursuant to paragraph (j)(3)(i) of this section, A's guarantee is not recognized under paragraph (b) of this section. As a result, LLC's liability continues to be treated as nonrecourse.

Lipton, "*Tribune Media*: A Split Decision for the Chicago Cubs' Leveraged Partnership Transaction," *Journal of Taxation* (2/2022), asserts:[419]

> The Tax Court stated that its decision in *Tribune Media* was "split" because the taxpayer won in part and the IRS won in part, but in fact this decision is a huge victory for taxpayers. The transaction that the taxpayer utilized in Tribune Media was carefully structured to conform to the terms of the disguised sale regulations that the IRS has promulgated, and the Tax Court did not allow the IRS to avoid the consequences of its own regulations. The court also refused to allow the IRS to utilize generalized anti-abuse rules and the judicial doctrines to recharacterize a transaction that adopted a structure that is expressly contemplated in the Code and regulations. And the court also refused to allow the IRS to disregard a collection guarantee that was issued by a taxpayer where the guarantor had sufficient assets to honor the guarantee if ever called upon to do so, even though the likelihood that such guarantee would be called was remote.
>
> Moreover, the part of the decision that was a "loss" for the taxpayer focused on whether a subordinated loan made by an owner of an entity to that entity should be treated as debt or equity for tax purposes. This aspect of the decision followed well-trod ground and applied principles that have been outstanding for decades. Although one could quibble with how the various factors were applied by the Tax Court in this case, the determination that the Sub Debt had to be treated as equity rather than debt for tax purposes should not come as a complete surprise to tax practitioners.
>
> However, tax planners should be very pleased that the Tax Court refused to accept the IRS' arguments which were aimed at recharacterizing a carefully-structured transaction that followed all of the rules and regulations to obtain a tax benefit. Was the transaction structured to obtain a tax-free distribution of cash to the Tribune – of course it was! Did the regulations allow for this treatment – of course they did! And was this transaction the result of careful tax planning that took into account the terms of the applicable regulations – obviously, it was. The court respected the transaction because its

[419] Additional articles on this case that Lipton wrote include; "What Was the IRS Thinking in Appealing Tribune Media?," 139 JTAX 33 (July 2023); "The Taxpayer and Amicus Appellate Briefs in Tribune Media Throw Tough Pitches at the IRS," 139 JTAX 43 (November 2023); and "More on *Tribune Media*," *Journal of Taxation* (Jan. 2024).

substance was the same as its form, and that form was specifically addressed in the regulations. The court did not allow the IRS to use broad anti-abuse rules and the judicial doctrines in a situation in which the tax results of a transaction were expressly set forth in the applicable law.

So the Tax Court's decision in *Tribune Media* will go down in the books as a win for tax planners who are willing to be meticulous in following the disguised sale regulations. These regulations could apply almost any time that property is contributed to a partnership, so tax practitioners need to be very familiar with them in order to take advantage of the rules (as happened in *Tribune Media*) and to avoid running afoul of these rules. *Tribune Media* is a case that shows that careful tax planning will be rewarded.

Within Reg. § 1.752-2(k), "No reasonable expectation of payment," Reg. § 1.752-2(k)(1), "In general," provides:

> An obligation of any partner or related person to make a payment is not recognized under paragraph (b) of this section if the facts and circumstances indicate that at the time the partnership must determine a partner's share of partnership liabilities under §§ 1.705-1(a) and 1.752-4(d) there is not a commercially reasonable expectation that the payment obligor will have the ability to make the required payments under the terms of the obligation if the obligation becomes due and payable. Facts and circumstances to consider in determining a commercially reasonable expectation of payment include factors a third party creditor would take into account when determining whether to grant a loan. For purposes of this section, a payment obligor includes an entity disregarded as an entity separate from its owner under section 856(i), section 1361(b)(3), or §§ 301.7701-1 through 301.7701-3 of this chapter (a disregarded entity), and a trust to which subpart E of part I of subchapter J of chapter 1 of the Code applies.

Reg. § 1.752-2(k)(2)(i), Example (1), "Undercapitalization," provides:

> (A) In 2020, A forms a wholly owned domestic limited liability company, LLC, with a contribution of $100,000. A has no liability for LLC's debts, and LLC has no enforceable right to a contribution from A. Under § 301.7701-3(b)(1)(ii) of this chapter, LLC is treated for federal tax purposes as a disregarded entity. Also in 2020, LLC contributes $100,000 to LP, a limited partnership with a calendar year taxable year, in exchange for a general partnership interest in LP, and B and C each contributes $100,000 to LP in exchange for a limited partnership interest in LP. The partnership agreement provides that only LLC is required to restore any deficit in its capital account. On January 1, 2021, LP borrows $300,000 from a bank and uses $600,000 to purchase nondepreciable property. The $300,000 is secured by the property and is also a general obligation of LP. LP makes payments of only interest on its $300,000 debt during 2021. LP has a net taxable loss in 2021, and, under §§ 1.705-1(a) and 1.752-4(d), LP determines its partners' shares of the $300,000 debt at the end of its taxable year, December 31, 2021. As of that date, LLC holds no assets other than its interest in LP.
>
> (B) Because LLC is a disregarded entity, A is treated as the partner in LP for federal income tax purposes. Only LLC has an obligation to make a payment on account of the $300,000 debt if LP were to constructively liquidate as described in paragraph (b)(1) of this section. Therefore, paragraph (k) of this section is applied to

the LLC and not to A. LLC has no assets with which to pay if the payment obligation becomes due and payable. Because there is no commercially reasonable expectation that LLC will be able to satisfy its payment obligation, LLC's obligation to restore its deficit capital account is not recognized under paragraph (b) of this section. As a result, LP's $300,000 debt is characterized as nonrecourse under § 1.752-1(a)(2) and is allocated among A, B, and C under § 1.752-3.

Reg. § 1.752-2(k)(2)(ii), Example (2), "Disregarded entity with ability to pay," provides:

(A) The facts are the same as in paragraph (k)(2)(i) of this section (Example 1), except LLC also holds real property worth $475,000 subject to a $200,000 liability. Additionally, LLC reasonably projects to earn $20,000 of net rental income per year from such real property.

(B) Because LLC is a disregarded entity, A is treated as the partner in LP for federal income tax purposes. Only LLC has an obligation to make a payment on account of the $300,000 debt if LP were to constructively liquidate as described in paragraph (b)(1) of this section. Therefore, paragraph (k) of this section is applied to the LLC and not to A. Because there is a commercially reasonable expectation that LLC will be able to satisfy its payment obligation, LLC's obligation to restore its deficit capital account is recognized under paragraph (b) of this section. As a result, LP's $300,000 debt is characterized as recourse under § 1.752-1(a)(1) and is allocated to A under § 1.752-2.

Reg. § 1.752-2(*l*), "Applicability dates," provides:

(1) Paragraphs (a) and (h)(3) of this section apply to liabilities incurred or assumed by a partnership on or after October 11, 2006, other than liabilities incurred or assumed by a partnership pursuant to a written binding contract in effect prior to that date. The rules applicable to liabilities incurred or assumed (or pursuant to a written binding contract in effect) prior to October 11, 2006, are contained in § 1.752-2 in effect prior to October 11, 2006, (see 26 CFR part 1 revised as of April 1, 2006). Paragraphs (b)(6), (j)(3) and (4), and (k) of this section apply to liabilities incurred or assumed by a partnership and to payment obligations imposed or undertaken with respect to a partnership liability on or after October 9, 2019, other than liabilities incurred or assumed by a partnership and payment obligations imposed or undertaken pursuant to a written binding contract in effect prior to that date. However, taxpayers may apply paragraphs (b)(6), (j)(3) and (4), and (k) of this section to all of their liabilities as of the beginning of the first taxable year of the partnership ending on or after October 5, 2016. The rules applicable to liabilities incurred or assumed (or pursuant to a written binding contract in effect) prior to October 9, 2019, are contained in § 1.752-2 in effect prior to October 9, 2019, (see 26 CFR part 1 revised as of April 1, 2019).

(2) Paragraphs (b)(3), (f)(10) and (11), and (j)(2) of this section apply to liabilities incurred or assumed by a partnership and payment obligations imposed or undertaken with respect to a partnership liability on or after October 5, 2016, other than liabilities incurred or assumed by a partnership and payment obligations imposed or undertaken pursuant to a written binding contract in effect prior to that date. Partnerships may apply paragraphs (b)(3), (f)(10) and (11), and (j)(2) of this section to all of their liabilities as of the beginning of the first taxable year of the

partnership ending on or after October 5, 2016. The rules applicable to liabilities incurred or assumed (or subject to a written binding contract in effect) prior to October 5, 2016, are contained in § 1.752-2 in effect prior to October 5, 2016, (see 26 CFR part 1 revised as of April 1, 2016).

(3) If a partner has a share of a recourse partnership liability under § 1.752-2(a) as a result of bearing the economic risk of loss under § 1.752-2(b) immediately prior to October 5, 2016 (Transition Partner), and such liability is modified or refinanced, the partnership (Transition Partnership) may choose not to apply paragraphs (b)(3), (f)(10) and (11), and (j)(2)(i)(C)(2) of this section to the extent the amount of the Transition Partner's share of liabilities under § 1.752-2(a) as a result of bearing the economic risk of loss under § 1.752-2(b) immediately prior to October 5, 2016, exceeds the amount of the Transition Partner's adjusted basis in its partnership interest as determined under § 1.705-1 at such time (Grandfathered Amount). See also § 1.704-2(g)(3). A liability is modified or refinanced for purposes of this paragraph (l) to the extent that the proceeds of a partnership liability (the refinancing debt) are allocable under the rules of § 1.163-8T to payments discharging all or part of any other liability (pre-modification liability) of that partnership or there is a significant modification of that liability as provided under § 1.1001-3. A Transition Partner that is a partnership, S corporation, or a business entity disregarded as an entity separate from its owner under section 856(i) or 1361(b)(3) or §§ 301.7701-1 through 301.7701-3 of this chapter ceases to qualify as a Transition Partner if the direct or indirect ownership of that Transition Partner changes by 50 percent or more. The Transition Partnership may continue to apply the rules under § 1.752-2 in effect prior to October 5, 2016, with respect to a Transition Partner for payment obligations described in § 1.752-2(b) to the extent of the Transition Partner's adjusted Grandfathered Amount for the seven-year period beginning October 5, 2016. The termination of a Transition Partnership under section 708(b)(1)(B) and applicable regulations prior to January 1, 2018,[420] does not affect the Grandfathered Amount of a Transition Partner that remains a partner in the new partnership (as described in § 1.708-1(b)(4)), and the new partnership is treated as a continuation of the Transition Partnership for purposes of this paragraph (*l*)(3). However, a Transition Partner's Grandfathered Amount is reduced (not below zero), but never increased by—

(i) Upon the sale of any property by the Transition Partnership, an amount equal to the excess of any gain allocated for federal income tax purposes to the Transition Partner by the Transition Partnership (including amounts allocated under section 704(c) and applicable regulations) over the product of the total amount realized by the Transition Partnership from the property sale multiplied by the Transition Partner's percentage interest in the partnership; and

(ii) An amount equal to any decrease in the Transition Partner's share of liabilities to which the rules of this paragraph (*l*)(3) apply, other than by operation of paragraph (*l*)(3)(i) of this section.

---

[420] [My footnote:] See part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

II.C.3.c.ii.(b). 1/18/2017-10/13/2019 Temporary Rules Allocating Economic Risk of Loss to Recourse Liabilities

T.D. 9877 (10/9/2019) did the following, the results of which I did not work into my materials below:

> In § 1.752-2T, paragraphs (a) and (b), (c)(1) and (2), (d) through (k), (*l*)(1) through (3), and (m)(1) are removed and reserved.

Reg. § 1.752-2T provided rules that applied until October 13, 2019.[421] All statutory and contractual obligations relating to the partnership liability were taken into account for purposes of applying this part II.C.3.c.ii, including:[422]

(A) Contractual obligations outside the partnership agreement such as guarantees, indemnifications, reimbursement agreements, and other obligations running directly to creditors, to other partners, or to the partnership;

(B) Obligations to the partnership that are imposed by the partnership agreement, including the obligation to make a capital contribution and to restore a deficit capital account upon liquidation of the partnership as described in § 1.704-1(b)(2)(ii)(b)(3) (taking into account § 1.704-1(b)(2)(ii)(c)); and

(C) Payment obligations (whether in the form of direct remittances to another partner or a contribution to the partnership) imposed by state or local law, including the governing state or local law partnership statute.

Reg. § 1.752-2T(b)(3)(ii) disregarded a "bottom dollar payment obligation" unless, taking into account an indemnity, reimbursement agreement, or similar arrangement, the partner or related person is liable for at least 90% of the partner's or related person's initial payment obligation.[423] Subject to an exception, a "bottom dollar payment obligation" was one of the following:[424]

(i) With respect to a guarantee or similar arrangement, any payment obligation other than one in which the partner or related person is or would be liable up to the full amount of such partner's or related person's payment obligation if, and to the extent that, any amount of the partnership liability is not otherwise satisfied.

(ii) With respect to an indemnity or similar arrangement, any payment obligation other than one in which the partner or related person is or would be liable up to the full amount of such partner's or related person's payment obligation, if, and to the extent that, any amount of the indemnitee's or benefited party's payment obligation that is recognized under this paragraph (b)(3) is satisfied.

(iii) An arrangement with respect to a partnership liability that uses tiered partnerships, intermediaries, senior and subordinate liabilities, or similar arrangements to convert what would otherwise be a single liability into multiple liabilities if, based on the facts and circumstances, the liabilities were incurred pursuant to a common plan, as part of a single transaction or arrangement, or as part of a series of related transactions

421 Reg. § 1.752-2T(m), added by T.D. 9788 (10/4/2016), as amended by T.D. 9790 (10/13/2016).
422 Reg. § 1.752-2T(b)(3)(i).
423 Reg. § 1.752-2T(b)(3)(ii)(A), (B).
424 Reg. § 1.752-2T(b)(3)(ii)(C)(1).

> or arrangements, and with a principal purpose of avoiding having at least one of such liabilities or payment obligations with respect to such liabilities being treated as a bottom dollar payment obligation as described in … (i) or (ii) [above].

However:[425]

> A payment obligation is not a bottom dollar payment obligation merely because a maximum amount is placed on the partner's or related person's payment obligation, a partner's or related person's payment obligation is stated as a fixed percentage of every dollar of the partnership liability to which such obligation relates, or there is a right of proportionate contribution running between partners or related persons who are co-obligors with respect to a payment obligation for which each of them is jointly and severally liable.

A partnership must disclose to the Internal Revenue Service a bottom dollar payment obligation (including a bottom dollar payment obligation that is respected) with respect to a partnership liability on a completed Form 8275, Disclosure Statement, for the taxable year in which the bottom dollar payment obligation is undertaken or modified.[426]

An indemnity, reimbursement agreement, or similar arrangement would be recognized under the above rules only if, before taking into account the indemnity, reimbursement agreement, or similar arrangement, the indemnitee's or other benefited party's payment obligation was recognized under these rules, or would be recognized under these rules if such person were a partner or related person.[427] A "benefited party" was "the person to whom a partner or related person has the payment obligation."[428]

The IRS could have disregarded form and treated a partner as bearing the economic risk of loss with respect to a partnership liability, or a portion thereof, to the extent that all of the following were present:[429]

- The partner or related person undertakes one or more contractual obligations so that the partnership may obtain or retain a loan;

- The contractual obligations of the partner or related person significantly reduce the risk to the lender that the partnership will not satisfy its obligations under the loan, or a portion thereof; and

- With respect to the above, ether one of the principal purposes of using the contractual obligations is to attempt to permit partners (other than those who are directly or indirectly liable for the obligation) to include a portion of the loan in the basis of their partnership interests, or another partner, or a person related to another partner, enters into a payment obligation and a principal purpose of the arrangement is to cause the payment obligation described above to be disregarded under this part II.C.3.c.ii.(b).

---

[425] Reg. § 1.752-2T(b)(3)(ii)(C)(2).
[426] Reg. § 1.752-2T(b)(3)(ii)(D).
[427] Reg. § 1.752-2T(b)(3)(iii).
[428] Reg. § 1.752-2T(b)(3)(ii)(C)(3).
[429] Reg. § 1.752-2T(j)(2)(i).

For purposes of the above three bullet points:[430]

> partners are considered to bear the economic risk of loss for a liability in accordance with their relative economic burdens for the liability pursuant to the contractual obligations. For example, a lease between a partner and a partnership that is not on commercially reasonable terms may be tantamount to a guarantee by the partner of the partnership liability.

Prop. Reg. § 1.752-2(j)(3)[431] would attack plans to circumvent an obligation. An obligation of a partner or related person to make a payment would not be recognized under Reg. § 1.752-2(b) (the general rules for allocating recourse liabilities) if the facts and circumstances evidence a plan to circumvent or avoid the obligation.[432] Here are some factors that may indicate a plan to circumvent or avoid the payment obligation, the weight of which may vary (and sometimes a single factor may be determinative):[433]

> (A) The partner or related person is not subject to commercially reasonable contractual restrictions that protect the likelihood of payment, including, for example, restrictions on transfers for inadequate consideration or distributions by the partner or related person to equity owners in the partner or related person.
>
> (B) The partner or related person is not required to provide (either at the time the payment obligation is made or periodically) commercially reasonable documentation regarding the partner's or related person's financial condition to the benefited party.
>
> (C) The term of the payment obligation ends prior to the term of the partnership liability, or the partner or related person has a right to terminate its payment obligation, if the purpose of limiting the duration of the payment obligation is to terminate such payment obligation prior to the occurrence of an event or events that increase the risk of economic loss to the guarantor or benefited party (for example, termination prior to the due date of a balloon payment or a right to terminate that can be exercised because the value of loan collateral decreases). This factor typically will not be present if the termination of the obligation occurs by reason of an event or events that decrease the risk of economic loss to the guarantor or benefited party (for example, the payment obligation terminates upon the completion of a building construction project, upon the leasing of a building, or when certain income and asset coverage ratios are satisfied for a specified number of quarters).

---

[430] Reg. § 1.752-2T(j)(2)(ii).

[431] REG-122855-15, promulgated 10/5/2016.

[432] Prop. Reg. § 1.752-2(j)(3)(i).

[433] Prop. Reg. § 1.752-2(j)(3)(ii) listed the factors quoted in the text that immediately follows, explaining:

> The presence or absence of a factor is based on all of the facts and circumstances at the time the partner or related person makes the payment obligation or if the obligation is modified, at the time of the modification. For purposes of making determinations under this paragraph (j)(3), the weight to be given to any particular factor depends on the particular case and the presence or absence of a factor is not necessarily indicative of whether a payment obligation is or is not recognized under paragraph (b) of this section.

Oral remarks by Clifford Warren of the Internal Revenue Service at the ABA Tax Section Midyear Meeting on January 19, 2017 (which of course do not necessarily represent the government's view) suggested that one factor may show such an intent. I don't remember the example he gave, but it seemed to make a lot of sense when I heard it in the recording.

(D) There exists a plan or arrangement in which the primary obligor or any other obligor (or a person related to the obligor) with respect to the partnership liability directly or indirectly holds money or other liquid assets in an amount that exceeds the reasonable foreseeable needs of such obligor.

(E) The payment obligation does not permit the creditor to promptly pursue payment following a payment default on the partnership liability, or other arrangements with respect to the partnership liability or payment obligation otherwise indicate a plan to delay collection.

(F) In the case of a guarantee or similar arrangement, the terms of the partnership liability would be substantially the same had the partner or related person not agreed to provide the guarantee.

(G) The creditor or other party benefiting from the obligation did not receive executed documents with respect to the payment obligation from the partner or related person before, or within a commercially reasonable period of time after, the creation of the obligation.

For example, under the proposed regulation:

- A guarantee not requested by the lender and not restricting the guarantor's asset transfers may indicate a plan to circumvent or avoid the guarantor's payment obligation.[434]

---

[434] Prop. Reg. § 1.752-2(j)(4), Example (1), "Gratuitous guarantee," provided:

(i) In 2016, A, B, and C form a domestic limited liability company (LLC) that is classified as a partnership for federal tax purposes. Also in 2016, LLC receives a loan from a bank. A, B, and C do not bear the economic risk of loss with respect to that partnership liability, and, as a result, the liability is treated as nonrecourse under § 1.752-1(a)(2) in 2016. In 2018, A guarantees the entire amount of the liability. The bank did not request the guarantee and the terms of the loan did not change as a result of the guarantee. A did not provide any executed documents with respect to A's guarantee to the bank. The bank also did not require any restrictions on asset transfers by A and no such restrictions exist.

(ii) Under paragraph (j)(3) of this section, A's 2018 guarantee (payment obligation) is not recognized under paragraph (b)(3) of this section if the facts and circumstances evidence a plan to circumvent or avoid the payment obligation. In this case, the following factors indicate a plan to circumvent or avoid A's payment obligation: (1) The partner is not subject to commercially reasonable contractual restrictions that protect the likelihood of payment, such as restrictions on transfers for inadequate consideration or equity distributions; (2) the partner is not required to provide (either at the time the payment obligation is made or periodically) commercially reasonable documentation regarding the partner's or related person's financial condition to the benefited party; (3) in the case of a guarantee or similar arrangement, the terms of the liability are the same as they would have been without the guarantee; and (4) the creditor did not receive executed documents with respect to the payment obligation from the partner or related person at the time the obligation was created. Absent the existence of other facts or circumstances that would weigh in favor of respecting A's guarantee, evidence of a plan to circumvent or avoid the obligation exists and, pursuant to paragraph (j)(3)(i) of this section, A's guarantee is not recognized under paragraph (b) of this section. As a result, LLC's liability continues to be treated as nonrecourse.

- The unlimited liability an LLC general partner that has no assets may be disregarded.[435]

Furthermore, evidence of a plan to circumvent or avoid an obligation would be deemed to exist if the facts and circumstances indicate that there was not a reasonable expectation that the payment obligor will have the ability to make the required payments if the payment obligation became due and payable.[436]

Transition rules applied to certain liabilities existing on October 5, 2016.[437]

II.C.3.c.iii. Allocating Nonrecourse (Remaining) Liabilities

After liabilities are allocated to those partners bearing the economic risk under part II.C.3.c.ii Allocating Economic Risk of Loss to Recourse Liabilities, the remaining liabilities constitute nonrecourse liabilities[438] are allocated as described below in this part II.C.3.c.iii.

LB&I Concept Unit, "Determining Liability Allocations," Document Control Number (DCN) PAR-C-004 (last updated 9/15/20) (the "LB&I Concept Unit"), includes allocating nonrecourse liabilities and is reproduced in part II.C.3.c Allocations of Recourse and Nonrecourse Liabilities.

---

[435] Prop. Reg. § 1.752-2(j)(4), Example (2), "Underfunded disregarded entity payment obligor," provided:
(i) In 2016, A forms a wholly owned domestic limited liability company, LLC, with a contribution of $100,000. A has no liability for LLC's debts, and LLC has no enforceable right to a contribution from A. Under § 301.7701-3(b)(1)(ii) of this chapter, LLC is a treated for federal tax purposes as a disregarded entity. Also in 2016, LLC contributes $100,000 to LP, a limited partnership with a calendar year taxable year, in exchange for a general partnership interest in LP, and B and C each contributes $100,000 to LP in exchange for a limited partnership interest in LP. The partnership agreement provides that only LLC is required to restore any deficit in its capital account. On January 1, 2017, LP borrows $300,000 from a bank and uses $600,000 to purchase nondepreciable property. The $300,000 is secured by the property and is also a general obligation of LP. LP makes payments of only interest on its $300,000 debt during 2017. LP has a net taxable loss in 2017, and, under Sec. § 1.705-1(a) and 1.752-4(d), LP determines its partners' shares of the $300,000 debt at the end of its taxable year, December 31, 2017. As of that date, LLC holds no assets other than its interest in LP.
(ii) Because LLC is a disregarded entity, A is treated as the partner in LP for federal income tax purposes. Only LLC has an obligation to make a payment on account of the $300,000 debt if LP were to constructively liquidate as described in paragraph (b)(1) of this section. Therefore, paragraph (j)(3)(iii) of this section is applied to the LLC and not to A. LLC has no assets with which to pay if the payment obligation becomes due and payable. As such, evidence of a plan to circumvent or avoid the obligation is deemed to exist and, pursuant to paragraph (j)(3)(i) of this section, LLC's obligation to restore its deficit capital account is not recognized under paragraph (b) of this section. As a result, LP's $300,000 debt is characterized as nonrecourse under § 1.752-1(a)(2) and is allocated among A, B, and C under § 1.752-3.

[436] Prop. Reg. § 1.752-2(j)(3)(iii), which continues:
For purposes of this section, a payment obligor includes an entity disregarded as an entity separate from its owner under section 856(i), section 1361(b)(3), or Sec. § 301.7701-1 through 301.7701-3 of this chapter (a disregarded entity), and a trust to which subpart E of part I of subchapter J of chapter 1 of the Code applies.

[437] Reg. § 1.752-2T(*l*).

[438] See part II.C.3.c.i Definition of "Recourse" or "Nonrecourse".

A partner's share of the nonrecourse liabilities of a partnership equals the sum of:[439]

(1) The partner's share of partnership minimum gain determined in accordance with the rules of section 704(b) and the regulations thereunder;

(2) The amount of any taxable gain that would be allocated to the partner under section 704(c) (or in the same manner as section 704(c) in connection with a revaluation of partnership property) if the partnership disposed of (in a taxable transaction) all partnership property subject to one or more nonrecourse liabilities of the partnership in full satisfaction of the liabilities and for no other consideration; and

(3) The partner's share of the excess nonrecourse liabilities (those not allocated under paragraphs (a)(1) and (a)(2) of this section) of the partnership as determined in accordance with the partner's share of partnership profits.

Regulations provide additional rules to determine a partner's share of partnership profits in allocating excess nonrecourse liabilities.[440] They also provide that some of these rules of not apply for purposes of the disguised sale rules.[441]

In applying the above rules re Code § 704(c) gain, if a partnership holds multiple properties subject to a single nonrecourse liability, the partnership may allocate the liability among the multiple properties under any reasonable method.[442] When the outstanding principal of a

---

[439] Reg. § 1.752-3(a).

[440] Reg. § 1.752-3(a)(3) continues:

> The partner's interest in partnership profits is determined by taking into account all facts and circumstances relating to the economic arrangement of the partners. The partnership agreement may specify the partners' interests in partnership profits for purposes of allocating excess nonrecourse liabilities provided the interests so specified are reasonably consistent with allocations (that have substantial economic effect under the section 704(b) regulations) of some other significant item of partnership income or gain (significant item method). Alternatively, excess nonrecourse liabilities may be allocated among the partners in accordance with the manner in which it is reasonably expected that the deductions attributable to those nonrecourse liabilities will be allocated (alternative method). Additionally, the partnership may first allocate an excess nonrecourse liability to a partner up to the amount of built-in gain that is allocable to the partner on section 704(c) property (as defined under § 1.704-3(a)(3)(ii)) or property for which reverse section 704(c) allocations are applicable (as described in § 1.704-3(a)(6)(i)) where such property is subject to the nonrecourse liability to the extent that such built-in gain exceeds the gain described in paragraph (a)(2) of this section with respect to such property (additional method). The significant item method, alternative method, and additional method do not apply for purposes of § 1.707-5(a)(2). To the extent that a partnership uses this additional method and the entire amount of the excess nonrecourse liability is not allocated to the contributing partner, the partnership must allocate the remaining amount of the excess nonrecourse liability under one of the other methods in this paragraph (a)(3). Excess nonrecourse liabilities are not required to be allocated under the same method each year.

[441] The excerpt from Reg. § 1.752-3(a)(3) in fn. 440 included, "The significant item method, alternative method, and additional method do not apply for purposes of § 1.707-5(a)(2)." See part II.M.3.e.i.(a) Distributions Presumed to Be Disguised Sales, especially fn. 3603.

[442] Reg. § 1.752-3(b)(1) further provides:

> A method is not reasonable if it allocates to any item of property an amount of the liability that, when combined with any other liabilities allocated to the property, is in excess of the fair market value of the property at the time the liability is incurred. The portion of the nonrecourse liability allocated to each item of partnership property is then treated as a separate loan under

partnership liability is reduced, the reduction of outstanding principal is allocated among the multiple properties in the same proportion that the partnership liability originally was allocated to the properties under the preceding sentence.[443]

II.C.3.c.iv. Assumption of Liabilities

If a partner contributes property to the partnership or the partnership distributes property to a partner and the property is subject to a liability of the transferor, the transferee is treated as having assumed the liability, to the extent that the amount of the liability does not exceed the property's fair market value at the time of the contribution or distribution.[444]

Except for such a deemed assumption, a person is considered to assume a liability only to the extent that the assuming person is personally obligated to pay the liability.[445] However, if a partner or related person assumes a partnership liability, the person to whom the liability is owed knows of the assumption and can directly enforce the partner's or related person's obligation for the liability, and no other partner or person that is a related person to another partner would bear the economic risk of loss for the liability under Reg. § 1.752-2 immediately after the assumption.[446]

If a general partner, who is jointly and severally liable for a partnership's debt, terminates that partner's interest but remains personally liable on part of that debt, the former partner may have been treated as having assumed the debt under case law that applied before the rules in the two preceding paragraphs were adopted.[447]

II.C.3.d. Deducting Interest Expense on Debt Incurred by a Partnership

Generally, debt is allocated to expenditures in accordance with the use of the debt proceeds, and interest expense accruing on a debt during any period is allocated to expenditures in the same manner as the debt is allocated from time to time during such period.[448] Generally, debt proceeds and related interest expense are allocated solely by reference to the use of the proceeds, and the allocation is not affected by the use of an interest in any property to secure the repayment of such debt or interest.[449] For example:[450]

> paragraph (a)(2) of this section. In general, a partnership may not change the method of allocating a single nonrecourse liability under this paragraph (b) while any portion of the liability is outstanding. However, if one or more of the multiple properties subject to the liability is no longer subject to the liability, the portion of the liability allocated to that property must be reallocated among the properties still subject to the liability so that the amount of the liability allocated to any property does not exceed the fair market value of such property at the time of reallocation.

[443] Reg. § 1.752-3(b)(2).
[444] Reg. § 1.752-1(e).
[445] Reg. § 1.752-1(d)(1)(i).
[446] Reg. § 1.752-1(d)(1)(ii). Reg. § 1.752-1(d)(2), "Applicability date," provides:

> Paragraph (d)(1)(ii) of this section applies to liabilities incurred or assumed by a partnership on or after October 9, 2019. The rules applicable to liabilities incurred or assumed prior to October 9, 2019, are contained in § 1.752-1 in effect prior to October 9, 2019 (see 26 CFR part 1 revised as of April 1, 2019).

[447] *Weiss v. Commissioner*, 956 F.2d 242 (11th Cir. 1992) (tax year 1979), *rev'g* T.C. Memo. 1990-492.
[448] Reg. § 1.163-8T(c)(1).
[449] Reg. § 1.163-8T(c)(1).
[450] Reg. § 1.163-8T(c)(1), Example.

> Taxpayer A, an individual, pledges corporate stock held for investment as security for a loan and uses the debt proceeds to purchase an automobile for personal use. Interest expense accruing on the debt is allocated to the personal expenditure to purchase the automobile even though the debt is secured by investment property.

Unless the context provides otherwise, the discussion below also applies to debt related to an S corporation.

Debt is allocated to an expenditure for the period beginning on the date the proceeds of the debt are used or treated as used under the rules of this section to make the expenditure and ending on the earlier of the debt being repaid or reallocated.[451] Generally, interest expense accruing on a debt for any period is allocated in the same manner as the debt is allocated from time to time, regardless of when the interest is paid.[452]

If a lender disburses debt proceeds to a person other than the borrower for the sale or use of property, services, or any other purpose, the debt is treated as if the borrower used an amount of the debt proceeds equal to such disbursement to make an expenditure for that property, services, or other purpose.[453] If a taxpayer incurs or assumes a debt for the sale or use of property, services, or any other purpose, or takes property subject to a debt, and no debt proceeds are disbursed to the taxpayer, the debt is treated as if the taxpayer used an amount of the debt proceeds equal to the balance of the debt outstanding at such time to make an expenditure for such property, services, or other purpose.[454]

If the borrower directly receives the loan proceeds, a variety of tracing rules apply.[455]

Now let's apply these rules to a partnership. Notice 88-37 provides guidance on reporting interest expense with respect to debt-financed acquisitions and debt-financed distributions for post-1986 taxable years. Notice 89-35 expands on that guidance, providing:[456]

> guidance with respect to the allocation of interest expense in connection with certain transactions involving partnerships and S corporations ("passthrough entities") and the allocation of interest expense on debt proceeds received in cash or deposited in an account.

in Section V, "Treatment of Debt of Passthrough Entities Allocated to Distributions by Such Entities (Debt-Financed Distributions)," Notice 89-35 provides:

> **A. General Allocation Rule**
>
> Unless the optional allocation rule is used, debt of passthrough entities and the associated interest expense shall be allocated under the rules of section 1.163-8T. In general, when debt proceeds of a passthrough entity are allocated under section 1.163-8T to distributions to owners of the entity, the debt proceeds distributed to any owner and the associated interest expense shall be allocated under section 1.163-8T in accordance with such owner's use of such debt proceeds. For example, if the owner

[451] Reg. § 1.163-8T(c)(2)(i).
[452] Reg. § 1.163-8T(c)(2)(ii).
[453] Reg. § 1.163-8T(c)(3)(i).
[454] Reg. § 1.163-8T(c)(3)(ii).
[455] Reg. § 1.163-8T(c)(4).
[456] Notice 89-35, Section I, "Purpose."

uses distributed debt proceeds to purchase an interest in a passive activity, the owner's share of the interest expense on such debt proceeds is allocated to a passive activity expenditure (within the meaning of section 1.163-8T(b)(4)).

An owner's share of a passthrough entity's interest expense on debt proceeds allocated to distributions to owners may exceed the entity's interest expense on the portion of the debt proceeds distributed to that particular owner. In such cases, the entity shall allocate the owner's excess interest expense using any reasonable method. The determination of whether a particular method of allocating such excess interest expense is reasonable depends on the facts and circumstances including, without limitation, whether the entity consistently applies the method from year to year.

B. Optional Allocation Rule

A passthrough entity may allocate distributed debt proceeds and the associated interest expense to one or more expenditures (other than distributions) of the entity that are made during the same taxable year of the entity as the distribution, to the extent that debt proceeds (including other distributed debt proceeds) are not otherwise allocated to such expenditures. However, distributed debt proceeds must be allocated under the general allocation rule to distributions to owners of the entity to the extent that such distributed debt proceeds exceed the entity's expenditures (other than distributions) for the taxable year to which debt proceeds are not otherwise allocated. Once debt proceeds are allocated under this section V.B., the debt proceeds shall be reallocated, when necessary, under the rules of section 1.163-8T.

C. Coordination with Repayment Rule

Paragraph (d) of section 1.163-8T provides rules governing the treatment of debt repayments. Any repayment of debt of a passthrough entity allocated to distributions to owners of the entity and to one or more other expenditures may, at the option of the passthrough entity, be treated first as a repayment of the portion of the debt allocated to such distributions.

D. Reporting Rules

1. Reporting Under the General Allocation Rule

To the extent that debt proceeds of a passthrough entity are allocated to distributions to owners of the entity, the portion of an owner's share of the entity's interest expense on debt proceeds allocated to distributions to owners that does not exceed the entity's interest expense on the portion of the debt proceeds distributed to such owner should be included on the line on Schedule K-1 for other deductions. This interest expense should be identified on an attached schedule as "Interest expense allocated to debt-financed distributions." The manner in which the owner should report such interest expense depends on the types of expenditures that the owner makes with the distributed debt proceeds. For example, if the owner uses the debt proceeds to make a personal expenditure (within the meaning of section 1.163-8T(b)(5)), the owner should report the interest expense as personal interest on Schedule A.

To the extent that an owner's share of a passthrough entity's interest expense on debt proceeds allocated to distributions to owners exceeds the entity's interest expense on the portion of the debt proceeds distributed to such owner, the excess interest expense should be reported on Schedule K-1 in a manner consistent with the allocation of such interest expense by such entity.

2. Reporting Under the Optional Allocation Rule

If the passthrough entity uses the optional rule to allocate distributed debt proceeds and associated interest expense, the entity's interest expense on debt proceeds allocated to such other expenditures should be reported on Schedule K-1 in a manner consistent with the allocation of the debt proceeds. For example, if the passthrough entity allocates distributed debt and the associated interest expense to an expenditure in connection with a rental activity, the entity should take the interest expense on the debt into account in computing the income or loss from the rental activity that is reported to the owner on Schedule K-1.

Notice 88-37 provides additional guidance on the reporting of interest expenses in connection with debt-financed distributions.

Lipnick v. Commissioner, 153 T.C. No. 1 (2019), looks to whether a partner's use of debt-financed distributions affects that partner's successor's interest deduction. The Official Tax Court Syllabus summarizes the case:

P-H's father owned interests in partnerships that made debt-financed distributions to the partners. P-H's father used the proceeds of those distributions to purchase assets that he held for investment. P-H s father treated the interest paid by the partnerships on those debts and passed through to him as "investment interest" subject to the limitation on deductibility imposed by I.R.C. sec. 163(d).

In 2011 and 2013 P-H s father transferred interests in the partnerships to P-H by gift and bequest. The partnerships continued to incur interest expense on the debts, which was passed through to P-H as a new partner. P-H treated the debts as properly allocable to the partnerships real estate assets and reported the interest expense on his 2013 and 2014 Schedules E, Supplemental Income and Loss, as offsetting the passed-through real estate income.

For Ps taxable years 2013 and 2014, R characterized the interest passed through to P-H as "investment interest." Because Ps had insufficient investment income for these years, R disallowed 100% of the deductions for interest expense under I.R.C. sec. 163(d).

Held: P-H, unlike his father, did not receive the proceeds of any debt-financed distributions and did not use partnership distributions to acquire property held for investment. Rather, he is deemed to have made a debt-financed acquisition of the partnership interests he acquired by gift and bequest, and the associated interest expense is allocated among the assets of the partnerships.

Because the transferee took the partnership interest subject to debt, Reg. § 1.163-8T(c)(3)(ii)[457] controlled,[458] making the transfer be a bargain sale.[459]

---

[457] Reproduced in the text accompanying fn 454.

[458] The court held:

> These authorities show that William acquired his interests in Mar-Cal, May-fair, Brinkley, and Claridge "subject to" the M&T and W&D debts, even though he did not personally assume those debts, which remained nonrecourse with respect to the partners individually. In the converse situation, where a partner sells a partnership interest, the regulations provide that the partner's "amount realized" includes his share of the partnership liabilities of which he is relieved, even if the liabilities are nonrecourse. See secs. 1.752-1, 1.1001-2(a)(4)(v), Income Tax Regs.; see also sec. 1.1001-2(c), Example (4), Income Tax Regs. (stating that a taxpayer's "amount realized" on transfer of a partnership interest includes the non-recourse liabilities of which he is relieved, where the transferee "takes the partnership interest subject to the … liabilities"). For purposes of subchapter K generally, any increase or decrease in a partner's share of partnership liabilities is treated as a deemed contribution or distribution, regardless of whether the debt is recourse or nonrecourse. See sec. 752; sec. 1.752-1, Income Tax Regs. In short, the fact that a partner is not personally liable for a partnership's debt does not mean that his partnership interest is not "subject to a debt" for purposes of subchapter K.[6]
>
> > [6] When Maurice gratuitously transferred interests in Mar-Cal, Mayfair, and Brinkley to William in 2011, he was required to include the partnership debt from which he was relieved as an "amount realized," and he reported capital gains tax accordingly. See *supra* p. 6. To the extent Maurice was relieved of the debt, liability therefore necessarily shifted to the other partners, including William. William thus took his partnership interests "subject to the debt," even though the liabilities were nonrecourse.
>
> For these reasons, we conclude that section 1.163-8T(c)(3)(ii), Temporary Income Tax Regs., supra, in conjunction with Notice 89-35, *supra*, dictates that the interest expense passed through to William from the partnerships was not "investment interest" under section 163(d). But even if that temporary regulation were somehow thought inapplicable here, respondent has not articulated any principle or rule that would affirmatively require the interest in question to be characterized as "investment interest." The principle that required such interest to be characterized as "investment interest" in Maurice's hands clearly does not apply because William (unlike Maurice) did not receive any debt-financed distributions from the partnerships. Respondent does not contend that William received debt-financed distributions indirectly or that the substance of the parties' transactions differed from their form. Respondent's position thus reduces to the contention that, because William acquired the partnership interests from his father, he stands in his father's shoes and must treat the passed-through interest the same way his father did. But neither section 163(d) nor its implementing regulations include any family attribution rule or similar principle that would require this result.
>
> It seems obvious that William would have no "investment interest" if he had acquired his ownership interests in the four partnerships from a third party for cash. Respondent has not explained why the result should be different because William acquired those interests from his father by gift and bequest. Respondent, in short, has enunciated no principle that would justify characterizing the interest passed through to William as "properly allocable to property held for investment" by William. Sec. 163(d)(3)(A).
>
> Respondent urges us to adopt a "once investment interest, always investment interest" rule on the theory that any other approach would "place a myriad of additional administrative burdens on both taxpayers and the government." But the temporary regulations and IRS guidance clearly dictate different outcomes depending on whether the partner receives a debt-financed distribution or makes a debt-financed acquisition. See sec. 1.163-8T(c)(3)(ii), Temporary Income Tax Regs., *supra*; Notice 89-35, *supra*. Recognition that partnership interests may change hands is thus an inherent part of the regulatory structure. And the allocation is no more cumbersome than allocating debt for any other purpose under subchapter K.

II.C.4. Mandatory Allocations of Certain Losses or Gains

This part II.C.4 discusses certain allocations. Note, however, that losses might be suspended by the passive loss[460] or at-risk[461] rules or basis limitations.[462]

Notwithstanding any other provision in Reg. §§ 1.704-1 and 1.704-2, allocations of partner nonrecourse deductions, nonrecourse deductions, and minimum gain chargebacks are made before any other allocations. Furthermore, partnership agreements tend to apply income in later years to reverse those special allocations until capital accounts reach their proportions to each other generally contemplated under the agreement.

II.C.4.a. Partner Nonrecourse Deductions

Partnership losses, deductions, and Code § 705(a)(2)(B) expenditures are treated as partner nonrecourse deductions in the amount determined under Reg. § 1.704-2(i)(2) (determining partner nonrecourse deductions) in the following order:[463]

1. First, depreciation or cost recovery deductions with respect to property that is subject to partner nonrecourse debt;

2. Then, if necessary, a pro rata portion of the partnership's other deductions, losses, and Code § 705(a)(2)(B) items.

Depreciation or cost recovery deductions with respect to property that is subject to a partnership nonrecourse liability is first treated as a partnership nonrecourse deduction under part II.C.4.b and any excess is treated as a partner nonrecourse deduction under this part II.C.4.a.[464]

If the amount of partner nonrecourse deductions or nonrecourse deductions exceeds the partnership's losses, deductions, and Code § 705(a)(2)(B) expenditures for the taxable year (determined under parts II.C.4.a and II.C.4.b), the excess is treated as an increase in partner

---

In sum, we hold that the interest expense passed through to William from the M&T and W&D loans was not "investment interest" under section 163(d). When William acquired the partnership interests from his father, he was in the same position as any other person who acquired partnership interests encumbered by debt. He did not receive the proceeds of those debts, and he did not use (and could not have used) the proceeds of those debts to acquire property that he subsequently held for investment. There is thus no justification for treating the interest expense passed through to him as investment interest under section 163(d). Rather, petitioners correctly reported it on Schedule E as allocable to the real estate assets held by the partnerships. Concluding that there are no deficiencies in petitioners' income tax for 2013 and 2014, we find that they are likewise liable for no penalties.

[459] See part III.B.1.c.i Gifts with Consideration – Bargain Sales**.** For what happens when grantor trust powers are turned off and the trust holds a partnership interest to which debt is allocated, see *Madorin v. Commissioner*, 84 T.C. 667 (1985), described in fn 6554 in part III.B.2.d.i.(b) Portions of Irrevocable Grantor Trust Deemed Owned for Federal Income Taxation and fn 6591 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

[460] See parts II.G.4.i Passive Loss Limitations and II.K Passive Loss Rules.

[461] See part II.G.4.j At Risk Rules.

[462] See part II.G.4.e Basis Limitations for Partners in a Partnership.

[463] Reg. § 1.704-2(j)(1)(i).

[464] Reg. § 1.704-2(j)(1)(i) (flush language).

nonrecourse debt minimum gain or partnership minimum gain in the immediately succeeding partnership taxable year.[465]

II.C.4.b. Partnership Nonrecourse Deduction

Partnership losses, deductions, and Code § 705(a)(2)(B) expenditures are treated as partnership nonrecourse deductions in the amount determined under Reg. 1.704-2(c) (determining nonrecourse deductions) in the following order:[466]

1. First, depreciation or cost recovery deductions with respect to property that is subject to partnership nonrecourse liabilities;

2. Then, if necessary, a pro rata portion of the partnership's other deductions, losses, and Code § 705(a)(2)(B) items.

Depreciation or cost recovery deductions with respect to property that is subject to partner nonrecourse debt is first treated as a partner nonrecourse deduction under part II.C.4.a and any excess is treated as a partnership nonrecourse deduction under this part II.C.4.b.[467] Any other item that is treated as a partner nonrecourse deduction will in no event be treated as a partnership nonrecourse deduction.[468]

If the amount of partner nonrecourse deductions or nonrecourse deductions exceeds the partnership's losses, deductions, and Code § 705(a)(2)(B) expenditures for the taxable year (determined under parts II.C.4.a and II.C.4.b), the excess is treated as an increase in partner nonrecourse debt minimum gain or partnership minimum gain in the immediately succeeding partnership taxable year.[469]

II.C.4.c. Minimum Gain Chargeback

Items of partnership income and gain equal to the minimum gain chargeback requirement (determined under Reg. § 1.704-2(f) of this section) are allocated as a minimum gain chargeback in the following order:[470]

1. First, a pro rata portion of gain from the disposition of property subject to partnership nonrecourse liabilities and discharge of indebtedness income relating to partnership nonrecourse liabilities to which property is subject;

2. Then, if necessary, a pro rata portion of the partnership's other items of income and gain for that year.

Gain from the disposition of property subject to partner nonrecourse debt is allocated to satisfy a minimum gain chargeback requirement for partnership nonrecourse debt only to the extent not allocated under Reg. § 1.704-2(j)(2)(ii).[471]

---

465 Reg. § 1.704-2(j)(1)(i), which also cross-references Reg. § 1.704-2(m), Example (1)(vi).
466 Reg. § 1.704-2(j)(1)(ii).
467 Reg. § 1.704-2(j)(ii) (flush language).
468 Reg. § 1.704-2(j)(ii) (flush language).
469 Reg. § 1.704-2(j)(1)(i), which also cross-references Reg. § 1.704-2(m), Example (1)(vi).
470 Reg. § 1.704-2(j)(2)(i).
471 Reg. § 1.704-2(j)(2)(i) (flush language).

If a minimum gain chargeback requirement (determined under part II.C.4.c and II.C.4.d) exceeds the partnership's income and gains for the taxable year, the excess is treated as a minimum gain chargeback requirement in the immediately succeeding partnership taxable years until fully charged back.[472]

II.C.4.d. Chargeback Attributable to Decrease In Partner Nonrecourse Debt Minimum Gain

Items of partnership income and gain equal to the partner nonrecourse debt minimum gain chargeback (determined under Reg. § 1.704-2(i)(4)) are allocated to satisfy a partner nonrecourse debt minimum gain chargeback in the following order:[473]

1. First, a pro rata portion of gain from the disposition of property subject to partner nonrecourse debt and discharge of indebtedness income relating to partner nonrecourse debt to which property is subject.

2. Then, if necessary, a pro rata portion of the partnership's other items of income and gain for that year.

Gain from the disposition of property subject to a partnership nonrecourse liability is allocated to satisfy a partner nonrecourse debt minimum gain chargeback only to the extent not allocated under Reg. § 1.704-2(j)(2)(i).[474] An item of partnership income and gain that is allocated to satisfy a minimum gain chargeback under Reg. § 1.704-2(f) is not allocated to satisfy a minimum gain chargeback under Reg. § 1.704-2(i)(4).[475]

If a minimum gain chargeback requirement (determined under part II.C.4.c and II.C.4.d) exceeds the partnership's income and gains for the taxable year, the excess is treated as a minimum gain chargeback requirement in the immediately succeeding partnership taxable years until fully charged back.[476]

II.C.5. Converting from One Entity Taxed as a Partnership to Another

Generally, a partnership's conversion from one type of state law entity to another (that is still taxed as a partnership) will not trigger income taxation absent a shift in liabilities[477] allocated to various partners.[478] The first formal reliance guidance on this was Rev. Rul. 84-52, which addressed the following situation:

> In 1975, X was formed as a general partnership under the Uniform Partnership Act of state M. X is engaged in the business of farming. The partners of X are A, B, C, and D. The partners have equal interest in the partnership.
>
> The partners propose to amend the partnership agreement to convert the general partnership into a limited partnership under the Uniform Limited Partnership Act of

[472] Reg. § 1.704-2(j)(2)(iii).
[473] Reg. § 1.704-2(j)(2)(ii).
[474] Reg. § 1.704-2(j)(2)(ii) (flush language).
[475] Reg. § 1.704-2(j)(2)(ii) (flush language).
[476] Reg. § 1.704-2(j)(2)(iii).
[477] See part II.C.3 Allocating Liabilities (Including Debt).
[478] See Rev. Rul. 95-37 (converted to an LLC), amplifying Rev. Ruls. 84-52 (converting a general partnership to a limited partnership) and 86-111 (a conversion does not close the partnership's tax year).

State M, a statute that corresponds in all material respects to the Uniform Limited Partnership Act. Under the certificate of limited partnership, A and B will be limited partners, and both C and D will be general partners and limited partners. Each partner's total percent interest in the partnership's profits, losses, and capital will remain the same when the general partnership is converted into a limited partnership. The business of the general partnership will continue to be carried on after the conversion.

The IRS ruled:

(1) Except as provided below, pursuant to section 721 of the Code, no gain or loss will be recognized by A, B, C, or D under section 741 or section 1001 of the Code as a result of the conversion of a general partnership interest in X into a limited partnership in X.

(2) Because the business of X will continue after the conversion and because, under section 1.708-1(b)(1)(ii) of the regulations, a transaction governed by section 721 of the Code is not treated as a sale or exchange for purposes of section 708 of the Code, X will not be terminated under section 708 of the Code.

(3) If, as a result of the conversion, there is no change in the partners' shares of X's liabilities under section 1.752-1(e) of the regulations, there will be no change to the adjusted basis of any partner's interest in X, and C and D will each have a single adjusted basis with respect to each partner's interest in X (both as limited partner and general partner) equal to the adjusted basis of each partner's respective general partner interest in X prior to the conversion. See Rev. Rul. 84-53, page 159, this Bulletin.

(4) If, as a result of the conversion, there is a change in the partners' shares of X's liabilities under section 1.752-1(e) of the regulations, and such change causes a deemed contribution of money to X by a partner under section 752(a) of the Code, then the adjusted basis of that partner's interest shall, under section 722 of the Code, be increased by the amount of such deemed contribution. If the change in the partners' shares of X's liabilities causes a deemed distribution of money by X to a partner under section 752(b) of the Code, then the basis of that partner's interest shall, under section 733 of the Code, be reduced (but not below zero) by the amount of such deemed distribution, and gain will be recognized by that partner under section 731 of the Code to the extent the deemed distribution exceeds the adjusted basis of that partner's interest in X.

(5) Pursuant to section 1223(1) of the Code, there will be no change to the holding period of any partner's total interest in X.

The holdings contained herein would apply with equal force if the conversion had been from a limited partnership to a general partnership.

Rev. Rul. 95-37 held:[479]

(1) The federal income tax consequences described in Rev. Rul. 84-52 apply to the conversion of an interest in a domestic partnership into an interest in a domestic LLC

[479] Letter Ruling 200414013 followed this result.

that is classified as a partnership for federal tax purposes. The federal tax consequences are the same whether the resulting LLC is formed in the same state or in a different state than the converting domestic partnership.

(2) The taxable year of the converting domestic partnership does not close with respect to all the partners or with respect to any partner.

(3) The resulting domestic LLC does not need to obtain a new taxpayer identification number.

> The holdings contained herein would apply in a similar manner if the conversion had been of an interest in a domestic LLC that is classified as a partnership for federal tax purposes into an interest in a domestic partnership. The holdings contained herein apply regardless of the manner in which the conversion is achieved under state law.

For more information on the liability issues described above, see part II.C.3 Allocating Liabilities (Including Debt).

It has been suggested that implicit in these rulings is the following approach to converting a partnership to an LLC:[480]

> The partners contribute their partnership interests to the limited liability company in exchange for LLC interests. The partnership is then instantaneously dissolved, wound up, and terminated for state law purposes by virtue of the limited liability company's ownership of all of the interests therein (the "two-partner" rule).

This approach seems to me to be the cleanest method as a matter of general state law, unless the state's laws have a statute specifically addressing the conversion of a partnership into an LLC. Regardless of the method of conversion, any assets that require formal written title will need to be retitled so that third parties know of the LLC's existence.

Converting a limited partnership into an LLC is not a taxable event, absent a liability shift.[481] Same with converting a general partnership into a limited partnership[482] or the registration of a general partnership as a limited liability partnership.[483] When an LLC was converted to a limited partnership and the managing members formed disregarded LLC that became the general partners, the conversion was not a taxable event.[484] Rearranging interests in limited partnerships without any substantive change in ownership might be disregarded. Letter Ruling 201605004, which was a little convoluted, involved these facts:

> According to the information submitted, PRS 1 is a limited partnership organized under the laws of State on Date 1, PRS 2, through disregarded entities, owned all of the general and limited partnership interests in PRS 1. PRS 1 was classified as a disregarded entity for federal income tax purposes. PRS 1 owned a% interest in PRS 3, a State limited partnership.

480 Bishop & Kleinberger, *Limited Liability Companies: Tax and Business Law*, ¶12.04, "Conversion of General Partnership to Limited Liability Company."
481 Letter Rulings 9210019, 9210019.
482 Letter Rulings 9029019, 9119029 (the most helpful), and 200538005.
483 Rev. Rul. 95-55.
484 Letter Ruling 201745005, which contained so many representations about factual and tax issues that one wonders what the point was. The ruling cited Rev. Ruls. 84-52 and 95-37.

> On Date 2, PRS 4 acquired an interest in PRS 3. Also on Date 2, PRS 4 exchanged its interest in PRS 3 for an interest in PRS 1, causing PRS 3 to become a disregarded entity and PRS 1 to become a partnership for federal income tax purposes. Effectively PRS 3 was converted into PRS 1. On Date 3, PRS 4 sold its b% interest in PRS 1 and PRS 2 sold a c% interest in PRS 1 to PRS 5. The transfer of interests in PRS 1 during the 12-month period was less than 50%.

Pointing to Code §§ 708 and 721(a), Reg. § 1.708-1(b)(1)(ii), and Rev. Ruls. 84-52 and 95-37, Letter Ruling 201605004 held:

> Based on the representations and the facts submitted, we conclude that PRS 1 will be considered a continuation of the partnership, PRS 3, and there was no termination of the partnership under § 708. Other than with respect to the sale of the partnership interests sold, the conversion of PRS 3 into PRS 1 did not cause the partners in PRS 3 or PRS 1 to recognize gain or loss under §§ 741 or 1001, except as provided in § 752. The holding period of the partners' interests in PRS 1 includes the period of time during which those interests were held as partners in PRS 3. The conversion of PRS 3 into PRS 1 did not cause the taxable year of the partnership to close under § 706. PRS 1 does not need to obtain a new taxpayer identification number. The basis of the assets held by PRS 1 is the same as the basis of the assets in the hands of PRS 3 prior to the conversion. Finally, the conversion PRS 3 into PRS 1 did not result in the assets of the partnership being contributed or distributed to the partners of the partnership.

That the like-kind exchange rules do not apply to an exchange of partnership interests[485] does not affect these principles. T.D. 8346 provides:

The final regulations otherwise retain the provisions of the proposed regulations regarding exchanges of interests in a partnership. Under the proposed and final regulations, an exchange of partnership interests will not qualify for nonrecognition of gain or loss under section 1031(a) regardless of whether the interests exchanged are general or limited partnership interests or are interests in the same partnership or different partnerships. No inference is to be drawn from these regulations, however, with respect to the application of other Code sections that allow nonrecognition of gain of loss in an exchange of interests in a partnership. For example, as stated in the preamble to the proposed regulations, these regulations are not intended to affect the applicability of Rev. Rul. 84-52, 1984-1 C.B. 157, concerning conversions of partnership interests. More generally, the regulations are not intended to restrict in any way the application of the rules of subchapter K of the Code to exchanges of partnership interests.

[485] Code § 1031(a)(2)(D); Reg. § 1.1031(a)-1(a)(1)(iv).

II.C.6. Shifting Rights to Future Profits

Shifting partners' rights to future profits within a partnership, without any change in capital accounts[486] or allocation of liabilities, would not have any income tax consequences,[487] even if

[486] See Reg. § 1.704-1(b)(2)(iv)(b), which is reproduced in the text accompanying fn. 500 in part II.C.7 Maintaining Capital Accounts, describing when capital accounts should be booked up. For cases discussing the taxation on the issuance of a partnership interest for services, distinguishing between issuing a profits interest (which is usually nontaxable) and a capital shift (which is always taxable), see fn 3739 in part II.M.4.f.ii.(a) Tax Effects of Issuing a Profits Interest.
Also, when partners are admitted later, the existing partners' built-in gain needs to be taken into account in some manner, as described in the text accompanying fns. 5444-5447 in part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value. Thus, one might consider whether reallocating profits might constitute a disguised shift of an unbooked asset unless a book-up or some other special allocation of unrealized gain occurs. However, in a service partnership, it is not uncommon to shift profits each year to reflect each partner's expected contribution to the firm's profitability; if capital merely supports the services but the services themselves generate the income, a capital shift is less likely to be found. For a statutory rule regarding complete redemptions of partnership interests, see part II.Q.8.b.ii.(b) Flexibility in Choosing between Code § 736(a) and (b) Payments, especially fns 5502-5504.

[487] Letter Ruling 200345007 involved the following situation:

> According to the representations made, X is a State LLC taxed as a partnership for Federal tax purposes. X began operations on D1. X has more than a members. There are currently b shares of A Units outstanding.
>
> X intends to (1) designate A Unit as B Unit, (2) create C Unit, D Unit, and E Unit, each of which has different rights, preferences, privileges, and restrictions from one another and (3) allow its members to convert, on a one-to-one basis, (i) B Units into C Units, D Units, or E Units, (ii) C Units into E Units, (iii) D Units into C Units or E Units, and (iv) E Units into C Units.
>
> The following has been further represented. X is not a publicly traded partnership as defined under § 7704 of the Internal Revenue Code. Each member's proportionate share in X's capital will remain the same after the planned conversion of the membership interests. The conversion will not change each member's proportionate share of X's liabilities.

The ruling held:

(1) No gain or loss will be recognized by the members of X as a result of the designation of A Units as B Units, the conversion of B Units into C Units, D Units, or E Units, the conversion of C Units into E Units, the conversion of D Units into C Units or E Units, and the conversion of E Units into C Units, on a one-to-one basis.
(2) No termination of X will occur under § 708, regardless whether more than 50 percent of the existing membership interest units are converted into other newly created membership interest units.
(3) No gain or loss will be recognized by any converting members upon the proposed conversions of their existing membership interest units.
(4) Provided that there will be no change in the members' shares of X's liabilities as a result of the conversions, the adjusted basis of a converting member will not be affected by the conversion.
(5) Pursuant to § 1223(1), there will be no change to the holding period of any member's membership interest in X.
(6) The designation of A Units as B Units and the subsequent conversions of units will not constitute an issuance of additional units as described in § 1.7704-1(e)(4)(i) of the Procedure and Administration Regulations.

the shift of the right to profits is compensatory;[488] however, a shift might have unexpected gift tax consequences.[489]

The parties should consider having a revaluation event before this shift, so that each partner's economic rights are reflected in its capital accounts and the shifting of rights to profits does not move any value based on the partners' rights immediately before the shift. See CCA 201517006, which addressed the question, "Did a taxable exchange result when the general partner of a publicly traded partnership restructured its interest in the partnership, including exchanging its Incentive Distribution Rights for newly issued publicly-traded common units?" Here were the facts:

> Taxpayer, a corporation, is the general partner of Partnership, a publicly traded partnership within the meaning of § 7704(b) that is treated as a partnership for federal tax purposes through the operation of § 7704(c). Partnership was formed on Date 1, and its original partnership agreement granted Taxpayer an a percent general partner interest in profits, losses, and capital, and in addition granted Taxpayer certain "Incentive Distribution Rights" (IDRs). The IDRs are a form of non-publicly-traded limited partnership profits interest that did not carry any interest in partnership capital on Date 1, but entitled Taxpayer to share in future partnership profits and quarterly distributions. The original partnership agreement provided that, as Partnership's total quarterly distributions reached certain thresholds, distributions and income allocations to Taxpayer under the IDRs increased, up to a maximum of b percent. Additionally, the IDRs entitled Taxpayer to a share of Partnership's proceeds on liquidation if Partnership's assets appreciated after Date 1.
>
> On Date 2, Taxpayer and Partnership consummated an exchange agreement and amended the partnership agreement to replace Taxpayer's IDRs with common units and less valuable IDRs. Specifically, Taxpayer's interest was restructured as follows: Taxpayer continued to hold its a percent general partner interest; Taxpayer's old IDRs were cancelled; Partnership granted Taxpayer c newly-issued publicly-traded common units; Taxpayer also received new, less valuable, IDRs containing higher thresholds and a lower maximum (d percent rather than b percent). The terms of the newly-issued IDRs and the number of newly-issued publicly-traded common units were calculated to produce the same distribution to Taxpayer as the old IDRs had produced the prior quarter.
>
> Although Taxpayer's IDRs did not carry any capital interest on Date 1, by Date 2 Partnership had significant appreciation in its assets, and if Partnership were to have liquidated immediately before the Date 2 restructuring, a substantial amount of the proceeds would have been allocated to Taxpayer under the old IDRs. However, before Date 2, Partnership had not experienced a revaluation event in some time, and as a result its significant unrealized appreciation in its assets had not been "booked-up" and reflected in the capital accounts of its partners. Thus, Taxpayer's capital account at the beginning of Date 2 did not reflect Taxpayer's full economic entitlements upon liquidation. Thus, Taxpayer's capital account with respect to its newly-issued publicly-traded common units would have been below the capital account of the other publicly-

[488] See part II.M.4.f Issuing a Profits Interest to a Service Provider, especially II.M.4.f.ii.(a) Tax Effects of Issuing a Profits Interest.
[489] See parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.

> traded common units, which would have meant that Partnership's publicly-traded common units were no longer fungible. However, also on Date 2, Taxpayer's corporate owner Parent contributed approximately $e to Partnership in exchange for newly-issued publicly-traded common units of Partnership. As a result of this contribution, Partnership revalued its assets, crediting its partners' capital accounts to reflect how its built-in gain would be allocated if Partnership sold the assets. Partnership had sufficient unbooked built-in gain to equalize Taxpayer's capital account with respect to the c newly-issued publicly-traded common units without needing to shift capital from other partners or allocate extra taxable income to Taxpayer.

The CCA reasoned:

> The restructuring of Taxpayer's interest in Partnership was a readjustment of partnership items among existing partners, not a taxable exchange. Additionally, no taxable capital shift occurred; although the restructuring of Taxpayer's rights under the partnership agreement was not a revaluation event under § 1.704-1(b)(2)(iv)(f)(5) and did not itself affect Taxpayer's capital account, Parent's Date 2 contribution was a revaluation event under § 1.704-1(b)(2)(iv)(f)(5)(i) and Partnership had sufficient unbooked built-in gain in its assets to increase Taxpayer's capital account with respect to the newly issued common units without needing to shift capital from other partners.

If partnership does not have a revaluation event, it might want to consider memorializing allocations of unrealized gains and losses at the time of the event. But, if the partnership agreement does not clarify the partners' rights, a clarification will not be a taxable event. Letter Ruling 9821051, which did not mention any state law rights absent clarification, ruled that an amendment the following situation "will not result in the realization of income by the Partnership, Limited, or any of their respective partners":[490]

> The Partnership conducts a medical practice and currently owns a unit in Limited (the Units). Limited is a limited partnership that provides management services to the Partnership and other medical groups.
>
> Under the general partnership agreement (the Agreement), the Partnership does not have a fixed method to determine the current and future allocations of the Partnership's profits or losses from its disposition of the Units. The Partnership's profits and losses from the disposition of the Units are currently allocated based on the determinations of an executive committee, subject to certain minimum allocation requirements.
>
> Because of the financial success of Limited, the partners of the Partnership believe it is important to have a method of reasonably determining their respective shares of the proceeds from Partnership's disposition of the Units. To accomplish this, the Partnership intends to amend the Agreement to provide a mechanism to determine each partner's minimum share of the proceeds from the Partnership's disposition of the Units (the Amendments). As explained above, the potential gain or loss that would be realized

---

[490] Without citing any regulations, the ruling commented:

> Section 704(b) provides that a partner's distributive share of income, gain, loss, deduction, or credit (or item thereof) is determined in accordance with the partner's interest in the partnership (determined by taking into account all facts and circumstances) if (1) the partnership agreement does not provide for the partner's distributive share of income, gain, loss, deduction, or credit (or item thereof), or (2) the allocation to a partner under the agreement of income, gain, loss, deduction, or credit (or item thereof) does not have substantial economic effect.

> from the Partnership's disposition of the Units has not been allocated among the partners and is not reflected in the capital account of any partner.
>
> Under the Amendments, until a Liquidity Event occurs, the Partnership retains the legal title to the Units, all distributions and other profits on the Units will be paid to the Partnership, and to the extent the executive committee of the Partnership determines the distributions and profits on the Units are to be distributed to the partners, the allocation of any such items will be made by the executive committee under the terms of the Agreement. A Liquidity Event is any one of the following events: (1) Limited makes an initial public offering of its equity securities through a registration statement under the Securities Act of 1933, (2) Limited or its owners enter into a transaction with a party that, prior to such transaction, does not own an interest in Limited so that such party acquires equity securities of Limited resulting in such party having the power to elect a majority of Limited's governing body, or (3) Limited enters into a merger, reorganization, combination or acquisition transaction with another company and in such transaction the equity securities of Limited outstanding immediately prior to such transaction do not constitute, or are not converted into or exchanged for, a majority of the equity securities of the resulting entity outstanding immediately after such transaction. On the occurrence of a Liquidity Event, the Partnership will transfer to each partner the partner's share of the Units.

This ruling is important to the way many large law firms work. Every year, management determines how the partners share profits – including collections of accounts receivable using the cash receipts and disbursements method. Much administrative burden would be incurred if they had to account for unrealized income based on rights to profits when the bills were sent instead of when they were collected. Essentially, a large law firm's discretion to change annually how partners share in the receipt of accounts receivable reflects an agreement that no partner has a right to any bills collected in the following taxable year. Absent such a right, the accounts receivable could be reallocated. One might view this reallocation as violating the assignment of income doctrine, but as a practical matter receipts from bills need to be matched against the expenses incurred to clearly reflect the partnership's net income.

McKee comments:[491]

> Standing alone, §§ 704(a) and 761(c) appear to give persons who are partners during a particular period the right to allocate partnership income or loss for the period among themselves by agreement, without reference to the § 706 varying interests rules, provided only that the agreed allocations (1) satisfy the requirements of §§ 704(b) through 704(e), and (2) are entered into before the due date of the partnership return for the period.[79] Conversely, § 706(d) provides that if there is a change of any partner's interest in the partnership during the partnership year, each partner's distributive share must take into account the varying interests of the partners during the year.
>
> [79] S. Rep. No. 938, 94th Cong., 2d Sess. 98 (1976); accord HR Rep. No. 658, 94th Cong., 1st Sess. 124 (1975). See *Danny Curtis*, 70 TCM 205 (1995) (effort

[491] Within ¶12.04, "The Effect of Section 706(d) on the Power of Partners to Change Their Distributive Shares by Agreement," McKee, Nelson & Whitmire: *Federal Taxation of Partnerships & Partners* (WG&L) (quote copied 12/25/2022), this quote is found in ¶ 12.04[1] Contemporaneous Partners. In the same treatise, see also ¶ 16.04[2][b] Conversions of Interests in the Same Partnership.

retroactively to allocate to one member of equal two-person partnership income of partnership that was unreported owing to actions of such partner; attempt made after partnership's tax returns examined; retroactive allocation not respected because not timely under § 761(c); "innocent" partner liable for tax on his share of unreported income).

These statutory concepts are appropriately reflected in Regulations § 1.706-4(b)(1), which provides that the variance rules in Regulations § 1.706-4(a)(3) do "not preclude changes in the allocations of the distributive share of [partnership] items" among contemporaneous partners for an entire year (or any segment thereof if the item is entirely attributable to the segment) provided that the allocations are valid under § 704(b) and do not reflect variances attributable to contributions to or distributions from the partnership.

A somewhat related question is whether partners may reallocate their indirect interests in appreciation in partnership assets prior to its realization by the partnership. For example, suppose that equal partnership AB purchases an asset for $100 and then, when the asset has appreciated in value to $300 (while its book value for § 704(b) purposes remains $100), the partnership agreement is amended to allocate partnership gain 75 percent to A and 25 percent to B. Has A received a $50 taxable capital shift from B? Although the § 704 Regulations contain a vague hint that, in certain circumstances, a failure to restate capital to prevent a shift in unrealized appreciation may be taxable,[80] it seems quite clear that no taxable shift results when existing partners agree to adjust their interests in unrealized appreciation in partnership assets. Otherwise, any reallocation of profits by an existing partnership, for example, an accounting firm, would result in a taxable capital shift with respect to partnership assets if their fair market values differ from their book values. This conclusion is confirmed by a Private Letter Ruling in which the Service ruled that no tax consequences resulted from an amendment to a partnership agreement that fixed the partners' interests in certain appreciated partnership assets.[81]

[80] See Reg. § 1.704-1(b)(2)(iv)(f). The existing Regulations do not permit restatement of capital accounts in these circumstances. However, Prop. Reg. § 1.704-1(b)(2)(iv)(F)(5)(v) (2014) would allow it. See ¶ 10.02[2][c].

[81] Priv. Ltr. Rul. 9821051 (Feb. 23, 1998).

Conversely, the Service has concluded that a state court's retroactive award, in a divorce proceeding, of a spouse's community property rights in a partnership interest should not be given effect for tax purposes.[82] The court's order purported to be retroactive, thus giving the spouse an interest in the partnership commencing in a taxable year prior to the date of the award. The Field Service Advice states that the Service does "not believe that the ... order should be given retroactive tax effect," because "state court orders that retroactively change the rights of the parties or the status of payments are not given retroactive effect for federal tax purposes." For this proposition, the Service did not cite § 704 or § 706, but relied instead on *Arthur Z. Gordon*,[83] in which the Tax Court held that state court orders redesignating divorce-related payments as alimony (and not child support)—or vice versa—are disregarded for federal income tax purposes even if the order retroactively changes the rights of the parties or the legal status of the payments. The Service also determined that the tax benefit rule could not be applied on these facts to achieve the same effect as the retroactive reallocation.

[82] FSA 200128031 (Apr. 12, 2001).

[83] *Arthur Z. Gordon*, 70 TC 525 (1978) .

Reg. § 1.721-1, "Nonrecognition of gain or loss on contribution,"[492] informs this discussion in a different context in subsection (b):

(1) Normally, under local law, each partner is entitled to be repaid his contributions of money or other property to the partnership (at the value placed upon such property by the partnership at the time of the contribution) whether made at the formation of the partnership or subsequent thereto. To the extent that any of the partners gives up any part of his right to be repaid his contributions (as distinguished from a share in partnership profits) in favor of another partner as compensation for services (or in satisfaction of an obligation), section 721 does not apply. The value of an interest in such partnership capital so transferred to a partner as compensation for services constitutes income to the partner under section 61. The amount of such income is the fair market value of the interest in capital so transferred, either at the time the transfer is made for past services, or at the time the services have been rendered where the transfer is conditioned on the completion of the transferee's future services. The time when such income is realized depends on all the facts and circumstances, including any substantial restrictions or conditions on the compensated partner's right to withdraw or otherwise dispose of such interest. To the extent that an interest in capital representing compensation for services rendered by the decedent prior to his death is transferred after his death to the decedent's successor in interest, the fair market value of such interest is income in respect of a decedent under section 691.

(2) To the extent that the value of such interest is: (i) compensation for services rendered to the partnership, it is a guaranteed payment for services under section 707(c); (ii) compensation for services rendered to a partner, it is not deductible by the partnership, but is deductible only by such partner to the extent allowable under this chapter.

Reg. § 1.721-1(b) taxes a partner giving up any part of his right to be repaid his contributions but not giving up a share in partnership profits. In determining when income is realized, it looks to "all the facts and circumstances, including any substantial restrictions or conditions on the compensated partner's right to withdraw or otherwise dispose of such interest." Returning to my large law firm example above, if a partner is not entitled to any portion of accounts receivable collected after yearend because the partnership agreement allocates each year's collections separately, then no partner in the first year is entitled to those accounts receivable and has not given up rights to those receivables when allocated in the following year.

Willis, Postlewaite & Alexander, *Partnership Taxation*, addresses these issues in ¶ 6.06. Tax Consequences of a Flip in Partners' Interests in Profits or Losses. Among the cases cited is

[492] See part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership.

Lipke v. Commissioner, 81 T.C. 689 (1983), the Official Tax Court Syllabus to which summarizes:

> Marc Equity Partners I, a limited partnership, was organized in 1972 for the purpose of acquiring and operating apartment buildings. Shortly after formation, limited partnership interests were sold to 14 investors for a total amount of $1,175,000. All profits and losses were allocated to these limited partners.
>
> In 1974 and 1975, the partnership experienced severe financial problems which necessitated additional capital contributions. On Oct. 1, 1975, six of the original limited partners, one of the general partners, and three other persons (herein collectively referred to as the class B limited partners) contributed a total of $300,000 to the partnership in exchange for limited partnership interests. An Oct. 1, 1975, amendment to the partnership agreement reallocated 98 percent of all of the partnership's 1975 profits and losses to the class B limited partners in consideration for these additional capital contributions. The remaining 2 percent of the partnership's 1975 profits and losses was reallocated to the general partners.
>
> *Held*: The reallocation of losses accrued by the partnership before October 1975, to the class B limited partners is not permitted by sec. 706(c)(2)(B), I.R.C. 1954, because it was made as a result of the additional capital contributions. It makes no difference that the additional capital was contributed by, and the resulting retroactive reallocation was made to, both new and existing partners. *Richardson v. Commissioner*, 76 T.C. 512 (1981), *affd*. 693 F.2d 1189 (5th Cir. 1982), extended. Held, further, the partnership's retroactive reallocation of losses to the general partners is permissible since it did not result from additional capital contributions. Held, further, the partnership is not now entitled to use the "year-end totals" method of accounting in order to allocate its 1975 losses ratably over the year.

The court reasoned and held:

> The primary issue is whether the partnership properly allocated its 1975 losses among its partners. Respondent contends that section 706(c)(2)(B) prevents the partnership from reallocating losses accrued before October 1,1975, to either the class B limited partners or to the general partners. Petitioners counter that prior to the Tax Reform Act of 1976, section 706(c)(2)(B) did not prevent the retroactive reallocation of losses to new partners. Petitioners further argue that, even assuming former section 706(c)(2)(B) governs situations involving the admission of new partners, it does not prevent the retroactive reallocation of losses to those petitioners who were already partners when the reallocation was made. For the following reasons, we hold that the partnership's retroactive reallocation of losses to the class B limited partners was not permitted by section 706(c)(2)(B) because it was made as a result of additional capital contributions. It makes no difference that the additional capital was contributed by, and the resulting retroactive reallocation was made to, both new and existing partners. However, we also hold that the partnership's retroactive reallocation of losses to the general partners was permissible since it did not result from additional capital [pg. 696]contributions and, therefore, constituted nothing more than a readjustment of partnership items among existing partners.

Section 702(a) requires a partner to report his distributive share of the partnership's income or loss. With certain exceptions, section 704(a) provides that a partner's distributive share is to be determined by the partnership agreement.[12] A partnership agreement includes any amendments made before the time for filing the partnership return. Sec. 761(c). However, section 706(c)(2) provides for certain tax consequences to a partner whose partnership interest changes during the partnership's taxable year. Prior to the Tax Reform Act of 1976, that section provided in part as follows:

> The taxable year of a partnership shall not close (other than at the end of a partnership's taxable year as determined under subsection (b)(1) with respect to a partner who sells or exchanges less than his entire interest in the partnership or with respect to a partner whose interest is reduced, but such partner's distributive share of items described in section 702(a) shall be determined by taking into account his varying interests in the partnership during the taxable year. [Emphasis added.]

[12] Respondent does not contend herein that the principal purpose of the partnership's allocation of its 1975 losses was the "avoidance or evasion of any tax" within the meaning of sec. 704(b)(2) as in effect during that year. *Cf. Goldfine v. Commissioner*, 80 T.C. 843 (1983).

In *Richardson v. Commissioner*, 76 T.C. 512 (1981), *affd*. 693 F.2d 1189 (5th Cir. 1982), this Court ruled that even prior to the Tax Reform Act of 1976, section 706(c)(2)(B) was applicable to situations involving the admission of new partners.[13] Therein, we held that the reduction in the capital interests of the original partners resulting from the admission of the new partners constituted a reduction of interest within the meaning of section 706(c)(2)(B). The fact that the original partner's equity interests in the partnership remained the same was deemed to be irrelevant. Accordingly, under section 706(c)(2)(B), the original partners and the new partners were required to determine their distributive shares of partnership items by taking into account their varying interests in the partnership during the taxable year. Thus, a retroactive reallocation of partnership items to the new partners was not allowable. See also *Moore v. Commissioner*, 70 T.C. 1024, 1031 (1978).

[13] After the phrase "with respect to a partner whose interest is reduced," the Tax Reform Act of 1976 inserted into sec. 706(c)(2)(B) the parenthetical "whether by entry of a new partner, partial liquidation of a partner's interest, gift, or otherwise." This Court determined in *Richardson v. Commissioner*, 76 T.C. 512 (1981), *affd*. 693 F.2d 1189 (5th Cir. 1982), that this amendment merely codified prior law.

Although petitioners admit Richardson is directly on point with respect to the allocation of losses to the new partners in the instant case, they contend that the case was wrongly decided and now ask us to overrule it. However, buttressed by the affirmance of our decision by the Fifth Circuit Court of Appeals, we are fully satisfied with our decision in Richardson and are therefore unwilling to overrule it. See also *Hawkins v. Commissioner*, 713 F.2d 347 (8th Cir. 1983), *affg*. a Memorandum Opinion of this Court; *Snell v. United States*, 680 F.2d 545 (8th Cir. 1982); *Williams v. United States*, 680 F.2d 382 (5th Cir. 1982). Accordingly, since petitioners James, Francis, and Lipke were newly admitted as partners on October 1, 1975, they are not entitled to report losses accrued by the partnership prior to that date.

> We also hold that section 706(c)(2)(B) prevents the retroactive reallocation of losses to petitioner Reger as a limited partner even though he was already a partner when he made his additional capital contribution. Together with the new capital contributions made by the new partners and by six of the original limited partners, Reger's additional capital contribution reduced the capital interests of the noncontributing partners. For purposes of section 706(c)(2)(B), we find no difference between a reduction in partners' interests resulting from the admission of new partners, as in Richardson, and, as here, the reduction in partners' interests resulting from additional capital contributions made by existing partners. In both situations, partners' interests were reduced and retroactive reallocations were made as a result of the additional capital contributions. We are unwilling to sustain, for example, the retroactive reallocations of losses made to petitioner Reger merely because he had previously contributed $34 to the partnership, and yet deny petitioners Lipke, James, and Francis that same benefit because they were new partners. That would create an illusory distinction which the language of section 706(c)(2)(B) simply does not require us to make.
>
> With respect to the partnership's retroactive reallocation of losses to the general partners, however, we find that it did not result from additional capital contributions and therefore did not contravene the varying interest rules of section 706(c)(2)(B). Prior to October 1, 1975, the general partners held only a residual interest in gains arising from "major capital events." See note 5 supra. Pursuant to the October 1, 1975, amendment to the partnership agreement, however, the general partners were granted a 2-percent interest in the partnership's 1975 profits and losses including the losses accrued by the partnership during the preceding 9 months. In contrast to the retroactive reallocation of losses to the class B limited partners, this reallocation to the general partners was not made in consideration for additional capital contributions. General partners Rautenstrauch and Luksch made no additional capital contributions and Reger's contribution was made in exchange for a limited partnership interest, not for an increase in his interest as a general partner. Accordingly, this reallocation of losses to the general partners was not directly accompanied by a reduction in any other partner's capital interest within the meaning of section 706(c)(2)(B). It constituted nothing more than a readjustment of partnership items among existing partners which, by itself, is permissible. *Smith v. Commissioner*, 331 F.2d 298 (7th Cir. 1964), *affg*. a Memorandum Opinion of this Court; *Foxman v. Commissioner*, 41 T.C. 535 (1964), *affd*. 352 F.2d 466 (3d Cir. 1965). See *Moore v. Commissioner*, 70 T.C. 1024, 1033 (1978).

McKee also suggests comparing *Silberman v. Commissioner*, TC Memo 1983-782, which in turn quoted the following statement from *Moore v. Commissioner*, 70 T.C. 1024, 1031-1032 (1978):

> Where a partner sells or exchanges less than his entire interest, section 706(c)(2)(B) requires that the transferor partner determine his distributive share "by taking into account his varying interests in the partnership during the taxable year." Sec. 1.706-1(c)(4), Income Tax Regs. It follows that the transferee's distributive share must also be determined by taking into account his varying interests in the partnership. See generally H. Rept. 94-658, 1976-3, C.B. (Vol. 2) 695, 815-816; S. Rept. 94-938, 1976-3 C.B. (Vol. 3) 49, 96. Since a partner who transfers his entire interest is required to report his distributive share of partnership items for the period he was a partner *and cannot transfer retroactively those items to the transferee*, it is reasonable to conclude that Congress intended for the transferor and transferee of a partial interest to determine the variation in their interests in the same manner. There is no reason to believe Congress

> intended to allow the transferor of a partial interest to assign his distributive share of partnership items occurring before the transfer and deny a similar privilege to the transferor of an entire interest. Consequently, we conclude that when there is a transfer of a partial partnership interest, section 706(c)(2)(B) requires the transferor to report his distributive share of partnership items for the period before the transfer, requires the transferor and transferee to report their distributive shares of partnership items for the period after the transfer, and prohibits the retroactive shifting of such interests. [Emphasis in original.]

Silberman concluded:

> … no changes in partnership membership occurred during partnership taxable year 1976, and the allocations as set forth in the partnership agreement will be respected. During partnership taxable year 1975, however, several changes in partnership membership occurred. Two of the three original partners, Rosenberg and Waldman, transferred their interests in the partnership by amendment to the partnership agreement or by execution of a document entitled "Sale of Limited Partnership Interest." Furthermore, all petitioners in this case were added as partners at various dates throughout the partnership taxable year. The allocation of interests among the three original partners[11] was amended to reflect the allocations included in the amendments to the partnership agreement.[12] Under these circumstances, section 706(c)(2)(B) requires that distributive shares of partnership items must be allocated to reflect the changing membership of the partnership during taxable year 1975. See *Richardson v. Commissioner*, 76 T.C. 512 (1981), *affd*. 693 F.2d 1189 (5th Cir. 1982); *Moore v. Commissioner*, *supra*; *Rodman v. Commissioner*, T.C. Memo. 1973-277. See also *Hawkins v. Commissioner*, 713 F.2d 347 (8th Cir. 1983); *Williams v. United States*, 680 F.2d 382 (5th Cir. 1982); *Snell v. United States*, 680 F.2d 545 (8th Cir. 1982); *Lipke v. Commissioner*, 81 T.C. 689 (1983).
>
> [11] All partners were to share equally in the profits at 33⅓ percent each. Each of the two limited partners was to receive 45 percent of the losses, and the general partner was to receive 10 percent of the losses.
>
> [12] Each limited partner was entitled to profits of three times his or her capital investment and to losses of two times his or her capital investment.

Banoff, "Partnership Ownership Realignments via Partnership Reallocations, Legal Status Changes, Recapitalizations, and Conversions: What Are the Tax Consequences?" 83 Taxes 105 (2005),[493] categorizes various changes to partnerships as follows:

> These changes can be classified in four basic forms which are discussed herein: (1) partnership profits/profits and loss reallocations; (2) partnership and partner legal status changes; (3) partnership recapitalizations; and (4) partner interest conversions.
>
> "Partnership reallocations" refers to changes in the partners' profits (or profits and loss) allocations, typically in the form of a special allocation, to reflect a change in their economic arrangement for sharing distributions, in accordance with Code Sec. 704(b).[2]

[493] Thompson Coburn doc. no. 6217476.

[2] Payments in respect of funds provided by a partner to his partnership generally constitute one of five categories: (1) interest on debt (see Code Sec. 707(a)); (2) guaranteed payments for the use of capital (Code Sec. 707(c)); (3) gross income allocations that are not characterized as guaranteed payments (Code Sec. 702(c)), (4) net income preferential allocations (Code Secs. 702(a)(7) and 704(b)); and (5) residual income allocations (Code Secs. 702(a)(8) and 704(b)). For purposes of this article, payments in categories (4) and (5) are the most relevant and are discussed in several of the examples.

Partnership or partner "legal status changes" (commonly known as "conversions" in IRS rulings and tax literature) refers to changes in the legal status of the unincorporated entity (*e.g.*, a change from a general partnership to a limited partnership, LLP or LLC) and/or a change in the legal status of one or more of the members (e.g., a general partner becoming a limited partner or LLC member), with no change in the members' economic ownership interest in capital, profits and losses.

"Partnership recapitalizations" includes changes in the economic interests of one or more partners which typically are reflected through the issuance of a different class of interests; inherent in the class are certain economic rights, preferences and/or priorities which may be transferred or assigned (akin to preferred stock or common stock) with the necessary approvals required by the partnership agreement. As used herein, a partnership recapitalization requires the approval of some percentage (e.g., a majority or greater percentage-in-interest) of the members of the partnership, akin to the shareholders or directors of a corporation approving a corporate recapitalization of the corporation's stock. In a partnership recapitalization there is no legal status change of the unincorporated entity or in the liability exposure of the partner.

"Partner interest conversions" refers to the unilateral exercise of a partner's ("conversion") right to receive a partnership interest with different economic rights, which replaces his existing ("convertible") interest in the same unincorporated entity. The conversion effectuates an isolated decision by the partner to exercise his privilege. As used herein, there is no change in the legal status of the unincorporated entity or the liability exposure of the partner whose interest is converted; only in his rights to capital and/or profits and/or losses.

Banoff then analyzes the law and concludes [footnotes omitted]:

1) Partnership reallocations of profits and losses undoubtedly are nonrealization events.

2) Partnership and partner legal status changes are governed by Code Sec. 721 treatment, but little thought need be given to the tangential tax consequences that arise therefrom (much less to consider the numerous approaches discussed in this article).

3) Partnership recapitalizations are tax free under Code Sec. 721 because changes in legal status, which also involve partner interest realignments, are tax free under Code Sec. 721, courtesy of Rev. Rul. 84-52. (The key prerequisite in Rev. Rul. 84-52 (as noted by the Tax Court in *Matray*), *i.e.*, that it only applies to situations where none of the partners change any interest in capital, profits and losses, is apparently never reconciled with the fact that such changes automatically occur in every partnership recapitalization.)

4) Partner interest conversions will be treated akin to corporate stock conversions or recapitalizations, *i.e.*, as somehow being tax-free, while not contemplating the potentially adverse tangential tax consequences (including possible “corrective” gross income allocations to the converting partner which may spring up immediately after the conversion) as would be required by the proposed regulations on noncompensatory partnership options.

Banoff further suggests the following principles:

1. In determining whether a partnership ownership realignment is a taxable event for which gain or loss is reported by one or more partners (and the partnership), there must first be realization, and recognition in absence of the application of a nonrecognition provision.

2. All four types of partnership ownership realignments could merely be considered as adjustments to the contractual arrangement among the partners that do not rise to the level of an “exchange” for realization purposes under Code Sec. 1001.

3. If the hair trigger of *Cottage Savings* extends to subchapter K, all four types of partnership ownership realignments likely would be realization events.

4. Subchapter K, as a matter of legislative policy, is intended to promote flexibility, simplicity and equality among those using the partnership form. The objectives of subchapter K would be sabotaged if partnership reallocations are viewed as realization events (absent an applicable nonrecognition provision). Therefore, there should be a relaxed concept of realization applicable in subchapter K. Cottage Savings should not be extended to partnership reallocations.

5. Partnership recapitalizations which in substance merely change the partners’ interests in future profits (or profits and losses) should be treated for tax purposes in the same manner as partnership reallocations. The mere classification or delineation of differing economic interests in profits and losses, in the form of “common interests” or “preferred interests” should not change their economic equivalence to that of vanilla reallocations. Similarly, the unitization of such interests as “common units” or “preferred units” (resembling and being quantified like shares of stock) should not change their economic equivalence to that of mere partnership reallocations of profits and loss.

6. Absent a capital shift among the partners, partnership recapitalizations should not be realization events, just as reallocations should not be.

7. Partnership recapitalizations which result in capital shifts resemble realization events, as there is something more happening than a mere change in the partner’s allocable share of future profits (or profits and losses).

8. The (potential) economic equivalence of partnership reallocations, partnership recapitalizations and partner interest conversions (as demonstrated in Examples 1A, 3 and 5) provide a compelling case for treating all three types of realignments in the same fashion.

9. However, subchapter K, founded on the aforementioned principles including flexibility and simplicity, has generally given full effect to the form partners select to conduct their transactions. Having claimed their form, taxpayers and their tax advisors can understand (and should be responsible for) the tax consequences of their choice. An exception to the principle of permitting form to control in subchapter K is when clear tax policy (whether established by statute or regulations) requires to the contrary.

10. There is no clear answer whether substance (as reflected in 8, above) or form (as reflected in 9, above) is the correct approach to characterizing the treatment of these different forms of partnership ownership alignments for tax purposes.

11. Subchapter C serves as a useful benchmark for subchapter K, with respect to equity ownership realignments. Subchapter C (particularly Code Sec. 368) is rich in its history and development, both by case law and Congressional responses thereto. In contrast, subchapter K is not the product of 75 years of judicial, regulatory and legislative development as to partnership ownership realignments and restructurings. One cannot conclude that subchapters K and C are running on parallel tracks for purposes of dealing with partnership realignments.

12. Subchapter C, on balance, is not a compelling analogy for purposes of our subchapter K situations. The corporate world's tax rules serve a completely different master, *i.e.*, to sanctify restructurings involving a complete entity approach (with judicial doctrines focusing on, inter alia, continuity of the entity's business enterprise and the presence of an entity-level business purpose).[342] Inherent in subchapter C's provisions is the assumption that realization occurs under Code Sec. 1001 for every type of corporate reorganization, necessitating the need for rigid statutory nonrecognition provisions under Code Sec. 354, 361 and 368(a)(1) designed to give explicit guidance and protection to restructurings of the corporate entity.

    [342] It is recognized that unlike other corporate reorganizations, a recapitalization under Code Sec. 368(a)(1)(E) and a mere change in corporate identity or form under Code Sec. 368(a)(1)(F) are less subject to these additional corporate-type doctrines. For example, recently promulgated Proposed Reg. § 1.368-1(b), in amending the introductory portion of the "overview" regulation on reorganizations, would prospectively add an exception for such recapitalizations and reincorporations from the generally applicable continuity of proprietary interest and continuity of business enterprise requirements. See REG-106889-04 (Aug. 12, 2004); Jasper L. Cummings, Jr., *Three New Sets of Proposed Regs. Should Make Planning for Reorganizations Much Easier*, 101 J. TAX'N 271, 284 (Nov. 2004).

    In contrast, subchapter K takes much more of an aggregate approach to ownership realignments. Indeed, partnership reallocations of profits and losses and the partners' respective rights inter sese solely affect the partners, not the partnership; judicial doctrines have not developed as to partnership realignments and restructurings, and in general such realignments have not been the focus of legislative, judicial or administrative activity or the object of taxpayer misuse and abuse. For these and other reasons, subchapter C treatment of corporate entity restructurings should not be dispositive for subchapter K purposes; and the absence of a statute in subchapter K comparable to Code Sec. 368 does not imply that all or some partnership realignments are both realization and recognition events.

13. If partnership ownership realignments are realization events, then a nonrecognition provision must be found (or one created) to avoid the absurd result that longstanding Congressionally sanctioned flexibility among the partners is to be thwarted by potential recognition of gain (or loss) each time the partners take advantage of that flexibility in their restructurings or reallocations.

14. Capital shifts, whether arising in a partnership recapitalization, a partner interest conversion, or even a partnership reallocation of previously allocated (not future) profits, are a whole other matter. Capital shifts are slippery creatures; unlike Justice Potter Stewart's definition of obscenity, [footnote omitted] I don't (always) know it when I see it. Capital shifts may have tax consequences, immediate or otherwise. Capital shifts may signify "something else is going on" among the partners and/or the partnership that the tax law rightly must deal with, *e.g.*, an indirect gift, the payment of compensation, or the satisfaction of some obligation.

15. Code Sec. 721 is the primary statutory provision that gives credence to nonrecognition treatment in the context of partnership realignments and restructurings (which by definition involve the ownership interests of one or more of its partners). Neither Code Sec. 721 nor its accompanying regulations provides a model of clarity or even a crude roadmap for that Code Section's application to partnership realignments.

16. Code Sec. 721 was selected by the IRS as the "poster child" for the characterization of legal status changes, commencing with Rev. Rul. 84-52 and continuing for partner interest conversions under the proposed regulations. If that's the horse one must ride to get away from the realization/recognition quagmire, one must be careful where that horse takes us. The characterization of partnership ownership realignments as Code Sec. 721 "interest-over" (or "interest-in"?) transfers is not a good fit, as noted by my fellow commentator.[344] Moreover, the tangential tax consequences that flow from Code Sec. 721 treatment are unclear; support exists for a broad approach, a narrow approach, and several intermediate or limited approaches, including three discussed in this article. In the name of simplicity, is it too late to go back to the "no sale or exchange" (nonrealization) approach to legal status changes, which was the IRS's stated position prior to issuance of Rev. Rul. 84-52, and generally apply that concept to partnership ownership realignments?

[343] Philip F. Postlewaite, The Transmogrification of Subchapter K, TAXES, Mar. 2005, at 189.

17. Two (or more) partners wishing to enter into a mirror-image recapitalization can accomplish their objective either through simultaneous exchanges of their respective (*e.g.*, preferred and common) interests with the partnership (*i.e.*, as a recapitalization as illustrated in Example 3A) or as direct exchanges of interests between themselves (as in Example 3B). A direct exchange between the partners looks and smells like a realization event, even though both of the exchanging partners alternatively could have reached the same economic result through an amendment of the partnership agreement that provides for a mere reallocation of future profits and loss (as in Example 1A). If the form selected by the partners should control, then a direct exchange may have substantially different tax consequences (as to realization and recognition of gain or loss, and as to tangential tax consequences) when compared to its functionally equivalent recapitalization or reallocation counterparts.

18. The tax treatment of mirror-image recapitalizations is open to substantial debate; support exists for several alternative approaches. Similarly, the tax treatment of direct exchanges of preferred and common interests remains open to debate. The transaction may be characterized as a tax-free swap by the partners of interests in the partnership; as a taxable swap by the partners of partnership interests; as a recharacterized recapitalization; as a recharacterized reallocation of profits and loss; or perhaps something else still.

19. It is possible that the treatment of preferred-to-common partner conversions in the proposed regulations is materially different from that of preferred-to-common partnership recapitalizations. However, none readily comes to mind.

20. The tangential tax consequences of all four of these partnership ownership realignment mechanisms is uncertain in whole or substantial part, and largely depends on how each mechanism is characterized.

21. No matter what conclusions one properly reaches on the many open issues raised in this paper, there seems to be some authority for almost everything, even if only via a well-reasoned construction of the applicable statutory provisions (which for now primarily are Code Secs. 721, 1001 and 1031), and their legislative histories.

Query whether each alternative interpretation rises to the level of constituting "substantial authority,"[345] for purposes of taxpayers' avoiding the substantial understatement of income taxes penalty under Code Sec. 6662, or to the level of a "realistic possibility of success,"[346] to avoid tax return preparer penalties under Code Sec. 6694.

[345] Reg. § 1.6662-4(d).

[346] Reg. § 1.6694-2.

So where do we go from here? It would appear that a statutory or regulatory solution to provide clarity on relevant aspects of realignments would be preferable. Statutes trump regulations, which can be held invalid, just as rock beats scissors. However, obtaining corrective tax legislation has not been a priority of Congress in recent years, particularly with respect to subchapter K provisions which are not viewed as revenue raisers or tax shelter loophole pluggers.

As a practical matter, therefore, a regulation (or package of regulations) dealing with clarification of the tax consequences of partnership realignments would be the more viable, if not preferable, solution. Just as scissors cuts paper, regulations trump revenue rulings and letter rulings, for purposes of taxpayer reliance and application by IRS agents and ultimately the courts. Partnership realignments and restructurings generally should be encouraged, absent an abusive tax purpose (which is rarely the case), and in any event the IRS and Treasury certainly know how to write partnership anti-abuse rules where the government perceives the need to do so.[347] Any regulatory clarification is likely to be given prospective effect only, pursuant to Code Sec. 7805(b); however, references in the preamble to any such regulations' clarification of existing law (perhaps coupled with an election granted to taxpayers to provide retroactive effect) might be sufficient to clarify the tax aspects of some existing partnership realignment transactions.

[347] *E.g.*, Reg. § 1.701-2. See, *e.g.*, Sheldon I. Banoff, *Anatomy of an Anti-Abuse Rule: What's Really Wrong with Reg. Section 1.701-2*, 66 TAX NOTES 1859 (Mar. 20, 1995); Sheldon I. Banoff, *The Use and Misuse of Anti-Abuse Rules*, 48 TAX LAW. 827 (Spring 1995); Joseph F. Schlueter, *The Partnership Anti-Abuse Rule: A Chronological Perspective*, 6 J. PASSTHROUGH ENTITIES 37 (July–Aug. 2003).

Still another alternative would be the issuance of guidance in the form of one or more revenue rulings,

containing illustrations of relevant fact patterns. This paper has identified what little guidance exists in the area of partnership ownership realignments to have arisen in the form of revenue rulings (primarily Rev. Rul. 84-52 and Rev. Rul. 95-37) and letter rulings (*i.e.*, those predating Rev. Rul. 84-52, with respect to legal status changes, and LTR 200345007, dealing with partnership recapitalizations and partner interest common-to-preferred and preferred-to-preferred conversions). Revenue rulings can address a few particular fact patterns and, when appropriate, provide a way for the IRS to reconsider and/or reverse its prior position, as it did with respect to permitting form to control (where the tax consequences of a partnership's incorporation can differ, depending upon the form chosen) in Rev. Rul. 84-111, which effectively overturned Rev. Rul. 70-239. The disadvantage of returning to the revenue ruling route to readdress partnership realignments is that the process likely would not get the breadth of input and review as would a proposed regulation. Moreover, the authoritative status of a revenue ruling is substantially less than that of a regulation, and less likely to be respected by the courts;[348] however, some courts do defer to revenue rulings—it's just hard to predict when they will do so.[349]

[348] See *Banoff*, note 249, *supra*.

[349] See, *e.g.*, *Business Ventures Int'l v. Olive*, CA-3, 893 F2d 641. *Also see* Shop Talk, *Challenge Revenue Ruling? Pay Negligence Penalty!* 77 J. TAX'N 62 (July 1992).

On balance, we would not recommend a revenue ruling as the sole solution (although rulings, notices or other IRS guidance that interpret or apply any legislative or regulatory fix would most likely be useful and welcomed). The answers to the questions raised in this paper appear to be too important (and - in a perverted sense, which sentiment seemed to be shared by many in attendance when we presented this paper - too much fun and consternation, intellectually) to leave solely to the IRS in a rulings project. We recall that, over 20 years ago, the Tax Court in *Applebaum* sidestepped the question of whether a change in legal status constitutes an exchange for tax purposes, identifying it as "such an important issue,"[350] and finding other grounds to dispose of the case at hand. We think the same is true today, and even more so with respect to the broader issue of the treatment (and interrelationship) of all the forms of partnership ownership realignments discussed herein, even as to the relatively simplistic situations covered in this paper.

[350] *Applebaum*, *supra* note 72, 43 TCM, at 1423.

Hopefully, this article proves helpful in identifying these issues and the number of alternative treatments which may be applicable. We leave it to the Treasury (perhaps in its finalization of the proposed regulations, hopefully as appropriately modified to deal with issues raised herein; perhaps in a new regulations project), the IRS and the courts to identify which treatments should control. We are compelled to remind our readers and IRS and Treasury rules-drafters) that, in limiting its assumptions,[351] this paper has purposely dodged a number of really hard issues that also must be considered, in providing much-needed clarification for partnership ownership realignments. Notwithstanding the numerous technical issues and areas in need of clarification as described herein, it is submitted that as a matter of policy the tax consequences of such business transactions should generally be neutral for the partnership and both its participating and non-participating partners. Partnership ownership realignments are not inherently abusive or suspect transactions; unlike his fellow commentator,[352] this author does not fault the IRS and the Treasury for grappling during the past 25 years to find a result of nontaxability in such realignments - even absent explicit statutory or regulatory authority on point. The Treasury and the IRS recognize that subchapter K is intended to permit taxpayers to conduct joint business (including investment) activities without incurring an entity-level tax.[353] One commentator dryly summarized this flexibility (in an article published two days after this Tax Conference) as follows: "The whole premise of Subchapter K is summed up in the notion that tax law will not interfere with the joint pursuit of profit as long as the joint pursuit of profit does not interfere with the tax law."[354] Partnership ownership realignments do not interfere with the tax law; therefore, it is submitted that subchapter K must be interpreted (or, if need be, amended) so as not to interfere with a wide variety of partnership ownership realignments that for valid nontax reasons are being widely undertaken.

[351] *E.g.*, that there are no new partner admissions or withdrawals and thus no redemptions or liquidations of partnership interests; that the partners are unrelated parties acting arm's length, and that there is no infusion of capital (i.e., cash or other property) to the partnership from any partner. See "Introduction," *supra*.

[352] See Postlewaite, *supra* note 344.

Postlewaite, "The Transmogrification of Subchapter K," Taxes (3/1/2005),[494] commented on Sheldon Banoff's article above [most footnotes omitted]:

III. Form - Present and Accountable or Missing in Action?

Shelly in his paper raises a fundamental problem with partnership restructurings, particularly when they do not involve clearly identifiable steps in the reorganization of the enterprise. In the absence of legislation, how is such an event configured for tax purposes? For example, one second the enterprise is a general partnership, the next it is an LLC. Seldom is there an actual step-by-step procedure that is followed in effectuating the restructuring of the enterprise. At best, if knowledgeable tax counsel is involved, there is a mere recital in the governing document, crafted to establish, if respected, the desired treatment for tax purposes as to how the transaction is to be conceptualized.

[494] Thompson Coburn LLP doc. no. 6217488.

A. Shelly's Views on Form and the Initial Openness of the IRS to Such Matters

Shelly places the issue squarely before us. Initially, he instructs that: "Indeed, the changes in the entity's legal status can be accomplished in various forms." Thereafter, he recounts the variations on a theme - assets over, assets up, interests over, statutory merger and statutory conversion, which vie for application in a partnership restructuring. However, in reality, could it be that many of these restructurings are formless transactions and thus form has little or no effect on their essence? If so, how should this phenomenon impact the tax treatment of such restructurings?

In another of his offerings to the University of Chicago Tax Conference, Shelly ruminated on issues of form and substance regarding changes in an entity's legal status. Therein, Shelly employed a number of models addressing similar changes in form and offered a variety of approaches. He ultimately advocated "permitting form to control, except in those situations where Congress or the courts have mandated a contrary approach." Emphasizing that different tax consequences may prove determinative, he noted, "Where different substantive tax consequences may arise depending on the route taken, with each route having the same economic effect - *i.e.*, a change in form of legal entity - then taxpayers should be permitted to select (and thereby be bound by) the tax consequences that arise from the form of the conversion utilized." Implicit in his proposal is that form plays a significant role in the restructuring. Such may well be the case in the movement between one subchapter of the Code to another, *e.g.*, corporation to partnership, but appears to be less certain for movement within a specific subchapter, *e.g.*, general partnership to limited partnership.

Shelly's expansive treatment is similar to that permitted by the IRS on the incorporation of a partnership. In Rev. Rul. 84-111, form was not only tolerated but practically encouraged. Therein, three conceptual models were used in characterizing the transformation of the partnership and thereby determining the tax consequences of the transaction. The IRS acknowledged that a single event, the incorporation of a partnership, could be effectuated in one of three ways.

In Rev. Rul. 84-111, the IRS concluded that there are three procedures available for incorporating a partnership: (1) the transfer of the partnership assets by the partnership to a corporation followed by a distribution of the corporate stock to the partners, *i.e.*, assets over; (2) a transfer of the partnership interests by the partners to the corporation in return for stock and a distribution of the partnership's assets to the corporation, *i.e.*, interests over; and (3) a liquidation by the partners of the partnership followed by a transfer by the partners of the distributed assets to the corporation in return for stock, *i.e.*, assets up.

It would be excessive for purposes of our discussion to present the various hypothetical settings which would illustrate the different tax consequences generated which of the methods is selected to govern the incorporation. Shelly and I have done so in other work. Suffice it to say that the basis of the assets to the corporation and the basis of the stock to the partners may differ depending upon the method selected. Similar differences may arise with respect to the holding period for the assets and the stock, recognition upon the transfer, the characterization of the gain and other tax issues.

The IRS concluded that it would respect the form selected because, depending on the format chosen for the transfer to a controlled corporation, the basis and holding periods of the various assets received by the corporation and the basis and holding periods of the stock received by the former partners can vary. Acceptance of the form selected facilitates flexibility, an intended consequence for transactions arising under subchapter K.

B. Recent Indications by the IRS That It Will Impose Form

Surprisingly, after this initial acquiescence regarding the restructuring of an enterprise, the IRS has been inconsistent and intolerant on these matters. On elective incorporations, even though they involve movement between subchapters, the check-the-box regulations insist upon an assets-over approach. The preamble to those regulations emphasized that the mandated configuration was selected in an attempt “to minimize tax consequences of the change in classification and achieve administrative simplicity.” However, the single method configuration imposed by the regulations for elective treatment was not intended to impact the triple method vitality of Rev. Rul. 84-111 and the flexibility afforded participants upon an actual conversion of a partnership to a corporation.

Furthermore, regarding the role of “form” in entity conversions, the IRS recently addressed an actual conversion of a partnership into a corporation where state law did not require a transfer of assets or interests.[44] Applying the same treatment mandated for elective conversions from partnership status to corporate status, the IRS was singular in its approach, mandating an assets-over approach. While neither a transfer of assets nor a transfer of interests was required under state law, it was unclear from the ruling whether such transfers were prohibited under state law. Nevertheless, the IRS rejected any other conceptualization of the method through which the change of status was effectuated. The IRS failed to permit the flexible approach of Rev. Rul. 84-111 to apply because the conversion was “formless” under local law.

[44] *See* Rev. Rul. 2004-59, IRB 2004-23, 1050.

C. Taxpayer Election of Form on Partnership Transactions

Why is the latitude available to taxpayers on actual conversions not extended to actual conversions involving “formless” incorporations as well as elective conversions? If partnership restructurings are conceptualized as occurring under Code Sec. 721, similar issues present themselves as to whether a stipulation of form or adoption of the steps involved in an assets-up, assets-over or interests-over characterization should govern the tax consequences of the transaction, particularly since movement within a subchapter may be devoid of form itself.

The tax technicalities of these activities should be minimized. Parties should decide their preferred tax treatment, they should agree to report the transactions consistently both for themselves and the partnership, and the IRS should accord their choice controlling governance. Once made, the form selected should be irrevocable. With the appropriate modification by the IRS, its administrative pronouncements should be expanded to provide that all three methods (assets over, assets up and interests over) of conceptualizing the incorporation of a partnership are available in actual or elective conversions as well as in partnership restructurings. Whichever configuration is chosen by the parties should govern for tax purposes.[45]

[45] There should be no reason to craft a default rule since by definition the parties will have adopted an approach by the end of the tax year as will be evidenced by their basis calculations and the like.

In reviewing the Banoff and Postlewaite, consider the following discussions:

- The authors point out that the IRS has been letting form control in other contexts and suggest doing so here. For discussions of the check-the-box regulations and Rev Ruls. 84-111 and 2004-59, see part II.P.3.c Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations.

- The authors distinguish reallocating profits from issuing a new partnership interest. For the latter, see part II.M.4.f Issuing a Profits Interest to a Service Provider.

- Banoff views *Cottage Savings* as imposing a harsh rule. However, the IRS does not interpret *Cottage Savings* as harshly as suggested.[495] Perhaps one might analogize between the flexibility of Subchapter K partnership income tax rules and trust distributions of property under Subchapter J (see part II.J.8.d.i Distribution in Kind - Generally)[496] and modifications/restructuring (see part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting).

Elaborating on the last bullet point, part II.J.18.f Commutation vs Mere Division explores seemingly inconsistent theories in regulations under Code § 1001: trust modifications, divisions, mergers, etc. are not subject to income tax unless they constitute a commutation. In a commutation, a trust is terminated, with each party receiving the actuarial value of its beneficial interest or other property in exchange for that value. On the other hand, if a trustee had absolute discretion regarding distributions, a trustee could simply distribute to each party what seems fair to the trustee. Part II.J.18.f suggests that the key is whether the beneficiaries have expectancies to which they are entitled and can be ascertained.

Similarly, in partnerships, one might look to see whether partners have legal rights to a particular portion of partnership property or whether the rights are fluid as the partnership evolves:

- Given that Reg. § 1.704-1(b)(2)(iv)(f)[497] does not require revaluation (which accounts for unrealized appreciation and other book/value differences) when existing interests in partnership profits change, arguably a partnership agreement that is based on that Reg. § 1.704-1(b)(2)(iv) capital accounts without addressing that issue contemplates that the partners do not have any expectation regarding the allocation of unrealized appreciation and other book/value differences before recognition occurs. If that is a correct assumption, then unrealized appreciation and other book/value differences do not need to be accounted for when interests in partnership profits change.

- Most modern partnership agreements use target allocations rather than strictly following Reg. § 1.704-1(b)(2)(iv). Instead of tracking initial capital accounts and layering on top of them income, gains, and losses based on mechanical allocations (a "layer cake approach"),

[495] See Letter Ruling 200527007, discussed in the text accompanying fn 2950 in part II.J.18.a Trust Divisions.
[496] For further context, see the rest of part II.J.8.d Distribution in Kind; Specific Bequests)
[497] Reg. § 1.704-1(b)(2)(iv)(f) is reproduced in fn 507 in part II.C.7 Maintaining Capital Accounts.

a target allocation paradigm looks to what each partner would receive if the partnership were to liquidate at the end of the taxable year and then adjusts capital accounts to effectuate those rights. In an actual liquidation, all assets are deemed sold for their fair market value, which may suggest that unrealized appreciation and other book/value differences may need to be accounted for. However, most target allocations assume a hypothetical annual liquidation based on book value, not fair market value, which may support the opposite conclusion.

- In the law firm example further above, goodwill is never allocated to anyone. Each partner's right to profits is determined a year at a time based on performance, and a lawyer who leaves receives only any unwithdrawn previously taxed earnings. Because a client can choose any lawyer at any time, neither the firm nor the departing lawyer has any right to the client's future work, so neither goodwill nor any other client-based intangible is allocated or distributed. However, in other service firms, goodwill and client-based intangibles can be allocated and distributed; in a 2022 case, that allocation led to the departing partners receiving ordinary income![498]

Absent a clear answer, I hope that this part II.C.6 helps readers analyze the issues to come to your own conclusion appropriate to the facts and circumstances facing you.

II.C.7. Maintaining Capital Accounts

Sowell, "Concepts and Context in Partnership Capital Shifts," *TAXES - The Tax Magazine* (Feb. 3, 2023),[499] is a great summary of many aspects of keeping capital accounts.

A capital account tracks a partner's equity in a partnership. It starts by measuring the partner's contributions of property to the partnership. Next, add the partner's share of partnership income or subtract the partner's share of losses. Finally, subtract distributions the partnership makes to the partner.

One can use capital accounts to track tax or financial attributes. Financial attributes might follow fair market value only or take the hybrid approach commonly used in traditional accounting. When analyzing a partner's equity, consider the following approaches:

- <u>Tax Basis</u>. Contributions and distributions are measured using their tax basis, and income and loss are measured based on transactions that are recognized for tax purposes (even if the income is nontaxable or an expense or loss is nondeductible).

- <u>Fair Market Value</u>. A contribution or distribution is measured using its fair market value (FMV). All assets are valued at the beginning and end of the year. The overall income or loss whatever change in the assets' aggregate FMV that is not accounted for by contributions or distributions. That overall income or loss consists of actual transactions and changes in FMV due to market fluctuations (unrealized gain or loss).

- <u>Book Value</u>. Traditional accounting focuses on measurable events and generally does not give effect to market fluctuations. When forming a partnership, counting FMV is essential to determining the percentage of value each partner contributed. From there, however, measuring FMV tends to be impractical and involve judgment calls. Thus, book value tends

[498] See text accompanying and preceding fn 510 in part II.C.7 Maintaining Capital Accounts.
[499] Saved as Thompson Coburn LLP doc. no. 29656856.

> to use FMV accounting when the partnership is formed and tax basis accounting during normal operations. Book value will apply FMV accounting when certain important events occur that require redetermining the partners' financial relationships with each other.

Code § 704(b) and the regulations under it require the partnership to use a form of book value capital accounts. Reg. § 1.704-1(b)(2)(iv) provides:[500]

> *Basic rules*. Except as otherwise provided in this paragraph (b)(2)(iv), the partners' capital accounts will be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) if, and only if, each partner's capital account is increased by
>
> (1) the amount of money contributed by him to the partnership,
>
> (2) the fair market value of property contributed by him to the partnership (net of liabilities that the partnership is considered to assume or take subject to), and
>
> (3) allocations to him of partnership income and gain (or items thereof), including income and gain exempt from tax and income and gain described in paragraph (b)(2)(iv)(g) of this section, but excluding income and gain described in paragraph (b)(4)(i) of this section; and

> is decreased by
>
> (4) the amount of money distributed to him by the partnership,
>
> (5) the fair market value of property distributed to him by the partnership (net of liabilities that such partner is considered to assume or take subject to),
>
> (6) allocations to him of expenditures of the partnership described in section 705(a)(2)(B), and
>
> (7) allocations of partnership loss and deduction (or item thereof), including loss and deduction described in paragraph (b)(2)(iv)(g) of this section, but excluding items described in (6) above and loss or deduction described in paragraphs (b)(4)(i) or (b)(4)(iii) of this section; and is otherwise adjusted in accordance with the additional rules set forth in this paragraph (b)(2)(iv).
>
> For purposes of this paragraph, a partner who has more than one interest in a partnership shall have a single capital account that reflects all such interests, regardless of the class of interests owned by such partner (*e.g.*, general or limited) and regardless of the time or manner in which such interests were acquired. For liabilities assumed before June 24, 2003, references to liabilities in this paragraph (b)(2)(iv)(b) shall include only liabilities secured by the contributed or distributed property that are taken into account under section 752(a) and (b).

The IRS explains differences between book value and tax basis capital accounts in its "Partner's Instructions for Schedule K-1 (Form 1065) (2022)":

---

[500] Reg. § 1.704-1(b)(2)(iv)(b). I added some formatting not found in the regulation but have not changed a single word.

Item L

> The partnership must report your beginning capital account and ending capital account for the year using the Tax Basis Method, including the amount of capital you contributed to the partnership during the year, your share of the partnership's current year net income or loss as computed for tax purposes, any withdrawals and distributions made to you by the partnership, and any other increases or decreases to your capital account determined in a manner generally consistent with figuring the partner's adjusted tax basis in its partnership interest (without regard to partnership liabilities), taking into account the rules and principles of sections 705, 722, 733, and 742. See the Instructions for Form 1065 for more details.
>
> For many reasons, your ending capital account as reported to you by the partnership in item L may not equal the adjusted tax basis in your partnership interest. Generally, this is because a partner's adjusted tax basis in its partnership interest includes the partner's share of partnership liabilities (and capital accounts determined by using the tax basis method do not). In addition, your partnership may not have all the necessary information from you to accurately figure the adjusted tax basis in your partnership interest due to partner-level adjustments. You are responsible for maintaining an annual record of the adjusted tax basis in your partnership interest as determined under the principles and provisions of subchapter K, including, for example, those under sections 705, 722, 733, and 742. Regulations section 1.705-1(a)(1) provides that a partner is required to determine the adjusted basis of its interest in a partnership when necessary to determine its tax liability or that of any other person. For example, a determination is required in ascertaining the extent to which a partner's share of loss is allowed, when there is a sale or exchange of all or part of a partnership interest, and when a partner's entire partnership interest is liquidated. The adjusted basis of a partner's interest in a partnership is determined without regard to any amount shown in the partnership books as the partner's "capital," "equity," or similar account.

Reg. § 1.704-1(b)(2)(ii) generally governs the allocation of income and loss, which determines the annual income tax consequences from operations, but which also needs to reflect the reality of who benefits from that allocation. If income is allocated to a partner who will not receive the financial benefit sooner or later, that tends to indicate that the parties are playing income tax gains. Because capital accounts are intended measure how much each partner would get upon liquidation, capital accounts tell us whether the allocations of income and loss are merely gaming the system or reflect real economic consequences. Of course, tax basis and book value capital accounts are not as accurate as FMV capital accounts, so the tax system needs to ensure that allocations of income and loss, when applied to book value capital account, do not create distortions between the partners' book value capital accounts and their eventual FMV capital accounts.

Accordingly, Reg. § 1.704-1(b)(2)(ii), "Economic effect," provides:

> (a) *Fundamental principles*. In order for an allocation to have economic effect, it must be consistent with the underlying economic arrangement of the partners. This means that in the event there is an economic benefit or economic burden that corresponds to an allocation, the partner to whom the allocation is made must receive such economic benefit or bear such economic burden.

(b) *Three requirements*. Based on the principles contained in paragraph (b)(2)(ii)(a) of this section, and except as otherwise provided in this paragraph, an allocation of income, gain, loss, or deduction (or item thereof) to a partner will have economic effect if, and only if, throughout the full term of the partnership, the partnership agreement provides -

(1) For the determination and maintenance of the partners' capital accounts in accordance with the rules of paragraph (b)(2)(iv) of this section,

(2) Upon liquidation of the partnership (or any partner's interest in the partnership), liquidating distributions are required in all cases to be made in accordance with the positive capital account balances of the partners, as determined after taking into account all capital account adjustments for the partnership taxable year during which such liquidation occurs (other than those made pursuant to this requirement (2) and requirement (3) of this paragraph (b)(2)(ii)(b)), by the end of such taxable year (or, if later, within 90 days after the date of such liquidation), and

(3) If such partner has a deficit balance in his capital account following the liquidation of his interest in the partnership, as determined after taking into account all capital account adjustments for the partnership taxable year during which such liquidation occurs (other than those made pursuant to this requirement (3)), he is unconditionally obligated to restore the amount of such deficit balance to the partnership by the end of such taxable year (or, if later, within 90 days after the date of such liquidation), which amount shall, upon liquidation of the partnership, be paid to creditors of the partnership or distributed to other partners in accordance with their positive capital account balances (in accordance with requirement (2) of this paragraph (b)(2)(ii)(b)). Notwithstanding the partnership agreement, an obligation to restore a deficit balance in a partner's capital account, including an obligation described in paragraph (b)(2)(ii)(c)(1) of this section, will not be respected for purposes of this section to the extent the obligation is disregarded under paragraph (b)(2)(ii)(c)(4) of this section.

(4) For purposes of paragraphs (b)(2)(ii)(b)(1) through (3) of this section, a partnership taxable year shall be determined without regard to section 706(c)(2)(A).

(5) The requirements in paragraphs (b)(2)(ii)(b)(2) and (3) of this section are not violated if all or part of the partnership interest of one or more partners is purchased (other than in connection with the liquidation of the partnership) by the partnership or by one or more partners (or one or more persons related, within the meaning of section 267(b) (without modification by section 267(e)(1)) or section 707(b)(1), to a partner) pursuant to an agreement negotiated at arm's length by persons who at the time such agreement is entered into have materially adverse interests and if a principal purpose of such purchase and sale is not to avoid the principles of the second sentence of paragraph (b)(2)(ii)(a) of this section.

(6) The requirement in paragraph (b)(2)(ii)(b)(2) of this section is not violated if, upon the liquidation of the partnership, the capital accounts of the partners are increased or decreased pursuant to paragraph (b)(2)(iv)(f) of this section as of

the date of such liquidation and the partnership makes liquidating distributions within the time set out in the requirement in paragraph (b)(2)(ii)(b)(2) of this section in the ratios of the partners' positive capital accounts, except that it does not distribute reserves reasonably required to provide for liabilities (contingent or otherwise) of the partnership and installment obligations owed to the partnership, so long as such withheld amounts are distributed as soon as practicable and in the ratios of the partners' positive capital account balances.

(7) See Examples 1.(i) and (ii), 4.(i), 8.(i), and 16.(i) of paragraph (b)(5) of this section for issues concerning paragraph (b)(2)(ii)(b) of this section.

If a partnership does not comply with all the detailed rules of Reg. § 1.704-1(b)(2)(iv), Reg. § 1.704-1(b)(2)(ii)(d), "Alternate test for economic effect," explains how to comply with Code § 704(b):

If-

(1) Requirements (1) and (2) of paragraph (b)(2)(ii)(b) of this section are satisfied, and

(2) The partner to whom an allocation is made is not obligated to restore the deficit balance in his capital account to the partnership (in accordance with requirement (3) of paragraph (b)(2)(ii)(b) of this section), or is obligated to restore only a limited dollar amount of such deficit balance, and

(3) The partnership agreement contains a "qualified income offset,"

such allocation will be considered to have economic effect under this paragraph (b)(2)(ii)(d) to the extent such allocation does not cause or increase a deficit balance in such partner's capital account (in excess of any limited dollar amount of such deficit balance that such partner is obligated to restore) as of the end of the partnership taxable year to which such allocation relates. In determining the extent to which the previous sentence is satisfied, such partner's capital account also shall be reduced for-

(4) Adjustments that, as of the end of such year, reasonably are expected to be made to such partner's capital account under paragraph (b)(2)(iv)(k) of this section for depletion allowances with respect to oil and gas properties of the partnership, and

(5) Allocations of loss and deduction that, as of the end of such year, reasonably are expected to be made to such partner pursuant to section 704(e)(2), section 706(d), and paragraph (b)(2)(ii) of §1.751-1, and

(6) Distributions that, as of the end of such year, reasonably are expected to be made to such partner to the extent they exceed offsetting increases to such partner's capital account that reasonably are expected to occur during (or prior to) the partnership taxable years in which such distributions reasonably are expected to be made (other than increases pursuant to a minimum gain chargeback under paragraph (b)(4)(iv)(e) of this section or under § 1.704-2(f); however, increases to a partner's capital account pursuant to a minimum gain chargeback requirement are taken into account as an offset to distributions of nonrecourse liability proceeds that are reasonably expected to be made and that are allocable to an increase in partnership minimum gain.

> For purposes of determining the amount of expected distributions and expected capital account increases described in (6) above, the rule set out in paragraph (b)(2)(iii)(c) of this section concerning the presumed value of partnership property shall apply. The partnership agreement contains a "qualified income offset" if, and only if, it provides that a partner who unexpectedly receives an adjustment, allocation, or distribution described in (4), (5), or (6) above, will be allocated items of income and gain (consisting of a pro rata portion of each item of partnership income, including gross income, and gain for such year) in an amount and manner sufficient to eliminate such deficit balance as quickly as possible. Allocations of items of income and gain made pursuant to the immediately preceding sentence shall be deemed to be made in accordance with the partners' interests in the partnership if requirements (1) and (2) of paragraph (b)(2)(ii)(b) of this section are satisfied. See examples (1)(iii), (iv), (v), (vi), (vii), (ix), and (x), (15), and (16)(ii) of paragraph (b)(5) of this section.

Notwithstanding regulations under Code § 704(b), the IRS is moving toward using tax basis capital accounts for tax returns. Notice 2020-43, part II, "Background," explains developments preceding the Notice's issuance:

> The 2019 instructions for Form 1065 and Partner's Instructions for Schedule K-1 (Form 1065), like the 2018 instructions for these forms, require that a partnership reporting its partners' capital on a method other than the tax basis method report a partner's tax capital account at both the beginning and the end of the partnership's taxable year if either amount is negative with respect to the partner. The 2019 instructions for Form 8865, Schedule K-1, incorporate this requirement by reference to the instructions for Form 1065.
>
> On April 5, 2019, the IRS released Form 1065 Frequently Asked Questions (FAQs) explaining how a partnership should determine a partner's tax capital account and providing a safe harbor approach based on a partner's outside basis in its partnership interest. Thereafter, early releases of drafts of the 2019 Form 1065 and the 2019 Form 8865, released September 30, 2019, and related draft instructions for the 2019 Form 1065 (to which the draft instructions for the 2019 Form 8865 refer), and the 2019 Partner's Instructions for Schedule K-1 (Form 1065), released October 29, 2019, expanded partner tax capital reporting to require all partnerships and certain other persons who file Form 8865 to report all partners' tax capital accounts using the tax basis method.
>
> In response to the change requiring all partnerships to report their partners' tax capital on a tax basis method, commenters stated that some partnerships might be unable to comply, either in a timely manner or ever. These commenters explained that partnerships that have not historically maintained partner tax capital accounts may face difficulties in calculating their partners' tax capital by means of a historical transactional analysis of events. Commenters stated that a partnership would find such a transactional analysis particularly difficult and burdensome where the partnership has been operating for many years and either documentation regarding historical transactional events affecting partner tax capital no longer exists, or the documentation does exist, but its volume or complexity precludes reconstruction of accurate tax capital accounts. In addition, commenters asked for guidance on how to calculate tax capital using a transactional analysis under complicated transactions and structures.

> Accordingly, the Department of the Treasury (Treasury Department) and the Internal Revenue Service (IRS) released Notice 2019-66, 2019-52 I.R.B. 1509 on December 11, 2019, removing the requirement that partnerships and other persons required to furnish and file Form 1065, Schedule K-1 or Form 8865, Schedule K-1, report partner capital accounts in Item L of the 2019 Form 1065, Schedule K-1, or in Item F of the 2019 Form 8865, Schedule K-1, using the tax basis method for 2019. In addition, Notice 2019-66 announced that further guidance would be provided regarding the definition of partner tax capital. In lieu of providing a definition of tax basis capital, this notice proposes two methods that satisfy the Tax Capital Reporting Requirement. Section III of this notice describes the two proposed methods for complying with the Tax Capital Reporting Requirement. Part IV of this notice requests comments on those proposed methods. The Treasury Department and the IRS anticipate that the two proposed methods outlined in section III of this notice will be the only methods that meet the Tax Capital Reporting Requirement for partnership taxable years ending on or after December 31, 2020.

First, we will go through the rest of the Notice. Then, we will go through the prior guidance described above.

Notice 2020-43, part III, "Proposed Methods for Complying With The Tax Capital Reporting Requirement For Taxable Years Ending On Or After December 31, 2020," provides an overview of what's in store, the describes two alternative methods taxpayers may use. Here's the overview:

> Commenters have indicated that many partnerships that currently possess partner tax capital information generally develop and maintain partner tax capital by applying the provisions and principles of subchapter K of chapter 1 of the Code (subchapter K), including those contained in §§ 705, 722, 733, and 742 of the Code, to relevant partnership and partner events. In such a situation, commenters have indicated that partnerships maintaining tax capital (i) increase a partner's tax capital account by the amount of money and the tax basis of property contributed by the partner to the partnership (less any liabilities assumed by the partnership or to which the property is subject) as well as allocations of income or gain made by the partnership to the partner, and (ii) decrease a partner's tax capital account by the amount of money and the tax basis of property distributed by the partnership to the partner (less any liabilities assumed by the partner or to which the property is subject) as well as allocations of loss or deduction made by the partnership to the partner (Transactional Approach).
>
> The Treasury Department and the IRS understand that many partnerships and other persons have maintained partner tax capital accounts according to the Transactional Approach, but due to the array of transactions that might affect partner tax capital, it is possible that partnerships and other persons that have been using the Transactional Approach may not have been adjusting partner tax capital accounts in the same way under similar fact patterns. Several commenters explained that providing detailed guidance that would make the Transactional Approach consistent in all potential transactions would be a major project that would consume significant IRS resources.
>
> The IRS and Treasury believe that a consistent framework for all partnerships and other persons to comply with the Tax Capital Reporting Requirement will aid the IRS in administering the tax law, and consistency will ultimately reduce complexity of the preparation of partnership returns. Accordingly, this notice proposes two alternative

> methods that a partnership would be required to use to comply with the Tax Capital Reporting Requirement. For such purpose, a partnership may report, for each partner, either (i) the partner's basis in its partnership interest, reduced by the partner's allocable share of partnership liabilities, as determined under § 752 of the Code (Modified Outside Basis Method) or (ii) the partner's share of previously taxed capital, as calculated under a modified version of § 1.743-1(d) of the Income Tax Regulations (Modified Previously Taxed Capital Method). Both methods are further described below. It is intended that a partnership must use one of these two methods for purposes of satisfying the Tax Capital Reporting Requirement and the method selected must be used with respect to all of the partnership's partners. Capital account amounts based on the Transactional Approach will not satisfy the Tax Capital Reporting Requirement. For taxable years after 2020, a partnership may change its Tax Capital Reporting Requirement method from the Modified Outside Basis Method to the Modified Previously Taxed Capital Method, or vice versa, by attaching a disclosure to each Schedule K-1 describing the change, if any, to the amount attributable to each partner's beginning and end of year balances, and the reason for the change.

Notice 2020-43, part III, item (1)," The Modified Outside Basis Method," provides:

> A partnership may satisfy the Tax Capital Reporting Requirement by determining, or being provided by its partners, the partner's adjusted basis in its partnership interest, determined under the principles and provisions of subchapter K (including those contained in §§ 705, 722, 733, and 742), and subtracting from that basis the partner's share of partnership liabilities under § 752.
>
> If the partnership is satisfying the Tax Capital Reporting Requirement by using the Modified Outside Basis Method, a partner must notify its partnership, in writing, of any changes to the partner's basis in its partnership interest during each partnership taxable year other than changes attributable to contributions to and distributions from the partnership and the partner's share of income, gain, loss, or deduction that are otherwise reflected on the partnership's schedule K-1. The partner must provide such written notification of such changes to the partner's basis within thirty days or by the taxable year-end of the partnership, whichever is later. For example, if a person purchases an interest in a partnership that has chosen to use the Modified Outside Basis Method, the purchasing partner must notify the partnership of its basis in the acquired partnership interest, regardless of whether the partnership has an election under § 754 of the Code in effect or has a substantial built-in loss, as defined in § 743(d) of the Code, at the time of such interest purchase. For purposes of the Modified Outside Basis Method, a partnership is entitled to rely on the partner basis information that the partnership is provided by its partners unless the partnership has knowledge of facts indicating that the provided information is clearly erroneous.

Notice 2020-43, part III, item (2)," Modified Previously Taxed Capital Method," provides:

> A partnership that does not satisfy the Tax Capital Reporting Requirement by using the Modified Outside Basis Method would be required to do so by using the Modified Previously Taxed Capital Method. Section 1.743-1(d)(1) generally provides that a partnership interest transferee's (transferee's) share of the adjusted basis of partnership property is equal to the sum of the transferee's interest as a partner in the partnership's previously taxed capital, plus the transferee's share of partnership liabilities. The regulation further provides that the transferee's previously taxed capital is equal to -

(i) The amount of cash that the partner would receive on a liquidation of the partnership following a hypothetical transaction; increased by

(ii) The amount of tax loss (including any remedial allocations under § 1.704-3(d) of the Income Tax Regulations) that would be allocated to the partner from the hypothetical transaction; and decreased by

(iii) The amount of tax gain (including any remedial allocations under § 1.704-3(d)) that would be allocated to the partner from the hypothetical transaction.

The hypothetical transaction is a disposition by the partnership of all of its assets in a fully taxable transaction for cash equal to the fair market value of the assets. See § 1.743-1(d)(2).

Part (i) of the above calculation is intended to quantify, for each partner, the partner's economic right to a share of the distributable proceeds of the partnership immediately after the hypothetical transaction and the payment by the partnership of all of its liabilities (partnership net liquidity value). The Treasury Department and the IRS understand that although some partnerships may be able to determine the fair market value of their assets for each taxable period, such information will not be readily available for all partnerships. In most instances, a partnership that calculates its partnership net liquidity value by using a consistent measurement for the value of its assets (such as GAAP basis or § 704(b) basis) rather than their actual fair market value will determine the same amount for each of its partners as would be determined if the partnership had calculated its partnership net liquidity value by hypothesizing a sale of its assets for actual fair market value. Accordingly, for purposes of the Tax Capital Reporting Requirement, the Modified Previously Taxed Capital Method modifies the calculation described in § 1.743-1(d)(2) (for purposes of the Tax Capital Reporting Requirement only) as follows:

(i) The cash a partner would receive on a partnership liquidation and calculations of gain and loss in the hypothetical transaction would be based on the assets' fair market value, if readily available. Otherwise, a partnership may determine its partnership net liquidity value and gain or loss by using such assets' bases as determined under § 704(b), GAAP, or the basis set forth in the partnership agreement for purposes of determining what each partner would receive if the partnership were to liquidate, as determined by partnership management; and

(ii) All liabilities are treated as nonrecourse for purposes of parts (ii) and (iii) of the calculation referring to gain or loss, respectively. This is to avoid the burden of having to characterize the underlying debt and to simplify the computation.

Example - Facts. A and B are equal partners in AB LLC, a calendar-year partnership. On December 31, 2020, AB LLC's balance sheet reflects the following assets and liabilities:

- $500 of cash;
- Inventory with a tax and book basis of $1,000;
- Equipment with a tax and book basis of $500;

- Land with a tax and book basis of $1,000; and
- A long-term loan of $5,000.

AB LLC chooses to comply with the Tax Capital Reporting Requirement by using the Previously Taxed Capital Method and calculating liquidation values, gains, and losses, based on the book basis of the assets. Each of A and B's Previously Taxed Capital under that method would be $(1,000), an amount equal to (i) the cash each would receive after the hypothetical liquidation (zero, because the debt of $5,000 exceeds the $3,000 book basis of the assets), less (ii) gain that would be allocated to each partner on the hypothetical liquidation and sale ($1,000, each partner's 50% share of the excess of the $5,000 amount realized on a sale of the property for the debt over the tax basis of $3,000), plus (iii) loss that would be allocated to each partner (zero).

A partnership that adopts the Modified Previously Taxed Capital Method would be required, for each taxable year in which the method is used, to attach a statement indicating that the Modified Previously Taxed Capital Method is used and the method it used to determine its partnership net liquidity value (for example, fair market value, § 704(b) book basis, etc.).

- AICPA comment letter – Comments on Notice 2020-43
- The Tax Adviser article - Draft instructions for reporting partnership capital accounts are issued

Some basic applications are described in Hamill, "The Mechanics of Maintaining Transactional Tax Basis Capital Accounts," *Corporate Taxation* (WG&L) (Nov/Dec 2021).

Sections 3 and 4 of Notice 2021-13 provide:

3. RELIEF FROM PENALTIES UNDER SECTIONS 6698, 6721, AND 6722

A partnership will not be subject to a penalty under sections 6698, 6721, or 6722 due to the inclusion of incorrect information in reporting its partners' beginning capital account balances on the 2020 Schedules K-1 if the partnership can show that it took ordinary and prudent business care in following the 2020 Form 1065 Instructions to report its partners' beginning capital account balances using any one of the following methods, as outlined in the instructions: the tax basis method, modified outside basis method, modified previously taxed capital method, or section 704(b) method. For purposes of this notice, "ordinary and prudent business care" means the standard of care that a reasonably prudent person would use under the circumstances in the course of his business in handling account information. In demonstrating ordinary and prudent business care, taxpayers are reminded that capital account balances are part of a partnership's books and records and must be maintained accordingly.

In addition, a partnership will not be subject to a penalty under sections 6698, 6721, or 6722 due to the inclusion of incorrect information in reporting its partners' ending capital account balances on Schedules K-1 in taxable year 2020 or its partners' beginning or ending capital account balances on Schedules K-1 in taxable years after 2020 to the extent the incorrect information is attributable solely to the incorrect information reported as the beginning capital account balance on the 2020 Schedule K-1 for which relief under this notice is available. The penalty relief provided in this notice is in addition to the reasonable cause exception to penalties for failing to properly report the partners' beginning capital account balances, as described in section 2 of this notice.

A partnership that fails to timely file a 2020 Form 1065, Form 8865, and Schedules K-1 is not eligible for the relief provided by this notice. A partnership that fails to include a partner's beginning capital account balance on the Schedule K-1 is also not eligible for relief. This notice does not relieve a partner of its obligation to determine the adjusted basis of its interest in the partnership for purposes of determining its tax liability or that of any other person as prescribed in section 705 of the Code and § 1.705-1(a)(1) of the Income Tax Regulations.

4. RELIEF FROM PENALTIES UNDER SECTION 6662

The IRS will waive any accuracy-related penalty under section 6662 for any taxable year with respect to any portion of an imputed underpayment that is attributable to an adjustment to a partner's beginning capital account balance reported by the partnership for the 2020 taxable year to the extent the adjustment arises from the inclusion of incorrect information for which the partnership qualifies for relief under section 3 of this notice. This notice does not prevent the IRS from imposing an accuracy-related penalty under section 6662 for any portion of an imputed underpayment related to capital account reporting by the partnership that is not described in the previous sentence.

The Treasury Department and the IRS understand that many partnerships and other persons have maintained partner tax capital accounts according to the Transactional Instructions for Form 1065 (2018), page 30, Item L. Partner's Capital Account Analysis, provides for reporting "tax basis capital," presumably to catch "negative basis" situations:[501]

> If a partnership reports other than tax basis capital accounts to its partners on Schedule K-1 in Item L (that is, GAAP, 704(b) book, or other), and tax basis capital, if reported on any partner's Schedule K-1 at the beginning or end of the tax year would be negative, the partnership must report on line 20 of Schedule K-1, using code AH, such partner's beginning and ending shares of tax basis capital. This is in addition to the required reporting in Item L of Schedule K-1.
>
> For these purposes, the term "tax basis capital" means (i) the amount of cash plus the tax basis of property contributed to a partnership by a partner minus the amount of cash plus the tax basis of property distributed to a partner by the partnership net of any liabilities assumed or taken subject to in connection with such contribution or distribution, plus (ii) the partner's cumulative share of partnership taxable income and tax-exempt income, minus (iii) the partner's cumulative share of taxable loss and nondeductible, noncapital expenditures.

[501] For a description of how a "negative basis" situation arises, see fn. 6590 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

Notice 2019-20 provides some relief when providing the above information late for 2018 returns.[502] Notice 2019-66 provides:

> This notice provides that partnerships and other persons required to furnish and file Form 1065, Schedule K-1 or Form 8865, Schedule K-1, will not be required to report partner capital accounts in Item L of the 2019 Form 1065, Schedule K-1, or in Item F of the 2019 Form 8865, Schedule K-1, using the tax basis method for 2019.
>
> Instead, partnerships and other persons must report partner capital accounts for 2019 consistent with the reporting requirements for the 2018 Forms 1065, Schedule K-1, or 8865, Schedule K-1, as applicable. This means that partnerships and other persons may continue to report partner capital accounts on Forms 1065, Schedule K-1, Item L, or 8865, Schedule K-1, Item F, using any method available in 2018 (tax basis, Section 704(b), GAAP, or any other method) for 2019. These partnerships and other persons must include a statement identifying the method upon which a partner's capital account is reported. The final instructions for the 2019 Forms 1065, Schedule K-1, Item L and 8865, Schedule K-1, Item F, are expected to include additional details on how such reporting should be done.
>
> For 2019 partnership taxable years, partner "tax basis capital" must be calculated as provided in the 2018 Form 1065 and Schedule K-1 instructions. Beginning with the 2018

---

[502] Under "Penalty Relief," the Notice provides:

> The IRS will waive penalties under section 6722 for furnishing a partner a Schedule K-1 and section 6698 for filing a Schedule K-1 with a partnership return that fails to report negative tax basis capital account information if both the following conditions are met:
>
> 1. The partner Schedules K-1 are timely filed, including extensions, with the IRS and furnished to the partners and contain all other required information.
> 2. The partnership files with the IRS no later than 180 days after the six-month extended due date for the partnership's Form 1065 or, for a calendar year partnership, no later than March 15, 2020, a schedule setting forth, for each partner for whom the partnership is required to furnish negative tax basis capital account information, the partner's name, address, taxpayer identification number, and the amount of the partner's tax basis capital account at the beginning and end of the tax year at issue in accordance with instructions and additional guidance posted by the IRS on IRS.gov. Whether or not a partnership files a Form 7004, Application for Automatic Extension of Time To File Certain Business Income Tax, Information, and Other Returns, it can use the six-month extended due date in calculating the due date for filing the required schedule described in this paragraph. The schedule should be sent to the following address:
>   1973 North Rulon White Blvd.
>   Ogden, UT 84404-7843
>   MS 4700
>   Attn: Ogden PTE
>
> This penalty relief applies only for a partnership's taxable year beginning after December 31, 2017, but before January 1, 2019. To receive a waiver of the penalty, a partnership is not required to furnish amended Schedules K-1 to its partners or to file an administrative adjustment request under section 6227, and partnerships should not delay issuing partner Schedules K-1 on account of this Notice. The timely furnishing, including extensions, of Schedules K-1 to partners is a requirement to be eligible for relief under this Notice. The IRS will post instructions and additional information about the relief provided by this Notice in the coming weeks on IRS.gov, where forms, instructions, and other tax assistance are available.
>
> The penalty relief under this Notice will allow additional time for partnerships to provide the negative tax basis capital account information with respect to the partnerships' taxable years beginning after December 31, 2017, but before January 1, 2019.

partnership taxable year, if a partner's tax basis capital was negative at the beginning or end of a partnership's taxable year, a partnership or other person is required to report on line 20 of a partner's Schedule K-1, using Code AH, such partner's beginning and ending tax basis capital. Partnerships and other persons who follow this notice and report partner capital accounts for 2019 in Item L of the Form 1065, Schedule K-1, or in Item F of the Form 8865, Schedule K-1, by using a method other than the tax basis method must continue to comply with the requirement in the 2018 forms and instructions with respect to negative tax basis capital accounts.

The IRS website for Form 1065 Frequently Asked Questions (FAQs), "Negative Tax Basis Capital Account Reporting Requirements," provides guidance on the calculation of a partner's tax basis capital account in FAQ 2, and, for clarity, the definition of tax basis capital includes (A)(v) and (B)(vii) of FAQ 2. Additionally, in lieu of following the definition of tax basis capital in FAQ 2, partnerships and other persons may instead use the partner outside basis safe harbor approach referenced in FAQ 6. If a partnership or other person uses the safe harbor approach, the partnership or other person must attach a statement to the partner's Schedule K-1 with the information described in (2)(d)(iii) of FAQ 8. Other than the information described in (2)(d)(iii) of FAQ 8, the remainder of FAQ 8 is inapplicable for 2019, including the penalty relief and extension of time to file described therein, which applied only for 2018. The FAQs are found at: https://www.irs.gov/businesses/partnerships/form-1065-frequently-asked-questions. In preparation for filing partnership tax returns for the 2020 taxable year, further guidance will be published that provides, and requests comments on, the definition of partner tax basis capital.

Form 1065 Frequently Asked Questions (last updated 12/11/2019) answers the following questions:

1. What is a partner's tax basis capital account?

2. How do partnerships calculate a partner's tax basis capital account?

3. How can a partner's tax basis capital account be negative when the tax basis of its interest in the partnership (outside basis) is zero or positive?

4. Do revaluations of partnership property affect a partner's tax basis capital account?

5. What is the tax capital account of a partner who acquired its partnership interest by transfer from another partner?

6. Is there a safe harbor approach for determining whether a partnership has an obligation to report negative tax basis capital account information?

7. Must partnerships that satisfy all four of the conditions provided in question 4 on Schedule B to the Form 1065 comply with the requirement to report negative tax basis capital account information?

8. What is the procedure for complying with the requirement to report negative tax basis capital account information for tax year 2018?

Notice 2019-66 provides instructions for 2019 tax reporting on:

- Reporting partners' shares of net unrecognized Code § 704(c) gain or loss. See parts II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value and II.P.1.a.i.(b) Special Rules for Allocations of Income in Securities Partnerships.

- Reporting Code § 465 at-risk activity. See part II.G.4.j At Risk Rules (Including Some Related Discussion of Code § 752 Allocation of Liabilities).

2022 Form 1065 Instructions, "Specific Instructions (Schedule K-1 Only)," provides in "How To Complete Schedule K-1":

> **Item L. Partner's Capital Account Analysis**
>
> You aren't required to complete item L if the answer to question 4 of Schedule B is "Yes." If you are required to complete this item, also see the instructions for Schedule M-2, later.
>
> **Tax basis method**. Figure each partner's capital account for the partnership's tax year using the transactional approach, discussed below, for the tax basis method.
>
> ***How to report partnership events or transactions***. If you are uncertain how to report a partnership event or transaction, you should account for the event or transaction in a manner generally consistent with figuring the partner's adjusted tax basis in its partnership interest (without regard to partnership liabilities), taking into account the rules and principles of sections 705, 722, 733, and 742 and by reporting the amount on the line for other increase (decrease). The partner's ending capital account as reported using the tax basis method in item L might not equal the partner's adjusted tax basis in its partnership interest. Generally, this is because a partner's adjusted tax basis in its partnership interest includes the partner's share of partnership liabilities, as well as partner-specific adjustments. Each partner is responsible for maintaining a record of the adjusted tax basis in its partnership interest.
>
> ***Beginning capital account***. Enter the partner's ending capital account as determined for last year on the line for beginning capital account. If a partner joined the partnership through a contribution to the partnership this year, enter zero as the partner's beginning capital account.
>
> ***Capital contributed during the year***. On the line for capital contributed during the year, enter the amount of cash plus the adjusted tax basis of all property contributed by the partner to the partnership during the year. The amount you enter on this line should be reduced by any liabilities assumed by the partnership in connection with, or liabilities to which the property is subject immediately before, the contribution. This amount might be negative.
>
> ***Current year net income (loss)***. On the line for current year net income (loss), enter the partner's distributive share of partnership income and gain (including tax-exempt income) as figured for tax purposes for the year, minus the partner's distributive share of

partnership loss and deductions (including nondeductible, noncapital expenditures) as figured for tax purposes for the year.

Other increase (decrease). On the line for other increase (decrease), enter the sum of all other increases or decreases that affected the partner's capital account for tax purposes during the year and attach a statement explaining each adjustment. For example, if a new partner acquired its interest in the partnership from another partner in a purchase, exchange, gift, or inheritance, enter an amount for the transferee under other increase that is equal to the transferor partner's ending capital account with respect to the interest transferred immediately before the transfer figured using the tax basis method. Other examples of increases include the following.

- The partner's distributive share of the excess of the tax deductions for depletion (other than oil and gas depletion) over the adjusted tax basis of the property subject to depletion.

- The partner's share of any increase to the adjusted tax basis of partnership property under section 734(b).

If a transferor partner disposed of its interest in the partnership by sale, exchange, or gift, or as the result of death, enter the transferor partner's ending capital account with respect to the interest transferred immediately before the transfer figured using the tax basis method. Other examples of decreases include the following.

- The partner's distributive share of tax deductions for depletion of any partnership oil and gas property, but not exceeding the partner's share of the adjusted tax basis of that property.

- The partner's share of any decrease to the adjusted tax basis of partnership property under section 734(b).

Note. Section 743(b) basis adjustments are not taken into account in calculating a partner's capital account under the tax basis method.

Withdrawals and distributions. On the line for withdrawals and distributions, enter the amount of cash plus the adjusted tax basis of all property distributed by the partnership to the partner during the year. The amount you enter on this line should be reduced by any liabilities assumed by the partner in connection with, or liabilities to which the property is subject immediately before, the distribution. This amount might be negative.

Ending capital account. The sum of the amounts shown on the lines in item L above the line for ending capital account must equal the amount reported on the line for ending capital account. A partner's ending capital account determined under the tax basis method may be negative if the sum of a partner's losses and distributions exceeds the sum of the partner's contributions and share of income.

Publicly traded partnerships (PTPs). In the case of a sale or exchange of an interest in a PTP, you may determine a transferee partner's beginning capital account by adjusting the partner's beginning capital account to reflect the transferee partner's purchase price of the interest rather than entering the transferor partner's ending capital account. In making the adjustments, you may use information required to be reported to you under Regulations section 1.6031(c)-1T, and publicly available trading price information.

IRS Fact Sheet 2023-20, "IRS issues a frequently asked question for pass-through entities to report negative amounts to the IRS on Part II of Schedules K-2 and K-3," as updated 9/6/2023, explains:

> This fact sheet is about a frequently asked question that addresses how pass-through entities electronically file and report negative amounts to the IRS on Part II of Schedules K-2 and K-3.
>
> This frequently asked question (FAQ) is being issued to provide general information to taxpayers and tax professionals as expeditiously as possible. Accordingly, this FAQ may not address any particular taxpayer's specific facts and circumstances, and it may be updated or modified upon further review. Because this FAQ has not been published in the Internal Revenue Bulletin, it will not be relied on or used by the IRS to resolve a case. Similarly, if an FAQ turns out to be an inaccurate statement of the law as applied to a particular taxpayer's case, the law will control the taxpayer's tax liability. Nonetheless, a taxpayer who reasonably and in good faith relies on this FAQ will not be subject to a penalty that provides a reasonable cause standard for relief, including a negligence penalty or other accuracy-related penalty, to the extent that reliance results in an underpayment of tax. Any later updates or modifications to this FAQ will be dated to enable taxpayers to confirm the date on which any changes to the FAQ were made. Additionally, prior versions of this FAQ will be maintained on IRS.gov to ensure that taxpayers, who may have relied on a prior version, can locate that version if they later need to do so.
>
> More information about reliance is available. This FAQ was announced in IR 2023-162.
>
> **Frequently asked question for pass-through entities to report negative amounts to the IRS on Part II of Schedules K-2 and K-3**
>
> **Q. For the 2022 tax year, a pass-through entity receives information (for example, a Schedule K-3 from a lower-tier pass-through entity) that certain gross income amounts to be reported on the Schedules K-2 and K-3 are negative. However, the current schema for electronic filing of the Schedules K-2 and K-3 does not permit negative values for certain line items in Part II, Section 1 of Schedules K-2 and K-3. How should these negative amounts be reported on Schedules K-2 and K-3 to the IRS and to the partners or members? (added September 5, 2023)**
>
> A. A pass-through entity electronically filing the Schedules K-2 and K-3 for the 2022 tax year should enter zero on the line items in Schedules K-2 and K-3, Part II, Section 1 for which the schema does not permit negative values. A pass-through entity must attach a General Dependency (XML) schema to the Schedule K-2 identifying the line items and the negative values for which the pass-through entity reported zero on Part II, Section 1. Additionally, a pass-through entity should attach a list of the impacted line items and the negative numbers, partner by partner. A pass-through entity should report to its partners or members any changes to the amounts reported on the original Schedules K-3 issued to the partners or members. The IRS has not opined on whether it is legally appropriate to use negative values.

When a capital account differs from tax basis, be careful to comply with part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.[503] Part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value deals with differences between value and capital accounts, not only for contributions of property but also when partners enter or exit when the value of the partnership's property differs from its basis.[504]

Furthermore, if the specific capital account rules "fail to provide guidance on how adjustments to the capital accounts of the partners should be made to reflect particular adjustments to partnership capital on the books of the partnership":[505]

> such capital accounts will not be considered to be determined and maintained in accordance with those rules unless such capital account adjustments are made in a manner that
>
> (1) maintains equality between the aggregate governing capital accounts of the partners and the amount of partnership capital reflected on the partnership's balance sheet, as computed for book purposes,
>
> (2) is consistent with the underlying economic arrangement of the partners, and
>
> (3) is based, wherever practicable, on Federal tax accounting principles.

A clause referring to the above rule is especially recommended when using target allocations rather than traditional allocations.

Each partner has a unitary capital account (and unitary basis).[506]

When a partner enters or exits or makes a non-pro-rata contribution or takes a non-pro-rata distribution, often the partnership's property is revalued and capital accounts adjusted (without

[509] See part II.C.3.a Basic Consequences of Changes in Liability Allocations.

distributive share of income is determined "in accordance with the partner's interest in the partnership (determined by taking into account all facts and circumstances)."[20]

[18] *Gershkowitz v. Commissioner*, 88 T.C. 984, 1006-1008 (1987).

[19] Sec. 704(a).

[20] Sec. 704(b).

Echo's operating agreement allocates distributive shares of income to its partners according to a formula based on the partner's capital accounts. If those allocations have substantial economic effect, the income from the discharge of the indebtedness is allocated in the manner provided by the operating agreement.

To have substantial economic effect, allocations must be consistent with the underlying economic arrangement of the partners.[21] The allocations made by Echo's operating agreement (based on capital accounts) do not have substantial economic effect. In all other respects, the partnership and its partners shared items 30-30-30-10, instead of following the formula provided by the operating agreement. This course of conduct makes clear that Echo did not adhere to the allocations in the operating agreement and instead allocated losses on the basis of the partners' 30%, 30%, 30%, and 10% ownership interests. The partners also did not follow the operating agreement's provisions for contributing capital or maintaining capital accounts.

[21] Sec. 1.704-1(b)(2)(ii)(a), Income Tax Regs.

Because the allocations provided by the operating agreement do not have substantial economic effect, the partners' distributive shares of income are determined according to their interests in the partnership.[22] A partner's interest in the partnership depends on the facts and circumstances.[23] In these cases, during all four years Echo operated, it allocated losses according to the stated 30%, 30%, 30%, and 10% ownership interests. Allocation of the income in 2012 should follow the allocation of losses for each other year of the partnership's existence. Mr. Hohl and Mr. Blake should each have included a 30% share of the income from the discharge of indebtedness in their income for 2012.

[22] Sec. 704(b).

[23] Sec. 704(b); sec. 1.704-1(b)(3)(i), Income Tax Regs.

The Hohls and the Blakes argue that if Echo recognized income from the discharge of indebtedness all of that income should be allocated to Mr. Rodriguez. They argue that the loans were nonrecourse loans and therefore the lending partner bears the economic risk of loss so it is treated as a recourse liability allocated to that partner. They conclude:

> Thus, a nonrecourse loan from a partner is, in effect, treated as a recourse liability allocated solely to the lending partner. … [*See* sec. 1.704-2(b)(4), Income Tax Regs.] Its allocation is covered by the nonrecourse deduction regulations. See Treas. Reg. sec. 1.704-2(i). In other words, a partner cannot make a nonrecourse loan to a partnership that gives other partners basis. Treas. Reg. sec. 1.752-2(c).

Their argument is incorrect for several reasons.

The partners chose to treat the liability as a recourse liability and to allocate it according to the partners' 30%, 30%, 30%, and 10% interests in the partnership. Additionally, the partners claimed, and took the tax benefit from, the additional basis arising from their shares of the loans. They were not required to structure their economic relationship that way but chose to reflect their economic arrangement as a recourse loan shared by all partners.

Further, the section 704 regulations petitioners cite govern allocations attributable to nonrecourse liabilities, not the allocation of the liabilities themselves, which are governed by the regulations under section 752. Under the section 752 regulations, a partnership liability is recourse to the extent a partner bears the economic risk of loss and nonrecourse to the extent no partner bears the economic risk of loss.[24] When the lender is also a partner, that partner bears the economic risk of loss to the extent that the partner makes a nonrecourse loan to the partnership and no other partner bears the economic risk of loss.[25] The regulations contemplate a partner other than the lending partner bearing the economic risk of loss for, and receiving the corresponding allocation of, a loan made by another partner.

[24] Sec. 1.752-1(a)(1) and (2), Income Tax Regs.

[25] Sec. 1.752-2(c)(1), Income Tax Regs.

Finally, the item at issue is income, not a liability. Echo failed to include the income from the discharge of a debt, specifically the loans from Mr. Rodriguez. Once the loans were discharged, they ceased to be a partnership liability and instead became partnership income.

Banoff, Lipton and Cohen, "Partnership Agreement Allocations Don't Require Economic Effect: That's the *Hohl* Truth," *Journal of Taxation* (6/2021), comment:

Rather than analyzing the operating agreement under the entirety of the test in Reg. 1.704-1 and 1.704-2 to determine whether the allocations under the agreement had substantial economic effect, however, the opinion cites only to the first sentence of Reg. 1.704-1(b)(2)(ii)(a). The "fundamental principle" stated there is that the allocation "must be consistent with the underlying economic arrangement of the partners." The opinion jumps from that sentence to the conclusion that the agreement did not have substantial economic effect. To support this conclusion, the court states that the percentage interests of the partners were used to share items "[i]n all other respects" but that the allocations in the agreement were to follow a formula based on capital accounts (*i.e.*, an obtuse reference to the "targeted capital account" allocations in the operating agreement). The court also notes that Echo allocated losses on the basis of the percentage interests and that the court did not believe the partners followed the operating agreement's provisions for contributing capital or maintaining capital accounts.

Reg. 1.704-1(b)(2) is more nuanced than this analysis would indicate. The above-quoted first sentence of Reg. 1.704-1(b)(2)(ii)(a) is followed by an explanation that "the partner to whom the allocation is made must receive [the] economic benefit or bear [the] economic burden" associated with the allocation. Reg. 1.704-1(b)(2)(ii)(b) further provides that an allocation "will have economic effect if, and only if" the partnership agreement meets three requirements (with various special rules throughout Reg. 1.704-1(b)(2)). While "fundamental principles" are stated in Reg. 1.704-1(b)(2)(ii)(a), the use of specific requirements in Reg. 1.704-1(b)(2)(ii)(b) and the statement that the allocations "will have economic effect" where the requirements are met have been taken as the means by which the fundamental principles are satisfied. Further, it is possible for allocations to be deemed to have economic effect if there is "economic effect equivalence" as set forth in Reg. 1.704-1(b)(2)(ii)(i) (i.e., as of the end of each partnership taxable year a liquidation of the partnership at the end of that year or any future year would produce the same economic results to the partners as would occur if the economic effect requirements had been met, regardless of the economic performance of the partnership).

Should one take the Hohl opinion as indicating that there are some scenarios where keeping capital accounts under the Section 704(b) regulations, having a qualified income offset or deficit restoration obligation, and liquidating in accordance with capital accounts (and compliance with the other rules in Reg. 1.704-1(b) and 1.704-2) are insufficient to ensure allocations set forth in the agreement will be respected (assuming the allocations have substantiality, which this article does not discuss because the opinion does not provide adequate information to make that analysis)? Was the downfall of these taxpayers the messy tax return reporting? Or was it that they failed to comply with their agreement, meaning the failure was in the practice (rather than in the terms of the agreement)? Alternatively, are the "fundamental principles" independent requirements, where failure to meet those requirements (but compliance with the specific requirements in the regulations) could lead to a revision to the parties' allocations? Or is this opinion effectively holding that targeted capital account allocations do not have economic effect equivalence?

Reg. 1.704-1(b)(2) does not tell the entire story, especially where debt is involved. Echo was an LLC, and it is unclear whether for tax purposes the liability owed to Rodriguez was being treated as a recourse liability or a nonrecourse liability. In 2009, the liability was apparently treated for tax purposes as a recourse liability (with each partner being liable for a share of the liability) and allocated in accordance with the partners' percentages, but in 2010 and 2011, it was apparently treated as a nonrecourse liability and allocated solely to Rodriguez, the partner that had the economic risk of loss. Was it this inconsistent reporting that sunk Hohl and the other service-providing partner? If Echo and the partners had consistently reported the liability as a recourse liability, would the allocations of partnership loss in proportion to capital accounts (which were in proportion to the partners' percentages) have had economic effect (or, at least, economic effect equivalence)? Certainly, if they had properly and consistently reported the liability as a partner nonrecourse debt under Reg. 1.704-2, all of the losses would have been allocated to Rodriguez (and all of the cancellation of debt income would have been allocated to him, too).

Hohl and the other service-providing partner would have their cake (*i.e.*, the prior years' allocations of losses, for which the statute of limitations had run) and eat it too (i.e., shift the cancellation of debt income to Rodriguez). They argued that the liability should have always been allocated to Rodriguez and, so, the income from the liability should also be allocated to Rodriguez. However, as the court pointed out, the rules applicable to allocation of the liability are not the same as the rules applicable to allocation of the income among the partners arising from the cancellation of the liability. See, *e.g.*, Rev. Rul. 99-43, 1999-2 CB 506.

> We can't help but observe that Rodriguez does not appear to have been treated very well by his co-venturers. The venture in hindsight appears to be an economic failure. Then, after the other partners claimed 90% of the losses (all being funded by Rodriguez), their litigating position in the Tax Court was to sock Rodriguez with 100% of the cancellation of indebtedness (COD) income that was attributable to the nonpayment of his loans. The opinion does not delve into this attempted, uneven treatment of the money partner.
>
> This brings us to the point of wondering whether the court was ignoring the rest of Reg. 1.704-1 (other than the one cited sentence) from the result-oriented view that the partners should be held to an allocation of Echo's income that matched up to the allocation of losses in prior years. With the inability to reconcile the treatment of the debt throughout Echo's term to the manner in which allocations of losses were made, perhaps the court decided (without so saying in the opinion) that the best way to get the income allocated to match up was by first finding the agreement lacked substantial economic effect and then allocating the income in accordance with the partners' interests in the partnership (which, in Echo, was fairly easy to determine since everything (other than the liability allocation) had been done in accordance with the partners' percentages).
>
> In your editors' view, Hohl was rightly designated a memorandum opinion by the Tax Court. Memorandum opinions are not binding precedent upon the Tax Court (or the IRS, or taxpayers, or anyone else). See Banoff, "The True Value of Tax Court Memorandum Opinions," 58 *Tax Notes* 1551 (1993). Hohl is extremely fact-driven, and it shows that messy facts make messy law. Absent further analysis and discussion by the court, a number of questions pertaining to the partnership's allocations remain unanswered….
>
> There are very few cases with published opinions that apply the substantial economic effect test (and, to the knowledge of your editors, none that address targeted capital account allocations). *Hohl* applies that test but only superficially and to messy facts. Your authors hope that this opinion does not mean that the technical requirements of Reg. 1.704-1(b)(2)(ii) can be read out of the regulation where a judge feels that the agreement does not match up with the judge's understanding of the parties' economic deal. If the parties properly maintain capital accounts (and perhaps these did not) and observe the requirements of the regulations, the allocations in the partnership agreement should be respected. That's our *Hohl* story, and we're sticking to it.

The Tax Court's Syllabus of *Clark Raymond & Co., PLLC v. Commissioner*, T.C. Memo. 2022-105, summarizes:

> CRC, an accounting firm, is a partnership subject to the TEFRA provisions of I.R.C. §§ 6221–6234. Three single-member entities - C, N, and T - were partners of CRC in 2013 and negotiated a buyout of C in anticipation of the retirement of C's principal owner, which they memorialized in a restated partnership agreement. The partnership agreement also included provisions governing allocations of income and distributions (both liquidating and non-liquidating) to the partners, and it included a qualified income offset (QIO) provision. The partnership agreement anticipated that a partner could receive a distribution of "clients" from the partnership and provided a method for valuing such a distribution.

Shortly after executing the restated partnership agreement, N and T withdrew from CRC, and certain clients of CRC stopped engaging CRC and instead retained N's and T's new partnership (NT PLLC). C, as tax matters partner for CRC, reported on CRC's 2013 Form 1065, "U.S. Return of Partnership Income", that N and T received distributions from CRC in amounts equal to the value of the clients (as determined under the restated partnership agreement) that followed N and T to NT PLLC. C also decreased N's and T's capital accounts by the value of the reported distributions, and thereby reduced N's and T's capital accounts below zero. To restore N's and T's capital accounts to zero, C allocated (for tax purposes) all of CRC's ordinary income for 2013 to N and T, pursuant to a QIO provision in the partnership agreement, and so reported on CRC's tax return. As a result, C allocated to itself no taxable income from CRC.

N and T filed Forms 8082, "Notice of Inconsistent Treatment or Administrative Adjustment Request (AAR)", contesting CRC's 2013 income allocations, and R subsequently audited CRC's 2013 return. R issued a Letter 1830-F, "Notice of Final Partnership Administrative Adjustment" (FPAA), disregarding CRC's reported "client distributions" and redetermining allocations of ordinary income to N and T. Specifically, R determined that CRC's "client distributions" had not been substantiated and that CRC's corresponding allocations of income lacked substantial economic effect.

C, as TMP of CRC, timely filed a Petition in this Court contesting R's determinations in the FPAA. The parties filed a joint motion to submit this case pursuant to Rule 122, which we granted.

Held: CRC distributed client-based intangible assets to N and T when they withdrew from CRC, and the value of the assets so distributed are properly valued under the terms of CRC's partnership agreement.

Held, further, CRC failed to maintain capital accounts in accordance with Treas. Reg. § 1.704-1(b)(2)(iv); therefore, CRC's special allocations of income to N and T lacked substantial economic effect and must be reallocated in accordance with the partners' interests in the partnership under I.R.C. § 704(b) and Treas. Reg. § 1.704-1(b)(3).

Held, further, because N and T had negative capital accounts at the end of the taxable year and CRC's partnership agreement included a QIO, ordinary income must be allocated first to N and T in an amount necessary to bring each partner's capital account up to zero.

Held, further, R's determinations disregarding CRC's "client distributions" and redetermining allocations of ordinary income are not sustained.

Some key lessons:

- The court respected the partnership's valuation method for client lists, which was based on gross revenue invoiced over the prior 12 months, because the partners' interests were adverse and negotiations had been at arm's length.

- Because the allocations of book gain on the distribution of these client-based intangible assets did not have substantial economic effect, the court had to evaluate the partners' interests in the partnership under Reg. § 1.704-1(b)(1)(i).

The court described the allocation systems in footnotes 24 and 25:

> An FMG system calculates wage compensation, profit or loss allocations, and cash distributions to partners by applying metrics and ratios to determine the revenue attributable to the accountant that brought the client to the firm (the finder), the accountant who managed the client and the engagement (the minder), and the accountant who worked the billable hours on the client's engagement (the grinder).
>
> An AAV system computes the amount payable to a departing partner for the value of goodwill that he leaves behind at the firm. A partner's AAV "balance" at departure is the amount payable to the departing partner for his portion of the firm's goodwill. When implementing an AAV system, the partners will agree upon a value of the firm's total goodwill, using the prior 12 months' revenue multiplied by an appropriate factor, and allocate a portion of the total to each partner's AAV balance. A partner's AAV balance may increase or decrease according to the formula employed by the CPA firm to compute the individual partner's contribution to the CPA firm's growth (and presumably, to its goodwill).

Under the heading, "Partnership intangible assets," the court explained:

> Business entities may own intangible assets. *See, e.g., Tomlinson v. Commissioner*, 58 T.C. 570, 580 (1972) ("We have long recognized that these intangibles [including customer lists] are capital assets"), *aff'd*, 507 F.2d 723 (9th Cir. 1974) ;*Topeka State J., Inc. v. Commissioner*, 34 T.C. 205, 215, 221 (1960) ("It is well established that [subscription lists] are an intangible asset of a newspaper [company]").[47] Intangible assets are generally included in the valuation of a partnership (and partnership interest). *See, e.g., Watson v. Commissioner*, 35 T.C. 203, 208, 214 (1960) (holding that purchase price for partnership included payment for tangible assets and goodwill); *Tolmach v. Commissioner*, T.C. Memo 1991-538.
>
> > [47] The Code and the Treasury Regulations also anticipate that partnerships will own intangible assets by providing an amortization deduction for the capitalized costs of intangibles owned by the partnership (for federal income tax purposes), *see generally* § 197, and requiring the inclusion of intangible assets in the valuation of a transferred business interest (for federal gift tax purposes), *see generally* Treas. Reg. §§ 1.197-2, 25.2512-3.
>
> A "client-based intangible" asset (such as a customer list or "book of business"[48]) is one example of an intangible asset, and it may be capable of valuation, distribution, and sale to third parties. See, e.g., Newark Morning Ledger Co. v. United States, 507 U.S. 546, 570 [71 AFTR 2d 93-1380] (1993) (holding that a corporation proved that a customer list of "'paid [*30] subscribers' constitute[d] an intangible asset with an ascertainable value and a limited useful life, the duration of which [could] be ascertained with reasonable accuracy" for depreciation purposes); JHK Enters., Inc. v. Commissioner, T.C. Memo. 2003-79, 85 T.C.M. (CCH) 1032, 1032 ("Among the assets received by [the partner] in the liquidating distribution were client files, a client list, going concern value (goodwill), and equipment"); *Holden Fuel Oil Co. v. Commissioner*, T.C. Memo. 1972-45, 31 T.C.M. (CCH) 184, 187–89 (holding that where the taxpayer purchased customer lists from another company it was entitled to an amortization deduction for a portion of the amount paid), *aff'd*, 479 F.2d 613 (6th Cir. 1973).

[48] A "book of business" generally has value. *See, e.g., Mitchell v. Garrison Protective Servs., Inc.*, 819 F.3d 636, 641 (2d Cir. 2016) (affirming the district court's valuation of a book of business).

Under the heading, "Partnership intangible assets," the court explained:

> The basic capital accounting rules in Treasury Regulation section 1.704-1(b)(2)(iv)(b) require that partners' capital accounts be decreased by the fair market values of property distributed to them by the partnership. Treas. Reg. § 1.704-1(b)(2)(iv)(e)(1). If property is in fact distributed, then these rules must be applied even if the partners and the partnership overlook the distribution or attempt to impose another characterization on it. *See, e.g., Seay v. Commissioner*, T.C. Memo. 1992-254, 63 T.C.M. (CCH) 2911, 2913 (holding that the taxpayer received a distribution of partnership assets when he withdrew cash from the partnership, despite claiming that his withdrawals were loans from the partnership). To satisfy this requirement, the capital accounts of the partners first must be adjusted to reflect how any unrealized[52] income, gain, loss, and deduction inherent in the property (not already reflected in the capital accounts) would be allocated among the partners if there were a taxable disposition of the property for its fair market value (colloquially referred to as a "book-up"). Treas. Reg. § 1.704-1(b)(2)(iv)*(e)(1)*.
>
> [52] Gain is defined as the excess of the amount realized from a sale or other disposition of property over the taxpayer's adjusted basis in the property. § 1001(a). An amount realized is the sum of money or fair market value of property received from the sale or other disposition of the property. § 1001(b). "Realization" of these amounts typically occurs when the transferor is in receipt of cash or property, but realization may also occur when the last step is taken by the transferor by which he obtains the fruition of the economic gain which has already accrued to him. *Helvering v. Horst*, 311 U.S. 112, 115 (1940). A taxpayer's basis in an asset is generally its cost of acquiring the property. § 1012. The basis of property contributed to a partnership by a partner is the adjusted basis of the property to the contributing partner at the time of the contribution (adjusted for any gain recognized by the contributing partner). § 723. In the case of intangible assets, basis includes amounts that are required to be capitalized, such as amounts paid to create or enhance an intangible asset. Treas. Reg. § 1.263(a)-4(b)(1), (g)(1). "Unrealized gain", therefore, refers to the excess of the fair market value of property over its basis (i.e., its appreciation in value) at a point before a realization event (before it is disposed of). *See, e.g.*, Treas. Reg. § 1.704-1(b)(5) (example 14).
>
> The fair market value assigned to property contributed to, distributed by, or otherwise revalued by a partnership will be regarded as correct, provided that (1) the value is reasonably agreed to among the partners in arm's-length negotiations and (2) the partners have sufficiently adverse interests. Treas. Reg. § 1.704-1(b)(2)(iv)*(h)(1)*. The determination of fair market value is a question of fact. *S. Tulsa Pathology Lab'y, Inc. v. Commissioner*, 118 T.C. 84, 101 (2002).

The court then explained that what the partners described as goodwill was what the court described as client-based intangibles:

> Taking into consideration the terminology used in the FPAA (*i.e.*, "client distribution"), it is clear to us that, although both parties intermittently refer to a contribution to and distribution of general "goodwill" from CRC, at issue in this case is a distribution of CRC's clients or a client list in particular, both of which we refer to as the "client-based

intangibles”. Client lists and other client-based intangibles have value. *See, e.g., Newark Morning Ledger Co.*, 507 U.S. at 570; *Holden Fuel Oil Co.*, 31 T.C.M. (CCH) at 187-89. This value can exist even where the client is not contractually bound to keep bringing his business. See *Aitken v. Commissioner*, 35 T.C. 227, 230-31 (1960) (holding that insurance contract “expirations”, which did not guarantee renewal of an insurance contract, but contained client and policy information and were analogous to customer lists, goodwill, or just intangibles in the nature of goodwill, constituted valuable capital assets capable of transfer); see also *Holden*, 31 T.C.M. at 184-85, 187 (“[Although] customers [on a customer list] were not obligated to purchase fuel oil from [the taxpayer]...[i]n acquiring the list [the taxpayer] was afforded the opportunity of contacting persons who were known to be using fuel oil to heat their homes and who were in the need of a new supplier; clearly providing [the taxpayer] with a valuable asset.”). Business entities, such as limited liability companies, may own and distribute such intangible assets. *See, e.g., JHK Enters., Inc.*, 8T.C.M. (CCH) at 1032. CRC could therefore hold and distribute such assets, and although the evidence does not support that Newman PLLC and Town PS either contributed client-based intangibles to CRC or transferred client-based intangibles in exchange for their AAV account, the evidence does support CRC’s ownership of client-based intangible assets capable of valuation and distribution.

CRC’s dealings demonstrate that it and its partners understood that a partner’s “book of business” consisting of current clients would be valued upon entry of a partner and charged for upon withdrawal....

Consequently, we hold that CRC’s method for valuing client-based intangibles upon the withdrawal of Newman PLLC and Town PS comports with the fair market value definition of Treasury Regulation section 1.704-1(b)(2)(iv)*(h)(1)*. In the absence of any competing valuation presented by the Commissioner, or any critique of this valuation, we accept it as correct….

Obviously, this was not a textbook instance of a partnership distribution, labeled as such by agreement of the parties when the partner withdrew. Rather, CRC initially contended that the taking of property (*i.e.*, the clients) was wrongful and was a breach of the 2013 LLC Agreement. We can imagine a circumstance in which a partner’s taking of property from a partnership was outright robbery and in such; a circumstance it might be treated for tax purposes not as a distribution but as a theft, perhaps deductible on the partnership return as a theft loss under section 165(e) and includible as ordinary income to the partner. See *James v. United States*, 366 U.S. 213, 219 (1961). But here the partners and the partnership had a disagreement about the entitlement to the property, and before the end of the tax year, they agreed to a settlement of their dispute under which the partners would be entitled to keep the property they had taken. We conclude we should accept their agreed-upon resolution of the dispute and should apply the provisions of the Code pertinent to that characterization. Neither party to this case argues that it should instead be treated as a theft. The ultimately agreed-upon transfer of the client-based intangibles is best understood as a distribution.

The Commissioner argues, in effect, that the transfer of the client-based intangibles should be ignored as non-factual, because (he says) the intangibles did not exist and were not transferred. For the reasons stated above, we reject that approach. The Commissioner also presents an alternative argument:

> Having structured the economic deal that goodwill was not a partnership asset, petitioner is bound by the treatment the parties negotiated. A taxpayer, although free to structure his transaction as he chooses, "once having done so, he must accept the consequences of his choice, whether contemplated or not...and may not enjoy the benefit of some other route he might have chosen to follow but did not." *Comm'r v. National Alfalfa Dehydrating & Milling Co.*, 417 U.S. 134, 149 (1974) (citations omitted). To disavow the LLC Agreement's treatment of goodwill, petitioner must present strong proof that the LLC Agreement was wrong.

But the partners of CRC did not negotiate a deal that clients were not a value that could be brought into the firm and taken out of it. Rather, the partners took into account an entering partner's book of business in determining on what terms the partner would enter the partnership; and Section 5.1 of the 2013 LLC Agreement acknowledges that CRC "expended substantial time and funds in developing...the Company's clientele and their patronage"; Section 1.6 postulates a "goodwill value of the Company" (used for calculating AAV rights); and it expressly makes provision (in Section 9.3(b)) for "Clients [to be] Distributed under this Agreement" and (in Section 1.19) for the "Client Value" to be determined. When Newman PLLC and Town PS did withdraw, they took clients with them, and the parties executed an "Agreement Regarding Client File Transfer Procedure".

It is true that the 2013 LLC Agreement does not make express provision for goodwill to be contributed by a partner and included in his capital account, but that silence does not amount to an agreement that client-based intangibles do not exist and cannot be transferred. It is also true that CRC failed to reflect intangible values in partners' capital accounts (and that is part of the reason that we hold below that CRC's special allocation fails the tests for economic effect, *see* infra Part II.B); but a partnership's failure to reflect an asset on its books does not make the asset cease to exist. If a partnership fails to book its cash (to choose an extreme instance), a distribution of that unbooked cash is still a distribution. Treating the distribution of the client-based intangibles as a distribution does not (in the words of the Commissioner's brief quoted above) require "disavow[ing] the LLC Agreement's treatment of goodwill". Rather, it requires invoking and giving effect to the express terms of Section 9.3(b).

The court then determined that the allocations in the partnership agreement did not satisfy any of the tests under Reg. § 1.704-1(b)(2)(ii) that would deem them to have economic effect. First, citing Reg. § 1.704-1(b)(2)(ii)*(b)*, it held that the partnership agreement expressly precluding a deficit restoration obligation from applying caused special allocations not to satisfy the basic test for economic effect. The court described that test:

> The basic test for economic effect is set forth in Treasury Regulation section 1.704-1(b)(2)(ii)(b). The test provides, in general, that a special allocation has economic effect if it is made pursuant to a partnership agreement that contains provisions requiring: (1) the determination and maintenance of partners' capital accounts in accordance with the rules of Treasury Regulation section 1.704-1(b)(2)(iv); (2) upon liquidation of the partnership, the proceeds of liquidation be distributed in accordance with the partners positive' capital account balances; and (3) upon liquidation of the partnership, any partner with a deficit capital account balance is unconditionally obligated to restore the amount of the deficit balance to the partnership by the end of the taxable year (commonly referred to as a "deficit restoration obligation" or "DRO"). Treas. Reg. § 1.704-1(b)(2)(ii)(b). This test ensures that the economic benefits or burdens

corresponding to any given special allocation are borne by the partner receiving the allocation.

The partnership agreement was good, but the actual accounting was not:

The 2013 LLC Agreement does contain provisions that (1) require maintenance of capital accounts in accordance with Treasury Regulation section 1.704-1(b)(2)(iv), (2) require liquidation distributions in accordance with partners' positive capital account balances, (3) require reductions for reasonably expected allocations or distributions, and (4) implement a QIO. However, the special allocation of income cannot have economic effect because, as we explain below, CRC did not actually maintain the capital accounts of its partners in accordance with the 2013 LLC Agreement and Treasury Regulation section 1.704-1(b)(2)(iv) ("[A]n allocation of income, gain, loss, or deduction will not have economic effect...unless the capital accounts of the partners are *determined and maintained* throughout the full term of the partnership in accordance with the capital accounting rules" (emphasis added)).

The Commissioner asserts persuasively that CRC failed to maintain capital accounts in accordance with Treasury Regulation section 1.704-1(b)(2)(iv) because, before distributing those assets, CRC did not increase the partners' capital accounts by the value of the unrealized gain[55] inherent in the client-based intangible assets. *See* Treas. Reg. § 1.704-1(b)(2)(iv)(e)(1). In response, petitioner argues that the client-based intangibles did not have unrealized gain because the partners transferred their "goodwill" (at fair market value) to CRC in exchange for their AAV account balances, such that the value of that goodwill resided in the AAV account. Petitioner further argues that the partners' AAV accounts control the allocation of any taxable gain on the sale of the client-based intangibles and that, in effect, "[section] 704 and its regulations do not apply because [the section] 704 book-up only [*42] applies to capital accounts and not AAV accounts (which are deferred compensation liability accounts)."

[55] *See* supra note 52. With his assertion, the Commissioner necessarily assumes that a client-based intangible asset may indeed bear unrealized gain, and we therefore adopt his assumption.

As we have discussed, petitioner has not shown that the partners ever actually contributed "goodwill" or client-based intangibles to CRC[56] (or exchanged client-based intangibles for an AAV account), or, if such a contribution (or exchange) did occur, the value of the assets at that time. Neither does it cite any authority (controlling or otherwise) to support its position regarding the AAV accounts and the inapplicability of section 704(b), so we cannot accept its position. Indeed, AAV accounts (used here by CRC as a method of calculating deferred compensation payable to retiring partners) are not capital accounts, and we are unaware of any authority relieving CRC from its capital account maintenance responsibilities simply because it used such a mechanism. We must therefore examine whether the client-based intangible assets that Town PS and Newman PLLC received contained unrealized gain, and if so, whether CRC failed to increase the partners' capital accounts by such unrealized gain before the distribution to Newman PLLC and Town PS.

[56] As we have mentioned, Clark PLLC discounted the purchase price of Town PS's partnership interest for the "[a]greed upon value of John's book brought in". This discount by itself is insufficient to establish that Town PS contributed its "book of

business" or "clients" to CRC because Town PS did not make a capital contribution to CRC to acquire its partnership interest; rather, it purchased its interest from Clark PLLC. We interpret the discount as the value that Clark PLLC (the seller in that transaction) must have placed on the future benefit it would realize from its distributive share of income generated by Town PS's book of business, and not as an indication that Town PS was somehow contributing its clients to CRC. Our interpretation is further supported by the fact that CRC credited Town PS's capital account with an initial balance equal to the discounted purchase price of its partnership interest (i.e., Town PS's initial capital account balance was not increased for contribution of a "book of business", see Treas. Reg. § 1.704-1(b)(2)(iv)*(b)*). That is, when the discount reduced Town PS's purchase price of $872,996 by $234,046, for a final purchase price of $639,000, CRC set Town PS's initial capital account balance not at $872,996 (as if Town PS had contributed the cash and a client-based intangible) but rather at $639,000 (the amount of cash only).

The FPAA determined that the income allocation lacked substantial economic effect, and so the burden is on Clark PLLC, as petitioner, to prove that such allocation did have substantial economic effect. It necessarily follows that, under an analysis of the economic effect of the income allocation, one element of petitioner's burden is to prove that CRC maintained capital accounts in accordance with Treasury Regulation section 1.704-1(b)(2)(iv). This burden includes proving that CRC increased the capital accounts in accordance with subdivision (iv)(e)(1), or, in the alternative, proving that the client-based intangible asset lacked any unrealized gain. Petitioner does not argue that this burden should shift to the Commissioner.

To determine whether the client-based intangible asset contained unrealized gain, we must determine the partnership's adjusted basis in the asset. See § 1001(a). Petitioner made no showing of the cost to acquire or develop the client-based intangible assets, see Treas. Reg. § 1.263(a)-4(g)(1), or (tangential to its argument that partners "exchanged" or "contributed" the assets to CRC) the partners' adjusted bases in the client-based intangibles before their alleged contribution, see §§ 723, 732. We hold that petitioner has failed to prove CRC's adjusted basis in the client-based intangibles distributed to Newman PLLC and Town PS, and we therefore assign zero-dollar bases to these assets.[57] Accordingly, with a collective fair market value of $742,569 and a zero-dollar basis, the unrealized gain in the distributed client-based intangibles is $742,569. See § 1001(a).

[57] In the absence of proof of basis by CRC (the party with the burden of proof), we assume zero basis because that would be the finding adverse to CRC. If we found instead that the client-based intangible assets had bases equal to their fair market values at the time of transfer (despite the fact that CRC did not produce evidence to support it), the assets would not have had built-in gain that CRC would have been required to allocate among the partners' capital accounts before distribution. In such circumstance, it is possible that we would have held that CRC had maintained its capital accounts in accordance with the Treasury Regulation § 1.704-1(b)(2)(iv) and, therefore, that CRC's allocations of income had economic effect. A holding of economic effect would conflict with the IRS's determination in the FPAA that the allocations lacked substantial economic effect, and CRC has the burden to disprove that determination.

> The parties have stipulated that the partners' opening capital account balances in 2013 did not include the value of any intangibles and that CRC did not increase the partners' capital accounts by the value of any inherent gain in the client-based intangibles. Therefore, CRC failed to maintain the partners' capital accounts in accordance with Treasury Regulation section 1.704-1(b)(2)(iv),[58] and the special allocation accordingly cannot satisfy the alternate test for economic effect. The allocation will therefore be deemed to have economic effect only if it is able to satisfy the third test - the economic equivalence test.
>
> > [58] The fact that the partners "agreed" to their capital account balances incident to negotiations might suggest that CRC did not strictly adhere to the capital accounting rules of Treasury Regulation § 1.704-1(b)(2)(iv). See *supra* pp. 12-13.

The court explained in the heading, "The allocation does not have economic equivalence":

> In some cases, despite not adhering to the formal requirements of the economic effect tests, an allocation may produce the same income tax results as if the allocation had satisfied the requirements of the basic test. Treas. Reg. § 1.704-1(b)(2)(ii)(i). Petitioner has neither argued nor demonstrated that the special allocation satisfies the economic equivalence test.[59] Therefore, the allocations have neither economic equivalence nor economic effect.
>
> > [59] CRC's failure to increase the capital accounts by the unrealized gain in the client-based intangibles before distribution resulted in incorrect capital account balances (before distribution) for each partner in 2013. Therefore, its income allocations were not based on correct capital account balances and cannot have economic equivalence because the resulting amounts of income allocated per partner differ from those resulting from an application of the basic test for economic effect.
>
> The substantial economic effect analysis under Treasury Regulation section 1.704-1(b)(2)(i) has two parts: first, the allocation must have economic effect, and second, the economic effect of the allocation must be substantial. Because we have determined that CRC's allocations of income to Newman PLLC and Town PS do not have economic effect, we do not conduct an analysis of substantiality.[60]
>
> > [60] The Commissioner stated that if the Court were to find economic effect, then he "does not dispute that the economic effect of the allocations was substantial."

After determining that the allocations in the partnership agreement did not satisfy any of the tests under Reg. § 1.704-1(b)(2)(ii) that would deem them to have economic effect, the court explained, under the heading, "Partner's interest in the partnership":

> Having determined that CRC's allocations of income to Newman PLLC and Town PS lack substantial economic effect, we must redetermine the allocations in accordance with "the partners' interests in the partnership". Treas. Reg. § 1.704-1(b)(1)(i). In this analysis, we must determine the "manner in which the partners have agreed to share the economic benefit or burden (if any) corresponding to the income, gain, loss, deduction, or credit (or item thereof) that is allocated, taking" into account all the facts and circumstances. Treas. Reg. § 1.704-1(b)(3)(i). To do so, the regulation calls on us to examine (1) the partners' relative contributions to the partnership, (2) the interests of the respective partners in profits and losses (if different from that in taxable income or loss),

(3) their relative interests in cash flow and other non-liquidating distributions, and (4) their rights to distributions of capital upon liquidation.[61] Treas. Reg. § 1.704-1(b)(3)(ii). Petitioner does not offer any argument regarding the analysis of "the partner's interest in the partnership" or the individual factors set out in the regulation.

[61] Treasury Regulation § 1.704-1(b)(3)(iii) provides that if the first two requirements of the basic test are met (*i.e.*, that the partnership agreement provides for (1) the determination and maintenance of the partners' capital accounts in accordance with the capital account rules and (2) liquidating distributions to be made in accordance with the positive capital account balances of the partners), then "the partners' interests in the partnership with respect to the portion of the allocation that lacks economic effect will be determined" with a comparative liquidation analysis. *See, e.g., Interhotel Co. v. Commissioner*, T.C. Memo. 2001-151, 81 T.C.M. (CCH) 1804, 1809, supplementing T.C. Memo. 1997-449. However, neither party argues that this comparative liquidation test should govern our analysis (in fact, the Commissioner argues explicitly that it should not apply, and CRC does not contest the Commissioner's argument), so we do not address it.

The terms of the 2013 LLC Agreement ostensibly complied with the criteria of the alternate test for economic effect, but the special allocation lacked substantial economic effect because the partnership failed to correctly maintain capital accounts in accordance with those terms and with the regulations.[62] We proceed with examining the relevant factors, keeping in mind that our goal is to derive the "manner in which the partners *have agreed* to share the economic benefit or burden (if any) corresponding to the income, gain, loss, deduction, or credit (or item thereof) that is allocated", Treas. Reg. § 1.704-1(b)(3)(i) (emphasis added), and that the 2013 LLC Agreement is evidence of such agreement.

[62] In some of the cases that have employed a partner's interest in the partnership analysis, the Court has examined the actual distributions received by the partners (and other similar items) to determine the partners' interests in the partnership because the partnerships lacked written partnership agreements. *See, e.g., Holdner v. Commissioner*, T.C. Memo. 2010-175, 100 T.C.M. (CCH) 108, 116-17, *aff'd*, 483 F.App'x 383 (9th Cir. 2012); *Estate of Ballantyne v. Commissioner*, T.C. Memo. 2002-160, 83 T.C.M. (CCH) 1896, 1904-06, *aff'd*, 341 F.3d 802 (8th Cir. 2003). In other cases the partnership agreement lacked the provisions for capital account maintenance or distributions in liquidation of the partnership under Treasury Regulation § 1.704-1(b)(2)(ii)(b)(1) and (2), or the allocations prescribed by the partnership agreement lacked substantial economic effect, and so the Court relied heavily on the history of the partners' relative contributions (or the impact of the partners' relative contributions on prospective liquidating distributions) to determine the partners' interests in the partnership. *See, e.g., Estate of Tobias v. Commissioner*, T.C. Memo. 2001-37, 81 T.C.M. (CCH) 1163, 1169-71; *PNRC Ltd. P'ship v. Commissioner*, T.C. Memo. 1993-335, 66 T.C.M. (CCH) 265, 268, 270. In this case, however, the partnership did have a written partnership agreement, and that written agreement did have provisions of the sort that, in other cases, were lacking and had to be inferred or hypothesized.

Under the heading, "'Align[ing]' distribution and income allocation in the 'book-up'," the court reasoned:

> The Commissioner has another argument to resist the allocation of income away from Clark PLLC and toward the other two partners. He contends:
>
> > Section 9.3 [of the 2013 LLC Agreement], when read in conjunction with...section 9.1 requires a matching of the book-up and the distribution. Because section 9.3(a) requires that non-cash distributions reflect how the cash proceeds from the sale of such property would have been distributed, it follows that the book-up must be allocated to the distributee[s] – had the property been sold first, with the proceeds distributed to Newman PLLC and Town PS, the matching rule of section 9.1 would have required the gain from the hypothetical sale to be allocated in a manner that is consistent with that cash distribution from a hypothetical sale.... If CRC would have distributed the cash proceeds from a hypothetical sale of $419,043 and $447,437, to Newman PLLC and Town PS, respectively, then it follows that the book-up would have been allocated in these same amounts to the distributee partners, resulting in a wash to their capital accounts.
>
> Assuming his premises, the Commissioner is partly right: He is right that, if the unrealized gain is allocated only to the distribute partners (Newman PLLC and Town PS) and not to Clark PLLC, then that gain allocation would increase their capital accounts, and the immediately subsequent distribution would reduce their capital accounts, and the net effect would be "a wash". Their accounts would not be driven into negative status; the QIO would not be triggered; and CRC's 2013 income would not be allocated to those partners.
>
> But we disagree with the Commissioner's insistence that a "matching" is required and that the unrealized gain is allocated solely to the distributee partners. The 2013 LLC Agreement explicitly says otherwise. Section 9.3(a) requires that, before the distribution, unrealized gain must be allocated among the partners not in accordance with their being distributees of the gain but rather "in accordance with Article 8" (*i.e.*, in accordance with their allocations of "Net Profit or Net Loss for [the] fiscal year of the Company"). The LLC agreement could hardly be clearer. The allocation of gain, made before any distribution has occurred, is in accordance with Article 8.
>
> Less clear is how to reconcile the 2013 LLC Agreement with the distribution of client-based intangible assets to only two of the partners. Section 9.3(a) states that "[n]oncash assets...shall be distributed in a manner that reflects how cash proceeds from the sale of such assets for fair market value would have been distributed"; and Section 9.1 states that "Distributions of Distributable Cash may be made to the Members as such time and amounts as determined in the Managers' reasonable discretion, provided that such Distributions will be consistent with the allocations of income made pursuant to Section 8.1". Section 9.1 thus does state that the distributions "will be consistent with" the provisions of Section 8.1 (providing for allocations of net profit or loss); but Section 9.1 commits the matter to managerial discretion, so opinions might differ about the propriety of the client distribution under the 2013 LLC Agreement.
>
> However, we are adjudicating a dispute about the tax consequences of a distribution that was in fact made; we are not adjudicating a dispute about a partner's claim that he was wrongly left out of a distribution. Either dispute is resolved by the Settlement Agreement,

which compromised the parties' disagreements about the withdrawal of Newman PLLC and Town PS from CRC and left the client-based intangibles in the hands of the withdrawing partners. The Commissioner is certainly right to begin his analysis with the text of Sections 8.1, 9.1, and 9.3 of the 2013 LLC Agreement, but ending there without resort to the Settlement Agreement makes the puzzle seem more difficult than it actually is. We construe the 2013 LLC Agreement in light of the later Settlement Agreement, which superseded the LLC agreement.

We conclude that the unrealized gain is properly allocated among all three partners (as set out in Section 8.1) so that the capital accounts of all three are increased, but we conclude that because the agreed-upon distribution was made only to the withdrawing partners, only their capital accounts are reduced. Consequently, the withdrawing partners' capital accounts did go negative, the QIO was triggered, and considering our analysis of the partners' interests in the partnership (and weighing most heavily the partners' agreement regarding their interests in economic profits and losses), CRC's 2013 income should be allocated to the withdrawing partners' accounts to bring them up to zero.[71]

[71] The Commissioner contends that all of CRC's ordinary income for the period of January 2013 to April 2013 is properly allocable to Clark PLLC under Section 8.1(c), which allocates all income remaining after the allocations of Section 8.1(a) and (b) according to the FMG system. The parties have stipulated that $15,387 of income is allocable to Clark PLLC under Section 8.1(b) (for amounts collected on accounts receivable) and that all remaining income is allocable to Clark PLLC under Section 8.1(c), but our analysis does not reach Section 8.1(a)-(c) of the 2013 LLC Agreement, and therefore the parties' stipulations regarding these allocations of income are not helpful in this regard. Instead, the introductory text of Section 8.1 subjects the partnership's income allocations to Section 8.3 (regarding special allocations), and therefore, due to the deficit capital account balances of Newman PLLC and Town PS, the QIO provision under Section 8.3 controls the allocation of CRC's entire amount of income for 2013.

We will order the parties to submit computations under Rule 155 to determine the exact amount of Newman PLLC's and Town PS's capital account balance deficiencies (after applicable adjustments to their capital accounts) and the amounts of income allocable to the partners' capital accounts as a result. Those computations should account for the following capital account adjustments, beginning with the partners' reported opening capital account balances in 2013, see *supra* p. 24: (1) the allocation of $742,569 of unrealized gain (in the client-based intangible assets) according to Section 8.1 of the 2013 LLC Agreement; (2) the distribution of client-based intangible assets of $318,144 to Newman PLLC and $424,425 to Town PS; (3) the distribution on account of the WTB Loan of $183,737, see *supra* note 3; and (4) the cash distributions to the partners in the amounts stipulated by the parties, see *supra* note 3. By our preliminary calculations, the amount of CRC's income in 2013 is insufficient to bring both Newman PLLC's and Town PS's capital accounts up to zero. Therefore, the income must be allocated between them in some proportion. In the absence of contentions by the parties as to how to divide the total amount of ordinary income, we hold that CRC's income should be allocated to each partner's deficit capital account in an amount equal to that partner's pro rata "share" of the total negative balances of those accounts, calculated by dividing the deficit balance of each partner's capital account by the combined deficits of both partners' capital

> accounts and then multiplying the resulting ratio for each partner by the total amount of ordinary income to be allocated.

The court concluded:

> CRC's special allocation of income of $307,759 to Newman PLLC and $255,799 to Town PS in 2013 did lack substantial economic effect (as the FPAA determined) because the partnership failed to maintain capital accounts in accordance with the requirement of Treasury Regulation section 1.704-1(b)(2)(iv) that CRC must allocate the unrealized gain inherent in the client-based intangibles across the partners' capital accounts before decreasing Newman PLLC's and Town PS's capital accounts by the value of the distribution. However, an analysis of the partners' interests in the partnership reveals that although Clark PLLC was the largest percentage owner of CRC's "membership units", the partners agreed to income allocations in their partnership agreement (including a QIO) that are most indicative of how they agreed to share the economic benefits and burdens of the partnership, particularly in light of the unanticipated distribution of client-based intangibles to Newman PLLC and Town PS.

This case's result departs dramatically from the normal result of distributing assets whose value exceeds their basis. In this case, that excess value was ordinary income to the recipient partners and a reduction in gross receipts (generating an ordinary loss) to the remaining partners. Normally, such a distribution would merely provide carryover basis (zero in this case) to the recipient partners, without any tax benefit to the remaining partners.[510] Here, the book gain on the distribution of the client-based intangibles was allocated to the remaining partners, so the recipient partners receipt of the client-based intangibles drove their capital accounts negative. Given that their capital accounts must end with a zero balance, they received an allocation of ordinary income to increase their capital accounts. Presumably the distributees would amortize the client-based intangibles over 15 years.[511] For a very brief comment about planning around this result, see part II.Q.8.b.i.(d) Capital Accounting May Trigger Ordinary Income.

For family partnerships, properly maintaining capital accounts is important to avoiding taxable gifts[512] and in analyzing Code § 2701.[513]

Sometimes distributions of property and other transfers change the partnership's property's basis. See part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election. Such a change may be reflected in capital accounts.[514]

[513] See part III.B.7.b Code § 2701 Overview, especially fn. 7315.

[514] Reg. § 1.704-1(b)(2)(iv)(m)(4), "Section 734 adjustments," provides:

> Except as provided in paragraph (b)(2)(iv)(m)(5) of this section, in the case of a distribution of property in liquidation of a partner's interest in the partnership by a partnership that has a

When part or all of a partnership interest is transferred, the transferor's capital account attributable to the transferred interest must carry over to the transferee partner.[515] Generally, when transfers trigger adjustment as a result of a Code § 754 election,[516] adjustments to the adjusted tax basis of partnership property are not reflected in the capital account of the transferee partner or on the books of the partnership, and subsequent capital account adjustments for distributions and for depreciation, depletion, amortization, and gain or loss with respect to such property will disregard the effect of such basis adjustment; however, adjustments that affect the partnership's common basis might need to be reflected.[517] Although generally partner-specific Code § 743(b) adjustments do not generate inside basis and capital

> section 754 election in effect for the partnership taxable year in which the distribution occurs, the partner who receives the distribution that gives rise to the adjustment to the adjusted tax basis of partnership property under section 734 shall have a corresponding adjustment made to his capital account. If such distribution is made other than in liquidation of a partner's interest in the partnership, however, except as provided in paragraph (b)(2)(iv)(m)(5) of this section, the capital accounts of the partners shall be adjusted by the amount of the adjustment to the adjusted tax basis of partnership property under section 734, and such capital account adjustment shall be shared among the partners in the manner in which the unrealized income and gain that is displaced by such adjustment would have been shared if the property whose basis is adjusted were sold immediately prior to such adjustment for its recomputed adjusted tax basis.

Reg. § 1.704-1(b)(2)(iv)(m)(5), "Limitations on adjustments," is reproduced in fn 519.

[515] Reg. § 1.704-1(b)(2)(iv)(*l*), which requires that "upon the transfer of all or a part of an interest in the partnership, the capital account of the transferor that is attributable to the transferred interest carries over to the transferee partner."

[516] See parts II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest, and II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

[517] Reg. § 1.704-1(b)(2)(iv)(m). The description in the text above does not capture exceptions provided by the regulation, so read the regulation to get the full flavor. If capital account adjustments are made, Reg. § 1.704-1(b)(2)(iv)(m) limits them:

> Adjustments may be made to the capital account of a partner (or his successor in interest) in respect of basis adjustments to partnership property under sections 732, 734, and 743 only to the extent that such basis adjustments (i) are permitted to be made to one or more items of partnership property under section 755, and (ii) result in an increase or a decrease in the amount at which such property is carried on the partnership's balance sheet, as computed for book purposes. For example, if the book value of partnership property exceeds the adjusted tax basis of such property, a basis adjustment to such property may be reflected in a partner's capital account only to the extent such adjustment exceeds the difference between the book value of such property and the adjusted tax basis of such property prior to such adjustment.

account adjustments, they may generate basis[518] and capital account[519] adjustments when a person who has partner-specific Code § 743(b) adjustments has his or her partnership interest liquidated without having received the benefit of those partner-specific Code § 743(b) adjustments.

When considering the practical issues of maintaining a chart of accounts and a fixed asset system and implementing a Code § 754 basis step-up, consider setting up a separate capital account on the system for the Code § 754 basis step-up and for the stepped-up assets. Use these items on the tax return but eliminate them when preparing financial statements, because they are not GAAP. Thus, the stepped-up assets would be in a separate grouping in the system to facilitate their elimination on financial statements.

---

[518] Reg. § 1.734-2(b)(1) provides:

> If a transferee partner, in liquidation of his entire partnership interest, receives a distribution of property (including money) with respect to which he has no special basis adjustment, in exchange for his interest in property with respect to which he has a special basis adjustment, and does not utilize his entire special basis adjustment in determining the basis of the distributed property to him under section 732, the unused special basis adjustment of the distributee shall be applied as an adjustment to the partnership basis of the property retained by the partnership and as to which the distributee did not use his special basis adjustment. The provisions of this subparagraph may be illustrated by the following example:
>
> *Example*. Upon the death of his father, partner S acquires by inheritance a half-interest in partnership ACS. Partners A and C each have a one-quarter interest. The assets of the partnership consist of $10,000 cash and land used in farming worth $10,000 with a basis of $1,000 to the partnership. Since the partnership had made the election under section 754 at the time of transfer, partner S had a special basis adjustment of $4,500 under section 743(b) with respect to his undivided half-interest in the real estate. The basis of S's partnership interest, in accordance with section 742, is $10,000. S retires from the partnership and receives $10,000 in cash in exchange for his entire interest. Since S has received no part of the real estate, his special basis adjustment of $4,500 will be allocated to the real estate, the remaining partnership property, and will increase its basis to the partnership to $5,500.

[519] Reg. § 1.704-1(b)(2)(iv)(m)(2), "Section 743 adjustments," provides:

> In the case of a transfer of all or a part of an interest in a partnership that has a section 754 election in effect for the partnership taxable year in which such transfer occurs, adjustments to the adjusted tax basis of partnership property under section 743 shall not be reflected in the capital account of the transferee partner or on the books of the partnership, and subsequent capital account adjustments for distributions (see paragraph (b)(2)(iv)(e)(1) of this section) and for depreciation, depletion, amortization, and gain or loss with respect to such property will disregard the effect of such basis adjustment. The preceding sentence shall not apply to the extent such basis adjustment is allocated to the common basis of partnership property under paragraph (b)(1) of §1.734-2; in these cases, such basis adjustment shall, except as provided in paragraph (b)(2)(iv)(m)(5) of this section, give rise to adjustments to the capital accounts of the partners in accordance with their interests in the partnership under paragraph (b)(3) of this section. See examples (13)(iii) and (iv) of paragraph (b)(5) of this section.

Reg. § 1.704-1(b)(2)(iv)(m)(5), "Limitations on adjustments," provides:

> Adjustments may be made to the capital account of a partner (or his successor in interest) in respect of basis adjustments to partnership property under sections 732, 734, and 743 only to the extent that such basis adjustments (i) are permitted to be made to one or more items of partnership property under section 755, and (ii) result in an increase or a decrease in the amount at which such property is carried on the partnership's balance sheet, as computed for book purposes. For example, if the book value of partnership property exceeds the adjusted tax basis of such property, a basis adjustment to such property may be reflected in a partner's capital account only to the extent such adjustment exceeds the difference between the book value of such property and the adjusted tax basis of such property prior to such adjustment.

II.C.8. Effect of Employee Becoming a Partner

When an employee becomes a partner,[520] that person is no longer an employee.[521]

II.C.8.a. Code § 707 - Compensating a Partner for Services Performed

Code § 707(a)(1) provides that, if a partner engages in a transaction with a partnership other than in his capacity as a member of such partnership, the transaction shall, except as otherwise provided in Code § 707, be considered as occurring between the partnership and one who is not a partner.

Code § 707(a)(2)(A) provides that, under regulations, if a partner performs services for a partnership, there is a related direct or indirect allocation and distribution to such partner, and the performance of such services and the allocation and distribution, when viewed together, are properly characterized as a transaction occurring between the partnership and a partner acting other than in his capacity as a member of the partnership, such allocation and distribution shall be treated as a transaction described in Code § 707(a)(1).

Code § 707(c), "Guaranteed payments," provides that, to the extent determined without regard to the income of the partnership, payments to a partner for are considered as made to one who is not a member of the partnership, but only for the purposes of including the payments in the partner's income or the partnership deducting or capitalizing the payments.[522]

Although Code § 707(a)(2)(A) and (c) and Reg. § 1.707-1(c) (cited below) refer to payments for services or for the use of capital, this part II.C.8.a focuses on services performed.

Payments made by a partnership to a partner for services (as used in this part II.C.8.a, "guaranteed payments") are considered as made to a person who is not a partner, to the extent such payments are determined without regard to the income of the partnership.[523]

The construct of Code § 707 is really intended to create three separate kinds of arrangements for services provided:

- If a partner performs services as a partner – exercising authority under the partnership agreement and fulfilling duties as a partner – the partner may be compensated through two types of arrangements:

[520] See part II.M.4.f Issuing a Profits Interest to a Service Provider.
[521] See parts II.L.3 Self-Employment Tax: General Partner or Sole Proprietor (especially fn. 3454, regarding wages paid to partners), II.P.2 C Corporation Advantage Regarding Fringe Benefits (especially fn. 3896) and III.B.7.c.viii Creative Bonus Arrangements (especially fn. 7378).
[522] Referring to Code §§ 61(a), 162(a), and 263 are the only Code sections affected. As to the partnership deducting or capitalizing payments, Reg. § 1.707-1(c) provides:

> For a guaranteed payment to be a partnership deduction, it must meet the same tests under section 162(a) as it would if the payment had been to a person who is not a member of the partnership, and the rules of section 263 (relating to capital expenditures) must be taken into account. This rule does not affect the deductibility to the partnership of a payment described in section 736(a)(2) to a retiring partner or to a deceased partner's successor in interest.

For the latter, see part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.
[523] Reg. § 1.707-1(c).

- The partner's interest in the partnership's profits (non-Code § 707 distributions), or

- Payments that are based on something other than the partnership's profits, which are Code § 707(c) guaranteed payments.[524]

---

[524] Former Rev. Rul. 81-300 reasoned:

> In *Pratt v. Commissioner*, 64 T.C. 203 (1975), *aff'd in part, rev'd in part*, 550 F.2d 1023 (5th Cir. 1977), under substantially similar facts to those in this case, both the United States Tax Court and the United States Court of Appeals for the Fifth Circuit held that management fees based on a percentage of gross rentals were not payments described in section 707(a) of the Code. The courts found that the terms of the partnership agreement and the actions of the parties indicated that the taxpayers were performing the management services in their capacities as general partners. *Compare* Rev. Rul. 81-301, this page, this Bulletin.
>
> When a determination is made that a partner is performing services in the capacity of a partner, a question arises whether the compensation for the services is a guaranteed payment under section 707(c) of the Code or a distributive share of partnership income under section 704. In *Pratt*, the Tax Court held that the management fees were not guaranteed payments because they were computed as a percentage of gross rental income received by the partnership. The court reasoned that the gross rental income was income of the partnerships and, thus, the statutory test for a guaranteed payment, that it be determined without regard to the income of the partnership, was not satisfied. On appeal, the taxpayer's argument was limited to the section 707(a) issue and the Fifth Circuit found it unnecessary to consider the application of section 707(c).
>
> The legislative history of the Internal Revenue Code of 1954 indicates the intent of Congress to treat partnerships as entities in the case of certain transactions between partners and their partnerships. *See* S. Rep. No. 1622, 83d Cong., 2d Sess. 92 (1954). The Internal Revenue Code of 1939 and prior Revenue Acts contain no comparable provision and the courts had split on the question of whether a partner could deal with the partnership as an outsider. *Compare Lloyd v. Commissioner*, 15 B.T.A. 82 (1929) and *Wegener v. Commissioner*, 119 F.2d 49 (5th Cir. 1941), *aff'g* 41 B.T.A. 857 (1940), *cert. denied* 314 U.S. 643 (1941). This resulted both in uncertainty and in substantial computational problems when an aggregate theory was applied and the payment to a partner exceeded the partnership income. In such situations, the fixed salary was treated as a withdrawal of capital, taxable to the salaried partner to the extent that the withdrawal was made from the capital of other partners. *See*, for example, Rev. Rul. 55-30, 1955-1 C.B. 430. Terming such treatment as unrealistic and unnecessarily complicated, Congress enacted section 707(a) and (c) of the Code of 1954. Under section 707(a) the partnership is considered an unrelated entity for all purposes. Under section 707(c), the partnership is considered an unrelated entity for purposes of sections 61 and 162 to the extent that it makes a guaranteed payment for services or for the use of capital.
>
> Although a fixed amount is the most obvious form of guaranteed payment, there are situations in which compensation for services is determined by reference to an item of gross income. For example, it is not unusual to compensate a manager of real property by reference to the gross rental income that the property produces. Such compensation arrangements do not give the provider of the service a share in the profits of the enterprise, but are designed to accurately measure the value of the services that are provided.
>
> Thus, and [sic] view of the legislative history and the purpose underlying section 707 of the Code, the term guaranteed payment should not be limited to fixed amounts. A payment for services determined by reference to an item of gross income will be a guaranteed payment if, on the basis of all of the facts and circumstances, the payment is compensation rather than a share of partnership profits. Relevant facts would include the reasonableness of the payment for the services provided and whether the method used to determine the amount of the payment would have been used to compensate an unrelated party for the services.

- If the partner performs services as an independent contractor and not as a partner, then Code § 707(a) applies.[525]

Whether a particular compensation arrangement is a guaranteed payment or a distributive share of profits is a fluid concept. Generally, a payment based on gross income constitutes a guaranteed payment (such as a fixed percentage of gross rent), whereas a payment based on net income constitutes a distributive share (such as rental income net of all allocable expenses).[526] Reg. § 1.707-1(c) provides some examples:

> *Example (1)*. Under the ABC partnership agreement, partner A is entitled to a fixed annual payment of $10,000 for services, without regard to the income of the partnership. His distributive share is 10 percent. After deducting the guaranteed payment, the partnership has $50,000 ordinary income. A must include $15,000 as ordinary income for his taxable year within or with which the partnership taxable year ends ($10,000 guaranteed payment plus $5,000 distributive share).

> It is the position of the Internal Revenue Service that in *Pratt* the management fees were guaranteed payments under section 707(c) of the Code. On the facts presented, the payments were not disguised distributions of partnership net income, but were compensation for services payable without regard to partnership income.

However, the IRS has revoked Rev. Rul. 81-300; see fn. 527. Its text is reproduced to distinguish between services that are or are not subject to Code § 707 rather than to distinguish between Code § 707(a) and (c).

[525] See The Lost Regulations—Section 707 and the Definition of Partner Capacity, *Business Entities* (WG&L), Jan./Feb. 2009. Rev Rul. 81-301 reasoned that Code § 707(a), rather than Code § 707(c), governed the following arrangement:

> Although the adviser is identified in the agreement as an adviser general partner, the adviser provides similar services to others as part of its regular trade or business, and its management of the investment and reinvestment of ABC's assets is supervised by the directors. Also it can be relieved of its duties and right to compensation at any time (with 60 days' notice) by a majority vote of the directors. Further, the adviser pays its own expenses and is not personally liable to the other partners for any losses incurred in the investment and reinvestment of ABC's assets. The services performed by the adviser are, in substance, not performed in the capacity of a general partner, but are performed in the capacity of a person who is not a partner.

It held:

> The 10 percent daily gross income allocation paid to the adviser is subject to section 707(a) of the Code and taxable to the adviser under section 61 as compensation for services rendered. The amount paid is deductible by the partnership under section 162, subject to the provisions of section 265.

[526] McKee, Nelson & Whitmire, *Federal Taxation of Partnerships and Partners*, ¶ 14.03 Partners Acting in Their Capacities as Partners: Section 707(c) Guaranteed Payments, discusses that the Tax Court held that a management fee equal to 3% of gross rents constituted a distributive share rather than a guaranteed payment. The treatise states that the IRS disagreed with the Tax Court's ruling, both citing the Rev. Rul. and providing details in a footnote:

> Rev. Rul. 81-300, 1981-2 CB 143. The legislative history of the Deficit Reduction Act of 1984, however, states that the transaction described in Rev. Rul. 81-300 should be governed by § 707(a), not § 707(c). Moreover, it seems that § 707(a) treatment is dictated by the fact that the services rendered (real estate management) are traditionally compensated by fees that are a percentage of gross income, thus triggering § 707(a)(2)(A). 1 Senate Comm. on Finance, 98th Cong., 2d Sess., Deficit Reduction Act of 1984, S. Rpt. No. 169, at 229, 230 (Comm. Print 1984)….

Since then, Rev. Rul. 81-300 has been obsoleted; see fn. 524. I have not looked for changes to the treatise.

> *Example (2)*. Partner C in the CD partnership is to receive 30 percent of partnership income as determined before taking into account any guaranteed payments, but not less than $10,000. The income of the partnership is $60,000, and C is entitled to $18,000 (30 percent of $60,000) as his distributive share. No part of this amount is a guaranteed payment. However, if the partnership had income of $20,000 instead of $60,000, $6,000 (30 percent of $20,000) would be partner C's distributive share, and the remaining $4,000 payable to C would be a guaranteed payment.
>
> *Example (3)*. Partner X in the XY partnership is to receive a payment of $10,000 for services, plus 30 percent of the taxable income or loss of the partnership. After deducting the payment of $10,000 to partner X, the XY partnership has a loss of $9,000. Of this amount, $2,700 (30 percent of the loss) is X's distributive share of partnership loss and, subject to section 704(d), is to be taken into account by him in his return. In addition, he must report as ordinary income the guaranteed payment of $10,000 made to him by the partnership.
>
> *Example (4)*. Assume the same facts as in example (3) of this paragraph, except that, instead of a $9,000 loss, the partnership has $30,000 in capital gains and no other items of income or deduction except the $10,000 paid X as a guaranteed payment. Since the items of partnership income or loss must be segregated under section 702(a), the partnership has a $10,000 ordinary loss and $30,000 in capital gains. X's 30 percent distributive shares of these amounts are $3,000 ordinary loss and $9,000 capital gain. In addition, X has received a $10,000 guaranteed payment which is ordinary income to him.

In 2015, the IRS announced a more aggressive posture in reclassifying arrangements as disguised payments for services.[527] Example (2) is now on the chopping block.[528] REG-115452-14, "Disguised Payments for Services," proposes the following:

---

[527] On July 22, 2015, REG-115452-14, "Disguised Payments for Services," revoked Rev. Rul. 81-300, promulgating Prop. Reg. § 1.707-2, explaining:

REG-115452-14 immediately changed the government's position:

> The proposed regulations would be effective on the date the final regulations are published in the Federal Register and would apply to any arrangement entered into or modified on or after the date of publication of the final regulations. In the case of any arrangement entered into or modified before the final regulations are published in the Federal Register, the determination of whether an arrangement is a disguised payment for services under section 707(a)(2)(A) is made on the basis of the statute and the guidance provided regarding that provision in the legislative history of section 707(a)(2)(A). Pending the publication of final regulations, the position of the Treasury Department and the IRS is that the proposed regulations generally reflect Congressional intent as to which arrangements are appropriately treated as disguised payments for services.

The legislative history referred to above includes:

> … the committee intends that the provision will lead to the conclusions contained in Revenue Ruling 81-300, 1981-2 CB 143, and Revenue Ruling 81-301, 1981-2 CB 144, except that the transaction described in Revenue Ruling 81-300 would be treated as a transaction described in section 707(a).

[528] REG-115452-14, Disguised Payments for Services (July 22, 2015), commented:

> Congress's emphasis on entrepreneurial risk requires changes to existing regulations under section 707(c). Specifically, Example 2 of § 1.707-1(c) provides that if a partner is entitled to an allocation of the greater of 30 percent of partnership income or a minimum guaranteed amount,

Par. 3. Section 1.707–1 is amended by adding a sentence at the end of paragraph (a) and revising paragraph (c) Example 2 to read as follows.

§ 1.707–1. Transactions between partner and partnership.

(a) … For arrangements pursuant to which a purported partner performs services for a partnership and the partner receives a related direct or indirect allocation and distribution from the partnership, see § 1.707–2 to determine whether the arrangement should be treated as a disguised payment for services.

(c) …

Example 2. Partner C in the CD partnership is to receive 30 percent of partnership income, but not less than $10,000. The income of the partnership is $60,000, and C is entitled to $18,000 (30 percent of $60,000). Of this amount, $10,000 is a guaranteed payment to C. The $10,000 guaranteed payment reduces the partnership's net income to $50,000 of which C receives $8,000 as C's distributive share.

Below much space is devoted to analyzing the proposed regulations, which the IRS views as reflecting current law to a large degree. REG-115452-14, "Disguised Payments for Services" (7/23/2015), discusses "Effective Dates":

> The proposed regulations would be effective on the date the final regulations are published in the *Federal Register* and would apply to any arrangement entered into or modified on or after the date of publication of the final regulations. In the case of any arrangement entered into or modified before the final regulations are published in the *Federal Register*, the determination of whether an arrangement is a disguised payment for services under section 707(a)(2)(A) is made on the basis of the statute and the guidance provided regarding that provision in the legislative history of section 707(a)(2)(A). Pending the publication of final regulations, the position of the Treasury Department and the IRS is that the proposed regulations generally reflect Congressional intent as to which arrangements are appropriately treated as disguised payments for services.

and the income allocation exceeds the minimum guaranteed amount, then the entire income allocation is treated as a distributive share under section 704(b). Example 2 also provides that if the income allocation is less than the guaranteed amount, then the partner is treated as receiving a distributive share to the extent of the income allocation and a guaranteed payment to the extent that the minimum guaranteed payment exceeds the income allocation. The treatment of the arrangements in Example 2 is inconsistent with the concept that an allocation must be subject to significant entrepreneurial risk to be treated as a distributive share under section 704(b). Accordingly, the proposed regulations modify Example 2 to provide that the entire minimum amount is treated as a guaranteed payment under section 707(c) regardless of the amount of the income allocation. Rev. Rul. 66-95, 1966-1 C.B. 169, and Rev. Rul. 69-180, 1969-1 C.B. 183, are also inconsistent with these proposed regulations. The Treasury Department and the IRS intend to obsolete Rev. Rul. 66-95 and revise Rev. Rul. 69-180, when these regulations are published in final form.

REG-115452-14, “Disguised Payments for Services,” explained its view of the legislative history to Code § 707(a)(2):[529]

> Congress determined that allocations and distributions that were, in substance, direct payments for services should be treated as a payment of fees rather than as an arrangement for the allocation and distribution of partnership income. H.R. Rep. at 1218; S. Prt. at 225. Congress differentiated these arrangements from situations in which a partner receives an allocation (or increased allocation) for an extended period to reflect its contribution of property or services to the partnership, such that the partner receives the allocation in its capacity as a partner. In balancing these potentially conflicting concerns, Congress anticipated that the regulations would take five factors into account in determining whether a service provider would receive its putative allocation and distribution in its capacity as a partner. H.R. Rep. at 1219–20; S. Prt. at 227.
>
> Congress identified as its first and most important factor whether the payment is subject to significant entrepreneurial risk as to both the amount and fact of payment. In explaining why entrepreneurial risk is the most important factor, Congress provides that ‘‘[p]artners extract the profits of the partnership with reference to the business success of the venture, while third parties generally receive payments which are not subject to this risk.’’ S. Prt. at 227. An arrangement for an allocation and distribution to a service provider which involves limited risk as to amount and payment is treated as a fee under section 707(a)(2)(A). Congress specified examples of allocations that presumptively limit a partner’s risk, including (i) capped allocations of income, (ii) allocations for a fixed number of years under which the income that will go to the partner is reasonably certain, (iii) continuing arrangements in which purported allocations and distributions are fixed in amount or reasonably determinable under all facts and circumstances, and (iv) allocations of gross income items.
>
> An arrangement in which an allocation and distribution to a service provider are subject to significant entrepreneurial risk as to amount will generally be recognized as a distributive share, although other factors are also relevant. The legislative history to section 707(a)(2)(A) includes the following examples of factors that could bear on this determination: (i) Whether the partner status of the recipient is transitory; (ii) whether the allocation and distribution that are made to the partner are close in time to the partner’s performance of services; (iii) whether the facts and circumstances indicate that the recipient became a partner primarily to obtain tax benefits for itself or the partnership that would not otherwise have been available; and (iv) whether the value of the recipient’s interest in general and in continuing partnership profits is small in relation to the allocation in question.

REG-115452-14, “Disguised Payments for Services,” describes the proposed regulations:

> *I. General Rules Regarding Disguised Payments for Services*
>
> A. Scope
>
> Consistent with the language of section 707(a)(2)(A), § 1.707-2(b) of the proposed regulations provides that an arrangement will be treated as a disguised payment for

[529] It cited H.R. Rep. No. 432 (Pt. 2), 98th Cong., 2d Sess. 1216-21 (1984) (H.R. Rep.); S. Prt. No. 169 (Vol. 1), 98th Cong., 2d Sess. 223–32 (1984) (S. Prt.).

services if (i) a person (service provider), either in a partner capacity or in anticipation of being a partner, performs services (directly or through its delegate) to or for the benefit of the partnership; (ii) there is a related direct or indirect allocation and distribution to the service provider; and (iii) the performance of the services and the allocation and distribution when viewed together, are properly characterized as a transaction occurring between the partnership and a person acting other than in that person's capacity as a partner.

The proposed regulations provide a mechanism for determining whether or not an arrangement is treated as a disguised payment for services under section 707(a)(2)(A). An arrangement that is treated as a disguised payment for services under these proposed regulations will be treated as a payment for services for all purposes of the Code. Thus, the partnership must treat the payments as payments to a non-partner in determining the remaining partners' shares of taxable income or loss. Where appropriate, the partnership must capitalize the payments or otherwise treat them in a manner consistent with the recharacterization.

The consequence of characterizing an arrangement as a payment for services is otherwise beyond the scope of these regulations. For example, the proposed regulations do not address the timing of inclusion by the service provider or the timing of a deduction by the partnership other than to provide that each is taken into account as provided for under applicable law by applying all relevant sections of the Code and all relevant judicial doctrines. Further, if an arrangement is subject to section 707(a), taxpayers should look to relevant authorities to determine the status of the service provider as an independent contractor or employee. See, generally, Rev. Rul. 69-184, 1969-1 C.B. 256.[530] The Treasury Department and the IRS believe that section 707(a)(2)(A) generally should not apply to arrangements that the partnership has reasonably characterized as a guaranteed payment under section 707(c).

Allocations pursuant to an arrangement between a partnership and a service provider to which sections 707(a) and 707(c) do not apply will be treated as a distributive share under section 704(b). Rev. Proc. 93-27 and Rev. Proc. 2001–43 may apply to such an arrangement if the specific requirements of those Revenue Procedures are also satisfied. The Treasury Department and the IRS intend to modify the exceptions set forth in those revenue procedures to include an additional exception for profits interests issued in conjunction with a partner forgoing payment of a substantially fixed amount. This exception is discussed in part IV of the Explanation of Provisions section of this preamble.

B. Application and Timing

These proposed regulations apply to a service provider who purports to be a partner even if applying the regulations causes the service provider to be treated as a person who is not a partner. S. Prt. at 227. Further, the proposed regulations may apply even if their application results in a determination that no partnership exists. The regulations also apply to a special allocation and distribution received in exchange for services by a

[530] [My footnote:] For using a tiered partnership structure to enable a partner's salary-type compensation to be reported on Form W-2, see text accompanying and flowchart following fn 556 in part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

service provider who receives other allocations and distributions in a partner capacity under section 704(b).

The proposed regulations characterize the nature of an arrangement at the time at which the parties enter into or modify the arrangement. Although section 707(a)(2)(A)(ii) requires both an allocation and a distribution to the service provider, the Treasury Department and the IRS believe that a premise of section 704(b) is that an income allocation correlates with an increased distribution right, justifying the assumption that an arrangement that provides for an income allocation should be treated as also providing for an associated distribution for purposes of applying section 707(a)(2)(A). The Treasury Department and the IRS considered that some arrangements provide for distributions in a later year, and that those later distributions may be subject to independent risk. However, the Treasury Department and the IRS believe that recharacterizing an arrangement retroactively is administratively difficult. Thus, the proposed regulations characterize the nature of an arrangement when the arrangement is entered into (or modified) regardless of when income is allocated and when money or property is distributed. The proposed regulations apply to both one-time transactions and continuing arrangements. S. Prt. at 226.

II. Factors Considered

Whether an arrangement constitutes a payment for services (in whole or in part) depends on all of the facts and circumstances. The proposed regulations include six non-exclusive factors that may indicate that an arrangement constitutes a disguised payment for services. Of these factors, the first five factors generally track the facts and circumstances identified as relevant in the legislative history for purposes of applying section 707(a)(2)(A). The proposed regulations also add a sixth factor not specifically identified by Congress. The first of these six factors, the existence of significant entrepreneurial risk, is accorded more weight than the other factors, and arrangements that lack significant entrepreneurial risk are treated as disguised payments for services. The weight given to each of the other five factors depends on the particular case, and the absence of a particular factor (other than significant entrepreneurial risk) is not necessarily determinative of whether an arrangement is treated as a payment for services.

A. Significant Entrepreneurial Risk

As described in the Background section of this preamble, Congress indicated that the most important factor in determining whether or not an arrangement constitutes a payment for services is that the allocation and distribution is subject to significant entrepreneurial risk. S. Prt. at 227. Congress noted that partners extract the profits of the partnership based on the business success of the venture, while third parties generally receive payments that are not subject to this risk. *Id.*

The proposed regulations reflect Congress's view that this factor is most important. Under the proposed regulations, an arrangement that lacks significant entrepreneurial risk constitutes a disguised payment for services. An arrangement in which allocations and distributions to the service provider are subject to significant entrepreneurial risk will generally be recognized as a distributive share but the ultimate determination depends on the totality of the facts and circumstances. The Treasury Department and the IRS request comments on whether allocations to service providers that lack significant entrepreneurial risk could be characterized as distributive shares under section 704(b) in any circumstances.

Whether an arrangement lacks significant entrepreneurial risk is based on the service provider's entrepreneurial risk relative to the overall entrepreneurial risk of the partnership. For example, a service provider who receives a percentage of net profits in each of a partnership that invests in high-quality debt instruments and a partnership that invests in volatile or unproven businesses may have significant entrepreneurial risk with respect to both interests.

Section 1.707-2(c)(1)(i) through (v) of the proposed regulations set forth arrangements that presumptively lack significant entrepreneurial risk. These arrangements are presumed to result in an absence of significant entrepreneurial risk (and therefore, a disguised payment for services) unless other facts and circumstances can establish the presence of significant entrepreneurial risk by clear and convincing evidence. These examples generally describe facts and circumstances in which there is a high likelihood that the service provider will receive an allocation regardless of the overall success of the business operation, including (i) capped allocations of partnership income if the cap would reasonably be expected to apply in most years, (ii) allocations for a fixed number of years under which the service provider's distributive share of income is reasonably certain, (iii) allocations of gross income items, (iv) an allocation (under a formula or otherwise) that is predominantly fixed in amount, is reasonably determinable under all the facts and circumstances, or is designed to assure that sufficient net profits are highly likely to be available to make the allocation to the service provider (for example, if the partnership agreement provides for an allocation of net profits from specific transactions or accounting periods and this allocation does not depend on the overall success of the enterprise), and (v) arrangements in which a service provider either waives its right to receive payment for the future performance of services in a manner that is non-binding or fails to timely notify the partnership and its partners of the waiver and its terms.

With respect to the fourth example, the presence of certain facts, when coupled with a priority allocation to the service provider that is measured over any accounting period of the partnership of 12 months or less, may create opportunities that will lead to a higher likelihood that sufficient net profits will be available to make the allocation. One fact is that the value of partnership assets is not easily ascertainable and the partnership agreement allows the service provider or a related party in connection with a revaluation to control the determination of asset values, including by controlling events that may affect those values (such as timing of announcements that affect the value of the assets). (See Example 3(iv).) Another fact is that the service provider or a related party controls the entities in which the partnership invests, including controlling the timing and amount of distributions by those controlled entities. (These two facts by themselves do not, however, necessarily establish the absence of significant entrepreneurial risk.) By contrast, certain priority allocations that are intended to equalize a service provider's return with priority allocations already allocated to investing partners over the life of the partnership (commonly known as ''catch-up allocations'') typically will not fall within the types of allocations covered by the fourth example and will not lack significant entrepreneurial risk, although all of the facts and circumstances are considered in making that determination.

With respect to the fifth example, the Treasury Department and the IRS request suggestions regarding fee waiver requirements that sufficiently bind the waiving service provider and that are administrable by the partnership and its partners.

[The preamble then discusses matter described elsewhere.]

B. Secondary Factors

Section 1.707-2(c)(2) through (6) describes additional factors of secondary importance in determining whether or not an arrangement that gives the appearance of significant entrepreneurial risk constitutes a payment for services. The weight given to each of the other factors depends on the particular case, and the absence of a particular factor is not necessarily determinative of whether an arrangement is treated as a payment for services. Four of these factors, described by Congress in the legislative history to section 707(a)(2)(A), are (i) that the service provider holds, or is expected to hold, a transitory partnership interest or a partnership interest for only a short duration, (ii) that the service provider receives an allocation and distribution in a time frame comparable to the time frame that a non-partner service provider would typically receive payment, (iii) that the service provider became a partner primarily to obtain tax benefits which would not have been available if the services were rendered to the partnership in a third party capacity, and (iv) that the value of the service provider's interest in general and continuing partnership profits is small in relation to the allocation and distribution.

To these four factors, the proposed regulations add a fifth factor. The fifth factor is present if the arrangement provides for different allocations or distributions with respect to different services received, where the services are provided either by a single person or by persons that are related under sections 707(b) or 267(b), and the terms of the differing allocations or distributions are subject to levels of entrepreneurial risk that vary significantly. For example, assume that a partnership receives services from both its general partner and from a management company that is related to the general partner under section 707(b). Both the general partner and the management company receive a share in future partnership net profits in exchange for their services. The general partner is entitled to an allocation of 20 percent of net profits and undertakes an enforceable obligation to repay any amounts distributed pursuant to its interest (reduced by reasonable allowance for tax payments made on the general partner's allocable shares of partnership income and gain) that exceed 20 percent of the overall net amount of partnership profits computed over the partnership's life and it is reasonable to anticipate that the general partner can and will comply fully with this obligation. The proposed regulations refer to this type of obligation and similar obligations, as a ''clawback obligation.''[531] In contrast, the management company is entitled to a preferred amount of net income that, once paid, is not subject to a clawback obligation. Because the general partner and the management company are service providers that are related parties under section 707(b), and because the terms of the allocations and distributions to the management company create a significantly lower level of economic risk than the terms for the general partner, the management company's arrangement might properly be treated as a disguised payment for services (depending on all other facts and circumstances, including amount of entrepreneurial risk).

[531] [footnote not in the preamble] For a discussion of clawback obligations, see text accompanying fn 545.

Prop. Reg. § 1.707-2, "Disguised payments for services," provides (a)-(c) as follows:

(a) *In general*. This section prescribes rules for characterizing arrangements as disguised payments for services. Paragraph (b) of this section outlines the elements necessary to characterize an arrangement as a payment for services, and it provides operational rules regarding application and timing of this section. Paragraph (c) of this section identifies the factors that weigh in the determination of whether an arrangement includes the elements described in paragraph (b) of this section that make it appropriate to characterize the arrangement as a payment for services. Paragraph (d) of this section provides examples applying these rules to determine whether an arrangement is a payment for services.

(b) *Elements necessary to characterize arrangements as disguised payments for services*.

(1) *In general*. An arrangement will be treated as a disguised payment for services if-

(i) A person (service provider), either in a partner capacity or in anticipation of becoming a partner, performs services (directly or through its delegate) to or for the benefit of a partnership;

(ii) There is a related direct or indirect allocation and distribution to such service provider; and

(iii) The performance of such services and the allocation and distribution, when viewed together, are properly characterized as a transaction occurring between the partnership and a person acting other than in that person's capacity as a partner.

(2) *Application and timing*.

(i) *Timing and effect of the determination*. Whether an arrangement is properly characterized as a payment for services is determined at the time the arrangement is entered into or modified and without regard to whether the terms of the arrangement require the allocation and distribution to occur in the same taxable year. An arrangement that is treated as a payment for services under this paragraph (b) is treated as a payment for services for all purposes of the Internal Revenue Code, including for example, sections 61, 409A, and 457A (as applicable). The amount paid to a person in consideration for services under this section is treated as a payment for services provided to the partnership, and, when appropriate, the partnership must capitalize these amounts (or otherwise treat such amounts in a manner consistent with their recharacterization). The partnership must also treat the arrangement as a payment to a non-partner in determining the remaining partners' shares of taxable income or loss.

(ii) *Timing of inclusion*. The inclusion of income by the service provider and deduction (if applicable) by the partnership of amounts paid pursuant to an arrangement that is characterized as a payment for services under paragraph (b)(1) of this section is taken into account in the taxable year as required under applicable law by applying all relevant sections of the Internal Revenue Code, including for example, sections 409A and 457A (as applicable), to the allocation and distribution when they occur (or are deemed to occur under all other provisions of the Internal Revenue Code).

(3) *Application of disguised payment rules*. If a person purports to provide services to a partnership in a capacity as a partner or in anticipation of becoming a partner, the rules of this section apply for purposes of determining whether the services were provided in exchange for a disguised payment, even if it is determined after applying the rules of this section that the service provider is not a partner. If after applying the rules of this section, no partnership exists as a result of the service provider failing to become a partner under the arrangement, then the service provider is treated as having provided services directly to the other purported partner.

(c) *Factors considered*. Whether an arrangement constitutes a payment for services (in whole or in part) depends on all of the facts and circumstances. Paragraphs (c)(1) through (6) of this section provide a non-exclusive list of factors that may indicate that an arrangement constitutes (in whole or in part) a payment for services. The presence or absence of a factor is based on all of the facts and circumstances at the time the parties enter into the arrangement (or if the parties modify the arrangement, at the time of the modification). The most important factor is significant entrepreneurial risk as set forth in paragraph (c)(1) of this section. An arrangement that lacks significant entrepreneurial risk constitutes a payment for services. An arrangement that has significant entrepreneurial risk will generally not constitute a payment for services unless other factors establish otherwise. For purposes of making determinations under this paragraph (c), the weight to be given to any particular factor, other than entrepreneurial risk, depends on the particular case and the absence of a factor is not necessarily indicative of whether or not an arrangement is treated as a payment for services.

(1) *The arrangement lacks significant entrepreneurial risk*. Whether an arrangement lacks significant entrepreneurial risk is based on the service provider’s entrepreneurial risk relative to the overall entrepreneurial risk of the partnership. Paragraphs (c)(1)(i) through (v) of this section provide facts and circumstances that create a presumption that an arrangement lacks significant entrepreneurial risk and will be treated as a disguised payment for services unless other facts and circumstances establish the presence of significant entrepreneurial risk by clear and convincing evidence:

(i) Capped allocations of partnership income if the cap is reasonably expected to apply in most years;

(ii) An allocation for one or more years under which the service provider’s share of income is reasonably certain;

(iii) An allocation of gross income;

(iv) An allocation (under a formula or otherwise) that is predominantly fixed in amount, is reasonably determinable under all the facts and circumstances, or is designed to assure that sufficient net profits are highly likely to be available to make the allocation to the service provider (*e.g.* if the partnership agreement provides for an allocation of net profits from specific transactions or accounting periods and this allocation does not depend on the long-term future success of the enterprise); or

(v) An arrangement in which a service provider waives its right to receive payment for the future performance of services in a manner that is non-binding or fails to timely notify the partnership and its partners of the waiver and its terms.

(2) The service provider holds, or is expected to hold, a transitory partnership interest or a partnership interest for only a short duration.

(3) The service provider receives an allocation and distribution in a time frame comparable to the time frame that a non-partner service provider would typically receive payment.

(4) The service provider became a partner primarily to obtain tax benefits that would not have been available if the services were rendered to the partnership in a third party capacity.

(5) The value of the service provider's interest in general and continuing partnership profits is small in relation to the allocation and distribution.

(6) The arrangement provides for different allocations or distributions with respect to different services received, the services are provided either by one person or by persons that are related under sections 707(b) or 267(b), and the terms of the differing allocations or distributions are subject to levels of entrepreneurial risk that vary significantly.

REG-115452-14, "Disguised Payments for Services," part III, describes the examples in Prop. Reg. § 1.707-2(d):

> Section 1.707-2(d) of the proposed regulations contains a number of examples illustrating the application of the factors described in § 1.707-2(c). The examples illustrate the application of these regulations to arrangements that contain certain facts and circumstances that the Treasury Department and the IRS believe demonstrate the existence or absence of significant entrepreneurial risk.
>
> Several of the examples consider arrangements in which a partner agrees to forgo fees for services and also receives a share of future partnership income and gains. The examples consider the application of section 707(a)(2)(A) based on the manner in which the service provider (i) forgoes its right to receive fees, and (ii) is entitled to share in future partnership income and gains. In Examples 5 and 6, the service provider forgoes the right to receive fees in a manner that supports the existence of significant entrepreneurial risk by forgoing its right to receive fees before the period begins and by executing a waiver that is binding, irrevocable, and clearly communicated to the other partners. Similarly, the service provider's arrangement in these examples include the following facts and circumstances that taken together support the existence of significant entrepreneurial risk: The allocation to the service provider is determined out of net profits and is neither highly likely to be available nor reasonably determinable based on all facts

and circumstances available at the time of the arrangement, and the service provider undertakes a clawback obligation and is reasonably expected to be able to comply with that obligation.[532] The presence of each fact described in these examples is not necessarily required to determine that section 707(a)(2)(A) does not apply to an arrangement. However, the absence of certain facts, such as a failure to measure future profits over at least a 12-month period, may suggest that an arrangement constitutes a fee for services.

The proposed regulations also contain examples that consider arrangements to which section 707(a)(2)(A) applies. Example 1 concludes that an arrangement in which a service provider receives a capped amount of partnership allocations and distributions and the cap is likely to apply provides for a disguised payment for services under section 707(a)(2)(A). In Example 3(iii), a service provider is entitled to a share of future partnership net profits, the partnership can allocate net profits from specific transactions or accounting periods, those allocations do not depend on the long-term future success of the enterprise, and a party that is related to the service provider controls the timing of purchases, sales, and distributions. The example concludes that under these facts, the arrangement lacks significant entrepreneurial risk and provides for a disguised payment for services. Example 4 considers similar facts, but assumes that the partnership's assets are publicly traded and are marked-to-market under section 475(f)(1). Under these facts, the example concludes that the arrangement has significant entrepreneurial risk, and thus that section 707(a)(2)(A) does not apply.

Reg. § 1.707-2(d) provides the following examples:

Example (1). Partnership ABC constructed a building that is projected to generate $100,000 of gross income annually. A, an architect, performs services for partnership ABC for which A's normal fee would be $40,000 and contributes cash in an amount equal to the value of a 25 percent interest in the partnership. In exchange, A will receive a 25 percent distributive share for the life of the partnership and a special allocation of $20,000 of partnership gross income for the first two years of the partnership's operations. The ABC partnership agreement satisfies the requirements for economic effect contained in § 1.704-1(b)(2)(ii), including requiring that liquidating distributions are made in accordance with the partners' positive capital account balances. Under paragraph (c) of this section, whether the arrangement is treated as a payment for services depends on the facts and circumstances. The special allocation to A is a capped amount and the cap is reasonably expected to apply. The special allocation is also made out of gross income. Under paragraphs (c)(1)(i) and (iii) of this section, the capped allocations of income and gross income allocations described are presumed to lack significant entrepreneurial risk. No additional facts and circumstances establish otherwise by clear and convincing evidence. Thus, the allocation lacks significant entrepreneurial risk. Accordingly, the arrangement provides for a disguised payment for services as of the date that A and ABC enter into the arrangement and, pursuant to paragraph (b)(2)(ii) of this section, should be included in income by A in the time and manner required under applicable law as determined by applying all relevant sections of the Internal Revenue Code to the arrangement.

[532] [footnote not in the preamble] For a discussion of clawback obligations, see text accompanying fn 545.

Example (2). A, a stock broker, agrees to effect trades for Partnership ABC without the normal brokerage commission. A contributes 51 percent of partnership capital and in exchange, receives a 51 percent interest in residual partnership profits and losses. In addition, A receives a special allocation of gross income that is computed in a manner which approximates its foregone commissions. The special allocation to A is computed by means of a formula similar to a normal brokerage fee and varies with the value and amount of services rendered rather than with the income of the partnership. It is reasonably expected that Partnership ABC will have sufficient gross income to make this allocation. The ABC partnership agreement satisfies the requirements for economic effect contained in § 1.704-1(b)(2)(ii), including requiring that liquidating distributions are made in accordance with the partners' positive capital account balances. Under paragraph (c) of this section, whether the arrangement is treated as a payment for services depends on the facts and circumstances. Under paragraphs (c)(1)(iii) and (iv) of this section, because the allocation is an allocation of gross income and is reasonably determinable under the facts and circumstances, it is presumed to lack significant entrepreneurial risk. No additional facts and circumstances establish otherwise by clear and convincing evidence. Thus, the allocation lacks significant entrepreneurial risk. Accordingly, the arrangement provides for a disguised payment for services as of the date that A and ABC enter into the arrangement and, pursuant to paragraph (b)(2)(ii) of this section, should be included in income by A in the time and manner required under applicable law as determined by applying all relevant sections of the Internal Revenue Code to the arrangement.

Example (3).

(i) M performs services for which a fee would normally be charged to new partnership ABC, an investment partnership that will acquire a portfolio of investment assets that are not readily tradable on an established securities market. M will also contribute $500,000 in exchange for a one percent interest in ABC's capital and profits. In addition to M's one percent interest, M is entitled to receive a priority allocation and distribution of net gain from the sale of any one or more assets during any 12-month accounting period in which the partnership has overall net gain in an amount intended to approximate the fee that would normally be charged for the services M performs. A, a company that controls M, is the general partner of ABC and directs all operations of the partnership consistent with the partnership agreement, including causing ABC to purchase or sell an asset during any accounting period. A also controls the timing of distributions to M including distributions arising from M's priority allocation. Given the nature of the assets in which ABC will invest and A's ability to control the timing of asset dispositions, the amount of partnership net income or gains that will be allocable to M under the ABC partnership agreement is highly likely to be available and reasonably determinable based on all facts and circumstances available upon formation of the partnership. A will be allocated 10 percent of any net profits or net losses of ABC earned over the life of the partnership. A undertakes an enforceable obligation to repay any amounts allocated and distributed pursuant to this interest (reduced by reasonable allowances for tax payments made on A's allocable shares of partnership income and gain) that exceed 10 percent of the overall net amount of partnership profits computed over the life of the partnership (a "clawback obligation").[533] It is reasonable to anticipate that

[533] [footnote not in the Example] For a discussion of clawback obligations, see text accompanying fn 545.

A could and would comply fully with any repayment responsibilities that arise pursuant to this obligation. The ABC partnership agreement satisfies the requirements for economic effect contained in § 1.704-1(b)(2)(ii), including requiring that liquidating distributions are made in accordance with the partners' positive capital account balances.

(ii) Under paragraph (c) of this section, whether A's arrangement is treated as a payment for services in directing ABC's operations depends on the facts and circumstances. The most important factor in this facts and circumstances determination is the presence or absence of significant entrepreneurial risk. The arrangement with respect to A creates significant entrepreneurial risk under paragraph (c)(1) of this section because the allocation to A is of net profits earned over the life of the partnership, the allocation is subject to a clawback obligation and it is reasonable to anticipate that A could and would comply with this obligation,[534] and the allocation is neither reasonably determinable nor highly likely to be available. Additionally, other relevant factors do not establish that the arrangement should be treated as a payment for services. Thus, the arrangement with respect to A does not constitute a payment for services for purposes of paragraph (b)(1) of this section.

(iii) Under paragraph (c) of this section, whether M's arrangement is treated as a payment for services depends on the facts and circumstances. The most important factor in this facts and circumstances determination is the presence or absence of entrepreneurial risk. The priority allocation to M is an allocation of net profit from any 12-month accounting period in which the partnership has net gain, and thus it does not depend on the overall success of the enterprise. Moreover, the sale of the assets by ABC, and hence the timing of recognition of gains and losses, is controlled by A, a company related to M. Taken in combination, the facts indicate that the allocation is reasonably determinable under all the facts and circumstances and that sufficient net profits are highly likely to be available to make the priority allocation to the service provider. As a result, the allocation presumptively lacks significant entrepreneurial risk. No additional facts and circumstances establish otherwise by clear and convincing evidence. Accordingly, the arrangement provides for a disguised payment for services as of the date M and ABC enter into the arrangement and, pursuant to paragraph (b)(2)(ii) of this section, should be included in income by M in the time and manner required under applicable law as determined by applying all relevant sections of the Internal Revenue Code to the arrangement.

(iv) Assume the facts are the same as paragraph (i) of this example, except that the partnership can also fund M's priority allocation and distribution of net gain from the revaluation of any partnership assets pursuant to § 1.704-1(b)(2)(iv)(f). As the general partner of ABC, A controls the timing of events that permit revaluation of partnership assets and assigns values to those assets for purposes of the revaluation. Under paragraph (c) of this section, whether M's arrangement is treated as a payment for services depends on the facts and circumstances. The most important factor in this facts and circumstances determination is the presence or absence of significant entrepreneurial risk. Under this arrangement, the valuation of the assets is controlled by A, a company related to M, and the assets of the company are difficult to value. This fact, taken in combination with the partnership's determination of M's profits by reference to a specified accounting period, causes the

[534] [footnote not in the Example] For a discussion of clawback obligations, see text accompanying fn 545.

allocation to be reasonably determinable under all the facts and circumstances or to ensure that net profits are highly likely to be available to make the priority allocation to the service provider. No additional facts and circumstances establish otherwise by clear and convincing evidence. Accordingly, the arrangement provides for a disguised payment for services as of the date M and ABC enter into the arrangement and, pursuant to paragraph (b)(2)(ii) of this section, should be included in income by M in time and manner required under applicable law as determined by applying all relevant sections of the Internal Revenue Code to the arrangement.

Example (4).

(i) The facts are the same as in Example 3, except that ABC's investment assets are securities that are readily tradable on an established securities market, and ABC is in the trade or business of trading in securities and has validly elected to mark-to-market under section 475(f)(1). In addition, M is entitled to receive a special allocation and distribution of partnership net gain attributable to a specified future 12-month taxable year. Although it is expected that one or more of the partnership's assets will be sold for a gain, it cannot reasonably be predicted whether the partnership will have net profits with respect to its entire portfolio in that 12-month taxable year.

(ii) Under paragraph (c) of this section, whether the arrangement is treated as a payment for services depends on the facts and circumstances. The most important factor in this facts and circumstances determination is the presence or absence of significant entrepreneurial risk. The special allocation to M is allocable out of net profits, the partnership assets have a readily ascertainable market value that is determined at the close of each taxable year, and it cannot reasonably be predicted whether the partnership will have net profits with respect to its entire portfolio for the year to which the special allocation would relate. Accordingly, the special allocation is neither reasonably determinable nor highly likely to be available because the partnership assets have a readily ascertainable fair market value that is determined at the beginning of the year and at the end of the year. Thus, the arrangement does not lack significant entrepreneurial risk under paragraph (c)(1) of this section. Additionally, the facts and circumstances do not establish the presence of other factors that would suggest that the arrangement is properly characterized as a payment for services. Accordingly, the arrangement does not constitute a payment for services under paragraph (b)(1) of this section.

Example (5).

(i) A is a general partner in newly-formed partnership ABC, an investment fund. A is responsible for providing management services to ABC, but has delegated that management function to M, a company controlled by A. Funds that are comparable to ABC commonly require the general partner to contribute capital in an amount equal to one percent of the capital contributed by the limited partners, provide the general partner with an interest in 20 percent of future partnership net income and gains as measured over the life of the fund, and pay the fund manager annually an amount equal to two percent of capital committed by the partners.

(ii) Upon formation of ABC, the partners of ABC execute a partnership agreement with terms that differ from those commonly agreed upon by other comparable funds. The

ABC partnership agreement provides that A will contribute nominal capital to ABC, that ABC will annually pay M an amount equal to one percent of capital committed by the partners, and that A will receive an interest in 20 percent of future partnership net income and gains as measured over the life of the fund. A will also receive an additional interest in future partnership net income and gains determined by a formula (the “Additional Interest”). The parties intend that the estimated present value of the Additional Interest approximately equals the present value of one percent of capital committed by the partners determined annually over the life of the fund. However, the amount of net profits that will be allocable to A under the Additional Interest is neither highly likely to be available nor reasonably determinable based on all facts and circumstances available upon formation of the partnership. A undertakes a clawback obligation, and it is reasonable to anticipate that A could and would comply fully with any repayment responsibilities that arise pursuant to this obligation.[535] The ABC partnership agreement satisfies the requirements for economic effect contained in § 1.704-1(b)(2)(ii), including requiring that liquidating distributions are made in accordance with the partners’ positive capital account balances.

(iii) Under paragraph (c) of this section, whether the arrangement relating to the Additional Interest is treated as a payment for services depends on the facts and circumstances. The most important factor in this facts and circumstances determination is the presence or absence of significant entrepreneurial risk. The arrangement with respect to A creates significant entrepreneurial risk under paragraph (c)(1) of this section because the allocation to A is of net profits, the allocation is subject to a clawback obligation over the life of the fund and it is reasonable to anticipate that A could and would comply with this obligation, and the allocation is neither reasonably determinable nor highly likely to be available. Additionally, the facts and circumstances do not establish the presence of other factors that would suggest that the arrangement is properly characterized as a payment for services. Accordingly, the arrangement does not constitute a payment for services under paragraph (b)(1) of this section.

Example (6).[536]

(i) A is a general partner in limited partnership ABC, an investment fund. A is responsible for providing management services to ABC, but has delegated that management function to M, a company controlled by A. The ABC partnership agreement provides that A must contribute capital in an amount equal to one percent of the capital contributed by the limited partners, that A is entitled to an interest in 20 percent of future partnership net income and gains as measured over the life of the fund, and that M is entitled to receive an annual fee in an amount equal to two percent of capital committed by the partners. The amount of partnership net income or gains that will be allocable to A under the ABC partnership agreement is neither highly likely to be available nor reasonably determinable based on all facts and circumstances available upon formation of the partnership. A also undertakes a

[535] [footnote not in the Example] For a discussion of clawback obligations, see text accompanying fn 545.
[536] [not in proposed regulation] See my commentary in the text accompanying fn 544.

clawback obligation, and it is reasonable to anticipate that A could and would comply fully with any repayment responsibilities that arise pursuant to this obligation.[537]

(ii) ABC's partnership agreement also permits M (as A's appointed delegate) to waive all or a portion of its fee for any year if it provides written notice to the limited partners of ABC at least 60 days prior to the commencement of the partnership taxable year for which the fee is payable. If M elects to waive irrevocably its fee pursuant to this provision, the partnership will, immediately following the commencement of the partnership taxable year for which the fee would have been payable, issue to M an interest determined by a formula in subsequent partnership net income and gains (the "Additional Interest"). The parties intend that the estimated present value of the Additional Interest approximately equals the estimated present value of the fee that was waived. However, the amount of net income or gains that will be allocable to M is neither highly likely to be available nor reasonably determinable based on all facts and circumstances available at the time of the waiver of the fee. The ABC partnership agreement satisfies the requirements for economic effect contained in § 1.704-1(b)(2)(ii), including requiring that liquidating distributions are made in accordance with the partners' positive capital account balances. The partnership agreement also requires ABC to maintain capital accounts pursuant to § 1.704-1(b)(2)(iv) and to revalue partner capital accounts under § 1.704-1(b)(2)(iv)(f) immediately prior to the issuance of the partnership interest to M. M undertakes a clawback obligation, and it is reasonable to anticipate that M could and would comply fully with any repayment responsibilities that arise pursuant to this obligation.[538]

(iii) Under paragraph (c) of this section, whether the arrangements relating to A's 20 percent interest in future partnership net income and gains and M's Additional Interest are treated as payment for services depends on the facts and circumstances. The most important factor in this facts and circumstances determination is the presence or absence of significant entrepreneurial risk. The allocations to A and M do not presumptively lack significant entrepreneurial risk under paragraph (c)(1) of this section because the allocations are based on net profits, the allocations are subject to a clawback obligation over the life of the fund and it is reasonable to anticipate that A and M could and would comply with this obligation, and the allocations are neither reasonably determinable nor highly likely to be available. Additionally, the facts and circumstances do not establish the presence of other factors that would suggest that the arrangement is properly characterized as a payment for services. Accordingly, the arrangements do not constitute payment for services under paragraph (b)(1) of this section.

In the context of a family business, one needs to consider parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning. Whether granting a profits interest might be a deemed transfer of the capital of the family investors has generated debate, and the IRS does not seem to understand the rules.[539] The subtraction method used in applying Code § 2701 includes:[540]

[538] [footnote not in the Example] For a discussion of clawback obligations, see text accompanying fn 545.
[539] See part III.B.7.c.i.(b) CCA 201442053 Discusses Profits Interest in a Partnership That Was a Straight-Up Partnership before the Transfer, criticizing very important errors in the CCA's analysis.
[540] Reg. § 25.2701-3(b)(4)(iv).

> *Reduction for consideration*. The amount of the transfer (determined under section 2701) is reduced by the amount of consideration in money or money's worth received by the transferor, but not in excess of the amount of the gift (determined without regard to section 2701). The value of consideration received by the transferor in the form of an applicable retained interest in the entity is determined under section 2701 except that, in the case of a contribution to capital, the Step 4 value of such an interest is zero.

Furthermore, Reg. § 25.2512-8 discusses when a transfer made for legitimate business purposes might not be treated as a gift, but with an interesting caveat at the end:

> Transfers reached by the gift tax are not confined to those only which, being without a valuable consideration, accord with the common law concept of gifts, but embrace as well sales, exchanges, and other dispositions of property for a consideration to the extent that the value of the property transferred by the donor exceeds the value in money or money's worth of the consideration given therefor. However, a sale, exchange, or other transfer of property made in the ordinary course of business (a transaction which is bona fide, at arm's length, and free from any donative intent), will be considered as made for an adequate and full consideration in money or money's worth…. See also sections 2701, 2702, 2703 and 2704 and the regulations at § 25.2701-0 through 25.2704-3 for special rules for valuing transfers of business interests, transfers in trust, and transfers pursuant to options and purchase agreements.

So, in a family business, one wants to prove that any interest in a partnership for services was purely for business reasons, but uncertainty remains whether Code § 2701 may impute a higher value. Profits interests may be especially desirable when awarded to a C corporation managing an investment partnership.[541] Making a profits interest readily terminable may help reduce gift tax risk, but try to avoid making the service provider's interest seem transitory.[542] Ideally, one should intend for the service provider to manage the partnership permanently, but the service provider must continually prove its value to the partnership or risk being fired. Planning the service provider's cash may be somewhat dicey, in that distributions should not be too predictable, should be tied to the partnership's current and long-term success, subject to being repaid if the partnership does not succeed (a "clawback").[543] Thus, the service provider should be well-capitalized through either capital contributions or access to credit provided by a person other than the partnership. Although the proposed regulations approve a so-called 2-and-20 general partner interest for venture capital, the 2% management fee may produce little or no tax benefit unless converted into an additional partnership interest.[544]

Another challenging aspect to designing a profits interest for a service partner (SP) is the proposed regulations' suggestion that the SP undertake an enforceable obligation to repay any amounts distributed pursuant to its interest (reduced by reasonable allowance for tax payments made on the SP's allocable shares of partnership income and gain) that exceed its percentage

[542] Reg. § 1.707-2(c)(2), which is one of several factors to be considered after determining that the dominant factor, entrepreneurial; risk, is satisfied.

[543] See Prop. Reg. §§ 1.707-2(c)(i)(iv) and 1.707-2(d), Example (3)(iii).

[544] Prop. Reg. 1.707-2(d), Example (6) sets forth this arrangement; see fn 536. The management fee's possible lack of deductibility is described in part II.G.4.n Itemized Deductions; Deductions Disallowed for Purposes of the Alternative Minimum Tax, and neither the management fee nor any investment income on the service provider's K-1 is "qualified business income" eligible for a Code § 199A deduction – see part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.

of the overall net amount of partnership profits computed over the partnership's life and that it be reasonable to anticipate that the SP can and will comply fully with this obligation. The proposed regulations refer to this type of obligation and similar obligations, as a ''clawback obligation.''[545] A clawback is also referred to as a deficit restoration obligation (DRO);[546] although the IRS has attacked certain types of DROs, this type would be respected.[547] Here's an example of how I envision a clawback obligation working:

- In each of year 1 and year 2, SP is allocated $100K of profit/gain and receives $100K cash, for a total cumulative of $200K income/gain and cash.

- Suppose that, in year 3, SP would be allocated $60K loss, based on SP's percentage interest. SP must repay that full $60K, because that is not more than the a total cumulative of $200K income/gain and cash SP has received. In future years, SP's clawback with respect to years 1 and 2 would be limited to the $140K ($200K minus $60K) of income/gain and cash not subjected to clawback in year 3.

- Suppose instead that, in year 3, SP would be allocated $250K loss, based on SP's percentage interest. SP must repay $200K, which is the lesser of the tentative $250K loss allocation or the total cumulative of $200K income/gain and cash in prior years. The $50K excess loss ($250K minus $200K) would be allocated to the other partners. If year 4 were sufficiently profitable, SP's allocation of income/gain would be reduced by $50K. Normally, one would simply reverse the $50K allocated to the other partners. Instead of doing that, we need to give full effect to SP's allocation of $50K of losses. For example, if SP were a 5% partner, then the first $1M income/gain would be allocated to the other partners, consisting of $950K that they normally would have received (95% of $1M) and $50K that SP would have received but needs to be allocated to the other partners instead. That would contrast to the normal drafting of reversing losses, which would have been to allocate the first $50K of income/gain to the other partners, then the remaining $950K (which is $1M minus the $50K special allocation) of income/gain would have been allocated $902.5K to the other partners (95% of $950K) and $47.5K to SP (5% of $950K).

Now, let's take the analysis a step further. The preamble and the proposed regulations refer to the clawback obligation being reduced by a reasonable allowance for tax payments made on the service partner's allocable shares of partnership income and gain.[548] Let's add that to the example above:

- In each of year 1 and year 2, SP is allocated $100K of profit/gain and receives $100K cash, for a total cumulative of $200K income/gain and cash. The partnership agreement requires tax distributions equal to 30% of taxable income, consisting of 20% capital gain tax rate on qualified dividends, 3.8% net investment income tax, state income tax, and the fact that some income is ordinary income other than qualified dividends and some capital gain may

---

[545] A clawback obligation is described in the preamble in the text accompanying fn 531 and in Prop. Reg. § 1.707-2(d), Example 3(i), which is reproduced in the text accompanying fn 533. Other references to a clawback obligation are in the text accompanying fns 532, 534, 535, 537, and 538.
[546] See the paragraph of text accompanying fns 3813-3814 in part II.P.1.a.i.(a) General Rules for Allocations of Income in Partnerships and accompanying fns 421-422 in part II.C.3.c.ii.(b) 1/18/2017-10/13/2019 Temporary Rules Allocating Economic Risk of Loss to Recourse Liabilities.
[547] See text accompanying fns 423-425 in part II.C.3.c.ii.(b) 1/18/2017-10/13/2019 Temporary Rules Allocating Economic Risk of Loss to Recourse Liabilities.
[548] See the preamble in the text accompanying fn 531 and Prop. Reg. § 1.707-2(d), Example 3(i), which is reproduced in the text accompanying fn 533.

be short-term. Thus, of the cumulative $200K of distributions, $60K (30% of $200K cumulative taxable income) constitutes tax distributions and $140K constitutes other distributions.

- Suppose that, in year 3, SP would be allocated $60K loss, based on SP's percentage interest. SP must repay that full $60K, because that is not more than the a total cumulative of $140K income/gain and cash SP has received in excess of tax distributions. In future years, SP's clawback with respect to years 1 and 2 would be limited to the $80K ($140K minus $60K) of income/gain and cash in excess of tax distributions not subjected to clawback in year 3.

- Suppose instead that, in year 3, SP would be allocated $190K loss, based on SP's percentage interest. SP must repay $140K, which is the lesser of the tentative $190K loss allocation or the total cumulative of $140K income/gain and cash in prior years in excess of tax distributions. The $50K excess loss ($190K minus $140K) would be allocated to the other partners. If year 4 were sufficiently profitable, SP's allocation of income/gain would be reduced by $50K. Normally, one would simply reverse the $50K allocated to the other partners. Instead of doing that, we need to give full effect to SP's allocation of $50K of losses. For example, if SP were a 5% partner, then the first $1M income/gain would be allocated to the other partners, consisting of $950K that they normally would have received (95% of $1M) and $50K that SP would have received but needs to be allocated to the other partners instead. That would contrast to the normal drafting of reversing losses, which would have been to allocate the first $50K of income/gain to the other partners, then the remaining $950K (which is $1M minus the $50K special allocation) of income/gain would have been allocated $902.5K to the other partners (95% of $950K) and $47.5K to SP (5% of $950K).

Given that the proposed regulations and their preamble emphasize entrepreneurial risk and express concern above a service provider's ability to manipulate income to generate payments, consider limiting distributions to the cumulative realized and unrealized gains and losses and impose a clawback with respect to not only realized but also unrealized losses.

For how to apply these rules in the context of an investment partnership, see the text following the text accompanying fn 1375 in part II.G.4.l.i.(e) Family Office as a Trade or Business.

Lipton, "Proposed Regulations Issued on Disguised Payments for Services to a Partnership," *Journal of Taxation* (Feb. 2016), criticized certain aspects of Prop. Reg. § 1.707-2, especially certain aspects governing preferred returns [footnote omitted]:

> In the preamble to the proposed regulations, concerning the application of Section 707(a) to a partner who provides services to a partnership, the IRS specifically requested comments concerning a topic totally unrelated to the remainder of the proposed regulations. Specifically, the IRS asked questions about the treatment of preferred returns in situations in which the partnership agreement provides for targeted capital accounts. The IRS implied that it believes that gross items must be allocated to a partner who is entitled to receive a preferred return (the preferred return partner) even if the partnership agreement provides only for allocations of net income.

The IRS stated as follows:

> The Treasury Department and the IRS have become aware that some partnerships that assert reliance on § 1.704-1(b)(2)(ii)(i) (the economic effect equivalence rule) have expressed uncertainty on the proper treatment of partners who receive an increased right to share in partnership property upon a partnership liquidation without respect to the partnership's net income. These partnerships typically set forth each partner's distribution rights upon a liquidation of the partnership and require the partnership to allocate net income annually in a manner that causes partners' capital accounts to match partnership distribution rights to the extent possible. Such agreements are commonly referred to as "targeted capital account agreements." Some taxpayers have expressed uncertainty whether a partnership with a targeted capital account agreement must allocate income or a guaranteed payment to a partner who has an increased right to partnership assets determined as if the partnership liquidated at the end of the year even in the event that the partnership recognizes no, or insufficient, net income. The Treasury Department and the IRS generally believe that existing rules under §§ 1.704–1(b)(2)(ii) and 1.707-1(c) address this circumstance by requiring partner capital accounts to reflect the partner's distribution rights as if the partnership liquidated at the end of the taxable year, but request comments on specific issues and examples with respect to which further guidance would be helpful. No inference is intended as to whether and when targeted capital account agreements could satisfy the economic effect equivalence rule.

The IRS obviously believes that an annual allocation of gross items of income (or a deemed guaranteed payment) is required in this situation, notwithstanding that the partnership agreement does not provide for such an allocation. This approach is wrong.

Everyone agrees that if a partnership agreement provides for an allocation of gross items of income to the partner who is entitled to a preferred return, such items must be allocated to the preferred return partner whether or not the partnership has net income, assuming that the partnership has gross items of income. However, if the partnership agreement provides only for an allocation of net income to the preferred return partner, the question asked by the IRS is whether the parties' agreement should be ignored and items of gross income must be allocated to the preferred return partner in any event because of the target final balance provision in the partnership agreement.

Of course, Section 704(b) provides that the allocations set forth in a partnership agreement must be respected if such allocations have substantial economic effect. The "net income limitation" means that income will not be allocated to the preferred return partner until there is any net income. If there is no net income, the preferred return partner is not entitled to receive any allocation of net income.

The concern when a partnership agreement contains a targeted capital account provision is that upon liquidation, assets will be distributed according to the distribution waterfall. In that case, even if there is no net income, assets will be distributed to the preferred return partner to reflect its preferred return, so that the assets of the partnership are economically shifting in favor of the preferred return partner over time, whether or not there is net income, because the partnership's assets will be distributed first to the preferred return partner. In essence, the issue is whether the preferred return provided in the partnership agreement, when combined with the targeted capital account provisions, necessitates annual allocations of gross items of income to the preferred return partner.

A simple example illustrates this problem. Jane contributes Blackacre, which is vacant land worth $1 million, to the JB partnership; Boris contributes $1 million in cash which will be used for future development of Blackacre. The partnership agreement provides that Boris is supposed to receive a preferred return equal to 5% of his contributed cash per annum, or $50,000 per year. Upon liquidation of the partnership, Boris is to receive back his contributed capital plus his return before distributions are made to Jane (who receives the next $1 million), with distributions thereafter being shared equally.

The view expressed by the IRS is that Boris should be allocated gross income of $50,000 per year to reflect his liquidation preference, even if the partnership has no net income. This allocation appears to assume that the partnership has gross items of income that can be allocated to Boris, which is not true in the hypothetical, because there were no gross items of income at all. Although Boris is “entitled” to receive a preferred return, until money is available for distribution, he will not know the amount (if any) that he will receive. For example, if Blackacre becomes totally worthless (an environmental problem arises), Boris will be lucky to get back his $1 million, let alone a preferred return. Thus, it seems that in situations in which there is no gross income, it would not make sense to allocate a guaranteed payment to the partner who is scheduled to receive a preferred return because there is no certainty that the preferred return will be paid.

This result should not change merely because the partnership has gross items of income. Change the facts in the above example, and assume that there is $50,000 per year of rent received for Blackacre and also $50,000 of taxes paid, so that the JB partnership has no net income to allocate to Boris. An allocation of gross items of income to Boris does not reflect the fact that his preferred return will be paid, if at all, from the value of the property held by the partnership and not from its gross income. Again, if Blackacre is worthless at the time of liquidation of the partnership, Boris will not receive a single penny of his preferred return. Any focus on items of gross income when there is no net income misses the fundamental point, which is that the preferred return will not be paid unless the partnership has sufficient assets upon liquidation.

This is all a matter of timing . Under the view expressed by the IRS in the preamble to the proposed regulations, the partner who is slated to receive a preferred return must accrue income annually to reflect the possibility that the preferred return will eventually be paid - if it is not paid, presumably the preferred return partner would recognize a loss on liquidation of the partnership. In other words, the value of assets is deemed to shift in favor of the preferred return partner, even if no such shifting is actually occurring. The presumption that the preferred return will eventually be paid is just an assumption that often would not be correct. In the event a payment is actually made, if the partner who received the preferred return does not receive a matching allocation of net income at that time, the amount paid in excess of net income should be treated as a guaranteed payment. As a result, the partner will always have income with respect to payments received, and the timing of the income and payment will be the same.

The fundamental flaw in the question raised by the IRS is the assumption that the partners know that the preferred return will be paid and a partnership will always have sufficient assets to pay the preferred return. If the value of all assets held by partnerships only increased, or never declined, so that there would always be assets available to satisfy the preferred return, the question posed by the IRS might be an accurate one. However, as everyone witnessed during the Great Recession, assets can go up in value as well as down. For example, assume that instead of contributing Blackacre, Jane contributed shares of Lehman Brothers to the JB partnership in 2000; by 2009 it was obvious that Boris would never receive a single penny of his preferred return. However, under the construct suggested by the IRS, the fact that the partnership agreement provided for target final balances means that Boris would have been required to accrue income each year from 2000 through 2009, even though the JB partnership would never have assets to pay him his preferred return.

Any guidance would also have to address the fact that the annual allocations of income would likely be treated as ordinary income, whereas the loss on liquidation of the partner's interest would be a capital loss. It also must address the fact that requiring annual allocations in favor of the preferred return partner could lead to allocations that have no economic effect, because it will not be known until liquidation whether or not the preferred return will actually be paid. The IRS asked whether a failure to include an annual allocation of gross items would lack substantial economic effect, but perhaps the IRS should have asked whether an allocation of gross items not provided for in the partnership agreement would lack substantial economic effect until it was certain that the preferred return would be paid. The regulations under Section 704(b) should not be interpreted to require a partner to recognize income unless and until it is clear that an income recognition event will occur.

Moving past the question of whether an allocation is merely a disguised payment, timing is also important. Code § 707(a)(2) compensation is income to the service provider when paid. A partner must include a Code § 707(c) guaranteed payment "as ordinary income for his taxable year within or with which ends the partnership taxable year in which the partnership" accounted for the payment under its method of accounting.[549] Thus, the characterization between the two can make a big difference in timing.[550]

Compensation payments are reported on the Schedule K-1 that the partnership issues to the partner. Issuing Form W-2 that applies to employees violates the regulations governing FICA;[551] whether a partner is eligible for certain tax exclusions for fringe benefits afforded

[549] Reg. § 1.707-1(c), which continues, "See section 706(a) and paragraph (a) of § 1.706-1."
[550] *Herrmann v. U.S.*, 119 A.F.T.R.2d 2017-2273 (Ct. Fed Cl. 6/21/2017), held that a person who was a partner merely to comply with local (United Kingdom) employment laws, the partnership was merely a conduit for flowing through compensation payments, and the taxpayer's compensation was wildly disproportionate to the taxpayer's percentage of capital, compensation paid to the taxpayer was taxable under Code § 707(a)(2) when received; it is possible that the taxpayer was not really a partner, but the court declined to rule on that, because in either case the taxpayer was taxed as an independent contractor. The case was sympathetic in that the partnership did not provide information to the taxpayer notwithstanding the taxpayer's diligent efforts when the taxpayer's very reputable tax preparer worked on the returns; furthermore, the taxpayer was compensated the same as when she was an employee in the U.S. and viewed the arrangements the same when moving to the U.K., the move being not intended as a change in relationship to the employer but rather merely giving the taxpayer access to better resources to do her job (which she did very well – the timing of over $18 million in compensation was at issue.)
[551] Rev. Rul. 69-184 (Rev. Rul. 91-26, which was clarified by Ann. 92-16, applied this rule to fringe benefits of greater-than-2% owners of S corporations); Reg. § 1.707-1(c) ("…a partner who receives guaranteed payments is not regarded as an employee of the partnership for the purposes of withholding

employees has been a matter of debate.[552] The government was exploring the issue of issuing W-2s to partners in 2014 and perhaps later, in an effort to be flexible to businesses.[553] However, given that reclassifying guaranteed payments as wages would help support a Code § 199A deduction with respect to those receiving a distributive share of profits,[554] I am skeptical. Guidance issued in 2016 clarified that a disregarded LLC being treated as an employer for employment taxes does not change the factor that a partner in the LLC's partnership owner is not treated as an employee for federal tax purposes.[555] The government

---

of tax at source, deferred compensation plans, etc."); Reg § 1.1402(a)-1(b); *Grubb v. Commissioner*, T.C. Memo. 1990-425; *Riether v. U.S.*, 919 F.Supp.2d 1140 (D. NM 2012) (reporting on Form W-2 was incorrect, but IRS did not complain so no consequence; remaining distributive share of income was subject to self-employment tax; 20% accuracy-related underpayment penalty applied because taxpayers did not receive a communication about self-employment tax from a professional that sets forth the professional's analysis or conclusion under Reg. § 1.6664-4(b)(1)); see fn. 3473 in part II.L.4 Self-Employment Tax Exclusion for Limited Partners' Distributive Share. For a laundry list of problems when partnership compensation is reported on Form W-2, see fn. 563 and accompanying text in part II.C.8.b Consequences of Incorrectly Reporting Partner Compensation on a W-2 Instead of As a Guaranteed Payment. See Brock, "Partners as Employees? Properly Reporting Partner Compensation," *The Tax Advisor* (11/1/2013); Banoff's and Lipton's Shop Talk column, "LLC Member Who Provides Services: Partner, Employee, or Both?" *Journal of Taxation* (July 2014) (concluding that a tax partner is still a tax partner, even if the IRS does not challenge his W-2 reporting (and withholding), as occurred in *Riether*.); and Griffith, "Passthrough Partner: Partners and W-2 Employee Status," *Taxes* (CCH) (2/2015).

552 Courts differ on whether fringe benefits paid to a partner are eligible for exclusions afforded to employees. *Armstrong v. Phinney*, 394 F.2d 661 (5th Cir. 1961) (see fn. 3896 In part II.P.2 C Corporation Advantage Regarding Fringe Benefits, held that the enactment of Code § 707(a), allowing partners to act in a non-partner capacity, superseded the aggregate approach adopted by courts under the Internal Revenue Code of 1939, refusing to follow *Wilson v. U.S.*, 376 F.2d 280 (Ct. Cl. 1967) (denying a Code § 119 exclusion for meals and lodging for the employer's convenience) because Wilson had not considered Code § 707(a). *Zahler v. Commissioner*, T.C. Memo 1981-112, denied a Code § 119 exclusion to a commission salesman who was acting in his capacity as a partner; a similar result applied to an S corporation owner in *Dilts v. U.S.*, 845 F. Supp. 1505 (D. Wyo. 1994). See also McKee, Nelson & Whitmire, *Federal Taxation of Partnerships & Partners*, ¶ 14.02[4][b] Collateral Consequences of Section 707(a) Treatment; Willis & Postlewaite, *Partnership Taxation*, ¶ 11.03[5] Treatment of Guaranteed Payments Under Other Code Provisions; Bishop & Kleinberger, *Limited Liability Companies: Tax and Business Law*, ¶ 4.11 Availability of Fringe Benefits; and Bittker & Lokken, *Federal Taxation of Income, Estates, and Gifts*, ¶ 63.6.4 Qualified Recipients [of Code § 119 payments], ¶ 89.1.2 Guaranteed Payments, and ¶ 89.1.3 Transactions in Nonpartner Capacity Generally.

553 On December 15, 2014, the LLC/LLP Subcommittee of the Partnerships & LLCs Committee of the Section of Taxation of the American Bar Association (which is working with the Section's Employee Benefits Committee) solicited volunteers to explore this area and comment to the government on issues to consider in any guidance it might issue.

554 See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

555 See fn 3447 in part II.L.3 Self-Employment Tax: General Partner or Sole Proprietor. Look at (iii) in Reg. § 301.7701-2(c)(2)(iv)(D):

> *Example*. The following example illustrates the application of paragraph (c)(2)(iv) of this section:
>
> (i) LLCA is an eligible entity owned by individual A and is generally disregarded as an entity separate from its owner for Federal tax purposes. However, LLCA is treated as an entity separate from its owner for purposes of subtitle C of the Internal Revenue Code. LLCA has employees and pays wages as defined in sections 3121(a), 3306(b), and 3401(a).
>
> (ii) LLCA is subject to the provisions of subtitle C of the Internal Revenue Code and related provisions under 26 CFR subchapter C, Employment Taxes and Collection of Income Tax at Source, parts 31 through 39. Accordingly, LLCA is required to perform such acts as are required of an employer under those provisions of the Internal Revenue Code and regulations

declined to clarify what happens for tiered partnerships;[556] for example, a partner in a partnership should be able to be an employee in another partnership that is also a partner in the partnership. For example, suppose that Partnership P owns 95% of Partnership S, and A is an

---

thereunder that apply. All provisions of law (including penalties) and the regulations prescribed in pursuance of law applicable to employers in respect of such acts are applicable to LLCA. Thus, for example, LLCA is liable for income tax withholding, Federal Insurance Contributions Act (FICA) taxes, and Federal Unemployment Tax Act (FUTA) taxes. See sections 3402 and 3403 (relating to income tax withholding); 3102(b) and 3111 (relating to FICA taxes), and 3301 (relating to FUTA taxes). In addition, LLCA must file under its name and EIN the applicable Forms in the 94X series, for example, Form 941, "Employer's Quarterly Employment Tax Return," Form 940, "Employer's Annual Federal Unemployment Tax Return;" file with the Social Security Administration and furnish to LLCA's employees statements on Forms W-2, "Wage and Tax Statement;" and make timely employment tax deposits. See §§ 31.6011(a)-1, 31.6011(a)-3, 31.6051-1, 31.6051-2, and 31.6302-1 of this chapter.

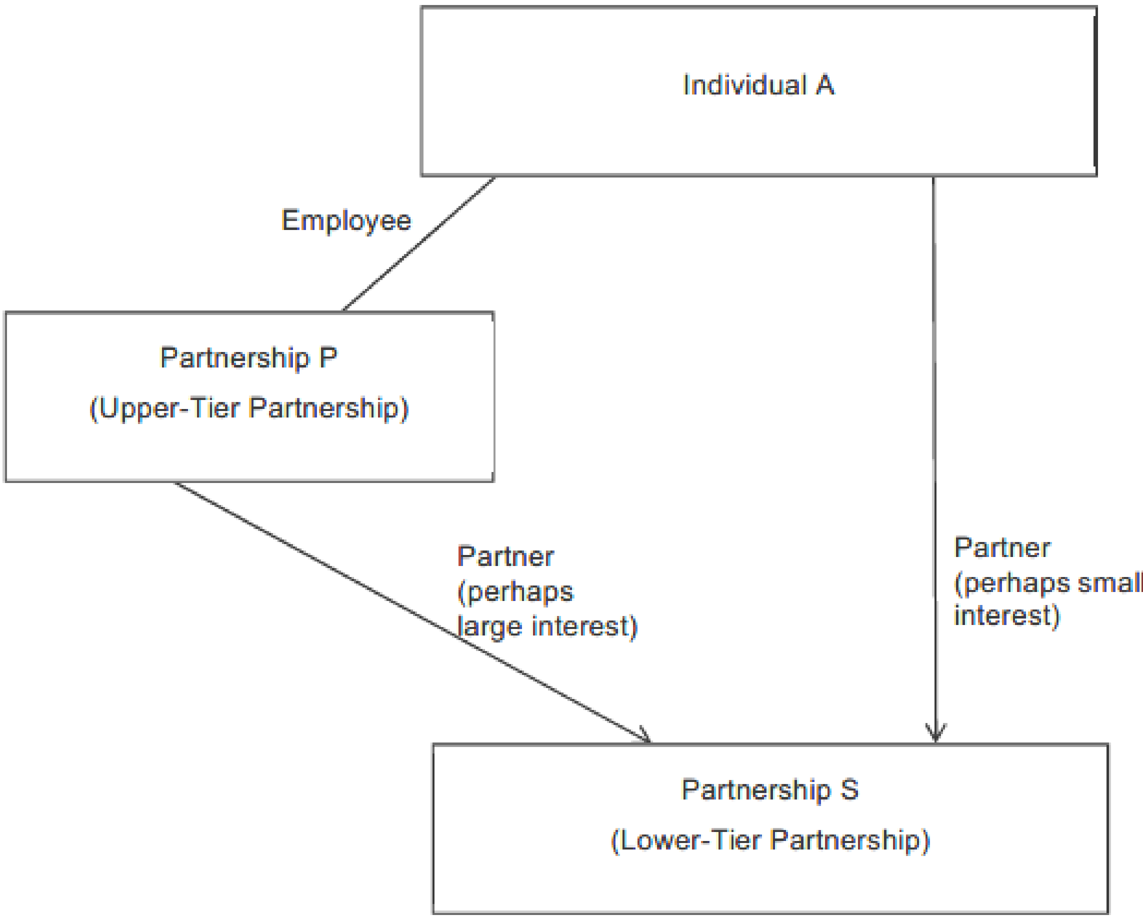
(iii) A is self-employed for purposes of subtitle A, chapter 2, Tax on Self-Employment Income, of the Internal Revenue Code. Thus, A is subject to tax under section 1401 on A's net earnings from self-employment with respect to LLCA's activities. A is not an employee of LLCA for purposes of subtitle C of the Internal Revenue Code. Because LLCA is treated as a sole proprietorship of A for income tax purposes, A is entitled to deduct trade or business expenses paid or incurred with respect to activities carried on through LLCA, including the employer's share of employment taxes imposed under sections 3111 and 3301, on A's Form 1040, Schedule C, "Profit or Loss for Business (Sole Proprietorship)."

[556] T.D. 9766 (5/4/2016) said:

> While these temporary regulations provide that a disregarded entity owned by a partnership is not treated as a corporation for purposes of employing any partner of the partnership, these regulations do not address the application of Rev. Rul. 69-184 in tiered partnership situations. Several commenters have requested that the IRS provide additional guidance on the application of Rev. Rul. 69-184 to tiered partnership situations, and have also suggested modifying the holding of Rev. Rul. 69-184 to allow partnerships to treat partners as employees in certain circumstances, such as, for example, employees in a partnership who obtain a small ownership interest in the partnership as an employee compensatory award or incentive. However, these commenters have not provided detailed analyses and suggestions as to how the employee benefit and employment tax rules would apply in such situations. The Treasury Department and the IRS request comments on the appropriate application of the principles of Rev. Rul. 69-184 to tiered partnership situations, the circumstances in which it may be appropriate to permit partners to also be employees of the partnership, and the impact on employee benefit plans (including, but not limited to, qualified retirement plans, health and welfare plans, and fringe benefit plans) and on employment taxes if Rev. Rul. 69-184 were to be modified to permit partners to also be employees in certain circumstances.

Given that T.D. 9766 applied prospectively, presumably any change regarding tiered partnerships would also be prospective. See fn 3447 in part II.L.3 Self-Employment Tax: General Partner or Sole Proprietor, in which T.D. 9869 (7/2/2019) commented that the treatment of a partner in a tiered partnership is still open.

individual who owns the other 5% of Partnership S. A cannot be an employee of Partnership S, because A is a partner in Partnership S. However, A can be an employee of Partnership P:



Of course, if A worked exclusively for Partnership S and Partnership P merely acted as a conduit through which Partnership S compensated A, then Partnership S might be considered the true payor of compensation, recharacterizing payments to A as those to a partner. The IRS took a similar position in CCA 201916004, which asserted that running a partner's compensation through a Certified Professional Employer Organization (CPEO) does not convert the compensation to wages; rather, the CPEO needs to use Form 1099-MISC to report that compensation.[557] Even if payments to A in the above example are not recharacterized under the principles of CCA 201916004, they will not constitute W-2 wages under Code § 199A, because Partnership P's receipt of a management fee from Partnership S does not constitute qualified business income, making any W-2 wages incurred in generating that management fee be ineligible for providing W-2 credit under Code § 199A.[558]

[557] Citing Code § 3511(c) (providing that a CPEO is not treated as an employer of a self-employed individual) and Prop. Regs. §§ 31.3511-1(f)(2) and 301.7705-1(b)(14).
[558] See part II.E.5.c.ii Code § 199A Deduction under Recommended Structure, especially the text accompanying fns 1076-1079.

An alternative way to avoid being a partner in the main partnership is described in part II.L.5.a S Corporation Blocker Generally, an idea with which I am not particularly enamored.[559]

Not being considered an employee, a partner nevertheless may remain in the Social Security system, with guaranteed payments often subjected to self-employment tax.[560]

Guaranteed payments do not constitute an interest in partnership profits for purposes of Code §§ 706(b)(3), 707(b),[561] and 708(b). Reg. § 1.707-1(c), which continues:

> For the purposes of other provisions of the internal revenue laws, guaranteed payments are regarded as a partner's distributive share of ordinary income. Thus, a partner who receives guaranteed payments for a period during which he is absent from work because of personal injuries or sickness is not entitled to exclude such payments from his gross income under section 105(d). Similarly, a partner who receives guaranteed payments is not regarded as an employee of the partnership for the purposes of withholding of tax at source, deferred compensation plans, etc.

If the service provider is a family member, consider part III.B.7.c Code § 2701 Interaction with Income Tax Planning.

II.C.8.b. Consequences of Incorrectly Reporting Partner Compensation on a W-2 Instead of As a Guaranteed Payment

Although reporting compensation income to a partner on Form W-2 might seem to be harmless error,[562] consequences include:[563]

- Timely filing Forms W-2 helps support the 20% deduction related to qualified business income ("QBI") for owners of partnerships,[564] but W-2 income itself does not constitute QBI.[565] Thus, misclassifying partner compensation as W-2 wages could overstate the QBI-related deduction. Furthermore,

- The safe harbor for the nontaxable issuance of profits interests, Rev. Proc. 2001-43,[566] might not apply.

[560] See part II.L.3 Self-Employment Tax: General Partner or Sole Proprietor, fns. 3452-3454.
[561] For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.
[562] There is no basis for reporting compensation income to a partner on Form W-2. See fn 551.
[563] Brock, "Treating Partners as Employees: Risks to Consider," *Journal of Accountancy*, pp. 55-59 (August 2014); see Griffith, "Passthrough Partner: Partners and W-2 Employee Status," *Taxes* (CCH) (2/2015). See also fn. 551 for authority in this area. On December 15, 2014, the LLC/LLP Subcommittee of the Partnerships & LLCs Committee of the Section of Taxation of the American Bar Association (which was working with the Section's Employee Benefits Committee) solicited volunteers to explore this area and comment to the government on issues to consider in any guidance it might issue.
[564] See part II.E.1.c.vi.(a) W-2 wages under Code § 199A, especially fns 891-892 and the text following them.
[565] See parts II.E.1.c.ii.(b) Trade or Business of Being an Employee (Excluded from QBI) and II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.
[566] See part II.M.4.f Issuing a Profits Interest to a Service Provider.

- Cafeteria plans might be disqualified, because partners cannot participate.[567]

- FICA taxes might be underpaid (due to timing issues) or overpaid. The partnership's FICA tax deduction might be overstated, because the partnership paid FICA for partners for whom it should not have paid FICA.

- The Code § 199 deduction for domestic production activities might be miscalculated, because Form W-2 income cannot properly include partner compensation.[568] This deduction has been repealed, effective taxable years beginning after December 31, 2017. However, the Code § 199A deduction for qualified business income is limited by W-2 wages if the taxpayer claiming the deduction has taxable income above certain thresholds, so a similar concern remains.[569]

- Although guaranteed payments to partners for services might not be required to be capitalized under Code § 263A, Form W-2 wages must be capitalized.

- State tax apportionment, which can use a payroll factor, might be distorted.

- Income tax exclusions for benefits do not apply to partners, and the partnership's benefit reporting might mistakenly omit amounts taxable to the partner/former employee.[570]

- Bonuses paid after yearend are guaranteed payments deductible to the partnership and taxable to the partner in the current year[571] but might be incorrectly deferred to the next year.

- A person who has losses from self-employment in other activities can reduce FICA by offsetting those losses against self-employment income, but the losses would not reduce Form W-2 wages subject to FICA.

- A person with unreimbursed business expenses from Form W-2 employment treats them as miscellaneous itemized deductions, subject to various haircuts as well as complete disallow for alternative minimum tax purposes, whereas a partner can deduct them in full (if not reimbursable under the partnership agreement).

- If the person has an interest in profits/losses, the person will get a K-1 and be subject to partnership income tax complexity notwithstanding the treatment of wages.

- If the company goes out of business and has failed to pay the withholding to the government, the person from whom the withholdings occurred will not get credit for having paid the tax withheld if the person is a partner (but will get credit if the person is an employee); it would have been better to have received the payment in full and then pay the taxes individually.

- Because such a position has no reasonable basis, the preparer will violate ethical rules. If a client sues for malpractice as a result of any harm, the lawsuit might be impossible to defend.

Local governments that impose a payroll tax might tax partner compensation as wages.[572]

II.C.9. When Is a Partner in Form Not a Partner in Substance?

For whether an arrangement that does not call itself a partnership nevertheless is properly characterized as a partnership, see part II.C.10 Whether Tenancy-in-Common or other Arrangement Constitutes a Partnership.

Commissioner v. Culbertson, 337 U.S. 733 (1949), discussed *Commissioner v. Tower*, 327 U.S. 280 (1946):[573]

> The question is not whether the services or capital contributed by a partner are of sufficient importance to meet some objective standard supposedly established by the Tower case, but whether, considering all the facts—the agreement, the conduct of the parties in execution of its provisions, their statements, the testimony of disinterested persons, the relationship of the parties, their respective abilities and capital contributions, the actual control of income and the purposes for which it is used, and any other facts throwing light on their true intent—the parties in good faith and acting with a business purpose intended to join together in the present conduct of the enterprise.

Historic Boardwalk Hall, LLC v. Commissioner, 694 F.3d 425 (3rd Cir. 2012),[574] dealt with a partnership formed to award tax credits to investors:

> This case involves the availability of federal historic rehabilitation tax credits ("HRTCs") in connection with the restoration of an iconic venue known as the "East Hall" (also known as "Historic Boardwalk Hall"), located on the boardwalk in Atlantic City, New Jersey. The New Jersey Sports and Exposition Authority ("NJSEA"), a state agency which owned a leasehold interest in the East Hall, was tasked with restoring it. After learning of the market for HRTCs among corporate investors, and of the additional revenue which that market could bring to the state through a syndicated partnership with one or more investors, NJSEA created a New Jersey limited liability company, Historic Boardwalk Hall, LLC ("HBH"), and subsequently sold a membership interest in HBH[1] to a wholly-owned subsidiary of Pitney Bowes, Inc. ("PB").[2] Through a series of agreements, the transactions that were executed to admit PB as a member of HBH and to transfer ownership of NJSEA's property interest in the East Hall to HBH were designed so that PB could earn the HRTCs generated from the East Hall rehabilitation. The Internal Revenue Service ("IRS") determined that HBH was simply a vehicle to impermissibly transfer HRTCs from NJSEA to PB and that all HRTCs taken by PB should be reallocated to NJSEA.[3] The Tax Court disagreed, and sustained the allocation of the HRTCs to PB through its membership interest in HBH. Because we agree with the IRS's

---

[572] See "California State Court of Appeals Holds Payroll Expense Tax Applies To Partnership Distributions to Law Firm's Equity Partners," *TM Real Estate Journal* (BNA), Vol. 31, No. 03 (3/4/2015).
[573] The quote concluded with a footnote reproducing the IRS' stated general position on partnerships.
[574] Rehearing denied 10/22/2012; cert. denied 5/28/2013.

contention that PB, in substance, was not a bona fide partner in HBH, we will reverse the decision of the Tax Court.

[1] An LLC "offers the best of both worlds - the limited liability of a corporation and the favorable tax treatment of a partnership." *Canterbury Holdings, LLC v. Comm'r*, 98 T.C.M. (CCH) 60, 61 n.1 (2009). Generally, an LLC is a pass-through entity that does not pay federal income tax. See I.R.C. § 701; Treas. Reg. § 301.7701-3(a). Rather, profits and losses "pass through" the LLC to its owners, called members, who pay individual income tax on their allocable shares of the tax items. See I.R.C. §§ 701-04, 6031. Although an LLC with just one owner is, for tax purposes, disregarded as an entity separate from its owner for tax purposes, an LLC with two or more members is classified as a partnership for tax purposes unless it elects to be treated as a corporation. Treas. Reg. § 301.7701-3(b)(1). Once HBH, as a duly formed New Jersey limited liability company, had two members, it did not elect to be treated as a corporation and thus was classified as a partnership for tax purposes for the tax years in which it had more than one member. Thus, as the parties do, we refer to HBH as a partnership when analyzing whether one of its stated members was a bona fide partner.

[2] PB's membership interest in HBH was through PB Historic Renovations, LLC, whose sole member was Pitney Bowes Credit Corp. At all relevant times, Pitney Bowes Credit Corp. was a wholly-owned subsidiary of PB. For ease of reference, we will refer to PB Historic Renovations, LLC, Pitney Bowes Credit Corp., and PB as "PB."

[3] The alphabet-soup of acronyms in this case is perhaps beyond parody, but the acronyms are a more efficient means of referring to various corporate and state entities, as well as the tax credits and other concepts, so we reluctantly fall into the soup.

The Third Circuit explained its conclusion:

… While the Commissioner raises several arguments in his effort to reallocate the HRTCs from NJSEA to PB, we focus primarily on his contention that PB should not be treated as a bona fide partner in HBH because PB did not have a meaningful stake in the success or failure of the partnership.[50] We agree that PB was not a bona fide partner in HBH.

[50] The Commissioner also contends that HBH was a sham. Specifically, the Commissioner invokes a "sham-partnership theory," which he says is "a variant of the economic-substance (sham-transaction) doctrine." (Appellant's Opening Br. at 50.) That theory, according to the Commissioner "focus[es] on (1) whether the formation of the partnership made sense from an economic standpoint, as would be the case [under the *Culbertson* inquiry], and (2) whether there was otherwise a legitimate business purpose for the use of the partnership form." (*Id*.)

HBH contends that the IRS's sham-partnership theory, which HBH asserts is "merely a rehash of the factual claims that [the IRS] made in challenging [PB's] status as a partner in HBH," is distinct from the sham-transaction doctrine (also known as the economic substance doctrine) that was litigated before the Tax Court. Amicus Real Estate Roundtable (the "Roundtable") agrees, submitting that the Commissioner's sham-partnership argument "inappropriately blur[s] the line between the [economic substance doctrine] and the [substance-over-form doctrine]," the latter of which applies when the form of a transaction is not the same as its economic reality. (Roundtable Br. at 7.) The point is well-taken, as the economic substance doctrine and the substance-over-form doctrine certainly "are distinct." *Neonatology Assocs., P.A. v. Comm'r*, 299 F.3d 221, 230 n.12 (3d Cir. 2002); see generally *Rogers v. United States*, 281 F.3d 1108, 1115-17 (10th Cir. 2002) (noting differences between the substance-over-form doctrine and the economic substance doctrine). The substance-over-form doctrine "is applicable to instances where the "substance" of a particular transaction produces tax results inconsistent with the "form" embodied in the underlying documentation, permitting a court to recharacterize the transaction in accordance with its substance." *Neonatology Assocs.*, 299 F.3d at 230 n.12. On the other hand, the economic substance doctrine "applies where the economic or business purpose of a transaction is relatively insignificant in relation to the comparatively large tax benefits that accrue." *Id.*

As the Roundtable correctly explains, "[t]he fact that [a] taxpayer might not be viewed as a partner (under the [substance-over-form doctrine]) or that the transaction should be characterized as a sale (again, under the [substance-over-form doctrine]) [does] not mean that the underlying transaction violated the [economic substance doctrine]." (Roundtable Br. at 7.) Put another way, even if a transaction has economic substance, the tax treatment of those engaged in the transaction is still subject to a substance-over-form inquiry to determine whether a party was a bona fide partner in the business engaged in the transaction. See *Southgate Master Fund, L.L.C. ex rel. Montgomery Capital Advisors, LLC v. United States*, 659 F.3d 466, 484 (5th Cir. 2011) ("The fact that a partnership's underlying business activities had economic substance does not, standing alone, immunize the partnership from judicial scrutiny [under Culbertson]."); id. ("If there was not a legitimate, profit-motivated reason to operate as a partnership, then the partnership will be disregarded for tax purposes even if it engaged in transactions that had economic substance.").

At oral argument, the IRS conceded that this case "lends itself more cleanly to the bona fide partner theory," under which we look to the substance of the putative partner's interest over its form. Oral Argument at 11:00, *Historic Boardwalk Hall, LLC v. Comm'r* (No. 11-1832), available at http://www.ca3.uscourts.gov/oralargument/audio/11-1832Historic%20Boardwalk%20LLC%20v%20Commissioner%20IRS.wma. Accordingly, we focus our analysis on whether PB is as a bona fide partner in HBH, and in doing so, we assume, without deciding, that this transaction had economic substance. Specifically, we do not opine on the parties' dispute as to whether, under *Sacks v. Commissioner*, 69 F.3d 982 (9th Cir. 1995), we can consider the HRTCs in evaluating whether a transaction has economic substance.

A. The Test

A partnership exists when, as the Supreme Court said in *Commissioner v. Culbertson*, two or more "parties in good faith and acting with a business purpose intend[] to join together in the present conduct of the enterprise." 337 U.S. at 742; see also *Comm'r v. Tower*, 327 U.S. 280, 286-87 (1946) ("When the existence of an alleged partnership arrangement is challenged by outsiders, the question arises whether the partners really and truly intended to join together for the purpose of carrying on business and sharing in the profits or losses or both."); *Southgate Master Fund, L.L.C. ex rel. Montgomery*

Capital Advisors v. United States, 659 F.3d 466, 488 (5th Cir. 2011) ("The sine qua non of a partnership is an intent to join together for the purpose of sharing in the profits and losses of a genuine business.").

The *Culbertson* test is used to analyze the bona fides of a partnership and to decide whether a party's "interest was a bona fide equity partnership participation." *TIFD III-E, Inc. v. United States*, 459 F.3d 220, 232 (2d Cir. 2006) (hereinafter "*Castle Harbour*). To determine, under *Culbertson*, whether PB was a bona fide partner in HBH, we must consider the totality of the circumstances,

> considering all the facts - the agreement, the conduct of the parties in execution of its provisions, their statements, the testimony of disinterested persons, the relationship of the parties, their respective abilities and capital contributions, the actual control of income and the purposes for which it is used, and any other facts throwing light on their true intent.

337 U.S. at 742. That "test turns on the fair, objective characterization of the interest in question upon consideration of all the circumstances." *Castle Harbour*, 459 F.2d at 232.

The *Culbertson* test "illustrat[es] ... the principle that a transaction must be judged by its substance, rather than its form, for income tax purposes." *Trousdale v. Comm'r*, 219 F.2d 563, 568 (9th Cir. 1955). Even if there are "indicia of an equity participation in a partnership," *Castle Harbour*, 459 F.3d at 231, we should not "accept[] at face value artificial constructs of the partnership agreement," *id*. at 232. Rather, we must examine those indicia to determine whether they truly reflect an intent to share in the profits or losses of an enterprise or, instead, are "either illusory of insignificant." *Id*. at 231. In essence, to be a bona fide partner for tax purposes, a party must have a "meaningful stake in the success or failure" of the enterprise. *Id*.

B. The Commissioner's Guideposts

The Commissioner points us to two cases he calls "recent guideposts" bearing on the bona fide equity partner inquiry. (Appellant's Opening Br. at 34.) First, he cites to the decision of the United States Court of Appeals for the Second Circuit in *Castle Harbour*, 459 F.3d 220. The *Castle Harbour* court relied on *Culbertson* in disregarding the claimed partnership status of two foreign banks. Those banks had allegedly formed a partnership, known as Castle Harbour, LLC, with TIFD III-E, Inc. ("TIFD"), a subsidiary of General Electric Capital Corporation, with an intent to allocate certain income away from TIFD, an entity subject to United States income taxes, to the two foreign banks, which were not subject to such taxes. *Id*. at 223. Relying on the sham-transaction doctrine, the district court had rejected the IRS's contention that the foreign banks' interest was not a bona fide equity partnership participation "because, in addition to the strong and obvious tax motivations, the [partnership] had some additional non-tax motivation to raise equity capital." *Id*. at 231. In reversing the district court, the Second Circuit stated that it "[did] not mean to imply that it was error to consider the sham test, as the IRS purported to rely in part on that test. The error was in failing to test the banks' interest also under *Culbertson* after finding that the [partnership's] characterization survived the sham test." *Id*. The Second Circuit focused primarily on the *Culbertson* inquiry, and specifically on the IRS's contention that the foreign banks "should not be treated as equity partners in the Castle Harbour partnership because they had no meaningful stake in the success or failure of the partnership." *Id*. at 224.

Applying the bona fide partner theory as embodied in *Culbertson*'s totality-of-the-circumstances test, the *Castle Harbour* court held that the banks' purported partnership interest was, in substance, "overwhelmingly in the nature of a secured lender's interest, which would neither be harmed by poor performance of the partnership nor significantly enhanced by extraordinary profits." *Id*. at 231. Although it acknowledged that the banks' interest "was not totally devoid of indicia of an equity participation in a partnership," the Court said that those indicia "were either illusory or insignificant in the overall context of the banks' investment," and, thus, "[t]he IRS appropriately rejected the equity characterization." *Id*.

The *Castle Harbour* court observed that "consider[ing] whether an interest has the prevailing character of debt or equity can be helpful in analyzing whether, for tax purposes, the interest should be deemed a bona fide equity participation." *Id*. at 232. In differentiating between debt and equity, it counseled that "the significant factor ... [is] whether the funds were advanced with reasonable expectation of repayment regardless of the success of the venture or were placed at the risk of the business." Id. (citation and internal quotation marks omitted). Thus, in determining whether the banks' interest was a bona fide equity participation, the Second Circuit focused both on the banks' lack of downside risk and lack of upside potential in the partnership. It agreed with the "district court['s] recogni[tion] that the banks ran no meaningful risk of being paid anything less than the reimbursement of their investment at the [agreed-upon rate] of return." *Id*. at 233. In support of that finding, the Court noted that:

> [TIFD] was required ... to keep ... high-grade commercial paper or cash, in an amount equal to 110% of the current value of the [amount that the banks would receive upon dissolution of the partnership.] The partnership, in addition, was obliged for the banks' protection to maintain $300 million worth of casualty-loss insurance. Finally, and most importantly, [General Electric Capital Corporation] - a large and very stable corporation - gave the banks its personal guaranty, which effectively secured the partnership's obligations to the banks.

Id. at 228.

Regarding upside potential, however, the Second Circuit disagreed with the district court's conclusion that the banks had a "meaningful and unlimited share of the upside potential." *Id*. at 233. That conclusion could not be credited because it "depended on the fictions projected by the partnership agreement, rather than on assessment of the practical realities." *Id*. at 234. Indeed, the Second Circuit stated that "[t]he realistic possibility of upside potential - not the absence of formal caps - is what governs this analysis." *Id*. In reality, "the banks enjoyed only a narrowly circumscribed ability to participate in profits in excess of" the repayment of its investment, id., because TIFD had the power to either effectively restrict the banks' share of profits at 1% above an agreed-upon return of $2.85 million, or to buy out their interest at any time at a "negligible cost" of approximately $150,000, *id*. at 226, 235. The return on the banks' initial investment of $117.5 million was thus limited to $2.85 million plus 1% - "a relatively insignificant incremental return over the projected eight-year life of the partnership," *id*. at 235. In sum, "look[ing] not so much at the labels used by the partnership but at true facts and circumstances," as Culbertson directs, the *Castle Harbour* court was "compel[led] [to] conclu[de] that the ... banks' interest was, for tax purposes, not a bona fide equity participation." *Id*. at 241.

The second, more recent, precedent that the Commissioner directs us to as a "guidepost" is *Virginia Historic Tax Credit Fund 2001 LP v. Commissioner*, 639 F.3d 129 (4th Cir. 2011) (hereinafter "*Virginia Historic*"). There, the United States Court of Appeals for the Fourth Circuit held that certain transactions between a partnership and its partners which sought to qualify for tax credits under the Commonwealth of Virginia's Historic Rehabilitation Credit Program (the "Virginia Program")[51] were, in substance, sales of those credits which resulted in taxable income to the partnership. *Id*. at 132. In Virginia Historic, certain investment funds (the "Funds") were structured "as partnerships that investors could join by contributing capital." *Id*. at 133. Through four linked partnership entities with one "source partnership" entity (the "Source Partnership"), "[t]he Funds would use [the] capital [provided by investors] to partner with historic property developers ["Operating Partnerships"] renovating smaller projects, in exchange for state tax credits." Id. The confidential offering memorandum given to potential investors provided that, "[f]or every $.74-$.80 contributed by an investor, [one of the] Fund[s] would provide the investor with $1 in tax credits. If such credits could not be obtained, the partnership agreement promised a refund of capital to the investor, net of expenses." *Id*. at 134 (citation and internal quotation marks omitted). Additionally, "the partnership agreement stated that the Funds would invest only in completed projects, thereby eliminating a significant area of risk" to the investors. *Id*. "[T]he Funds reported the money paid to Operating Partnerships in exchange for tax credits as partnership expenses and reported the investors' contributions to the Funds as nontaxable contributions to capital." *Id*. at 135.

[51] The Virginia Program, much like the federal HRTC statute, was enacted to encourage investment in renovating historic properties. *Virginia Historic*, 639 F.3d at 132. Similar to federal HRTCs, the credits under the Virginia Program could be applied to reduce a taxpayer's Virginia income tax liability, dollar-for-dollar, up to 25% of eligible expenses incurred in rehabilitating the property. *Id*. Also like federal HRTCs, credits under the Virginia program could not be sold or transferred to another party. *Id*. at 132-33.

The IRS "challenged [the Funds'] characterization of investors' funding as "contributions to capital"" because the IRS believed that the investors were, in substance, purchasers of state income tax credits, and thus the money that the Funds received from the investors should have been reported as taxable income. Id. At trial, the Commissioner supported his position with two theories. First, he relied on the substance-over-form doctrine, saying that the investors were not bona fide partners in the Funds but were instead purchasers; and, second, he said that the transactions between the investors and the partnerships were "disguised sales" under I.R.C. § 707.[52] *Id*. at 136. The Tax Court rejected both of those assertions, and found that the investors were partners in the Funds for federal tax purposes. *Id*. at 136–37.

[52] Under I.R.C. § 707(a)(2)(A),

> [i]f (i) a partner performs services for a partnership or transfers property to a partnership, (ii) there is a related direct or indirect allocation and distribution to such partner, and (iii) the performance of such services (or such transfer) and the allocation and distribution, when viewed together, are properly characterized as a transaction occurring between the partnership and a partner acting other than in his capacity as a member of the partnership, such allocation and distribution shall be treated as a transaction [between the partnership and one who is not a partner].

The Fourth Circuit reversed the Tax Court. "Assuming, without deciding, that a "bona fide" partnership existed," the *Virginia Historic* court found that "the Commissioner properly characterized the transactions at issue as "sales"" under the disguised-sale rules. *Id*. at 137. The Fourth Circuit first turned to the regulations that provide guidance in determining whether a disguised sale has occurred. See *id*. at 137-39 (citing to, inter alia, Treas. Reg. §§ 1.707-3, 1.707-6(a)). Specifically, it explained that a transaction should be reclassified as a sale if, based on all the facts and circumstances, (1) a partner would not have transferred money to the partnership but for the transfer of property - the receipt of tax credits - to the partner; and (2) the latter transfer - the receipt of tax credits - "is not dependent on the entrepreneurial risks of partnership operations." *Id*. at 145 (quoting Treas. Reg. § 1.707-3(b)(1)). The Fourth Circuit concluded that the risks cited by the Tax Court — such as the "risk that developers would not complete their projects on time because of construction, zoning, or management issues," "risk ... [of] liability for improper construction," and "risk of mismanagement or fraud at the developer partnership level" - "appear[ed] both speculative and circumscribed." *Id*. While the Fourth Circuit acknowledged that "there was ... no guarantee that resources would remain available in the source partnership to make the promised refunds," it determined "that the Funds were structured in such a way as to render the possibility of insolvency remote." *Id*.

In holding "that there was no true entrepreneurial risk faced by investors" in the transactions at issue, the Virginia Historic court pointed to several different factors:

> First, investors were promised what was, in essence, a fixed rate of return on investment rather than any share in partnership profits tied to their partnership interests.... Second, the Funds assigned each investor an approximate .01% partnership interest and explicitly told investors to expect no allocations of material amounts of ... partnership items of income, gain, loss or deduction. Third, investors were secured against losing their contributions by the promise of a refund from the Funds if tax credits could not be delivered or were revoked. And fourth, the Funds hedged against the possibility of insolvency by promising investors that contributions would be made only to completed projects and by requiring the Operating Partnerships to promise refunds, in some cases backed by guarantors, if promised credits could not be delivered.

Id. (internal citations and quotation marks omitted). In sum, the Fourth Circuit deemed "persuasive the Commissioner's contention that the only risk ... was that faced by any advance purchaser who pays for an item with a promise of later delivery. It [was] not the risk of the entrepreneur who puts money into a venture with the hope that it might grow in amount but with the knowledge that it may well shrink." *Id*. at 145-46 (citing *Tower*, 327 U.S. at 287; Staff of J. Comm. on Tax'n, 98th Cong., 2d Sess., General Explanation of the Revenue Provisions of the Deficit Reduction Act of 1984 , at 226 ("To the extent that a partner's profit from a transaction is assured without regard to the success or failure of the joint undertaking, there is not the requisite joint profit motive." (alteration in original))). Accordingly, it agreed with the Commissioner that the Funds should have reported the money received from the investors as taxable income. *Id*. at 146.

The Fourth Circuit concluded its opinion with an important note regarding its awareness of the legislative policy of providing tax credits to spur private investment in historic rehabilitation projects:

> We reach this conclusion mindful of the fact that it is “the policy of the Federal Government” to “assist State and local governments ... to expand and accelerate their historic preservation programs and activities.” 16 U.S.C. § 470-1(6). And we find no fault in the Tax Court’s conclusion that both the Funds and the Funds’ investors engaged in the challenged transactions with the partial goal of aiding Virginia’s historic rehabilitation efforts. But Virginia’s Historic Rehabilitation Program is not under attack here.

Id. at 146 n.20.

C. Application of the Guideposts to HBH

The Commissioner asserts that Castle Harbour and Virginia Historic “provide a highly pertinent frame of reference for analyzing the instant case.” (Appellant’s Opening Br. At 40.) According to the Commissioner, “[m]any of the same factors upon which the [*Castle Harbour* court] relied in finding that the purported bank partners ... were, in substance, lenders to the GE entity also support the conclusion that [PB] was, in substance, not a partner in HBH but, instead, was a purchaser of tax credits from HBH.”[53] (*Id*.) That is so, says the Commissioner, because, as confirmed by the *Virginia Historic* court’s reliance on the “entrepreneurial risks of partnership operations,” Treas. Reg. § 1.707-3(b)(1), “the distinction between an equity contribution to a partnership ... and a transfer of funds to a partnership as payment of the sales price of partnership property [, *i.e.*, tax credits,] ... is the same as the principal distinction between equity and debt” (Appellant’s Opening Br. at 40-41). The key point is that the “recovery of an equity investment in a partnership is dependent on the entrepreneurial risks of partnership operations, whereas recovery of a loan to a partnership - or receipt of an asset purchased from a partnership - is not.” (*Id*. at 41.) In other words, “an equity investor in a partnership (*i.e.*, a bona fide partner) has a meaningful stake in the success or failure of the enterprise, whereas a lender to, or purchaser from, the partnership does not.” (*Id*.) In sum, the Commissioner argues that, just as the banks in Castle Harbour had no meaningful stake in their respective partnerships, and the “investors” in Virginia Historic were more like purchasers than participants in a business venture, “it is clear from the record in this case that [PB] had no meaningful stake in the success or failure of HBH.” (*Id*.)

[53] The Commissioner acknowledges that “[a]lthough certain aspects of [PB’s] cash investment in HBH were debt-like (e.g., its 3-percent preferred return), this case does not fit neatly within the debt-equity dichotomy, since [PB] recovered its “principal,” i.e. its purported capital contributions to HBH, in the form of tax credits rather than cash.” (Appellant’s Opening Br. at 40 n.14.)

In response, HBH asserts that “[t]here are a plethora of errors in the IRS’s tortured effort ... to apply *Castle Harbour* and *Virginia Historic*...to the facts of the present case.” (Appellee’s Br. at 38.) First, HBH argues that it is “abundantly apparent” that *Castle Harbour* “is completely inapposite” to it because the actual provisions in *Castle Harbour*’s partnership agreement that minimized the banks’ downside risk and upside potential were more limiting than the provisions in the AREA. (Appellee’s Br. at 35.) HBH contends that, unlike the partnership agreement in Castle Harbour, “[PB] has no rights under the AREA to compel HBH to repay all or any part of its capital contribution,” PB’s 3% Preferred Return was “not guaranteed,” and “NJSEA has no ... right to divest [PB] of its interest in any income or gains from the East Hall.” (*Id*.)

As to Virginia Historic, HBH argues that it “has no application whatsoever” here. (*Id*. at 38.) It reasons that the decision in that case “assumed that valid partnerships existed as a necessary condition to applying I.R.C. § 707(b)’s disguised sale rules” (id. at 36), and that the case was “analyzed ... solely under the disguised sale regime” - which is not at issue in the FPAA sent to HBH (*id*. at 38).

Overall, HBH characterizes *Castle Harbour* and *Virginia Historic* as “pure misdirections which lead to an analytical dead end” (*id*. at 32), and emphasizes that “[t]he question ... *Culbertson* asks is simply whether the parties intended to conduct a business together and share in the profits and losses therefrom” (*id*. at 39). We have no quarrel with how HBH frames the *Culbertson* inquiry. But what HBH fails to recognize is that resolving whether a purported partner had a “meaningful stake in the success or failure of the partnership,” *Castle Harbour*, 459 F.3d at 224, goes to the core of the ultimate determination of whether the parties ““intended to join together in the present conduct of the enterprise,” *id*. at 232 (quoting *Culbertson*, 337 U.S. at 742). *Castle Harbour*’s analysis that concluded that the banks’ “indicia of an equity participation in a partnership” was only “illusory or insignificant,” *id*. at 231, and *Virginia Historic*’s determination that the limited partner investors did not face the “entrepreneurial risks of partnership operations,” 639 F.3d at 145 (citation and internal quotation marks omitted), are both highly relevant to the question of whether HBH was a partnership in which PB had a true interest in profit and loss,[54] and the answer to that question turns on an assessment of risk participation. We are persuaded by the Commissioner’s argument that PB, like the purported bank partners in *Castle Harbour*, did not have any meaningful downside risk or any meaningful upside potential in HBH.

[54] We reject, moreover, any suggestion that the disguised-sale rules and the bona fide-partner theory apply in mutually exclusive contexts. *Virginia Historic* did not “assume[] that valid partnerships existed as a necessary condition” prior to applying the disguised-sale rules. (Appellee’s Br. at 36.) Rather, as the Virginia Historic court observed, “[t]he Department of the Treasury specifically contemplates that its regulations regarding disguised sales can be applied before it is determined whether a valid partnership exists.” 639 F.3d at 137 n.9 (citing Treas. Reg. § 1.707-3).

More importantly, HBH simply ignores why many of the principles espoused in Virginia Historic are applicable here. It is true that the challenged transaction here does not involve state tax credits and that the IRS has not invoked the disguised-sale rules, but distinguishing the case on those grounds fails to address the real issue. *Virginia Historic* is telling because the disguised-sale analysis in that case “touches on the same risk-reward analysis that lies at the heart of the bona fide-partner determination.” (Appellant’s Reply Br. at 9.) Under the disguised-sale regulations, a transfer of “property ... by a partner to a partnership” and a “transfer of money or other consideration ... by the partnership to the partner” will be classified as a disguised sale if, based on the facts and circumstances, “(i) [t]he transfer of money or other consideration would not have been made but for the transfer of property; and (ii) [i]n cases in which the transfers are not made simultaneously, the subsequent transfer is not dependent on the entrepreneurial risks of partnership operations.” Treas. Reg. § 1.707-3(b)(1).

Thus, the disguised-sale analysis includes an examination of “whether the benefit running from the partnership to the person allegedly acting in the capacity of a partner is “dependent upon the entrepreneurial risks of partnership operations.”“ (Appellant’s

Reply Br. at 9 (quoting Treas. Reg. § 1.707-3(b)(1)(ii)).) That entrepreneurial risk issue also arises in the bona fide-partner analysis, which focuses on whether the partner has a meaningful stake in the profits and losses of the enterprise. Moreover, many of the facts and circumstances laid out in the pertinent treasury regulations that "tend to prove the existence of a [disguised] sale," Treas. Reg. § 1.707-3(b)(2), are also relevant to the bona fide-partner analysis here. See, *e.g.*, *id*. § 1.707-3(b)(2)(i) ("That the timing and amount of a subsequent transfer [i.e., the HRTCs] are determinable with reasonable certainty at the time of an earlier transfer [i.e., PB's capital contributions];"); *id*. § 1.707-3(b)(2)(iii) ("That the partner's [i.e., PB's] right to receive the transfer of money or other consideration [i.e., the HRTCs] is secured in any manner, taking into account the period during which it is secured;"); *id*. § 1.707-3(b)(2)(iv) ("That any person [i.e., NJSEA] has made or is legally obligated to make contributions [e.g., the Tax Benefits Guaranty] to the partnership in order to permit the partnership to make the transfer of money or other consideration [i.e., the HRTCs];"); *id*. § 1.707-3(b)(2)(v) ("That any person [i.e., NJSEA] has loaned or has agreed to loan the partnership the money or other consideration [e.g., Completion Guaranty, Operating Deficit Guaranty] required to enable the partnership to make the transfer, taking into account whether any such lending obligation is subject to contingencies related to the results of partnership operations;"). Although we are not suggesting that a disguised-sale determination and a bona fide-partner inquiry are interchangeable, the analysis pertinent to each look to whether the putative partner is subject to meaningful risks of partnership operations before that partner receives the benefits which may flow from that enterprise.

1. Lack of Meaningful Downside Risk

PB had no meaningful downside risk because it was, for all intents and purposes, certain to recoup the contributions it had made to HBH and to receive the primary benefit it sought - the HRTCs or their cash equivalent. First, any risk that PB would not receive HRTCs in an amount that was at least equivalent to installments it had made to-date (*i.e.*, the "Investment Risk") was non-existent. That is so because, under the AREA, PB was not required to make an installment contribution to HBH until NJSEA had verified that it had achieved a certain level of progress with the East Hall renovation that would generate enough cumulative HRTCs to at least equal the sum of the installment which was then to be contributed and all prior capital contributions that had been made by PB. (See J.A. at 176, 242 (first installment of $650,000 due at closing was paid when NJ-SEA had already incurred over $53 million of QREs which would generate over $10 million in HRTCs); *id*. at 176-77 (second installment, projected to be $7,092,588, was not due until, among other events, a projection of the HRTCs for 2000 (which were estimated at closing to be $7,789,284) based on a "determination of the actual rehabilitation costs of [HBH] that qualify for Tax Credits in 2000"); *id*. at 177 (third installment, projected to be $8,523,630, was not due until the later of, among other events, (1) "evidence of Substantial Completion of Phase 4 ...."; and (2) a projection of the HRTCs for 2001 (which were estimated at closing to be $11,622,889) based on a "determination of the actual rehabilitation costs of [HBH] that qualify for Tax Credits in 2001"); *id*. (fourth installment, projected to be $1,929,580, was not due until, among other events, PB received a "K-1 for 2001 evidencing the actual Tax Credits for 2001," a tax document that would not have been available until after the estimated completion date of the entire project).) While PB did not have the contractual right to "compel HBH to repay all or any part of its capital contribution" (Appellee's Br. at 35), PB had an even more secure deal. Even before PB made an installment contribution, it knew it would receive at least that amount in return.

Second, once an installment contribution had been made, the Tax Benefits Guaranty eliminated any risk that, due to a successful IRS challenge in disallowing any HRTCs, PB would not receive at least the cash equivalent of the bargained-for tax credits (i.e., the "Audit Risk"). The Tax Benefits Guaranty obligated NJSEA[55] to pay PB not only the amount of tax credit disallowed, but also any penalties and interest, as well as up to $75,000 in legal and administrative expenses incurred in connection with such a challenge, and the amount necessary to pay any tax due on those reimbursements. *Cf*. *Virginia Historic*, 639 F.3d at 145 (noting the fact that "investors were secured against losing their contributions by the promise of a refund from the Funds if tax credits could not be delivered or were revoked" "point[ed] to the conclusion that there was no true entrepreneurial risk faced by investors").

[55] Although HBH was the named obligor under the Tax Benefits Guaranty, the agreement provided that "NJSEA ... shall fund any obligations of [HBH] to [PB]" under the Tax Benefits Guaranty. (J.A. at 303.)

Third, any risk that PB would not receive all of its bargained-for tax credits (or cash equivalent through the Tax Benefits Guaranty) due to a failure of any part of the rehabilitation to be successfully completed (i.e., the "Project Risk") was also effectively eliminated because the project was already fully funded before PB entered into any agreement to provide contributions to HBH. (See J.A. at 962 (statement in the Confidential Memorandum that "[t]he rehabilitation is being funded entirely by [NJSEA]"); *id*. at 1134 (notes from a NJSEA executive committee meeting in March 2000 indicating that "[t]he bulk of the Investor's equity is generally contributed to the company after the project is placed into service and the tax credit is earned, the balance when stabilization is achieved"); *id*. at 1714 (notes to NJSEA's 1999 annual report stating that the Casino Reinvestment Development Authority had "agreed to reimburse [NJSEA] [for] ... all costs in excess of bond proceeds for the project").) That funding, moreover, included coverage for any excess development costs.[56] In other words, PB's contributions were not at all necessary for the East Hall project to be completed. *Cf*. *Virginia Historic*, 639 F.3d at 145 (noting that the fact that "the Funds hedged against the possibility of insolvency by promising investors that contributions would be made only to completed projects" "point[ed] to the conclusion that there was not true entrepreneurial risk faced by investors"). Furthermore, HBH's own accountants came to the conclusion that the source of the project's funds - NJSEA (backed by the Casino Reinvestment Development Authority) - was more than capable of covering any excess development costs incurred by the project, as well as any operating deficits of HBH, and NJSEA had promised that coverage through the Completion Guaranty and the Operating Deficit Guaranty, respectively, in the AREA. (See J.A. at 1638 (memo to audit file noting that, because "[NJSEA] has the ability to fund the [operating] deficits as a result of the luxury and other taxes provided by the hospitality and entertainment industry in the state," and "there is no ceiling on the amount of funds to be provided [by NJSEA to HBH]," "no triggering event [had occurred] which require[d] [a write down] under FASB 144").) *Cf*. *Virginia Historic*, 639 F.3d at 145 (noting that although "[i]t [was] true ... there was ... no guarantee that resources would remain available in the source partnership to make the promised refunds ... it [was] also true that the Funds were structured in such a way as to render the possibility of insolvency remote").) Thus, although the Tax Court determined that PB "faced the risk that the rehabilitation would not be completed" (J.A. at 43), the record belies that conclusion. Because NJSEA had deep pockets, and, as succinctly stated by Reznick, "there [was] no ceiling on the amount of funds to be provided [by NJSEA to HBH]" (*id*. at 1638), PB was not subject to any legally significant risk that the renovations would falter.[57]

[56] PB had no exposure to the risk of excess construction costs, as the Completion Guaranty in the AREA provided that NJSEA was obligated to pay all such costs. Additionally, even after the renovation was completed, PB need not worry about any operating deficits that HBH would incur, as NJSEA promised to cover any such deficits through the Operating Deficit Guaranty. Furthermore, as detailed infra note 58, PB ran no real risk of incurring any environmental liability in connection with the East Hall renovation.

[57] Although the question of the existence of a risk is a factual issue we would review for clear error, there was certainly no error in acknowledging that there were risks associated with the rehabilitation. The relevant question, here, however, is not the factual one of whether there was risk; it is the purely the legal question of how the parties agreed to divide that risk, or, in other words, whether a party to the transactions bore any legally significant risk under the governing documents. That question - whether PB was subject to any legally meaningful risk in connection with the East Hall rehabilitation - depends on the AREA and related documents and hence is a question of law that we review de novo.

In short, PB bore no meaningful risk in joining HBH, as it would have had it acquired a bona-fide partnership interest. See *ASA Investerings P'ship v. Comm'r*, 201 F.3d 505, 514 (D.C. Cir. 2000) (noting that the Tax Court did not err "by carving out an exception for de minimis risks" when assessing whether the parties assumed risk for the purpose of determining whether a partnership was valid for tax purposes, and determining that the decision not to consider de minimis risk was "consistent with the Supreme Court's view ... that a transaction will be disregarded if it did "not appreciably affect [taxpayer's] beneficial interest except to reduce his tax"" (alteration in original) (quoting *Knetsch v. United States*, 364 U.S. 361, 366 (1960))).[58]

[58] The Tax Court thought that "[PB] faced potential liability for environmental hazards from the rehabilitation." (J.A. at 43.) Specifically, it theorized that PB could be on the hook for environmental liability (1) if environmental insurance proceeds did not cover any such potential liability, and (2) NJSEA was unable to cover that difference. In reality, however, PB was not subject to any real risk of environmental liability because of the Environmental Guaranty and the fact that PB had a priority distribution right to any environmental insurance proceeds that HBH received (HBH's counsel at oral argument indicated that HBH carried a $25 million policy). Moreover, PB received a legal opinion that it would not be subject to any environmental liability associated with the East Hall renovation.

PB's effective elimination of Investment Risk, Audit Risk, and Project Risk is evidenced by the "agreement ... of the parties." *Culbertson*, 337 U.S. at 742. PB and NJSEA, in substance, did not join together in HBH's stated business purpose - to rehabilitate and operate the East Hall. Rather, the parties' focus from the very beginning was to effect a sale and purchase of HRTCs. (See J.A. at 691 (Sovereign's "consulting proposal ... for the sale of historic rehabilitation tax credits expected to be generated" by the East Hall renovation); *id*. at 955 (Confidential Memorandum entitled "The Sale of Historic Tax

Credits Generated by the Renovation of the Historic Atlantic City Boardwalk Convention Hall"); *id*. at 1143 (cover letter from Sovereign to NJSEA providing NJSEA "with four original investment offers from institutions that have responded to the [Confidential] Memorandum regarding the purchase of the historic tax credits expected to be generated by" the East Hall renovation).)[59]

[59] Although we do not "[p]ermit[] a taxpayer to control the economic destiny of a transaction with labels" when conducting a substance-over-form inquiry, *Schering-Plough, Corp. v. United States*, 651 F. Supp. 2d 219, 242 (D.N.J. 2009), the labels chosen are indicative of what the parties were trying to accomplish and thus those labels "throw[] light on [the parties'] true intent," *Culbertson*, 337 U.S. at 742.

That conclusion is not undermined by PB's receipt of a secondary benefit - the 3% Preferred Return on its contributions to HBH. Although, in form, PB was "not guaranteed" that return on an annual basis if HBH did not generate sufficient cash flow (Appellee's Br. at 35), in substance, PB had the ability to ensure that it would eventually receive it. If PB exercised its Put Option (or NJSEA exercised its Call Option), the purchase price to be paid by NJSEA was effectively measured by PB's accrued and unpaid Preferred Return. See infra note 63 and accompanying text. And to guarantee that there would be sufficient cash to cover that purchase price, NJSEA was required to purchase the Guaranteed Investment Contract in the event that NJSEA exercised its Call Option.[60] *Cf. Virginia Historic*, 639 F.3d at 145 (noting the fact that "investors were promised what was, in essence, a fixed rate of return on investment rather than any share in partnership profits tied to their partnership interests" "point[ed] to the conclusion that there was not true entrepreneurial risk faced by investors"). Thus, the Tax Court's finding that PB "might not receive its preferred return ... at all" unless NJSEA exercised its Call Option (J.A. at 51-52), was clearly erroneous because it ignored the reality that PB could assure its return by unilaterally exercising its Put Option.[61]

[60] As noted supra in Section I.B.4.a, the Guaranteed Investment Contract was "sized to pay off" the accrued but unpaid Preferred Return, as well as the outstanding balance on the Investor Loan with accrued interest. (J.A. at 1211.)

[61] It is true, of course, that PB could not exercise its Put Option until seven years from the date that the East Hall was placed in service. However, PB would have no interest in exercising that option within the first five years anyway because the HRTCs that PB received would be subject to recapture during that period. See supra note 20.

HBH, of course, attacks the Commissioner's assertion that PB lacked downside risk, claiming that "the IRS's theory that a valid partnership cannot exist unless an investor-partner shares in all of the risks and costs of the partnership has no basis in partnership or tax law," and "is contrary to the standard economic terms of innumerable real estate investment partnerships in the United States for every type of real estate project." (Appellee's Br. at 44.) HBH also asserts that many of the negotiated provisions - such as the Completion Guaranty, Operating Deficit Guaranty, and the Preferred Return - are "typical in a real estate investment partnership." (*Id*. at 45.) The Commissioner has not claimed, however, and we do not suggest, that a limited partner is prohibited from capping its risk at the amount it invests in a partnership. Such a cap, in and of itself, would not jeopardize its partner status for tax purposes. We also recognize that a limited partner's status as a bona fide equity participant will not be stripped away merely because it has successfully negotiated measures that minimize its risk of losing a portion of its investment in an enterprise. Here, however, the parties agreed to shield PB's "investment" from any meaningful risk. PB was assured of receiving the value of the HRTCs and its Preferred Return regardless of the success or failure of the rehabilitation of the East Hall and HBH's subsequent operations. And that lack of meaningful risk weighs heavily in determining whether PB is a bona fide partner in HBH. *Cf. Virginia Historic*, 639 F.3d at 145-46 (explaining that "entrepreneurial risks of partnership operations" involves placing "money into a venture with the hope that it might grow in amount but with the knowledge that it may well shrink"); *Castle Harbour*, 459 F.3d at 232 (noting that "Congress appears to have intended that "the significant factor" in differentiating between [debt and equity] be whether "the funds were advanced with reasonable expectations of repayment regardless of the success of the venture or were placed at the risk of the business"" (quoting *Gilbert v. Comm'r*, 248 F.2d 399, 406 (2d Cir. 1957))).

2. Lack of Meaningful Upside Potential

PB's avoidance of all meaningful downside risk in HBH was accompanied by a dearth of any meaningful upside potential. "Whether [a putative partner] is free to, and does, enjoy the fruits of the partnership is strongly indicative of the reality of his participation in the enterprise." *Culbertson*, 337 U.S. at 747. PB, in substance, was not free to enjoy the fruits of HBH. Like the foreign banks' illusory 98% interest in *Castle Harbour*, PB's 99.9% interest in HBH's residual cash flow gave a false impression that it had a chance to share in potential profits of HBH. In reality, PB would only benefit from its 99.9% interest in residual cash flow after payments to it on its Investor Loan and Preferred Return and the following payments to NJSEA: (1) annual installment payment on the Acquisition Loan ($3,580,840 annual payment for 39 years plus arrears); (2) annual installment payment on the Construction Loan;[62] and (3) payment in full of the operating deficit loan (in excess of $28 million as of 2007). Even HBH's own rosy financial projections from 2000 to 2042, which (at least through 2007) had proven fantastically inaccurate, forecasted no residual cash flow available for distribution. Thus, although in form PB had the potential to receive the fair market value of its interest (assuming such value was greater than its accrued but unpaid Preferred Return) if either NJSEA exercised its Call Option or PB exercised its Put Option, in reality, PB could never expect to share in any upside.[63] *Cf. Castle Harbour*, 459 F.3d at 234 ("The realistic possibility of upside potential - not the absence of formal caps - is what governs [the bona fide equity participation] analysis."). Even if there were an upside, however, NJSEA could exercise its Consent Option, and cut PB out by paying a purchase price unrelated to any fair market value.[64] See supra Section I.B.4.a. In sum, "the structure of the ... transaction ensured that [PB] would never receive any [economic benefits from HBH]." *Southgate Master Fund*, 659 F.3d at 486-87. And "[i]n light of *Culbertson*'s identification of "the actual control of income and the purposes for which it [was] used" as a metric of a partnership's legitimacy, the terms of the [AREA and the structure of the various options] constitute compelling evidence" that PB was not a bona fide partner in HBH. *Id*. at 486 (quoting *Culbertson*, 337 U.S. at 742).

[62] The Construction Loan called for annual interest-only payments until April 30, 2002, and thereafter, called for annual installments of principal and interest that would fully pay off the amount of the principal as then had been advanced by April 30, 2040. Under the original principal amount of $57,215,733 with an interest rate of 0.1% over a 39-year period, and assuming no arrearage in the payment of principal and interest, the annual installment of principal and interest would be approximately $1.5 million.

[63] To put it mildly, the parties and their advisors were imaginative in creating financial projections to make it appear that HBH would be a profit-making enterprise. For example, after Sovereign said that it was "cautious about [Spectacor's projections of net losses for HBH since] they might prove excessively conservative" (J.A. at 793), and suggested that NJSEA "could explore shifting the burden of some of [HBH's] operating expenses ... to improve results" (*id*. at 804), Spectacor made two sets of revisions to HBH's five-year draft projections that turned an annual average $1.7 million net operating loss to annual net operating gains ranging from $716,000 to $1.24 million by removing HBH's projected utilities expenses for each of the five years. Similarly, when an accountant from Reznick informed Hoffman that the two proposed loans from NJSEA to HBH "ha[d] been set up to be paid from available cash flow" but that "[t]here was not sufficient cash to amortize this debt" (*id*. at 1160), Hoffman instructed that accountant to remedy that issue by increasing the projection of baseline revenues in 2002 by $1 million by adding a new revenue source of $750,000 titled "naming rights," and by increasing both "parking revenue" and "net concession revenue" by $125,000 each (*id*. at 1196). Overall, although Reznick projected near closing that HBH would generate an aggregate net operating income of approximately $9.9 million for 2003 through 2007, HBH actually experienced an aggregate net operating loss of over $10.5 million for those five years.

Despite the smoke and mirrors of the financial projections, the parties' behind-the-scenes statements reveal that they never anticipated that the fair market value of PB's interest would exceed PB's accrued but unpaid Preferred Return. (See *id*. at 1162 (pre-closing memo from NJSEA's outside counsel to NJSEA that "[d]ue to the structure of the transaction," the fair market value would not come into play in determining the amount that PB would be owed if NJSEA exercised its Call Option).) That admission is hardly surprising because the substance of the transaction indicated that this was not a profit-generating enterprise. *Cf. Virginia Historic*, 639 F.3d at 145 (noting that the fact that "the Funds ... explicitly told investors to expect no allocation of material amounts of ... partnership items of income, gain, loss, or deduction " "point[ed] to the conclusion that there was no true entrepreneurial risk faced by investors" (citation and internal quotation marks omitted)).

[64] Thus, contrary to HBH's assertion, NJSEA effectively did have the "right to divest [PB] of its interest in any income or gains from the East Hall." (Appellee's Br. at 35.)

3. HBH's Reliance on Form over Substance

After attempting to downplay PB's lack of any meaningful stake in the success or failure of the enterprise, HBH presses us to consider certain evidence that it believes "overwhelmingly proves that [PB] is a partner in HBH" under the *Culbertson* totality-of-the-circumstances test. (Appellee's Br. at 38.) That "overwhelming" evidence includes: (1) that HBH was duly organized as an LLC under New Jersey law and, as the AREA provides, "was formed to acquire, develop, finance, rehabilitate, maintain, operate, license, and sell or otherwise to dispose of the East Hall" (*id*. at 40; see J.A. at 157); (2) PB's "net economic benefit" from the HRTCs and the 3% Preferred Return (Appellee's Br. at 41); (3) PB's representatives' "vigorous[] negotiat[ion] [of] the terms of the AREA" (*id*. at 41); (4) "the nature and thoroughness" of PB's "comprehensive due diligence investigation in connection with its investment in HBH" (*id*. at 42); (5) PB's "substantial financial investment in HBH" (*id*.); (6) various business agreements that had been entered into between NJSEA and certain third parties that were all assigned to, and assumed by, HBH (*id*. at 43); (7) bank and payroll accounts that were opened in HBH's name and insurance agreements that were amended to identify HBH as an owner and include PB as an additional insured; and (8) the fact that, following closing, "NJSEA kept in constant communication with [PB] regarding the renovations to the East Hall, and the business operations of the Hall" (*id*.).

Much of that evidence may give an "outward appearance of an arrangement to engage in a common enterprise." *Culbertson*, 337 U.S. at 752 (Frankfurter, J., concurring). But "the sharp eyes of the law" require more from parties than just putting on the "habiliments of a partnership whenever it advantages them to be treated as partners underneath." *Id*. Indeed, *Culbertson* requires that a partner "really and truly intend[] to ... shar[e] in the profits and losses" of the enterprise, *id*. at 741 (majority opinion) (emphasis added) (citation and internal quotation marks omitted), or, in other words, have a "meaningful stake in the success or failure" of the enterprise, *Castle Harbour*, 459 F.3d at 231. Looking past the outward appearance, HBH's cited evidence does not demonstrate such a meaningful stake.

First, the recitation of partnership formalities - that HBH was duly organized, that it had a stated purpose under the AREA, that it opened bank and payroll accounts, and that it assumed various obligation - misses the point. We are prepared to accept for purposes of argument that there was economic substance to HBH. The question is whether PB had a meaningful stake in that enterprise. See *Castle Harbour*, 459 F.3d at 232 ("The IRS's challenge to the taxpayer's characterization is not foreclosed merely because the taxpayer can point to the existence of some business purpose or objective reality in addition to its tax-avoidance objective."); *Southgate Master Fund*, 659 F.3d at 484 ("The fact that a partnership's underlying business activities had economic substance does not, standing alone, immunize the partnership from judicial scrutiny [under *Culbertson*]. The parties' selection of the partnership form must have been driven by a genuine business purpose." (internal footnote omitted)). To answer that, we must "look beyond the superficial formalities of a transaction to determine the proper tax treatment." *Edwards v. Your Credit, Inc.*, 148 F.3d 427, 436 (5th Cir. 1998) (citation and internal quotation marks omitted).

Second, evidence that PB received a "net economic benefit" from HBH and made a "substantial financial investment in HBH" can only support a finding that PB is a bona fide partner if there was a meaningful intent to share in the profits and the losses of that investment. The structure of PB's "investment," however, shows clearly that there was no such intent. Recovery of each of the contributions that made up the "substantial financial investment" was assured by the provisions of the AREA and the Tax Benefits Guaranty. And, as the Commissioner rightly notes, PB's net after-tax economic benefit from the transaction — in the form of the HRTCs (or the cash equivalent via the Tax Benefits Guaranty) and the effectively guaranteed Preferred Return — "merely demonstrates [PB's] intent to make an economically rational use of its money on an after-tax basis." (Appellant's Reply Br. at 13.) Indeed, both parties in a transaction such as this one will always think they are going to receive a net economic benefit; otherwise, the transaction would never occur. If in fact that was the test, there would be a green-light for every tax-structured transaction that calls itself a "partnership."

Third, the fact that NJSEA "kept in constant communication" regarding the East Hall is hardly surprising. As discussed earlier, supra Section II.C.1, each installment contribution from PB was contingent upon NJSEA verifying that a certain amount of work had been completed on the East Hall so that PB was assured it would not be contributing more money than it would be guaranteed to receive in HRTCs or their cash equivalent. The mere fact that a party receives regular updates on a project does not transform it into a bona fide partner for tax purposes.

Fourth, looking past the form of the transaction to its substance, neither PB's "vigorous[] negotiat[ion]" nor its "comprehensive due diligence investigation" is, in this context, indicative of an intent to be a bona fide partner in HBH. We do not doubt that PB spent a significant amount of time conducting a thorough investigation and negotiating favorable terms. And we acknowledge that one of the factors cited by *Culbertson* is "the conduct of the parties in execution of its provisions." 337 U.S. at 742. But the record reflects that those efforts were made so that PB would not be subject to any real risks that would stand in the way of its receiving the value of the HRTCs; not, as HBH asserts, "to form a true business relationship." (Appellee's Br. at 41.) We do not believe that courts are compelled to respect a taxpayer's characterization of a transaction for tax purposes based on how document-intensive the transaction becomes. Recruiting teams of lawyers, accountants, and tax consultants does not mean that a partnership, with all its tax credit gold, can be conjured from a zero-risk investment of the sort PB made here.

In the end, the evidence HBH cites focuses only on form, not substance. From the moment Sovereign approached NJSEA, the substance of any transaction with a corporate investor was calculated to be a "sale of ... historic rehabilitation tax credits." (J.A. at 691.) *Cf. Castle Harbour*, 459 F.3d at 236 (finding that the banks' interest "was more in the nature of window dressing designed to give ostensible support to the characterization of equity participation ... than a meaningful stake in the profits of the venture"). And in the end, that is what the substance turned out to be.

Like the *Virginia Historic* court, we reach our conclusion mindful of Congress's goal of encouraging rehabilitation of historic buildings. See 639 F.3d at 146 n.20. We have not ignored the predictions of HBH and amici that, if we reallocate the HRTCs away from PB, we may jeopardize the viability of future historic rehabilitation projects. Those forecasts, however, distort the real dispute.

The HRTC statute "is not under attack here." *Id*. It is the prohibited sale of tax credits, not the tax credit provision itself, that the IRS has challenged. Where the line lies between a defensible distribution of risk and reward in a partnership on the one hand and a form-over-substance violation of the tax laws on the other is not for us to say in the abstract. But, "[w]here, as here, we confront taxpayers who have taken a circuitous route to reach an end more easily accessible by a straightforward path, we look to the substance over form." *Southgate Master Fund*, 659 F.3d at 491 (citation and internal quotation marks omitted). And, after looking to the substance of the interests at play in this case, we conclude that, because PB lacked a meaningful stake in either the success or failure of HBH, it was not a bona fide partner.

Cross Refined Coal, LLC v. Commissioner, 130 A.F.T.R.2d 2022-5343, 45 F.4th 150, (D.C. Cir. 2022), summarized:

Congress enacted a tax credit to incentivize the production of refined coal, which releases fewer emissions than unrefined coal. AJG Coal, Inc. responded by forming Cross Refined Coal, LLC and recruiting two other investors in that enterprise. Limited-liability companies are taxed like partnerships, so the company's tax liabilities and

> credits passed through to its member investors. Yet the Internal Revenue Service balked when Cross's members tried to claim the refined-coal credit. The IRS asserted that Cross was not a bona fide partnership for tax purposes, in part because it could never have made a profit without the tax credit. The tax court disagreed, and so do we. We hold that partnerships formed to conduct activity made profitable by tax credits engage in legitimate business activity for tax purposes. We further conclude that all of Cross's members shared in its profits and losses, and thus had a meaningful stake in its success or failure. Accordingly, we affirm the tax court's conclusion that Cross was a bona fide partnership.

One argument made before the Tax Court was not addressed by the Court of Appeals comes from the trial transcript:[575]

> In his pretrial memorandum (at 3), the Commissioner states that the issue in this case is whether "Cross was not formed to carry on a business or for the sharing of profits and losses from the production or sale of refined coal by its purported members, but rather was formed as a vehicle for the sale of Tax Credits from" AJGC to USARC and Schneider. It is true that the credits were a critical feature of the arrangement, that no rational actor would have invested in the refined coal facility without the credits, that the parties took every necessary effort to assure their obtaining of the credits. It is also true that their communications speak of the obtaining of the credits as the desired outcome, and that some of their communications used "purchasing" or "selling" the credits as a shorthand for entering into or acting under the contracts into which they had entered. There may be circumstances in which such facts might undermine the existence of a bona fide partnership - but that is not the case here.

The Court of Appeals first mentioned *Culbertson* and *Tower* and its own precedent, *ASA Investerings P'ship v. Commissioner*, 201 F.3d 505, 506 (D.C. Cir. 2000). Then it set forth what is a partnership:

> The partnership definition in *Tower* and *Culbertson* consists of two requirements. First, the partners must intend to "carry on business as a partnership." *Tower*, 327 U.S. at 287; *Culbertson*, 337 U.S. at 742-43. In other words, the enterprise must be "undertaken for profit or for other legitimate nontax business purposes." *BCP Trading*, 991 F.3d at 1271 (cleaned up). In most cases, this inquiry turns on whether the partnership has a genuine opportunity to make a profit and whether the partners direct their efforts toward realizing it. See *id*. at 1271-72. In contrast, a partnership that has "no practical economic effect other than the creation of tax losses" is treated as a sham. *Id*. at 1272; see *ASA Investerings*, 201 F.3d at 506 (finding sham partnership where "transactions that in substance added up to a wash were transmuted into ones generating tax losses of several hundred million dollars"). Other factors that are probative of a sincere intent to carry on a business include the duration of the partnership, see *Andantech*, 331 F.3d at 979, and the business rationale for using the partnership form, *id*. at 980; *Boca Investerings P'ship v. United States*, 314 F.3d 625, 632 (D.C. Cir. 2003).
>
> Though we look to economic reality in assessing intent to carry on a business, we do not lightly set aside de jure partnerships as shams. "It is uniformly recognized that taxpayers are entitled to structure their transactions in such a way as to minimize tax," *ASA Investerings*, 201 F.3d at 513, so "[t]ax minimization as a primary consideration is not

[575] Docket No. 19502-17, transcript dated August 29, 2019.

> unlawful," *BCP Trading*, 991 F.3d at 1272. Taxpayers that structure their dealings to receive tax benefits afforded by statute are entitled to those benefits, no matter their subjective motivations. Otherwise, the sham-partnership doctrine, like the more general economic-substance doctrine, would allow the Commissioner "to place labels on transactions to avoid textual consequences he doesn't like." *Summa Holdings, Inc. v. Comm'r*, 848 F.3d 779, 787 (6th Cir. 2017).
>
> The second requirement of the Supreme Court's definition of partnership is that the partners must intend to "shar[e] in the profits or losses or both." *Tower*, 327 U.S. at 287. In other words, the partners' interests must have the "prevailing character" of equity, with each partner having a "meaningful stake in the success or failure" of the partnership. *TIFD III-E, Inc. v. United States*, 459 F.3d 220, 231–32 (2d Cir. 2006). If one putative partner is insulated from the upside and downside risks of the business, its interest resembles that of a secured creditor, not an equity partner. See *Historic Boardwalk Hall, LLC v. Comm'r*, 694 F.3d 425, 462 (3d Cir. 2012) ("a partnership, with all its tax credit gold, can[not] be conjured from a zero-risk investment"); *Southgate*, 659 F.3d at 486–89.
>
> In our circuit, the leading case on partnership validity epitomizes the failure to meet these two requirements. In *ASA Investerings*, a U.S. corporation seeking to offset a large capital gain formed a putative partnership with a foreign bank not subject to U.S. tax. 201 F.3d at 508. During its brief existence, the partnership executed only two transactions: the purchase and offsetting sale of certain debt instruments. *Id*. Relying on the tax code's installment-sale rules, the partners engaged in wash transactions that created a large capital gain for the tax-indifferent bank and a large capital loss (and accompanying tax deduction) for the U.S. corporation. *Id*.
>
> We held that the purported partnership was not bona fide. First, the partners did not intend to carry on a business together, for the partnership was not designed to be profitable on a pre-or post-tax basis, and it had no other apparent non-tax business purpose. 201 F.3d at 513-14. The partnership claimed that it hoped to profit from a change in interest rates between the time of the offsetting transactions, but we found that they were designed to eliminate all relevant risks. *Id*. at 514. Second, and relatedly, the foreign bank did not share in the supposed risk of the putative partnership. Instead, it received a guaranteed rate of return for its participation and faced only a "de minimis risk" to its investment. *Id*. at 514-15 ("A partner whose risks are all insured at the expense of another partner hardly fits within the traditional notion of partnership.").

In analyzing the case, the court first determined that the parties intended to jointly carry on a business:

> First, the tax court correctly determined that AJG, Fidelity, and Schneider intended to jointly carry on a business. As the tax court found and the government concedes, AJG had legitimate non-tax motives for forming Cross and for recruiting partners, such as spreading its investment risk over a larger number of projects. Moreover, there was nothing untoward about seeking partners who could apply the refined-coal credits immediately, rather than carrying them forward to future tax years. Low-tax entities (like AJG) often use the prospect of tax credits to attract high-tax entities (like Fidelity and Schneider) into a partnership, and in return, the high-tax partners provide the financing needed to make the tax-incentivized project possible. See *Va. Historic Tax Credit Fund 2001 LP v. Comm'r*, 639 F.3d 129, 132-33 (4th Cir. 2011); Office of the Comptroller of the Currency, Low-Income Housing Tax Credits: Affordable Housing Investment

Opportunities for Banks 1–3 (last updated Apr. 2014). And Congress expressly provided for coal refiners to employ this investment strategy, for the tax code specifies how the credit must be divided when a refining facility has multiple owners. 26 U.S.C. §§ 45(e)(3). Cross therefore fits comfortably within the scope of entities that Congress envisioned claiming the credit.

Fidelity and Schneider, while no doubt motivated by the prospect of refined-coal tax credits, also became legitimate partners in the enterprise. Though AJG did much of the heavy lifting to launch Cross, Fidelity and Schneider jointly controlled its major decisions once they became members, and they were actively involved in its day-to-day operations. Both also made monthly contributions to Cross "commensurate with their status as partners" - Fidelity contributed $26 million, and Schneider contributed $12.3 million. A. 1821-22. And both remained members of Cross for several years, even during unprofitable shutdowns.

The Commissioner's chief objection is that Cross did not pursue business activity to obtain a pre-tax profit. Instead, tax credits were its sole profit driver, and the production of those credits thus permeated every aspect of its business model. According to the Commissioner, Cross's partners did not have the requisite intent to carry on a business together because Cross was not "undertaken for profit or for other legitimate *nontax* business purposes." *BCP Trading*, 991 F.3d at 1271 (cleaned up) (emphasis added).

We disagree. As a general matter, a partnership's pursuit of after-tax profit can be legitimate business activity for partners to carry on together. This is especially true in the context of tax incentives, which exist precisely to encourage activity that would not otherwise be profitable. The production of refined coal illustrates this point: Congress recognized its environmental benefits, but, as the tax court explained, refiners must sell it at a discount "in order to induce the utility to assume the risk of buying and using" it. A. 1792-93. Thus, Cross did not simply engage in "wasteful activity," which is typical of sham partnerships that merely manufacture tax losses. *ASA Investerings*, 201 F.3d at 513. Rather, Cross engaged in business activity with a "practical economic effect," *BCP Trading*, 991 F.3d at 1272 - the production of cleaner-burning refined coal, which Congress specifically sought to encourage.

The Ninth Circuit has likewise held that taxpayers may legitimately conduct business activity that Congress has deliberately made profitable through statutory tax incentives - and may do so with no hope of a pre-tax profit. In *Sacks v. Commissioner*, 69 F.3d 982 (9th Cir. 1995), that court explained: "If the government treats tax-advantaged transactions as shams unless they make economic sense on a pre-tax basis, then it takes away with the executive hand what it gives with the legislative." *Id*. at 992. For "Congress has purposely used tax incentives" to "induce investments which otherwise would not have been made," and "[i]f the Commissioner were permitted to deny tax benefits when the investments would not have been made but for the tax advantages, then only those investments would be made which would have been made without the Congressional decision to favor them." Id. at 991-92. The Commissioner's view would thus hamstring Congress's ability to use tax credits to encourage all kinds of activity that is socially desirable but unprofitable to those undertaking it - such as building low-income housing, 26 U.S.C. §§ 42; producing renewable energy, *id*. § 45; or developing medicines for rare diseases, *id*. § 45C.

> The Commissioner falls back to the position that a partnership is bona fide only if each partner expects to make a pre-tax profit "at some point in time." Reply Br. at 23-24. He invokes *Alternative Carbon Resources, LLC v. United States*, 939 F.3d 1320 (Fed. Cir. 2019), which held that a taxpayer could not claim an alternative-fuel tax credit absent evidence that it "ever reasonably expected to generate any profit apart from the tax credits." *Id*. at 1330 (cleaned up). Like the Commissioner, *Alternative Carbon* sought to distinguish *Sacks* as a case where the taxpayer could eventually turn a pre-tax profit. *Id*. at 1331. But *Sacks* did not turn on that possibility; to the contrary, it explained that an investment does "not become a sham just because its profitability was based on after-tax instead of pre-tax projections." 69 F.3d at 991. And even *Alternative Carbon* acknowledged that a transaction "unprofitable absent a tax credit" may still have economic substance if it "meaningfully alters the taxpayer's economic position (other than with regard to the tax consequences)" and has a "bona fide business purpose." 939 F.3d at 1331-32 (cleaned up). Cross passes muster under this test: Its partners all made sizable contributions to become part owners and help Cross engage in the business of producing refined coal.
>
> The Commissioner also points to our remark in *ASA Investerings* that "the absence of a nontax business purpose is fatal" to bona fide partnership status. 201 F.3d at 512. But transactions that are profitable only on a post-tax basis can still have a "nontax business purpose." The ASA partnership - an "elaborate" scheme that engaged in "wasteful activity" with "very substantial transaction costs" - had no purpose apart from the creation of tax losses. *Id*. at 513, 516. Indeed, the partnership itself could not profit even on a post-tax basis, making it "no more than a facade." *Id*. at 513-14. Cross, on the other hand, sought to produce a post-tax profit, and it did so by pursuing the congressionally encouraged business purpose of producing refined coal. Moreover, its use of the partnership form furthered that purpose by enabling AJG to raise more capital and spread its investment risk across multiple coal-refining projects.
>
> Even the Commissioner ultimately recognizes that an enterprise profitable only on a post-tax basis can have a valid business purpose. He acknowledges that Cross would have had a legitimate business purpose had AJG alone operated it, even with no potential for pre-tax profit. But if one entity could validly seek after-tax profit through Cross, there is no reason why three partners could not validly pursue the same objective.

When Congress codified the economic substance doctrine, Congress intended not to apply it to discourage projects motivated by tax credits if the partners were engaging in the encouraged activity.[576]

The court then reviewed the parties' sharing in the partnership's potential for profit and risk of loss:

> The tax court also correctly concluded that Fidelity and Schneider shared in Cross's potential for profit and risk of loss, giving their investment the prevailing character of equity. If Cross refined more coal, Fidelity and Schneider made more money. If Cross struggled - whether due to regulatory obstacles, environmental problems, or shortcomings in the newly developed refining technology - Fidelity and Schneider would lose money. And Cross did at times struggle: During its two shutdowns, it incurred

[576] See text accompanying fn 1660 in part II.G.17.a What Is the Codified Economic Substance Doctrine.

almost $2.9 million in operating expenses without generating any offsetting revenue. As partners, Fidelity and Schneider were liable for, and paid, their pro rata shares of those expenses.

To be sure, Fidelity and Schneider were insulated from some of Cross's downside risk. Most notably, Fidelity's purchase agreement contained the liquidated-damages provision. Likewise, Cross's sub-license agreement was structured to protect Fidelity and Schneider from minor fluctuations in variable operating costs. But these provisions hardly made their investments effectively like debt, for which funds are "advanced with reasonable expectations of repayment regardless of the success of the venture" rather than being "placed at the risk of the business." *Gilbert v. Comm'r*, 248 F.2d 399, 406 (2d Cir. 1957). By and large, Fidelity and Schneider's fortunes rose or fell with the amount of coal that Cross refined, which made them bona fide equity partners. See *Historic Boardwalk*, 694 F.3d at 459 ("a limited partner's status as a bona fide equity participant will not be stripped away merely because it has successfully negotiated measures that minimize its risk of losing a portion of its investment"); *Hunt v. Comm'r*, 59 T.C.M. (CCH) 635, 648 (1990) (bona fide partner could have a 98% guaranteed return of its capital contribution).

The Commissioner acknowledges that Fidelity and Schneider faced downside risk, but he contends that it was not meaningful given the magnitude of the expected tax benefits. In support of this argument, the Commissioner invokes cases relying on the economic-substance doctrine, which evaluates transactions based on economic reality as opposed to formal labels. See *Gregory v. Helvering*, 293 U.S. 465, 468-70 (1935). The cited cases assessed the legitimacy of offshore transactions that gave rise to large U.S. tax losses. *Bank of N.Y. Mellon Corp. v. Comm'r*, 801 F.3d 104, 106–07 (2d Cir. 2015); *Reddam v. Comm'r*, 755 F.3d 1051, 1055-57 (9th Cir. 2014). In these cases, the courts compared the magnitude of the expected tax and non-tax benefits to gauge whether the disputed transactions had a legitimate business purpose. *Bank of N.Y. Mellon*, 801 F.3d at 120; *Reddam*, 755 F.3d at 1061. Similar logic applies to sham-partnership analysis, the Commissioner contends, as evidenced by our statement in *ASA Investerings* that "any potential gain from the partnership's investments was in its view at all times dwarfed by its interest in the tax benefit." 201 F.3d at 513.

In this case, the Commissioner modifies the comparison and balances capital placed at risk with the expected tax benefits. He asserts that at most, Fidelity and Schneider respectively placed at risk about $4 million and $3 million, which represent the sum of (1) the initial buy-in amounts (less the amount that Fidelity later received in liquidated damages), (2) the initial contributions to cover two months of operating expenses, and (3) the monthly contributions to cover operating expenses during shutdown months when no tax credits accrued. On the other side of the ledger, Fidelity and Schneider anticipated that, under a best-case scenario, they would collectively earn $105 million in after-tax profit over ten years. The Commissioner contends that this imbalance between the relatively small amounts that Fidelity and Schneider placed at risk and the large expected tax benefits shows that they merely bought tax credits rather than becoming true equity partners.[2]

[2] The Commissioner argues that the tax court, in evaluating the extent of Fidelity and Schneider's risk, improperly considered operating expenses accrued during non-shutdown months when Cross produced refined coal and thus earned the tax credit. The tax court did not do so. *See* A. 1825-32. But regardless of whether these

expenses are considered, we conclude that Fidelity and Schneider had meaningful downside risk.

We reject this argument. The cited economic-substance cases compared expected tax and non-tax benefits to discern the nature of the contested transactions for tax purposes. As explained above, Congress recognized the environmental benefits of cleaner coal and provided tax incentives that it deemed appropriate as a result. We thus cannot ignore tax consequences in assessing the legitimacy of the encouraged activity. By contrast, the financial engineering in *Bank of New York Mellon* and *Reddam* had no "practical economic effects," *Reddam*, 755 F.3d at 1062 (quoting *Sacks*, 69 F.3d at 987); *Bank of N.Y. Mellon*, 801 F.3d at 120 (similar), and the comparison between the transactions' tax and non-tax benefits confirmed that they lacked substance. As for *ASA Investerings*, the putative partnership activity there was unprofitable even on a post-tax basis, in contrast to the activity here of producing refined coal. Also, in weighing expected benefits, the Commissioner relies on a best-case scenario "assum[ing] uninterrupted high volume sales of refined coal over the entire 10-year period," A. 1794, rather than a more realistic, risk-adjusted projection.

Moreover, even if we accepted the Commissioner's modification and compared capital placed at risk to anticipated tax benefits under a best-case scenario, we still see no reason to doubt Fidelity and Schneider's status as bona fide partners. As explained above, the production of refined coal is legitimate business activity that Congress sought to make profitable through tax incentives, including for partnerships. Without more, high after-tax profit margins suggest only that the tax credit is a generous one, not that the entities obtaining them are something other than a legitimate partnership. In this case, for example, nobody doubts that AJG could benefit from the tax credit, no matter how small its investment or how large its tax-driven profits. Fidelity and Schneider were no less eligible to reap the rewards of Congress's generosity.

We recognize that Fidelity and Schneider could not fairly be treated as equity partners if their investments in Cross were so trivial or so insulated from risk as to make them indifferent to Cross's success or failure. But as shown above, Fidelity and Schneider had much skin in the game. Through their initial investments and contributions to operating expenses, they put millions of dollars at risk, in amounts proportionate to their respective ownership interests. Moreover, as the tax court explained, "it was entirely within the realm of possibility" that they would not recover much of their capital, A. 1829, in sharp contrast to the cases cited by the Commissioner, see *ASA Investerings*, 201 F.3d at 514-15 (hedge transactions made any risk of loss "de minimis"); *Bank of N.Y. Mellon*, 801 F.3d at 122 (transactions amounted to a "circular cash flow"); *Reddam*, 755 F.3d at 1061 ("tax loss" from transaction "would always...have overshadowed" any underlying gains or losses). The tax benefits that the partners received varied entirely with the amount of coal that Cross was able to refine. And there were significant downside risks, which materialized for long periods. For instance, though the best-case forecasts projected that Fidelity and Schneider would receive $105 million in tax credits over 10 years, they ended up earning only $14.25 million over four years due to two lengthy shutdowns. Moreover, the two partners lost $2.9 million and $700,000 respectively on the Jefferies refining facility, which used the same investment structure as Cross. And it could have been even worse: Fidelity and Schneider were exposed to significant litigation and regulatory risks, and they faced the possibility that the refined coal might not meet emissions standards and thus not qualify for any tax credits.

> A material risk of failing to receive a return on investment is the essence of every equity stake. Fidelity and Schneider's investments in Cross carried that risk, which distinguishes this case from sham partnerships that guarantee a fixed return to one putative partner. The tax court correctly concluded that all members of Cross shared its profits and losses. See *Tower*, 327 U.S. at 287.

Lipton, "IRS' Argument in Cross Refined Coal Gets Burned by the DC Circuit," *Journal of Taxation* (Jan. 2023), comments:

> The most important *aspect* of the DC Circuit's decision in *Cross Refined* Coal is its recognition that Sacks was a correct statement of the law – the IRS cannot claim that a partnership is not bona fide simply because the partnership relies on Congressionally-provided tax benefits (such as tax credits) to turn a profit. When Congress provides an economic incentive for an activity, taxpayers who engage in that activity (and thereby do what Congress encouraged) should not lose their claimed tax benefits just because the activity would not have been profitable without the tax benefits that Congress created. Indeed, as the Ninth Circuit so aptly noted, any other conclusion would directly frustrate Congress' will, which is not within the power of an administrative agency like the IRS.
>
> Congress frequently uses tax credits to incentivize taxpayer behavior. For example, the recently-enacted Inflation Reduction Act is replete with numerous tax credits addressing climate change, and it can be anticipated that individuals and industries will change their behavior in order to obtain the appropriate tax benefits. Likewise, there are entire industries (such as wind and solar power generation) that might not make economic sense absent tax credits, not to mention low-income housing. Thus, the IRS' argument that only a trade or business that is anticipated to make a pre-tax profit was contrary to many provisions in the Code, and not just the special rules that relate to the production of refined coal.
>
> The DC Circuit also appropriately addressed the language in its own tax shelter opinions and relegated them to the era in which they belonged. The tax shelters which arose several decades ago required a tough response from the IRS and the courts, and the courts sometimes used language (and analysis) in addressing these transactions that was potentially much broader in its application. In *Cross Refined Coal*, the DC Circuit essentially concluded that a tax-shelter case like *ASA Investerings* needed to be viewed in the light of the particular issues raised by tax shelters, so that the broad statements in *ASA Investerings* could be ignored in addressing the tax treatment of a partnership which was engaged in a bona fide business (even if that business made economic sense only because of tax credits provided by Congress). Likewise, the DC Circuit appropriately rejected the IRS' attempt to bring the economic substance doctrine into play with respect to a business where Congress had expressly provided incentives for taxpayers to engage in that business. Thus, the DC Circuit limited the potentially-broad scope of its own prior decisions to situations in which those decisions were intended to apply (tax shelters), concluding that those rules did not apply outside of the tax shelter arena.

II.C.10. Whether Tenancy-in-Common or other Arrangement Constitutes a Partnership

Taxation as a partnership, although generally more flexible than corporate taxation, might be more unfavorable than taxation as co-owners who are not partners. For example, if co-owners have different goals regarding whether to reinvest sale proceeds or engage in a Code § 1031 like-kind exchange,[577] they might want to unwind anything that makes them considered partners.[578] Also, the Code § 121 exclusion for gain on the sale of a residence does not apply when spouses hold their residence in a partnership.[579] On the other hand, partnership income tax reporting generally is easier than separately listing every item on each co-owner's income tax return.

Those holding properties as tenants-in-common[580] or a trust created by its beneficiaries[581] should consider whether they are deemed to have formed a partnership; for whether a loan may be recharacterized as an equity investment in a partnership, see part II.G.20.b When Debt Is Recharacterized as Equity. Generally, as a matter of state law, "the association of two or more persons to carry on as co-owners a business for profit forms a partnership, whether or not the persons intend to form a partnership."[582] Furthermore, the Uniform Partnership Act provides

---

[577] See part II.G.16 Like-Kind Exchanges.

[578] For how to unwind a partnership in anticipation of a possible Code § 1031 exchange, see "Like-Kind Exchanges of Partnership Properties," *The Tax Adviser*, page 812, December 2008. Letter Ruling 9741017 drove this point home in the following situation:

> … each of the brothers, A and B, owns a one-half interest in Taxpayer, which itself owns ten rental real properties. A and B have responsibility for making major decisions regarding their properties. Management of the properties is performed by a property management corporation of which A and B are equal stockholders, but are no longer employees. A and B represent that they have never executed any partnership agreement regarding Taxpayer or considered themselves to be anything other than equal owners of the properties. For the five consecutive tax years 19x1 to 19x5, however, all net income and losses of Taxpayer relating to the properties have been reported on Form 1065, a Partnership Return.
>
> A and B represent that irreconcilable differences have developed between them regarding their ownership of the properties. Moreover, A and B are considering estate planning issues relating to the properties. To address those issues, A and B propose a like-kind exchange between themselves involving nine of the properties. After the exchange, six of the properties will be owned entirely by B, and three will be owned by A. The tenth property will continue to be owned by A and B as co-owners.

The ruling held:

> Without making a determination under Rev. Rul. 75-374 regarding A's and B's joint business activities relating to the properties, we note a crucial test under case law of whether the co-owners of property intended to create a partnership, as evidenced by their actions, notwithstanding the lack of characterization of their relationship. See *Estate of Levine*, 72 T.C. 780, 785 (1979). In this instance, we believe that Taxpayer's filing of partnership tax returns for several tax years indicates an intention to be taxed as a partnership. Accordingly, we conclude that A's and B's co-ownership of Taxpayer constitutes a partnership under section 761(a) and the regulations thereunder rather than a mere co-ownership.
>
> Since an exchange of partnership interests can not qualify for deferral under section 1031(a)(1) by reason of section 1031(a)(2)(D) we can not rule that the transaction qualifies for deferral as a like-kind exchange.

[579] *Farah v. Commissioner*, T.C. Memo. 2007-369, and Letter Ruling 200119014.

[580] For an excellent discussion of taxation of tenants-in-common, as well as when such an arrangement is taxed as a partnership, see Tucker and Langlieb, fn. 1918. In the real estate context, see also fn. 366.

[581] See parts II.D.1 Trust as a Business Entity and II.K.2.b.iii Participating in Business Activities Does Not Convert a Trust Created by Only One Grantor into a Business Entity.

[582] Section 202(a) of the Uniform Partnership Act ("UPA"), found at http://www.uniformlaws.org/Act.aspx?title=Partnership Act (1997) (Last Amended 2013) (general description of the UPA) or http://www.uniformlaws.org/Shared/Docs/Partnership/UPA%20_Final_2014_2015aug19.pdf (text of the UPA).

standards for forming a partnership, even if the partners do not intend to form a business entity.[583]

Co-owners of real estate might form a partnership with respect to operations conducted on the real estate without the partnership applying to the ability to sell the real estate itself,[584] but equitable principles are likely to determine whether the court finds a partnership.[585]

As a matter of federal tax law, regulations provide a fundamental definition:[586]

> *In general*. The Internal Revenue Code prescribes the classification of various organizations for federal tax purposes. Whether an organization is an entity separate from its owners for federal tax purposes is a matter of federal tax law and does not depend on whether the organization is recognized as an entity under local law.

---

[583] An excerpt accompanies fn 618 in part II.C.11 General Partnership.

[584] *Holton v. Guinn*, 76 F. 96 (W.D. Mo. 1896), held, "It might be conceded, for the purpose of this case, that a partnership existed between the parties in conducting a business on these lands, without affecting the legal status of the land or property, for the separate properties may be employed in partnership business." Although one of a few co-tenants might engage in conduct suggesting a partnership, that conduct must be authorized to find a partnership. Looking to the actions of all of the co-owners and finding a mere tenancy in common, *Hudson v. French*, 241 S.W. 443 (W.D. Mo. 1922), quoted *Holton*:

> "Where the conduct and acts of the parties in dealing with the estate may with reason be referred to the office of a tenant in common, the courts, in construing those acts, will prefer to attribute them to that relation."

Continuing this line of reasoning, *Thomas v. Lloyd*, 17 S.W.3d 177 (S.D. Mo. 2000), found a mere tenancy in common regarding real estate, analyzing the law as follows:

> In attempting to demonstrate that the parties intended for the real estate to be a partnership asset, Defendant points to the joint ownership of the farm and the fact that the parties operated the partnership cattle business on the farm as evidence that the two understood and intended for the farm to be a partnership asset. His reliance on those facts is misplaced, however. A joint purchase of real estate by two individuals does not, in and of itself, prove the land is a partnership asset. See *Hudson*, 241 S.W. at 446; 68 C.J.S. Partnership § 73, at 274–75 (1998). On the contrary, when land is conveyed to partnership members without any statement in the deed that the grantees hold the land as property of the firm, there is a presumption that title is in the individual grantees. 68 C.J.S. Partnership § 75, at 277 (1998). Moreover, "[e]vidence that the land is used by the firm is of itself insufficient to rebut the presumption." *Id.* The mere use of land by a partnership does little to show the land is owned by the partnership. 1 Bromberg and Ribstein on Partnership, § 3.02(b), at 3:7 (Release No. 7—1999–2 Supp.). Standing alone, evidence of partnership usage does not compel a finding that the land is a partnership asset. *Mischke v. Mischke*, 247 Neb. 752, 530 N.W.2d 235, 240 (1995); *In re Estate of Schreiber*, 227 N.W.2d 917, 925[9] (Wis. Sup. 1975). See *Shawneetown Feed and Seed Co. v. Ford*, 468 S.W.2d 54, 56 (Mo. App. 1971).

The result may be different if partnership funds were used to buy the property. *Engeman v. Engeman*, 123 S.W.3d 227 (W.D. Mo. 2003).

[585] *State Auto. and Cas. Underwriters v. Johnson*, 766 S.W.2d 113 (S.D. 1969), held that the building, furniture and fixtures destroyed by the fire constituted partnership property when a 50% tenant in common received insurance proceeds equal to 100% of the value of the property destroyed. Although the partnership agreement was terminated:

> We hold the trial court's findings that no final division had ever been made of the partnership property or partnership debts, that the partnership affairs were never wound up, and that the partnership had not been terminated at the time of the fire are supported by substantial evidence and are not against the weight of the evidence, and that in making such findings the trial court neither erroneously declared nor erroneously applied the law.

[586] Reg. § 301.7701-1(a)(1).

Reg. § 301.7701-1(a)(2) provides:[587]

> *Certain joint undertakings give rise to entities for federal tax purposes*. A joint venture or other contractual arrangement may create a separate entity for federal tax purposes if the participants carry on a trade, business, financial operation, or venture and divide the profits therefrom. For example, a separate entity exists for federal tax purposes if co-owners of an apartment building lease space and in addition provide services to the occupants either directly or through an agent. Nevertheless, a joint undertaking merely to share expenses does not create a separate entity for federal tax purposes. For example, if two or more persons jointly construct a ditch merely to drain surface water from their properties, they have not created a separate entity for federal tax purposes. Similarly, mere co-ownership of property that is maintained, kept in repair, and rented or leased does not constitute a separate entity for federal tax purposes. For example, if an individual owner, or tenants in common, of farm property lease it to a farmer for a cash rental or a share of the crops, they do not necessarily create a separate entity for federal tax purposes.

The controlling U.S. Supreme Court case held:[588]

> The question is not whether the services or capital contributed by a partner are of sufficient importance to meet some objective standard supposedly established by the *Tower* case, but whether, considering all the facts—the agreement, the conduct of the parties in execution of its provisions, their statements, the testimony of disinterested persons, the relationship of the parties, their respective abilities and capital contributions, the actual control of income and the purposes for which it is used, and any other facts throwing light on their true intent—the parties in good faith and acting with a business purpose intended to join together in the present conduct of the enterprise.

Presenting sufficient evidence to raise a genuine issue of material fact as to the parties' intent prevents the IRS from winning on summary judgment;[589] the IRS can't succeed merely by showing that the generation of tax losses was one of the purposes of a partnership's

---

[587] Code § 7701(a)(2) provides:

> The term "partnership" includes a syndicate, group, pool, joint venture, or other unincorporated organization, through or by means of which any business, financial operation, or venture is carried on, and which is not, within the meaning of this title, a trust or estate or a corporation; and the term "partner" includes a member in such a syndicate, group, pool, joint venture, or organization.

Reg. § 301.7701-1(a)(2) is also important to help determine whether a tenancy-in-common is eligible for a like-kind exchange. See fn 1644 in part II.G.16.b Pre-2018 Code § 1031.

[588] *Commissioner v. Culbertson*, 337 U.S. 733 (1949), clarifying *Commissioner v. Tower*, 327 U.S. 280 (1946).

[589] In denying summary judgment to the government, *Broadwood Investment Fund, LLC v. U.S.*, 116 A.F.T.R.2d 2015-5492 (9th Cir. 2015), held:

> In particular, Petitioners presented evidence that some of the investment materials projected that the partnerships could be profitable, and that the partners performed due diligence on the assets before acquiring them. Petitioners also presented evidence of efforts made to collect on the debts owned by the partnerships. And there is no dispute that the partnerships allocated distributions, profits, and losses to partners *pro rata*. The government also presented substantial evidence in support of its determination that the partnerships were shams, and we express no opinion on how this issue ultimately should be resolved on the merits. But the genuine factual dispute as to the partners' intent precludes summary judgment on the issue.

formation.[590] On the other hand, if a partnership return is filed for a tenant-in-common arrangement, a co-owner who objects to partnership treatment must file Form 8282 asserting that the Schedule K-1 is erroneous and that the co-owner is adopting a position inconsistent with it; failure to do so precludes the taxpayer from challenging partnership treatment.[591]

---

[590] *Peking Investment Fund LLC v. Commissioner*, Tax Court Docker No. 12772-09 Order 2/13/2018, regarding a distressed asset/debt ("DAD") transaction:

> Respondent has moved for partial summary adjudication in his favor that his FPAA properly disallowed a loss of $26,903,619 that PIF claimed for its taxable year ended December 31, 2001, as a result of its exchange of an interest in one portfolio of nonperforming loans (NPLs) for another. Specifically, PIF transferred an interest in a portfolio of NPLs originated by China Construction Bank (the CCB NPL portfolio) that it had received as a contribution from China Cinda Asset Management Corporation (Cinda). In exchange, PIF received interests in portfolios of NPLs originated by Korean Development Bank (the KDB NPL portfolios)….
>
> To determine whether respondent has submitted sufficient evidence to establish that, as a matter of law, PIF should be disregarded as a sham, we must first identify the relevant legal standard. The prior cases that have disregarded DAD partnerships as shams applied the Culbertson test. See *Southgate Master Fund, LLC v. United States*, 659 F.3d 466, 485 (5th Cir. 2011); *Kenna Trading, LLC v. Commissioner*, 143 T.C. 322, 351 (2014); *Superior Trading, LLC v. Commissioner*, 137 T.C. at 81; *Russian Recovery Fund Ltd. v. United States*, 122 Fed. Cl. At 615. And, as noted above, the parties before us appear to agree that *Culbertson* provides the governing test. Therefore, for purposes of the present motion, we will treat *Culbertson* test as the legal standard governing the recognition of a partnership for Federal income tax purposes. But see *AD Inv. 2000 Fund, LLC v. Commissioner*, T.C. Memo. 2015-223, at *25 (observing that Culbertson predated entity classification regulations adopted in 1997 that "may place the question of whether there is a tax-recognized entity ahead of the classification of the entity as a partnership or corporation for tax purposes"), vacated and superseded on reconsideration, T.C. Memo. 2016-226….
>
> The mere fact that the generation of tax losses was one of the purposes of a partnership's formation would not justify disregarding the partnership as a sham under the Culbertson test. That test requires us to ask "whether, considering all the facts … the parties in good faith and acting with a business purpose intended to join together in the present conduct of … [a business] enterprise." *Commissioner v. Culbertson*, 337 U.S. at 742. Even if the generation of tax losses is the primary purpose for a partnership's formation, the partnership may also have as a secondary purpose the conduct of a business enterprise. To prevail in disregarding a DAD partnership as a sham under *Culbertson*, the Commissioner must establish that carrying out a business of collecting NPLs was so minimal a factor in the decision to form the partnership that it can be dismissed. In prior cases in which this Court and others have disregarded DAD partnerships as shams, the evidence showed that the partners ultimately had no real interest in collecting the NPLs. See, *e.g.*, *Superior Trading, LLC v. Commissioner*, 728 F.3d at 680 (noting that partnership's "purportedly active partner" made only "a few, feeble attempts" at collection and dismissing those efforts as "window dressing" because the partnership had not taken measures necessary under Brazilian law to pursue collection); *Southgate*, 659 F.3d at 485 (reasoning that partners' decision to abandon efforts to improve collection by servicer "manifests an unmistakable intent to forego the joint conduct of a profit-seeking venture"); *Kenna Trading, LLC v. Commissioner*, 143 T.C. at 353 (finding ambiguities in the record regarding the identity of the partners and their proportionate interests and observing that "[p]arties genuinely embarking on a joint business endeavor … would not accept such ambiguity"). But if the facts show an objective of profiting from collection, even though that objective may be outweighed by investors' objective of realizing the benefit of substantial tax losses, the partnership should not be disregarded as a sham under *Culbertson*.
>
> … the parties' interest in or indifference to collections on PIF's NPL portfolio is a contested question of fact to be resolved at trial.

[591] *Gluck v. Commissioner*, T.C. Memo. 2020-66, *aff'd* 129 A.F.T.R.2d 2022-1103 (2nd Cir. 3/17/2022).

The most commonly cited factors in federal tax case law, none of which is conclusive, are:[592]

- [t]he agreement of the parties and their conduct in executing its terms;
- the contributions, if any, which each party has made to the venture;[593]
- the parties' control over income and capital and the right of each to make withdrawals;[594]
- whether each party was a principal and coproprietor, sharing a mutual proprietary interest in the net profits and having an obligation to share losses,[595] or whether one party was the agent or employee of the other, receiving for his services contingent compensation in the form of a percentage of income;
- whether business was conducted in the joint names of the parties;
- whether the parties filed Federal partnership returns or otherwise represented to [the IRS] or to persons with whom they dealt that they were joint venturers;
- whether separate books of account were maintained for the venture; and
- whether the parties exercised mutual control over and assumed mutual responsibilities for the enterprise.

Furthermore:[596]

> [T]he parties, to form a valid tax partnership, must have two separate intents: (1) the intent to act in good faith for some genuine business purpose and (2) the intent to be partners, demonstrated by an intent to share "the profits and losses." If the parties lack either intent, then no valid tax partnership has been formed. To determine whether the parties had these intents, a court must consider "all the relevant facts and circumstances," including (a) "the agreement," (b) "the conduct of the parties in execution of its provisions," (c) the parties' statements, (d) "the testimony of disinterested persons," (e) "the relationship of the parties," (f) the parties' "respective abilities and

[592] *Luna v. Commissioner*, 42 T.C. 1067, 1077-78 (1964).
[593] See part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership.
[594] This factor is not, by itself, sufficient to prove the existence of a partnership. *Azimzadeh v. Commissioner*, T.C. Memo. 2013-169.
[595] Later cases held that, if a purported partner lacks any meaningful downside or upside potential, that person is not a partner. *Historic Boardwalk Hall, LLC v. Commissioner*, 694 F.3d 425 (3rd Cir. 2012), *cert. den.* 2013 WL 249846 (5/28/2013); *Virginia Historic Tax Credit Fund 2001, LP v. Commissioner*, 107 AFTR.2d 2011-1523 (4th Cir. 2011). On the other hand, a mere interest in future capital appreciation might suffice. See CCA 201326018, discussed in Banoff's and. Lipton's Shop Talk column, "General Partners Who Only Share in Capital Appreciation," *Journal of Taxation* (8/2013) (in-depth discussion of the issue of treating as a partner someone with no interest in the current year's operating profits) and their follow-up, "General Partners Who Only Share in Future Years' Profits: TEFRA and Beyond," *Journal of Tax*ation (5/2014).
[596] *Chemtech Royalty Associates, L.P. v. U.S.*, 114 A.F.T.R.2d 2014-5940 (5th Cir 2014), quoting *Southgate Master Fund, L.L.C. ex rel. Montgomery Capital Advisors, LLC v. United States*, 659 F.3d 466, 488 (5th Cir. 2011).

> capital contributions," (g) "the actual control of income and the purposes for which it is used," and (h) "any other facts throwing light on their true intent."

Although this case dealt with an insurance agent, it has been cited in many other situations, including CCA 201323015 (joint venture between two corporations constituted a partnership because of their "sharing in the net profits and losses from the manufacture, development, and marketing of" [a particular undisclosed product]), *Holdner v. Commissioner*, T.C. Memo. 2010-175 (presumption of partners holding equal interests), *aff'd* 110 A.F.T.R.2d 2012-6324 (9th Cir. unpublished summary opinion), and *6611, Ltd., Ricardo Garcia, Tax Matters Partner, v. Commissioner*, T.C. Memo. 2013-49 (disregarding a partnership for purposes of applying IRS partnership audit procedures). In the context of whether an arrangement to provide services that awards equity-type incentives might constitute a partnership, see part III.B.7.c.viii Creative Bonus Arrangements.

Rev. Rul. 70-435 described a situation and ruled:

> The taxpayer, a theatrical performer, enters into an agreement with a producer whereby the taxpayer and the producer agree to share the profits and losses from the production of a play. Under the agreement the producer is to furnish the cash necessary to produce the play and will assume the usual duties and obligations of a producer. The taxpayer will play the leading role in the production and will also direct the play. In addition, the taxpayer is responsible for supervising various aspects of the production itself, including the hiring of other performers and the designing of scenery. The agreement further provides that no more than 25 percent of the taxpayer's share of the net profits from the play are to be paid to him annually during the run of the play. The net profits accumulated for the taxpayer are to be paid him in equal amounts annually for a period of four years commencing with the closing of the play. Provision is also made for the actor to obtain periodic financial statements as to the income and expenditures relating to the production of the play.
>
> In this case the individual performer and the producer are each acting in his own right; the proposed production of the play is a joint venture considered a partnership under section 761(a) of the Code and the taxpayer is neither an employee nor an independent contractor as to the producer. This joint venture is required to file a return for each taxable year under section 6031 of the Code, computing the taxable income of the partnership under section 703 and the regulations thereunder. Pursuant to sections 702 and 706 of the Code and the regulations thereunder, each partner is required, in determining his own income tax to take into account his distributive share (whether or not distributed) of each class or item of partnership income, gain, loss, deduction or credit, determined under the provisions of the partnership agreement pursuant to section 704, for each partnership year ending within or with his own taxable year. The effect of this is that the performer taxpayer's distributive share of the net profits from the play is includible in his taxable income in his first taxable year ending with or after the first taxable year of the partnership, although the joint venture retains physical possession thereof by virtue of the arrangement with the taxpayer who, in substance, has thus authorized it to take possession and hold such net profits for him for distribution at a later time. Thereafter, the taxpayer's proportionate share of the net profits for each taxable year of the joint venture is includible in his gross income for each taxable year of his which ends with or after the taxable year of the joint venture.

Note that, by getting paid in later years for current services, the service partner in Rev. Rul. 70-435 did not have deferred compensation; rather the service partner had a capital account to be paid later.[597] This paves the way for providing golden handcuffs without the complexity of deferred compensation.[598]

LAFA 20161101F asserted that in an investor in a coal production partnership was not entitled to the related credits because the capital contributions were based on future production and were nonrecourse and any chance of profit other than through tax credits was small.

The Tax Court has "consistently disregarded entities that attempt to generate artificial losses by exploiting the partnership tax rules."[599] When a partnership is disregarded for tax purposes, partnership income rules no longer apply, and one or more of the purported partners will be deemed to have engaged in the partnership's activities.[600]

If preferred payments are relatively fixed and certain, the following facts need to be considered:[601]

- whether the partners really and truly intended to join together for the purpose of carrying on the business and sharing in the profits and losses or both

- whether the preferred partner was a bona fide partner because the payments it expected to receive were essentially fixed and relatively secure[602]

---

597 See part II.Q.1.d Nonqualified Deferred Compensation.

598 See part II.M.4.f.i Overview of Profits Interest; Contrast with Code § 409A.

599 *New Millennium Trading, LLC v. Commissioner*, T.C. Memo. 2017-9, supporting this statement with: See *AD Inv. 2000 Fund, LLC v. Commissioner*, T.C. Memo. 2016-226; *436, Ltd. v. Commissioner*, T.C. Memo. 2015-28; *Markell Co. v. Commissioner*, T.C. Memo. 2014-86; *6611, Ltd. v. Commissioner*, T.C. Memo. 2013-49; *Palm Canyon X Invs., LLC v. Commissioner*, T.C. Memo. 2009-288; see also *New Phoenix Sunrise Corp. v. Commissioner*, 132 T.C. 161 (2009) (disallowing the losses because the "transaction lacked economic substance"), *aff'd*, 408 F.App'x 908 (6th Cir. 2010); *Humboldt Shelby Holding Corp. v. Commissioner*, T.C. Memo. 2014-47 (similar), *aff'd* per summary order, 606 F.App'x 20 (2d Cir. 2015). Each scheme involved an entity (partnership or LLC) whose sole purpose was to provide its members with a high-basis membership interest to be disposed of at a loss; or, on its redemption, to put high-basis entity assets into the hands of the member, who would then dispose of them at a loss.

600 *New Millennium Trading, LLC v. Commissioner*, T.C. Memo. 2017-9, supporting this statement with: See, *e.g.*, *6611, Ltd. v. Commissioner*, T.C. Memo. 2013-49. A disregarded partnership has no identity separate from its owners, and we treat is as an agent or nominee. See *Tigers Eye Trading v. Commissioner*, 138 T.C. at 94, 99. Pursuant to section 6233(a) and (b), TEFRA procedures still apply to the entity, its items, and persons holding an interest in the entity as long as the purported partnership filed a return, which NMT did for tax year 1999. See sec. 6233(b); sec. 301.6233-1987). Thus, we have jurisdiction to determine any items that would have been "partnership items", as defined in section 6231(a)(3), and section 301.6231(a)(3)-1, Proced. & Admin. Regs., had NMT been a valid partnership for tax purposes. See *Tigers Eye Trading v. Commissioner*, 138 T.C. at 97.

601 *Principal Life Ins. Co. & Subs v. U.S.*, 120 Fed. Cl. 41 (Ct. Fed. Cl. 2/4/2015).

602 The court also held:

> Even if a partnership exists, "consideration whether an interest has the prevailing character of debt or equity can be helpful in analyzing whether, for tax purposes, the interest should be deemed a bona fide equity participation in a partnership." [citations omitted] A party will not be considered a bona fide partner in a partnership if its interest is more akin to a debt-like interest,

- whether the existence of a preferred equity interest in a partnership, providing a relatively secure return, is sufficient to treat the holder of the interest as other than a partner

When one person contributes capital, another contributes management skill, and the person contributing management skill takes reduced compensation and a 20% share of the sale proceeds after the moneyed partner receives a nice preferred return, the person contributing management skill is a partner who can treat the receipt of 20% of the sale proceeds as capital gain.[603]

In light of uncertainty, generally co-owners may elect not to be treated as a partnership in either of two circumstances:[604]

(2) *Investing partnership*. Where the participants in the joint purchase, retention, sale, or exchange of investment property –

(i) Own the property as coowners,[605]

(ii) Reserve the right separately to take or dispose of their shares of any property acquired or retained, and

(iii) Do not actively conduct business or irrevocably authorize some person or persons acting in a representative capacity to purchase, sell, or exchange such investment property, although each separate participant may delegate authority to purchase, sell, or exchange his share of any such investment property for the time being for his account, but not for a period of more than a year, …. [or]

> with little or no risk aside from credit risk, than to an equity participation, a share of ownership in which the party takes on true entrepreneurial risk in the partnership venture. [citations omitted] In the court's view, significant questions of fact remain as to how the interests in question should be treated in this regard, precluding a ruling on summary judgment….

[603] *U.S. v. Stewart*, 116 A.F.T.R.2d 2015-5720 (S.D. Tex. 8/20/2015), relying on *Haley v. Commissioner*, 203 F.2d 815, 818 (5th Cir. 1953). *Stewart* did not cite *Luna* or any of the traditional cases defining what a partnership is.

[604] Reg. § 1.761-2(a)(2), (3). CCA 201323015 asserted that a joint venture between two corporations could not make this election. It was not an investment partnership under Reg. § 1.761-2(a)(2) for either one of two reasons:

- The product produced did not qualify as "investment property" (looking to the Code § 148(b)(2) definition of "investment property" the Reg. § 1.148-1(e) definition of "investment-type property").
- It actively conducted the business of producing and selling the product.

The joint venture failed the requirements of Reg. § 1.761-2(a)(3) because the two corporations jointly sold the product.

[605] [my footnote – not found in the regulations that are quoted above:] The IRS has asserted that "coowners" means direct co-ownership and not ownership through a commonly owned LLC. FSA 200216005. Rev. Rul. 2004-86 confirmed that position, addressing what happens if a Delaware Statutory Trust does not qualify as a unit investment trust:

> In addition, because the assets of DST will not be owned by the beneficiaries as coowners under state law, DST will not be able to elect to be excluded from the application of subchapter K. See § 1.761-2(a)(2)(i).

Rev. Rul. 2004-86 is discussed in part II.D.4.a.i Classifying an Investment Trust in the text accompanying and following fn 655.

(3) *Operating agreements*. Where the participants in the joint production, extraction, or use of property—

(i) Own the property as coowners, either in fee or under lease or other form of contract granting exclusive operating rights, and

(ii) Reserve the right separately to take in kind or dispose of their shares of any property produced, extracted, or used, and

(iii) Do not jointly sell services or the property produced or extracted, although each separate participant may delegate authority to sell his share of the property produced or extracted for the time being for his account, but not for a period of time in excess of the minimum needs of the industry, and in no event for more than 1 year....

This election-out of partnership treatment applies only for the purposes of the partnership income tax rules of subchapter K.[606]

A group of owners of undivided interests in rental real property[607] might seek a private letter ruling that their ownership does not rise to the level of being a partnership. To do so, they must satisfy the following conditions:[608]

> Each of the co-owners must hold title to the Property (either directly or through a disregarded entity) as a tenant in common under local law. Thus, title to the Property as a whole may not be held by an entity recognized under local law.

---

[606] In *Methvin v. Commissioner*, T.C. Memo. 2015-81, *aff'd* 653 Fed. Appx. 616 (10th Cir. 6/24/2016), the Tax Court held:

> Petitioner also argues that in article 14 of the operating agreement the parties specifically elected to be excluded from the application of subchapter K and therefore cannot be considered a partnership. We have held that making this election "'does not operate to change the nature of the entity. A partnership remains a partnership; the exclusion simply prevents the application of subchapter K. The partnership remains intact and other sections of the Code are applicable as if no exclusion existed.'" *Cokes v. Commissioner*, 91 T.C. at 230-231 (quoting *Bryant v. Commissioner*, 46 T.C. 848, 864 (1966), *aff'd*, 399 F.2d 800 (5th Cir. 1968)). Accordingly, the parties' election under section 761(a) does not prevent us from finding that the operating agreements created a partnership.
>
> We conclude that the working interest owners and well operator created a pool or joint venture for operation of the wells. Accordingly, petitioner's income from the working interests was income from a partnership of which he was a member under the broad definition of "partnership" found in section 7701(a)(2). See *Cokes v. Commissioner*, 91 T.C. at 232; *Bentex Oil Corp. v. Commissioner*, 20 T.C. 565 (1953). Therefore, petitioner is liable for self-employment tax on the net income received from his working interests.

[607] For an excellent discussion of taxation of tenants-in-common, as well as when such an arrangement is taxed as a partnership, see Tucker and Langlieb, fn. 1918. In Letter Ruling 200826005, two individuals held a number of properties together, and their tenancy-in-common agreements, which included buy-sell provisions, were held not to constitute a partnership. As natural products of the land that are attached to the land, commercial plants, that were mature, had complex root systems, and were expected to produce a commercially harvestable crop, constituted real estate under Code § 865. Letter Ruling 201424017.

[608] Rev. Proc. 2002-22, Section 6, as modified by Rev. Proc. 2003-3, Section 1.02(8), which deleted Sections 6.03 and 6.06 of Rev. Proc. 2002-22.

The number of co-owners must be limited to no more than 35 persons. For this purpose, “person” is defined as in § 7701(a)(1), except that a husband and wife are treated as a single person and all persons who acquire interests from a co-owner by inheritance are treated as a single person.

The co-owners may enter into a limited co-ownership agreement that may run with the land. For example, a co-ownership agreement may provide that a co-owner must offer the co-ownership interest for sale to the other co-owners, the sponsor, or the lessee at fair market value (determined as of the time the partition right is exercised) before exercising any right to partition (see section 6.06 of this revenue procedure for conditions relating to restrictions on alienation); or that certain actions on behalf of the co-ownership require the vote of co-owners holding more than 50 percent of the undivided interests in the Property (see section 6.05 of this revenue procedure for conditions relating to voting).

The co-owners must retain the right to approve the hiring of any manager, the sale or other disposition of the Property, any leases of a portion or all of the Property, or the creation or modification of a blanket lien. Any sale, lease, or re-lease of a portion or all of the Property, any negotiation or renegotiation of indebtedness secured by a blanket lien, the hiring of any manager, or the negotiation of any management contract (or any extension or renewal of such contract) must be by unanimous approval of the co-owners. For all other actions on behalf of the co-ownership, the co-owners may agree to be bound by the vote of those holding more than 50 percent of the undivided interests in the Property. A co-owner who has consented to an action in conformance with this section 6.05 may provide the manager or other person a power of attorney to execute a specific document with respect to that action, but may not provide the manager or other person with a global power of attorney.

If the Property is sold, any debt secured by a blanket lien must be satisfied and the remaining sales proceeds must be distributed to the co-owners.

Each co-owner must share in all revenues generated by the Property and all costs associated with the Property in proportion to the co-owner’s undivided interest in the Property. Neither the other co-owners, nor the sponsor, nor the manager may advance funds to a co-owner to meet expenses associated with the co-ownership interest, unless the advance is recourse to the co-owner (and, where the co-owner is a disregarded entity, the owner of the co-owner) and is not for a period exceeding 31 days.

The co-owners must share in any indebtedness secured by a blanket lien in proportion to their undivided interests.

A co-owner may issue an option to purchase the co-owner’s undivided interest (call option), provided that the exercise price for the call option reflects the fair market value of the Property determined as of the time the option is exercised. For this purpose, the fair market value of an undivided interest in the Property is equal to the co-owner’s percentage interest in the Property multiplied by the fair market value of the Property as a whole. A co-owner may not acquire an option to sell the co-owner’s undivided interest (put option) to the sponsor, the lessee, another co-owner, or the lender, or any person related to the sponsor, the lessee, another co-owner, or the lender.

The co-owners' activities must be limited to those customarily performed in connection with the maintenance and repair of rental real property (customary activities). See Rev. Rul. 75-374, 1975-2 C.B. 261. Activities will be treated as customary activities for this purpose if the activities would not prevent an amount received by an organization described in § 511(a)(2) from qualifying as rent under § 512(b)(3)(A) and the regulations thereunder. In determining the co-owners' activities, all activities of the co-owners, their agents, and any persons related to the co-owners with respect to the Property will be taken into account, whether or not those activities are performed by the co-owners in their capacities as co-owners. For example, if the sponsor or a lessee is a co-owner, then all of the activities of the sponsor or lessee (or any person related to the sponsor or lessee) with respect to the Property will be taken into account in determining whether the co-owners' activities are customary activities. However, activities of a co-owner or a related person with respect to the Property (other than in the co-owner's capacity as a co-owner) will not be taken into account if the co-owner owns an undivided interest in the Property for less than 6 months.

The co-owners may enter into management or brokerage agreements, which must be renewable no less frequently than annually, with an agent, who may be the sponsor or a co-owner (or any person related to the sponsor or a co-owner), but who may not be a lessee. The management agreement may authorize the manager to maintain a common bank account for the collection and deposit of rents and to offset expenses associated with the Property against any revenues before disbursing each co-owner's share of net revenues. In all events, however, the manager must disburse to the co-owners their shares of net revenues within 3 months from the date of receipt of those revenues. The management agreement may also authorize the manager to prepare statements for the co-owners showing their shares of revenue and costs from the Property. In addition, the management agreement may authorize the manager to obtain or modify insurance on the Property, and to negotiate modifications of the terms of any lease or any indebtedness encumbering the Property, subject to the approval of the co-owners. (See section 6.05 of this revenue procedure for conditions relating to the approval of lease and debt modifications.) The determination of any fees paid by the co-ownership to the manager must not depend in whole or in part on the income or profits derived by any person from the Property and may not exceed the fair market value of the manager's services. Any fee paid by the co-ownership to a broker must be comparable to fees paid by unrelated parties to brokers for similar services.

All leasing arrangements must be bona fide leases for federal tax purposes. Rents paid by a lessee must reflect the fair market value for the use of the Property. The determination of the amount of the rent must not depend, in whole or in part, on the income or profits derived by any person from the Property leased (other than an amount based on a fixed percentage or percentages of receipts or sales). See section 856(d)(2)(A) and the regulations thereunder. Thus, for example, the amount of rent paid by a lessee may not be based on a percentage of net income from the Property, cash flow, increases in equity, or similar arrangements.

The lender with respect to any debt that encumbers the Property or with respect to any debt incurred to acquire an undivided interest in the Property may not be a related person to any co-owner, the sponsor, the manager, or any lessee of the Property.

Except as otherwise provided in this revenue procedure, the amount of any payment to the sponsor for the acquisition of the co-ownership interest (and the amount of any fees paid to the sponsor for services) must reflect the fair market value of the acquired co-ownership interest (or the services rendered) and may not depend, in whole or in part, on the income or profits derived by any person from the Property.

A co-tenancy agreement satisfied these requirements, where the initial landlord owned 100% of the property through a disregarded LLC and had the right to sell fractional interests to the tenant (or the tenant's disregarded LLC) for fair market value, determined taking the initial appraised value and increasing it annually by a flat percentage that was a reasonable appreciation factor.[609]

See also part II.D.1 Trust as a Business Entity for whether pooling together ownership interests rises to the level of a business entity, when the owners used a trust to own real estate – especially for guidelines on whether a lease arrangement might separate ownership of the real estate from the activity done on the property.

Spouses who own and operate a business as co-owners and who materially participate[610] may elect to treat the business as a disregarded entity (a "qualified joint venture")[611] if it is not in the name of a limited partnership, limited liability company or other state law entity.[612] If both spouses make that election, then "all items of income, gain, loss, deduction, and credit shall be divided between the spouses in accordance with their respective interests in the venture, and each spouse shall take into account such spouse's respective share of such items as if they were attributable to a trade or business conducted by such spouse as a sole proprietor.[613] Thus, each reports his or her portion of business income on a separate Schedule C or E.[614] See also Married Couples in Business (irs.gov).

---

[609] Letter Ruling 201622008.

[610] Code § 761(f)(2)(B) cross-references Code § 469(h) but eliminates the application of Code § 469(h)(5), the latter of which would let each spouse count the other's participation. For more on Code § 469(h), see part II.K.1.a Counting Work as Participation in Business under the Passive Loss Rules.

[611] Code §761(f)(2), effective tax years beginning after December 31, 2006.

[612] If one goes to www.irs.gov, searches "qualified joint venture," and follows the hyperlink entitled "Election for Husband and Wife Unincorporated Businesses," then one can find (at https://www.irs.gov/businesses/small-businesses-self-employed/election-for-husband-and-wife-unincorporated-businesses when I last searched) the IRS' view that a state law entity owned by a married couple cannot qualify for treatment as a qualified joint venture, which is consistent with a related position taken in fn 605. Similarly, an LLC owned by spouses does not qualify under special procedures for a favorable private letter ruling, which pre-date Code § 761(f) but remain in effect; see Section 6.01 of Rev. Proc. 2002-22 (which does, however, allow each spouse to have a single member LLC and have those LLCs own the properties as tenants in common). The IRS' view does not appear to be confirmed or refuted by the legislative history. *Argosy Technologies, LLC v. Commissioner*, T.C. Memo. 2018-35, subjected to penalties, for late filing of 2010 and 2011 returns, an LLC owned 100% by a married couple; the LLC protested, claiming it was a disregarded entity, but the court held that filing partnership returns admitted to partnership status and pointed out that there was no evidence of a Code § 761(f) election. The court did not reach the merits of whether a Code § 761(f) election could have been made.

[613] Code §761(f)(1), effective tax years beginning after December 31, 2006.

[614] Chief Counsel Advice 200816030 held that active rental that qualified as a Code § 761(f) trade or business did not generate self-employment income, reasoning that Code § 1402(17) is intended to allocate income one-half to each spouse rather than overriding various exceptions (including the rental exception) to self-employment tax. This CCA carries much more weight than most CCAs, as it was to the Asst. Division Counsel (Prefiling) (Small Business/Self-Employed) from the Branch Chief, Employment

A purported partnership shall be treated as a lease of property if the arrangement is properly treated as a lease of property, taking into account all relevant factors.[615]

For additional ways that co-owners might escape partnership income tax treatment, see part II.D.4 Disregarding Multiple Owner Trust for Income Tax Purposes.

When an LLC that is taxed as a partnership signed a revenue sharing agreement with a person, held him out as an owner, and treated him as a partner in tax filings, the person was taxed as a partner even though he never signed the LLC's operating agreement and even though the K-1 the LLC issued to him reported only guaranteed payments and no profits interest.[616]

Transitory ownership in a partnership with almost no rights does not make a person a partner:[617]

> In the present case, Organization, as an assignee of Partner, was not a full-fledged partner of Partnership. Partner's assignment of Units to Organization entitled Organization to distributions made with respect to Units while Partner retained all other indicia of ownership of Units. Organization was only an assignee of Partner for one day before the Organization transferred it rights in Units to Corporation in exchange for Note. Partner determined the selling price of Units. Organization's momentary rights to distribution (which are totally controlled by Partner) are not sufficient to make Organization a partner in Partnership. Organization had no meaningful right to participate in Partnership's success or failure and as such, was not in substance a partner of Partnership.

Tax Branch 1 (Exempt Organizations/Employment Tax/Government Entities) and recommended specific procedures for IRS Service Centers. See also "New Law Has Social Security Impact on Husband-Wife Partnerships," *Business Entities* (WG&L), Jan/Feb 2009.

[615] Code § 7701(e)(2).

[616] *Cahill v. Commissioner*, T.C. Memo. 2013-220. This case involved an insurance agent. The court pointed out:

> Petitioner entered into the memorandum of agreement and the revenue sharing agreement, both of which provided for the mechanism under which he would share in the profits of FC/CFC. Moreover, the memorandum of agreement and the revenue sharing agreement stated that FC/CFC would issue petitioner a Form 1099-MISC or a Schedule K-1 with respect to any money he received under either agreement. There is no indication in the record that petitioner objected to receiving a Schedule K-1 on the grounds that he was not a partner.

The court also pointed out that the parties held out the taxpayer as an owner and changed the LLC's name to include the taxpayer's.

[617] CCA 201507018, which also invoked Reg. § 1.701-2 to disregard a transitory interest as a partner in a partnership:

> In this case, Partner purportedly transferred Units in Partnership with a low basis and a high fair market value to Organization, for which Partner took a charitable deduction based on the fair market value of Units on Partner's personal tax return. Subsequently, Partner arranged for Organization to sell those Units to Corp for the Note. As a result of this second purported transfer, Corp takes a deduction for interest payments on Note and a goodwill amortization deduction as a result of Partnership's § 743(b) adjustment. In this way, Partner and Partner affiliates take three deductions for one charitable contribution that never in substance occurred. Transaction significantly reduced Partner and Corp's tax liability. The purported transfer of Units to Organization was necessary to achieve that claimed result. Organization, an assignee of Partner with respect to Units, only momentarily had rights to distributions and no other rights to Units.

II.C.11. General Partnership

In general partnerships, which are governed by the Uniform Partnership Act, all partners have management rights and are jointly and severally liable for the partnership's activities. For how to limit liability, see part II.C.13 Limited Liability Partnership Registration for General Partners in General or Limited Partnerships.

A general partnership can be formed by an express agreement or through an activity in which co-owners work together to try to earn a profit (even if a general partnership was not intended).

The Uniform Partnership Act of 1997 (last amended 2013) (the "Act")[618] § 202, "Formation of Partnership," provides:

(a) Except as otherwise provided in subsection (b), the association of two or more persons to carry on as co-owners a business for profit forms a partnership, whether or not the persons intend to form a partnership.

(b) An association formed under a statute other than this [act], a predecessor statute, or a comparable statute of another jurisdiction is not a partnership under this [act].

(c) In determining whether a partnership is formed, the following rules apply:

(1) Joint tenancy, tenancy in common, tenancy by the entireties, joint property, common property, or part ownership does not by itself establish a partnership, even if the co-owners share profits made by the use of the property.[619]

(2) The sharing of gross returns does not by itself establish a partnership, even if the persons sharing them have a joint or common right or interest in property from which the returns are derived.

(3) A person who receives a share of the profits of a business is presumed to be a partner in the business, unless the profits were received in payment:

(A) of a debt by installments or otherwise;

(B) for services as an independent contractor or of wages or other compensation to an employee;

(C) of rent;

(D) of an annuity or other retirement or health benefit to a deceased or retired partner or a beneficiary, representative, or designee of a deceased or retired partner;

---

618 The Word version is found at https://www.uniformlaws.org/HigherLogic/System/DownloadDocumentFile.ashx?DocumentFileKey=39673426-f648-cbfe-c3a8-c30a13044e63&forceDialog=1. The Uniform Law Commission's web page for the Act is Partnership Act - Uniform Law Commission (uniformlaws.org).

619 [my footnote:] Regarding references below to types of joint ownership, see part II.F.7 Tenancy by the Entirety.

(E) of interest or other charge on a loan, even if the amount of payment varies with the profits of the business, including a direct or indirect present or future ownership of the collateral, or rights to income, proceeds, or increase in value derived from the collateral; or

(F) for the sale of the goodwill of a business or other property by installments or otherwise.

The official Comment elaborates:[620]

> UPA (1997) § 202 combined UPA (1914) §§ 6 and 7, recasting the "definition" of a partnership in UPA (1914) § 6(1) "as an operative rule of law – i.e., "[a] partnership is an association of two or more persons . …" became "the association of two or more persons… forms." The change was stylistic and made no substantive change in the law. The Harmonization Project made no substantive change to this section, except to clarify that this act is not linked to the uniform limited partnership act. See Subsection (b), cmt.
>
> The addition of the phrase, "whether or not the persons intend to form a partnership," merely codifies the universal judicial construction of UPA (1914) § 6(1) that a partnership is created by the association of persons whose intent is to carry on as co-owners a business for profit, regardless of their subjective intention to be "partners." Indeed, they may inadvertently create a partnership despite their expressed subjective intention not to do so. The language of Section 202 alerts readers to this possibility.
>
> **Subsection (a) -** Consistent with the common law and UPA (1914), under this act "coownership" is a key concept. Ownership involves the power of ultimate control (albeit a power that can be substantially diminished by agreement) and a right to share in the profits of the co-owned business. To state that partners are co-owners of a business is to state that: (i) they share in the profits (if any) of the enterprise; and (ii) ab initio at least, they collectively have the power of ultimate control. Consequently:
>
> - mere passive co-ownership of property, as distinguished from using the property to carry on a business, does not establish a partnership, Subsection (c)(1); and
>
> - merely sharing gross revenues is likewise insufficient, Subsection (c)(2).
>
> UPA (1997) added, "whether or not the persons intend to form a partnership" to the UPA (1914) formulation, thereby codifying a rule uniformly applied by courts: Subjective intent to create the legal relationship of "partnership" is irrelevant. What matters is the intent vel non to establish the business relationship that the law labels a "partnership." Thus, a disclaimer of partnership status is ineffective to the extent the parties' intended arrangements meet the criteria stated in this subsection.
>
> **Subsection (b) -** This subsection continues the UPA (1914) concept that the general partnership is the residual form of business association. Accordingly, partnership-like

620 https://www.uniformlaws.org/HigherLogic/System/DownloadDocumentFile.ashx?DocumentFileKey=9e30c4d7-dbed-c173-dfc1-26394e60152d&forceDialog=1.

organizations formed under specially applicable statutes are not within this act. *E.g.*, MONT. CODE ANN. §§ 35-13-101 to 102 (pertaining to mining partnerships).

An arrangement labeled a "joint venture" is a partnership if the arrangement meets the criteria stated in Subsection (a). In fact, in many jurisdictions, the law of general partnerships applies almost without analysis to joint ventures in which the co-venturers share profits. *See Jonathan Woodner Co. v. Laufer*, 531 A.2d 280, 285 n.7 (D.C. 1987) (stating that: (i) "[s]trictly speaking, a joint venture is not the same as a partnership, but there is 'very little law ... applicable to one that does not apply to the other'"; (ii) "the rights and liabilities of joint venturers among themselves are generally governed by the laws of partnership"; and (iii) "[p]rinciples of partnership law, in particular the Uniform Partnership act, apply in most instances to joint ventures") (quoting 46 AM. JUR. 2D JOINT VENTURES § 4, at 25 (1969) and collecting cases).

A limited partnership is not a partnership under this act; a limited partnership is "formed under a statute other than this [act]" (i.e., ULPA (2001) (Last Amended 2013) § 201). Moreover, ULPA (2001) delinked the uniform limited partnership act from the uniform general partnership act. *See* ULPA (2001) (Last Amended 2013) Prefatory Note, *The Decision to "De-Link" and Create a Stand Alone Act*.

An unincorporated nonprofit organization is not a partnership under this act, because the organization is limited to "nonprofit purposes" and therefore cannot "carry on a business" in the traditional sense of that concept. See UUNA (2008) (Last Amended 2013) § 102(11) (defining "unincorporated nonprofit association").

Subsection (c) - UPA (1997) derived this subsection from UPA (1914) § 7 and with one exception, made no substantive change to the law. The substantive change pertains to the sharing of profits, which UPA (1997) recast as creating a rebuttable presumption of partnership rather merely constituting prima facie evidence. "Prima facie" means that the party with the burden of proof has adduced sufficient evidence to carry that burden, subject to the finder of fact's view of any contrary evidence. The burden of persuasion is unchanged. In contrast, "rebuttable presumption" switches the burden of persuasion.

Subsection (c)(3) - The protected categories listed in this paragraph apply regardless of whether the profit share is a single, unvarying percentage or a ratio that varies; for example, after reaching a dollar floor or different levels of profits. Like UPA (1914), this act makes no attempt to answer in every case whether a partnership is formed. Whether a relationship is more properly characterized as that of borrower and lender, employer and employee, or landlord and tenant is left to the trier of fact. As under UPA (1914), a person may function in both partner and non-partner capacities.

Subsection (c)(3)(E) - UPA (1997) added this protected category, excepting from the rebuttable presumption a share of the profits received in payment of interest or other charges on a loan, "including a direct or indirect present or future ownership in the collateral, or rights to income, proceeds, or increase in value derived from the collateral." The quoted language was taken from Section 211 of the Uniform Land Security Interest Act and is intended to protect shared-appreciation mortgages, contingent or other variable or performance-related mortgages, and other equity participation arrangements by clarifying that contingent payments do not presumptively convert lending arrangements into partnerships.

Note some consequences to a tenancy in common being characterized as a partnership:

- Joint and several liability for all of the partnership's debts, obligations, and other liabilities, subject to various exceptions.[621]

- The right to withdraw at will,[622] even in contravention to any agreement of the parties,[623] either giving the owner the right to cash out for the greater of the liquidation value or the value based on a sale of the entire business as a going concern without the person[624] or causing the partnership to dissolve[625] and wind up its business.[626] The right to cash out might be especially troubling for the other owners. Also, federal case law has established that an interest as a tenant in common is worth less (15%-20% tends to be a common valuation adjustment, but much higher adjustments may be appropriate when property is not easily partitioned) than a percentage of the property's value as a whole, this right to cash out might reduce that valuation adjustment. In the federal tax lien area, courts tend to view this valuation adjustment as ground for forcing the sale of the underlying property, because selling the tenant-in-common interest would prejudice the government's interest in collecting what is due.[627]

Given that partnership property is subjected to buy-sell provisions, whether property is partnership property can determine rights when co-owners are separating. With that in mind, consider that Act § 204, "When Property Is Partnership Property," provides:

> (a) Property is partnership property if acquired in the name of:
>
> > (1) the partnership; or
> >
> > (2) one or more partners with an indication in the instrument transferring title to the property of the person's capacity as a partner or of the existence of a partnership but without an indication of the name of the partnership.
>
> (b) Property is acquired in the name of the partnership by a transfer to:
>
> > (1) the partnership in its name; or
> >
> > (2) one or more partners in their capacity as partners in the partnership, if the name of the partnership is indicated in the instrument transferring title to the property.
>
> (c) Property is presumed to be partnership property if purchased with partnership assets, even if not acquired in the name of the partnership or of one or more partners with an indication in the instrument transferring title to the property of the person's capacity as a partner or of the existence of a partnership.

---

621 Act § 306.
622 Act §§ 601(1), 602(a).
623 Act § 110(c)(9).
624 Act § 701.
625 Act § 801.
626 Act § 802.
627 See *U.S. v. Adent*, cited in fn. 7197, found in part III.B.5.e.iv.(i) Effect of Liens on Dealings with Third Parties.

(d) Property acquired in the name of one or more of the partners, without an indication in the instrument transferring title to the property of the person's capacity as a partner or of the existence of a partnership and without use of partnership assets, is presumed to be separate property, even if used for partnership purposes.

The official Comment elaborates:[628]

> Section 204 states the rules inter se the partners and partnership for determining when property is acquired by the partnership and so becomes partnership property. These rules apply to "all property, whether real, personal, or mixed or tangible or intangible, or any right or interest therein." Section 102(16) (defining "property").
>
> These rules provide three separate approaches - according to:
>
> - the name or names used in acquiring the property;
> - when a partner's name appears as a transferee, the capacity in which the partner is acting; and
> - for property acquired by purchase, whether the partnership provided the consideration for the property.
>
> These approaches are complementary, not mutually exclusive.
>
> This section omits any provision corresponding to UPA (1914) § 8(4), which states: "A conveyance to a partnership in the partnership name, even without words of inheritance, passes the entire estate of the grantor unless a contrary intent appears." UPA (1997) omitted the provision as unnecessary because under modern conveyancing law all transfers pass the entire estate or interest of the grantor unless a contrary intent appears.
>
> To what extent this section's *inter se* rules affect third party rights is a matter for other law, but in any event these rules yield automatically to statutes providing record title for particular types of property. For an example, see Subsection (c), comment.
>
> **Subsection (a) and (b) -** These subsections act in combination to provide the first two of the approaches listed above. Under these subsections, property becomes partnership property if acquired:
>
> - in the name of the partnership; or
> - in the name of one or more of the partners with an indication in the instrument transferring title of either:
>   - their capacity as partners; or

---

628 https://www.uniformlaws.org/HigherLogic/System/DownloadDocumentFile.ashx?DocumentFileKey=9e30c4d7-dbed-c173-dfc1-26394e60152d&forceDialog=1.

- of the existence of a partnership, even if the name of the partnership is not indicated.

Property acquired "in the name of the partnership" includes property acquired in the name of one or more partners in their capacity as partners, but only if the name of the partnership is indicated in the instrument transferring title.

Property transferred to a partner is partnership property, even though the name of the partnership is not indicated, if the instrument transferring title indicates either: (i) the partner's capacity as a partner; or (ii) the existence of a partnership. This approach is consonant with the entity theory of partnership and resolves the troublesome issue of a conveyance to fewer than all the partners but that nevertheless indicates their partner status.

Subsections (c) and (d) - At least *inter se* the partners and partnership, it is the intention of the partners that controls whether property belongs to the partnership or to one or more of the partners in their individual capacities. These subsections each contain a rebuttable presumption as to the partners' intent.

When applicable, the presumptions switch the burden of persuasion but are subject to an important limitation in favor of third parties. See Section 302(a)(3) ("Partnership property held in the name of one or more persons other than the partnership, without an indication in the instrument transferring the property to them of their capacity as partners or of the existence of a partnership, may be transferred by an instrument of transfer executed signed by the persons in whose name the property is held.").

Subsection (c) - Under this subsection, property purchased with partnership property is presumed to be partnership property, notwithstanding the name in which title is held or any other indicia. In this context, a promise made by a partnership in exchange for property triggers the presumption, including a promise to perform services or to guarantee another person's obligation with regard to the purchase of the property.

The presumption is entirely ineffective against third parties with regard to property with record title.

EXAMPLE: Using partnership funds, a partner purchases realty in the partner's own name and records the purchase in the appropriate land records. The partner later transfers title to the realty to a third party that has neither knowledge nor notice of any rights the partnership may have in the property. The relevant real estate statute is the applicable law; this subsection is entirely inapposite.

Subsection (d) - Under this subsection, property acquired in the name of one or more of the partners, without an indication of their capacity as partners and without use of partnership funds or credit, is presumed to be the partners' separate property, even if used for partnership purposes. In effect, this subsection presumes that only the use of the property is contributed to the partnership.

II.C.12. Limited Partnership

A limited partnership is formed by filing a Certificate of Limited Partnership with the secretary of state for the state in which the partnership is formed. The Uniform Limited Partnership Act limits the rights and liability of limited partners and vests control in the general partners. The rights and liabilities of the general partners among themselves, including joint and several liability for the limited partnership's activities, are governed by the Uniform Partnership Act; see part II.C.13 Limited Liability Partnership Registration for General Partners in General or Limited Partnerships.

A limited partnership needs to have at least one general partner (GP) and one limited partner, and the same person cannot be both the sole general partner and the sole limited partner. However, for example, the GP could be an individual, and the limited partner could be that individual's revocable trust. Such a limited partnership would be disregarded for income tax purposes unless it elects to be treated as a corporation. The GP being an individual simplifies the signature line and also causes the GP's liability to be extinguished with respect to any creditor that does not file a claim in probate court within the prescribed time period (one year or less under most nonclaim statutes) after the GP's death.

II.C.13. Limited Liability Partnership Registration for General Partners in General or Limited Partnerships

In recent years, the Uniform Partnership Act has added an optional feature to limit the liability of general partners of general or limited partnerships. This feature allows the general partners to limit their liability by registering the entity as a limited liability partnership (LLP) with the secretary of state.

A limited partnership with an LLP registration is known as a limited liability limited partnership (LLLP).

However, in Missouri, LLP (or LLLP) registration often is not quite as easy as LLC registration, and it cannot be retroactively reinstated if not renewed timely.

II.C.14. Penalty for Failure to File a Partnership Return

Failure to file a partnership return is subjected to a penalty of $125 times the number of partners or shareholders for each month (or fraction of a month) that the failure continues, up to a maximum of 12 months.[629]

However, this penalty does not apply if ten or fewer owners are involved and each owner fully reports that owner's share of the income, deductions, and credits of the partnership;[630] this rule is based on the version of Code § 6231 that will not apply to returns filed for partnership taxable

[629] Code § 6698(b)(1). The penalty is $89 instead of $125 for taxable years beginning before January 1, 2010. Program Manager Technical Advice (PMTA) 2013-015 provides advice on the application of failure to file penalties to S corporations and partnerships.
[630] Rev. Proc. 84-35.

years beginning after December 31, 2017[631] but was reaffirmed by Program Manager Technical Advice 2020-1 (11/19/2019).[632] CCA 201733013 emphasizes limitations to this rule:

---

[631] For changes to partnership audit rules, see part II.G.19.c Audits of Partnership. The PMTA reasoned:

> A partnership that fails to timely file a partnership return as required by section 6031(a) is subject to a penalty under section 6698, unless the failure to comply with section 6031(a) is due to reasonable cause. I.R.C. § 6698.
>
> Congress enacted section 6698 in 1978 as part of Pub. L. No. 95-600, 92 Stat. 2763. In legislative history, Congress indicated that it intended for the reasonable cause exception to the section 6698 penalty to apply automatically to small partnerships that meet certain criteria. The Conference Committee Report stated:
>
> > The penalty will not be imposed if the partnership can show reasonable cause for failure to file a complete or timely return. Smaller partnerships (those with 10 or fewer partners) will not be subject to the penalty under this reasonable cause test so long as each partner fully reports his share of the income, deductions and credits of the partnership.
>
> H.R. Rep. No. 95-1800, at 221 (1978) (Conf. Rep.).
>
> Revenue Procedure 81-11 set forth procedures, consistent with the legislative history, under which partnerships with ten or fewer partners would not be subject to the section 6698 penalty for failure to file a partnership return.
>
> Shortly after the issuance of Revenue Procedure 81-11, Congress enacted a definition of small partnership as part of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982, Pub. L. 97-248. Section 6231(a)(1)(B), as enacted in TEFRA, provided that the term "partnership," for purposes of sections 6221 through 6232, did not include a partnership if the partnership had 10 or fewer partners, each of whom is a natural person (other than a nonresident alien) or an estate, and each partner's share of each partnership item is the same as such partner's share of every other item. A husband and wife, and their estates, were treated as one partner in determining whether the partnership had 10 or fewer partners for purposes of section 6231(a)(1)(B). TEFRA did not amend section 6698 or redefine the scope of the penalty for failure to file a partnership return.
>
> To conform the relief provided in Revenue Procedure 81-11 to the definition of small partnership newly provided by section 6231(a)(1)(B), the IRS issued Revenue Procedure 84-35 to modify and supersede Revenue Procedure 81-11. Revenue Procedure 84-35 cited the definition of small partnership provided by section 6231(a)(1)(B). In order to qualify for the relief provided in Revenue Procedure 84-35, the partnership must come "within the exceptions outlined in section 6231(a)(1)(B) of the Code." See Rev. Proc. 84-35, § 3.01. In citing section 6231(a)(1)(B), Revenue Procedure 84-35 was referencing law that existed at the time the revenue procedure was issued. The IRS did not express an intent that later amendments to TEFRA audit procedures would affect application of the exception to the partnership failure to file penalty.
>
> Section 6231(a)(1)(B) was repealed by the Bipartisan Budget Act of 2015, Pub. L. No. 114-74, 129 Stat. 584 (BBA). The BBA rules, including the repeal of section 6231(a)(1)(B), are generally applicable to partnerships with taxable years beginning after December 31, 2017. The BBA provisions automatically apply to a partnership unless the partnership files a partnership return electing out of the BBA regime. See I.R.C. §§ 6221(b), 6241(1); Treas. Reg. § 301.6221(b)-1. Thus, the BBA rules are applicable to such partnerships for which the relief provided in Revenue Procedure 84-35 would be relevant.
>
> A question was raised concerning how to interpret Revenue Procedure 84-35 now that section 6231(a)(1)(B) has been repealed and will be inapplicable to any partnership for which the relief provided in Revenue Procedure 84-35 is relevant. Significantly, the reference in Revenue Procedure 84-35 to IRC section 6231(a)(1)(B) is a reference to IRC section 6231(a)(1)(B) as it was in effect when Revenue Procedure 84-35 was originally issued. Thus, it is irrelevant that there does not exist any current section 6231(a)(1)(B) that is generally effective and applicable to partnerships seeking relief under Revenue Procedure 84-35. Moreover, the legislative history of section 6698, which is the basis for the relief provided in Revenue Procedure 84-35, is still

Accordingly, we conclude that Rev. Proc. 84-35 does not provide an automatic exemption to partnerships from the requirement of filing a Form 1065. Neither I.R.C. § 6031 nor I.R.C. § 6698 contain an exception to the general filing requirement set forth in I.R.C. § 6031(a). Although the I.R.C. § 6698 penalty may be avoided if it is shown that the failure to file a complete or timely return was due to reasonable cause, such relief may be granted under Rev. Proc. 84-35 if the partnership meets its requirements and examiners follow the procedures set forth in IRM 20.1.2.3.3.1.

The most recent Internal Revenue Manual rule, 20.1.2.4.3.1 (03-09-2022), Revenue Procedure 84−35, 20.1.2 Failure To File/Failure To Pay Penalties | Internal Revenue Service (irs.gov), includes [gaps indicated by ellipses were redacted on the IRS website]:

(1) IRC 6231(a)(1)(B) exempts certain small partnerships from the unified audit procedures contained in subchapter C of chapter 63 of the IRC. However, an exemption from the unified audit procedures is not an exemption from the requirement to file a timely and complete partnership return.

(2) Rev. Proc. 84−35 provides reasonable cause for filing a late or incomplete return will be presumed for certain small partnerships if certain criteria are met:

a. The partnership must consist of 10 or fewer partners. For the purpose of this requirement, a husband and wife (or their estate) filing a joint return is considered one partner.

b. Each partner is either an individual (excluding nonresident aliens), or the estate of a deceased partner.

c. Each partner's items of income, deductions, and credits are allocated in the same proportion as all other items of income, deductions, and credits.

d. Each partner reported the partner's share of partnership income on the partner's timely filed income tax return….

(6) When abating the penalty under the provisions of Rev. Proc. 84-35, advise the taxpayer the penalty **will be reassessed** if it is later determined any of the criteria outlined in Rev. Proc. 84-35 have not been met: Specifically, if it is found any partner was not a qualifying partner; or, if any partner filed late; or, if any partner failed to

---

relevant, and the scope of the section 6698 penalty for failure to file a partnership return has not been affected by the repeal of the TEFRA provisions. Thus, Revenue Procedure 84-35 is not obsolete and continues to apply.

Revenue Procedure 84-35 provides that in order to qualify for the relief provided in the revenue procedure, the partnership, or any of the partners, must establish, if so requested by the IRS, that all partners have fully reported their shares of the income, deductions, and credits of the partnership on their timely filed income tax returns. Rev. Proc. 84-35, § 3.01. Additionally, the revenue procedure states that all the relevant facts and circumstances will be taken into account in determining whether a partner has fully reported the partner's share of the income, deductions, and credits of the partnership. Rev. Proc. 84-35, § 3.04. Accordingly, the IRS may develop procedures in accordance with Revenue Procedure 84-35 to ensure that any partnership claiming relief is in fact entitled to such relief.

[632] PMTA 2020-1 is found at https://www.irs.gov/pub/lanoa/pmta-2020-01.pdf.

report their share of partnership income on their return, then the penalty will be reassessed.

(7) A request for penalty abatement under Rev. Proc. 84-35 must initially be denied **if** it appears the partnership is under an election to be subject to the unified audit procedures. See *IRM 20.1.2.4.3.1.1*, Form 8893 and 8894. A response to such a denial should not be treated as an appeal if the taxpayer provides additional information with respect to the election:

a. If the account reflects a processed election (Form 8893, Election of Partnership Level Tax Treatment, or similar statement) that has not been revoked, and the taxpayer claims the election was revoked, then the taxpayer must provide a copy of the IRS letter approving the revocation of the election….

Note: Do not reject a penalty abatement request to obtain additional information if the partnership qualifies for "first time" abatement of the penalty. See IRM 20.1.1.3.3.2.1, First Time Abate (FTA).

(8) Partnerships that do not qualify for abatement of the penalty under Rev. Proc. 84-35 may still qualify for abatement of the penalty under normal reasonable cause criteria.

Also, a partnership with no income, deductions, or credits for Federal income tax purposes for a taxable year is not required to file a partnership return for that year.[633]

Co-tenants of real estate who fit within this safe harbor should avoid filing partnership returns, to facilitate future like-kind exchanges of real estate.[634]

II.C.15. Partner's Right to Copy of Partnership Tax Return

Upon request, a partnership must disclose its federal return to "any person who was a member of such partnership during any part of the period covered by the return."[635]

However, "the information inspected or disclosed shall not include any supporting schedule, attachment, or list which includes the taxpayer identity information of a person other than the entity making the return or the person conducting the inspection or to whom the disclosure is made."[636] In a memo, the IRS's Privacy, Governmental Liaison and Disclosure division said that partner(s) or a partnership representative are entitled to request and receive administrative file record(s) containing partnership returns and return information:[637]

> Until parts 11.3.2, 11.3.3, 11.3.13 and 11.3.35 of the IRM are revised, this memorandum serves as 26 United States Code (U.S.C.) § 6103(e)(10) guidance on requests for

[633] Reg. § 301.6031(a)-(1)(a)(3)(i).
[634] See Letter Ruling 9741017, described in fn. 578.
[635] Code § 6103(e)(1)(C).
[636] Code § 6103(e)(10).
[637] April 14, 2021 MEMORANDUM FOR ALL DISCLOSURE EMPLOYEES, from Phyllis T. Grimes, Director, Governmental Liaison, Disclosure and Safeguards, "Interim Guidance on application of 26 U.S.C. § 6103(e)(10) for TEFRA and BBA Partnerships, Control Number PGLD 11-0221-0001, Expiration Date April 14, 2023. II.D. Special Purpose Trusts

Sometimes multiple owners would like to hold investment or business assets together without being subjected to the complexities of partnership income tax.

Below are discussions of when a multiple owner trust might be considered to be a business entity and when the trust might be disregarded entirely.

For rules that apply to most trusts, see part II.J Fiduciary Income Taxation.

II.D.1. Trust as a Business Entity

For a traditional trust, conducting business activities does not somehow turn the trust into a business entity. For details, see part II.K.2.b.iii Participating in Business Activities Does Not Convert a Trust Created by Only One Grantor into a Business Entity.

If more than one person contributes to a trust so that they can profit from investments or business activity, a trust might be classified as a business activity.

The case that set the tone for classifying arrangements as business entities for well over 60 years, *Morrissey v. Commissioner*,[638] classified a trust as a corporation:

> The trustees were authorized to add to their number and to choose their successors; to purchase, encumber, sell, lease, and operate the “described or other lands”; to construct and operate golf courses, club houses, etc.; to receive the rents, profits, and income; to make loans and investments; to make regulations; and generally to manage the trust estate as if the trustees were its absolute owners. The trustees were declared to be without power to bind the beneficiaries personally by “any act, neglect or default,” and the beneficiaries and all persons dealing with the trustees were required to look for payment or indemnity to the trust property. The beneficial interests were to be evidenced solely by transferable certificates for shares which were divided into 2,000 preferred shares of the par value of $100 each, and 2,000 common shares of no

[638] 296 U.S. 344 (1935).

> par value, and the rights of the respective shareholders in the surplus, profits, and capital assets were defined. "Share ledgers" showing the names and addresses of shareholders were to be kept.

Morrissey contrasted the single grantor trust from the multi-grantor trust:

> "Association" implies associates. It implies the entering into a joint enterprise, and, as the applicable regulation imports, an enterprise for the transaction of business. This is not the characteristic of an ordinary trust — whether created by will, deed, or declaration — by which particular property is conveyed to a trustee or is to be held by the settlor, on specified trusts, for the benefit of named or described persons. Such beneficiaries do not ordinarily, and as mere cestuis que trust, plan a common effort or enter into a combination for the conduct of a business enterprise. Undoubtedly the terms of an association may make the taking or acquiring of shares or interests sufficient to constitute participation, and may leave the management, or even control of the enterprise, to designated persons. But the nature and purpose of the co-operative undertaking will differentiate it from an ordinary trust. In what are called "business trusts" the object is not to hold and conserve particular property, with incidental powers, as in the traditional type of trusts, but to provide a medium for the conduct of a business and sharing its gains. Thus a trust may be created as a convenient method by which persons become associated for dealings in real estate, the development of tracts of land, the construction of improvements, and the purchase, management, and sale of properties; or for dealings in securities or other personal property; or for the production, or manufacture, and sale of commodities; or for commerce, or other sorts of business; where those who become beneficially interested, either by joining in the plan at the outset, or by later participation according to the terms of the arrangement, seek to share the advantages of a union of their interests in the common enterprise.

After recounting how the ownership structure was like that of a corporation, *Morrissey* explained the significant level of activity:

> They were not the less associated in that undertaking because the arrangement vested the management and control in the trustees. And the contemplated development of the tract of land held at the outset, even if other properties were not acquired, involved what was essentially a business enterprise. The arrangement provided for centralized control, continuity, and limited liability, and the analogy to corporate organization was carried still further by the provision for the issue of transferable certificates.
>
> Under the trust, a considerable portion of the property was surveyed and subdivided into lots which were sold and, to facilitate the sales, the subdivided property was improved by the construction of streets, sidewalks, and curbs. The fact that these sales were made before the beginning of the tax years here in question, and that the remaining property was conveyed to a corporation in exchange for its stock, did not alter the character of the organization. Its character was determined by the terms of the trust instrument. It was not a liquidating trust; it was still an organization for profit, and the profits were still coming in. The powers conferred on the trustees continued and could be exercised for such activities as the instrument authorized.

Although the check-the-box regulations overrode the prior regulations the arose from *Morrissey*, they did so only with respect to whether a business entity is classified as a corporation or a partnership, not whether a trust is classified as a business entity.[639] So, let's look further at *Morrissey* and the cases and rulings it spawned.

A companion case to *Morrissey*, *Swanson v. Commissioner*, 296 U.S. 362 (1935), involved two persons who built and rented an apartment house:

> The material facts as found by the Board of Tax Appeals are as follows: Joseph E. Swanson and Ralph C. Otis, in 1914, acquired a piece of vacant land in the city of Chicago with the view of improving it by the erection of an apartment house, the title being taken by Swanson. An apartment house was built. Subsequently, in 1915, at the suggestion of their attorney, they entered into a trust agreement for the purpose of carrying the title to the property. The trust was designated as the "Lake View Land Association." The first trustees were Ralph C. Otis, Joseph E. Swanson, and Allen G. Mills. Petitioners set forth the following summary of the trust agreement, taken from the opinion of the Circuit Court of Appeals:
>
> "Under the trust agreement, the trustees were given the complete management and control of the property, to exchange, reconstruct, remodel, sell, or improve at their discretion or to borrow money secured by the property. They were authorized to rent suitable quarters for the transaction of the business of the trust and employ such assistants as they required. The agreement provided for the issuance of 'receipts' to evidence the interests of the beneficiaries, representing 1,000 shares at the par value of $100 each. It was provided that the receipts were evidences of the ownership of personal property and not real estate. They might be transferred by assignment. Originally, one-half of the shares were issued to Otis and one-half to Swanson, who later transferred their interests to their wives, who owned the shares during 1925 and 1926. The agreement provided that the trust could sue and be sued;3 that neither the trustees nor the beneficiaries should be personally liable, and that all persons dealing with the trustees must look only to the property of the trust; that it should be terminated at the expiration of twenty years after the death of the last survivor of certain named persons or by the trustees in their discretion at any time before the expiration of the twenty years by selling all the property held by them as such and distributing the net proceeds of such sale. The trust had succession and was not terminated by the death of a trustee or beneficiary."

In concluding that the trust was taxable as a corporation, the Court reasoned:

> The compensation of the trustees was to be fixed by themselves, but was not to exceed 2½ per cent. of the gross income of the trust. After making provision for the payment of outstanding claims, the net income was to be divided among the beneficiaries according to their interests, and on the request of any beneficiary the trustees were to render annual accounts. The trust agreement also made provision for a written registry of beneficiaries, who could transfer their interests in a described manner, after having first offered them to the other beneficiaries.

---

[639] I am unaware of any case addressing this issue after the adoption of Reg. § 301.7701-4(a). The regulation's preamble, T.D. 8697, provides:

> The regulations provide that trusts generally do not have associates or an objective to carry on business for profit. The distinctions between trusts and business entities, although restated, are not changed by these regulations.

> The renting of apartments, the details of management, and the distribution of net income were committed to a firm (of which Joseph E. Swanson was a member) engaged in the business of buying and selling real estate and managing properties. That firm acted under the direction of Ralph C. Otis and Joseph E. Swanson and the "entire affairs of the Lake View Land Association" were at all times in their hands.
>
> Applying the governing principles, as set forth in our opinion in *Morrissey v. Commissioner, supra*, we agree with the Court of Appeals that the trust constituted an association and was taxable as such. The limited number of actual beneficiaries did not alter the nature and purpose of the common undertaking. Nor did the fact that the operations of the association did not extend beyond the real property first acquired change the quality of that undertaking.

A companion case to *Morrissey*, *Helvering v. Combs*, 296 U.S. 365 (1935), involved a couple of developers who assembled 13 investors:

> The "whole beneficial interest" in the trust was defined as .71333 per cent. of gross production, and the beneficiaries were to be paid their pro rata shares, after deduction for the payment of lawful trust obligations, as follows: (a) 25 per cent. of gross production to the beneficiaries who provided money for the trust purposes; (b) .44333 per cent. to E. E. Combs; and (c) 2 per cent. to Edward Everett. Certificates of beneficial interest were to issue in approved legal form and were to be held in escrow until a producing well was brought in. Thirteen persons were named as beneficiaries, with the amounts contributed and the percentages owned by each, these amounts aggregating $25,000 and the percentage of ownership amounting to 25 per cent. The "certificate of beneficial interest" recited that the party named was the holder of a beneficial interest under the trust agreement in the amount stated and that the same was transferable only upon the books of the trustees, upon indorsement and surrender of the certificate. The trustees were authorized to hold all property and property rights, the legal title to which might vest in them under the trust, to use the moneys deposited by beneficiaries to pay for labor, casing, and other materials incident to drilling and production, to manage and protect the trust property, to pay "trust debts," to sell all products of the well, to borrow money upon the credit of the trust, and to sell any "unsold beneficial interests" as they might deem best for trust purposes. The trustees were not to be individually liable except for willful misconduct. E. E. Combs was to act as production manager at a stated salary after the well was in production. All proceeds "of sale of well products" were to be paid into a designated bank to be distributed as agreed.

In concluding that the trust was taxable as a corporation, the Court reasoned:

> In considering whether an association was created, the fact that the beneficiaries [pg. 1274]did not exercise control is not determinative. *Hecht v. Malley*, 265 U.S. 144, 44 S.Ct. 462, 68 L.Ed. 949; *Morrissey v. Commissioner*, *supra*. The parties joined in a common enterprise for the transaction of business, and the beneficiaries who contributed money for that purpose became associated in the enterprise according to the terms of the arrangement. The essential features of the enterprise were not affected by the fact that the parties confined their operations to one oil well. See *Swanson v. Commissioner*, 296 U.S. --, 56 S.Ct. 283, 80 L.Ed. -- decided this day. Parties may form an association for a small business as well as for a large one. Here, through the medium of a trust the parties secured centralized management of their enterprise, and its continuity during the trust term without termination or interruption by death or changes in

> the ownership of interests, and with limited liability and transferable beneficial interests evidenced by certificates. Entering into a joint undertaking they avoided the characteristic responsibilities of partners and secured advantages analogous to those which pertain to corporate organization. The fact that meetings were not held or that particular forms of corporate procedure were absent is not controlling. *Morrissey v. Commissioner, supra*.

A companion case to *Morrissey*, *Helvering v. Coleman-Gilbert Associates*, 296 U.S. 369 (1935), involved five persons who were co-owners of real property consisting of about twenty apartment houses in the city of Boston and vicinity:

> The property had originally been owned by Harry Coleman, Bernard Gilbert, and Harris Levine in equal shares, but subsequently Coleman and Levine transferred to their wives one-half of their interests. These five persons had for some time been associated in the business of owning and operating apartment houses. By the trust instrument, which recited a contemporaneous conveyance of the property to themselves, they declared that the real estate so conveyed, and any real estate thereafter acquired under the trust, should be held by them in trust for the purposes described, with the designation "Coleman-Gilbert Associates." The trust was to continue for fifteen years unless sooner terminated by sale and distribution of the trust estate. The trustees were to hold the property in order to improve and dispose of it for the benefit of the persons named as "cestuis que trustent and beneficiaries, and their respective representatives and assigns, devisees, or legatees" in the shares provided in the instrument. Except as stated, the beneficiaries were to have no interest in the trust property, and "especially" they were to have "no right to call for any partition thereof." The interests of the beneficiaries were to be personal property, and the death of any one or of all the beneficiaries was not to determine the trust nor entitle the legal representatives of the decedent to an accounting by the trustees.

In concluding that the trust was taxable as a corporation, the Court reasoned:

> We agree with the Circuit Court of Appeals that weight should be given to the purpose for which the trust was organized, but that purpose is found in the agreement of the parties. Not only were they actually engaged, as the Board of Tax Appeals determined, in carrying on an extensive business for profit, but the terms of the trust instrument authorized a wide range of activities in the purchase, improvement and sale of properties in the cities and towns of the state. The parties are not at liberty to say that their purpose was other or narrower than that which they formally set forth in the instrument under which their activities were conducted. Undoubtedly they wished to avoid partition of the property of which they had been co-owners, but their purpose as declared in their agreement was much broader than that. They formed a combination to conduct the business of holding, improving and selling real estate, with provision for management through representatives, with continuity which was not to be disturbed by death or changes in ownership of beneficial interests, and with limited liability. They had been co-owners but they preferred to become "associates," and also not to become partners. *Morrissey v. Commissioner, supra*.

Sears v. Hassett[640] recharacterized the following trust as a business entity:

> The trustees have wide powers to buy and sell real estate;[3] to improve and develop the same by the erection of buildings, or otherwise; to repair or rebuild any building damaged by fire or otherwise; to lease; to employ such agents here and assistants as deemed necessary; to invest and reinvest funds "in any securities they see fit"; to pay from the net income of the trust property "such dividends to the beneficiaries as they may from time to time deem expedient". In quest of profits the trustees are in effect empowered to engage in extensive real estate operations and in the business of investing and reinvesting in securities. Even if at any time all of the real estate may have been disposed of, the termination of the trust is at the absolute discretion of the trustees. In the language of the *Morrissey* case, 296 U.S. at page 357, 56 S.Ct. at page 295, 80 L.Ed. 263, this trust provides "a medium for the conduct of a business and sharing its gains". As was said in the *Coleman-Gilbert* case, *supra*, "the parties are not at liberty to say that their purpose was other or narrower than that which they formally set forth in the instrument under which their activities were conducted".
>
> [3] The trust indenture provides: "The trustees may purchase with such funds as they may from time to time have in their hands any real estate or any interest in real estate encumbered or unencumbered, and may hire and become lessees of any property, easement or right, the use of which is, in their judgment, advantageous to real estate held hereunder." Appellants contend that this does not confer an unrestricted power to purchase land, but that the power to purchase as well as the power to become lessees of land is limited by the last clause in the provision just quoted. We do not so read this provision of the indenture, but our conclusion would not be different if the narrower interpretation were given.

However, when beneficiaries of an estate formed a couple of trusts and the trustees merely executed and extended the leases and collected and distributed the rents, the trusts were not business entities.[641] Another case holding that trusts were not business entities involved a little

---

[640] 111 F.2d 961 (1st Cir. 1940).

[641] *Wyman Building Trust v. Commissioner*, 45 B.T.A. 155 (1941), *acq.*, 1941-2 C.B. 14, holding:

> One important element in deciding whether a trust is taxable as a corporation is its form—does it resemble a corporation? *Morrissey v. Commissioner*, 296 U. S. 344; *Sears v. Hassett*, 111 Fed.(2d) 961. This trust does bear some resemblance to a corporation in form. But that circumstance is not necessarily determinative, "it must also have been created as a joint enterprise for the carrying on of a business and sharing its gains, as distinguished from the mere holding and conserving of particular property, with incidental powers, as in the traditional type of trusts." *Sears v. Hassett*, *supra*. These trusts were not intended or permitted to deal with other than a single piece of property. They could not deal with the property generally. Their only purpose was to provide a convenient authority for executing and extending the leases on behalf of a more cumbersome group of beneficial owners and for receiving and distributing the rent. There was no larger purpose to engage in business or to deal with the property in other ways. *Cf. Sears v. Hassett*, *supra*. The lessee paid all expenses, including taxes and repairs. There was no change in the lessee or the provisions of the leases. The only change in beneficiaries was caused by death. The trusts were for definite, short terms. Some of these circumstances may be fortuitous and of little or no significance, but the case is as strong for the taxpayer as some other recent ones. *Cf. Commissioner v. i denied*, 312 U.S. 704; *Lewis & Co. v. Commissioner*, 301 U. S. 385.
>
> The *Sears* case, *supra*, is distinguishable. The court looked at the entire purpose and history of the Sears trust and saw that it had a broad purpose and extensive powers to deal with a number

more management by the trustee, with some of the beneficiaries directing the trustees on behalf of the others:[642]

> At the time of creation of the respective trusts, two parcels of the real estate were managed by a real estate agency and the remaining properties were directly managed by the sons of decedent, who acted as agents for the other beneficiaries in the making of leases, supervising repairs, erecting new buildings, etc. There was a contemporaneous oral agreement between the parties to the written trusts that where the properties involved were managed by members of the family or beneficiaries, such persons would be considered agents of the beneficiaries of the trusts, and the properties have been so managed since the creation of the trusts. Leases have been negotiated, tenants secured, rentals fixed and repairs and improvements made by the members of the family in the management of the properties of the trusts. In some instances, buildings have been erected or the existing ones remodeled, the necessity for which was determined by members of the Gibbs family, contracts for the work executed by them and the necessary funds contributed by the beneficiaries.
>
> The trustee paid for insurance and taxes from the trust income whenever the lease did not require the lessee to do so, but the members of the family selected the company in which the insurance was placed and the amount to be carried.
>
> On the execution of the trust instruments, certificates of beneficial interest were issued to the several beneficiaries in proportion to their respective interests, some of which have been since transferred in trust for other members of the family. The trustee has at no time exercised control or management of any of the trust property, but has limited its activities to the holding of legal title to them, the payment of taxes and maintenance and insurance items upon order of a member of the Gibbs family. It has signed leases at the direction of members of the family, collected the rents, paid the bills and kept the necessary records. There have been no sales of any of the real estate in the trusts nor any additional purchased and no accumulations of funds by the trustee except for the payment of taxes.

The case from which the quote above was excerpted involved the IRS trying to tax the trust as a corporation. It did not address whether the owners had formed a partnership that then created a trust.

Guar. Emps. Ass'n v. United States, 241 F.2d 565, 571 (5th Cir. 1957), involved a trust established by an employer:

> The pertinent facts are not in dispute. Guaranty Employees Association was organized in 1939 for the exclusive benefit of employees of Guaranty Title & Trust Company of

---

> of properties to the best advantage of the beneficial owners for an indefinite time. Here the purpose and powers as set forth in the instruments were much more limited.

Lewis & Co .involved only one grantor, who assigned his interest in the trust to only one purchaser, who then died. *Commissioner v. Gibbs-Preyer Trusts* is the case described in fn. 642 and the accompanying text.

[642] *Commissioner v. Gibbs-Preyer Trusts Nos. 1 & 2*, 117 F.2d 619 (6th Cir. 1941), holding:

> In the present cases, the trustee did nothing of any consequence with respect to the management and conduct of the business, all of it being carried on by the cestuis que trustent. Article X of the trust instruments limited the duties of the trustee substantially to the receipt of rentals, keeping accounts and making distribution of net rentals to the cestuis que trustent.

> Corpus Christi, Texas. The latter company, hereinafter called Guaranty Title, is primarily a title insurance and trust company managing and investing in real estate in the Corpus Christi area. It had frequent requests from its employees for small loans, and it encouraged the creation of Guaranty Employees Association to take care of that need and further to encourage thrift, establish a savings plan among the employees, and to promote cooperation, loyalty, continuity of employment and better employer-employee relations in general.
>
> On August 2, 1939, some 43 employees of Guaranty Title met in its offices and, without incorporating, adopted a constitution and by-laws for Guaranty Employees Association….
>
> "The assets consisted of real estate notes purchased through trust companies and trust departments in banks, stock in building-loan associations, first mortgage loans made direct to borrowers, a comparatively insignificant amount loaned to members on passbooks, and cash to meet withdrawals of deposits." *A-C Inv. Ass'n v. Helvering*, *supra*, 68 F.2d at page 387.

The Fifth Circuit held that, because the members could withdraw their accounts at any time, the trust was not taxed as a corporation:

> 1. There is no substantial economic independence of the Association from its members. (a) The business of the Association necessarily expands or contracts as the members find it essential or desirable to deposit or withdraw their investments (though some incorporated open-end investment trusts have the same characteristic); if all members should withdraw their investments (due to a strike or cessation of employer's business, etc.) the Association would have to terminate its business—and perhaps liquidate at a loss. (It might also be noted that though on the death of a member if he had a spouse or children they might maintain his investment in the Association, the relationship between the inheritor and the Association is no longer the same as between it and a member—all that remains is the obligation to pay a proportionate share of the income and to repay the principal on demand—there is no right to increase the investment, to borrow against it, or to vote; in effect a debtor-creditor relationship is created, similar to the arrangement sometimes made upon the death of a partner if the business is carried on by the remaining members and the widow in effect becomes a limited partner). Moreover the Association cannot grow through retained earnings. (b) Since there is no limitation of personal liability as to outside creditors the insolvency or bankruptcy of the Association would directly affect the fortunes of its members; on the other hand the good fortune of the Association would also benefit the members almost immediately.
>
> Thus, in effect, this Association has continuity only of management; continuity of property depends largely on the independent decisions of each of its members. There is not much more than an agency, through which a group of individuals in a joint enterprise can make a temporary, diversified investment. See *Helm & Smith Syndicate v. C.I.R.*, *supra*, 136 F.2d at 442.
>
> It appearing therefore that there is here no truly separate entity whose economic fortunes are in any way independent from the fortunes of the participants, we conclude that the Government has not carried its burden of proving that appellant resembles, in its essential economic features, a corporation more than it does a partnership.

The dissenting judge argued that centralized management and the members lack of participation in the business made the trust resemble a corporation. Those issues are no longer relevant in the check-the-box issue, given that unincorporated entities with those characteristics are now taxed as partnerships. More common in recent years is for an employer to form a trust taxable to the employer, where payments to employees constitute deferred compensation; for more about deferred compensation, see part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules. If a trust with multiple owners does not actively manage its assets, it may be taxed as a grantor trust; see part II.D.4.a Investment Trusts. I would tend to use one of the above two approaches rather than the strategy used in *Guar. Emps. Ass'n v. United States*, because the issue of partnership vs. trust may cause uncertainty.

The following trust was treated as a business entity:[643]

> The heirs to a number of contiguous parcels of real estate established a real estate trust, *T*. *T* is to collect the income from the real estate and to distribute such income to the heirs.
>
> The real estate transferred to *T* is subject to a net lease, which provides that the lessee will pay all property taxes, betterment assessments, water rates, sewer and utility charges, and fire and general public liability insurance. The lessee is required to manage, maintain, and repair the property under the terms of the lease.
>
> The property transferred to *T* was allocated on its books in undivided fractional interests, corresponding to each heir's interest in the property contributed.
>
> All the income of *T* is required to be distributed quarterly. *T*'s governing instrument may be amended by the consent of all the beneficiaries, and *T* will terminate 30 years from the date of its creation, unless terminated earlier by the consent of all the beneficiaries.
>
> Upon an express determination by the trustees that it is necessary to conserve or protect *T*'s real estate, beneficiaries or members of their families may contribute to *T* interests in real estate adjacent or contiguous to the real estate held in trust by *T*, in which event such persons shall become additional beneficiaries.
>
> If necessary to conserve and protect the value of *T*'s real estate, the trustees of *T* have the power to accept from any source and retain real estate contiguous or adjacent to the trust's real estate. The trustees also have the power to sell any real estate of the trust, and may purchase any real estate adjacent or contiguous to the real estate originally contributed to *T*, including any tangible personal property located on such real estate. Funds derived from the sale of property held by *T* and not reinvested in real estate can

[643] Rev. Rul. 78-371, citing *Wyman* from fn 641 and *Sears* from fn. 640, holding:

> While the facts in the instant case are similar to the facts in *Wyman*, the trustees of *T* also have the power to purchase and sell contiguous or adjacent real estate, and to accept and retain contributions of contiguous or adjacent real estate from the beneficiaries or members of their families. The trustees have the further power to raze or erect any building or other structure and make any improvements they deem proper on the land originally donated to the trust or on any adjacent or contiguous land subsequently acquired by the trust. The trustees are also empowered to borrow money and to mortgage and lease the property. These additional powers taken together indicate that the trustees of *T* are empowered to do more than merely protect and conserve the trust's property. Thus, the arrangement, in the instant case, is similar to the trust ruled to be an association in the *Sears* case.

only be invested in certificates of deposits, or obligations of federal or state governments.

The trustees are further empowered to borrow money, mortgage and lease property, raze or erect any building or other structure, and make any improvements they deem proper.

Shortly thereafter, the following trust was not held to be a business entity:[644]

Individuals A, B, and C, who owned a commercial building and the land upon which it was situated as tenants in common, established a trust with a bank as trustee. Simultaneously, A, B, and C transferred the land and building to the trust and named themselves as beneficiaries. A, B, and C receive proportionate quarterly distributions of all net income of the trust.

The trust agreement provides that the purpose of the trust is to empower the trustee to act on behalf of the beneficiaries as signatory of leasing agreements and management agreements, to hold title to the land and building and to the proceeds and income of the property, to distribute all trust income and to protect and conserve the property.

The beneficiaries' interests in the trust are evidenced by certificates that are transferable only on the death of a beneficiary or by unanimous written agreement of the beneficiaries. In addition, after the initial contribution no additional contributions may be made to the trust.

The beneficiaries must approve all agreements entered into by the trustee and they are personally liable for all debts of the trust. The trustee may determine whether to allow minor nonstructural alterations to the building and can institute legal or equitable action to enforce any provisions of a lease. The trust will terminate upon the sale of substantially all its assets or upon unanimous agreement of the beneficiaries.

The beneficiaries directed the trustee to sign a lease of the property to X, a corporation, for 20 years with options for three six-year extensions. X is to pay all taxes, assessments, fees or other charges imposed on the property by federal, state or local authorities. In addition, X is to pay for all insurance, maintenance, repairs, and utilities relating to the property.

The trustee as lessor prepared the building for X's use and can approve additional alterations by X only if the alterations protect and conserve the building or are required by law. The rent remains fixed for 20 years, but if the lease is renewed the rent will be recomputed based on the fair market value of the property. X has an option to purchase

---

[644] Rev. Rul. 79-77, citing Rev. Rul. 78-371 in fn. 643 and *Wyman* in fn. 641, held:

This case is distinguishable from Rev. Rul. 78-371 in that the trustee is restricted to dealing with a single piece of property subject to a net lease. Further, the trustee has none of the powers described in Rev. Rul. 78-371. Thus, the arrangement is similar to the trust held not to be a corporation in the WYMAN case.

HOLDING. The arrangement is classified as a trust for federal income tax purposes. Further, A, B, and C are the owners of the trust and are taxable on the income therefrom under subpart E of subchapter J, chapter 1 of the Code (sections 671-678).

> the property every tenth year during the term of the initial lease for an amount equal to the greater of the property's cost to the owners or its fair market value.

When two investors formed a trust to hold real estate to facilitate their estate planning as a form of ownership by which later transfers of beneficial interest to other members of their families would be permitted, the trustee's role was passive,[645] and the IRS attacked the trust when the investors has passed their interests to their beneficiaries, the trust was not a business entity because the beneficiaries were not associates.[646]

---

[645] *Elm Street Realty Trust v. Commissioner*, 76 T.C. 803 (1981), described the trustee's Johnson's role and relationship with the grantors:

> Johnson's understanding with respect to the Elm Street Realty Trust was that it was to be a passive trust; his duties would be to collect the rent from the tenant, pay the mortgage and distribute the income. The lease was a net lease under which Risley bore all expenses in connection with the property. Moreover, the trust was a "simple" trust which did not allow for any accumulation of income.
>
> It was never suggested to Johnson that the trust purchase additional property. He had no duties with respect to the Elm Street property because they were all assumed by the lessee. He never had occasion to confer with any of the beneficiaries regarding the real estate nor did he ever see the trust real estate.
>
> The various discretionary powers given to the trustee in the declaration of trust were inserted by Johnson as the attorney who drafted the trust instrument, without any participation by Egan and Harvey. It was Johnson's practice to include such powers in trust instruments in order to deal with any problems that might result from a wide array of unforeseen circumstances (*e.g.*, fire, disaster, condemnations, etc.). Johnson never discussed the wording of these powers with Egan and Harvey.

[646] *Elm Street Realty Trust v. Commissioner*, 76 T.C. 803 (1981), described the beneficiaries' roles:

> Turning to the circumstances of the instant case in light of the above-mentioned considerations, we note that the beneficiaries played no role in petitioner's creation. Egan and Harvey transferred the Elm Street property to petitioner and were the original beneficiaries, but they soon thereafter assigned their interests pursuant to article Sixth of the declaration of trust. It also appears that the subsequent beneficiaries received their interests gratuitously.[4] We think it can be safely said that the individuals who were petitioner's beneficiaries during the years in issue played no active role either in the creation of petitioner or upon their subsequent entrance into a beneficial relationship with the trust.[5]
>
> [4] This fact can be reasonably inferred from the lack of consideration referred to in the assignment documents as well as the estate planning purpose which Egan and Harvey stated as being one of the main reasons they chose a trust form of ownership.
>
> [5] For example, beneficiaries' purchase of beneficial interests would tend to indicate the presence of associates, since the purchase signifies a voluntary and affirmative entrance into the enterprise. See *Second Carey Trust v. Helvering*, 126 F.2d 526 (D.C. Cir. 1942), *cert. denied* 317 U.S. 642 (1942).
>
> The interests of the beneficiaries in the trust were transferable only under certain restrictive provisions contained in article Sixth. That article generally prohibited a transfer of the beneficiaries' interests with the exception of testamentary transfers pursuant to the will of a beneficiary and transfers assented to by the trustee and all of the other beneficiaries. The requirement that all other beneficiaries agree to any transfer of a beneficial interest imposes a substantial limitation on free transferability (sec. 301.7701-2(e)(1), Proced. & Admin. Regs.), and thus significantly hinders the ability of the beneficiaries to voluntarily and unilaterally substitute others for themselves as associates.
>
> The beneficiaries' other powers under the trust instrument included the authority to appoint a successor trustee in the event of the trustee's death, inability to serve, or resignation; amend or modify the trust instrument if acknowledged in writing by the trustee and all of the other

If the beneficiaries are associates in a joint enterprise for the conduct of business for profit, then the trust might be characterized as a business entity, not only for tax purposes[647] but also under state partnership law.[648] A business trust, created by the beneficiaries simply as a device to carry on a profit-making business that normally would have been carried on through a corporation or partnership, might be treated as a business entity.[649]

> beneficiaries; and terminate the trust prior to the expiration of the stated 11-year period if all of the beneficiaries notified the trustee in writing, or if any 25-percent (or greater) interestholder notified the trustee, subject to the trustee's absolute discretion to refuse to terminate the trust.
>
> In our view, the ability of the beneficiaries to influence or otherwise participate in the trust's activities is limited in scope by virtue of the conditions attached to the exercise of the relevant powers — either concurrence by all of the beneficiaries or concurrence of the trustee in addition. Although petitioner possessed a business objective, the evidence concerning the trust's creation and its subsequent operations does not indicate that the beneficiaries affirmatively planned or entered into a joint effort for the conduct of a common enterprise. Similarly, the nature of the beneficiaries' interests, including the powers incident thereto, does not suggest that they could effect an unfettered, significant influence on petitioner. We thus conclude that petitioner's form did not afford a medium by which the beneficiaries could conduct income-producing activities through a quasi-corporate entity. The beneficiaries were not associates for purposes of section 7701(a)(3) and the regulations thereunder.

[647] Reg. § 301.7701-4(a) provides that generally a trust will be respected as a trust if its purpose is to "vest in trustees responsibility for the protection and conservation of property for beneficiaries who cannot share in the discharge of this responsibility and, therefore, are not associates in a joint enterprise for the conduct of business for profit."

[648] *Roby v. Colehour*, 25 N.E. 777, 778 (Ill. Supreme Ct. 1890).

[649] Reg. § 301.7701-4(b), which elaborates:

> … the fact that the corpus of the trust is not supplied by the beneficiaries is not sufficient reason in itself for classifying the arrangement as an ordinary trust rather than as an association or partnership. The fact that any organization is technically cast in the trust form, by conveying title to property to trustees for the benefit of persons designated as beneficiaries, will not change the real character of the organization if the organization is more properly classified as a business entity under § 301.7701-2.

Rev. Rul. 88-79 treated as a business entity the following arrangement:

> Six individuals formed an organization, O, in Missouri, under the terms of an Agreement styled "Royalty Trust Agreement" (Agreement). O was formed for the purpose of buying, holding, and selling oil and gas royalty interests. The six individuals, referred to in the Agreement as the managers, contributed cash to O in exchange for certificates of beneficial interest. The managers of O collectively have substantial assets other than their interests in O. Certificates of beneficial interest were sold also to members of the general public pursuant to a public offering registered with the Securities and Exchange Commission. The agreement refers to these public investors as participants. The certificates of beneficial interest represent the right to share in the profits and losses of O and the right to a share of the assets of O upon its liquidation. The managers own 10 percent of the certificates of beneficial interest, and the participants own the remaining 90 percent.
>
> The Agreement provides that the investment activity of O is to be controlled and managed solely by the managers. The managers will determine the timing and amount of distributions from O to the certificate holders. Although the Agreement designates a commercial bank to serve as a trustee of O, the trustee does nothing more than hold legal title to the assets of O. The managers may replace the trustee with another bank at any time….
>
> Under the terms of the Agreement, O has associates and an objective to carry on business and divide the gains therefrom, and, therefore, O is not classified as a trust for tax purposes. Rather, it is classified as a partnership or as an association….

Rev. Rul. 98-37 obsoleted Rev. Rul. 88-79 in light of Reg. § 301.7701-4(a), but fn. 3340 indicates that Reg. § 301.7701-4(a) was not intended to change the principles of prior law.

A trust that constitutes a pooling of assets that are actively managed is at risk for being treated as a business entity.[650] For example, the IRS ruled that a trust formed by a couple and their grandchildren would not qualify as a charitable remainder trust (or be taxed as any type of trust), because the grantors would be deemed associates who pooled their assets with an object to carry on business and divide the gains therefrom.[651] It also ruled that a trust and subtrusts to control the exploitation of the patents, which would distribute to the grantors the royalties received from licensing the patents (net of administration expenses and other required payments), was a partnership.[652]

The last major case before the check-the-box regulations were issued, *Bedell Trust v. Commissioner*, (1986), *acq*. 1987-2 C.B. 1, involved a trust that ran real estate businesses and provided mandatory income interests as separate shares for descendants. The court analyzed the law:

> The principal matter before us is the determination of which side of the shadowy line of separation between trusts and associations the Bedell Trust falls. The starting point for considering whether any particular organization or entity qualifies as an "association" taxable as a corporation is *Morrissey v. Commissioner*, 296 U.S. 344 (1935). The Supreme Court granted certiorari in *Morrissey* (and three companion cases)[5] for the obvious purpose of establishing authoritative guidelines in a field which was then regarded as "seemingly in a hopeless state of confusion", and in which there was a widespread conflict of decisions in the lower courts. 296 U.S. at 347. To be sure, the Court recognized that it was not feasible to draw a hard and fast line between "associations" and other entities like trusts and partnerships. It noted that (p. 356) "it is impossible in the nature of things to translate the statutory concept of 'association' into a particularity of detail that would fix the status of every sort of enterprise or organization which ingenuity may create". It nevertheless proceeded to establish a degree of consistency in this field and give guidance in the attempt to classify a particular entity.
>
> [5] *Swanson v. Commissioner*, 296 U.S. 362 (1935); *Helvering v. Combs*, 296 U.S. 365 (1935); *Helvering v. Coleman-Gilbert*, 296 U.S. 369 (1935).
>
> The Court noted that (p. 357) "The inclusion of associations with corporations implies resemblance … and not identity", and it set forth six significant criteria or attributes to be taken into account in the process of determining the status of a given entity. These consisted of (i) Associates, (ii) an objective to carry on business and divide the gains therefrom, (iii) continuity of life, (iv) centralization of management, (v) liability for corporate debts limited to corporate property, and (vi) free transferability of beneficial interests. The Court stated that (p. 360) "these attributes make the trust sufficiently analogous to corporate organization to justify the conclusion that Congress intended that the income of the enterprise should be taxed in the same manner as that of corporations". Moreover, apart from the foregoing six criteria, the Court recognized that "the use of corporate forms may furnish persuasive evidence of the existence of an association", but it added that "the absence of particular forms, or of the usual terminology of corporations, cannot be regarded as decisive". (296 U.S. at 358.)

---

[650] See generally Zaritsky, Lane & Danforth, "¶ 1.07 The Income Tax Meaning of 'Trust,'" *Federal Income Taxation of Estates and Trusts* (WG&L).
[651] Letter Ruling 9547004.
[652] Letter Ruling 200219017.

The opinion in *Morrissey* also pointed out with approval that the Treasury Department had authority within permissible bounds of administrative construction to promulgate regulations or supply rules for the “enforcement” of the statute. 296 U.S. at 354-355. The statute in question in Morrissey and as subsequently reenacted and now in effect is section 7701(a)(3) of the Code which defines the term “corporation” to include “associations”. It was in the exercise of the authority recognized by the Supreme Court that the Treasury promulgated the present regulations modifying and expanding upon prior regulations. The new regulations, as amended, are currently to be found in sections 301.7701-1 through 301.7701-4, Proced. & Admin. Regs. The six tests outlined in *Morrissey* were incorporated in the new regulations, which further provided that “other factors may be found in some cases which may be significant in classifying an organization” and that the classification of an entity will depend on whether the “organization more nearly resembles a corporation than a partnership or trust. See Morrissey et al v. Commissioner (1935) 296 U.S. 344”. Sec. 301.7701-2(a)(1), Proced. & Admin. Regs.

In respect of both trusts and partnerships the regulations contain the following significant provisions (sec. 301.7701-2(a)(2) and (3)):

> (2) … Some of the major characteristics of a corporation are common to trusts and corporations, and others are common to partnerships and corporations. *Characteristics common to trusts and corporations are not material in attempting to distinguish between a trust and an association*, and characteristics common to partnerships and corporations are not material in attempting to distinguish between an association and a partnership. For example, since centralization of management, continuity of life, free transferability of interests, and limited liability are generally common to trusts and corporations, *the determination of whether a trust which has such characteristics is to be treated for tax purposes as a trust or as an association depends on whether there are associates and an objective to carry on business and divide the gains therefrom*. On the other hand, since associates and an objective to carry on business and divide the gains therefrom are generally common to both corporations and partnerships, *the determination of whether an organization which has such characteristics is to be treated for tax purposes as a partnership or as an association depends on whether there exists centralization of management, continuity of life, free transferability of interests, and limited liability*.
>
> (3) An unincorporated organization shall not be classified as an association *unless such organization has more corporate characteristics than noncorporate characteristics*. In determining whether an organization has more corporate characteristics than noncorporate characteristics, *all characteristics common to both types of organizations shall not be considered*.

[Emphasis supplied.]

Central to the application of these provisions is the final clause quoted above to the effect that all characteristics common to corporations and trusts or partnerships “shall not be considered”. (Emphasis supplied.) Thus, the regulations provide that since four of the six criteria are generally characteristic of both trusts and associations, the determinative test depends upon only the two remaining criteria, namely, whether there are “associates and an objective to carry on business and divide the gains therefrom”. (Emphasis supplied.) Similarly, where the problem is one of distinguishing between partnerships and associations, the regulations state that, after eliminating two of the criteria applicable generally to partnerships and corporations (associates and business purpose), the determinative test depends on the four remaining criteria.

The governing methodology in dealing with these regulations was established by this Court in *Larson v. Commissioner*, 66 T.C. 159 (1976). That case involved the provisions relating to distinguishing between partnerships and associations. The Court held that under the regulations, an entity could not be classified as an association (as opposed to a partnership) unless it had more than half (*i.e.*, more than two) of the four attributes specified in the regulations in respect of partnerships, assuming that there were no "other factors" in addition to the original six that might be significant. Furthermore, the Court applied a purely mechanical test in which each of the individual four factors were to be given equal weight, and in which it was simply necessary to count the critical factors to see whether they came to at least three. Thus, an entity might fail to be classified as an association rather than a partnership even though considering all four significant attributes as a group under a more flexible approach giving each attribute a different level of significance in the context of the particular case, one might arrive at an opposite conclusion.[6]

[6] This more flexible approach on the record before us would not result in an opposite conclusion in this case but would even further support the conclusion that we reach hereinafter in this opinion.

In our judgment, this Court's literal reading of the regulations in respect of partnership v. association is equally applicable in the case of trust v. association, dealt with in the same provisions of the regulations. In the case of classifying an entity as an association rather than a trust, the regulations provide that the result depends merely upon the two (not six) critical criteria relating to trusts, *i.e.*, "whether there are associates *and* an objective to carry on business and divide the gains therefrom". (Emphasis supplied.) In short, applying the regulations literally, as was done in *Larson*, the Bedell Trust cannot be classified as an association unless it satisfies both the associates and the business tests. Not only do the regulations refer to both attributes in the conjunctive, but they also specifically require that, after eliminating "all characteristics common to both types of organizations", an organization "shall not be classified as an association unless [it] … has *more* corporate characteristics than noncorporate characteristics". (Emphasis supplied.) Sec. 301.7701-2(a)(3), Proced. & Admin. Regs. Thus, in accordance with the latter requirement, since the trust must have "more" than half of the two determinative characteristics to qualify as an "association" rather than a trust, it must fail to qualify as such if it satisfies only one of the tests. So much is plainly called for by the methodology employed in *Larson* that was approved by a majority of the Court.

Turning to the case before us, we must conclude that the Bedell Trust is not an association since we find that it does not have "associates". Failure to satisfy the "associates" test is itself sufficient to prevent it from being classified as an association. Such failure alone was held to be decisive in *Elm Street Realty Trust v. Commissioner*, 76 T.C. 803 (1981), wholly apart from whether the entity may have also satisfied the conduct of a business test. The same result is called for here, since we find that there was similarly an absence of associates in respect of the Bedell Trust.

In considering whether there were associates, it is pertinent to examine the basic nature of the Bedell Trust. The trust was established pursuant to the Will of Harry M. Bedell, Sr., which undertook to set forth the testator's complete estate plan. After making some specific bequests of certain tangible personal property to his wife and son, the testator provided for the transfer of his entire remaining assets, the bulk of his estate, to the testamentary trust before us. Those assets included his large home in Washington, a summer home in Maryland, certain commercial real estate in Maryland, his sole proprietorship (the Bedell Manufacturing Co.), and all other remaining assets owned by him.[7] The will is an extraordinary document, drafted by the testator himself with what appears to have been only a minimal amount of professional legal assistance. The testator's image as disclosed by the will is that of a strong-willed person accustomed to being the dominant figure in his family and having his own way, who was emphatic upon seeing to it that only his blood descendants should benefit from his estate. It is in the context of this will that we must determine whether the Bedell Trust fails to qualify as an association by reason of the absence of "associates". We note preliminarily that its status as a trust has never been challenged by the IRS since its creation in 1964, until the Commissioner's determination in respect of the years 1980 and 1981, the years before us now.

[7] We are aware that most of the assets apart from the Bedell Manufacturing Co. had been disposed of prior to the years in issue, 1980 and 1981. On the other hand, it is clear on this record that the highly valuable land owned by the trust during the tax year was being held for appreciation, particularly for the benefit of the remaindermen-an objective wholly apart from that of conducting the business of the company. Moreover, even as to that portion of the land occupied by the company, the facilities therein were far in excess of its needs and such excess facilities were being held by the trust simply for profitable leasing so as to augment the amount of distributable current income payable to the lifetime beneficiaries. To be sure, the company was certainly engaged in conducting a business, but whether that was enough to conclude that it outweighed the nonbusiness aspects of the trust so as to satisfy the business test under the regulations is a matter that we need not decide. For, even if the business test be regarded as satisfied-and a strong case can be made out that it is-decision must nevertheless go against the Government in view of our conclusion that the associates test has not been satisfied.

We find that the trust under consideration lacks associates and is thereby not classifiable as an association. The beneficiaries here have not "plan[ned] a common effort or enter[ed] into a combination for the conduct of a business enterprise". *Morrissey v. Commissioner*, 296 U.S. 344, 357 (1935). Additionally, they did not affirmatively enter into the enterprise by way of a purchase of their beneficial interests. *Elm Street Realty Trust v. Commissioner*, 76 T.C. at 814.

Further, a relevant factor to be taken into account is that it was the decedent's "desire to create an estate for [his] …children [and grandchildren] which could not be dissipated by spendthrift operations, a desire which was effectuated by the restriction on the beneficiaries' interests against any anticipatory assignment thereof". *Elm Street Realty Trust v. Commissioner*, *supra*, 76 T.C. at 815. To be sure, there were no specific provisions against assignment in the decedent's will, but his desire that the beneficial interests in the trust remain within the family comes through loud and clear.

The beneficiaries' interests were too personal to be freely transferable. It was Mr. Bedell's clear intention that the trust income be used only to benefit children and grandchildren of the whole blood-an intention that, in our judgment, would be given

> effect by any local court construing the will. Only one of those so limited descendants can look to trust funds in case he contracts a "crippling disease and is unable financially to bear the expense". Since a beneficiary cannot confer upon a substitute "all the attributes of his interest" in the trust, such interest is not transferable. *Foster v. Commissioner*, 80 T.C. 34, 190 (1983), *affd. on this issue* 756 F.2d 1430 (9th Cir. 1985). Sec. 301.7701-2(e)(1), Proced. & Admin. Regs. This non-transferability of interests militates against a finding of associates. *Elm Street Realty Trust v. Commissioner*, *supra* at 815. See *Curt Teich Trust No. One v. Commissioner*, 25 T.C. 884 (1956); *Living Funded Trust of Harry E. Lyman v. Commissioner*, 36 B.T.A. 161 (1937). We cannot find, where one person has created an entity, unilaterally distributed interests in it to others, and then restricted their ability to transfer their interests, that there exists "a voluntary association of individuals for convenience and profit", which characteristic is the very essence of an association. *Blair v. Wilson Syndicate Trust*, 39 F.2d 43, 46 (5th Cir. 1930).
>
> Further, the beneficiaries did not, *qua* beneficiaries, control trust affairs. Only 3 of the original 10 beneficiaries (wife, 3 children, 6 grandchildren) 8 participated in trust affairs as trustees in the years at issue. These trustees, to a large extent, are responsible for the "protection and conservation of property for beneficiaries who cannot share in the discharge of this responsibility", those beneficiaries being the wife and grandchildren. Sec. 301.7701-4(a), Proced. & Admin. Regs. Participation in trust management by so few beneficiaries does not transform all the beneficiaries into associates and the trust into an association. See *United States v. Davidson*, 115 F.2d 799, 800, 801 (6th Cir. 1940); *Curt Teich Trust No. One v. Commissioner*, 25 T.C. at 892; *Living Funded Trust of Harry E. Lyman v. Commissioner*, 36 B.T.A. at 166, 168. This conclusion is particularly clear where the non-participating beneficiaries have no right to appoint or control those beneficiaries who do act as trustees.

The court held:

> We conclude that the beneficiaries, who neither created nor contributed to the trust, whose interests in the trust are not transferable, and only a few of whom participate in the trust affairs, are not associates and their trust is not an association.

The court further commented:

> We understand that the Government regarded this case as a test case in respect of testamentary trusts and trusts engaged in the conduct of a business, and that high levels in the IRS were active in pressing the matter. It is difficult to imagine a more unsuitable vehicle than this case for any such purpose, and we think it regrettable that extensive misguided efforts were exerted to such a fruitless end in this litigation.

Some trusts with multiple owners are disregarded for income tax purposes,[653] including unit investment trusts, which limit the trustee's role to a relatively passive one.[654] Rev. Rul. 2004-86 ruled that a Delaware statutory trust (DST)[655] owned by multiple investors who invested to make

---

653 See part II.D Special Purpose Trusts.
654 See part II.D.4.a Investment Trusts.
655 The DST Act provides much freedom to contractually set rules. See Swoyer, "Don't Let the Name Fool You: Delaware Statutory Trusts are Controlled by Contract," *Business Law Today* (12/2016) (saved as Thompson Coburn LLP document number 6488741), discussing *Grand Acquisition, LLC v. Passco Indian Springs DST*, 145 A.3d 990 (Del. Ch. 2016).

a profit was a unit investment trust that was a disregarded entity rather than a partnership. Before discussing the tax issues, here's a comment about DSTs I received 6/28/2023 in response to an inquiry I made where a potential client has been told that it would require fire-sale-type prices to sell their DSTs in a secondary market:

> Generally, the structure of the DST is not very participant friendly when it comes to try to sell an individual ownership unit. The operating agreement should outline the process, and generally there is a first right of refusal or some other inside sale path that may have to be executed before going to market, including but not limited to appraisal. Some also have submarket valuations for allowing the sale, hence the "fire-sale" discussions.

Rev. Rul. 2004-86 involved the following:

> On January 1, 2005, A, an individual, borrows money from BK, a bank, and signs a 10-year note bearing adequate stated interest, within the meaning of § 483. On January 1, 2005, A used the proceeds of the loan to purchase Blackacre, rental real property. The note is secured by Blackacre and is nonrecourse to A.
>
> Immediately following A's purchase of Blackacre, A enters into a net lease with Z for a term of 10 years. Under the terms of the lease, Z is to pay all taxes, assessments, fees, or other charges imposed on Blackacre by federal, state, or local authorities. In addition, Z is to pay all insurance, maintenance, ordinary repairs, and utilities relating to Blackacre. Z may sublease Blackacre. Z's rent is a fixed amount that may be adjusted by a formula described in the lease agreement that is based upon a fixed rate or an objective index, such as an escalator clause based upon the Consumer Price Index, but adjustments to the rate or index are not within the control of any of the parties to the lease. Z's rent is not contingent on Z's ability to lease the property or on Z's gross sales or net profits derived from the property.
>
> Also on January 1, 2005, A forms DST, a Delaware statutory trust described in the Delaware Statutory Trust Act, Del. Code Ann. Title 12, §§ 3801-3824, to hold property for investment. A contributes Blackacre to DST. Upon contribution, DST assumes A's rights and obligations under the note with BK and the lease with Z. In accordance with the terms of the note, neither DST nor any of its beneficial owners are personally liable to BK on the note, which continues to be secured by Blackacre.
>
> The trust agreement provides that interests in DST are freely transferable. However, DST interests are not publicly traded on an established securities market. DST will terminate on the earlier of 10 years from the date of its creation or the disposition of Blackacre, but will not terminate on the bankruptcy, death, or incapacity of any owner or on the transfer of any right, title, or interest of the owners. The trust agreement further provides that interests in DST will be of a single class, representing undivided beneficial interests in the assets of DST.
>
> Under the trust agreement, the trustee is authorized to establish a reasonable reserve for expenses associated with holding Blackacre that may be payable out of trust funds. The trustee is required to distribute all available cash less reserves quarterly to each beneficial owner in proportion to their respective interests in DST. The trustee is required to invest cash received from Blackacre between each quarterly distribution and all cash held in reserve in short-term obligations of (or guaranteed by) the United States, or any agency or instrumentality thereof, and in certificates of deposit of any bank or

> trust company having a minimum stated surplus and capital. The trustee is permitted to invest only in obligations maturing prior to the next distribution date and is required to hold such obligations until maturity. In addition to the right to a quarterly distribution of cash, each beneficial owner has the right to an in-kind distribution of its proportionate share of trust property.
>
> The trust agreement provides that the trustee's activities are limited to the collection and distribution of income. The trustee may not exchange Blackacre for other property, purchase assets other than the short-term investments described above, or accept additional contributions of assets (including money) to DST. The trustee may not renegotiate the terms of the debt used to acquire Blackacre and may not renegotiate the lease with Z or enter into leases with tenants other than Z, except in the case of Z's bankruptcy or insolvency. In addition, the trustee may make only minor non-structural modifications to Blackacre, unless otherwise required by law. The trust agreement further provides that the trustee may engage in ministerial activities to the extent required to maintain and operate DST under local law.

The facts did not discuss whether the tenants maintain the property or merely reimburse the landlord for expenses incurred. However, given the trustee's limited authority described above, I seriously doubt that the trustee could have contracted to maintain the property and get reimbursed.

The Ruling pointed out:

> Under Delaware law, DST is an entity that is recognized as separate from its owners. Creditors of the beneficial owners of DST may not assert claims directly against Blackacre. DST may sue or be sued, and the property of DST is subject to attachment and execution as if it were a corporation. The beneficial owners of DST are entitled to the same limitation on personal liability because of actions of DST that is extended to stockholders of Delaware corporations. DST may merge or consolidate with or into one or more statutory entities or other business entities. DST is formed for investment purposes. Thus, DST is an entity for federal tax purposes.
>
> Whether DST or its trustee is an agent of DST's beneficial owners depends upon the arrangement between the parties. The beneficiaries of DST do not enter into an agency agreement with DST or its trustee. Further, neither DST nor its trustee acts as an agent for A, B, or C in dealings with third parties. Thus, neither DST nor its trustee is the agent of DST's beneficial owners. *Cf. Comm'r v. Bollinger*, 485 U.S. 340 (1988).
>
> This situation is distinguishable from Rev. Rul. 92-105. First, in Rev. Rul. 92-105, the beneficiary retained the direct obligation to pay liabilities and taxes relating to the property. DST, in contrast, assumed A's obligations on the lease with Z and on the loan with BK, and Delaware law provides the beneficial owners of DST with the same limitation on personal liability extended to shareholders of Delaware corporations. Second, unlike A, the beneficiary in Rev. Rul. 92-105 retained the right to manage and control the trust property.

The Ruling the addressed the DST's status as an entity:

> Because DST is an entity separate from its owner, DST is either a trust or a business entity for federal tax purposes. To determine whether DST is a trust or a business entity

for federal tax purposes, it is necessary, under § 301.7701-4(c)(1), to determine whether there is a power under the trust agreement to vary the investment of the certificate holders.

Prior to, but on the same date as, the transfer of Blackacre to DST, A entered into a 10-year nonrecourse loan secured by Blackacre. A also entered into the 10-year net lease agreement with Z. A's rights and obligations under the loan and lease were assumed by DST. Because the duration of DST is 10 years (unless Blackacre is disposed of prior to that time), the financing and leasing arrangements related to Blackacre that were made prior to the inception of DST are fixed for the entire life of DST. Further, the trustee may only invest in short-term obligations that mature prior to the next distribution date and is required to hold these obligations until maturity. Because the trust agreement requires that any cash from Blackacre, and any cash earned on short-term obligations held by DST between distribution dates, be distributed quarterly, and because the disposition of Blackacre results in the termination of DST, no reinvestment of such monies is possible.

The trust agreement provides that the trustee's activities are limited to the collection and distribution of income. The trustee may not exchange Blackacre for other property, purchase assets other than the short-term investments described above, or accept additional contributions of assets (including money) to DST. The trustee may not renegotiate the terms of the debt used to acquire Blackacre and may not renegotiate the lease with Z or enter into leases with tenants other than Z, except in the case of Z's bankruptcy or insolvency. In addition, the trustee may make only minor non-structural modifications to Blackacre, unless otherwise required by law.

This situation is distinguishable from Rev. Rul. 78-371, because DST's trustee has none of the powers described in Rev. Rul. 78-371, which evidence an intent to carry on a profit making business. Because all of the interests in DST are of a single class representing undivided beneficial interests in the assets of DST and DST's trustee has no power to vary the investment of the certificate holders to benefit from variations in the market, DST is an investment trust that will be classified as a trust under § 301.7701-4(c)(1).

Thus, when tenants in common lease the property to an entity that itself engages in an active rental business (a "master lease") and the tenants in common do not themselves maintain the property, the tenants in common may be able to avoid partnership treatment. Ideally, the tenant under the master lease (that subleases to various tenants in its real estate business) would have ownership different than those who own the tenants in common, to avoid the master tenant being considered merely an extension of the tenants in common. However, Rev. Rul. 2004-86 did not specify who owned X, the master tenant, and whether the master tenant needs to have a different ownership structure is subject to debate.[656]

Rev. Proc. 2020-34, § 3.06 points out that Rev. Rul. 2004-86 "states that Trust would have been treated as a business entity and not a trust if Trust's trustee had a power under the trust agreement to, among other things, renegotiate the lease with its tenant, to enter into leases with

other tenants, or to renegotiate or refinance the mortgage loan whose proceeds were used to purchase Blackacre."

Rev. Proc. 2020-34, § 7, "Safe Harbor," provides, "For the purpose of determining whether the arrangement is treated as a trust under § 301.7701-4(c) and Revenue Ruling 2004-86, the actions described in section 6 of this revenue procedure are not manifestations of a power to vary." Rev. Proc. 2020-34, § 6, "Scope," provides relief regarding the COVID-19 pandemic:[657]

.01 This revenue procedure applies to arrangements that are trusts under § 301.7701-4(c) and Rev. Rul. 2004-86 and that hold real property and engage in one or more of the actions described in sections 6.02, 6.03, or 6.04 of this revenue procedure.

.02 Modification of one or more mortgage loans that secure the trust's real property in -

(1) A CARES Act Forbearance (and all related modifications); or

(2) A forbearance (and all related modifications) –

(a) That are described in section 2.07 of Rev. Proc. 2020-26;

(b) That the trust requested, or agreed to, between March 27, 2020, and December 31, 2020; and

(c) That were granted as a result of the trust experiencing a financial hardship due to the COVID-19 emergency.

.03 Modifications of one or more real property leases (including modifications to the specific allocations of fixed rent in the lease agreements as described in § 467 of the Code and the regulations under § 467; see section 9.01 of this revenue procedure). The lease must have been entered into by the trust on or before March 13, 2020, and the modifications must have been requested and agreed to on or after March 27, 2020, and on or before December 31, 2020. The reason for the modifications must be -

(1) To coordinate the lease cash flows with the cash flows that result from one or more transactions described in section 6.02 of this revenue procedure; or

(2) To defer or waive one or more tenants' rental payments for any period between March 27, 2020, and December 31, 2020 (and all related modifications), because the tenants are experiencing a financial hardship due to the COVID-19 emergency.

.04 Acceptance of cash contributions that are made between March 27, 2020, and December 31, 2020, as a result of the trust experiencing financial hardship due to the COVID-19 emergency, provided the contribution must be needed to increase permitted trust reserves, to maintain trust property, to fulfill obligations under mortgage loans, or to fulfill obligations under real property leases. See section 10 of

[657] Rev. Proc. 2020-34, § 4.04 describes the forbearances set forth in Rev. Proc. 2020-34, § 7.02.

> this revenue procedure regarding the tax treatment of non-pro rata contributions or contributions from new investors for an interest in the trust.

Rev. Proc. 2021-12 further extended to September 30, 2021 certain deadlines that Rev. Proc. 2020-26 or 2020-34 had extended to December 31, 2020.

When using the master lease, however, note that the rental income will be subject to the 3.8% net investment income tax, because rental generally is passive and does not qualify for certain exceptions that may apply to rental that is an active trade or business.[658] The owners would also want to take steps to limit liability, either holding the real estate through a unit investment trust such as the DST described in Rev. Rul. 2004-86 or by each owner forming a separate LLC to hold that owner's undivided interest in the real estate. See Lipton, Donovan, and Kassab, "The Promise (and Perils) of Using Delaware Statutory Trusts in Real Estate Offerings," *Journal of Taxation* (June 2008).

Rost v. U.S., 130 A.F.T.R.2d 2022-5462 (5th Cir. 8/11/2022), involved a foreign entity which, if classified as a foreign trust, would subject the decedent to penalties for failure to file certain information returns. The court summarized the facts:

> In 2005, John Rebold formed the Enelre Foundation as a *Stiftung* under the laws of Liechtenstein. *Stiftung* is a German word meaning, roughly, "foundation" or "endowment." Enelre's purpose is to provide education and general support for Rebold and his children. Rebold transferred $3 million to Enelre's bank accounts. He later learned the IRS would consider Enelre a "foreign trust," triggering certain reporting requirements. Rebold belatedly filed the reports, and the IRS assessed penalties. Rebold paid the penalties and then filed this refund action. The district court granted summary judgment for the government. We affirm.

The court reviewed the law on when an arrangement is classified as a trust, absent authority directly on point:

> The classification of an organization "for federal tax purposes is a matter of federal tax law and does not depend on whether the organization is recognized as an entity under local law." Treas. Reg. § 301.7701-1(a). Sections 301.7701-2, 301.7701-3, and 301.7701-4 determine the classification of organizations recognized as separate entities, unless the IRC "provides for special treatment of that organization." *Id*. § 301.7701-1(b). Neither the IRC nor its regulations specifically classify or provide for special treatment of *Stiftungen*. *Cf. id*. § 301.7701-2(b)(8) (classifying Liechtenstein *Aktiengesellschaften* as corporations).
>
> Determining whether an arrangement is a foreign trust requires a two-step inquiry: (1) whether it is a trust under section 301.7701-4 or a business entity under sections 301.7701-2 or 301.7701-3, and (2) if it is a trust, whether it is a United States person (*i.e.,* a domestic trust) or a foreign trust. See I.R.C. § 7701(a)(30)(E), (31)(B); Treas. Reg. §§ 301.7701-1(a)-(b), (d), 301.7701-2(a), 301.7701-4(a), 301.7701-5(a), 301.7701-7.
>
> A "trust" in the IRC is an arrangement where "trustees take title to property for the purpose of protecting or conserving it for the beneficiaries." Treas. Reg. § 301.7701-

[658] See part II.I.8.c Application of 3.8% Tax to Rental Income.

4(a). An arrangement generally qualifies as a trust if "the purpose of the arrangement is to vest in trustees responsibility for the protection and conservation of property for beneficiaries who cannot share in the discharge of this responsibility and, therefore, are not associates in a joint enterprise for the conduct of business for profit." *Ibid*.; see also *Frank Aragona Tr. v. Comm'r*, 142 T.C. 165, 175 (2014).

An arrangement's purpose thus distinguishes a trust from other entities. "[A]ny entity recognized for federal tax purposes...that is not properly classified as a trust under § 301.7701-4" is a "business entity." Treas. Reg. § 301.7701-2(a). Arrangements "known as trusts because the legal title to property is conveyed to trustees for the benefit of beneficiaries" may nevertheless not qualify as trusts under the IRC "because they are not simply arrangements to protect or conserve the property for the beneficiaries." *Id*. § 301.7701-4(b). "Business trusts," for example, "generally are created by the beneficiaries simply as a device to carry on a profit-making business which normally would have been carried on through business organizations that are classified as corporations or partnerships under the [IRC]." *Ibid*.; see *Petersen v. Comm'r*, 148 T.C. 463, 475 n.8 (2017).

In classifying an arrangement as a trust or other business entity for tax purposes, "there is no one rule or set formula," and "[e]ach case must be decided upon its own particular facts." *Keating-Snyder Tr. v. Comm'r*, 126 F.2d 860, 862 (5th Cir. 1942); see also *Comm'r v. Horseshoe Lease Syndicate*, 110 F.2d 748, 749 (5th Cir. 1940) ("the facts of each case[] must control"). The seminal case is *Morrissey v. Commissioner*, 296 U.S. 344 (1935). There, the Supreme Court held that a trust created for developing tracts of land and constructing and operating a golf course was properly classified and taxed as "an association" (i.e., a business trust), rather than an ordinary trust, based on its "character" and "salient features," including the trustees' "use and adaptation of the trust mechanism." *Id*. at 359-61. The Court applied *Morrissey*'s fact-specific approach in three companion cases decided that same day. See *Swanson v. Comm'r*, 296 U.S. 362 (1935); *Helvering v. Coleman-Gilbert Assocs.*, 296 U.S. 369 (1935); *Helvering v. Combs*, 296 U.S. 365 (1935).

An arrangement's most relevant features for tax-classification purposes are its "nature," "purpose," and "operations." *Morrissey*, 296 U.S. at 357; *Swanson*, 296 U.S. at 365.[5] The form of organization under which the arrangement operates "may furnish persuasive evidence" of a classification but "cannot be regarded as decisive." *Morrissey*, 296 U.S. at 358. No feature is dispositive; they "all go to the point of whether the trust is being used to achieve the organizational conveniences of the corporate form." *Guar. Emps. Ass'n v. United States*, 241 F.2d 565, 571 (5th Cir. 1957).

[5] Morrissey relied on five corporate features to conclude the trust was "analogous to a corporate organization" and thus qualified as an "association," or "business trust." 296 U.S. at 359-61. These features are "(1) title to the property held by the entity, (2) centralized management, (3) continuity uninterrupted by deaths among the beneficial owners, (4) transfer of interest without affecting the continuity of the enterprise, and (5) limitation of the personal liability of participants." *Comm'r v. Rector & Davidson*, 111 F.2d 332, 333 (5th Cir. 1940); see *Kurzner v. Comm'r*, 413 F.2d 97, 101-04 & n.22 (5th Cir. 1969) (reviewing Morrissey 's discussion of "distinguishing attributes of 'corporateness'").

> In assessing these features, the arrangement's organizing documents are determinative. See *Swanson*, 296 U.S. at 363-65; *Morrissey*, 296 U.S. at 360-61. As the Supreme Court has explained, "parties are not at liberty to say that their purpose was other or narrower than that which they formally set forth in the instrument under which their activities were conducted." *Coleman-Gilbert*, 296 U.S. at 374.[6]
>
> [6] See also *Abraham v. United States*, 406 F.2d 1259, 1262-63, 1263 n.4 (6th Cir. 1969) (finding "broad powers...for conducting a business for profit...carefully spelled out" in the trust instrument could not "be negated by [a] self-serving limiting declaration contained in the last paragraph" that the trust "shall not be deemed or considered a trust operated for financial profit"); *Nee v. Main St. Bank*, 174 F.2d 425, 429 (8th Cir. 1949) ("The intention, through the creation of a trust, to conduct a business enterprise may accordingly legally be inferred...from the enumeration in the instrument of powers which, if exercised, would necessarily cause such an enterprise to result."); *Sears v. Hassett*, 111 F.2d 961, 962-63 (1st Cir. 1940) (noting the "character of the trust" is determined by "the purposes and potential activities as disclosed on the face of the trust instrument").

The court then explained why the arrangement in this case is properly characterized as a trust:

> The district court correctly found that Enelre qualifies as a foreign trust. Its organizing documents explain that Enelre's purpose is to support its beneficiaries and limit its transactions to "pursuing and realising its purpose." This is "characteristic of an ordinary trust." *Morrissey*, 296 U.S. at 356-57. The documents also prohibit Enelre from conducting commercial trade. Liechtensteinian Public Registry filings confirm this prohibition. Enelre's familial purpose, lack of business objective, and bar on commercial activity render it a trust. See *McKean v. Scofield*, 108 F.2d 764, 765-66 (5th Cir. 1940) (holding a trust was taxable as a trust and not an association because "[s]olicitude for the future of [the settlor's] family [wa]s a main purpose of the trust"); see also *Estate of Bedell v. Comm'r*, 86 T.C. 1207, 1221 (1986) (holding a "trust characterized by a dominant familial objective" was taxable as a trust and not an association because it lacked a business purpose).[7]
>
> [7] *Cf. Coleman-Gilbert*, 296 U.S. at 373-74 (holding trust was taxable as an association because the parties engaged "in carrying on an extensive business for profit"); *Adkins Props. v. Comm'r*, 143 F.2d 380, 381 (5th Cir. 1944) (holding trust with "an active business purpose, having the general characteristics and advantages of corporate organization" was taxable as an association); cases cited supra note 6.
>
> Enelre's form of organization confirms it is a trust. Enelre is subject to Liechtenstein's "Act on Trust Enterprises." Its board members serve the same function as independent trustees, and Enelre's counsel considered them trustees. Enelre also has beneficiaries like an ordinary trust. Rebold described himself as "Settlor and Beneficiary" of Enelre, and he transferred money to Enelre the same way a trust grantor would. Rebold's children, the other beneficiaries, were not involved with Enelre and did not know it existed during the years in question, so they could not have been "associates" engaged in a common business enterprise. See *Morrissey*, 296 U.S. at 357; *cf. Elm St. Realty Tr. v. Comm'r*, 76 T.C. 803, 813-18 (1981). And Enelre's organizing documents do not provide for profit sharing. See *Morrissey*, 296 U.S. at 357.

II.D.2. Business Entity as Grantor of Trust or Donor to Charity or Other Donee

II.D.2.a. Business Entity as Grantor of Trust

If a partnership or corporation makes a gratuitous transfer to a trust for a business purpose of the partnership or corporation, the partnership or corporation will generally be treated as the grantor of the trust.[659]

For example, if a partnership creates a trust to secure a legal obligation of the partnership to a third party unrelated to the partnership, the partnership will be treated as the trust's grantor.[660]

However, if a partnership or a corporation creates a trust that is not for a business purpose of the entity but is for the personal purposes of one or more of the entity's owners, the gratuitous transfer will be treated as a constructive distribution to those owners under federal tax principles and the owners will be treated as the trust's grantors.[661] For example:

- If a corporation creates a trust that includes not only the corporation but also its shareholders as beneficiaries, the corporation shall be treated as having distributed property to those shareholders and those shareholders being considered to have contributed that property to the trust.[662]
- If a partnership creates a trust for the benefit of a child of a partner, the gratuitous transfer will be treated as a distribution to the partner and a subsequent gratuitous transfer by the partner to the trust.[663]

For example, in *Sage v. Commissioner*, 154 T.C. No. 12 (2020), the Official Tax Court Syllabus said:

> P, a real estate developer, owned through subchapter S corporation IDG three parcels of Oregon real estate encumbered by liabilities in excess of their fair market values. In response to the 2008 economic recession, IDG engaged in a series of transactions in December 2009 designed to transfer the parcels to three separate liquidating trusts for the benefit of the mortgage holders. Between 2010 and 2012 the liquidating trusts disposed of the parcels, and the mortgage holders applied the proceeds from these

---

[659] Reg. § 1.671-2(e)(4). Jonathan Blattmachr's 2015 Heckerling presentation cites the following examples of split-interest trusts created by business entities:

> PLR 9205031 (not precedent) and PLR 8102093: CRT could be created by C corporation; PLR 9340043: CRT could be created by S corporation; PLR 9419021 and PLR 199952071: CRT could be created by partnership (or LLC treated as partnership)
> …
> PLR 9512002: S corporation could create charitable lead trust; PLR 8145101: C corporation could create charitable lead trust. (These were non-grantor trust CLATs)

[660] Reg. § 1.671-2(e)(4).

[661] Reg. § 25.2511-1(h)(1), which controls gift tax treatment and is reproduced in part III.B.1.h Transfers in the Ordinary Course of Business.

[662] See fn. 4969 in part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

[663] Reg. § 1.671-2(e)(4). Also, TAM 200733024 asserts a similar position (deemed distribution from corporation to shareholder for a trust that the corporation established for shareholder's family) before the regulation's effective date.

dispositions against the outstanding liabilities of IDG and its wholly owned limited liability company (LLC).

IDG reported significant losses as a result of the 2009 transactions, which losses P claimed on his 2009 individual tax return. These losses gave rise to a net operating loss (NOL), which P, inter alia, carried back to his 2006 taxable year as an NOL carryback deduction and forward to his 2012 taxable year as an NOL carryover deduction. R disallowed the losses reported by IDG and claimed by P for the 2009 taxable year, made correlative adjustments to the 2006 and 2012 NOL deductions, and determined deficiencies for 2006 and 2012.

Held: As the proceeds of the Oregon parcels held by the liquidating trusts were applied to discharge certain liabilities of IDG and its wholly owned LLC between 2010 and 2012, IDG and the LLC were the owners of the corresponding liquidating trusts during those respective years pursuant to the grantor trust provisions. I.R.C. secs. 671-679.

Held, further, because IDG and the LLC owned the liquidating trusts beyond the close of the 2009 taxable year, the losses reported by IDG and claimed by P for 2009 were not bona fide dispositions and not evidenced by closed and completed transactions, fixed by identifiable events, and actually sustained during that year. Sec. 1.165-1(b), Income Tax Regs. The deductions were properly disallowed.

Sage v. Commissioner, 154 T.C. No. 12 (2020), held:[664]

Under the specific facts of this case, section 677(a)(1) and its accompanying regulations compel the conclusions that (1) IDG was the owner of Village and Plains in 2010 and 2012, respectively, and Gales Creek Terrace LLC was the owner of Creek in 2011, and (2) the Village Trust and the Plains Trust were not separate taxable entities from IDG, and the Creek Trust was not a separate taxable entity from Gales Creek Terrace LLC, during those years. These twin conclusions preclude the tax treatment Mr. Sage seeks.

As an initial matter, IDG and Gales Creek Terrace LLC were grantors of the respective trusts. IDG was a grantor of the Village Trust and the Plains Trust by virtue of its direct gratuitous transfer of ownership of the project LLCs (which in turn held the properties) to the trusts. Sec. 1.671-2(e)(1), Income Tax Regs. For its part Gales Creek Terrace LLC was a grantor of the Creek Trust because of its indirect gratuitous transfer of Creek to the Creek Trust (through its contribution of Creek to the Creek Project LLC). See *id.*

As explained above, the grantor of a trust is treated as an owner where, inter alia, trust income is "applied in discharge of a legal obligation of the grantor". Sec. 1.677(a)-1(d), Income Tax Regs. Income, in this regard, includes the trust corpus. Sec. 1.671-2(b), Income Tax Regs.

The parties before us agree that IDG and Gales Creek Terrace LLC remained liable to Sterling and CFC, respectively, for the loans secured by Village, Plains, and Creek after the ownership of those properties had passed to the respective trusts. When Village was sold in 2010 for $3,469,390 and Plains was sold in 2012 for $350,000, the proceeds were distributed to Sterling, which credited the amounts against IDG's outstanding loans

[664] The opinion includes a reference to the subject matter of part II.D.4.b Liquidating Trusts.

secured by those respective properties. For its part, Creek was transferred to CFC in 2011 in partial satisfaction of Gales Creek Terrace LLC's loan.

As the corpus of each trust was used to satisfy the legal obligations of IDG or Gales Creek Terrace LLC, we conclude that they were owners of the respective trusts after 2009, and that the trusts therefore were not separate taxable entities as to them. See sec. 1.677(a)-1(d), Income Tax Regs.; see also *Gould v. Commissioner*, 139 T.C. at 435; *Madorin v. Commissioner*, 84 T.C. at 671. The 2009 transfers accordingly did not accomplish bona fide dispositions of the property evidenced by closed and completed transactions as necessary to support the losses ultimately reported by IDG and passed on to Mr. Sage.[17]

[17] In his briefs Mr. Sage argues that the lenders had no legal obligation to apply any income realized from the properties to satisfy the debt of IDG or Gales Creek Terrace LLC. This point is of no moment given that the trust corpus was used in fact to pay these obligations. Even setting aside that fact and, further, assuming arguendo that the lenders had discretion as Mr. Sage suggests, the trusts nonetheless would constitute grantor trusts because they were trusts "whose income …, in the discretion of … a nonadverse party … may be applied in discharge of a legal obligation of the grantor". Sec. 1.677(a)-1(d), Income Tax Regs. (emphasis added). The respective trust documents require the distribution of all net trust income and all net proceeds from the sale of trust assets to Sterling and CFC. Although trust beneficiaries are ordinarily considered adverse parties, sec. 1.672(a)-1(b), Income Tax Regs., a party "can hardly be considered adverse regarding distributions for … [its] benefit", *Luman v. Commissioner*, 79 T.C. 846, 854 (1982); see also *Vercio v. Commissioner*, 73 T.C. at 1258. Sterling and CFC, two nonadverse parties, had unfettered discretion to apply trust income and sale proceeds to satisfy the legal obligations of IDG and Gales Creek Terrace LLC. Of course that is precisely what the lenders did.

C. *Mr. Sage's Contentions* Mr. Sage counters that the application of the grantor trust provisions in this case requires that Sterling and CFC be considered the owners of the respective trusts, not IDG and Gales Creek Terrace LLC. He first argues that this result is required by the nature of a liquidating trust.[18] In a slightly different vein he also contends that section 1.671-2(e)(3), Income Tax Regs., should be read to mean that Sterling and CFC were owners of the respective trusts by virtue of their status as trust beneficiaries. We find neither argument persuasive.

[18] Assuming that the trusts at issue here qualify as trusts under Oregon law, we conclude that they were "liquidating trusts" within the meaning of sec. 301.7701-4(d), Proced. & Admin. Regs. The express terms of each trust instrument comported with the requirements of that regulation, the record reflects that the trusts abided by those requirements, and respondent has not meaningfully contested their treatment as such.

1. *Liquidating Trust Argument*

Mr. Sage contends that the nature of liquidating trusts compels the conclusion that Sterling and CFC were the true owners of the respective trusts beginning in 2009. Mr. Sage asserts that the creation of the liquidating trusts here implicitly involved two steps: (1) the transfer of property from IDG to Sterling or CFC and (2) the transfer of property from Sterling or CFC to the respective trust. According to Mr. Sage, the first step is tantamount to a sale, and IDG should be able to recognize a loss equaling the difference between IDG's adjusted basis in the respective piece of property and its fair market value - as unilaterally determined by Mr. Sage, apparently - on December 31, 2009.

This argument has no foundation in either the Code or the applicable regulations. As an initial matter the Code does not specifically address liquidating trusts whatsoever and thus provides no support for Mr. Sage's view.

Nor do the applicable regulations. Section 301.7701-4(d), Proced. & Admin. Regs., defines a liquidating trust as "organized for the primary purpose of liquidating and distributing the assets transferred to it," with all activities "reasonably necessary to, and consistent with, the accomplishment of that purpose." Paragraph (d) further specifies that such liquidating trusts "are treated as trusts for purposes of the Internal Revenue Code." *Id*. The regulations, like the Code, offer no hint that liquidating trusts incorporate an implicit two-step structure or that they provide a safe harbor from the normal operation of the grantor trust rules.

Mr. Sage places his hopes in IRS administrative guidance that addresses certain liquidating trust arrangements. This administrative guidance, however, does not weigh in favor of Mr. Sage's view of liquidating trusts.[19]

[19] As will be discussed, Mr. Sage relies on a Chief Counsel Advisory memorandum and certain revenue rulings. This type of memorandum is non-precedential but may provide some insight into IRS policy. See *Hulett v. Commissioner*, 150 T.C. 60, 86 n. 21 (2018), appeal filed (8th Cir. Oct. 19, 2018); *Dover Corp. & Subs. v. Commissioner*, 122 T.C. 324, 341 n.11 (2004). Revenue rulings likewise are not binding on the courts. *N. Ind. Pub. Serv. Co. v. Commissioner*, 105 T.C. 341, 350 (1995), *aff'd*, 115 F.3d 506 (7th Cir. 1997).

Mr. Sage principally relies on a 2001 Chief Counsel Advisory (CCA), 200149006, 2001 WL 1559018 (Dec. 7, 2001), which sets forth the Commissioner's views on a proposed chapter 11 bankruptcy plan. The plan proposed placing certain assets in a liquidating trust for the benefit of holders of allowed claims. See *id*. The CCA provides that "[g]enerally, liquidating trusts are taxed as grantor trusts with the creditors treated as the grantors and deemed owners" under the theory that "the debtor transferred its assets to the creditors in exchange for relief from its indebtedness to them, and that the creditors then transferred those assets to the trust for purposes of liquidation." *Id.*

In our case, however, apparently neither Sterling nor CFC was aware of the creation of the liquidating trusts before receiving the notifications sent by Mr. Winter in the late afternoon of December 31, 2009, much less agreed to relieve IDG or Gales Creek Terrace LLC from its respective indebtedness in exchange for the assets that were transferred to the liquidating trusts. The predicate underlying the CCA is simply not present, and this administrative guidance offers no insight here.

Mr. Sage next turns to a string of revenue rulings. See Rev. Rul. 72-137, 1972-1 C.B. 101; see also Rev. Rul. 80-150, 1980-1 C.B. 316; Rev. Rul. 75-379, 1975-2 C.B. 505; Rev. Rul. 63-245, 1963-2 C.B. 144. In each, a corporation had enacted a plan of complete liquidation that required distribution of all assets within 12 months. With the consent of the shareholders in each instance, certain assets not readily disposed of were placed in liquidating trusts for the shareholders' benefit. The Commissioner concluded that placing such assets in liquidating trusts complied with the requirement of divestment within 12 months because the shareholders had essentially received the assets that were transferred to the trusts.

Again, Mr. Sage's unilateral transactions in which he placed properties in trusts without any involvement from the beneficiaries does not resemble the factual situations addressed in the revenue rulings. And we see nothing in them to suggest that liquidating trusts qua liquidating trusts should be treated differently under the grantor trust rules absent the involvement of the beneficiaries.[20]

[20] Mr. Sage argues in a footnote that the lenders ratified the liquidating trust transactions by not filing suit or taking other action to overturn or void them. In support Mr. Sage relies upon an Oregon case addressing ratification of an agent's actions by a principal. *Lemley v. Lemley*, 188 P.3d 468, 473-475 (Or. Ct. App. 2008). *Lemley* plainly has no applicability here. In any event, the record before us shows that both Sterling (in the January 2010 email from a Sterling employee) and CFC (in its February 2010 demand letter) notified Mr. Sage that they did not view the liquidating trust transactions as having any practical effect.

2. *Interest Received from the Grantor of a Liquidating Trust* Mr. Sage further argues that Sterling and CFC were grantors of the trusts under section 1.671-2(e)(3), Income Tax Regs., which provides that the term "grantor" includes any person "who acquires an interest in a trust from a grantor of the trust if the interest acquired is an interest in … liquidating trusts described in § 301.7701-4(d) of this chapter". According to Mr. Sage, Sterling and CFC "acquire[d]" interests by virtue of being named beneficiaries and, therefore, are grantors.

We are unconvinced. The only example in the regulations illustrating the operation of section 1.671-2(e)(3), Income Tax Regs., refers to the acquisition of a pre-existing grantor's interest after the formation of the trust: "A makes an investment in a fixed investment trust, T, that is classified as a trust under § 301.7701-4(c)(1) of this chapter. A is a grantor of T. B subsequently acquires A's entire interest in T. Under paragraph (e)(3) of this section, B is a grantor of T with respect to such interest." Sec. 1.671-2(e)(6), Example (2), Income Tax Regs. Moreover, if Mr. Sage is right on this point, every beneficiary of a liquidating trust is automatically a grantor, with the tax repercussions that follow. If the regulations intended such a sea change, we believe that they would say so directly.[21] See *Time Ins. Co. v. Commissioner*, 86 T.C. 298, 320 (1986); *Bituminous Cas. Corp. v. Commissioner*, 57 T.C. 58, 83 (1971).

[21] We further observe that, even assuming that Mr. Sage's reading of sec. 1.671-2(e)(3), Income Tax Regs., were correct *(i.e.*, Sterling and CFC were grantors), the result in this case would not change. The grantor trust regime contemplates the possibility for multiple grantors to be treated as the owners of a single trust. See, *e.g.*, sec. 1.671-4(b)(3), Income Tax Regs. (prescribing certain reporting obligations for trustees "[i]n the case of a trust all of which is treated as owned by two or more grantors or other persons"). Mr. Sage fails to show that the banks' status as grantors has any effect on our analysis as to IDG and Gales Creek Terrace LLC.

The ultimate parent entity of a multinational enterprise group that has annual revenue for the preceding annual accounting period of at least $850 million may be required to file Form 8975, annual country-by-country reporting. A grantor trust owned by a business entity is itself considered a business entity subject to these rules.[665]

II.D.2.b. Business Entity as Donor to Charity or Other Donee

Beware that, generally, "if a taxable corporation transfers all or substantially all of its assets to one or more tax-exempt entities, the taxable corporation must recognize gain or loss immediately before the transfer as if the assets transferred were sold at their fair market values."[666] This rule also applies to "a taxable corporation's change in status to a tax-exempt entity."[667]

Subject to that caution, an S corporation that is about to sell an asset that would incur built-in gain tax should consider contributing the asset to a charitable remainder trust if the sale will not generate unrelated business taxable income (UBTI).[668]

Code § 2511(a) provides that gift tax applies "whether the transfer is in trust or otherwise, whether the gift is direct or indirect, and whether the property is real or personal, tangible or intangible." Reg. § 25.2511-1(c)(1) provides:

> The gift tax also applies to gifts indirectly made. Thus, any transaction in which an interest in property is gratuitously passed or conferred upon another, regardless of the means or device employed, constitutes a gift subject to tax. See further § 25.2512-8 relating to transfers for insufficient consideration.

Reg. § 25.2512-8 is reproduced in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts. This part II.D.2.b focuses on gifts made by the business entity that are attributed to owners, whereas part III.B.1.b focuses on transfers of business interests by the owners.

Reg. § 25.2511-1(h)(1) provides:

> A transfer of property by a corporation to B is a gift to B from the stockholders of the corporation. If B himself is a stockholder, the transfer is a gift to him from the other stockholders but only to the extent it exceeds B's own interest in such amount as a shareholder. A transfer of property by B to a corporation generally represents gifts by B to the other individual shareholders of the corporation to the extent of their proportionate interests in the corporation. However, there may be an exception to this rule, such as a transfer made by an individual to a charitable, public, political or similar organization which may constitute a gift to the organization as a single entity, depending upon the facts and circumstances in the particular case.

---

[665] Reg. § 1.6038-4(b)(2).
[666] Reg. § 1.337(d)-4(a)(1).
[667] Reg. § 1.337(d)-4(a)(2).
[668] See parts II.Q.6.d Unrelated Business Taxable Income and II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

Instructions for 2022 Form 709 (gift tax return) include:

> Only individuals are required to file gift tax returns. If a trust, estate, partnership, or corporation makes a gift, the individual beneficiaries, partners, or stockholders are considered donors and may be liable for the gift and GST taxes.
>
> If an estate, trust, partnership, corporation, or other entity (other than governmental entities and certain charitable organizations and trusts, described in sections 511(a)(2) and 511(b)(2), as discussed later) is a donee, then each person who indirectly receives the gift through the entity is treated as a donee and is assigned to a generation as explained in the above rules.

If a business entity makes a charitable contribution, we have clearly defined income tax rules, but no rule specifically addresses whether the owner(s) should report the gift on gift tax return(s):

- Reg. § 25.2512-8, referred to above, provides that "a sale, exchange, or other transfer of property made in the ordinary course of business (a transaction which is bona fide, at arm's length, and free from any donative intent), will be considered as made for an adequate and full consideration in money or money's worth," but that does not apply to a charitable contribution many with "any donative intent."

- In the adequate disclosure gift tax regulations, Reg. § 301.6501(c)-1(f)(4) provides, "Completed transfers to members of the transferor's family, as defined in section 2032A(e)(2), that are made in the ordinary course of operating a business are deemed to be adequately disclosed under paragraph (f)(2) of this section, even if the transfer is not reported on a gift tax return, provided the transfer is properly reported by all parties for income tax purposes," but it applies to transfers to members of the transferor's family, not to transfers to charity.

If an owner has no input into whether the business entity makes the contribution, I do not view that as a gift by the owner. On the other hand, if an owner controls or could readily veto the contribution, that appears to be a potentially reportable gift, absent some value being received by the business entity or owner. For income tax purposes, part II.G.4.g.i Charitable Deduction vs. Business Expense delineates between a contribution that is deductible as such and a contribution that constitutes a business expense, but most contributions are the former, so it provides little solace. I am unaware of any advisor (including me) recommending reporting charitable contributions by business entities on owners' gift tax returns (or the IRS arguing about the lack of such reporting); I might consider reporting such a gift if it is an unusual one, perhaps such as a gift to split-interest trust. But I see no guidance explaining the profession's and IRS' lack of interest in such reporting.

II.D.3. Trust as Grantor or Deemed Owner of Another Trust

When the trustee of a trust creates another trust, the original grantor is treated as the grantor of both trusts;[669] furthermore, the first trust is treated as the Code § 678 owner of the second trust if the first trust can revoke the second trust.[670] See also part II.J.9.b Trust Divisions.

When Trust 1 distributed assets to Trust 2, retaining the right to withdraw all of Trust 2's income, which right lapsed at the end of each year, Letter Ruling 201633021 held that Code § 678 would tax Trust 1 on all of Trust 2's income and capital gain. The trusts had identical terms regarding current distributions. The facts were:

> Original Trust was established by Decedent on Date 1. Decedent died on Date 3.
>
> On Date 2, Court ratified the division of Original Trust into separate trusts for the benefit of each child of Decedent, and his or her spouse and issue. Trust 1 resulted from this division.
>
> The governing document for Trust 1 (Trust 1 Agreement) authorizes Trustee, at any time, to distribute all or any portion of the net income or principal or both of Trust 1 directly to any one or more of the Beneficiaries living at the time of such distribution or to the trustees of any trust of which such Beneficiary is a beneficiary.
>
> Pursuant to the authority granted to the Trustee under the Trust 1 Agreement, the Trustee proposes to transfer funds from Trust 1 to Trust 2 which also benefits Beneficiaries. Beneficiaries' rights to distributions under the Trust 2 agreement are the same as those under the Trust 1 Agreement.
>
> The governing document of Trust 2 (Trust 2 Agreement) provides that Trust 1 retains the power, solely exercisable by Trust 1, to revest the net income of Trust 2 in Trust 1; provided, however, that such power shall lapse on the last day of such calendar year.
>
> The Trust 2 agreement provides that income includes (i) any dividends, interest, fees and other amounts characterized as income under § 643(b) of the Code, (ii) any net capital gains realized with respect to assets held less than twelve months, and (iii) any net capital gains realized with respect to assets held longer than twelve months.

Letter Ruling 201633021 held:

> Trust 1 will be treated as the owner of the portion of Trust 2 over which they have the power to withdraw under § 678(a). Accordingly, Trust 1 will take into account in

---

[669] Reg. § 1.671-2(e)(5), which is reproduced in fn 6620 in part III.B.2.h.i Who Is the Grantor. T.D. 8831 discussed this rule in a parenthetical:

> These rules do not affect the determination of whether or not the gratuitous transfer from the transferor trust is a distribution subject to sections 651 or 661.

[670] Reg. § 1.671-2(e)(6), Example (8) provides:

> G creates and funds a trust, T1, for the benefit of G's children and grandchildren. After G's death, under authority granted to the trustees in the trust instrument, the trustees of T1 transfer a portion of the assets of T1 to another trust, T2, and retain a power to revoke T2 and revest the assets of T2 in T1. Under paragraphs (e)(1) and (5) of this section, G is the grantor of T1 and T2. In addition, because the trustees of T1 have retained a power to revest the assets of T2 in T1, T1 is treated as the owner of T2 under section 678(a).

computing their tax liability those items which would be included in computing the tax liability of a current income beneficiary, including expenses allocable to which enter into the computation of distributable net income. Additionally, Trust 1 will also take into account the net capital gains of Trust 2.

It is unclear what the point was. Query whether decanting with a similar withdrawal right might allow the decanted trust to grow if, unlike this ruling, one would like to benefit one subset of beneficiaries.[671] It did not hold that Trust 1 would be treated as owning the assets of Trust 2 or that the sale of assets from Trust 1 to Trust 2 would be disregarded (although presumably the sale of assets from Trust 2 to Trust 1 would be disregarded, given that Trust 1 would be deemed own the gain on that sale).

A variation of this might be:

- Trust 1 has GST inclusion ratio of zero, and the primary beneficiary has a general power of appointment to avoid GST tax.

- Same or different grantor establishes Trust 2, a nongrantor trust for the benefit of the same beneficiaries, except that the primary beneficiary has a nongeneral power of appointment (because GST exemption was allocated to Trust 2) and Trust 1 has the power to withdraw all of Trust 2's assets.

  - Many excellent lawyers suggest relying on Letter Ruling 201633021. However, that ruling did not address sales of assets between trusts. Although gain on sales from Trust 2 to Trust 1 are taxed to Trust 1 and therefore may be protected from income taxation, I have much less confidence about sales from Trust 1 to Trust 2.

  - Ultimately, one should rely not on private letter rulings (which are unavailable in the Code § 678 area when used to protect sales) but rather on the regulations. See part III.B.2.i.vii Portion Owned When a Gift Over $5,000 is Made.

  - If splitting off the portion with respect to which the withdrawal right has lapsed is desirable, see part III.B.2.i.viii.(b) Large Gift for Multiple Beneficiaries.

- For a right to withdraw only gross income that lapses over time, see text accompanying fn 2628 in part II.J.4.f Making Trust a Partial Grantor Trust as to a Beneficiary. A right to withdraw the entire trust would be a simpler version of that.

- If Trust 2 is grandfathered from GST and the lapse of the withdrawal "is treated to any extent as a taxable transfer under chapter 11 or chapter 12," then the lapsed amount "treated as if that portion had been withdrawn and immediately retransferred to the trust at the time of the release, exercise, or lapse."[672] A similar rule applies if Trust 2 is not grandfathered.[673] Might

---

[671] See part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

[672] Reg. § 26.2601-1(b)(1)(v)(A).

[673] Reg. § 26.2652-1(a)(5), Example (5), "Effect of lapse of withdrawal right on identity of transferor," provides:

> T transfers $10,000 to a new trust providing that the trust income is to be paid to T's child, C, for C's life and, on the death of C, the trust principal is to be paid to T's grandchild, GC. The trustee has discretion to distribute principal for GC's benefit during C's lifetime. C has a right to withdraw $10,000 from the trust for a 60-day period following the transfer. Thereafter, the power lapses.

a lapse of Trust 1's withdrawal right, exercisable by its trustee, that exceeds 5% of the value of Trust 2 constitute a taxable transfer? See part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

- Because of the concerns described above, I would rather the withdrawal right be a one-time withdrawal right of Trust 2's corpus and that Trust 2 be funded by no more than $5,000. See part III.B.2.i.ii Building Up Trust. Trust 1 then might have an ongoing power to borrow from Trust 2 for adequate interest but not adequate security. See part III.B.2.h.iv Borrow Power.

The beneficiary of a nongrantor trust can, through the exercise of a power of appointment, create a charitable remainder trust for a term of years where the original trust is the noncharitable beneficiary.[674]

II.D.4. Disregarding Multiple Owner Trust for Income Tax Purposes

II.D.4.a. Investment Trusts

II.D.4.a.i. Classifying an Investment Trust

An investment trust with a single class of ownership interests, representing undivided beneficial interests in the trust's assets, will be classified as a trust if the trust agreement does not authorize varying the investment of the certificate holders.[675]

> If the investment trust has multiple classes of ownership interests, but the trust agreement does not authorize varying the investment of the certificate holders, it will be classified as a trust if the trust is formed to facilitate direct investment in the assets of the trust and the existence of multiple classes of ownership interests is incidental to that purpose.[676] However, if an investment trust with multiple classes of ownership interests is not described in the preceding sentence, ordinarily it will be classified as a business entity.[677]

C does not exercise the withdrawal right. The transfer by T is subject to Federal gift tax because a gift tax is imposed under section 2501(a) (without regard to exemptions, exclusions, deductions, and credits) and, thus, T is treated as having transferred the entire $10,000 to the trust. On the lapse of the withdrawal right, C becomes a transferor to the extent C is treated as having made a completed transfer for purposes of chapter 12. Therefore, except to the extent that the amount with respect to which the power of withdrawal lapses exceeds the greater of $5,000 or 5% of the value of the trust property, T remains the transferor of the trust property for purposes of chapter 13.

[674] Letter Ruling 9821029.

[675] Reg. § 301.7701-4(c)(1), citing *Commissioner v. North American Bond Trust*, 122 F.2d 545 (2d Cir. 1941), cert. denied, 314 U.S. 701 (1942).

[676] Reg. § 301.7701-4(c)(1).

[677] Reg. § 301.7701-4(c)(1). If the timing of payments is sufficiently similar to that found in a preferred partnership, the trust effectively creates investment interests with respect to the trust's assets that differ significantly from direct investment in the assets and therefore is classified as a business entity. See Reg. § 301.7701-4(c)(2), contrasting Example (1)(classified as business entity) with Example (2) (classified as trust). If a trust holds publicly traded stock and creates classes of ownership interest in the trust, which effectively separate dividend rights from a portion of the right to appreciation in the stock's value, so that the investors, by transferring one of the certificates and retaining the other, can fulfill their

Letter Ruling 202347001 involved the following facts:

> Taxpayer structures a variety of mortgage-backed securities offerings pursuant to multi-class mortgage-backed securities programs maintained by Agencies. In each case, qualified mortgages[1] are conveyed to a trust (referred to herein as a "REMIC Trust" or a "Grantor Trust," each defined below) pursuant to the terms of a trust agreement in exchange for several classes of mortgage-backed pass-through certificates (each such certificate (other than the residual class) is referred to herein as a "Certificate").
>
> > [1] For purposes of this letter, the term "qualified mortgages" includes certain pass-through certificates issued by single-class pass-through trusts that are classified as trusts for federal income tax purposes as well as REMIC regular interests or grantor trust certificates indirectly representing REMIC regular interests. *See* §§ 860G(a)(3); 1.860G-2(a)(5).
>
> For REMIC Trusts, each trust agreement requires that one or more Real Estate Mortgage Investment Conduit ("REMIC") elections be made with respect to the assets of the trust. With respect to each REMIC, one class of certificates is designated as the sole class of residual interest in the REMIC that is not entitled to distributions from the sole REMIC (or top-level REMIC in the case of a structure with tiers of REMICs). All other classes of certificates in each REMIC, referred to herein as "REMIC Certificates," are designated as classes of regular interests of the sole REMIC.[2]
>
> > [2] Each REMIC Certificate (other than a principal-only class) will bear interest at a fixed rate or floating rate permitted by § 1.860G-1(a)(3) or consist of a specified portion of the interest payments on qualified mortgages as described in § 1.860G-1(a)(2).
>
> For Grantor Trust transactions, qualified mortgages are conveyed to a trust that is or includes a grantor trust. These grantor trusts issue "Grantor Trust Certificates" representing discrete entitlements to income and principal.[3]
>
> > [3] Each Grantor Trust Certificate (other than a principal-only class) will bear interest at a fixed rate or floating rate or will consist of a specified portion (within the meaning of § 1.860G-1(a)(2)) of the interest payments on grantor trust certificates backed by qualified mortgages.
>
> Taxpayer offers Certificates for sale to its customers pursuant to the terms of an offering document. In many Agency transactions, the owner of a Certificate has the right to deposit the Certificate in a supplemental trust (an "Exchange Trust") in exchange for a proportionate interest in newly issued classes of pass-through certificates issued by the Exchange Trust (the "Exchange Certificates") in accordance with the Exchange Mechanism discussed below. Taxpayer intends to contribute all or a portion of a single class of Certificates to an Exchange Trust in exchange for Exchange Certificates.

---

varying investment objectives of seeking primarily either dividend income or capital appreciation from the trust's stock, the trust is classified as a business entity. Reg. § 301.7701-4(c)(2), Example (3). However, this prohibition against stripping dividends does not extend to bonds, because Code § 1286 already allows investors to strip bonds without using an investment trust. Reg. § 301.7701-4(c)(2), Example (4).

The Exchange Trust

The sole assets of an Exchange Trust will be all the Certificates contributed by Taxpayer. Subsequent contributions of Certificates to the Exchange Trust must be of the same class that the Exchange Trust already holds.

All distributions made with respect to Certificates held by the Exchange Trust are immediately distributed in respect of the Exchange Certificates. The aggregate principal and interest entitlements on the Exchange Certificates received will equal the aggregate principal and interest entitlements on the Certificates deposited in the Exchange Trust.

The sole activities of an Exchange Trust will consist of accepting deposits of Certificates, issuing Exchange Certificates, and distributing principal and interest received in respect of the Certificates held by the Exchange Trust to the holders of the Exchange Certificates issued by the Exchange Trust. An Exchange Trust will not have the power to reinvest amounts collected on the Certificates held by the Exchange Trust. Taxpayer represents that an Exchange Trust will not be a taxable mortgage pool and will not be an obligor of debt instruments with two or more maturities within the meaning of §§ 7701(i)(2)(A)(ii) and 301.7701(i)-1(e).

The Exchange Certificates

The Exchange Certificates each represent the right to receive a portion of the interest and principal distributions on the underlying Certificates; each class of Exchange Certificate typically has rights to distributions of principal and/or interest on the underlying Certificates that differ from those of any other class of Exchange Certificates issued in respect of the Certificates. In each case, however, the aggregate distributions of principal and interest on the various classes of Exchange Certificates outstanding on any distribution date will always equal the distributions of principal and interest on the underlying Certificates for the distribution date. Further, the aggregate principal amount of any issued Exchange Certificates will always equal the principal amount of the underlying Certificates.

The Exchange Certificates will represent collectively a 100 percent beneficial ownership interest in the Exchange Trust and will be entitled to 100 percent of all amounts distributed in respect of the Certificates held by the Exchange Trust. They will be issued in multiple classes that will be separately assignable.

Exchange Certificates may provide for principal and interest, principal-only, or interest-only entitlements. Moreover, the Exchange Certificates' interest distributions may be based on fixed rates, floating rates, or inverse floating rates. For interest-only Exchange Certificates, there will be no right to receive principal, but interest payments will be based upon a notional principal amount. Each Exchange Certificate within a class will be entitled to a pro rata portion of payments allocated to the class. All Exchange Certificates (other than principal-only classes) will provide for interest distributions based on a fixed rate, a floating rate described in § 1.860G-1(a)(3), or a specified portion4 of the interest payments on the Certificates under § 1.860G-1(a)(2) as if the Exchange Trust were a REMIC. There exists in place a mechanism for accounting for the Exchange Certificates as separate bonds.

Exchange Certificates issued by an Exchange Trust will have the same maturity as the underlying Certificates exchanged for them. Each class of Exchange Certificates having a principal amount will receive on each distribution date a pro-rata portion of the principal distributions on the underlying Certificates based on the related principal amounts of each such class of Exchange Certificates immediately before the distribution (*i.e.*, no Exchange Certificates will be issued in a fast-pay/slow-pay structure or with any time-tranching).

The Exchange Mechanism

The Exchange Mechanism will operate in the following manner. Certificates may be deposited in exchange for Exchange Certificates on the issue date of the Certificates or any time thereafter and may occur repeatedly. Exchange Certificates may also be deposited into an Exchange Trust at any time in exchange for a proportionate interest in the underlying Certificates or for different classes of Exchange Certificates, provided the owner holds the necessary Exchange Certificates in the correct proportion to permit the exchange.

Each exchange, including the initial deposit of the Certificates (or portion thereof) in exchange for the Exchange Certificates, will be for matching amounts, in that: (1) the aggregate principal and interest entitlements on the Exchange Certificates received will equal the aggregate principal and interest entitlements on the Certificates or Exchange Certificates deposited in the Exchange Trust and (2) the Exchange Certificates or Certificates received from the Exchange Trust will retain the same tax attributes as the Certificates or Exchange Certificates deposited in the Exchange Trust. A certificate owner will be charged a fee for each exchange, generally based on a percentage of the principal amount of the certificates exchanged.

Although an Exchange Trust can accept additional deposits of Certificates over time, the subsequent deposits of Certificates must be the same class of Certificates as is already held by the Exchange Trust. Taxpayer represents that the exchanges will not be taxable events under § 1001 and that they involve no change in economic interests in underlying assets. Taxpayer further represents that the exchanges will not cause exchanging Certificate holders or non-exchanging Certificate holders to be entitled to a differing stream of aggregate payments from differing obligors. Additionally, Taxpayer represents that the exchanges will have no effect on the rights to principal or interest of any Certificate or Exchange Certificate holder not participating in the exchange.

Letter Ruling 202347001 included the following among its description of the law:

…. Rev. Ruls. 84-10, 1984-1 C.B. 155; 77-349, 1977-2 C.B. 20; and 74-169, 1974-1 C.B. 147, provide that the holders of a single class of certificates in a mortgage pass-through trust are treated as holding undivided interests in the pool of mortgages held by the trust….

Section 301.7701-4(c)(2), Example 4, applies this rule to a trust that holds bonds and issues certificates evidencing interests in the bonds. Example 4 provides:

> Corporation N purchases a portfolio of bonds and transfers the bonds to a bank under a trust agreement. At the same time, the trustee delivers to N certificates evidencing interests in the bonds. These certificates are sold to public investors.

> Each certificate represents the right to receive a particular payment with respect to a specific bond. Under section 1286, stripped coupons and stripped bonds are treated as separate bonds for federal income tax purposes. Although the interest of each certificate holder is different from that of each other certificate holder, and the trust thus has multiple classes of ownership, the multiple classes simply provide each certificate holder with a direct interest in what is treated under section 1286 as a separate bond. Given the similarity of the interests acquired by the certificate holders to the interests that could be acquired by direct investment, the multiple classes of trust interests merely facilitate direct investment in the assets held by the trust. Accordingly, the trust is classified as a trust.

A power to contribute assets to a trust that are identical to existing assets in exchange for new certificates identical to those already outstanding is not a power to vary because it does not change the economic position of existing certificate holders. *Comm'r v. Chase Nat'l Bank*, 122 F.2d 540 (2d Cir. 1941) (an investment trust holding stocks was not an association where the depositor could make up additional units of the same number and type of stock as originally deposited).

Rev. Rul. 90-7, 1990-1 C.B. 153, provides that the redemption of pass-through certificates issued by a fixed investment trust for a pro rata share of trust assets is not a realization event for the certificate holder who goes from being a co-owner of all of the trust's assets to a sole owner of a proportionate share of the trust's assets because the redemption effects no material change in his position.

Letter Ruling 202347001 ruled:

(1) The Exchange Certificates to be issued by the Exchange Trust will qualify as interests in stripped coupons or stripped bonds within the meaning of § 1286 (assuming that all Exchange Certificates issued by an Exchange Trust are not held by one person); and

(2) The Exchange Trust's Exchange Mechanism, including the ability to exchange fixed rate REMIC Certificates or Grantor Trust Certificates for floating rate and inverse floating rate Exchange Certificates, will not cause the Exchange Trust to fail to be classified as a fixed investment trust under § 301.7701-4(c).

A power to sell trust assets does not constitute a power to vary the investment.[678]

[678] Rev. Rul. 78-149 (holding that the authority to reinvest sale proceeds, rather than the authority to sell, causes a trust to be taxable as a business entity). Letter Ruling 201226019 held that a voting trust to hold stock in an S corporation qualified as an investment trust; the trust could sell stock in limited circumstances, although the ruling did not address the issue of the ability vary investments and did not cite Rev. Rul. 78-149, perhaps because the trust would terminate in that event. For additional guidance, see Rev. Ruls. 2004-86, 89-124 (OK to deposit additional assets and issue units within 90 days after trust's formation if the contributed assets are substantially the same as the assets originally contributed), 86-92, and 75-192. A voting trust may participate in a Code § 1036 exchange of stock. Letter Ruling 200618004.

A trust does not qualify as an investment trust when it holds a partnership interest to enable information to be provided to investors under the Reg. § 1.671-5 widely held fixed investment trusts rather than have the LLC partnership issue Schedule K-1s to investors.[679]

For more information, see Gray, "Investment Trusts, the Power to Vary, and Holding Partnership Interests," *Journal of Taxation* (WG&L), May 2016.[680]

For powers ordinarily withheld from the trustee of an investment trust that may be exercised in the COVID-19 pandemic, see Rev. Proc. 2020-34, described in part II.D.1 Trust as a Business Entity.

A land trust is more of an agency relationship than the buy-and-hold-or-sell-but-not-reinvest philosophy of an investment trust.[681]

II.D.4.a.ii. Tax Treatment of Investment Trusts

The beneficial owner is treated as a grantor under the grantor trust rules.[682] A person acquiring a beneficial owner's entire interest in a fixed investment trust becomes a grantor with respect to that interest.[683]

A beneficial owner of an investment trust does not realize gain or loss upon exchanging the certificates for a proportionate share of each of the trust's assets, other than cash.[684]

On the other hand, when a deemed owner sells its beneficial interest, the seller should be deemed to sell a proportionate share of each of the trust's assets to the buyer.[685]

II.D.4.a.iii. Practical Applications of Investment Trusts

Voting trusts are equivalent to investment trusts and expressly qualify to hold stock in an S corporation.[686]

Consider a formula gift or sale of real estate. The formula gift would be made public through the recorder of deeds, causing loss of privacy and messy detail that would create uncertainty in dealing with lenders and future buyers. Instead, the donor transfers the real estate to a unit investment trust, a simple event in the chain of title. Then the donor makes a formula transfer of the investment certificates.

684 Rev. Rul. 90-7, which was reaffirmed in Letter Ruling 202347001 in part II.D.4.a.i Classifying an Investment Trust.

685 See TAM 200814026, reproduced in part in fn. 6528 in part III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation. TAM 200814026 did not deal with unit investment trusts, but its reasoning should apply.

686 See part III.A.3.b.iv A Trust Created Primarily to Exercise the Voting Power of Stock Transferred to It.

Sometimes partners (including LLC members treated as partners) disagree on whether to reinvest the proceeds from the sale of real estate. However, the partners are not direct owners of the property, so they cannot separately choose to have a tax-deferred like-kind exchange[687] inside the partnership. Instead, the partnership needs to distribute the property to the partners who want to achieve tax-deferral, and the distributees need to establish an investment purpose, which might be challenging in that they very recently obtained the property and intend to sell it rather than hold it. If all of the daily financial arrangements have been decided, such as through a long-term triple-net lease in which the owner does not maintain the property itself, consider using an investment trust hold the real estate and provide limited liability. That allows the real estate to be securitized and the beneficial owners to obtain like-kind exchange treatment on the transfer of the trust's underlying assets.[688] Such an arrangement may face challenges qualifying for the Code § 199A deduction for qualified business income.[689]

II.D.4.b. Liquidating Trusts

An organization will be considered a liquidating trust if both:[690]

- It is organized for the primary purpose of liquidating and distributing the assets transferred to it, and

- Its activities are all reasonably necessary to, and consistent with, the accomplishment of that purpose.

A liquidating trust is treated as a trust because it is formed with the objective of liquidating particular assets and not for the purpose the carrying on of a profit-making business which normally would be conducted through business organizations classified as corporations or partnerships.[691] However, if the liquidation is unreasonably prolonged or if business activities eventually become the trust's main focus, the trust will no longer be treated as a liquidating trust.[692] Arrangements to protect the interests of security holders during insolvency, bankruptcy, or corporate reorganization proceedings can begin as liquidating trusts but lose that status if later used to further the control or profitable operation of a going business on a permanent continuing basis.[693] Letter Ruling 201940004 approved continuing status as a liquidating trust when the Bankruptcy Court extended the term of a bankruptcy trust with an initial term of three years, approving extensions of two, three, and finally another three years, based on the trust's representation that, "due to continuing events outside the control of the trustee of Trust, it is not possible to completely liquidate" the trust, so that the final three-year extension was granted.

The IRS will rule on whether a liquidating trust is treated as such.[694]

[687] Code § 1031.
[688] Rev. Rul. 2004-86, which is quoted extensively in part II.D.1 Trust as a Business Entity.
[689] See part II.E.1.e.i.(a) Whether Real Estate Activity Constitutes A Trade Or Business.

[691] Reg. § 301.7701-4(d).
[692] Reg. § 301.7701-4(d).
[693] Reg. § 301.7701-4(d).
[694] Rev. Proc. 82-58 which specifies the conditions that must be present before the IRS will consider issuing advance rulings whether a liquidating trust is treated as such or as a business entity under Reg. § 301.7701-4, and Rev. Proc. 91-15 provides a checklist that must accompany all such requests. Rev. Rul. 72-137 discusses the treatment of liquidating trusts as grantor trusts. For grantor trusts

A case involving liquidating trusts is in the text accompanying fn 664 in part II.D.2 Business Entity as Grantor of Tru.

II.D.4.c. Environmental Remediation Trusts

An environmental remediation trust receives a special classification as a trust if all of the following apply:[695]

- It is organized under state law as a trust; the primary purpose of the trust is collecting and disbursing amounts for environmental remediation of an existing waste site to resolve, satisfy, mitigate, address, or prevent the liability or potential liability of persons imposed by federal, state, or local environmental laws;[696]

- All contributors to the trust have (at the time of contribution and thereafter) actual or potential liability or a reasonable expectation of liability under federal, state, or local environmental laws for environmental remediation of the waste site; and

- The trust is not a qualified settlement fund.[697]

This classification is because its primary purpose is environmental remediation[698] of an existing waste site and not the carrying on of a profit-making business that normally would be conducted through business organizations classified as corporations or partnerships.[699]

If the remedial purpose is altered or business or investment activities dominate such that the declared remedial purpose is no longer controlling, the organization will no longer be classified as a trust.[700]

Each contributor to the trust is treated as the owner of the portion of the trust contributed by that person under the grantor trust rules, including treatment of that person as the owner of a portion of a trust applied in discharge of the grantor's legal obligation.[701] The trust needs to file a Form 1041 with a grantor information statement that includes certain specified items.[702]

---

generally, see part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

[695] Reg. § 301.7701-4(e)(1).

[696] For purpose of this test, persons have potential liability or a reasonable expectation of liability under federal, state, or local environmental laws for remediation of the existing waste site if there is authority under a federal, state, or local law that requires or could reasonably be expected to require such persons to satisfy all or a portion of the costs of the environmental remediation.

[697] As defined in Reg. § 1.468B-1(a).

[698] For purpose of this test, "environmental remediation" includes the costs of assessing environmental conditions, remedying and removing environmental contamination, monitoring remedial activities and the release of substances, preventing future releases of substances, and collecting amounts from persons liable or potentially liable for the costs of these activities. Reg. § 301.7701-4(e)(1).

[699] Reg. § 301.7701-4(e)(1).

[700] Reg. § 301.7701-4(e)(1).

[701] Reg. § 301.7701-4(e)(2), referring to Code § 677 and Reg. § 1.677(a)-1(d). See also fn 4663 in part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust, discussing contributions of property subject to debt.

[702] Reg. § 301.7701-4(e)(2).

II.D.5. Severing Trusts with Multiple Grantors

If a multiple grantor trust is not a business trust under part II.D.1 Trust as a Business Entity and is not described in part II.D.4 Disregarding Multiple Owner Trust for Income Tax Purposes, generally one will need to separate it at some point.

First, note that, for fiduciary income tax purposes, to the extent such person directly or indirectly makes a gratuitous transfer of property to a trust, that person is considered the grantor.[703]

If more than one person transfers property to a trust, the portions of the trust attributable to the different transferors are treated as separate trusts for GST purposes.[704] The GST rules recognize the severance of such trusts.[705]

Severing a trust does not trigger gain or loss if an applicable state statute or the governing instrument authorizes or directs the trustee to sever the trust and any non-pro rata funding of the separate trusts resulting from the severance, whether mandatory or in the trustee's discretion, is authorized by an applicable state statute or the governing instrument.[706] See also part II.J.8.d.i Distribution in Kind - Generally regarding non-pro rata distributions.

II.D.6. Land Trusts

An interest in an Illinois land trust constitutes real property that may qualify for a nontaxable like-kind exchange[707] for other real property, so long as the arrangement involving the land trust is not treated as a business entity.[708] The following arrangement qualified for this treatment:

- The grantor created an Illinois land trust, under which he was the beneficiary. The trust's purpose was to hold title to Illinois real property that the grantor had held for investment purposes. The beneficiary's interest in the trust was characterized as personal property under state law.

- The beneficiary or any person designated by the beneficiary has the exclusive power to direct or control the trustee in dealing with the title to the property in the land trust.

---

[703] Reg. § 1.671-2(e)(1) provides (emphasis added):

> For purposes of part I of subchapter J, chapter 1 of the Internal Revenue Code, a grantor includes any person to the extent such person either creates a trust, or directly or indirectly makes a gratuitous transfer (within the meaning of paragraph (e)(2) of this section) of property to a trust.

[704] Reg. § 26.2654-1(a)(2), "Multiple transferors with respect to single trust," is reproduced in part III.B.1.d.iii Who Is the Transferor.

[705] Reg. § 26.2654-1(a)(3), "Severance of a single trust," provides:

> A single trust treated as separate trusts under paragraphs (a)(1) or (2) of this section may be divided at any time into separate trusts to reflect that treatment. For this purpose, the rules of paragraph (b)(1)(ii)(C) of this section apply with respect to the severance and funding of the severed trusts.

For more discussion on the desirability of such a division, see the text accompanying and preceding fn 6403 in part III.B.1.d.iii Who Is the Transferor.

[706] Reg. § 1.1001-1(h).

[707] Code § 1031.

[708] Rev. Rul. 92-105.

- The beneficiary has the exclusive control of the management of the property and the exclusive right to the earnings and proceeds from the property.

- Any person dealing with the trustee would take any interest in the trust's property free and clear of the claims of the grantor/beneficiary.

- The trust paid the trustee an annual fee, and the trust agreement authorized the trustee to execute deeds, mortgages, or otherwise deal with the legal title of the property at the beneficiary's direction.

- The beneficiary retained the exclusive control of the management, operation, renting, and selling of the land, together with the exclusive right to the earnings and proceeds from the land. The beneficiary was required to file all tax returns, pay all taxes, and satisfy any other liabilities with respect to the land.

- The beneficiary also retained the right to assign his interest in the Illinois land trust.

- The trust agreement precluded the trustee from disclosing the beneficiary's identity unless directed to do so by the beneficiary in writing.

Although the ruling applies to Illinois land trusts, it recognized that other states' common law and statutes permitted similar arrangements, which would receive the same treatment if:[709]

- The trustee has title to real property;

- The beneficiary (or a designee of the beneficiary) has the exclusive right to direct or control the trustee in dealing with the title to the property; and

- The beneficiary has the exclusive control of the management of the property, the exclusive right to the earnings and proceeds from the property, and the obligation to pay any taxes and liabilities relating to the property.

Similarly, a *fideicomiso* or Mexican Land Trust arrangement ("MLT"), is disregarded as a trust, and the beneficiary is treated as the owner, for U.S. income tax purposes.[710] Because the Mexican Federal Constitution prohibits non-Mexican persons from directly holding title to

---

[709] Rev Rul. 92-105. The ruling mentioned that other states, such as California, Florida, Hawaii, Indiana, North Dakota, and Virginia, then had statutorily or judicially sanction arrangements that are similar to the Illinois land trust arrangement described in the ruling.

[710] Rev. Rul. 2013-14. Shortly after the ruling was issued, the AICPA applauded the ruling, stating at http://www.aicpa.org/Advocacy/Tax/TrustEstateGift/DownloadableDocuments/Trust%20Advocacy%20Documents/aicpa_comments_on_Rev_Rul_2013-14_submitted.pdf:

> The holding in the revenue ruling means that many U.S. taxpayers finally have certainty on the U.S. tax treatment of such common MLTs, and will no longer need to incur the expense and burden associated with preparing and filing the Form 3520 and Form 3520-A foreign trust reporting forms on a protective basis.

However, the AICPA noted certain limitations:

> We realize that the ruling does not apply if the MLT owns any other property or is permitted or required to engage in any activity beyond holding legal title to the Mexican real property. Therefore, we will continue to review trust agreements to evaluate these points.

The AICPA's resource page on Foreign Trust Documents is at http://www.aicpa.org/Advocacy/Tax/TrustEstateGift/Pages/ForeignTrustAdvocacyDocuments.aspx.

residential real property in certain areas of Mexico, they hold such property through an MLT with a Mexican bank after obtaining a permit from the Mexican government.[711] The MLT qualifying for this treatment had the following characteristics:

- The beneficiary has the right to sell without permission from the trustee.

- The trustee must grant a security interest in the property to a third party, such as a mortgage lender, if the beneficiary so requests.

- The beneficiary is directly responsible for the payment of all liabilities relating to the property, including pay any Mexican real estate taxes directly to the Mexican taxing authority.

- The beneficiary has the exclusive right to possess the property and to make any desired modifications, limited only by the need to obtain the proper licenses and permits in Mexico. If the property is occasionally leased, the beneficiary directly receives the rental income and reports the income on the beneficiary's U.S. federal income tax return.

- The trustee disclaims all responsibility for the property, including obtaining clear title and defending or maintaining the property.

- The trustee collects a nominal annual fee from the beneficiary.

- No other agreement or arrangement is in place between one or more of the beneficiary, trustee, or any third party that would cause the overall relationship to be classified as a partnership (or any other type of entity) for U.S. federal income tax purposes.

If qualification as a land trust is in doubt, consider a unit investment trust.[712]

II.D.7. Sham Trusts

The Tax Court looks to the following factors to determine whether a trust has economic substance:[713]

(1) whether the taxpayer's relationship to the transferred property differed materially before and after the trust's creation;

(2) whether the trust had an independent trustee;

(3) whether an economic interest passed to other trust beneficiaries; and

(4) whether the taxpayer respected restrictions imposed on the trust's operation as set forth in the trust documents or by the law of trusts.

---

[711] Rev. Rul. 2013-14. I have been told that Mexico has a capital gain tax and that it has a real estate transfer tax of up to 4.5%, so one needs to be careful to structure ownership correctly from inception.
[712] See part II.D.4.a Investment Trust.
[713] *Close v. Commissioner*, T.C. Memo. 2014-25, citing *Markosian v. Commissioner*, 73 T.C. 1235, 1243-1244 (1980).

II.E. Recommended Structure for Entities

II.E.1. Comparing Taxes on Annual Operations of C Corporations and Pass-Through Entities

Below is a comparison of annual federal and state income tax burdens when the owners are in the highest or in a modest tax bracket, based on calculations shown in Parts II.E.1.a Taxes Imposed on C Corporations and II.E.1.b Taxes Imposed on S Corporations, Partnerships, and Sole Proprietorships. The assumptions made in putting together the chart can be criticized, but hopefully reviewing them helps one understand the post-2017 paradigm.

Moderate State Income Tax	Individual in Top Bracket	Individual in Modest Bracket
Distributing 100% of Corporate Net Income After Income Tax	47.3%	40.8%
Distributing 50% of Corporate Net Income After Income Tax	36.7%	33.4%
Distributing None of Corporate Net Income After Income Tax	26.0%	26.0%
S Corporation, Partnership, or Sole Proprietorship (Pass-Through)	34.6%-45.8%	27.4%-46.2%

<u>Note, however, that distributing less than 100% of corporate net income after tax does not reflect the true tax cost, because additional tax will often be incurred when extracting the earnings later through a dividend or sale.</u> For a discussion of the extent to which that is true and how choice of entity affects exit strategies, see part II.E.2.a Transferring the Business.

Also consider that the excess of pass-through income tax rates over corporate rates is at an all-time high.

A partnership or S corporation that does business in many states incurs extra state compliance obligations, because states often require withholding on nonresident owners, require all owners to file in all of those states, or require both. Also note that individuals or trusts owning pass-through businesses will be able to deduct little or no of the state income tax on their business income, whereas C corporations are not subject to such limitations.[714]

For a start-up entity, consider that most businesses lose money initially, and some never get into the black. An LLC taxed as a sole proprietorship or partnership is a much better vehicle for

[714] See text accompanying fn 20 in part II.A.1.b C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment.

deducting losses[715] than is an S corporation[716] or C corporation.[717] If one is enamored with corporate income taxation, one might start as an LLC and then contribute the LLC to a corporation when one becomes sufficiently profitable to save taxes.[718] The disadvantage of such an approach occurs when the owner is in a low tax bracket, so that losses provide little, if any, benefit; in that case, having the C corporation carry forward its losses to offset them against income that would otherwise have been taxed at a higher rate – and relying on Code § 1244 for ordinary loss treatment if the business is unsuccessful[719] – might be of greater benefit.

Incentive pay and deferred compensation can be more difficult in a corporate setting than in a partnership setting.[720] However, C corporations provide better fringe benefits.[721]

II.E.1.a. Taxes Imposed on C Corporations

For taxable years beginning after December 31, 2017, all C corporations pay tax at a flat 21% rate, unless some industry-specific exclusions, such as those for insurance companies, apply.[722] However, if a C corporation receives a dividend from another corporation, only part of that dividend is taxed,[723] reducing the effective tax rate to 10.5% for dividends from unrelated companies or zero or 7.35% for dividends from affiliates.

Below includes discussion of Biden's 2020 plan to increase rates, which never came to fruition and if unlikely to unless the Democrats get a solid majority in the House and Senate. However, he did succeed in imposing a 15% corporate alternative minimum tax under Code § 55 on billion-dollar C corporations, which is explained to some extent by Notice 2023-7.

---

[715] See part II.G.4 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner, especially part II.G.4.e Basis Limitations for Partners in a Partnership.
[716] See part II.A.2 S Corporation.
[717] See parts II.G.4.b C Corporations: Losses Incurred by Business, Owner, or Employee and II.G.4.f Comparing C Corporation Loss Limitations to Those for Partnership and S Corporation Losses.
[718] Although one could just "check the box" by filing Form 8832 or 2553, as the case may be, contributing an interest in the LLC sets one up for an ideal entity structure and avoids possible (remote) self-employment tax issues. See parts II.E Recommended Structure for Entities and II.L.5.b Self-Employment Tax Caution Regarding Unincorporated Business That Makes S Election, respectively. For entity conversion issues, see part II.P.3 Conversions.
[719] See parts II.Q.7.l Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244 and II.J.11.b Code § 1244 Treatment Not Available for Trusts.
[720] See parts II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules and II.M.4.f.i Overview of Profits Interest; Contrast with Code § 409A.
[721] See part II.P.2 C Corporation Advantage Regarding Fringe Benefits.
[722] Code § 11(a), (b). Code § 11(c) provides that corporate income tax does not apply to a corporation subject to a tax imposed by:

(1) section 594 (relating to mutual savings banks conducting life insurance business),
(2) subchapter L (sec. 801 and following, relating to insurance companies), or
(3) subchapter M (sec. 851 and following, relating to regulated investment companies and real estate investment trusts).

Code § 11(d), "Foreign corporations," provides:

> In the case of a foreign corporation, the tax imposed by subsection (a) shall apply only as provided by section 882.

[723] See fns. 9-13 in part II.A.1.a C Corporations Generally.

Biden would raise the top corporate income tax rate to 28% and increase the top income tax rate on dividends to 39.6% (before 3.8% net investment income tax).

In addition to taxes on annual operations, consider:

- Dividends to shareholders, which are distributions out of a corporation's current or accumulated earnings and profits, are subject to regular tax at capital gain rates[724] (if qualified dividends)[725] and the 3.8% tax on net investment income.[726] However, Biden proposed that high-income taxpayers' long-term capital gains would be taxed at 39.6% instead of 20%.

- A corporation that does not pay dividends may become subject to the 20% accumulated earnings tax or personal holding company income tax. See part II.E.1.a.iii Incentives to Declare Dividends.

---

724 Code §§ 1(h)(3), 1(h)(11)(A).

725 Code § 1(h)(11)(B) provides the following parameters for "qualified dividend income":

(i) *In general*. The term "qualified dividend income" means dividends received during the taxable year from-
  (I) domestic corporations, and
  (II) qualified foreign corporations.

(ii) *Certain dividends excluded*. Such term shall not include-
  (I) any dividend from a corporation which for the taxable year of the corporation in which the distribution is made, or the preceding taxable year, is a corporation exempt from tax under section 501 or 521,
  (II) any amount allowed as a deduction under section 591 (relating to deduction for dividends paid by mutual savings banks, etc.), and
  (III) any dividend described in section 404(k).

(iii) *Coordination with section 246(c)*. Such term shall not include any dividend on any share of stock-
  (I) with respect to which the holding period requirements of section 246(c) are not met (determined by substituting in section 246(c) "60 days" for "45 days" each place it appears and by substituting "121-day period" for "91-day period"), or
  (II) to the extent that the taxpayer is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property.

Elaborating on Code § 1(h)(11)(B)(i)(II), Code § 1(h)(11)(C) provides rules for qualified foreign corporations.

Code § 1(h)(11)(D) provides special rules:

(i) *Amounts taken into account as investment income*. Qualified dividend income shall not include any amount which the taxpayer takes into account as investment income under section 163(d)(4)(B). [My note: This relates to income against which investment interest may be deducted. See part II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense, which mentions in passing investment interest expense.]

(ii) *Extraordinary dividends*. If a taxpayer to whom this section applies receives, with respect to any share of stock, qualified dividend income from 1 or more dividends which are extraordinary dividends (within the meaning of section 1059(c)), any loss on the sale or exchange of such share shall, to the extent of such dividends, be treated as long-term capital loss.

(iii) *Treatment of dividends from regulated investment companies and real estate investment trusts*. A dividend received from a regulated investment company or a real estate investment trust shall be subject to the limitations prescribed in sections 854 and 857.

726 See part II.I 3.8% Tax on Excess Net Investment Income (NII).

- A corporation that distributes property to its shareholders generally is subject to tax on the excess of value over basis (but cannot deduct a loss). See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

II.E.1.a.i. Corporate Tax Rates in Moderate Tax States

Let's examine the effects of earning $100,000 taxable income inside the corporation and distributing various proportions of the net after-tax profits, assuming the taxpayer lives in a state that imposes moderate (5%) income tax on corporations and individuals. The individual in a top bracket is assumed taxed at a rate of 48.4%, consisting of 39.6% capital gain tax, 3.8% net investment income tax, and 5% state income tax. The individual in a modest bracket is assumed taxed at a rate of 20%, consisting of 15% capital gain tax, no net investment income tax, and 5% state income tax.

Distributing 100% of Corporate Net Income After Income Tax	Individual in Top Bracket	Individual in Modest Bracket
Corporate Taxable Income	$100,000	$100,000
Federal and State Income Tax	-26,000	-26,000
Net Income after Income Tax	$74,000	$74,000
Income Taxes at 28.8% or 20%	-21,312	-14,800
Net Cash to Owner	$52,688	$59,200

Note that the tax rates above seem somewhat high – 47.3% or 40.8%, depending on whether the shareholder is in a high or modest bracket. The corporation might try paying more compensation to avoid double taxation, but compensation income is taxed at ordinary income rates, and the employer's and employee's share of FICA combines to add tax equal to 2.5%-13.3%.[727] So, add that tax to the employee's federal, state, and local income tax rate and compare to the above. Consider, however, that a corporation cannot deduct more than reasonable compensation - see part II.A.1.b C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment – and in 2017 the IRS has instructed its examiners how to prevent taxpayers from contesting the issue in Tax Court.[728]

[727] The tax hit is 2.9%-15.3%, as described in part II.E.1.b Taxes Imposed on S Corporations, Partnerships, and Sole Proprietorships, text accompanying fn 732-734. However, the employer's deduction for half of this amount at an assumed 26% rate lowers the effective rate to 2.5%-13.3%.
[728] See fns. 85-87 in part II.A.2.c Avoiding Double Taxation and Self-Employment Tax.

Here is the same chart under Biden, with federal corporate tax rate increased from 21% to 28% and the top federal income tax rate on dividends increased from 20% to 39.6%:

Biden Plan		
Distributing 100% of Corporate Net Income After Income Tax	Individual in Top Bracket	Individual in Modest Bracket
Corporate Taxable Income	$100,000	$100,000
Federal and State Income Tax	-33,000	-33,000
Net Income after Income Tax	$67,000	$67,000
Income Taxes at 48.4% or 20%	-32,428	-13,400
Net Cash to Owner	$34,572	$53,600

Returning to current law:

Distributing 50% of Corporate Net Income After Income Tax	Individual in Top Bracket	Individual in Modest Bracket
Corporate Taxable Income	$100,000	$100,000
Federal and State Income Tax	-26,000	-26,000
Net Income after Income Tax	$74,000	$74,000
Distribution to Owner	$37,000	$37,000
Income Taxes at 28.8% or 20%	-10,656	-7,400
Net Cash to Owner	$26,344	$29,600
Corporate Cash Plus Shareholder Cash	$63,344	$66,600

Here is the same chart under Biden, with federal corporate tax rate increased from 21% to 28% and the top federal income tax rate on dividends increased from 20% to 39.6%:

Biden Plan		
Distributing 50% of Corporate Net Income After Income Tax	Individual in Top Bracket	Individual in Modest Bracket
Corporate Taxable Income	$100,000	$100,000
Federal and State Income Tax	-33,000	-33,000
Net Income after Income Tax	$67,000	$67,000
Distribution to Owner	$33,500	$33,500
Income Taxes at 48.4% or 20%	-16,214	-6,700
Net Cash to Owner	$17,286	$26,800
Corporate Cash Plus Shareholder Cash	$50,786	$60,300

Returning to current law:

Distributing None of Corporate Net Income After Income Tax	
Corporate Taxable Income	$100,000
Federal and State Income Tax	-26,000
Net Income after Income Tax	$74,000

Here is the same chart under Biden, with federal corporate tax rate increased from 21% to 28%:

Biden Plan	
Distributing None of Corporate Net Income After Income Tax	
Corporate Taxable Income	$100,000
Federal and State Income Tax	-33,000
Net Income after Income Tax	$67,000

II.E.1.a.ii. Corporate Tax Rates in California

Let's examine the effects of earning $100,000 taxable income inside the corporation and distributing various proportions of the net after-tax profits, assuming the taxpayer lives in California, which imposed an 8.84% corporate tax rate. The individual in a top bracket is assumed taxed at a rate of 37.1%, consisting of 20% capital gain tax, 3.8% net investment income tax, and 13.3% state income tax.

Distributing 100% of Corporate Net Income After Income Tax	
Corporate Taxable Income	$100,000
Federal and State Income Tax	-29,800
Net Income after Income Tax	$70,200
Income Taxes at 37.1%	-26,044
Net Cash to Owner	$44,156

Note that the effective annual tax rate above seems somewhat high at just under 56%. The corporation might try paying more compensation to avoid double taxation, but compensation income is taxed at ordinary income rates, and the employer's and employee's share of FICA combines to add tax equal to 2.5%-13.3%.[729] So, add that tax to the employee's federal, state, and local income tax rate and compare to the above. Consider, however, that a corporation cannot deduct more than reasonable compensation - see part II.A.1.b C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment – and in 2017 the IRS has instructed its examiners how to prevent taxpayers from contesting the issue in Tax Court.[730]

Biden would raise the top corporate income tax rate to 28% and increase the top income tax rate on dividends to 39.6% (before 3.8% net investment income tax). This would increase the top corporate rate in California to approximately 36.8% (28% + 8.84%) and the top individual rate for dividends of 56.7%, consisting of 39.6% capital gain tax, 3.8% net investment income tax, and 13.3% state income tax.

Biden Plan	
Distributing 100% of Corporate Net Income After Income Tax	
Corporate Taxable Income	$100,000
Federal and State Income Tax	-36,800
Net Income after Income Tax	$63,200
Income Taxes at 56.7%	-35,834
Net Cash to Owner	$27,366

[729] The tax hit is 2.9%-15.3%, as described in part II.E.1.b Taxes Imposed on S Corporations, Partnerships, and Sole Proprietorships, text accompanying fn 732-734. However, the employer's deduction for half of this amount at an assumed 26% rate lowers the effective rate to 2%-13%.
[730] See fns. 85-87 in part II.A.2.c Avoiding Double Taxation and Self-Employment Tax.

Here's distributing half of the profits:

Distributing 50% of Corporate Net Income After Income Tax	
Corporate Taxable Income	$100,000
Federal and State Income Tax	-29,800
Net Income after Income Tax	$70,200
Distribution to Owner	$35,100
Income Taxes at 37.1%	-13,022
Net Cash to Owner	$22,078
Corporate Cash Plus Shareholder Cash	$57,178

Distributing half under Biden's plan:

Biden Plan	
Distributing 50% of Corporate Net Income After Income Tax	
Corporate Taxable Income	$100,000
Federal and State Income Tax	-36,800
Net Income after Income Tax	$63,200
Distribution to Owner	$31,600
Income Taxes at 56.7%	-17,917
Net Cash to Owner	$13,683
Corporate Cash Plus Shareholder Cash	$45,283

No distributions under current law:

Distributing None of Corporate Net Income After Income Tax	
Corporate Taxable Income	$100,000
Federal and State Income Tax	-29,800
Net Income after Income Tax	$70,200

No distributions under Biden's plan:

Biden Plan	
Distributing 50% of Corporate Net Income After Income Tax	
Corporate Taxable Income	$100,000
Federal and State Income Tax	-36,800
Net Income after Income Tax	$63,200

So, effective tax rates under current law are 55.8% distributing all earnings, 42.8% distributing half of the earnings, and 29.8% distributing none of the earnings.

Effective tax rates under the Biden plan are 72.6% distributing all earnings, 54.7% distributing half of the earnings, and 36.8% distributing none of the earnings.

II.E.1.a.iii. Incentives to Declare Dividends

Many years ago, Congress incentivized corporations to declare dividends, through the imposition of two taxes:

- Personal holding company tax. A personal holding company is taxed on 20% of its undistributed personal holding company income. See part II.A.1.e Personal Holding Company Tax.

- Accumulated earnings tax. Generally, a C corporation that accumulates funds could be subject to the 20% accumulated earnings tax on its excess undistributed accumulated earnings and profits. The corporation needs to articulate specific reasons why its needs to reinvest its earnings. For details, see part II.Q.7.a.vi Redemptions and Accumulated Earnings Tax. This tax does not apply to personal holding companies (as used in the preceding bullet point). If the company not a personal holding company but is a mere holding or investment company, the tax kicks in if undistributed earnings exceed $125,000.[731]

Each of these taxes can be avoided by paying sufficient dividends. The corporation may manage these taxes by actual or deemed dividends; see the relevant tax for rules on the extent to which this is permitted and how to do it.

II.E.1.b. Taxes Imposed on S Corporations, Partnerships, and Sole Proprietorships

Generally, S corporations and partnerships do not pay entity-level income tax; instead, their owners pay tax on their distributive share of the entity's income. However, some state or local governments do impose an entity-level tax, which may be in addition to imposing income tax on the owners' distributive share of the entity's income.

---

[731] See fn 4850 in part II.Q.7.a.vi Redemptions and Accumulated Earnings Tax.

Tax reform in 2017 introduced a deduction of up to 20% of business earnings. See part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

An owner of a partnership or sole proprietorship also generally pays tax self-employment ("SE") tax on income from a trade or business, subject to various exceptions; see part II.L Self-Employment Tax (FICA). SE tax is 15.3% OASDI and Medicare taxes until the taxpayer reaches the taxable wage base ($160,200 in 2023 and $168,600 in 2024),[732] then is 2.9% Medicare tax until it reaches 3.8%, when the supplemental Medicare tax (employee's portion) kicks in.[733] The employer's portion of SE tax, which is 7.65% up to the taxable wage base and 1.45% thereafter, is deductible in determining adjusted gross income (not as an itemized deduction).[734]

An owner of an S corporation or partnership may pay the 3.8% tax on net investment income ("NII"); see part II.I 3.8% Tax on Excess Net Investment Income (NII). SE income is excluded from NII.[735] The deduction for the employer's share of SE tax makes SE tax preferable to NII tax, except to the extent that the income would be below the taxable wage base.

To the extent that an owner's distributive share of a partnership's or S corporation's income is reinvested, the owner's basis in the partnership interest[736] or stock[737] increases. Generally, an owner can withdraw the earnings tax-free, merely reducing basis in the owner's partnership interest or stock. See parts II.Q.8.b.i Distribution of Property by a Partnership and II.Q.7.b Redemptions or Distributions Involving S Corporations. However, an S corporation that distributes property triggers tax on the gain,[738] which gain is taxed at its shareholders' respective income tax rates and in many cases does not qualify for favorable capital gain rates.[739]

Let's examine the effects of earning $100,000 taxable income inside the entity, assuming the taxpayer lives in a state that imposes moderate (5%) income tax on corporations and individuals:

An individual in a top bracket might be taxed at a rate of 34.6%-45.8%, consisting of:

---

732 See http://www.ssa.gov/OACT/COLA/cbb.html for the current amount.

733 See fns 3391-3393 in part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax.

734 Code § 164(f), "Deduction for one-half of self-employment taxes," provides:

(1) *In general*. In the case of an individual, in addition to the taxes described in subsection (a), there shall be allowed as a deduction for the taxable year an amount equal to one-half of the taxes imposed by section 1401 (other than the taxes imposed by section 1401(b)(2)) for such taxable year.

(2) *Deduction treated as attributable to trade or business*. For purposes of this chapter, the deduction allowed by paragraph (1) shall be treated as attributable to a trade or business carried on by the taxpayer which does not consist of the performance of services by the taxpayer as an employee.

735 As to SE income being excluded from NII, see fn 2290 in part II.I.5 What is Net Investment Income Generally.

736 Code § 705.

737 Code § 1367, which is reproduced in part II.G.4.d.i Basis Limitation Generally.

738 See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

739 See parts II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business and II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

- 29.6%-37% ordinary income tax (depending on whether the Code § 199A 20% deduction is available)

- zero-3.8% net investment income tax (working in the business may avoid this tax, and exceptions to SE tax may apply as well), and

- 5% state income tax.

Biden wants to raise the top bracket from 37% to 39.6% and disallow the Code § 199A deduction for such individuals. An individual in a top bracket might be taxed at a rate of 44.6%-48.4%, consisting of:

- 39.6% ordinary income tax,

- zero-3.8% net investment income tax (working in the business may avoid this tax, and exceptions to SE tax may apply as well), and

- 5% state income tax.

An individual in a modest bracket might be taxed at a rate of 27.4%-46.2%, consisting of:

- 22.4%-28% ordinary income tax (depending on whether the Code § 199A 20% deduction is available, and the wage limitations[740] and restrictions on types of businesses do not apply to modest income taxpayers)

- zero-13.2% SE tax income tax (after considering the deduction for one-half of SE tax)

- 5% state income tax.

In California, the rates are as follows, as described in part II.Q.1.a.ii California Scenarios:

S corporation income rate:	29.6%-37%	federal
	13.3%	state individual
	1.5%	state entity
	zero-3.8%	NII tax
	44.4%-55.6%	
Partnership income rate:	29.6%-37%	federal
	13.3%	state
	zero-3.8%	NII or SE tax
	42.9%-54.1%	

II.E.1.c. Code § 199A Pass-Through Deduction for Qualified Business Income

For taxpayers other than C corporations,[741] Code § 199A provides a deduction for taxable years beginning after December 31, 2017 but not beginning after December 31, 2025.[742] When applying Prop. Regs. §§ 1.199A-1 through 1.199A-6 or Regs. §§ 1.199A-1 through 1.199A-6, a

[740] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.
[741] Code § 199A(a).
[742] Code § 199A(i).

reference to an individual includes a reference to a trust (other than a grantor trust) or an estate to the extent that the Code § 199A deduction is determined by the trust or estate under the rules of Reg. § 1.199A-6 or Reg. § 1.199A-6.[743] The Proposed Regulations and preamble, together with public comments, are found at https://www.federalregister.gov/documents/2018/08/16/2018-17276/qualified-business-income-deduction. The Final Regulations and preamble are found at https://www.govinfo.gov/content/pkg/FR-2019-02-08/pdf/2019-01025.pdf.

IRS training, "Qualified Business Income Deduction," is found at https://www.irs.gov/pub/newsroom/tcja-training-provision-11011-qbid.pdf.

In the case of a partnership or S corporation, Code § 199A applies at the partner or shareholder level.[744] In the case of an S corporation, an allocable share is the shareholder's pro rata share of an item.[745] The deduction does not reduce one's basis in one's partnership interest or S corporation stock.[746]

Grantor trusts are of course disregarded and their activity attributed to their deemed owners, but estates and nongrantor trusts compute their distributive net income ("DNI") with considering the Code § 199A deduction. Then they allocate each Code § 199A item to the trust and the beneficiaries according to their respective shares of DNI. The trust uses its taxable income for its Code § 199A calculation, and each beneficiary uses his or her taxable income for his or her own Code § 199A calculation. See part II.E.1.f Trusts/Estates and the Code § 199A Deduction.

The IRS is to "prescribe such regulations as are necessary to carry out the purposes of" Code § 199A, including regulations:[747]

> (A) for requiring or restricting the allocation of items and wages under this section and such reporting requirements as the Secretary determines appropriate, and
>
> (B) for the application of this section in the case of tiered entities.

The regulations implementing subparagraph (A) follow the definitions below. Prop. Reg. § 1.199A-1(f), "Effective/applicability date," provides:

> (1) *General rule*. Except as provided in paragraph (f)(2) of this section, the provisions of this section apply to taxable years ending after the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register.

---

743 Reg. § 1.199A-1(a)(2), "Usage of term individual," provides:

> For purposes of applying the rules of §§ 1.199A-1 through 1.199A-6, a reference to an individual includes a reference to a trust (other than a grantor trust) or an estate to the extent that the section 199A deduction is determined by the trust or estate under the rules of § 1.199A-6.

744 Code § 199A(f)(1)(A)(i).

745 Code § 199A(f)(1)(A) (flush language).

746 Reg. § 1.199A-1(e)(1) provides:

> *Effect of deduction*. In the case of a partnership or S corporation, section 199A is applied at the partner or shareholder level. The rules of subchapter K and subchapter S apply in their entirety for purposes of determining each partner's or shareholder's share of QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income or loss. The section 199A deduction has no effect on the adjusted basis of a partner's interest in the partnership, the adjusted basis of a shareholder's stock in an S corporation, or an S corporation's accumulated adjustments account.

747 Code § 199A(f)(4).

However, taxpayers may rely on the rules of this section until the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register.

(2) *Exception for non-calendar year RPE*. For purposes of determining QBI, W-2 wages, and UBIA of qualified property, if an individual receives any of these items from an RPE with a taxable year that begins before January 1, 2018 and ends after December 31, 2017, such items are treated as having been incurred by the individual during the individual's taxable year in which or with which such RPE taxable year ends.

Reg. § 1.199A-1(f), "Effective/applicability date," provides that the final regulations apply to taxable years ending after the January 2019 date of publication in the Federal Register, except as provided below. Reg. § 1.199A-1(f)(2) is unchanged from the proposed regulation cited above and allows a fiscal year estate (including a qualified revocable trust electing taxation as such)[748] that distributes income to its beneficiaries to convert 2017 income into QBI. For example, suppose an S corporation issues a K-1 to an estate for calendar year 2017, and the estate elects a calendar year ending September 30, 2018. That K-1 is reported on the estate's return for a taxable year that begins before January 1, 2018 and ends after December 31, 2017, meaning that the K-1 will pass through QBI, W-2 wages and UBIA to the extent that the estate is an RPE.[749] The estate is an RPE only to the extent QBI is allocated to beneficiaries on K-1s issued to them.[750] The government is not disturbed by this conversion of 2017 income to QBI.[751] However, the RPE conducting the qualified trade or business may be – it might not have been expecting to compute QBI, W-2 wages and UBIA for 2017! Nevertheless, I believe that they are required to report this information, because S corporations[752] and partnerships[753] must separately report any items that affect an owner's tax return differently than the entity's overall taxable income.

The rules described in the various subparts of this part II.E.1.c apply to pass-throughs, but similar rules apply to any "specified agricultural or horticultural cooperative."[754]

---

[748] See part II.J.7 Code § 645 Election to Treat a Revocable Trust as an Estate.

[749] See part II.E.1.f Trusts/Estates and the Code § 199A Deduction, text accompanying fn 980.

[750] See part II.E.1.f.i.(a) How Qualified Business Income Flows to Beneficiaries.

[751] The preamble to Prop. Reg. § 1.199A-6(d), REG-107892-18 (8/16/2018), explains:

> Section 199A applies to taxable years beginning after December 31, 2017. However, there is no statutory requirement under section 199A that a qualified item arise after December 31, 2017.

[752] See fns 994-996 in part II.E.1.f.ii Electing Small Business Trusts (ESBTs).

[753] Using language similar to regulations referred to in fn 753, Reg. § 1.702-1(a)(8)(ii) provides:

> Each partner must also take into account separately the partner's distributive share of any partnership item which, if separately taken into account by any partner, would result in an income tax liability for that partner, or for any other person, different from that which would result if that partner did not take the item into account separately.

Instructions for Form 1065 (2017), pages 34-35 provide much detail on how partnerships report items relating to Code § 199, which Code § 199A replaced. Instructions for Form 1065 (2018), pages 46-47 provide much detail on how partnerships report items relating to Code § 199A.

[754] Code § 199A(g) describes qualified entities and the related deduction, and
Rev. Proc. 2021-11 interprets "W-2 wages" under Code § 199A(g)(1)(B)(ii). The Senate report said (note that the Conference Committee reduced the deduction from 23% to 20% and pushed up the effective date by one year):

Reg. § 1.199A-1(b) provides the following definitions for Code § 199A and Regs. §§ 1.199A-1 through 1.199A-6:

(1) *Aggregated trade or business* means two or more trades or businesses that have been aggregated pursuant to § 1.199A-4.

(2) *Applicable percentage* means, with respect to any taxable year, 100 percent reduced (not below zero) by the percentage equal to the ratio that the taxable income of the individual for the taxable year in excess of the threshold amount, bears to $50,000 (or $100,000 in the case of a joint return).

(3) *Net capital gain* means net capital gain as defined in section 1222(11) plus any *qualified dividend income* (as defined in section 1(h)(11)(B)) for the taxable year.

(4) *Phase-in range* means a range of taxable income between the threshold amount and the threshold amount plus $50,000 (or $100,000 in the case of a joint return).

(5) *Qualified business income* (QBI) means the net amount of qualified items of income, gain, deduction, and loss with respect to any trade or business (or aggregated trade or business) as determined under the rules of § 1.199A-3(b).

(6) *QBI component* means the amount determined under paragraph (d)(2) of this section.

(7) *Qualified PTP income* is defined in § 1.199A-3(c)(3).

(8) *Qualified REIT dividends* are defined in § 1.199A-3(c)(2).

(9) *Reduction amount* means, with respect to any taxable year, the excess amount multiplied by the ratio that the taxable income of the individual for the taxable year in excess of the threshold amount, bears to $50,000 (or $100,000 in the case of a joint return). For purposes of this paragraph (b)(9), the *excess amount* is the amount by which 20 percent of QBI exceeds the greater of 50 percent of W-2 wages or the sum of 25 percent of W-2 wages plus 2.5 percent of the UBIA of qualified property.

(10) *Relevant passthrough entity* (RPE) means a partnership (other than a PTP) or an S corporation that is owned, directly or indirectly, by at least one individual, estate, or trust. Other passthrough entities including common trust funds as described in § 1.6032-T and religious or apostolic organizations described in section 501(d) are also treated as RPEs if the entity files a Form 1065, U.S. Return of Partnership Income, and is owned, directly or indirectly, by at least one individual, estate, or trust. A trust or estate is treated as an RPE to the extent it passes through QBI,

---

For taxable years beginning after December 31, 2018 but not after December 31, 2025, a deduction is allowed to any specified agricultural or horticultural cooperative equal to the lesser of 23 percent of the cooperative's taxable income for the taxable year or 50 percent of the W-2 wages paid by the cooperative with respect to its trade or business. A specified agricultural or horticultural cooperative is an organization to which subchapter T applies that is engaged in (a) the manufacturing, production, growth, or extraction in whole or significant part of any agricultural or horticultural product, (b) the marketing of agricultural or horticultural products that its patrons have so manufactured, produced, grown, or extracted, or (c) the provision of supplies, equipment, or services to farmers or organizations described in the foregoing.

W-2 wages, UBI of qualified property, qualified REIT dividends, or qualified PTP income.[755]

(11) *Specified service trade or business* (SSTB) means a specified service trade or business as defined in § 1.199A-5(b).

(12) *Threshold amount* means, for any taxable year beginning before 2019, $157,500 (or $315,000 in the case of a taxpayer filing a joint return). In the case of any taxable year beginning after 2018, the threshold amount is the dollar amount in the preceding sentence increased by an amount equal to such dollar amount, multiplied by the cost-of-living adjustment determined under section 1(f)(3) of the Code for the calendar year in which the taxable year begins, determined by substituting "calendar year 2017" for "calendar year 2016" in section 1(f)(3)(A)(ii). The amount of any increase under the preceding sentence is rounded as provided in section 1(f)(7) of the Code. [My addition not in the regulations:] For taxable years beginning in 2019, the threshold amount is $321,400 for married filing joint returns, $160,725 for married filing separate returns, and $160,700 for any other returns.[756] For taxable years beginning in 2020, the threshold amount is $326,600 for married filing joint returns, $163,300 for married filing separate returns and for any other returns.[757]

(13) *Total QBI amount* means the net total QBI from all trades or businesses (including the individual's share of QBI from trades or business conducted by RPEs).

(14) *Trade or business* means a trade or business that is a trade or business under section 162 (a section 162 trade or business) other than the trade or business of performing services as an employee. In addition, rental or licensing of tangible or intangible property (rental activity) that does not rise to the level of a section 162 trade or business is nevertheless treated as a trade or business for purposes of Section 199A, if the property is rented or licensed to a trade or business conducted by the individual or an RPE which is commonly controlled under § 1.199A-4(b)(1)(i) (regardless of whether the rental activity and the trade or business are otherwise eligible to be aggregated under § 1.199A-4(b)(1)).

(15) *Unadjusted basis immediately after acquisition of qualified property* (UBIA of qualified property) is defined in § 1.199A-2(c).

---

[755] [not in the regulation] The preamble to the final regulations, T.D. 9847 (2/8/2019), part II.A.2, "Relevant Passthrough Entity," explains:

> The proposed regulations define an RPE as a partnership (other than a PTP) or an S corporation that is owned, directly or indirectly, by at least one individual, estate, or trust. A trust or estate is treated as an RPE to the extent it passes through QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, or qualified PTP income. In response to a comment, the final regulations provide that other passthrough entities, including common trust funds as described in § 1.6032-T and religious or apostolic organizations described in section 501(d), are also treated as RPEs if the entity files a Form 1065, *U.S. Return of Partnership Income*, and is owned, directly or indirectly, by at least one individual, estate, or trust. The Treasury Department and the IRS decline to adopt the recommendation of another commenter to treat regulated investment companies (RICs) as RPEs because RICs are C corporations, not passthrough entities.

[756] Rev. Proc. 2018-57, § 3.27.

[757] Rev. Proc. 2019-44, § 3.27.

(16) *W-2 wages* means a trade or business's W-2 wages properly allocable to QBI as defined in § 1.199A-2(b).

These definitions and other authority within Code § 199A refer to a "trade or business," which is the basic unit for applying everything related to Code § 199A. Throughout my materials, I often use "business" to refer to a "trade or business."

Various items described in part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds are to be allocated pursuant to fn 747 above. Accordingly, Reg. § 1.199A-2(a) provides:[758]

(1) *In general*. This section provides guidance on calculating a trade or business's W-2 wages properly allocable to QBI (W-2 wages) and the trade or business's unadjusted basis immediately after acquisition of all qualified property (UBIA of qualified property). The provisions of this section apply solely for purposes of Section 199A of the Internal Revenue Code (Code).

(2) *W-2 wages*. Paragraph (b) of this section provides guidance on the determination of W-2 wages. The determination of W-2 wages must be made for each trade or business by the individual or RPE that directly conducts the trade or business (or aggregated trade or business). In the case of W-2 wages paid by an RPE, the RPE must determine and report W-2 wages for each trade or business (or aggregated trade or business) conducted by the RPE. W-2 wages are presumed to be zero if not determined and reported for each trade or business (or aggregated trade or business).

(3) *UBIA of qualified property*.

(i) *In general*. Paragraph (c) of this section provides guidance on the determination of the UBIA of qualified property. The determination of the UBIA of qualified property must be made for each trade or business (or aggregated trade or business) by the individual or RPE that directly conducts the trade or business (or aggregated trade or business). The UBIA of qualified property is presumed to be zero if not determined and reported for each trade or business (or aggregated trade or business).

(ii) *UBIA of qualified property held by a partnership*. In the case of qualified property held by a partnership, each partner's share of the UBIA of qualified property is determined in accordance with how the partnership would allocate depreciation under § 1.704-1(b)(2)(iv)(g) on the last day of the taxable year.

(iii) *UBIA of qualified property held by an S corporation*. In the case of qualified property held by an S corporation, each shareholder's share of the UBIA of qualified property is the share of the unadjusted basis proportionate to the ratio of shares in the S corporation held by the shareholder on the last day of the taxable year over the total issued and outstanding shares of the S corporation.

---

[758] See parts II.E.1.c.vi.(a) W-2 wages under Code § 199A and II.E.1.c.vi.(b) Unadjusted Basis Immediately after Acquisition (UBIA) of Qualified Property under Code § 199A.

Reg. § 1.199A-2(a)(3)(iv), "UBIA and section 743(b) basis adjustments," is reproduced in part II.E.1.c.vi.(b) Unadjusted Basis Immediately after Acquisition (UBIA) of Qualified Property under Code § 199A.

Reg. § 1.199A-2(b) and (c) are described in part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds. For now, let's delve into how those items get reported to the ultimate individual or trust. Note that the sentence describing S corporation UBIA is simplistic compared to part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

Reg. § 1.199A-6(b) describes computational and reporting rules for a relevant passthrough entity (RPE). It provides:

(1) *In general*. An RPE must determine and report information attributable to any trades or businesses it is engaged in necessary for its owners to determine their Section 199A deduction.

(2) *Computational rules*. Using the following four rules, an RPE must determine the items necessary for individuals who own interests in the RPE to calculate their Section 199A deduction under § 1.199A-1(c) or (d). An RPE that chooses to aggregate trades or businesses under the rules of § 1.199A-4 may determine these items for the aggregated trade or business.

(i) First, the RPE must determine if it is engaged in one or more trades or businesses. The RPE must also determine whether any of its trades or businesses is an SSTB under the rules of § 1.199A-5.

(ii) Second, the RPE must apply the rules in § 1.199A-3 to determine the QBI for each trade or business engaged in directly.

(iii) Third, the RPE must apply the rules in § 1.199A-2 to determine the W-2 wages and UBIA of qualified property for each trade or business engaged in directly.

(iv) Fourth, the RPE must determine whether it has any qualified REIT dividends as defined in § 1.199A-3(c)(1) earned directly or through another RPE. The RPE must also determine the amount of qualified PTP income as defined in § 1.199A-3(c)(2) earned directly or indirectly through investments in PTPs.

(3) *Reporting rules for RPEs* -

(i) *Trade or business directly engaged in*. An RPE must separately identify and report on the Schedule K-1 issued to its owners for any trade or business engaged in directly by the RPE -

(A) Each owner's allocable share of QBI, W-2 wages, and UBIA of qualified property attributable to each such trade or business, and

(B) Whether any of the trades or businesses described in paragraph (b)(3)(i) of this section is an SSTB.

(ii) *Other items*. An RPE must also report on an attachment to the Schedule K-1, any QBI, W-2 wages, UBIA of qualified property, or SSTB determinations, reported to it by any RPE in which the RPE owns a direct or indirect interest. The RPE must also report each owner's allocated share of any qualified REIT dividends received by the RPE (including through another RPE) as well as any qualified PTP income or loss received by the RPE for each PTP in which the RPE holds an interest (including through another RPE). Such information can be reported on an amended or late filed return to the extent that the period of limitations remains open.

(iii) *Failure to report information*. If an RPE fails to separately identify or report on the Schedule K-1 (or any attachments thereto) issued to an owner any items described in paragraph (b)(3)(i) of this section, the owner's share (and the share of any upper-tier indirect owner) of positive QBI, W-2 wages, and UBIA of qualified property attributable to trades or businesses engaged in by that RPE will be presumed to be zero.

Paragraph (3)(i), (ii) above is consistent with reporting requirements for partnerships in Code § 702(a)(7) and Reg. § 1.702-1(a)(8)(iii) and for S corporations in Code § 1366(a)(1)(A).

This RPE paradigm means that each RPE is treated as a stand-alone taxpayer for purposes of evaluating the nature of the business. This has negative consequences for real estate owners and for those conducting tiered partnerships.[759]

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), comments in part VI.A., "Computational steps for RPEs and PTPs," starts with a description of RPE reporting requirements:

> Although RPEs cannot take the Section 199A deduction at the RPE level, each RPE must determine and report the information necessary for its direct and indirect owners to determine their own Section 199A deduction. Proposed § 1.199A-6(b) follows the rules applicable to individuals with taxable income above the threshold amount set forth in § 1.199A-1(d) in directing RPEs to determine what amounts and information to report to their owners and the IRS, including QBI, W-2 wages, the UBIA of qualified property for each trade or business directly engaged in, and whether any of its trades or businesses are SSTBs. RPEs must also determine and report qualified REIT dividends and qualified PTP income received directly by the RPE. Proposed § 1.199A-6(b)(3) then requires each RPE to report this information on or with the Schedules K-1 issued to the owners. RPEs must report this information regardless of whether a taxpayer is below the threshold. The Treasury Department and the IRS request comments whether it is administrable to provide a special rule that if none of the owners of the RPE have taxable income above the threshold amount, the RPE does not need to determine and report W-2 wages, UBIA of qualified property, or whether the trade or business is an SSTB. Although such a rule would relieve an RPE of an unnecessary burden, the RPE would need to have knowledge of the ultimate owner's taxable income.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VII.A, "Reporting Rules," explains:

> The proposed regulations provide that an RPE must determine and separately report QBI, W-2 wages, UBIA of qualified property, and whether the trade or business is an

[759] See part II.E.5.c.ii Code § 199A Deduction under Recommended Structure.

SSTB for each of the RPE's trades or businesses. To help simplify the administration and compliance burden, several commenters suggested that there be an option to compute, aggregate, and report activities at the RPE or entity level. As discussed in part V of this Summary of Comments and Explanation of Revisions, the final regulations allow an RPE to aggregate its trades or businesses provided the rules of § 1.199A-4 are satisfied. An RPE that chooses to aggregate can report combined QBI, W-2 wages, and UBIA of qualified property for the aggregated trade of business. This aggregation must be maintained and reported by all direct and indirect owners of the RPE, including upper-tier RPEs.

The proposed regulations provide that if an RPE fails to separately identify or report any QBI, W-2 wages, UBIA of qualified property, or SSTB determinations, the owner's share (and the share of any upper-tier indirect owner) of QBI, W-2 wages, and UBIA of qualified property attributable to trades or businesses engaged in by that RPE will be presumed to be zero. A few commenters suggested that the final regulations clarify that if an RPE fails to separately identify or report each owner's allocable share of QBI, W-2 wages, or UBIA of qualified property, then only the unidentified or unreported amount is presumed to be zero. Another commenter suggested that a return be considered substantially complete even if an RPE chooses not to report QBI, W-2 wages, and UBIA of qualified property, while other commenters suggested that taxpayers could rebut the presumption. One commenter requested that the final regulations clarify that if an RPE fails to report QBI, W-2 wages, UBIA of qualified property, and SSTB information, the information can still be reported on an amended or late filed return if filed while the period of limitations is still open. Another commenter suggested that to incentivize accurate and timely reporting, taxpayers should be given reasonable opportunities to correct errors and not be subject to penalties for such errors.

The Treasury Department and the IRS agree with commenters that all of an RPE's items related to Section 199A should not be presumed to be zero because of a failure to report one item. For example, an RPE may have sufficient W-2 wages and send out that information, but decline to provide information for UBIA of qualified property because it is not necessary or is an insignificant amount. Accordingly, the final regulations retain the reporting requirement but revise the presumption to provide that if an RPE fails to separately identify or report an item of QBI, W-2 wages, or UBIA of qualified property, the owner's share of each unreported item of positive QBI, W-2 wages, or UBIA of qualified property attributable to trades or businesses engaged in by that RPE will be presumed to be zero. The final regulations also provide that such information can be reported on an amended or late filed return for any open tax year. Guidance on the application of penalties is beyond the scope of these regulations.

The preamble to the proposed regulations requested comments regarding whether it is administrable to provide a special rule that if none of the owners of the RPE have taxable income above the threshold amount, the RPE does not need to determine and report W-2 wages, UBIA of qualified property, or whether the trade or business is an SSTB. One commenter recommended that a special rule be provided that an RPE need not determine or report W-2 wages, UBIA of qualified property or whether the trade or business is an SSTB if none of the owners of the RPE have taxable income above the threshold amount. The commenter suggested that the final regulations provide an exception to the reporting requirements if (1) an RPE does not have gross receipts that constitute QBI; (2) none of the owners of the RPE are non-corporate taxpayers; or (3) none of the RPE owners have taxable income above the threshold amount. The commenter suggested that an RPE could establish the taxable income of its owners through the review and maintenance of its owners' tax returns or written statements signed under the penalty of perjury. Another commenter suggested that an RPE should not be subject to the reporting requirements unless the RPE is aware of a non-corporate owner. Another commenter suggested that the RPE only needs to report W-2 wages when it is clear that the amount will result in an amount greater than 20 percent of QBI. Another commenter requested guidance on how to qualify for the special rule and what information the RPE would be required to report to its owners and retain in connection with the rule. One commenter, however, cautioned against a special rule because of the lack of knowledge the RPE has about the owners. The commenter also suggested that a certification process by the owners would create an administrative burden. The commenter requested guidance on who would be responsible for corrections and penalties due to failure to disclose the information on the Schedule K-1 when the determination affects the owner's QBI deduction. One commenter suggested that RPEs should not have to report QBI, W-2 wages, and UBIA of qualified property with respect to trades or businesses not effectively connected with the United States.

The Treasury Department and the IRS remain concerned that RPEs do not have sufficient information to determine an ultimate owner's taxable income or whether the ultimate owner will require W-2 wage or UBIA of qualified property information for the RPE's trades or businesses in order to determine the owner's Section 199A deduction. Conversely, the RPE itself, not its ultimate owners, is in the best position to determine the RPE's Section 199A items. Accordingly, the final regulations do not contain a special reporting rule for RPEs based on whether the RPE's owners have taxable income below the threshold amounts. Similarly, the Treasury Department and the IRS decline to create a reporting exception based on whether an RPE has non-corporate owners. Finally, a trade or businesses that is not effectively connected with the United States produces no QBI, W-2 wages, or UBIA of qualified property and thus has no reporting requirement under § 1.199A-6.

Reg. § 1.199A-6(b)(3), "Reporting rules for RPEs," provides:

(i) *Trade or business directly engaged in*. An RPE must separately identify and report on the Schedule K-1 issued to its owners for any trade or business (including an aggregated trade or business) engaged in directly by the RPE –

(A) Each owner's allocable share of QBI, W-2 wages, and UBIA of qualified property attributable to each such trade or business, and

(B) Whether any of the trades or businesses described in paragraph (b)(3)(i) of this section is an SSTB.

(ii) *Other items*. An RPE must also report on an attachment to the Schedule K-1, any QBI, W-2 wages, UBIA of qualified property, or SSTB determinations, reported to it by any RPE in which the RPE owns a direct or indirect interest. The RPE must also report each owner's allocated share of any qualified REIT dividends received by the RPE (including through another RPE) as well as any qualified PTP income or loss received by the RPE for each PTP in which the RPE holds an interest (including through another RPE). Such information can be reported on an amended or late filed return to the extent that the period of limitations remains open.

(iii) *Failure to report information*. If an RPE fails to separately identify or report on the Schedule K-1 (or any attachments thereto) issued to an owner an item described in paragraph (b)(3)(i) of this section, the owner's share (and the share of any upper-tier indirect owner) of each unreported item of positive QBI, W-2 wages, or UBIA of qualified property attributable to trades or businesses engaged in by that RPE will be presumed to be zero.

Part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A describes when taxpayers may combine QBI, W-2 wages, and UBIA from multiple businesses. It does not, however, change the fundamental concept that whether an activity rises to the level of a trade or business is tested only for the RPE and is not tested across RPEs:

- For example, if a triple-net lease does not qualify for special relief due to common ownership and would not rise to the level of a trade or business,[760] one cannot consider the fact the owners have 100 different RPEs with triple-net leases, which together add up to one big trade or business. Instead, the owners would need to have one master partnership with multiple single-member LLCs that are disregarded for income tax purposes. The safe harbor for treating real estate as a business confirms this approach.[761] Presumably owners could have special allocations to adjust for any economic distortions of holding the various properties in one master partnership.

- Suppose the activities are conducted within one or more S corporations (which is unusual for real estate but not for other activities). An S corporation could use as a subsidiary disregarded entity either an LLC or another corporation. For the latter, see part II.A.2.g Qualified Subchapter S Subsidiary (QSub). As part II.A.2.g discusses, unless there is a good state income tax or other reason, I tend to prefer single member LLC subsidiaries over QSubs.

The preamble to the final regulations confirms this view of disregarded entities:[762]

> The proposed regulations do not address the treatment of disregarded entities for purposes of Section 199A. A few commenters questioned whether trades or businesses conducted by disregarded entities would be treated as if conducted directly by the owner of the entity. Section 1.199A-1(e)(2) of the final regulations provides that an entity with a single owner that is treated as disregarded as an entity separate from its owner under any provision of the Code is disregarded for purposes of Section 199A and 1.199A-1 through 1.199A-6. Accordingly, trades or businesses conducted by a disregarded entity will be treated as conducted directly by the owner of the entity for purposes of Section 199A.

Reg. § 1.199A-1(e)(2), "Disregarded entities," provides:

> An entity with a single owner that is treated as disregarded as an entity separate from its owner under any provision of the Code is disregarded for purposes of Section 199A and §§ 1.199A-1 through 1.199A-6.

II.E.1.c.i. What Kind of Deduction; Maximum Impact of Deduction

II.E.1.c.i.(a). Summary of Federal Impact of Deduction

The deduction is not allowed in computing adjusted gross income[763] but also is not an itemized deduction,[764] so it is in its own category of deduction.

The deduction applies for income tax but not for net investment income tax[765] or self-employment tax[766] purposes.[767]

When calculating alternative minimum taxable income under Code § 55, qualified business income is determined without regard to any adjustments under Code §§ 56-59.[768]

Although wage income is not qualified business income,[769] in computing withholding allowances and employee may take into account the estimated deduction under Code § 199A.[770]

With a top regular income tax bracket of 37%, the deduction's maximum relief is the equivalent of a 7.4% (20% of 37%) rate reduction, reducing the effective regular income tax rate to 29.6% (37% minus 7.4%).

However, the rate reduction may be thought of as being somewhere between zero and 7.4%, for the following reasons:

- Each trade or business the entity runs needs to be separately subjected to the limitations described below.

- Some income does not qualify for the deduction at all, although generally business activities qualify if the taxpayer's taxable income is below certain thresholds. See

---

[763] Code § 62(a).
[764] Code § 63(d)(3).
[765] Net investment income tax, described in part II.I 3.8% Tax on Excess Net Investment Income (NII), is provided by Code § 1411, which is Chapter 2A.
[766] Self-employment tax, described in part II.L Self-Employment Tax (FICA), is provided by Code §§ 1401-1403, which is Chapter 2.
[767] Code § 199A(f)(3) provides:

> *Deduction Limited to Income Taxes*.—The deduction under subsection (a) shall only be allowed for purposes of this chapter.

Chapter 1 of Subtitle A of the Code includes Code §§ 1-1400U-3.
Reg. § 1.199A-1(e)(3), "Self-employment tax and net investment income tax," provides:

> The deduction allowed under section 199A does not reduce net earnings from self-employment under section 1402 or net investment income under section 1411.

[768] Code § 199A(f)(2). Chapter 1 of Subtitle A of the Code includes Code §§ 1-1400U-3.
Reg. § 1.199A-1(e)(5), "Coordination with alternative minimum tax," provides:

> For purposes of determining alternative minimum taxable income under section 55, the deduction allowed under section 199A(a) for a taxable year is equal in amount to the deduction allowed under section 199A(a) in determining taxable income for that taxable year (that is, without regard to any adjustments under sections 56 through 59).

[769] See parts II.E.1.c.ii.(b) Trade or Business of Being an Employee (Excluded from QBI) and II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.
[770] Code § 3402(m)(1).

parts II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction and II.E.1.c.v.(a) Calculation of Deduction Generally.

- An activity that does qualify may have its deduction limited if it has insufficient wages and not enough investment to make up for insufficient wages, although this limitation does not apply if the taxpayer's taxable income is below certain thresholds. See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds regarding those particular items and part II.E.1.c.v Calculation of Deduction Generally showing how they affect the deduction.

- The deduction benefits the taxpayer only if and to the extent that the taxpayer has taxable income taxed at ordinary income rates.[771]

- Deducting a net operating loss may in some situations cause the taxpayer to lose part or all of the benefit of the Code § 199A deduction.[772]

II.E.1.c.i.(b). Other Federal Effects of Code § 199A Deduction

When determining how much Code § 172 net operating loss is applied, the Code § 199A deduction is disallowed.[773]

Claiming the Code § 199A deduction makes the taxpayer more susceptible to the penalty for understatement of income tax.[774]

The Code § 199A deduction does not reduce income when computing the percentages of income used in calculating the individual income tax charitable deduction.[775]

It does not reduce taxable income in computing the taxable income limitation for percentage depletion under Code § 613(a) or 613A(d)(1).

The Code § 199A deduction also has some interaction with the dividends-received deduction that I have not yet tried to analyze,[776] which is unexpected in that the dividends-received deduction applies only to corporations; presumably this applies to a specified agricultural or horticultural cooperative.[777]

[772] See part II.E.1.c.i.(b) Other Federal Effects of Code § 199A Deduction, fn. 773.
[773] Code § 172(d)(8). See part II.G.4.l.ii Net Operating Loss Deduction.
[774] Reg. § 1.199A-1(e)(6), "Imposition of accuracy-related penalty on underpayments," provides:

> For rules related to the imposition of the accuracy-related penalty on underpayments for taxpayers who claim the deduction allowed under section 199A, see section 6662(d)(1)(C).

Code § 6662(d)(1)(C) provides:

> (C) *Special Rule For Taxpayers Claiming Section 199A Deduction*. In the case of any taxpayer who claims the deduction allowed under section 199A for the taxable year, subparagraph (A) shall be applied by substituting "5 percent" for "10 percent."

[775] Code § 170(b)(2)(D)(vi).
[776] Code § 246(b)(1).
[777] See fn 754.

II.E.1.c.i.(c). Effect (if any) of Code § 199A on State Income Taxation

States have not universally integrated Code § 199A into their income tax systems.

For example, Missouri does not refer to Code § 199A, but it offers some breaks to owners of pass-through entities, as described in part II.G.29 Missouri Income Tax Cut for Pass-Through Entities and Sole Proprietorships.

On July 7, 2019, I used RIA Checkpoint to create a State Tax Chart, using the feature "State Conformity to IRC Section 199A Pass-Through Deduction—Enacted by TCJA of 2017" and found that the only states that conformed to Code § 199A were Colorado, Idaho, and North Dakota.[778]

II.E.1.c.ii. Types of Income and Activities Eligible or Ineligible for Deduction

II.E.1.c.ii.(a). Generally; List of Items Included in QBI

QBI means "the net amount of qualified items of income, gain, deduction, and loss with respect to any qualified trade or business of the taxpayer;"[779] see part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A. It does not include any "qualified REIT dividends, qualified cooperative dividends, or qualified publicly traded partnership income."[780] (Note that the Code § 199A separately takes into account qualified cooperative dividends in addition to QBI.) Reg. § 1.199A-3 applies solely for purposes of Code § 199A; in particular, "QBI must be determined and reported for each trade or business by the individual or relevant passthrough entity (RPE) that directly conducts the trade or business before applying the aggregation rules of § 1.199A-4. "[781]

---

[778] Thompson Coburn doc. no. 7356823.

[779] Code § 199A(c)(1).

[780] Code § 199A(c)(1). Code § 199A(e)(3) provides:

> *Qualified REIT Dividend*. The *term qualified REIT dividend* means any dividend from a real estate investment trust received during the taxable year which -
> (A) is not a capital gain dividend, as defined in section 857(b)(3), and
> (B) is not qualified dividend income, as defined in section 1(h)(11).

Code § 199A(e)(4) provides:

> *Qualified Publicly Traded Partnership Income*. The term "qualified publicly traded partnership income" means, with respect to any qualified trade or business of a taxpayer, the sum of -
> (A) the net amount of such taxpayer's allocable share of each qualified item of income, gain, deduction, and loss (as defined in subsection (c)(3) and determined after the application of subsection (c)(4)) from a publicly traded partnership (as defined in section 7704(a)) which is not treated as a corporation under section 7704(c), plus
> (B) any gain recognized by such taxpayer upon disposition of its interest in such partnership to the extent such gain is treated as an amount realized from the sale or exchange of property other than a capital asset under section 751(a).

[781] Reg. § 1.199A-3(a) provides:

> *In general*. This section provides rules on the determination of a trade or business's qualified business income (QBI), as well as the determination of qualified real estate investment trust (REIT) dividends and qualified publicly traded partnership (PTP) income. The provisions of this section apply solely for purposes of section 199A of the Internal Revenue Code (Code). Paragraph (b) of this section provides rules for the determination of QBI. Paragraph (c) of this section provides rules for the determination of qualified REIT dividends and qualified PTP

In the case of a partnership or S corporation, each partner or shareholder takes into account such person's allocable share of each qualified item of income, gain, deduction, and loss.[782] In the case of an S corporation, an allocable share is the shareholder's pro rata share of an item.[783]

To be a qualified item of "income, gain, deduction, and loss," the item must be a U.S.-source item[784] and "included or allowed in determining taxable income for the taxable year."[785] Reg. § 1.199A-3(b)(2)(i) provides:

> *In general*. The term *qualified items of income, gain, deduction, and loss* means items of gross income, gain, deduction, and loss to the extent such items are -
>
> (A) Effectively connected with the conduct of a trade or business within the United States (within the meaning of section 864(c), determined by substituting "trade or business (within the meaning of Section 199A)" for "nonresident alien individual or a foreign corporation" or for "a foreign corporation" each place it appears); and
>
> (B) Included or allowed in determining taxable income for the taxable year.

See part II.E.1.c.ix QBI and Effectively Connected Income.

In the preamble to the final regulations, T.D. 9847 (2/8/2019), part IV.A.5, "Treatment of Other Deductions," provides:

> Section 199A(c)(1) provides that QBI includes the net amount of qualified items of income, gain, deduction, and loss with respect to any qualified trade or business of the taxpayer. Commenters requested additional guidance on whether certain items constitute qualified items under this provision. Several commenters suggested that deductions for self-employment tax, self-employed health insurance, and certain other retirement plan contribution deductions should not reduce QBI. One commenter reasoned that qualified retirement plan contributions should not reduce QBI because they should not be treated as being associated with a trade or business, consistent with the treatment when calculating net operating losses under section 172(d)(4)(D). The commenter also suggested that while self-employed health insurance is treated as

---

> income. QBI must be determined and reported for each trade or business by the individual or relevant passthrough entity (RPE) that directly conducts the trade or business before applying the aggregation rules of § 1.199A-4.

[782] Code § 199A(f)(1)(A)(ii).

[783] Code § 199A(f)(1)(A) (flush language).

[784] Code § 199A(c)(3)(A)(i) requires the item to be:

> effectively connected with the conduct of a trade or business within the United States (within the meaning of section 864(c), determined by substituting 'qualified trade or business (within the meaning of section 199A)' for 'nonresident alien individual or a foreign corporation' or for 'a foreign corporation' each place it appears)"

Code § 199A(f)(1)(C)(i) provides:

> *In General*. In the case of any taxpayer with qualified business income from sources within the commonwealth of Puerto Rico, if all such income is taxable under section 1 for such taxable year, then for purposes of determining the qualified business income of such taxpayer for such taxable year, the term "United States" shall include the Commonwealth of Puerto Rico.

Reg. §§ 1.199A-1(e)(4) and 1.199A-3(b)(3) reproduce Code § 199A(f)(1)(C)(i) without any significant change.

[785] Code § 199A(c)(3)(A)(ii).

> associated with a trade or business, such expense should likewise not reduce QBI for purposes of simplification in administering the rule. Another commenter suggested that QBI should not be reduced by these expenses because they are personal adjustments. One commenter also requested guidance on whether unreimbursed partnership expenses, the interest expense to acquire partnership and S corporation interests, and state and local taxes reduce QBI.
>
> The Treasury Department and the IRS have not adopted these recommendations because they are inconsistent with the statutory language of Section 199A(c). Whether a deduction is attributable to a trade or business must be determined under the section of the Code governing the deduction. All deductions attributable to a trade or business should be taken into account for purposes of computing QBI except to the extent provided by Section 199A and these regulations. Accordingly, § 1.199A-3(b)(1)(vi) provides that, in general, deductions attributable to a trade or business are taken into account for purposes of computing QBI to the extent that the requirements of Section 199A and § 1.199A-3 are otherwise satisfied. Thus, for purposes of Section 199A, deductions such as the deductible portion of the tax on self-employment income under section 164(f), the self-employed health insurance deduction under section 162(l), and the deduction for contributions to qualified retirement plans under section 404 are considered attributable to a trade or business to the extent that the individual's gross income from the trade or business is taken into account in calculating the allowable deduction, on a proportionate basis. The Treasury Department and the IRS decline to address whether deductions for unreimbursed partnership expenses, the interest expense to acquire partnership and S corporation interests, and state and local taxes are attributable to a trade or business as such guidance is beyond the scope of these regulations.

Reg. § 1.199A-3(b)(1) provides:

> *In general*. For purposes of this section, the term qualified business income or QBI means, for any taxable year, the net amount of qualified items of income, gain, deduction, and loss with respect to any trade or business of the taxpayer as described in paragraph (b)(2) of this section, provided the other requirements of this section and Section 199A are satisfied (including, for example, the exclusion of income not effectively connected with a United States trade or business).
>
> (i) *Section 751 gain*. With respect to a partnership, if section 751(a) or (b) applies, then gain or loss attributable to assets of the partnership giving rise to ordinary income under section 751(a) or (b) is considered attributable to the trades or businesses conducted by the partnership, and is taken into account for purposes of computing QBI.
>
> (ii) *Guaranteed payments for the use of capital*. Income attributable to a guaranteed payment for the use of capital is not considered to be attributable to a trade or business, and thus is not taken into account for purposes of computing QBI except to the extent properly allocable to a trade or business of the recipient. The partnership's deduction associated with the guaranteed payment will be taken into account for purposes of computing QBI if such deduction is properly allocable to the trade or business and is otherwise deductible for Federal income tax purposes.

(iii) *Section 481 adjustments*. Section 481 adjustments (whether positive or negative) are taken into account for purposes of computing QBI to the extent that the requirements of this section and Section 199A are otherwise satisfied, but only if the adjustment arises in taxable years ending after December 31, 2017.[786]

(iv) *Previously disallowed losses*. Generally, previously disallowed losses or deductions (including under sections 465, 469, 704(d), and 1366(d)) allowed in the taxable year are taken into account for purposes of computing QBI. These losses shall be used, for purposes of Section 199A and these regulations, in order from the oldest to the most recent on a first-in, first-out (FIFO) basis. However, losses or deductions that were disallowed, suspended, limited, or carried over from taxable years ending before January 1, 2018 (including under sections 465, 469, 704(d), and 1366(d)), are not taken into account in a later taxable year for purposes of computing QBI.

(v) *Net operating losses*. Generally, a net operating loss deduction under section 172 is not considered with respect to a trade or business and therefore, is not taken into account in computing QBI. However, an excess business loss under section 461(l) is treated as a net operating loss carryover to the following taxable year and is taken into account for purposes of computing QBI in the subsequent taxable year in which it is deducted.

(vi) *Other deductions*. Generally, deductions attributable to a trade or business are taken into account for purposes of computing QBI to the extent that the requirements of Section 199A and this section are otherwise satisfied. For purposes of Section 199A only, deductions such as the deductible portion of the tax on self-employment income under section 164(f), the self-employed health insurance deduction under section 162(l), and the deduction for contributions to qualified retirement plans under section 404 are considered attributable to a trade or business to the extent that the individual's gross income from the trade or business is taken into account in calculating the allowable deduction, on a proportionate basis to the gross income received from the trade or business.

Expenses for all wages paid (or incurred in the case of an accrual method taxpayer) must be taken into account in computing QBI (if the requirements of this section and Section 199A are satisfied) regardless of the application of the W-2 wage limitation described in part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.[787]

---

[786] [my footnote:] T.D. 9847 (2/8/2019), part IV.A.1, "Items Spanning Multiple Tax Years," provides:
Section 1.199A-3(b)(1)(iii) provides that section 481 adjustments (whether positive or negative) are taken into account for purposes of computing QBI to the extent that the requirements of this section and section 199A are otherwise satisfied, but only if the adjustment arises in taxable years ending after December 31, 2017. One commenter suggested that income from installment sales and deferred cancellation of indebtedness income under section 108(i) arising in taxable years ending before January 1, 2018, should not be taken into account for purposes of computing QBI. The commenter also recommended that items deferred under Revenue Procedure 2004-34, 2004-1 C.B. 911 (advanced payments not included in revenue) prior to January 1, 2018, should be included in QBI. The Treasury Department and the IRS continue to study this issue and request additional comments on when items arising in taxable years prior to January 1, 2018, should be taken into account for purposes of computing QBI.

[787] Reg. § 1.199A-3(b)(4).

Comments submitted October 12, 2018 by the American Bar Association's Section on Taxation asserted that Prop. Reg. § 1.199A-3(b)(1)(ii) incorrectly took the position that guaranteed payments for the use of capital (GPUC) are per se not QBI.[788] However, if the government had changed that rule, note that, to the extent that GPUC is viewed as the equivalent of an interest payment,[789] that characterization may disallow part or all of the GPUC.[790]

In the preamble to the final regulations, T.D. 9847 (2/8/2019), part IV.A.6, "Guaranteed Payments for the Use of Capital," responded:

> A few commenters suggested that the rule in the proposed regulations which excludes guaranteed payments for the use of capital under section 707(c) should be removed. Commenters argued that while Section 199A(c)(4) excludes guaranteed payments paid to a partner for services rendered with respect to a trade or business under section 707(a), the statutory language does not likewise exclude guaranteed payments for the use of capital under section 707(c). The commenters argued that Congress drew a line between payments for services and payments for the use of capital when it drafted Section 199A(c) and that even though payments for the use of capital are determined without regard to the partnership's income, that does not mean that they are not attributable to a trade or business. Several commenters stated that contrary to the reasoning in the preamble to the proposed regulations, there is risk involved when making guaranteed payments for the use of capital because the payments do rely to some degree on the partnership's success. Commenters noted that guaranteed payments for the use of capital are generally accepted as part of the partner's

[788] After making several arguments, the comments said (footnotes omitted):

> A plain reading of the statute would indicate Congress's intent to include GPUCs as QBI. There is no provision in section 199A that excludes a guaranteed payment (either for services or for the use of capital) from being a Qualified Item. Although guaranteed payments for services can be Qualified Items, they are specifically excluded from QBI under section 199A(c)(4)(B). Notably, there is no exclusion of GPUCs from QBI. This suggests that a GPUC may be QBI because a guaranteed payment may be a Qualified Item, but a guaranteed payment may not be included in QBI if it is paid with respect to services rendered by the partner to the partnership's trade or business. In fact, if all guaranteed payments failed to be Qualified Items, then section 199A(c)(4)(B) would be superfluous because QBI only includes Qualified Items. The statutory silence with respect to GPUCs could suggest that Congress had no intention to exclude GPUCs from QBI because Congress clearly contemplated guaranteed payments under section 707(c) and chose only to exclude from QBI those guaranteed payments that are made for services rendered with respect to the trade or business.
>
> On balance, there are strong arguments that a GPUC is treated as a partner's distributive share, and therefore as the payee partner's allocable share of the partnership's Qualified Items, for purposes of section 199A. We believe treating a GPUC as a Qualified Item to the extent of a partnership's Qualified Items most furthers the intent of section 199A. Therefore, we recommend that final guidance allow GPUCs under section 707(c) to be a Qualified Item and included in QBI to the extent of the partnership's Qualified Items, determined without regard to the GPUC expense.
>
> If the Final Regulations follow the Proposed Regulations and preclude GPUCs from being included in QBI, then we recommend that the Final Regulations also exclude from QBI any expense related to guaranteed payments for the use of capital. Otherwise, the existence of a GPUC arrangement would reduce (inappropriately, in our view) the section 199A benefit afforded with respect to the QBI of a partnership.

[789] See part II.I.8.d.iii Treatment of Code § 707(c) Guaranteed Payments under Code § 1411.

[790] See part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.

> distributive share from the partnership and taxed as such, and should be included in calculating QBI. Similarly, another commenter generally requested additional guidance for how to determine when a payment to a partner is considered for the use of capital and excluded from the calculation of QBI. Another commenter suggested that if guaranteed payments for the use of capital under section 707(c) are excluded from the calculation of QBI, a partnership's expense related to guaranteed payments for the use of capital also should be excluded from the calculation of QBI. One commenter suggested that to the extent a guaranteed payment for the use of capital is considered akin to interest income on indebtedness, it is generally appropriate to exclude the payment from QBI but noted the significant uncertainty in determining whether an arrangement is a guaranteed payment for the use of capital, a gross income allocation, or something else. The commenter also noted that guaranteed payments for the use of capital are not necessarily akin to interest income.
>
> The Treasury Department and the IRS decline to adopt the comments suggesting that guaranteed payments for the use of capital are generally attributable to a trade or business. Although Section 199A is silent with respect to guaranteed payments for the use of capital, Section 199A does limit the deduction under Section 199A to income from qualified trades or businesses. The Treasury Department and the IRS believe that guaranteed payments for the use of capital are not attributable to the trade or business of the partnership because they are determined without regard to the partnership's income. Consequently, such payments should not generally be considered part of the recipient's QBI. Rather, for purposes of Section 199A, guaranteed payments for the use of capital should be treated in a manner similar to interest income. Interest income other than interest income which is properly allocated to trade or business is specifically excluded from qualified items of income, gain, deduction or loss under Section 199A(c)(3)(B)(iii). One commenter noted that if guaranteed payments are treated like interest income for purposes of Section 199A, and if such payments are properly allocated to a qualified trade or business of the recipient, they should constitute QBI to that recipient in respect of such qualified trade or business. Although, this is an unlikely fact pattern to occur, the Treasury Department and the IRS agree with this comment and the final regulations adopt this comment. Further, guidance under sections 707(a) and 707(c) is beyond the scope of these regulations.

Various items of investment income, including short- or long-term capital gains and losses, are not qualified items. Code § 199A(c)(3)(B), which is reproduced in full in part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.

Code § 199A(d)(1) provides that "qualified trade or business" means any trade or business other than:

> (A) a specified service trade or business, or
>
> (B) the trade or business of performing services as an employee.

Reg. § 1.199A-5(a)(1) effectuates this:

> This section provides guidance on specified service trades or businesses (SSTBs) and the trade or business of performing services as an employee. This paragraph (a) describes the effect of a trade or business being an SSTB and the trade or business of performing services as an employee. Paragraph (b) of this section provides definitional

> guidance on SSTBs. Paragraph (c) of this section provides special rules related to SSTBs. Paragraph (d) of this section provides guidance on the trade or business of performing services as an employee. The provisions of this section apply solely for purposes of Section 199A of the Internal Revenue Code (Code).

See parts II.E.1.c.iv Specified Service Trade or Business and II.E.1.c.ii.(b) Trade or Business of Being an Employee.

II.E.1.c.ii.(b). Trade or Business of Being an Employee (Excluded from QBI)

Code § 199A(d)(1)(B) excludes from a "qualified trade or business" the trade or business of performing services as an employee. Effective dates are in Prop. Reg. § 1.199A-5(e) and Reg. § 1.199A-5(e) in the text following fn 845 in part II.E.1.c.iv.(a) Introduction to Specified Service Trade or Business (SSTB).

Reg. § 1.199A-5(a)(3), "Trade or business of performing services as an employee," provides:

> The trade or business of performing services as an employee is not a trade or business for purposes of Section 199A and the regulations thereunder. Therefore, no items of income, gain, deduction, or loss from the trade or business of performing services as an employee constitute QBI within the meaning of Section 199A and § 1.199A-3. No taxpayer may claim a Section 199A deduction for wage income, regardless of the amount of taxable income.

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), provides in part V.B.:

> **B. Trade or Business of Performing Services as an Employee**
>
> Under section 199(d)(1)(B), the trade or business of performing services as an employee is not a qualified trade or business. Unlike an SSTB, there is no threshold amount that applies to the trade or business of performing services as an employee. Thus, wage or compensation income earned by any employee is not eligible for the Section 199A deduction no matter the amount.
>
> **1. Definition**
>
> An individual is an employee for Federal employment tax purposes if he or she has the status of an employee under the usual common law and statutory rules applicable in determining the employer-employee relationship. Guides for determining employment status are found in §§ 31.3121(d)-1, 31.3306 (i)-1, and 31.3401(c)-1. As stated in the regulations, generally, the common law relationship of employer and employee exists when the person for whom the services are performed has the right to direct and control the individual who performs the services, not only as to the result to be accomplished by the work but also as to the details and means by which that result is accomplished. That is, an employee is subject to the direction and control of the employer not only as to what shall be done but how it shall be done. In this connection it is not necessary that the employer actually direct or control the manner in which the services are performed; it is sufficient if he or she has the right to do so.

In addition, the regulations and section 3401(c) state, generally, that an officer of a corporation (including an S corporation) is an employee of the corporation. However, an officer of a corporation who does not perform any services or performs only minor services in his or her capacity as officer and who neither receives nor is entitled to receive, directly or indirectly, any remuneration is not considered to be an employee of the corporation. Whether an officer's services are minor is a question of fact that depends on the nature of the services, the frequency and duration of their performance, and the actual and potential importance or necessity of the services in relation to the conduct of the corporation's business. See Rev. Rul. 74-390.

To provide clarity, proposed § 1.199A-5(d) provides a general rule that income from the trade or business of performing services as an employee refers to all wages (within the meaning of section 3401(a)) and other income earned in a capacity as an employee, including payments described in § 1.6041-2(a)(1) (other than payments to individuals described in section 3121(d)(3)) and § 1.6041-2(b)(1). If an individual derives income in the course of a trade or business that is not described in section 3401(a), § 1.6041-2(a)(1) (other than payments to individuals described in section 3121(d)(3)), or § 1.6041-2(b)(1), that individual is not considered to be in the trade or business of performing services as an employee with regard to such income.

2. Presumption for Former Employees

Section 199A provides that the trade or business of providing services as an employee is not eligible for the Section 199A deduction. Therefore, taxpayers and practitioners noted that it may be beneficial for employees to treat themselves as independent contractors or as having an equity interest in a partnership or S corporation in order to benefit from the deduction under Section 199A.

Section 530(b) of the Revenue Act of 1978 (Pub. L. 95-600), as amended by section 9(d)(2) of Public Law 96-167, section 1(a) of Public Law 96-541, and section 269(c) of Public Law 97-248, provides a prohibition against regulations and rulings on employment status for purposes of employment taxes. Specifically, section 530(b) provides that no regulation or revenue ruling shall be published before the effective date of any law clarifying the employment status of individuals for purposes of the employment taxes by the Treasury Department (including the IRS) with respect to the employment status of any individual for purposes of the employment taxes. Section 530(c) of the Revenue Act of 1978 provides that, for purposes of section 530, the term 'employment tax' means any tax imposed by subtitle C of the Internal Revenue Code of 1954, and the term 'employment status' means the status of an individual, under the usual common law rules applicable in determining the employer-employee relationship as an employee or as an independent contractor (or other individual who is not an employee). These longstanding rules of section 530 of the Revenue Act of 1978 limit the ability of the IRS to impose employment tax liability on employers for misclassifying employees as independent contractors but do not preclude challenging a worker's status for purposes of Section 199A, an income tax provision under subtitle A of the Code.

Therefore, proposed § 1.199A-5(d)(3) provides that for purposes of Section 199A, if an employer improperly treats an employee as an independent contractor or other non-employee, the improperly classified employee is in the trade or business of performing services as an employee notwithstanding the employer's improper classification. This issue is particularly important in the case of individuals who cease being treated as employees of an employer, but subsequently provide substantially the same services to the employer (or a related entity) but claim to do so in a capacity other than as an employee. However, it would not be appropriate to provide that someone who formerly was an employee of an employer is now 'less likely' to be respected as an independent contractor. Such a rule would not treat similarly-situated taxpayers similarly: two individuals who have a similar relationship with a company and each claim to be treated as independent contractors would be treated differently depending on any prior employment history with the company. Therefore, proposed § 1.199A-5(d)(3) does not provide any new or different standards to be properly classified as an independent contractor or owner of a business. Instead, proposed § 1.199A-5(d)(3) contains a presumption that applies in certain situations to ensure that individuals properly substantiate their status.

> Specifically, proposed § 1.199A-5(d)(3) provides that, solely for purposes of Section 199A(d)(1)(B) and the regulations thereunder, an individual who was treated as an employee for Federal employment tax purposes by the person to whom he or she provided services, and who is subsequently treated as other than an employee by such person with regard to the provision of substantially the same services directly or indirectly to the person (or a related person), is presumed to be in the trade or business of performing services as an employee with regard to such services. This presumption may be rebutted only upon a showing by the individual that, under Federal tax rules, regulations, and principles (including common-law employee classification rules), the individual is performing services in a capacity other than as an employee. This presumption applies regardless of whether the individual provides services directly or indirectly through an entity or entities. This presumption is solely for purposes of Section 199A and does not otherwise change the employment tax classification of the individual. Section 199A is in subtitle A of the Code, and this rule does not apply for purposes of any other subtitle, including subtitle C. Accordingly, this rule does not implicate section 530(b) of the Revenue Act of 1978. Proposed § 1.199A-5(d)(3)(ii) contains three examples illustrating this rule.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.E, "Trade or Business of Performing Services as an Employee," explains:

> Multiple commenters expressed support for the rule in the proposed regulations that provides that an individual who was previously treated as an employee and is subsequently treated as other than an employee while performing substantially the same services to the same person, or a related person, will be presumed to be in the trade or business of performing services as an employee for purposes of Section 199A. The commenters noted that the presumption furthers the public policy goal of preventing worker misclassification, preserves agency resources, and prevents a decline in Federal and state tax revenues. The commenters also state that regulations should not incentivize workers to accept misclassification by their employer in order to obtain a tax benefit.

> Other commenters recommended that the presumption be removed arguing that the common law test under current law is sufficient for determining whether a former employee is properly classified as an employee and that the presumption would impede the objective of ensuring similar treatment of similarly situated taxpayers because two similarly situated taxpayers who provide services to the same company would be treated

differently if one was a former employee of the company and the other was not. The commenter also notes that the presumption would create uncertainty for taxpayers and would cause former employees to not claim the deduction in order to avoid a dispute with the IRS.

Another commenter expressed concern that the presumption as written in the proposed regulations could create a dual standard for worker classification under the Code, in which a worker could be classified as an independent contractor for employment tax purposes, and an employee for purposes of claiming Section 199A deduction. This could result in an independent contractor being held liable for self-employment taxes and unable to claim the Section 199A deduction on income that would otherwise qualify as QBI. The commenter suggested that if the presumption is retained, it should include an exemption for certain independent contractors based on factors including income, source of income, industry practice, and timeframe.

A different commenter suggested that the presumption should provide that an independent contractor is operating as such and that it is up to the relevant Federal agencies to determine whether the business misclassified the individual. The commenter also noted that the IRS is barred from issuing regulations with respect to the employment status of any individual for employment tax purposes under Section 530(b) of the Revenue Act of 1978 (Pub. L. 95-600), as amended by section 9(d)(2) of Public Law 96-167, section 1(a) of Public Law 96-541, and section 269(c) of Public Law 97-248, and that the presumption could result in an individual otherwise subject to self-employment tax to not get the benefit of the Section 199A deduction. Another commenter argued that an employee who changes his status from employee to independent contractor so he may deduct business expenses on Schedule C and claim a Section 199A deduction is exercising his right to structure his business transactions to minimize his tax liability.

Another commenter questioned how the rule would be applied, asking for clarification on whether the rule is intended to prohibit employers from firing employees and rehiring them as independent contractors; whether it applies to former employees regardless of current relationship; and how far the IRS would look back at prior employees. Another commenter suggested that a new example be added to the final regulations demonstrating that the presumption is inapplicable when the facts demonstrate that a service recipient and a service provider have materially modified their relationship such that its proper classification is that of a service recipient and a partner.

The Treasury Department and the IRS believe that the presumption is necessary to prevent misclassifications but agree that some clarification of the presumption is necessary. In accordance with commenter’s suggestions, the final regulations provide a three-year look back rule for purposes of the presumption. The final regulations provide that an individual may rebut the presumption by showing records, such as contracts or partnership agreements, that are sufficient to corroborate the individual’s status as a non-employee for three years from the date a person ceases to treat the individual as an employee for Federal employment taxes. Finally, the final regulations contain an additional example demonstrating the application of the presumption for the situation in which an employee has materially modified his relationship with his employer such that the employee can successfully rebut the presumption.

Reg. § 1.199A-5(d), “Trade or business of performing services as an employee,” provides:

(1) *In general*. The trade or business of performing services as an employee is not a trade or business for purposes of Section 199A and the regulations thereunder. Therefore, no items of income, gain, deduction, and loss from the trade or business of performing services as an employee constitute QBI within the meaning of Section 199A and § 1.199A-3. Except as provided in paragraph (d)(3) of this section, income from the trade or business of performing services as an employee refers to all wages (within the meaning of section 3401(a)) and other income earned in a capacity as an employee, including payments described in § 1.6041-2(a)(1) (other than payments to individuals described in section 3121(d)(3)) and § 1.6041-2(b)(1).

(2) *Employer’s Federal employment tax classification of employee immaterial*. For purposes of determining whether wages are earned in a capacity as an employee as provided in paragraph (d)(1) of this section, the treatment of an employee by an employer as anything other than an employee for Federal employment tax purposes is immaterial. Thus, if a worker should be properly classified as an employee, it is of no consequence that the employee is treated as a non-employee by the employer for Federal employment tax purposes.

(3) *Presumption that former employees are still employees*.

(i) *Presumption*. Solely for purposes of Section 199A(d)(1)(B) and paragraph (d)(1) of this section, an individual that was properly treated as an employee for Federal employment tax purposes by the person to which he or she provided services and who is subsequently treated as other than an employee by such person with regard to the provision of substantially the same services directly or indirectly to the person (or a related person), is presumed, for three years after ceasing to be treated as an employee for Federal employment tax purposes, to be in the trade or business of performing services as an employee with regard to such services. As provided in paragraph (d)(3)(ii) of this section, this presumption may be rebutted upon a showing by the individual that, under Federal tax law, regulations, and principles (including common-law employee classification rules), the individual is performing services in a capacity other than as an employee. This presumption applies regardless of whether the individual provides services directly or indirectly through an entity or entities.

(ii) *Rebuttal of presumption*. Upon notice from the IRS, an individual rebuts the presumption in paragraph (d)(3)(i) of this section by providing records, such as contracts or partnership agreements, that provide sufficient evidence to corroborate the individual’s status as a non-employee.

(iii) *Examples*. The following examples illustrate the provision of paragraph (d)(3) of this section. Unless otherwise provided, the individual in each example has taxable income in excess of the threshold amount.

(A) *Example 1.* A is employed by PRS, a partnership for Federal tax purposes, as a fulltime employee and is treated as such for Federal employment tax purposes. A quits his job for PRS and enters into a contract with PRS under which A provides substantially the same services that A previously provided to PRS in A's capacity as an employee. Because A was treated as an employee for services he provided to PRS, and now is no longer treated as an employee with regard to such services, A is presumed (solely for purposes of Section 199A(d)(1)(B) and paragraphs (a)(3) and (d) of this section) to be in the trade or business of performing services as an employee with regard to his services performed for PRS. Unless the presumption is rebutted with a showing that, under Federal tax law, regulations, and principles (including the common-law employee classification rules), A is not an employee, any amounts paid by PRS to A with respect to such services will not be QBI for purposes of Section 199A. The presumption would apply even if, instead of contracting directly with PRS, A formed a disregarded entity, or a passthrough entity, and the entity entered into the contract with PRS.

(B) *Example 2*. C is an attorney employed as an associate in a law firm (Law Firm 1) and was treated as such for Federal employment tax purposes. C and the other associates in Law Firm 1 have taxable income below the threshold amount. Law Firm 1 terminates its employment relationship with C and its other associates. C and the other former associates form a new partnership, Law Firm 2, which contracts to perform legal services for Law Firm 1. Therefore, in form, C is now a partner in Law Firm 2 which earns income from providing legal services to Law Firm 1. C continues to provide substantially the same legal services to Law Firm 1 and its clients. Because C was previously treated as an employee for services she provided to Law Firm 1, and now is no longer treated as an employee with regard to such services, C is presumed (solely for purposes of Section 199A(d)(1)(B) and paragraphs (a)(3) and (d) of this section) to be in the trade or business of performing services as an employee with respect to the services C provides to Law Firm 1 indirectly through Law Firm 2. Unless the presumption is rebutted with a showing that, under Federal tax law, regulations, and principles (including common-law employee classification rules), C's distributive share of Law Firm 2 income (including any guaranteed payments) will not be QBI for purposes of Section 199A. The results in this example would not change if, instead of contracting with Law Firm 1, Law Firm 2 was instead admitted as a partner in Law Firm 1.

(C) *Example 3*. E is an engineer employed as a senior project engineer in an engineering firm, Engineering Firm. Engineering Firm is a partnership for Federal tax purposes and structured such that after 10 years, senior project engineers are considered for partner if certain career milestones are met. After 10 years, E meets those career milestones and is admitted as a partner in Engineering Firm. As a partner in Engineering Firm, E shares in the net profits of Engineering Firm, and also otherwise satisfies the requirements under Federal tax law, regulations, and principles (including common-law employee classification rules) to be respected as a partner. E is presumed (solely for purposes of Section 199A(d)(1)(B) and paragraphs (a)(3) and (d) of this section) to be in the trade or business of performing services as an employee with respect to the services E provides to Engineering Firm. However, E is able to rebut the presumption by showing that E became a partner in Engineering Firm as a career milestone, shares in the overall net profits in Engineering Firm, and otherwise satisfies the requirements under

Federal tax law, regulations, and principles (including common-law employee classification rules) to be respected as a partner.

(D) *Example 4*. F is a financial advisor employed by a financial advisory firm, Advisory Firm, a partnership for Federal tax purposes, as a fulltime employee and is treated as such for Federal employment tax purposes. F has taxable income below the threshold amount. Advisory Firm is a partnership and offers F the opportunity to be admitted as a partner. F elects to be admitted as a partner to Advisory Firm and is admitted as a partner to Advisory Firm. As a partner in Advisory Firm, F shares in the net profits of Advisory Firm, is obligated to Advisory Firm in ways that F was not previously obligated as an employee, is no longer entitled to certain benefits available only to employees of Advisory Firm, and has materially modified his relationship with Advisory Firm. F's share of net profits is not subject to a floor or capped at a dollar amount. F is presumed (solely for purposes of Section 199A(d)(1)(B) and paragraphs (a)(3) and (d) of this section) to be in the trade or business of performing services as an employee with respect to the services F provides to Advisory Firm. However, F is able to rebut the presumption by showing that F became a partner in Advisory Firm by sharing in the profits of Advisory Firm, materially modifying F's relationship with Advisory Firm, and otherwise satisfying the requirements under Federal tax law, regulations, and principles (including common-law employee classification rules) to be respected as a partner.

The closing parenthetical to Reg. § 1.199A-5(d)(1) refers to statutory employees under Code § 3121(d)(3) as not being in the trade or business of being an employee. Code § 3121(d)(3) is reproduced in the text preceding fn 889 in part II.E.1.c.vi.(a) W-2 wages under Code § 199A.

II.E.1.c.ii.(c). Items Excluded from Treatment as Qualified Business Income Under Code § 199A

Various items of investment income, including short- or long-term capital gains and losses, are not qualified items. Code § 199A(c)(3)(B) lists those nonqualified items, originally providing:

> *Exceptions*. The following investment items shall not be taken into account as a qualified item of income, gain, deduction, or loss:
>
> (i) Any item of short-term capital gain, short-term capital loss, long-term capital gain, or long-term capital loss.
>
> (ii) Any dividend, income equivalent to a dividend, or payment in lieu of dividends described in section 954(c)(1)(G).[791]
>
> (iii) Any interest income other than interest income which is properly allocable to a trade or business.

[791] [My footnote – not from the statute:] Code § 954(c)(1)(G) refers to "payments in lieu of dividends which are made pursuant to an agreement to which" Code § 1058 applies. See part II.A.1.d.i Code § 1058 Loan of Securities.

(iv) Any item of gain or loss described in subparagraph (c) or (D) of section 954(c)(1) (applied by substituting "qualified trade or business" for "controlled foreign corporation").

(v) Any item of income, gain, deduction, or loss taken into account under section 954(c)(1)(F) (determined without regard to clause (ii) thereof and other than items attributable to notional principal contracts entered into in transactions qualifying under section 1221(a)(7)).[792]

(vi) Any amount received from an annuity which is not received in connection with the trade or business.

(vii) Any item of deduction or loss properly allocable to an amount described in any of the preceding clauses.

The Senate report said that the statute excludes "specified investment-related income" such as "any item taken into account in determining net long-term capital gain or net long-term capital loss:"[793]

---

[792] [My footnote – not from the statute:] Code § 954(c)(1)(F)(i) provides that foreign personal holding company income" includes the portion of the gross income which consists of "net income from notional principal contracts." Code § 1221(a)(7) provides that "capital asset" does not include:

> any hedging transaction which is clearly identified as such before the close of the day on which it was acquired, originated, or entered into (or such other time as the Secretary may by regulations prescribe)…

Code § 1221(b)(2)(a) provides that "hedging transaction" is "any transaction entered into by the taxpayer in the normal course of the taxpayer's trade or business primarily:"

(i) to manage risk of price changes or currency fluctuations with respect to ordinary property which is held or to be held by the taxpayer,
(ii) to manage risk of interest rate or price changes or currency fluctuations with respect to borrowings made or to be made, or ordinary obligations incurred or to be incurred, by the taxpayer, or
(iii) to manage such other risks as the Secretary may prescribe in regulations.

[793] The Senate report said:

> *Treatment of investment income*
>
> Qualified items do not include specified investment-related income, deductions, or loss. Specifically, qualified items of income, gain, deduction and loss do not include (1) any item taken into account in determining net long-term capital gain or net long-term capital loss, (2) dividends, income equivalent to a dividend, or payments in lieu of dividends, (3) interest income other than that which is properly allocable to a trade or business, (4) the excess of gain over loss from commodities transactions, other than those entered into in the normal course of the trade or business or with respect to stock in trade or property held primarily for sale to customers in the ordinary course of the trade or business, property used in the trade or business, or supplies regularly used or consumed in the trade or business, (5) the excess of foreign currency gains over foreign currency losses from section 988 transactions, other than transactions directly related to the business needs of the business activity, (6) net income from notional principal contracts, other than clearly identified hedging transactions that are treated as ordinary (*i.e.*, not treated as capital assets), and (7) any amount received from an annuity that is not used in the trade or business of the business activity. Qualified items under this provision do not include any item of deduction or loss properly allocable to such income.

However, the Consolidated Appropriations Act, 2018 amended Code § 199A(c)(3)(B) to delete "investment," clarifying that an item does not have to be derived from an "investment" to be excluded from QBI.

Code § 199A(c)(4) provides that QBI does not include:

(A) reasonable compensation paid to the taxpayer by any qualified trade or business of the taxpayer for services rendered with respect to the trade or business,

(B) any guaranteed payment described in section 707(c) paid to a partner for services rendered with respect to the trade or business, and

(C) to the extent provided in regulations, any payment described in section 707(a) to a partner for services rendered with respect to the trade or business.

The Senate report made it apparent that subparagraph (A) was aimed at reasonable compensation paid by an S corporation. Thus, the reasonable compensation exception means that wages paid to an owner-employee of an S corporation are not themselves QBI. See also part II.E.1.c.ii.(b) Trade or Business of Being an Employee (Excluded from QBI). However, those wages would increase the QBI-related deduction to the extent that the wage limitation is a concern.[794]

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), provides:

vii. Exclusion from QBI for certain items

a. Treatment of section 1231 gains and losses

Section 199A(c)(3)(B)(i) provides that QBI does not include any item of short-term capital gain, short-term capital loss, long-term capital gain, or long-term capital loss. The Treasury Department and the IRS have received comments requesting guidance on the extent to which gains and losses subject to section 1231 may be taken into account in calculating QBI. Section 1231 provides rules under which gains and losses from certain involuntary conversions and the sale of certain property used in a trade or business are either treated as long-term capital gains or long-term capital losses, or not treated as gains and losses from sales or exchanges of capital assets.

Section 199A(c)(3)(B)(i) excludes capital gains or losses, regardless of whether those items arise from the sale or exchange of a capital asset. The legislative history of Section 199A provides that QBI does not include any item taken into account in determining net long-term capital gain or net long-term capital loss. Conference Report page 30. Accordingly, proposed § 1.199A-3(b)(2)(ii)(A) clarifies that, to the extent gain or loss is treated as capital gain or loss, it is not included in QBI. Specifically, if gain or loss is treated as capital gain or loss under section 1231, it is not QBI. Conversely, if section 1231 provides that gains or losses are not treated as gains and losses from sales or exchanges of capital assets, Section 199A(c)(3)(B)(i) does not apply and thus, the gains or losses must be included in QBI (provided all other requirements are met).

[794] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds, the impact of which may be reduced or eliminated under part II.E.1.c.v.(a) Taxable Income "Threshold.

b. Interest Income.

Section 199A(c)(4)(C) provides that QBI does not include any interest income other than interest income that is properly allocable to a trade or business. The Treasury Department and the IRS believe that interest income received on working capital, reserves, and similar accounts is not properly allocable to a trade or business, and therefore should not be included in QBI, because such interest income, although held by a trade or business, is simply income from assets held for investment. Accordingly, proposed § 1.199A-3(b)(2)(ii)(C) provides that interest income received on working capital, reserves, and similar accounts is not properly allocable to a trade or business. In contrast, interest income received on accounts or notes receivable for services or goods provided by the trade or business is not income from assets held for investment, but income received on assets acquired in the ordinary course of trade or business.

c. Reasonable compensation

Section 199A(c)(4)(A) provides that QBI does not include "reasonable compensation paid to the taxpayer by any qualified trade or business of the taxpayer for services rendered with respect to the trade or business." Similarly, guaranteed payments for services under section 707(c) are excluded from QBI. The phrase "reasonable compensation" is a well-known standard in the context of S corporations. Under Rev. Rul. 74-44, 1974-1 C.B. 287, S corporations must pay shareholder-employees "reasonable compensation for services performed" prior to making "dividend" distributions with respect to shareholder-employees' stock in the S corporation under section 1368. See also *David E. Watson, P.C. v. United States*, 668 F.3d 1008, 1017 (8th Cir. 2012). The legislative history of Section 199A confirms that the reasonable compensation rule was intended to apply to S corporations.

The Treasury Department and the IRS have received requests for guidance on whether the phrase "reasonable compensation" within the meaning of Section 199A extends beyond the context of S corporations for purposes of Section 199A. The Treasury Department and the IRS believe "reasonable compensation" is best read as limited to the context from which it derives: compensation of S corporation shareholders-employees. If reasonable compensation were to apply outside of the context of S corporations, a partnership could be required to apply the concept of reasonable compensation to its partners, regardless of whether amounts paid to partners were guaranteed. Such a result would violate the principle set forth in Rev. Rul. 69-184, 1969-1 CB 256, that a partner of a partnership cannot be an employee of that partnership.[795] There is no indication that Congress intended to change this long-standing Federal income tax principle. Accordingly, proposed § 1.199A-3(b)(2)(ii)(H) provides that QBI does not include reasonable compensation paid by an S corporation but does not extend this rule to partnerships. Because the trade or business of performing services as an employee is not a qualified trade or business under Section 199A(d)(1)(B), wage income received by an employee is never QBI. The rule for reasonable compensation is merely a clarification that, even if an S corporation fails to pay a reasonable wage to its shareholder-employees, the shareholder-employees are

[795] [My footnote:] For using a tiered partnership structure to enable a partner's salary-type compensation to be reported on Form W-2, see text accompanying and flowchart following fn 556 in part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

nonetheless prevented from including an amount equal to reasonable compensation in QBI.

d. Guaranteed payments

Section 199A(c)(4)(B) provides that QBI does not include any guaranteed payment described in section 707(c) paid by a partnership to a partner for services rendered with respect to the trade or business. Proposed § 1.199A-3(b)(2)(ii)(I) restates this statutory rule and clarifies that the partnership's deduction for such guaranteed payment is an item of QBI if it is properly allocable to the partnership's trade or business and is otherwise deductible for Federal income tax purposes. It may be unclear whether a guaranteed payment to an upper-tier partnership for services performed for a lower-tier partnership is QBI for the individual partners of the upper-tier partnership if the upper-tier partnership does not itself make a guaranteed payment to its partners.
Section 199A(c)(4)(B) does not limit the term "partner" to an individual. Consequently, for purposes of the guaranteed payment rule, a partner may be an RPE. Accordingly, proposed § 1.199A-3(b)(2)(ii)(I) clarifies that QBI does not include any guaranteed payment described in section 707(c) paid to a partner for services rendered with respect to the trade or business, regardless of whether the partner is an individual or an RPE. Therefore, for the purposes of this rule, a guaranteed payment paid by a lower-tier partnership to an upper-tier partnership retains its character as a guaranteed payment and is not included in QBI of a partner of the upper-tier partnership regardless of whether it is guaranteed to the ultimate recipient.

e. Section 707(a) payments

Section 199A(c)(4)(C) provides that QBI does not include, to the extent provided in regulations, any payment described in section 707(a) to a partner for services rendered with respect to the trade or business. Section 707(a) addresses arrangements in which a partner engages with the partnership other than in its capacity as a partner. Within the context of Section 199A, payments under section 707(a) for services are similar to, and therefore, should be treated similarly as, guaranteed payments, reasonable compensation, and wages, none of which is includable in QBI. In addition, consistent with the tiered partnership rule for guaranteed payments described previously, to the extent an upper-tier RPE receives a section 707(a) payment, that income should not constitute QBI to the partners of the upper-tier entity. Accordingly, proposed § 1.199A-3(b)(2)(ii)(J) provides that QBI does not include any payment described in section 707(a) to a partner for services rendered with respect to the trade or business, regardless of whether the partner is an individual or an RPE. The Treasury Department and the IRS request comments on whether there are situations in which it is appropriate to include section 707(a) payments in QBI.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part IV.A.9, "Reasonable Compensation," declined to provide additional regulatory guidance regarding S corporation shareholder-employees' compensation and Code § 199A:

The preamble to the final regulations, T.D. 9847 (2/8/2019), part IV.A.10, "Items Treated as Capital Gain or Loss," explains:

The proposed regulations provide that any item of short-term capital gain, short-term capital loss, long-term capital gain, or long-term capital loss, including any item treated as one of such items, such as gains or losses under section 1231, that are treated as capital gains or losses, are not taken into account as a qualified item of income, gain, deduction, or loss in computing QBI.

Several commenters suggested that many technical complications arise from the exclusion of section 1231 gain from QBI. Specifically, commenters noted that whether a taxpayer has long-term capital gain or loss under section 1231 is determined at the taxpayer level and not at the level of the various trades or businesses for which QBI is being determined. For example, if a taxpayer has two businesses, the taxpayer may have section 1231 gains in one trade or business and section 1231 losses in the other trade or business. One commenter suggested that both section 1231 gains and losses be included in the calculation of QBI regardless of whether they result in a capital or ordinary amount when combined at the taxpayer level. The commenter asserts that this approach would not affect the overall limitation that restricts a taxpayer's deduction to 20 percent of the excess of taxable income over net capital gain.

Another potential complication noted by commenters is the section 1231(c) recapture rule. Under the rule, a taxpayer that has a section 1231 capital gain in the current year must look back to any section 1231 ordinary loss taken in the previous five years and convert a portion of the current year section 1231 capital gain to ordinary gain, based on the previous losses taken. One commenter asked for further guidance on how to allocate ordinary gains and losses that may result from the section 1231 calculation to multiple trades or businesses. While the Treasury Department and the IRS recognize the complexity in applying the section 1231(c) recapture rules and allocating gain to multiple trades or businesses, providing additional guidance with respect to section 1231(c) is beyond the scope of these regulations. For purposes of determining whether ordinary income is included in QBI, taxpayers should apply the section 1231(c) recapture rules in the same manner as they would otherwise. Notice 97-59, 1997-2 C.B. 309, provides guidance on netting capital gains and losses and how that netting incorporates the section 1231(c) recapture rule.

Given the specific reference to section 1231 gain in the proposed regulations, other commenters requested guidance with respect to whether gain or loss under other provisions of the Code would be included in QBI. One commenter asked for clarification about whether real estate gain, which is taxed at a preferential rate, is included in QBI. Additionally, other commenters requested clarification regarding whether items treated as ordinary income, such as gain under sections 475, 1245, and 1250, are included in QBI.

To avoid any unintended inferences, the final regulations remove the specific reference to section 1231 and provide that any item of short-term capital gain, short-term capital loss, long-term capital gain, or long-term capital loss, including any item treated as one of such items under any other provision of the Code, is not taken into account as a qualified item of income, gain, deduction, or loss. To the extent an item is not treated as an item of capital gain or capital loss under any other provision of the Code, it is taken into account as a qualified item of income, gain, deduction, or loss unless otherwise excluded by Section 199A or these regulations.

Similarly, another commenter requested clarification regarding whether income from foreign currencies and notional principal contracts are excluded from QBI if they are ordinary income. Section 199A(c)(3)(B)(iv) and § 1.199A-3(b)(2)(ii)(D) provide that any item of gain or loss described in section 954(c)(1)(C) (transactions in commodities) or section 954(c)(1)(D) (excess foreign currency gains) is not included as a qualified item of income, gain, deduction, or loss. Section 199A(c)(3)(B)(v) and § 1.199A-3(b)(2)(ii)(E) provide any item of income, gain, deduction, or loss described in section 954(c)(1)(F) (income from notional principal contracts) determined without regard to section 954(c)(1)(F)(ii) and other than items attributable to notional principal contracts entered into in transactions qualifying under section 1221(a)(7) is not included as a qualified item of income, gain, deduction, or loss. The statutory language does not provide for the ability to permit an exception to these rules based on the character of the income. Accordingly, income from foreign currencies and notional principal contracts described in the listed sections is excluded from QBI, regardless of whether it is ordinary income.

Odom, "QBI deduction: Interaction with various Code provisions," *The Tax Advise*r (12/1/2020), comments:

QBI and Sec. 1231

Under Sec. 1231, a netting process must be used to determine the nature of the income or loss. Gains and losses from all activities, including publicly traded partnerships (PTPs), must be netted to determine if there is a net Sec. 1231 gain or a net Sec. 1231 loss. The preamble to the Sec. 199A regulations makes clear that:

- Net unrecaptured Sec. 1231 gain is characterized as long-term capital gain and is excluded from QBI;

- Net Sec. 1231 loss is characterized as ordinary loss and is included in QBI; and

- The character then tracks back to the trade or business that disposed of the assets (T.D. 9847).

If the net Sec. 1231 loss stems from multiple activities, then the loss would need to be allocated pro rata to each activity to determine the QBI for each activity.

How is Sec. 1231(c) recapture handled? Sec. 1231(c) recapture occurs when ordinary losses have been claimed in the five prior years and there is Sec. 1231 gain in the current year. The gain is converted from capital gain to ordinary gain to the extent of unrecaptured losses. Ordinary gain or loss under Sec. 1231 is included in QBI. The preamble to the Sec. 199A regulations states that applying Sec. 1231(c) recapture rules and allocating gain to multiple activities is beyond the scope of those regulations and that taxpayers should apply the Sec. 1231(c) recapture rules in the same manner as they would otherwise (T.D. 9847).

A reasonable position would be to treat these losses like the regulations treat carryover losses from years prior to 2018, which is to apply them on a first-in, first-out (FIFO) basis. Therefore, to the extent the recaptured income is from years prior to 2018, the income would be excluded from QBI. Because this income must be used to determine the QBI of specific activities, then the unrecaptured Sec. 1231(c) amounts should be allocated pro rata and tracked by year and by activity. Another, more taxpayer-friendly position is to include the current-year ordinary gain in current-year QBI since the gain originated in the current year, unlike suspended losses that originated in pre-2018 years.

> Sec. 1231(c) simply changes the character of the gain; it does not work to allow a previously unrecognized item from a prior year to be recognized in the current year.

As the preamble summarizes in the section explaining economic impact:[796]

> Because guaranteed payments for capital, for example, are not at risk in the same way as other forms of income, it would generally be economically efficient to exclude them from QBI. Similarly, the Treasury Department and the IRS proposes that income that is a guaranteed payment, but which is filtered through a tiered partnership in order to avoid being labeled as such, should be treated similarly to guaranteed payments in general and therefore excluded from QBI. This principle applies to other forms of income that similarly represent income that either is not at risk or does not flow from the specific economic value provided by a qualifying trade or business, such as returns on investments of working capital.

The preamble explaining economic impact continued:[797]

> For example, § 1.199A-3 will discourage the creation of tiered partnerships purely for the purposes of increasing the Section 199A deduction. In the absence of regulation, some taxpayers would likely create tiered partnerships under which a lower-tier partnership would make a guaranteed payment to an upper-tier partnership, and the upper-tier partnership would pay out this income to its partners without guaranteeing it. Such an organizational structure would likely be economically inefficient because it was, apparently, created solely for tax minimization purposes and not for reasons related to efficient economic decision-making.

In the preamble to the final regulations, T.D. 9847 (2/8/2019), part IV.A.7, "Section 707(a) Payments for Services," said:

> The proposed regulations provide that any payment described in section 707(a) received by a partner for services rendered with respect to a trade or business, regardless of whether the partner is an individual or an RPE, is excluded from QBI. A number of commenters suggested that payments to partners in exchange for services provided to the partnership under section 707(a) should not be excluded from QBI and others suggested a narrowing of the rule for certain circumstances. Some commenters suggested that the payments should be QBI when the arrangement is structured as it would be with a third-party. Many commenters argued that section 707(a) payments should be QBI when the partner who is providing services has its own business separate from that of the partnership. On a related note, one commenter suggested payments for services should be QBI when the services provided are a different business from that of the partnership. Other commenters further suggested that payments should be QBI when the partner is not primarily providing services solely to one partnership. One commenter suggested that the rule excluding section 707(a) payments from QBI should be narrowed to apply only in the context of SSTBs or if the payments would be considered wages by the partner, but that generally payments from the partner's

[796] T.D. 9847 (2/8/2019), Special Analyses, part I, "Regulatory Planning and Review – Economic Analysis," subpart E [F?], "Economic Analysis of § 1.199A-3," paragraph 1, "Background."
[797] T.D. 9847 (2/8/2019), Special Analyses, part I, "Regulatory Planning and Review – Economic Analysis," subpart E [F?], "Economic Analysis of § 1.199A-3," paragraph 2, "Anticipated benefits of § 1.199A-3."

> qualified trade or business should be QBI. One commenter suggested that the regulations excluding section 707(a) payments from QBI be applied only to individuals and RPEs that are either (i) not otherwise engaged in a trade or business of providing similar services to other consumers or (ii) whose ownership interests in the partnership exceed a de minimis amount. Another commenter suggested that the exclusion of section 707(a) payments be replaced with a narrowly tailored anti-abuse rule that would exclude from QBI section 707(a) payments (i) paid to a partner owning more than 50 percent of the capital or profits interests in the partnership and (ii) designed with a primary purpose of causing income that would not otherwise have qualified as QBI to be treated as QBI.
>
> The Treasury Department and the IRS decline to adopt these recommendations. As stated in the preamble to the proposed regulations, payments under section 707(a) for services are similar to guaranteed payments, reasonable compensation, and wages, none of which are includable in QBI. Thus, treating section 707(a) payments received by a partner for services rendered to a partnership as QBI would be inconsistent with the statute. Further, as noted by one commenter, it is difficult to distinguish between payments under section 707(c) and payments under section 707(a). Therefore, creating such a distinction would be difficult for both taxpayers and the IRS to administer.
>
> Section 1.199A-3(b)(2) of the proposed regulations addresses items that are not taken into account as qualified items of income, gain, deduction, or loss, and includes all of the items listed in both Section 199A(c)(3) (exceptions from qualified items of income, gain, deduction, and loss) and Section 199A(c)(4) (treatment of reasonable compensation and guaranteed payments). As suggested by one commenter, the final regulations clarify that amounts received by an S corporation shareholder as reasonable compensation or by a partner as a payment for services under sections 707(a) or 707(c) are not taken into account as qualified items of income, gain, deduction, or loss, and thus are excluded from QBI.

Reg. § 1.199A-3(b)(2)(ii), "Items not taken into account," provides:

> Notwithstanding paragraph (b)(2)(i) of this section and in accordance with Section 199A(c)(3)(B) and (c)(4), the following items are not taken into account as qualified items of income, gain, deduction, or loss and thus are not included in determining QBI:
>
> (A) Any item of short-term capital gain, short-term capital loss, long-term capital gain, or long-term capital loss, including any item treated as one of such items under any other provision of the Code. This provision does not apply to the extent an item is treated as anything other than short-term capital gain, short-term capital loss, long-term capital gain, or long-term capital loss.
>
> (B) Any dividend, income equivalent to a dividend, or payment in lieu of dividends described in section 954(c)(1)(G). Any amount described in section 1385(a)(1) is not treated as described in this clause.
>
> (C) Any interest income other than interest income which is properly allocable to a trade or business. For purposes of Section 199A and this section, interest income attributable to an investment of working capital, reserves, or similar accounts is not properly allocable to a trade or business.

(D) Any item of gain or loss described in section 954(c)(1)(C) (transactions in commodities) or section 954(c)(1)(D) (excess foreign currency gains) applied in each case by substituting "trade or business (within the meaning of Section 199A)" for "controlled foreign corporation."

(E) Any item of income, gain, deduction, or loss described in section 954(c)(1)(F) (income from notional principal contracts) determined without regard to section 954(c)(1)(F)(ii) and other than items attributable to notional principal contracts entered into in transactions qualifying under section 1221(a)(7).

(F) Any amount received from an annuity which is not received in connection with the trade or business.

(G) Any qualified REIT dividends as defined in paragraph (c)(2) of this section or qualified PTP income as defined in paragraph (c)(3) of this section.

(H) Reasonable compensation received by a shareholder from an S corporation. However, the S corporation's deduction for such reasonable compensation will reduce QBI if such deduction is properly allocable to the trade or business and is otherwise deductible for Federal income tax purposes.

(I) Any guaranteed payment described in section 707(c) received by a partner for services rendered with respect to the trade or business, regardless of whether the partner is an individual or an RPE. However, the partnership's deduction for such guaranteed payment will reduce QBI if such deduction is properly allocable to the trade or business and is otherwise deductible for Federal income tax purposes.

(J) Any payment described in section 707(a) received by a partner for services rendered with respect to the trade or business, regardless of whether the partner is an individual or an RPE. However, the partnership's deduction for such payment will reduce QBI if such deduction is properly allocable to the trade or business and is otherwise deductible for Federal income tax purposes.

I had speculated that the exclusion of Code § 707(a) and (c) payments from QBI was intended to prevent the service provider from attributing the partnership's QBI to any Code § 707(a) or (c) payment. Therefore, my speculation went, if the service provider is in the trade or business of providing those services, the Code § 707(a) or (c) payment may be QBI as to that trade or business. My thought was that holding a small partnership interest in a service recipient should not disqualify a person in the trade or business of supplying such services to many businesses. For example, a company manages many properties for their owners. Management fees would be QBI. However, if the company becomes a partner in a landlord partnership, then the management fees would be payments under Code § 707(a) if an independent contractor relationship or under Code § 707(c) is provided as a partner. To me, becoming a partner should disqualify the management fees from being QBI as relates to the landlord's trade or business status but should not disqualify them as to the management company's own status. In addition to including this in ACTEC's comments, I orally explained my position to government representatives. The government declined to accept this idea. Thus, continuing the proposed regulations' approach, Reg. § 1.199A-3(b)(2)(ii)(I) provides no relief from the Code § 707(a) or (c) disallowance in such a situation.

Instead of making Code § 707(c) guaranteed payments to service partners, consider granting them a preferred profits interest. See part II.M.4.f Issuing a Profits Interest to a Service Provider. Consider whether doing so would, from a financial viewpoint, be relatively safe or relative risky for the service partners.

Another benefit to such a change in the nature of payments is self-employment (SE) tax savings when the underlying activity is not subject to SE tax. For example, suppose a partner provides services to the partnership that engages in the long-term rental of real estate. A distributive share of the partnership's income (including a preferred profits interest) is not subject to SE tax.[798] However, a guaranteed payment received for services rendered is subject to SE tax.[799]

For details on the references to Code § 707(a) and (c), see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

II.E.1.c.ii.(d). Qualified REIT Dividends and Qualified PTP Income

Reg. § 1.199A-3(c), "Qualified REIT Dividends and Qualified PTP Income," provides:

(1) *In general*. Qualified REIT dividends and qualified PTP income are the sum of qualified REIT dividends as defined in paragraph (c)(2) of this section earned directly or through an RPE and the net amount of qualified PTP income as defined in paragraph (c)(3) of this section earned directly or through an RPE.

(2) *Qualified REIT dividend* –

(i) The term *qualified REIT dividend* means any dividend from a REIT received during the taxable year which -

(A) Is not a capital gain dividend, as defined in section 857(b)(3), and

(B) Is not qualified dividend income, as defined in section 1(h)(11).

(ii) The term qualified REIT dividend does not include any REIT dividend received with respect to any share of REIT stock -

(A) That is held by the shareholder for 45 days or less (taking into account the principles of section 246(c)(3) and (4)) during the 91-day period beginning on the date which is 45 days before the date on which such share becomes ex-dividend with respect to such dividend; or

(B) To the extent that the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property.

(3) *Qualified PTP income* –

(i) *In general*. The term qualified PTP income means the sum of -

---

798 See part II.L.4 Self-Employment Tax Exclusion for Limited Partners' Distributive Shares.
799 See fns 3453-3457 in parts II.L.3 Self-Employment Tax: General Partner or Sole Proprietor and II.L.4 Self-Employment Tax Exclusion for Limited Partners' Distributive Shares.

(A) The net amount of such taxpayer's allocable share of income, gain, deduction, and loss from a PTP as defined in section 7704(b) that is not taxed as a corporation under section 7704(a); plus

(B) Any gain or loss attributable to assets of the PTP giving rise to ordinary income under section 751(a) or (b) that is considered attributable to the trades or businesses conducted by the partnership.

(ii) *Special rules*. The rules applicable to the determination of QBI described in paragraph (b) of this section also apply to the determination of a taxpayer's allocable share of income, gain, deduction, and loss from a PTP. An individual's allocable share of income from a PTP, and any section 751 gain or loss is qualified PTP income only to the extent the items meet the qualifications of Section 199A and this section, including the requirement that the item is included or allowed in determining taxable income for the taxable year, and the requirement that the item be effectively connected with the conduct of a trade or business within the United States. For example, if an individual owns an interest in a PTP, and for the taxable year is allocated a distributive share of net loss which is disallowed under the passive activity rules of section 469, such loss is not taken into account for purposes of Section 199A. The specified service trade or business limitations described in §§ 1.199A-1(d)(3) and 1.199A-5 also apply to income earned from a PTP. Furthermore, each PTP is required to determine its qualified PTP income for each trade or business and report that information to its owners as described in § 1.199A-6(b)(3).

Reg. § 1.199A-6(c), "Computational and reporting rules for PTPs," provides:

(1) *Computational rules*. Each PTP must determine its QBI under the rules of § 1.199A-3 for each trade or business in which the PTP is engaged in directly. The PTP must also determine whether any of the trades or businesses it is engaged in directly is an SSTB.

(2) *Reporting rules*. Each PTP is required to separately identify and report the information described in paragraph (c)(1) of this section on Schedules K-1 issued to its partners. Each PTP must also determine and report any qualified REIT dividends or qualified PTP income or loss received by the PTP including through an RPE, a REIT, or another PTP. A PTP is not required to determine or report W-2 wages or the UBIA of qualified property attributable to trades or businesses it is engaged in directly.

II.E.1.c.iii. "Trade or Business" for Code § 199A

How do we delineate what is a "trade or business" to which we apply these rules?

Part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A allows taxpayers to add together QBI, W-2 wages, and UBIA from separate trades or businesses.

Part II.E.1.c.iii.(b) Multiple Trades or Businesses Within an Entity elaborates on part II.E.1.c.iii.(a), but I think one should understand how aggregation works under part General Standards for "Trade or Business" for Code § 199A.

Segregating gross receipts from one trade or business from another may be critically important if any significant portion of the gross receipts is from a Specified Service Trade or Business (SSTB). See part II.E.1.c.iv.(o) SSTB Very Broad Gross Receipts Test and Anti-Abuse Rules.

Reg. § 1.199A-3(e), "Effective/ applicability date," provides:

> (1) *General rule*. Except as provided in paragraph (e)(2) of this section, the provisions of this section apply to taxable years ending after February 8, 2019.
>
> (2) *Exceptions* -
>
> (i) *Anti-abuse rules*. The provisions of paragraph (c)(2)(ii) of this section apply to taxable years ending after December 22, 2017.
>
> (ii) *Non-calendar year RPE*. For purposes of determining QBI, W-2 wages, UBIA of qualified property, and the aggregate amount of qualified REIT dividends and qualified PTP income if an individual receives any of these items from an RPE with a taxable year that begins before January 1, 2018, and ends after December 31, 2017, such items are treated as having been incurred by the individual during the individual's taxable year in which or with which such RPE taxable year ends.

II.E.1.c.iii.(a). General Standards for "Trade or Business" for Code § 199A

The preamble to the final regulations, T.D. 9847 (2/8/2019), part II.A.3.a, "Relevant Passthrough Entity," first provides rules for what is a trade or business generally:

> The calculation of QBI and therefore, the benefits of Section 199A, are limited to taxpayers with income from a trade or business. Section 199A and its legislative history, however, do not define the phrase "trade or business." The proposed regulations define trade or business by reference to section 162. Section 162(a) permits a deduction for all the ordinary and necessary expenses paid or incurred in carrying on a trade or business. Multiple commenters agreed that section 162 is the most appropriate standard for what constitutes a trade or business for purposes of Section 199A, but noted that there are significant uncertainties in the meaning of trade or business under section 162. However, because many taxpayers who will now benefit from the Section 199A deduction are already familiar with the trade or business standard under section 162, using the section 162 standard appears to be the most practical for taxpayers and the IRS. Therefore, after considering all relevant comments, the final regulations retain and slightly reword the proposed regulation's definition of trade or business. Specifically, for purposes of Section 199A and the regulations thereunder, § 1.199A-1(b)(14) defines trade or business as a trade or business under section 162 (section 162 trade or business) other than the trade or business of performing services as an employee.
>
> The Treasury Department and the IRS received a number of comments requesting additional guidance with respect to determining whether an activity rises to the level of a section 162 trade or business, and therefore, will be considered to be a trade or business for purposes of determining the Section 199A deduction. Commenters suggested guidance in the form of a regulatory definition, a bright-line test, a factor-based test, or a safe harbor. Whether an activity rises to the level of a section 162 trade or business, however, is inherently a factual question and specific guidance under

section 162 is beyond the scope of these regulations. Accordingly, the Treasury Department and the IRS have concluded that the factual setting of various trades or businesses varies so widely that a single rule or list of factors would be difficult to provide in a timely and manageable manner and would be difficult for taxpayers to apply.

In *Higgins v. Commissioner*, 312 U.S. 212 (1941), the Supreme Court noted that determining whether a trade or business exists is a factual determination. Specifically, the Court stated that the determination of "whether the activities of a taxpayer are 'carrying on a business' requires an examination of the facts in each case." 312 U.S. at 217. Because there is no statutory or regulatory definition of a section 162 trade or business, courts have established elements to determine the existence of a trade or business. The courts have developed two definitional requirements. One, in relation to profit motive, is said to require the taxpayer to enter into and carry on the activity with a good faith intention to make a profit or with the belief that a profit can be made from the activity. The second is in relation to the scope of the activities and is said to require considerable, regular, and continuous activity. *See generally Commissioner v. Groetzinger*, 480 U.S. 23 (1987). In the seminal case of *Groetzinger*, the Supreme Court stated, "[w]e do not overrule or cut back on the Court's holding in Higgins when we conclude that if one's gambling activity is pursued full time, in good faith, and with regularity, to the production of income for a livelihood, and is not a mere hobby, it is a trade or business within the statutes with which we are here concerned." *Id.* at 35.[800]

A few commenters suggested adopting the definitions or rules regarding a trade or business found in other provisions of the Code, including sections 469 and 1411. Section 469(c)(6) and § 1.469- 4(b)(1) broadly define trade or business activities other than rental activities to include any activity performed: (i) In connection with a trade or business within the meaning of section 162, (ii) with respect to which expenses are allowable as a deduction under section 212, (iii) conducted in anticipation of the commencement of a trade or business, or (iv) that involves research and experimentation expenditures (within the meaning of section 174). Section 1.469-4(b)(2) defines a rental activity as an activity that constitutes a rental activity within the meaning of § 1.469-1T(e)(3). Passive activities for purposes of section 469 are defined as any activity that involves the conduct of a trade or business in which the taxpayer does not materially participate and includes all rental activity. The definition of trade or business for section 469 purposes is significantly broader than the definition for purposes of section 162 as it is intended to capture a larger universe of activities, including passive activities. Section 469 was enacted to limit the deduction of certain passive losses and therefore, serves a very different purpose than the allowance of a deduction under Section 199A. Further, Section 199A does not require that a taxpayer materially participate in a trade or business in order to qualify for the Section 199A deduction. Consequently, the Treasury Department and the IRS decline to adopt the recommendation to define trade or business for purposes of Section 199A by reference to section 469. The Treasury Department and the IRS also decline to define trade or business by reference to section 1411 as § 1.1411-1(d)(12) defines trade or business by reference to section 162 in a manner similar to § 1.199A-1(b)(14).

Commenters also suggested that the Section 199A regulations incorporate the real estate professional provisions in section 469(c)(7) in a manner similar to the cross

[800] [my footnote – not from preamble:] Both cases are described in part II.G.4.l.i.(a) "Trade or Business" Under Code § 162, particularly the text accompanying and immediately following fns 1298-1301.

> references in section 163(j) and § 1.1411-4(g)(7). Under section 469, a real estate professional may treat rental real estate activities described in section 469(c)(7)(C) as nonpassive if the taxpayer materially participates in such activities. Section 1.469-5T(a) provides seven tests to establish material participation, but as noted above, these tests only determine whether an individual materially participates in a rental real estate activity. They cannot be used to determine whether the activity itself is a trade or business. Unlike section 469, whether a taxpayer is entitled to a Section 199A deduction is not determined based on the taxpayer's level of participation in a trade or business, nor does it require that an individual materially participate in the trade or business. Instead, Section 199A is dependent on whether the individual has QBI from a trade or business. Consequently, the Treasury Department and the IRS decline to adopt these comments because the § 1.469-5T material participation tests are not a proxy to establish regular, continuous, and considerable activity that rises to the level of a trade or business for purposes of Section 199A.

Code § 469 and relevant authority are covered in part II.K Passive Loss Rules.

The Joint Committee On Taxation's "General Explanation Of Public Law 115–97," JCS-1-18 (12/18), under the heading "Trade or business," on pages 14-15, explained:

> For Federal income tax purposes, a taxpayer conducting activities giving rise to income or loss must evaluate whether its activities rise to the level of constituting a trade or business, and if so, how many trades or businesses the taxpayer has.
>
> Many areas of Federal income tax law require a taxpayer to make a threshold determination of whether its activities rise to the level of constituting a trade or business. For example, expenses are deductible under section 162 if they are incurred "in carrying on any trade or business,"[50] the passive activity loss limitation of section 469 can limit losses from an activity that "involves the conduct of any trade or business,"[51] and research and experimental expenditures are eligible for deduction under section 174 if they are paid or incurred "in connection with [a] trade or business."[52]
> [50] Sec. 162(a).
> [51] Sec. 469(c)(1)(A). A passive activity generally is one in which the taxpayer does not materially participate, and additional rules apply.
> [52] Sec. 174(a). Another example outside the domestic context is that a foreign corporation may be subject to U.S. corporate income tax rules if it is engaged in the "conduct of a trade or business within the United States." These examples are not exhaustive.
>
> Courts have held that for an activity to rise to the level of constituting a trade or business, "the taxpayer must be involved in the activity with continuity and regularity and ... the taxpayer's primary purpose for engaging in the activity must be for income or profit."[53] In order to meet this standard, the taxpayer must satisfy two requirements: (1) regular and continuous conduct of the activity;[54] and (2) a primary purpose to earn a profit.[55] Whether a taxpayer's activities meet these factors depends on the facts and circumstances of each case.[56] While most activities determined to be trades or businesses are so treated because the taxpayer offers goods or services to the public, a trade or business may also include other activities if such activities are the source of the taxpayer's livelihood.[57]
> [53] *Commissioner v. Groetzinger*, 480 U.S. 23, 35 (1987).

> [54] This first factor depends on the extent of the taxpayer's activities. For example, a taxpayer who devoted 60 to 80 hours per week to gambling on dog races was determined to have engaged in the activity regularly and continuously such that the gambling activity rose to the level of constituting a trade or business. See *Commissioner v. Groetzinger*, 480 U.S. 23 (1987). As another example, a taxpayer who executed a total of 372 securities trades in a year, with at least one trade taking place on 110 days of the year, was determined not to have engaged in securities trading on a regular or continuous basis. See *Holsinger v. Commissioner*, T.C. Memo 2008–191. As a third example, a married couple who owned two homes, one of which they lived in and renovated while monitoring the home market with an eye toward potential sale, and the other of which they rented out but eventually planned to occupy, were held to have neither engaged in the activity with sufficient frequency nor possessed the required profit motive necessary to meet the standard for being engaged in a trade or business. See *Ohana v. Commissioner*, T.C. Memo 2014–83.
> [55] This second factor depends on the taxpayer's state of mind. The taxpayer must have a good faith intention to make a profit from the activity, and not be engaged in it "merely for pleasure, exhibition, or social diversion." See *Doggett v. Burnet*, 65 F.2d 191 (D.C. Cir. 1933), rev'g 23 B.T.A. 744 (1931).
> [56] See, *e.g.*, *Higgins v. Commissioner*, 61 S. Ct. 475 (1941).
> [57] *Commissioner v. Groetzinger*, 480 U.S. 23, at 34–35 (1987).

Also, the preamble to final regulations explains the importance of taxpayer consistency:[801]

> In cases in which other Code provisions use a trade or business standard that is the same or substantially similar to the section 162 standard adopted in these final regulations, taxpayers should report such items consistently. For example, if taxpayers who own tenancy in common interests in rental property treat such joint interests as a trade or business for purposes of Section 199A but do not treat the joint interests as a separate entity for purposes of § 301.7701-1(a)(2), the IRS will consider the facts and circumstances surrounding the differing treatment. Similarly, taxpayers should consider the appropriateness of treating a rental activity as a trade or business for purposes of Section 199A where the taxpayer does not comply with the information return filing requirements under section 6041.

Regarding the above comment on real property, see part II.C.10 Whether Tenancy-in-Common or other Arrangement Constitutes a Partnership. For example, those who own real estate as tenants in common may want to opt out of partnership treatment so that they can separately do nontaxable like-kind exchanges[802] or avoid the complexities of partnership income taxation. However, as part II.C.10 explains, opting out of partnership treatment is inconsistent with saying that the rental is a trade or business. Of course, whether rental is a trade or business under Code § 199A is a complex issue beyond these ideas.[803]

[801] T.D. 9847 (2/8/2019), part II.A.3.e.
[802] See part II.G.16 Like-Kind Exchanges.
[803] See part II.E.1.e Whether Real Estate Qualifies as a Trade or Business.

Reg. § 1.199A-1(b)(14) provides:[804]

> Trade or business means a trade or business that is a trade or business under section 162 (a section 162 trade or business) other than the trade or business of performing services as an employee. In addition, rental or licensing of tangible or intangible property (rental activity) that does not rise to the level of a section 162 trade or business is nevertheless treated as a trade or business for purposes of Section 199A, if the property is rented or licensed to a trade or business conducted by the individual or an RPE which is commonly controlled under § 1.199A-4(b)(1)(i) (regardless of whether the rental activity and the trade or business are otherwise eligible to be aggregated under § 1.199A-4(b)(1)).

Part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A explains Reg. § 1.199A-4.

The preamble to Prop. Reg. § 1.199A-1, REG-107892-18 (8/16/2018), explains the general definition:

> Proposed § 1.199A-1(b) also defines trade or business for purposes of Section 199A and proposed §§ 1.199A-1 through 1.199A-6. Neither the statutory text of Section 199A nor the legislative history provides a definition of trade or business for purposes of Section 199A. Multiple commenters stated that section 162 is the most appropriate definition for purposes of Section 199A. Although the term trade or business is defined in more than one provision of the Code, the Department of the Treasury (Treasury Department) and the IRS agree with commenters that for purposes of Section 199A, section 162(a) provides the most appropriate definition of a trade or business. This is based on the fact that the definition of trade or business under section 162 is derived from a large body of existing case law and administrative guidance interpreting the meaning of trade or business in the context of a broad range of industries. Thus, the definition of a trade or business under section 162 provides for administrable rules that are appropriate for the purposes of Section 199A and which taxpayers have experience applying and therefore defining trade or business as a section 162 trade or business will reduce compliance costs, burden, and administrative complexity.
>
> The proposed regulations extend the definition of trade or business for purposes of Section 199A beyond section 162 in one circumstance. Solely for purposes of Section 199A, the rental or licensing of tangible or intangible property to a related trade or business is treated as a trade or business if the rental or licensing and the other trade or business are commonly controlled under proposed § 1.199A-4(b)(1)(i). It is not uncommon that for legal or other non-tax reasons taxpayers may segregate rental property from operating businesses. This rule allows taxpayers to aggregate their trades or businesses with the associated rental or intangible property under proposed § 1.199A-4 if all of the requirements of proposed § 1.199A-4 are met. In addition, this rule may prevent taxpayers from improperly allocating losses or deductions away from trades or businesses that generate income that is eligible for a Section 199A deduction.

[804] The second sentence is referred to in Reg. § 1.199A-4(d)(8) and (9), Examples (8) and (9), reproduced in full in the text before and after fn 841 in part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A.

Nothing in the Code § 469 passive activity rules prevents an activity from qualifying as a business. In fact, Reg. § 1.469-4(b)(1)(i) expressly contemplates that a Code § 162 business can be a passive activity.[805]

II.E.1.c.iii.(b). Multiple Trades or Businesses Within an Entity – Identification of Businesses and Allocation of Items

Within an entity, one may want to combine or separate various activities, depending on how their QBI, W-2 wages, and UBIA relate to each other and whether they can be combined with other entities' activities under part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A.

Also, delineating activities as a separate trade or business may be critically important in avoiding contaminating a qualifying business with a nonqualifying business under the overreaching rules described in part II.E.1.c.iv.(o) SSTB Very Broad Gross Receipts Test and Anti-Abuse Rules.

The preamble to the final regulations explains how to delineate businesses within an entity:[806]

> Several commenters suggested that there should be safe harbors or factors to determine how to delineate separate section 162 trades or businesses within an entity and when an entity's combined activities should be considered a single section 162 trade or business. Some of the factors suggested include whether the activities: Have separate books and records, facilities, locations, employees, and bank accounts; operate separate types of businesses or activities; are held out as separate to the public; and are housed in separate legal entities. One commenter suggested adopting the separate trade or business rules provided in regulations under sections 446 and 469.
>
> The Treasury Department and the IRS decline to adopt these recommendations because specific guidance under section 162 is beyond the scope of these final regulations and, as described in part II.A.3.a. of this Summary of Comments and Explanation of Revisions, guidance under section 469 is inapplicable.[807] Further, § 1.446-1(d) does not provide guidance on when trades or businesses will be considered separate and distinct. Instead, it provides that a taxpayer can use different methods of accounting for separate and distinct trades or businesses and specifies two circumstances in which trades or businesses will not be considered separate and distinct. Section 1.446-1(d)(2) provides that no trade or business will be considered separate and distinct unless a complete and separable set of books and records is kept for such trade or business.
>
> The Treasury Department and the IRS acknowledge that an entity can conduct more than one section 162 trade or business. This position is inherent in the reporting requirements detailed in § 1.199A-6, which require an entity to separately report QBI, W-2 wages, UBIA of qualified property, and SSTB information for each trade or business engaged in by the entity. Whether a single entity has multiple trades or businesses is a factual determination. However, court decisions that help define the meaning of "trade or business" provide taxpayers guidance in determining whether more than one trades

[805] Reg. § 1.469-4(b)(1) is reproduced in fn. 3131 within part II.K.1.b.ii Grouping Activities – General Rules.

[806] T.D. 9847 (2/8/2019), part II.A.3.d.

[807] [my footnote – not from preamble:] That reasoning is described in part II.E.1.c.iii.(a) General Standards for "Trade or Business" for Code § 199A.

> or businesses exist. As discussed in part II.A.3.a. of this Summary of Comments and Explanation of Revisions, generally under section 162, to be engaged in a trade or business, the taxpayer must be involved in the activity with continuity and regularity and the taxpayer's primary purpose for engaging in the activity must be for income or profit. *Groetzinger*, at 35.[808]
>
> The Treasury Department and the IRS also believe that multiple trades or businesses will generally not exist within an entity unless different methods of accounting could be used for each trade or business under § 1.446-1(d). Section 1.446-1(d) explains that no trade or business is considered separate and distinct unless a complete and separable set of books and records is kept for that trade or business. Further, trades or businesses will not be considered separate and distinct if, by reason of maintaining different methods of accounting, there is a creation or shifting of profits and losses between the businesses of the taxpayer so that income of the taxpayer is not clearly reflected.

The Joint Committee On Taxation's "General Explanation Of Public Law 115-97," JCS-1-18 (12/18), under the heading "Trade or business," on pages 14-15, explained:

> Once a taxpayer has made the threshold determination that its activities rise to the level of constituting a trade or business, the taxpayer must determine whether it is carrying on a single unified trade or business (involving one or more activities) or multiple separate trades or businesses. The determination of whether the taxpayer is conducting one, or multiple, trades or businesses is relevant to the taxpayer's choices of methods of accounting used to compute taxable income (*e.g.*, the cash method or an accrual method, and various special methods of accounting for certain items).[58] Under section 446, a taxpayer with multiple separate trades or businesses may use different overall methods of accounting (and different special methods of accounting for an item, if applicable) to compute taxable income for each trade or business.[59] However, a taxpayer with a single unified trade or business must use the same overall method of accounting for the activities (and the same special method of accounting, if applicable) within that trade or business.[60] A taxpayer filing its first return may adopt any permissible method of accounting in connection with each separate trade or business.[61]
> [58] Sec. 446(c) and Treas. Reg. sec. 1.446–1(c)(1).
> [59] Sec. 446(d) and Treas. Reg. sec. 1.446–1(d)(1). For example, a taxpayer may account for a personal service trade or business using the cash method and may account for a manufacturing business on an accrual method if such activities constitute separate trades or businesses. For a discussion of trades or businesses eligible to use the cash method and an accrual method, including changes to such rules by the Act, see discussion of section 13102 of the Act (Small Business Accounting Method Reform).
> [60] For example, a taxpayer with a single trade or business that includes both manufacturing and service activities generally must account for such trade or business using an accrual method. See, *e.g.*, *Thompson Electric, Inc. v. Commissioner*, T.C. Memo. 1995-292. For a discussion of trades or businesses eligible to use the cash method and an accrual method, including changes to such rules by the Act, see discussion of section 13102 of the Act (Small Business Accounting Method Reform).
> [61] Treas. Reg. sec. 1.446-1(e)(1). See also, Rev. Rul. 90–38, 1990–1 C.B. 57 (holding that a taxpayer adopts a method of accounting (1) when it uses a permissible method of

---

[808] [my footnote – not from preamble:] *Groetzinger* described in part II.G.4.l.i.(a) "Trade or Business" Under Code § 162, particularly the text accompanying and immediately following fns 1299-1301.

accounting on a single tax return, or (2) when it uses the same impermissible method of accounting on two or more consecutive tax returns). Except as otherwise provided, section 446(e) requires taxpayers to secure the consent of the Secretary before changing a method of accounting, including any change in method of accounting attributable to a taxpayer's redetermination of how many separate trades or businesses it has.

Treasury regulations provide that activities are not considered separate and distinct trades or businesses unless they each keep a complete and separable set of books and records.[62] Courts evaluating whether activities are separate and distinct trades or businesses have looked to factors such as the existence of common management, use of shared office space (or lack thereof), use of shared employees (or the lack thereof), and the nature of each business.[63] The IRS has ruled that an entity that is disregarded for Federal income tax purposes, and thus treated as a separate division of its owner (*e.g.*, a single-member limited liability company or a qualified subchapter S subsidiary); may constitute a separate trade or business under section 446 depending on the taxpayer's facts and circumstances.[64]

[62] Treas. Reg. sec. 1.446-1(d)(2).

[63] Two cases addressing activities involving chicken farming and other related activities illustrate the nature of the analysis. First, in *Peterson Produce, Inc. v. United States*, 313 F.2d 609 (8th Cir. 1963), aff'g 205 F.Supp. 229 (W.D. Ark. 1962), the court upheld a U.S. district court determination that the taxpayer's newly-formed chicken farming division was not separate and distinct from the taxpayer's feed and hatchery trade or business because the existing business primarily sold chicks to the new division and the taxpayer did not keep separate books and records for the two activities.[809] In *Burgess Poultry Mkt., Inc. v. United States*, 64-2 USTC 9515 (E.D. Tex. 1964), however, the court held that the taxpayer's two divisions, one of which raised chicks and the other of which processed broiler chickens, were separate and distinct trades or businesses because they kept separate books and records, had separate employees, and did substantial business with third parties.[810] See also Rev. Rul. 74-270, 1974-1 C.B. 109 (ruling that a bank's commercial banking division and trust division were separate trades or businesses where they had separate books and records, separate employees, separate office space, and separate management).[811]

[64] See, *e.g.*, Sections 9.01 and 15.07(4)(b) of Rev. Proc. 2018-1, 2018-1 I.R.B. 1 (and its predecessors). See also CCA 201430013, July 25, 2014.[812]

Authorized under Code § 446(d), Reg. § 1.446-1(d), "Taxpayer engaged in more than one business," provides:

(1) Where a taxpayer has two or more separate and distinct trades or businesses, a different method of accounting may be used for each trade or business, provided the method used for each trade or business clearly reflects the income of that particular trade or business. For example, a taxpayer may account for the operations of a personal service business on the cash receipts and disbursements method and of a manufacturing business on an accrual method, provided such businesses are separate and distinct and the methods used for each clearly reflect income. The

[809] [my footnote:] *Peterson Produce* is discussed in fn 823.

[810] [my footnote:] *Burgess Poultry* is discussed in fn 821.

[811] [my footnote:] Rev. Rul. 74–270 is discussed in fn 818.

[812] [my footnote:] CCA 201430013 is discussed in fn 813.

method first used in accounting for business income and deductions in connection with each trade or business, as evidenced in the taxpayer's income tax return in which such income or deductions are first reported, must be consistently followed thereafter.

(2) No trade or business will be considered separate and distinct for purposes of this paragraph unless a complete and separable set of books and records is kept for such trade or business.

(3) If, by reason of maintaining different methods of accounting, there is a creation or shifting of profits or losses between the trades or businesses of the taxpayer (for example, through inventory adjustments, sales, purchases, or expenses) so that income of the taxpayer is not clearly reflected, the trades or businesses of the taxpayer will not be considered to be separate and distinct.

A single member LLC that is a disregarded entity may use a different accounting method than its parent if the single member LLC engages in a separate trade or business.[813] A corporate subsidiary that was liquidated tax-free to attain efficiencies in distribution but continued to have complete physical separation of products, books, and records from the rest of the parent corporation was permitted to maintain a different method of accounting as a separate division.[814] However, corporate subsidiaries that are separate taxpayers are separate businesses.[815]

Difficulty in maintaining separate businesses or separate books and records for a taxpayer's various business activities does not justify failure to do so.[816] Loans to employees, which of

---

[813] CCA 201430013 (see fn 331 in part II.B Limited Liability Company (LLC)) held that "Company and LLC separate and distinct trades or businesses" in the following situation:

> LLC was previously a subsidiary of Company that converted in Year A to a limited liability company, whose sole member is Company. LLC has not made an election under Procedure and Administration Reg. § 301.7701-3 to be taxed as a corporation, thus, LLC is not regarded as an entity separate from Company for federal income tax purposes but is instead treated as a division of Company.
>
> Company's activities include sales, marketing, distribution, sale support, research and development, and administrative and headquarters functions. LLC primarily manufactures products but does provide some research and development services to the [redacted data] purchaser of its products, Purchase A. Purchaser A will subsequently sell these products to Purchaser B, who will ultimately sell the products to Company.
>
> Company and LLC have separate books and records. These books and records are prepared at Company's location. Company and LLC are in different geographical locations. Further, Company and LLC do not share employees, but, do share the highest-level executives. Company and LLC use the same accounting method, presumably, that method is an accrual accounting method.

[814] Letter Ruling 7950016.

[815] *Specialty Restaurants Corporation and Subs*. v. Commissioner, T.C. Memo. 1992-221, held that separately taxed corporate subsidiaries had to establish their own businesses and accordingly had capitalized start-up expenses instead of being able to deduct expenses in the same line of business as their affiliates.

[816] *Herbert C. Haynes, Inc. v. Commissioner*, T.C. Memo. 2004-185, reasoned and held:

> Petitioner does not maintain separate businesses or separate books and records for its various business activities. Indeed, petitioner stipulated: "Because of the scope of petitioner's activities and the entrepreneurial nature of the industry, it is impossible to describe a single business

course generate interest income instead of business income, did not constitute a business because they were not separable from the taxpayer's overall business activities.[817]

A bank may use different methods of accounting for its commercial banking activities and its trust department.[818] A national bank that operates a bond department and is a dealer in securities may use different methods of accounting for its bond department and for other activities.[819]

> model. Further, the extent of petitioner's activities … will vary from year [to year] and involve many unique transactions."
>
> Petitioner engages in various business activities. In *Wilkinson-Beane, Inc. v. Commissioner*, 420 F.2d at 355, the Court of Appeals for the First Circuit, the court to which an appeal of this case would lie, held that the taxpayer had to use the accrual method where its business involved providing funeral services and supplying caskets for the funeral services. In *Knight-Ridder Newspapers, Inc. v. United States*, 743 F.2d at 790, the Court of Appeals for the Eleventh Circuit held that a newspaper that provided the service of presenting information to its readers had to use the accrual method where the cost of newsprint and ink was 17.6 percent of the total cash receipts....
>
> Some of petitioner's business activities involve no growing of trees, no harvesting of trees, and no ownership of the land on which the trees are grown. Other business activities involve a combination of the above. The business activities related to buying and selling wood generate merchandise for petitioner. The merchandise is an income-producing factor to petitioner. Thus, the facts and circumstances of this case are analogous to those described in *Wilkinson-Beane, Inc.* and *Knight Ridder Newspapers*.
>
> Petitioner must use the accrual method of accounting for all of its business activities. See *Thompson Elec., Inc. v. Commissioner*, T.C. Memo. 1995-292.

Failing to keep books and records precluded a taxpayer from proving different businesses. *Humphrey v. Commissioner*, T.C. Memo. 1995-110. In The *J. F. Stevenhagen Co. v. Commissioner*, T.C. Memo. 1975-198, the IRS unsuccessfully tried to impose a different method of accounting for interest on loans than the rest of the business.

[817] *W.W. Enterprises, Inc. v. Commissioner*, T.C. Memo. 1985-313, which ran a commercial laundry business and allowed the employees to repay the loans with bonuses. The taxpayer was on the accrual method for its business and wanted to use the cash method to report interest on the loans.

[818] Applying Reg. § 1.446-1(d), Rev. Rul. 74-270 reasoned and held:

> The right to operate a trust department is granted by the Comptroller of the Currency pursuant to law. Under such law all national banks exercising fiduciary powers are required to segregate their general assets from assets held in any fiduciary capacity and to keep separate books and records. The banking activities and fiduciary functions must be operated separately and the separate identity of the trust department must be preserved. The activities of a trust department of a national bank are governed by regulations under the law. The trust activities differ basically from the banking business in that banking is a mercantile business which consists of receiving deposits, making collections and loans, discounting commercial paper, and issuing notes. The trust business is a personal service business consisting of acting as trustee, executor or administrator, registering stocks and bonds, guarding estates, and acting in other fiduciary capacities. The trust department has its own management, staff of employees, and office space. Accordingly, under the foregoing circumstances the taxpayer will be permitted to use different methods of accounting for its commercial banking activities and its trust department for Federal income tax purposes. Further, permission will be granted by the Commissioner to change its method of accounting for its commercial banking activities, for Federal income tax purposes, from the hybrid method to the accrual method provided that the taxpayer and the Commissioner of Internal Revenue agree to the terms, conditions, and adjustments under which the change will be effected.

[819] Applying Reg. § 1.446-1(d), Rev. Rul. 74-280 reasoned and held:

The sale of food supplements and merchandise and the providing of services under weight reduction contracts did not represent separate trades or businesses, when food supplements were offered only to active members of the weight reduction program and not to the general public.[820]

A corporation engaged in the business of processing and selling nine-week-old broiler chickens was able to distinguish as a separate business its new business of raising chickens until they were nine weeks old.[821] A different taxpayer was unable to prove that its cattle feeding

---

> Taxpayers engaged in the banking business are permitted to use the cash receipts and disbursements method with respect to their banking activities provided such method clearly reflects income…. However, a bank, as the instant taxpayer, also may be a dealer in securities with respect to the securities activities of its bond department….
>
> The purchase and sale of securities by a dealer is an income-producing factor within the meaning of section 1.471-1 of the regulations. Thus, in order to clearly reflect income, a dealer in securities (just as a dealer in other merchandise) must maintain an inventory of his securities held for resale….
>
> Accordingly, in the instant case, the taxpayer is using an improper method of accounting with respect to its securities activity. The taxpayer must use the accrual method of accounting with regard to its bond department, but the items of income and expense of its business other than the bond department, may continue to be accounted for under the cash receipts and disbursements method, provided it clearly reflects income, a complete and separate set of books and records are maintained for each trade or business, and there is no shifting of profits or losses between trades or businesses so that income of the taxpayer is not clearly reflected. See section 1.446-1(d) of the regulations.

[820] TAM 9408003 held:

> The question of whether activities under common ownership constitute separate businesses has arisen in several contexts. In *Peterson Produce Company v. U.S.*, 313 F.2d 609 (8th Cir. 1963), the taxpayer was engaged in the poultry business and attempted to use the cash method for its newly-created broiler department. The court held that the departments were not separate trades or businesses, because the newly-created broiler department was too interdependent and functionally integrated with the poultry business.
>
> Similarly, in *Nielsen v. Commissioner*, 61 T.C. 311 (1973), it was determined that two hospitals owned by the same shareholders were separate businesses. Although the two hospitals shared some management and professional services, each hospital had a separate medical staff, served patients living primarily within its own geographical area, and functioned independently of the other hospital.
>
> Further, Rev. Rul. 74-270, 1974-1, C.B. 109, provides that the taxpayer, a bank, is permitted to use different methods of accounting for its commercial banking activities and its trust department for Federal income tax purposes. The trust department is required by Federal statute to operate separately from the commercial band and must keep separate books and records, and must have its own management, offices, and employees.
>
> In order for a taxpayer to be considered to have more than one trade or business, it must be shown that each such trade or business is separate and distinct from the other, and each business must maintain a complete and separable set of books and records.
>
> In the present situation, only clients who have purchased weight reduction contracts are eligible to buy the food supplements and other merchandise. The products are displayed and sold at each center, and they are sold by the same personnel who sell the weight reduction contracts. Although the taxpayer separately accounts for the sales of products and weight reduction contracts, expenses from the taxpayer's books and records cannot be separated in order to compute a net income for each activity. Because the resale activity is neither operated nor accounted for separately from the service activity, the taxpayer has only one trade or business.

[821] *Burgess Poultry Market, Inc. v. U.S.*, 14 A.F.T.R.2d 5036 (E.D. Tex. 1964). Relevant facts include:

operations were separate and distinct from its meat processing operations.[822] However, a chicken farmer was not able to show that its expansion from raising chickens to marketing through a broiler division was a separate and distinct business.[823] A corporation that published

---

(2.) Since its incorporation in 1953, plaintiff has been engaged in the business of processing and selling broiler chickens, and in connection with that business plaintiff has kept its books and filed its income tax returns on the accrual basis of accounting. Said books consisted of cash disbursements journal, cash receipts journal, sales journal, voucher register, payroll journal, general journal and general ledger.

(3.) Plaintiff's broiler processing business generally consisted of procuring live broiler chickens when they were approximately nine weeks old, slaughtering, cleaning and preparing such chickens for market, and selling same both in a fresh and frozen state.

(5.) From its inception, the principal business of plaintiff's farm division was feeding and raising baby chicks for approximately nine weeks, after which time they reached a stage where they were sold as broilers.

(6.) Sometime after the commencement of plaintiff's farm division, there was added thereto a feed mill which mixed feed to be fed to the growing chickens, a hatchery to provide baby chicks to be raised, and a breeder flock of chickens to provide eggs to the hatchery.

(7.) From the inception of the farm division and throughout the fiscal years ended October 31, 1960, and October 31, 1961, plaintiff kept a set of books for its farm division operations which consisted of a cash disbursement journal, payroll journal, and general ledger. The books kept for the farm division were completely separate from the books kept for the broiler processing division. The books of the farm division were kept on the cash receipts and disbursements method of accounting and this method was used in reporting plaintiff's income and expenses from its farm division on its federal income tax returns for the fiscal years ended October 31, 1960, and October 31, 1961.

(8.) Upon commencement of the poultry raising business in its farm division, all new operating employees were hired in the farm division and no employees were transferred to the farm division from the processing division. Throughout the period in question, each division had its own separate employees, including separate bookkeepers and each division paid its own employees out of its own separate bank accounts. Separate bank accounts were maintained by the plaintiff for both its broiler processing division, in the name of Burgess Poultry Market, Inc., and its farm division, in the name of Burgess Poultry Farms…. Each division handled all its income and expenses through its own bank accounts in said banks.

[822] *Gold-Pak Meat Co., Inc. v. Commissioner*, T.C. Memo. 1971-83, held:

The cattle Gold-Pak fed on its own account were ultimately destined for its own slaughtering operations, and therefore were most intimately connected with those operations. The cattle feeding operation of Gold-Pak was not treated as a separate division, with separate books of account, employees, and other accouterments of a business enterprise. Rather Gold-Pak completely integrated the bookkeeping, personnel, and other incidents of business of both its meat processing and cattle feeding operations. The accountant who kept Gold-Pak's books clearly indicated that the transfer of the cattle from the feeding operation to the slaughtering operation was accomplished by adding to the cost of sales the inventory cost of the cattle. The close interrelationship between Gold-Pak's cattle feeding operation and the meat processing makes section 1.446-1(d) inapplicable.

[823] *Peterson Produce Co. v. U.S.*, 205 F.Supp. 229 (W.D. Ark. 1962), *aff'd* 313 F.2d 609 (8th Cir. 1963), held:

The plaintiff argues that its broiler farming operation is a new, separate and distinct business. Granted that if plaintiff is presently engaged in a farming operation by virtue of having created a new division, the question arises as to what sort of operation it was engaged in prior to September 1, 1958. The court is convinced that plaintiff did not substantially change its over-all operation on September 1, 1958, by the creation of the broiler division to handle the operation that the plaintiff had operated through its other two departments during the previous years. The "new" division was created within an existing corporate entity which at all times previous to and

and sold various farm publications was allowed to use a different method of accounting than its farming operations for which it maintained a complete and separable set of books and records.[824] However, where pre-existing businesses with different methods of accounting in

---

> subsequent to September 1, 1958, has remained the same taxable entity. The creation of the new division was a convenience and perhaps an economic necessity to the plaintiff, and by concurrent utilization of the new form of contracts with the farmers, the plaintiff acquired more control over the growing and marketing of the chickens, but the fact remains that as a farming or nonfarming enterprise the plaintiff's over-all operation for the past ten years or more was the growing and marketing of broilers.
>
> Even if the broiler farming division constituted a new business, the further question arises whether the broiler farming operation was "separate and distinct."

The court quoted Reg. § 1.446-1(d) then continued:

> The regulation requires not only separate and distinct businesses, but also the keeping of separate and distinct books for each of the businesses. As to the operations of the plaintiff, its feed, hatchery and broiler departments are interdependent. The volume of the outside sales of feed and chicks is small compared to the transfers at cost of feed and chicks to the broiler division by the other two departments. There is no doubt but that plaintiff functions as a corporate entity made up of three well-integrated departments, not as a loose confederation made up of autonomous divisions. Whatever internal arrangements have been worked out over the years have not altered its corporate image in dealing with growers or in entering the chicken market as a seller. As the court concluded in the *Chemell* case, *supra*, at page 948:
>
> "… The term 'farm', by the definition of the regulations, includes poultry farms. The maintaining of a flock of hens producing eggs to be hatched into chicks and the growing of feed are agricultural pursuits and are parts of an integrated operation."
>
> As for the requirement of "complete and separable" books, while it is true that the general ledger accounts of the plaintiff's three departments could be physically separated, the fact remains that the books of original entries, such as daily journals, were not physically separable. The plaintiff contends that its books were "complete and separable" to the extent that they "clearly reflected" the income from each of the departments as an economic unit and that this conformed to good accounting practice. While this may be true, this court must base its determination of the case upon the plaintiff as a taxable entity, and the integrated or separate status of its departmental operations must be ascertained as a matter of fact, not as a matter of bookkeeping entries in particular or of accounting practice in general. *United States v. Ekberg*, *supra*; *Welp v. United States*, (D.C. Iowa 1952), 103 F. Supp. 551, reversed on other grounds 201 F.2d 128.
>
> Therefore, because of the functional integration of the three departments of the plaintiff's business, as well as the fact that the plaintiff did not maintain a "complete and separable" set of books and records with respect to each division, the broiler division cannot be characterized as a "separate and distinct" business for tax accounting purposes, and the Commissioner was correct in requiring that the taxpayer use the same method of accounting consistently with respect to all of its departments.

The court had said above that the taxpayer had contended that the broiler division "qualifies as a separate and distinct farming business," and stated:

> In support of this contention plaintiff cites the case of *United States v. Chemell*, (5 Cir. 1957), 243 F.2d 944, in which the court held an almost identical feed, hatchery and broiler operation to be a farming rather than an industrial operation, thus allowing the taxpayer to use the cash method of accounting and to disregard the livestock as inventory items. While the court agrees with the Fifth Circuit's designation of a feed, hatchery and broiler operation as a farming enterprise, it must be pointed out that in the cited case the taxpayer was not seeking a change in method of accounting once having elected the cash method, and furthermore the taxpayer maintained the same method of accounting in all of its departments.

United States v. Ekberg was a reference to 291 F.2d 913 (8th Cir. 1961).

[824] TAM 8245009.

different corporations became part of an affiliated group that filed a consolidated return, they could continue to use different methods of accounting.[825]

A taxpayer may distinguish an illegal trade or business, expenses of which Code § 280E precludes deducting,[826] from a legal trade or business, expenses of which are deductible.[827]

---

[825] *Rocco, Inc. v. Commissioner*, 72 T.C. 140, 153-154 (1979), held:

> The basis of respondent's adjustments with regard to the inventories is that the end result of the incorporation of the subsidiaries and their adoption of the cash method of accounting is a change in the method of accounting used by Rocco and Turkeys without obtaining the Commissioner's consent.[15] For support of this rather oblique approach, respondent relies heavily on *Peterson Produce Co. v. United States*, 205 F.Supp. 229 (W.D. Ark. 1962), *affd.* 313 F.2d 609 (8th Cir. 1962). While Peterson involved a change in method of accounting within the feed and hatchery business, it is not particularly relevant to this discussion. There, the taxpayer established a separate broiler farming division which adopted the cash method of accounting. The court held, under section 446, that the new division did not qualify as a separate and distinct business which permitted it to elect the cash method of reporting under section 1.446-1(d), Income Tax Regs. Here Broiler Farms and Turkey Farms were organized and operated as separate corporations and they were entitled to elect the cash method of accounting, regardless of whether their businesses were separate and distinct from [Rocco's and Turkeys'. Furthermore, Peterson was concerned with section 446, not section 269.
>
> > [15] is not clear how respondent expects Broiler Farms and Turkey Farms to compute their incomes in future years. In resorting to sec. 269 respondent disallows deductions for the years involved, he does not change them to the inventory method of accounting. But unless the corporations are permitted to use opening inventories in the succeeding year there will be a real distortion of income. See *Clement v. United States*, 217 Ct. Cl. __, 580 F.2d 422, 432 (1978), *cert, denied* 440 U.S. 907 (1979), as to whether respondent has the right to place a farmer on the inventory method.
>
> It was not the acquisition of control of Broiler Farms by Rocco and of Turkey Farms by Turkeys that resulted in the tax benefit herein decried by respondent - it was a combination of the accounting method Broiler Farms and Turkey Farms were authorized to use and the filing of consolidated returns which the consolidated group was also authorized to use which produced the tax benefits in those particular years. See *Cromwell Corp. v. Commissioner*, 43 T.C. 313 (1964); *Siegel v. Commissioner*, *supra*. Even under section 446 respondent could hardly claim that the cash method would not clearly reflect the incomes of Broiler Farms and Turkey Farms if used consistently over the years.
>
> Thus, while we recognize that respondent is given broad authority by this statute, we question whether he has overstepped the bounds in applying section 269 in this case.
>
> However, we need not decide the legal issue posed above because, assuming that section 269 is applicable here, we have found as a fact that the principal purpose for Rocco and Turkeys "acquiring control" of Broiler Farms and Turkey Farms was not to avoid or evade tax by securing the benefit of a deduction, credit, or other allowance they would not otherwise enjoy.[16]
>
> [16] 16 It is not clear from the notice of deficiency or respondent's brief just who secured the tax benefit by acquiring control. Presumably respondent claims that Rocco and Turkeys did. But they acquired the tax benefit by virtue of filing consolidated returns with Broiler Farms and Turkey Farms, not directly by acquiring control of the new corporations.

[826] For the impact of Code § 280E on the purchase and sale of a business, including part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest, see "The potential for lost benefits of Up-Cs in a Sec. 280E environment," *The Tax Adviser* (9/1/2021).

[827] *Californians Helping to Alleviate Medical Problems., Inc. v. Commissioner*, 128 T.C. 173 (2007):

> We hold that section 280E does not preclude petitioner from deducting expenses attributable to a trade or business other than that of illegal trafficking in controlled substances simply because petitioner also is involved in the trafficking in a controlled substance ….

Once the court believes the businesses are separate, the taxpayer has some leeway in allocating expenses:

> Given petitioner's separate trades or businesses, we are required to apportion its overall expenses accordingly. Respondent argues that "petitioner failed to justify any particular allocation and failed to present evidence as to how … [petitioner's expenses] should be allocated between marijuana trafficking and other activities." We disagree. Respondent concedes that many of petitioner's activities are legal and unrelated to petitioner's provision of medical marijuana. The evidence at hand permits an allocation of expenses to those activities. Although the record may not lend itself to a perfect allocation with pinpoint accuracy, the record permits us with sufficient confidence to allocate petitioner's expenses between its two trades or businesses on the basis of the number of petitioner's employees and the portion of its facilities devoted to each business. Accordingly, in a manner that is most consistent with petitioner's breakdown of the disputed expenses, we allocate to petitioner's caregiving services 18/25 of the expenses for salaries, wages, payroll taxes, employee benefits, employee development training, meals and entertainment, and parking and tolls (18 of petitioner's 25 employees did not work directly in petitioner's provision of medical marijuana), all expenses incurred in renting facilities at the church (petitioner did not use the church to any extent to provide medical marijuana), all expenses incurred for "truck and auto" and "laundry and cleaning" (those expenses did not relate to any extent to petitioner's provision of medical marijuana), and 9/10 of the remaining expenses (90 percent of the square footage of petitioner's main facility was not used in petitioner's provision of medical marijuana).[6] We disagree with respondent that petitioner must further justify the allocation of its expenses, reluctant to substitute our judgment for the judgment of petitioner's management as to its understanding of the expenses that petitioner incurred as to each of its trades or businesses. *Cf. Boyd Gaming Corp. v. Commissioner*, 177 F.3d 1096 (9th Cir. 1999), *revg.* T.C. Memo. 1997-445.

> We now turn to analyze whether petitioner's furnishing of its caregiving services is a trade or business that is separate from its trade or business of providing medical marijuana. Taxpayers may be involved in more than one trade or business, see, *e.g.*, *Hoye v. Commissioner*, T.C. Memo. 1990-57, and whether an activity is a trade or business separate from another trade or business is a question of fact that depends on (among other things) the degree of economic interrelationship between the two undertakings, see *Collins v. Commissioner*, 34 T.C. 592 (1960); sec. 1.183-1(d)(1), Income Tax Regs. The Commissioner generally accepts a taxpayer's characterization of two or more undertakings as separate activities unless the characterization is artificial or unreasonable. See sec. 1.183-1(d)(1), Income Tax Regs.
>
> We do not believe it to have been artificial or unreasonable for petitioner to have characterized as separate activities its provision of caregiving services and its provision of medical marijuana. Petitioner was regularly and extensively involved in the provision of caregiving services, and those services are substantially different from petitioner's provision of medical marijuana. By conducting its recurring discussion groups, regularly distributing food and hygiene supplies, advertising and making available the services of personal counselors, coordinating social events and field trips, hosting educational classes, and providing other social services, petitioner's caregiving business stood on its own, separate and apart from petitioner's provision of medical marijuana. On the basis of all of the facts and circumstances of this case, we hold that petitioner's provision of caregiving services was a trade or business separate and apart from its provision of medical marijuana.

As to Code § 183, see part II.G.4.l.i.(c) Hobby Loss Benefits of Code § 183, which is found within part II.G.4.l.i Trade or Business; Limitations on Deductions Attributable to Activities Not Engaged in for Profit.

> [6] While we apportion most of the $212,958 in "Total deductions" to petitioner's caregiving services, we note that the costs of petitioner's medical marijuana business included the $203,661 in labor and $43,783 in other costs respondent conceded to have been properly reported on petitioner's tax return as attributable to cost of goods sold in the medical marijuana business.

However, one can carry this only so far:[828]

> Under the circumstances, we hold that selling non-marijuana merchandise was not separate from the business of selling marijuana merchandise. First, Altermeds, LLC, derived almost all of its revenue from marijuana merchandise. Second, the types of non-marijuana products that it sold (pipes and other marijuana paraphernalia) complemented its efforts to sell marijuana.[18] Altermeds, LLC, had only one unitary business, selling marijuana. See *Canna Care, Inc. v. Commissioner*, T.C. Memo. 2015-206, at *12, *aff'd*, 694 F.App'x 570 (9th Cir. 2017).
>
> [18] Besides marijuana paraphernalia, Alterman testified that the dispensary also sold (1) hats and T-shirts with the name and business logo of Altermeds, LLC, (2) magazines about marijuana, (3) and chicken soup. No documentary evidence corroborates the existence or extent of these sales. On a preponderance of evidence, we find that no such items were sold. Furthermore, these types of products as described by Alterman would generally complement the sales of marijuana by the dispensary. For example, the hats and T-shirts as described by Alterman bore the name and business logo of Altermeds, LLC. Thus, even if Altermeds, LLC, sold such hats and T-shirts, selling those items would have helped advertise medical marijuana.

Most cases cited by research services are old. See III.B. Multiple Trades or Businesses T.M. 570-4th *Accounting Methods*; ¶ G-2052 Multiple methods of accounting *Federal Tax Coordinator Analysis* (RIA).

The preamble to the final regulations, T.D. 9847 (2/8/2019), part IV.A.10, "Reasonable Methods for Allocation of Items Among Multiple Trades or Businesses," explains:

> The proposed regulations provide that if an individual or an RPE directly conducts multiple trades or businesses, and has items of QBI which are properly attributable to more than one trade or business, the individual or RPE must allocate those items among the several trades or businesses to which they are attributable using a reasonable method based on all the facts and circumstances. The chosen reasonable method for each item must be consistently applied from one taxable year to another and must clearly reflect the income and expenses of each trade or business. One commenter suggested that a reasonable approach to allocating items that are not clearly attributable to a single trade or business could be the cost allocation methods used in § 1.199-4(b)(2). The commenter suggested that the reasonableness standard could be applied to determine the allocation of items of QBI among multiple trades or businesses. The commenter also suggested a safe harbor allocation method allowing a taxpayer to bypass direct tracing if the amount of other items of QBI that must be allocated is below

[828] After citing *Californians Helping to Alleviate Medical Problems., Inc. v. Commissioner*, 128 T.C. 173 (2007), *Alterman v. Commissioner*, T.C. Memo. 2018-83, held that the taxpayer did not prove separateness and did not prove that various deductions were allocable to legal activities.

a pre-determined threshold, such as a percentage of total QBI or a specified dollar amount.

The Treasury Department and the IRS decline to adopt this comment as the rules under § 1.199-4 were intended solely for the allocation of expenses. By contrast, the rule described in § 1.199A- 3(b)(5) requires the allocation of all qualified items of income, gain, loss, and deduction across multiple trades or businesses. Whether direct tracing or allocations based on gross income are reasonable methods depends on the facts and circumstances of each trade or business. Different reasonable methods may be appropriate for different items. Accordingly, the final regulations retain the rule in the proposed regulations. However, once a method is chosen for an item, it must be applied consistently with respect to that item. The Treasury Department and the IRS continue to study this issue and request additional comments, including comments with respect to potential safe harbors.

Another commenter requested guidance on when or how a method can be changed from year to year if, for example, it is no longer reasonable or no longer clearly reflects income. The Treasury Department and the IRS decline to adopt this comment as it is beyond the scope of these regulations. If a method is no longer reasonable or no longer clearly reflects income, the method cannot continue to be used. The individual or RPE must choose a new method that is reasonable under the facts and circumstances and apply it consistently going forward.

Reg. § 1.199A-3(b)(5), "Allocation of items among directly-conducted trades or businesses," provides:

If an individual or an RPE directly conducts multiple trades or businesses, and has items of QBI that are properly attributable to more than one trade or business, the individual or RPE must allocate those items among the several trades or businesses to which they are attributable using a reasonable method based on all the facts and circumstances. The individual or RPE may use a different reasonable method with respect to different items of income, gain, deduction, and loss. The chosen reasonable method for each item must be consistently applied from one taxable year to another and must clearly reflect the income and expenses of each trade or business. The overall combination of methods must also be reasonable based on all facts and circumstances. The books and records maintained for a trade or business must be consistent with any allocations under this paragraph (b)(5).

Applying 2017 tax reform to determine separate businesses is relevant not only for Code § 199A but also for Code § 512(a)(6) (preventing a tax-exempt entity from uses losses from one business against income from a separate business), which is discussed in part II.E.1.f.viii Tax-Exempt Trusts. Discussed there is guidance under Code § 512(a)(6), under which NAICS codes delineate between various businesses. The NAICS is an industry classification system for purposes of collecting, analyzing, and publishing statistical data related to the United States business economy. See Executive Office of the President, Office of Management and Budget, North American Industry Classification System (2017), available at https://www.census.gov/eos/www/naics/2017NAICS/2017_NAICS_Manual.pdf. I am not suggesting any authority directly applying these codes for Code § 199A. However, given that guidance on how to delineate separate businesses leaves a lot of room for interpretation, using these codes may show a good-faith attempt to delineate between businesses.

II.E.1.c.iii.(c). "Trade or Business" in Other Areas of Tax Law

Neither the statute nor the legislative history explains what is a "trade or business." The preamble to the final regulations strongly favors looking to Reg. § 1.446-1(d).[829]

Here are some resources that may help, to the extent that regulations do not provide guidance:

- Part II.G.4.l.i Trade or Business; Limitations on Deductions Attributable to Activities Not Engaged in for Profit would be the most important source.

- What is a "trade or business" is important regarding particular issues for the Code § 1411 3.8% tax on net investment income ("NII"), which is tied to the Code § 469 passive activity loss ("PAL") rules. When reviewing the resources below, keep in mind that (a) being passive tends to be bad for taxpayers in the context of the NII and PAL rules but is irrelevant for Code § 199A, and (b) real estate has special rules regarding its character as passive, which again is irrelevant for Code § 199A:

    - The government received and responded to comments on what is a "trade or business" when working on regulations for the net investment income. See:

        - Part II.I.8.a General Application of 3.8% Tax to Business Income, fns 2333-2342, and

        - Part II.I.8.c.iii Rental as a Trade or Business, fns 2397-2407.

    - In the PAL rules:

        - What is a trade or business has received some attention in the real estate professional exception, but most of that tends to be whether the trade or business qualifies as a real estate trade or business. Although I don't view those as particularly instructive as to what is a trade or business, here is the discussion so you can see for yourself: Part II.K.1.e.iii Real Estate Professional Converts Rental to Nonpassive Activity.

        - Part II.K.1.f Royalty as a Trade or Business may have some application.

        - Because what is a "trade or business" is so driven by facts and circumstances and one needs to delineate among separate trades or businesses in applying Code § 199A, one wonders whether the government might provide some guidance. The PAL rules provide guidance that one might speculate the government might consider adopting, rather than creating a whole new set of rules. The PAL rules allow taxpayers to group activities, with a general grouping rule and a rule specific to real estate professionals. See parts II.K.1.b Grouping Activities and II.K.1.e.iii.(b) Aggregating Real Estate Activities for a Real Estate Professional. The net investment income tax rules were required to refer to the PAL rules, so they also adopted those grouping rules, but allowed taxpayers to regroup when first subject to the NII tax. See part II.I.8.a.ii Passive Activity Grouping Rules.

---

[829] See part II.E.1.c.iii.(b) Multiple Trades or Businesses Within an Entity.

- Self-employment tax is imposed only on activity that is a trade or business. See:
    - Part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax, fns 3410-3413.
    - Part II.L.2.a.ii Rental Exception to SE Tax and II.L.2.a.iii Whether Gain from Sale of Property is Subject to SE Tax, keeping in mind that the rental exception excludes certain trades or businesses for self-employment tax purposes. Part II.L.2.a.ii also discusses that generally equipment rental is a trade or business, in contrast to real estate, which needs more activity to rise to the level of a trade or business.
- A taxpayer engaged in more than one trade or business may, in computing taxable income, use a different method of accounting for each trade or business. The final regulations expressly refer to this, as is elaborated on in part II.E.1.c.iii.(b) Multiple Trades or Businesses Within an Entity**.**

II.E.1.c.iii.(d). Aggregating Activities for Code § 199A

This part II.E.1.c.iii.(d) describes optional aggregation that allows taxpayers to combine wages and UBIA from separate (but related in some manner) businesses. For whether an individual, trust, or RPE has more than one trade or business, see part II.E.1.c.iii.(b) Multiple Trades or Businesses Within an Entity – Identification of Businesses and Allocation of Items.

Each RPE separately determines whether its activity qualifies as a trade or business. Owners might want to combine their RPEs into a master partnership in which each LLC is a disregarded entity. See the discussion at the end of the introductory portion of part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.[830]

Although these rules are optional, parts II.E.1.c.v.(c) Calculation When Taxable Income Exceeds the Threshold Amount and II.E.1.c.vii Effect of Losses from Qualified Trades or Businesses on the Code § 199A Deduction show how aggregation is beneficial in most cases. Whether or not a taxpayers aggregates, real estate rented to a commonly controlled business also receives relief; see part II.E.1.e.i General Rules Regarding U.S. Real Estate .[831]

In contrast to optional aggregation under this part II.E.1.c.iii.(d), part II.E.1.c.iv.(o) SSTB Very Broad Gross Receipts Test and Anti-Abuse Rules shows how businesses closely tied to a specified service trade or business (SSTB) may lose part or all of their QBI solely because of that connection.

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), explains optional aggregation:

> **IV. Proposed § 1.199A-4: Aggregation Rules**
>
> **A. Overview**
>
> The proposed regulations incorporate the rules under section 162 for determining whether a trade or business exists for purposes of Section 199A. A taxpayer can have more than one trade or business for purposes of section 162. See § 1.446-1(d)(1).

---

[830] See text accompanying fn 760, which also mentions the possibility of using QSubs when the master RPE is an S corporation.

[831] Especially the text accompanying fns 951-953.

However, in most cases, a trade or business cannot be conducted through more than one entity.

The Treasury Department and the IRS have received comments requesting that the regulations provide that taxpayers be permitted to group or “aggregate” trades or businesses under Section 199A using the grouping rules described in § 1.469-4 (grouping rules). Section 1.469-4 sets forth the rules for grouping a taxpayer’s trade or business activities and rental activities for purposes of applying the passive activity loss and credit limitation rules of section 469. Section 469 uses the term “activities” in determining the application of the limitation rules under section 469. In contrast, Section 199A applies to trades or businesses. By focusing on activity, the grouping rules may be both under and over inclusive in determining what activities give rise to a trade or business for Section 199A purposes.

Additionally, section 469 is a loss limitation rule used to prevent taxpayers from sheltering passive losses with nonpassive income. The Section 199A deduction is not based on the level of a taxpayer’s involvement in the trade or business (that is, both active and passive owners of a trade or business may be entitled to a Section 199A deduction if they otherwise satisfy the requirements of Section 199A and these proposed regulations). Complicating matters further, a taxpayer’s section 469 groupings may include specified service trades or businesses, requiring separate rules to segregate the two categories of trades or businesses to calculate the Section 199A deduction.

Therefore, the grouping rules under section 469 are not appropriate for determining a trade or business for Section 199A purposes. Accordingly, the Treasury Department and the IRS are not adopting the section 469 grouping rules as the means by which taxpayers can aggregate trades or businesses for purposes of applying Section 199A.

Although it is not appropriate to apply the grouping rules under section 469 to Section 199A, the Treasury Department and the IRS agree with practitioners that some amount of aggregation should be permitted. It is not uncommon for what are commonly thought of as single trades or businesses to be operated across multiple entities. Trades or businesses may be structured this way for various legal, economic, or other non-tax reasons. The fact that businesses are operated across entities raises the question of whether, in defining trade or business for purposes of Section 199A, section 162 trades or businesses should be permitted or required to be aggregated or disaggregated, and if so, whether such aggregation or disaggregation should occur at the entity level or the individual level. Allowing taxpayers to aggregate trades or businesses offers taxpayers a means of combining their trades or businesses for purposes of applying the W-2 wage and UBIA of qualified property limitations and potentially maximizing the deduction under Section 199A. If such aggregation is not permitted, taxpayers could be forced to incur costs to restructure solely for tax purposes. In addition, business and non-tax law requirements may not permit many taxpayers to restructure their operations. Therefore, proposed § 1.199A-4 permits the aggregation of separate trades or businesses, provided certain requirements are satisfied.

The Treasury Department and the IRS are aware that many commenters were concerned with having multiple regimes for grouping (that is, under sections 199A, 1411, and 469). Accordingly, comments are requested on the aggregation method described in proposed § 1.199A-4, including whether this would be an appropriate grouping method for purposes of sections 469 and 1411, in addition to Section 199A.

B. Aggregation rules

Under proposed § 1.199A-4, aggregation is permitted but is not required. However, an individual may aggregate trades or businesses only if the individual can demonstrate that the requirements in proposed § 1.199A-4(b)(1) are satisfied. First, consistent with other provisions in the proposed regulations, each trade or business must itself be a trade or business as defined in § 1.199A-1(b)(13).

Second, the same person, or group of persons, must directly or indirectly, own a majority interest in each of the businesses to be aggregated for the majority of the taxable year in which the items attributable to each trade or business are included in income. All of the items attributable to the trades or businesses must be reported on returns with the same taxable year (not including short years). Proposed § 1.199A-4(b)(3) provides rules allowing for family attribution. Because the proposed rules look to a group of persons, non-majority owners may benefit from the common ownership and are permitted to aggregate. The Treasury Department and the IRS considered certain reporting requirements in which the majority owner or group of owners would be required to provide information about all of the other pass-through entities in which they held a majority interest. Due to the complexity and potential burden on taxpayers of such an approach, proposed § 1.199A-4 does not provide such a reporting requirement. The Treasury Department and the IRS request comments on whether a reporting or other information sharing requirement should be required.

Third, none of the aggregated trades or businesses can be an SSTB. Proposed § 1.199A-5 addresses SSTBs and trades or businesses with SSTB income.

Fourth, individuals and trusts must establish that the trades or businesses meet at least two of three factors, which demonstrate that the businesses are in fact part of a larger, integrated trade or business. These factors include: (1) the businesses provide products and services that are the same (for example, a restaurant and a food truck) or they provide products and services that are customarily provided together (for example, a gas station and a car wash); (2) the businesses share facilities or share significant centralized business elements (for example, common personnel, accounting, legal, manufacturing, purchasing, human resources, or information technology resources); or (3) the businesses are operated in coordination with, or reliance on, other businesses in the aggregated group (for example, supply chain interdependencies).

C. Individuals

An individual is permitted to aggregate trades or businesses operated directly and trades or businesses operated through RPEs. Individual owners of the same RPEs are not required to aggregate in the same manner.

An individual directly engaged in a trade or business must compute QBI, W-2 wages, and UBIA of qualified property for each trade or business before applying the aggregation rules. If an individual has aggregated two or more trades or businesses, then the combined QBI, W-2 wages, and UBIA of qualified property for all aggregated trades or businesses is used for purposes of applying the W-2 wage and UBIA of qualified property limitations described in proposed § 1.199A-1(d)(2)(iv).

D. RPEs

RPEs must compute QBI, W-2 wages, and UBIA of qualified property for each trade or business. An RPE must provide its owners with information regarding QBI, W-2 wages, and UBIA of qualified property attributable to its trades or businesses.

The Treasury Department and the IRS considered permitting aggregation by an RPE in a tiered structure. The Treasury Department and the IRS considered several approaches to tiered structures, including permitting only the operating entity to aggregate the trades or businesses or permitting each tier to add to the aggregated trade or business from a lower-tier, provided that the combined aggregated trade or business otherwise satisfied the requirements of proposed § 1.199A-4(b)(1) had the businesses all been owned by the lower-tier entity. The Treasury Department and the IRS are concerned that the reporting requirements needed for either of these rules would be overly complex for both taxpayers and the IRS to administer. In addition, because the Section 199A deduction is in all cases taken at the individual level, it should not be detrimental, and in fact may provide flexibility to taxpayers, to provide for aggregation at only one level. The Treasury Department and the IRS request comments on the proposed approach to tiered structures and the reporting necessary to allow an individual to demonstrate to which trades or businesses his or her QBI, W-2 wages, and UBIA of qualified property are attributable for purposes of calculating his or her Section 199A deduction.

E. Reporting and consistency

Proposed § 1.199A-4(c)(1) requires that once multiple trades or businesses are aggregated into a single aggregated trade or business, individuals must consistently report the aggregated group in subsequent tax years. Proposed § 1.199A-4(c)(1) provides rules for situations in which the aggregation rules are no longer met as well as rules for when a newly created or acquired trade or business can be added to an existing aggregated group.

Proposed § 1.199A-4(c)(2)(i) provides reporting and disclosure requirements for individuals that choose to aggregate, including identifying information about each trade or business that constitutes a part of the aggregated trade or business. Proposed § 1.199A-4(c)(2)(ii) allows the Commissioner to disaggregate trades or businesses if an individual fails to make the required aggregation disclosure. The Treasury Department and the IRS request comments as to whether it is administrable to create a standard under which trades or businesses will be disaggregated by the Commissioner and what that standard might be.

However, the final regulations change several aspects, as the preamble summarizes in the section explaining economic impact:[832]

The final regulations allow an RPE to aggregate trades or businesses it operates directly or through lower-tier RPEs for the purposes of calculating the Section 199A deduction in addition to allowing aggregation at the individual owner level. This change to the

[832] T.D. 9847 (2/8/2019), Special Analyses, part I, "Regulatory Planning and Review – Economic Analysis," subpart C, "Economic Analysis of Changes in Final Regulations," paragraph 2, "Entity Aggregation."

proposed rules allows RPEs, if they meet the ownership and other tests outlined in the regulations, to aggregate QBI, wages, and capital amounts and report aggregated figures to owners. This change was made in response to comments suggesting that allowing aggregation at the RPE level would simplify reporting and compliance efforts for owners because the RPEs may more easily obtain the information to determine whether the trades or businesses meet the tests for aggregation and whether it is beneficial to aggregate. Because RPEs that aggregate must meet all of the aggregation requirements, the change is consistent with the aggregation concept, which allows trades or businesses that operate across multiple entities but are commonly considered one business to benefit from calculating their Section 199A deduction using combined income and expenses.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part V "Aggregation," explains:

A. Overview

As described in part II of this Summary of Comments and Explanation of Revisions, the final regulations incorporate the principles of section 162 for determining whether a trade or business exists for purposes of Section 199A. A taxpayer can have more than one section 162 trade or business. See § 1.446-1(d)(1). Multiple trades or businesses can also be conducted within one entity. A trade or business, however, cannot generally be conducted across multiple entities for tax purposes. The preamble to the proposed regulations acknowledges that it is not uncommon for what may be thought of as single trades or businesses to be operated across multiple entities, for various legal, economic, or other non-tax reasons. It is because trades or businesses may be structured this way that the proposed regulations permit aggregation.

The proposed regulations provide a set of rules under which an individual can aggregate multiple trades or businesses for purposes of applying the W-2 wage and UBIA of qualified property limitations described in § 1.199A-1(d)(2)(iv). Based on comments received, the final regulations retain these rules with modifications as described in the remainder of this part V. The Treasury Department and the IRS received comments in support of the aggregation rules generally, though some commenters suggested that the grouping rules described in the regulations under section 469 be used to determine when a taxpayer may aggregate. The Treasury Department and the IRS decline to adopt this suggestion. For reasons stated in the proposed regulations (that is, the differences in the definition of trade or business, section 469's reliance on a taxpayer's level of involvement in the trade or business, and the use of separate rules for specified service trades or businesses), the Treasury Department and the IRS do not consider the grouping rules under section 469 an appropriate method for determining whether a taxpayer can aggregate trades or businesses for purposes of applying Section 199A. Another commenter suggested looking to the controlled group rules under section 414 rather than creating a new framework for aggregation. The Treasury Department and the IRS decline to adopt the controlled group rules under section 414 as those rules are too specific to be applied as a general aggregation rule under Section 199A.

The preamble to the proposed regulations requested comments on whether the aggregation method described in § 1.199A-4 would be an appropriate grouping method for purposes of sections 469 and 1411, in addition to Section 199A. One commenter suggested that the Section 199A aggregation method would not be an appropriate method for sections 469 and 1411 because the primary focus of grouping under those sections is based on the taxpayer's level of participation. Another commenter, noting that the standard for aggregation under the proposed regulations is narrower than the section 469 grouping requirements, recommended that taxpayers be permitted to adopt their Section 199A aggregation for purposes of section 469. The commenter stated that this would provide taxpayers with an option to mitigate the administrative burden of multiple grouping rules. The Treasury Department and the IRS continue to study this issue and request additional comments.

B. General Rules

The proposed regulations provide rules that allow a taxpayer to aggregate trades or businesses based on a 50-percent ownership test, which must be maintained for a majority of the taxable year. The final regulations clarify that majority of the taxable year must include the last day of the taxable year. One commenter requested guidance on whether each individual included in making the ownership determination must own an interest in each trade or business to be aggregated. Another commenter suggested that to avoid abuse in situations where actual overlapping ownership is low, anyone who owns less than 10 percent of the value of an enterprise could be excluded from the group of owners whose ownership is considered in testing. The commenter suggested clarification or modification of the overlapping ownership requirement including by requiring a minimum ownership threshold of the trades or businesses, or that the 50 percent test use each owner's lowest interest in the RPE. The ownership rule in the proposed regulations does not require that every person involved in the ownership determination own an interest in every trade or business. The rule is satisfied so long as one person or group of persons holds a 50 percent or more ownership interest in each trade or business. The Treasury Department and the IRS decline to require a minimum ownership threshold for purposes of the ownership test as the abuse potential is outweighed by the administrative complexity such a rule would create. The Treasury Department and the IRS note that trades or businesses to be aggregated must meet all of the requirements of § 1.199A-4, not just the ownership requirement.

Other commenters suggested that aggregation should be allowed for trades or businesses that do not meet the common ownership test if the general partner or managing member is the same for each entity. The Treasury Department and the IRS decline to adopt this recommendation. The aggregation rules are intended to allow aggregation of what is commonly thought of as a single trade or business where the business is spread across multiple entities. Common ownership is an essential element of a single trade or business.

Several commenters noted that the family attribution rules under Section 199A do not include grandparents, siblings, or adopted children. One commenter requested clarification that the family attribution rules would not cause an aggregated trade or business to cease to qualify for aggregation when children and grandchildren reached adulthood. A few commenters requested guidance on the manner in which beneficial interests in trusts are considered for purposes of the common ownership rule. Other commenters suggested that the attribution rules in sections 267 and 707 should be used in place of the family attribution rule. Another commenter suggested that final regulations provide a specific attribution rule that treats owners of entities as owning a pro rata share of any business owned by the entity for purposes of the 50 percent ownership test. Another commenter recommended defining "directly or indirectly" as used in the proposed regulations by reference to a specific ownership rule. The final regulations address these recommendations by requiring that the same person or group of persons, directly or by attribution through sections 267(b) or 707(b), own 50 percent or more of each trade or business. A C corporation may constitute part of this group.

In addition, the proposed regulations require that all items attributable to aggregated trades or businesses be reported on returns for the same taxable year. Several commenters recommended that this requirement be removed, arguing that trades or businesses that meet the ownership and factor tests could have different taxable years. The Treasury Department and the IRS decline to adopt this recommendation because the aggregation rules are intended for use in applying the W-2 wage and UBIA of qualified property limitations. As described in § 1.199A- 2(b), W-2 wages are determined based on a calendar year. Allowing trades or businesses with different taxable years to aggregate would require special rules for apportioning W-2 wages for purposes of applying the W-2 wage limitation. Accordingly, the final regulations retain the requirement that all of the items attributable to each trade or business to be aggregated are reported on returns at the trade or business level with the same taxable year, not taking into account short taxable years. One commenter asked for clarification regarding whether the majority of the taxable year requirement refers to the taxable year of the taxpayer claiming the deduction or of the RPE reporting the items. The aggregation rules are applied at the trade or business level. Accordingly, the majority of the taxable year requirement refers to the individual or RPE that conducts the trade or business to be aggregated.

The proposed regulations also provide that an SSTB cannot be aggregated. One commenter requested guidance on whether SSTBs with de minimis gross receipts are permitted to aggregate. A trade or business with gross receipts from a specified service activity below the de minimis thresholds described in § 1.199A-5(c)(1) is not treated as an SSTB and therefore may be aggregated under the rules described in § 1.199A-4. Another commenter suggested that the prohibition on aggregation for SSTBs is unnecessary because a taxpayer must combine W-2 wages and UBIA of qualified property for the aggregated trade or business prior to applying the W-2 wages and UBIA limitations. The commenter recommended that at a minimum, the prohibition be removed for taxpayers within the phase-in range and that taxpayers should be permitted to aggregate SSTBs with other SSTBs for reporting purposes. The Treasury Department and the IRS decline to adopt the recommendation to allow SSTBs to aggregate as doing so would increase administrative burden and complexity without providing significant benefit. Aggregation is intended to assist taxpayers in applying the W-2 wage and UBIA of qualified property limitations. A taxpayer with taxable income below the threshold amount does not need to apply the W- 2 wage and UBIA of qualified property limitations and therefore will not benefit from aggregation. Further, the Treasury Department and the IRS decline to adopt the recommendation that the prohibition on aggregation of SSTBs be removed for taxpayers with taxable income within the phase-in range as taxpayers may have taxable income within the phase-in range for some taxable years and taxable income that exceeds the phase-in range in other taxable years.

To determine whether trades or businesses may be aggregated, the proposed regulations provide that multiple trades or businesses must, among other requirements, satisfy two of three listed factors, which demonstrate that the businesses are part of a larger, integrated trade or business. These factors include: (1) The businesses provide products and services that are the same (for example, a restaurant and a food truck) or customarily provided together (for example, a gas station and a car wash); (2) the businesses share facilities or share significant centralized business elements (for example, common personnel, accounting, legal, manufacturing, purchasing, human resources, or information technology resources); or (3) the businesses are operated in coordination with, or reliance on, other businesses in the aggregated group (for example, supply chain interdependencies). Some commenters expressed support for the factors in the proposed regulations while others suggested modifications to the test. One commenter questioned whether, to meet the first factor, trades or businesses must provide both products and services that are the same. Another commenter noted that it is unclear how to apply the first factor with respect to real estate as real estate is neither a product nor a service. In response to these comments, the final regulations describe the first factor as products, property, or services that are the same or customarily offered together. Additionally, the final regulations add examples clarifying when a real estate trade or business satisfies the aggregation rules. Other commenters requested additional guidance on whether certain fact patterns regarding specific trades or businesses would satisfy a particular factor. The Treasury Department and the IRS decline to address specific fact patterns or trades or businesses because this test is based on all the facts and circumstances. Therefore, specific rules would be impractical and imprecise. Similarly, the Treasury Department and the IRS decline to define "significant" in terms of centralized business elements in the second factor because the answer is dependent on the facts and circumstances of each combination of trades and businesses.

Another commenter suggested that operational interdependence could be determined more precisely by using tests such as the twelve factor test outlined in § 1.469-4T(g)(3). The commenter noted that such a test would be less likely to inappropriately preclude a Section 199A deduction. Other commenters suggested that taxpayers be permitted to aggregate when two of the four factors are met. The Treasury Department and the IRS have carefully considered alternatives, including the factors outlined in § 1.469-4T(g)(3). Aggregation of multiple trades or businesses is not provided for in the statutory text, but was added to the regulations to enhance administrability for taxpayers and the IRS in situations when what is thought of as a single trade or business is operated across multiple entities for various legal, economic, or other non-tax reasons. Aggregation is optional and the inability to aggregate does not preclude a taxpayer with QBI from multiple trades or businesses from claiming a Section 199A deduction on the separate trades or businesses to the extent otherwise allowed by Section 199A and these regulations. The Treasury Department and the IRS believe that reducing the required number of factors would allow the aggregation of trades or businesses that are not owned and operated as integrated businesses. Conversely, adding new factors would increase complexity and burden for both taxpayers and the IRS. Accordingly, the final regulations retain the factors provided in the proposed regulations, modified to take real estate into account.

C. Aggregation by RPEs

Multiple commenters recommended that RPEs be permitted to aggregate at the entity level. One commenter suggested that allowing aggregation at the entity level would reduce reporting requirements if the owners or beneficiaries of the entity were required to follow the entity's aggregation. The commenter also suggested that entity aggregation would help non-majority owners by allowing them to benefit from aggregation without requiring the entity to provide ownership information. Another commenter suggested that reporting would be simplified if aggregation was allowed at the entity level when it is known that the owners want to aggregate. A third commenter suggested that aggregation should be allowed where each owner provides consent, including through provisions in the operating agreements. Another commenter suggested that if entity level aggregation is not allowed generally, an exception should be made for disregarded and wholly-owned entities.

The Treasury Department and the IRS agree that aggregation should be allowed at the entity level. Accordingly, the final regulations permit an RPE to aggregate trades or businesses it operates directly or through lower-tier RPEs. The resulting aggregation must be reported by the RPE and by all owners of the RPE. An individual or upper-tier RPE may not separate the aggregated trade or business of a lower-tier RPE, but instead must maintain the lower-tier RPE's aggregation. An individual or upper-tier RPE may aggregate additional trades or businesses with the lower-tier RPE's aggregation if the rules of § 1.199A-4 are otherwise satisfied. Each RPE in a tiered structure is subject to the disclosure and reporting requirements in § 1.199A- 4(c)(1). Further, as discussed in part II.C.1 of this Summary of Comments and Explanation of Revisions, § 1.199A-1(e)(2) of the final regulations provides that an entity with a single owner that is treated as disregarded as an entity separate from its owner under any other provision of the Code is disregarded for purposes of Section 199A and §§ 1.199A-1 through 1.199A-6.[833]

D. Reporting and Disclosure

The proposed regulations require consistent reporting of aggregated trades or businesses. Each individual who chooses to aggregate must attach a statement to their return annually identifying each trade or business to be aggregated. A few commenters requested clarification of these rules in situations in which a taxpayer did not aggregate or failed to report an aggregation. Several commenters suggested that taxpayers be required to file only one disclosure in the first year the taxpayer chooses to aggregate and that any subsequent aggregation information be reported on the same form used to report a taxpayer's Section 199A deduction. Further, these commenters suggested that taxpayers be allowed to remedy a failure to provide the required information by filing an amended return or upon examination, provided that the taxpayer can establish reasonable cause for the failure. One commenter recommended that any required aggregation information be reported on a form for the Section 199A deduction instead of as a separate statement. Additionally, commenters requested guidance as to whether a taxpayer is required to aggregate in its first year and if the failure to aggregate precludes aggregation in a later year. Finally, one commenter requested guidance regarding when a taxpayer could re-aggregate. The commenter suggested that options could include during an open season; after a change in circumstances; under a formal process similar to a change in accounting method; or based on a list of circumstances that would allow for automatic permission to re-aggregate.

Based on these comments, the final regulations provide that a taxpayer's failure to aggregate trades or businesses will not be considered to be an aggregation under this rule; that is, later aggregation is not precluded. The final regulations do not generally allow for an initial aggregation to be made on an amended return as this would allow aggregation decisions to be made with the benefit of hindsight. A taxpayer who fails or

[833] [footnote not in preamble:] See text accompanying fn 762 in part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

chooses not to aggregate in Year 1 can still choose to aggregate in Year 2 or other future year (but cannot amend returns to choose to aggregate for Year 1). A taxpayer who chooses to aggregate must continue to aggregate each taxable year unless there is a material change in circumstances that would cause a change to the aggregation. However, the Treasury Department and the IRS acknowledge that many individuals and RPEs may be unaware of the aggregation rules when filing returns for the 2018 taxable year. Therefore, the IRS will allow initial aggregations to be made on amended returns for the 2018 taxable year. The final regulations retain the annual disclosure requirement and, in order to provide flexibility as forms and instructions change, allow the Commissioner to require disclosure of information on aggregated trades or businesses as provided in a variety of formats including forms, instructions, or published guidance. The final regulations contain similar reporting and disclosure rules for RPEs.

The preamble to the proposed regulations requested comments on whether reporting requirements should be imposed on RPEs requiring majority owners to provide information about all of the other RPEs in which they hold a majority interest. One commenter stated that the extra time and cost of imposing additional reporting requirements on aggregated trades or businesses would not be worth the potential benefit a non-majority owner may gain by having such information. Another commenter suggested that the need for such a rule would be reduced if the final regulations allowed aggregation by RPEs. The Treasury Department and the IRS agree with these comments. Accordingly, the final regulations do not adopt a rule requiring the disclosure of such information to non-majority owners.

The proposed regulations permit the Commissioner to disaggregate trades or businesses if a taxpayer fails to attach the required annual disclosure. The preamble to the proposed regulations requested comments on an administrable standard under which trades or businesses will be disaggregated. One commenter suggested that a disaggregation rule is unnecessary because the Commissioner can always assert that an aggregation that was inappropriate should be disregarded. The commenter suggested that the Treasury Department and the IRS consider a rule allowing the Commissioner to aggregate trades or businesses in which the taxpayer engages in a transaction or series of transactions to divide trades or businesses in a manner that allows the taxpayer to use the aggregation rules to artificially increase the taxpayer's Section 199A deduction.

The Treasury Department and the IRS decline to adopt both of these suggestions. Although the Treasury Department and the IRS agree with the commenter that the Commissioner can always assert that an inappropriate aggregation should be disregarded, the reporting requirements, including the disaggregation rule, are necessary for the Commissioner to administer Section 199A in accordance with the statutory intent. The final regulations clarify that the disaggregation is not permanent by providing that trades or businesses that are disaggregated by the Commissioner may not be re-aggregated for the three subsequent taxable years, similar to the typical period during which a tax return may be audited. The Treasury Department and the IRS also decline to adopt the commenter's suggestion that the final regulations include an additional anti-abuse rule that would allow the Commissioner to aggregate trades or business in cases in which a division of the taxpayer's trades or businesses is used in conjunction with the aggregation rules with a principal purpose of increasing the taxpayer's Section 199A deduction. As explained in part II.D. of this Summary of Comments and Explanation of Revisions, taxpayers and entities can have more than one trade or business. The suggested anti-abuse rule is overly broad and would create unnecessary complexity for both taxpayers and the IRS.

> **E. Examples**
>
> The proposed regulations provide several examples of the aggregation rules. One commenter noted that proposed § 1.199A-4(b)(1)(i) refers to the capital or profits of a partnership while the examples refer to the capital and profits of a partnership. The language in the examples was intended to demonstrate that the taxpayers were sharing proportionately in all items. For clarification, the final regulations retain the reference to capital or profits in § 1.199A-4(b)(1)(i) and update the examples to remove the references to capital and profits.

Reg. § 1.199A-4(a), "Scope and purpose, provides:[834]

> An individual or RPE may be engaged in more than one trade or business. Except as provided in this section, each trade or business is a separate trade or business for purposes of applying the limitations described in § 1.199A-1(d)(2)(iv). This section sets forth rules to allow individuals and RPEs to aggregate trades or businesses, treating the aggregate as a single trade or business for purposes of applying the limitations described in § 1.199A-1(d)(2)(iv). Trades or businesses may be aggregated only to the extent provided in this section, but aggregation by taxpayers is not required.

Prop. Reg. § 1.199A-4 applies to taxable years ending after the date the Treasury decision adopting it as a final regulation is published in the Federal Register, but taxpayers may rely on it until the date the Treasury decision adopting it as final regulations is published in the Federal Register.[835]

Reg. § 1.199A-4(e), "Effective/ applicability date," provides:

> (1) *General rule*. Except as provided in paragraph (e)(2) of this section, the provisions of this section apply to taxable years ending after February 8, 2019.
>
> (2) *Exception for non-calendar year RPE*. For purposes of determining QBI, W-2 wages, and UBIA of qualified property, and the aggregate amount of qualified REIT dividends and qualified PTP income, if an individual receives any of these items from an RPE with a taxable year that begins before January 1, 2018, and ends after December 31, 2017, such items are treated as having been incurred by the individual during the individual's taxable year in which or with which such RPE taxable year ends.

---

[834] Reg. § 1.199A-1(d)(2)(iv) is reproduced in part II.E.1.c.v.(c) Calculation When Taxable Income Exceeds the Threshold Amount.

[835] Prop. Reg. § 1.199A-4(e)(1), which is expressly subject to Prop. Reg. § 1.199A-4(e)(2), "Exception for non-calendar year RPE," which provides:

> For purposes of determining QBI, W-2 wages, and UBIA of qualified property, if an individual receives any of these items from an RPE with a taxable year that begins before January 1, 2018 and ends after December 31, 2017, such items are treated as having been incurred by the individual during the individual's taxable year in which or with which such RPE taxable year ends.

Before getting into when one may aggregate, note that an election to treat more than one real estate rental activity as a single rental real estate enterprise under the optional safe harbor of Rev. Proc. 2019-38 constitutes an election to aggregate.[836]

Reg. § 1.199A-4(b)(1), "General rule," provides that trades or businesses may be aggregated only if an individual or RPE can demonstrate that -

(i) The same person or group of persons, directly or by attribution under sections 267(b) or 707(b), owns 50 percent or more of each trade or business to be aggregated, meaning in the case of such trades or businesses owned by an S corporation, 50 percent or more of the issued and outstanding shares of the corporation, or, in the case of such trades or businesses owned by a partnership, 50 percent or more of the capital or profits in the partnership;

(ii) The ownership described in paragraph (b)(1)(i) of this section exists for a majority of the taxable year, including the last day of the taxable year, in which the items attributable to each trade or business to be aggregated are included in income;

(iii) All of the items attributable to each trade or business to be aggregated are reported on returns with the same taxable year, not taking into account short taxable years;

(iv) None of the trades or businesses to be aggregated is a *specified service trade or business* (SSTB) as defined in § 1.199A-5; and

(v) The trades or businesses to be aggregated satisfy at least two of the following factors (based on all of the facts and circumstances):

  (A) The trades or businesses provide products, property, or services that are the same or customarily offered together.

  (B) The trades or businesses share facilities or share significant centralized business elements, such as personnel, accounting, legal, manufacturing, purchasing, human resources, or information technology resources.

  (C) The trades or businesses are operated in coordination with, or reliance upon, one or more of the businesses in the aggregated group (for example, supply chain interdependencies).

Code § 267(b) is reproduced in part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses. For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

These aggregation rules are very different than the passive loss rules under parts II.K.1.b Grouping Activities, II.K.1.e.ii Self-Rental Converts Rental to Nonpassive Activity, and II.K.1.e.iii.(b) Aggregating Real Estate Activities for a Real Estate Professional.

[Below are references to Examples in Reg. § 1.199A-4(d). Each Example is bookmarked so that users of the full set of materials can click on it and go to the Example. Each Example has

[836] See text accompanying fn 958 in part II.E.1.e.i.(a) Whether Real Estate Activity Constitutes A Trade Or Business. For flexibility in choosing which properties can be combined, see text accompanying fn 960 in that part.

its own subparagraph, so that Example (1) is Reg. § 1.199A-4(d)(1), Example (2) is Reg. § 1.199A-4(d)(2), etc.]

As to the Reg. § 1.199A-4(b)(1)(i) ownership requirement:

- It allows partnerships and S corporations to be aggregated (which is often important for real estate, which often is held by a partnership that leases it to an S corporation).[837] Example (3) provides, "W owns more than 50% of the stock of S1 and more than 50% of PRS thereby satisfying paragraph (b)(1)(i) of this section." Example (8) concludes, "G owns more than 50% of the stock of S1 and more than 50% of LLC1 and LLC2 thus satisfying paragraph (b)(1)(i) of this section."

- Example (5), allowing a 10% owner to aggregate when another person owned more than 50%, implements the statement from the preamble above, "Because the proposed rules look to a group of persons, non-majority owners may benefit from the common ownership and are permitted to aggregate." So does Example (10), allowing 5% and 10% owners to aggregate.

- Example (9) shows that family attribution can allow an owner to satisfy Reg. § 1.199A-4(b)(1)(i).

Only passthrough activities can be aggregated. Example (11).

Regarding the Reg. § 1.199A-4(b)(1)(v)(B) requirement that "the trades or businesses share facilities or share significant centralized business elements, such as personnel, accounting, legal, manufacturing, purchasing, human resources, or information technology resources":

- Example (1) states that subparagraph (b) was satisfied when two businesses, a catering business and a restaurant, "share the same kitchen facilities in addition to centralized purchasing, marketing, and accounting."[838]

- In Example (3), the 75% owner of two businesses manages the businesses, but the Example states that does not satisfy subparagraph (b).

- In Example (4), "A team of executives oversees the operations of all four of the businesses and controls the policy decisions involving the business as a whole. Human resources and accounting are centralized for the four businesses." The analysis concludes that subparagraph (b) is satisfied "because the businesses share accounting and human resource functions." The analysis implicitly seems to suggest that having a team of

---

[837] In part II.E.1.e.i General Rules Regarding U.S. Real Estate under Code § 199A, fn 951 refers back to these Examples. That part demonstrates that real estate might not qualify as a trade or business and mentions that leasing it to a business under common control under Reg. § 1.199A-4(b)(1)(i) can allow the rental to be eligible for the Code § 199A deduction.

[838] Facts included the following, with A being the common sole owner:

> The catering business and the restaurant share centralized purchasing to obtain volume discounts and a centralized accounting office that performs all of the bookkeeping, tracks and issues statements on all of the receivables, and prepares the payroll for each business. A maintains a website and print advertising materials that reference both the catering business and the restaurant. A uses the restaurant kitchen to prepare food for the catering business. The catering business employs its own staff and owns equipment and trucks that are not used or associated with the restaurant.

executives overseeing operations and controlling policy decisions adds little or no weight to analyzing how subparagraph (b) operates but rather places great weight on common accounting and human resource functions.

- In Example (6), two businesses share “centralized purchasing functions to obtain volume discounts and a centralized accounting office that performs all of the bookkeeping, tracks and issues statements on all of the receivables, and prepares the payroll for each business.” The Example analysis concludes that subparagraph (b) is satisfied “because of their centralized purchasing and accounting offices.”

- Example (7) has the same facts as Example (6), but the businesses “do not have centralized purchasing or accounting functions.” Its analysis concludes that taking away these centralized functions prevents subparagraph (b) from being satisfied.

- In Example (8), sharing “common advertising and management” appears to satisfy subparagraph (b) because they are viewed as sharing “significant centralized business elements.”

- In Example (10), a 5% owner of various restaurants, G, “is the executive chef of all of the restaurants and as such he creates the menus and orders the food supplies.” The Example’s analysis concludes, “paragraph (b)(1)(v)(B) of this section is satisfied as G is the executive chef of all of the restaurants and the businesses share a centralized function for ordering food and supplies.”

- Example (14) states that subparagraph (b) is satisfied when the businesses “have a centralized human resources department, payroll, and accounting department.”

For what is an SSTB, when being concerned about violating the Reg. § 1.199A-4(b)(1)(iv) prohibition against aggregating SSTBs,[839] see part II.E.1.c.iv Specified Service Trade or Business.

Reg. § 1.199A-4(b)(2), “Operating rules,” explains how an individual or an RPE may aggregate:

(i) *Individuals*. An individual may aggregate trades or businesses operated directly or through an RPE to the extent an aggregation is not inconsistent with the aggregation of an RPE. If an individual aggregates multiple trades or businesses under paragraph (b)(1) of this section, QBI, W-2 wages, and UBIA of qualified property must be combined for the aggregated trades or businesses for purposes of applying the W-2 wage and UBIA of qualified property limitations described in § 1.199A-1(d)(2)(iv). An individual may not subtract from the trades or businesses aggregated by an RPE but may aggregate additional trades or businesses with the RPE’s aggregation if the rules of this section are otherwise satisfied.

(ii) *RPEs*. An RPE may aggregate trades or businesses operated directly or through a lower-tier RPE to the extent an aggregation is not inconsistent with the aggregation of a lower-tier RPE. If an RPE itself does not aggregate, multiple owners of an RPE need not aggregate in the same manner. If an RPE aggregates multiple trades or businesses under paragraph (b)(1) of this section, the RPE must compute and report

[839].Reg. § 1.199A-4(d)(10), Example (10) implicitly assumes that restaurants owned in part and run to a large degree by an executive chef are not SSTBs.

QBI, W-2 wages, and UBIA of qualified property for the aggregated trade or business under the rules described in § 1.199A- 6(b). An RPE may not subtract from the trades or businesses aggregated by a lower-tier RPE but may aggregate additional trades or businesses with a lower-tier RPE's aggregation if the rules of this section are otherwise satisfied.

Reg. § 1.199A-1(d)(2)(iv) is reproduced in part II.E.1.c.v.(c) Calculation When Taxable Income Exceeds the Threshold Amount.

Reg. § 1.199A-4(c), "Reporting and consistency requirements," provides:

(1) *Individuals*. Once an individual chooses to aggregate two or more trades or businesses, the individual must consistently report the aggregated trades or businesses in all subsequent taxable years. A failure to aggregate will not be considered to be an aggregation for purposes of this rule. An individual that fails to aggregate may not aggregate trades or businesses on an amended return (other than an amended return for the 2018 taxable year). However, an individual may add a newly created or newly acquired (including through non-recognition transfers) trade or business to an existing aggregated trade or business (including the aggregated trade or business of an RPE) if the requirements of paragraph (b)(1) of this section are satisfied. In a subsequent year, if there is a significant change in facts and circumstances such that an individual's prior aggregation of trades or businesses no longer qualifies for aggregation under the rules of this section, then the trades or businesses will no longer be aggregated within the meaning of this section, and the individual must reapply the rules in paragraph (b)(1) of this section to determine a new permissible aggregation (if any). An individual also must report aggregated trades or businesses of an RPE in which the individual holds a direct or indirect interest.

(2) *Individual disclosure* –

(i) *Required annual disclosure*. For each taxable year, individuals must attach a statement to their returns identifying each trade or business aggregated under paragraph (b)(1) of this section. The statement must contain –

(A) A description of each trade or business;

(B) The name and EIN of each entity in which a trade or business is operated;

(C) Information identifying any trade or business that was formed, ceased operations, was acquired, or was disposed of during the taxable year;

(D) Information identifying any aggregated trade or business of an RPE in which the individual holds an ownership interest; and

(E) Such other information as the Commissioner may require in forms, instructions, or other published guidance.

(ii) *Failure to disclose*. If an individual fails to attach the statement required in paragraph (c)(2)(i) of this section, the Commissioner may disaggregate the individual's trades or businesses. The individual may not aggregate trades or businesses that are disaggregated by the Commissioner for the subsequent three taxable years.

(3) *RPEs*. Once an RPE chooses to aggregate two or more trades or businesses, the RPE must consistently report the aggregated trades or businesses in all subsequent taxable years. A failure to aggregate will not be considered to be an aggregation for purposes of this rule. An RPE that fails to aggregate may not aggregate trades or businesses on an amended return (other than an amended return for the 2018 taxable year). However, an RPE may add a newly created or newly acquired (including through non-recognition transfers) trade or business to an existing aggregated trade or business (other than the aggregated trade or business of a lower-tier RPE) if the requirements of paragraph (b)(1) of this section are satisfied. In a subsequent year, if there is a significant change in facts and circumstances such that an RPE's prior aggregation of trades or businesses no longer qualifies for aggregation under the rules of this section, then the trades or businesses will no longer be aggregated within the meaning of this section, and the RPE must reapply the rules in paragraph (b)(1) of this section to determine a new permissible aggregation (if any). An RPE also must report aggregated trades or businesses of a lower-tier RPE in which the RPE holds a direct or indirect interest.

(4) *RPE disclosure* –

(i) *Required annual disclosure*. For each taxable year, RPEs (including each RPE in a tiered structure) must attach a statement to each owner's Schedule K-1 identifying each trade or business aggregated under paragraph (b)(1) of this section. The statement must contain -

(A) A description of each trade or business;

(B) The name and EIN of each entity in which a trade or business is operated;

(C) Information identifying any trade or business that was formed, ceased operations, was acquired, or was disposed of during the taxable year;

(D) Information identifying any aggregated trade or business of an RPE in which the RPE holds an ownership interest; and

(E) Such other information as the Commissioner may require in forms, instructions, or other published guidance.

(ii) *Failure to disclose*. If an RPE fails to attach the statement required in paragraph (c)(2)(i) of this section, the Commissioner may disaggregate the RPE's trades or businesses. The RPE may not aggregate trades or businesses that are disaggregated by the Commissioner for the subsequent three taxable years.

As mentioned above, under the proposed regulations only an individual could aggregate, and the final regulations allow an RPE to aggregate. If an RPE aggregates, an owner may aggregate other businesses with the RPTE's aggregated businesses, but only if all of the businesses in this further aggregation qualify to be aggregated with each other. In other words, an RPE's aggregation cannot be used to let its owners bootstrap in a way that combines businesses that could have not been aggregated at the owner level if the RPE had not itself aggregated the businesses. Example (15) illustrates this idea and also shows how an RPE's decision to aggregate can impair its owners' ability to aggregate; see the discussion immediately following Example (15) elaborating on this issue.

Reg. § 1.199A-4(d) provides the examples listed in the rest of this part II.E.1.c.iii.(d), all of which include the following assumptions:[840]

> The following examples illustrate the principles of this section. For purposes of these examples, assume the taxpayer is a United States citizen, all individuals and RPEs use a calendar taxable year, there are no ownership changes during the taxable year, all trades or businesses satisfy the requirements under section 162, all tax items are effectively connected to a trade or business within the United States within the meaning of section 864(c), and none of the trades or businesses is an SSTB within the meaning of § 1.199A-5. Except as otherwise specified, a single capital letter denotes an individual taxpayer.

Reg. § 1.199A-4(d)(1), Example (1) provides:

> (i) *Facts*. A wholly owns and operates a catering business and a restaurant through separate disregarded entities. The catering business and the restaurant share centralized purchasing to obtain volume discounts and a centralized accounting office that performs all of the bookkeeping, tracks and issues statements on all of the receivables, and prepares the payroll for each business. A maintains a website and print advertising materials that reference both the catering business and the restaurant. A uses the restaurant kitchen to prepare food for the catering business. The catering business employs its own staff and owns equipment and trucks that are not used or associated with the restaurant.
>
> (ii) *Analysis*. Because the restaurant and catering business are held in disregarded entities, A will be treated as operating each of these businesses directly and thereby satisfies paragraph (b)(1)(i) of this section. Under paragraph (b)(1)(v) of this section, A satisfies the following factors: Paragraph (b)(1)(v)(A) of this section is met as both businesses offer prepared food to customers; and paragraph (b)(1)(v)(B) of this section is met because the two businesses share the same kitchen facilities in addition to centralized purchasing, marketing, and accounting. Having satisfied paragraphs (b)(1)(i) through (v) of this section, A may treat the catering business and the restaurant as a single trade or business for purposes of applying § 1.199A-1(d).

Reg. § 1.199A-4(d)(2), Example (2) provides:

> (i) *Facts*. Assume the same facts as in *Example 1* of this paragraph, but the catering and restaurant businesses are owned in separate partnerships and A, B, C, and D each own a 25% interest in each of the two partnerships. A, B, C, and D are unrelated.
>
> (ii) *Analysis*. Because under paragraph (b)(1)(i) of this section A, B, C, and D together own more than 50% of each of the two partnerships, they may each treat the

[840] Example (16), Example (17), and Example (18) follow the cross-reference to these assumptions in fn 967 in part II.E.1.e.i.(b) Aggregating Real Estate Businesses.

catering business and the restaurant as a single trade or business for purposes of applying § 1.199A-1(d).

Reg. § 1.199A-4(d)(3), Example (3) provides:

(i) *Facts*. W owns a 75% interest in S1, an S corporation, and a 75% interest in PRS, a partnership. S1 manufactures clothing and PRS is a retail pet food store. W manages S1 and PRS.

(ii) *Analysis*. W owns more than 50% of the stock of S1 and more than 50% of PRS thereby satisfying paragraph (b)(1)(i) of this section. Although W manages both S1 and PRS, W is not able to satisfy the requirements of paragraph (b)(1)(v) of this section as the two businesses do not provide goods or services that are the same or customarily offered together; there are no significant centralized business elements; and no facts indicate that the businesses are operated in coordination with, or reliance upon, one another. We [sic] must treat S1 and PRS as separate trades or businesses for purposes of applying § 1.199A-1(d).

Reg. § 1.199A-4(d)(4), Example (4) provides:

(i) *Facts*. E owns a 60% interest in each of four partnerships (PRS1, PRS3, and PRS4). Each partnership operates a hardware store. A team of executives oversees the operations of all four of the businesses and controls the policy decisions involving the business as a whole. Human resources and accounting are centralized for the four businesses. E reports PRS1, PRS3, and PRS4 as an aggregated trade or business under paragraph (b)(1) of this section and reports PRS2 as a separate trade or business. Only PRS2 generates a net taxable loss.

(ii) *Analysis*. E owns more than 50% of each partnership thereby satisfying paragraph (b)(1)(i) of this section. Under paragraph (b)(1)(v) of this section, the following factors are satisfied: Paragraph (b)(1)(v)(A) of this section because each partnership operates a hardware store; and paragraph (b)(1)(v)(B) of this section because the businesses share accounting and human resource functions. E's decision to aggregate only PRS1, PRS3, and PRS4 into a single trade or business for purposes of applying § 1.199A-1(d) is permissible. The loss from PRS2 will be netted against the aggregate profits of PRS1, and PRS4 pursuant to § 1.199A-1(d)(2)(iii).

Reg. § 1.199A-4(d)(5), Example (5) provides:

(i) *Facts*. Assume the same facts as *Example 4* of paragraph (d)(4) of this paragraph, and that F owns a 10% interest in PRS1, PRS2, PRS3, and PRS4.

(ii) *Analysis*. Because under paragraph (b)(1)(i) of this section E owns more than 50% of the four partnerships, F may aggregate PRS 1, PRS2, PRS3, and PRS4 as a single trade or business for purposes of applying § 1.199A-1(d), provided that F can demonstrate that the ownership test is met by E.

Reg. § 1.199A-4(d)(6), Example (6) provides:

(i) *Facts*. D owns 75% of the stock of S1, S2, and S3, each of which is an S corporation. Each S corporation operates a grocery store in a separate state. S1 and S2 share centralized purchasing functions to obtain volume discounts and a centralized accounting office that performs all of the bookkeeping, tracks and issues statements on all of the receivables, and prepares the payroll for each business. S3 is operated independently from the other businesses.

(ii) *Analysis*. D owns more than 50% of the stock of each S corporation thereby satisfying paragraph (b)(1)(i) of this section. Under paragraph (b)(1)(v) of this section, the grocery stores satisfy paragraph (b)(1)(v)(A) of this section because they are in the same trade or business. Only S1 and S2 satisfy paragraph (b)(1)(v)(B) of this section because of their centralized purchasing and accounting offices. D is only able to show that the requirements of paragraph (b)(1)(v)(B) of this section are satisfied for S1 and S2; therefore, D only may aggregate S1 and S2 into a single trade or business for purposes of § 1.199A-1(d). D must report S3 as a separate trade or business for purposes of applying § 1.199A- 1(d).

Reg. § 1.199A-4(d)(7), Example (7) provides:

(i) *Facts*. Assume the same facts as *Example 6* of paragraph (d)(6) of this paragraph except each store is independently operated and S1 and S2 do not have centralized purchasing or accounting functions.

(ii) *Analysis*. Although the stores provide the same products and services within the meaning of paragraph (b)(1)(v)(A) of this section, D cannot show that another factor under paragraph (b)(1)(v) of this section is present. Therefore, D must report S1, S2, and S3 as separate trades or businesses for purposes of applying § 1.199A-1(d).

Reg. § 1.199A-4(d)(8), Example (8) provides:

(i) *Facts*. G owns 80% of the stock in S1, an S corporation and 80% of LLC1 and LLC2, each of which is a partnership for Federal tax purposes. LLC1 manufactures and supplies all of the widgets sold by LLC2. LLC2 operates a retail store that sells LLC1's widgets. S1 owns the real property leased to LLC1 and LLC2 for use by the factory and retail store. The entities share common advertising and management.

(ii) *Analysis*. G owns more than 50% of the stock of S1 and more than 50% of LLC1 and LLC2 thus satisfying paragraph (b)(1)(i) of this section. LLC1, LLC2, and S1 share significant centralized business elements and are operated in coordination with, or in reliance upon, one or more of the businesses in the aggregated group. G can treat the business operations of LLC1 and LLC2 as a single trade or business for purposes of applying § 1.199A-1(d). S1 is eligible to be included in the aggregated group because it leases property to a trade or business within the aggregated trade or business as described in § 1.199A-1(b)(14) and meets the requirements of paragraph (b)(1) of this section.

Reg. § 1.199A-1(b)(14) provides in part:[841]

> … rental or licensing of tangible or intangible property (rental activity) that does not rise to the level of a section 162 trade or business is nevertheless treated as a trade or business for purposes of Section 199A, if the property is rented or licensed to a trade or business conducted by the individual or an RPE which is commonly controlled under § 1.199A-4(b)(1)(i) (regardless of whether the rental activity and the trade or business are otherwise eligible to be aggregated under § 1.199A-4(b)(1)).

Reg. § 1.199A-4(d)(9), Example (9) provides:

> (i) *Facts*. Same facts as *Example 8* of paragraph (d)(8) of this section, except G owns 80% of the stock in S1 and 20% of each of LLC1 and LLC2. B, G's son, owns a majority interest in LLC2, and M, G's mother, owns a majority interest in LLC1. B does not own an interest in S1 or LLC1, and M does not own an interest in S1 or LLC2.
>
> (ii) *Analysis*. Under the rules in paragraph (b)(1) of this section, B and M's interest in LLC2 and LLC1, respectively, are attributable to G and G is treated as owning a majority interest in LLC2 and LLC1; G thus satisfies paragraph (b)(1)(i) of this section. G may aggregate his interests in LLC1, LLC2, and S1 as a single trade or business for purposes of applying § 1.199A-1(d). Under paragraph (b)(1) of this section, S1 is eligible to be included in the aggregated group because it leases property to a trade or business within the aggregated trade or business as described in § 1.199A-1(b)(14) and meets the requirements of paragraph (b)(1) of this section.

Reg. § 1.199A-4(d)(10), Example (10) provides:

> (i) *Facts*. F owns a 75% interest and G owns a 5% interest in five partnerships (PRS1-PRS5). H owns a 10% interest in PRS1 and PRS2. Each partnership operates a restaurant and each restaurant separately constitutes a trade or business for purposes of section 162. G is the executive chef of all of the restaurants and as such he creates the menus and orders the food supplies.
>
> (ii) *Analysis*. F owns more than 50% of the partnerships thereby satisfying paragraph (b)(1)(i) of this section. Under paragraph (b)(1)(v) of this section, the restaurants satisfy paragraph (b)(1)(v)(A) of this section because they are in the same trade or business, and paragraph (b)(1)(v)(B) of this section is satisfied as G is the executive chef of all of the restaurants and the businesses share a centralized function for ordering food and supplies. F can show the requirements under paragraph (b)(1) of this section are satisfied as to all of the restaurants. Because F owns a majority interest in each of the partnerships, G can demonstrate that paragraph (b)(1)(i) of this section is satisfied. G can also aggregate all five restaurants into a single trade or business for purposes of applying § 1.199A-1(d). H, however, only owns an interest in PRS1 and PRS2. Like G, H satisfies paragraph (b)(1)(i) of this section because F owns a majority interest. H can,

[841] Reg. § 1.199A-1(b)(14) is reproduced in full in fn 804 in part II.E.1.c.iii.(a) General Standards for "Trade or Business" for Code § 199A.

therefore, aggregate PRS1 and PRS2 into a single trade or business for purposes of applying § 1.199A-1(d).

Reg. § 1.199A-4(d)(11), Example (11) provides:

(i) *Facts*. H, J, K, and L own interests in PRS1 and PRS2, each a partnership, and S1 and S2, each an S corporation. H, J, K, and L also own interests in C, an entity taxable as a C corporation. H owns 30%, J owns 20%, K owns 5%, and L owns 45% of each of the five entities. All of the entities satisfy 2 of the 3 factors under paragraph (b)(1)(v) of this section. For purposes of Section 199A the taxpayers report the following aggregated trades or businesses: H aggregates PRS1 and S1 together and aggregates PRS2 and S2 together; J aggregates PRS1, S1 and S2 together and reports PRS2 separately; K aggregates PRS1 and PRS2 together and aggregates S1 and S2 together; and L aggregates S1, S2, and PRS2 together and reports PRS1 separately. C cannot be aggregated.

(ii) *Analysis*. Under paragraph (b)(1)(i) of this section, because H, J, and K together own a majority interest in PRS1, PRS2, S1, and S2, H, J, K, and L are permitted to aggregate under paragraph (b)(1) of this section. Further, the aggregations reported by the taxpayers are permitted, but not required for each of H, J, K, and L. C's income is not eligible for the Section 199A deduction and it cannot be aggregated for purposes of applying § 1.199A-1(d).

Reg. § 1.199A-4(d)(12), Example (12) provides:

(i) *Facts*. L owns 60% of PRS1, a partnership, a business that sells non-food items to grocery stores. L also owns 55% of PRS2, a partnership, which owns and operates a distribution trucking business. The predominant portion of PRS2's business is transporting goods for PRS1.

(ii) *Analysis*. L is able to meet paragraph (b)(1)(i) of this section as the majority owner of PRS1 and PRS2. Under paragraph (b)(1)(v) of this section, L is only able to show the operations of PRS1 and PRS2 are operated in reliance of one another under paragraph (b)(1)(v)(C) of this section. For purposes of applying § 1.199A-1(d), L must treat PRS1 and PRS2 as separate trades or businesses.

Example (12)'s point is that satisfying only one of the three factors in Reg. § 1.199A-4(b)(1)(v) is not enough.

Reg. § 1.199A-4(d)(13), Example (13) provides:

(i) *Facts*. C owns a majority interest in a sailboat racing team and also owns an interest in PRS1 which operates a marina. PRS1 is a trade or business under section 162, but the sailboat racing team is not a trade or business within the meaning of section 162.

(ii) *Analysis*. C has only one trade or business for purposes of Section 199A and, therefore, cannot aggregate the interest in the racing team with PRS1 under paragraph (b)(1) of this section.

Contrast Example (13) with Examples (8) and (9) above, which referred to Reg. § 1.199A-1(b)(14), which allows rental activity that does not rise to the level of trade or business to be treated as a trade or business.[842] The sailboat racing team is not a trade or business in the facts of Example (13), and Example (13) implicitly assume it is not tangible or intangible property rented or licensed to the marina.

Reg. § 1.199A-4(d)(14), Example (14) provides:

(i) *Facts*. Trust wholly owns LLC1, LLC2, and LLC3. LLC1 operates a trucking company that delivers lumber and other supplies sold by LLC2. LLC2 operates a lumber yard and supplies LLC3 with building materials. LLC3 operates a construction business. LLC1, LLC2, and LLC3 have a centralized human resources department, payroll, and accounting department.

(ii) *Analysis*. Because Trust owns 100% of the interests in LLC1, LLC2, and LLC3, Trust satisfies paragraph (b)(1)(i) of this section. Trust can also show that it satisfies paragraph (b)(1)(v)(B) of this section as the trades or businesses have a centralized human resources department, payroll, and accounting department. Trust also can show is meets paragraph (b)(1)(v)(C) of this section as the trades or businesses are operated in coordination, or reliance upon, one or more in the aggregated group. Trust can aggregate LLC1, LLC2, and LLC3 for purposes of applying § 1.199A-1(d).

Reg. § 1.199A-4(d)(15), Example (15) provides:

(i) *Facts*. PRS1, a partnership, directly operates a food service trade or business and owns 60% of PRS2, which directly operates a movie theater trade or business and a food service trade or business. PRS2's movie theater and food service businesses operate in coordination with, or reliance upon, one another and share a centralized human resources department, payroll, and accounting department. PRS1's and PRS2's food service businesses provide products and services that are the same and share centralized purchasing and shipping to obtain volume discounts.

(ii) *Analysis*. PRS2 may aggregate its movie theater and food service businesses. Paragraph (b)(1)(v) of this section is satisfied because the businesses operate in coordination with one another and share centralized business elements. If PRS does aggregate the two businesses, PRS1 may not aggregate its food service business with PRS2's aggregated trades or businesses. Because PRS1 owns more than 50% of PRS2, thereby satisfying paragraph (b)(1)(i) of this section, PRS1 may aggregate its food service businesses with PRS2's food service business if PRS2 has not aggregated its movie theater and food service businesses.
Paragraph (b)(1)(v) of this section is satisfied because the businesses provide the same products and services and share centralized business elements. Under either alternative, PRS1's food service business and PRS2's movie theater cannot be aggregated because there are no factors in paragraph (b)(1)(v) of this section present between the businesses.

Example (15) illustrates some key ideas when RPEs aggregate:

[842] See text accompanying fn 841.

- Under the above facts, PRS1's food service business cannot under any circumstances be aggregated with PRS2's movie theater business. Example (15) provides that PRS2's aggregation of its two businesses cannot be used to bootstrap the aggregation of PRS1's food service business with PRS2's movie theater business.

- PRS2's aggregation of its two businesses would prevent PRS2's food service business with PRS1's food service business. What at first seems to be a convenient aggregation at the PRS2 level in fact precludes an option that PRS1 may like to have.

- Given the preceding bullet point, arguably an RPE should not aggregate unless its owners cannot benefit different mixing and matching of the RPE's various businesses with their own businesses. Instead, the RPE should provide to its owners all of the information it would have provided if it had aggregated, as well as ownership information sufficient to enable them to determine whether they can aggregate.

- The above bullet point says "arguably" because this decision is very much a judgment call. The RPE itself aggregating may save its owners income tax preparers' significant time and therefore significant expense. Often, aggregating horizontally (various businesses within the same RPE) is much more beneficial than aggregating vertically (the same business spread among various RPEs). Aggregation's benefits tend to be maximized when a business with lots of W-2 wages can share them with a separate but related business that does not have lots of W-2 wages. This is illustrated by Gorin Example 15A below:

<u>Gorin Example 15A</u>:

A is a group of owners that owns Parent 1 and Parent 2. Parent 1 has a manufacturing subsidiary, M1, and a real estate LLC, R1. Similarly, Parent 2 has a manufacturing subsidiary, M2, and a real estate LLC, R2. M1's operations are not sufficiently integrated with R2's operations to aggregate with it, and M2's operations are not sufficiently integrated with R1's operations to aggregate with it. Each of M1 and M2 relies heavily on labor and has wages well in excess of what is needed to maximize the QBI deduction. M1 rents from R1 the building it uses, and the R1 has very small wages and insufficient UBIA to get anywhere near needed to maximize the QBI deduction; a similar relationship exists between M2 and R2. If Parent 1 aggregates M1 with R1, M1's wages will fully support the QBI deduction from both M1 and R1. On the other hand, that aggregation may preclude A from aggregating M1 with M2. However, M1 doesn't need M-2's W-2 wages, because M2 also has lots of W-2 wages - due to the similarity of their businesses. Similarly, aggregating R1 with R2 would be pointless.

The simplest approach would be for Parent 1 to aggregate M1 with R1 and for Parent 2 to aggregate M2 with R2. That would save the tax return preparers for each person within the A ownership group from having to do the work needed to do those aggregations themselves. However:

- Each member of the A ownership group would have the ability to separately do those aggregations if Parent 1 and Parent 2 did not do them.

- If any member of the A ownership group would be better off with vertical aggregation (aggregating all manufacturers together and all commercial rental real estate together) than with horizontal aggregation (aggregating manufacturing with real estate operations), then that member should communicate with whoever is managing Parent 1 and Parent 2 and ask them not to aggregate.

- Similarly, management of Parent 1 and Parent 2 should communicate with their owners to see whether anyone objects to Parent 1 or Parent 2 aggregating.

- However, just because one member of the A ownership group (X) asks management not to aggregate, that doesn't mean that management will honor that member's request. Management needs to weigh the costs of forcing everyone to aggregate against X's benefit and may need to bring this issue to the owners to let them decide how to deal with it.

- For example, the other owners may agree to bear the cost of separate aggregation elections as a favor to X, who is a valuable business partner in many projects; or X may agree to pay for the costs imposed on the other owners of Parent 1 and Parent 2, out of concern for the extra costs X is making everyone else bear.

- When in doubt, management should prepare aggregation statements that each owner's tax preparers could tweak as needed and attach. That allows the work for making an aggregation election to be done at the entity level, where the work is most efficient, while allowing each owner to do his/her/its own thing. Given that an aggregation election is irrevocable, consider taking this approach for 2018 and then in 2019 or a future year perhaps making an RPE-level aggregation election if everyone agrees.

For Example (16), Example (17), and Example (18), see part II.E.1.e.i General Rules Regarding U.S. Real Estate .

II.E.1.c.iv. Specified Service Trade or Business (SSTB) If Taxable Income Exceeds Certain Thresholds

II.E.1.c.iv.(a). Introduction to Specified Service Trade or Business (SSTB)

Reg. § 1.199A-5(a)(2), "Effect of being an SSTB," provides:

> If a trade or business is an SSTB, no qualified business income (QBI), W-2 wages, or unadjusted basis immediately after acquisition (UBIA) of qualified property from the SSTB may be taken into account by any individual whose taxable income exceeds the phase-in range as defined in § 1.199A-1(b)(4), even if the item is derived from an activity that is not itself a specified service activity. The SSTB limitation also applies to income earned from a publicly traded partnership (PTP). If a trade or business conducted by a relevant passthrough entity (RPE) or PTP is an SSTB, this limitation applies to any direct or indirect individual owners of the business, regardless of whether the owner is passive or participated in any specified service activity. However, the SSTB limitation does not apply to individuals with taxable income below the threshold amount as defined in § 1.199A-1(b)(12). A phase-in rule, provided in § 1.199A- 1(d)(2), applies to individuals with taxable income within the phase-in range, allowing them to take into account a certain "applicable percentage" of QBI, W-2 wages, and UBIA of qualified property from an SSTB. The phase-in rule also applies to income earned from a PTP. A direct or indirect owner of a trade or business engaged in the performance of a specified service is engaged in the performance of the specified service for purposes of Section 199A and this section, regardless of whether the owner is passive or participated in the specified service activity.

A "specified service trade or business" is any trade or business other than (A) certain businesses listed in Code § 1202(e)(3)(A) that do not qualify for the Code § 1202 exclusion from capital gain on the sale of C corporation stock, or (B) which involves the performance of services that consist of investing and investment management, trading, or dealing in securities (as defined in Code § 475(c)(2)), partnership interests, or commodities (as defined in Code § 475(e)(2)).[843]

Code § 1202(e)(3)(A), which is discussed in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation, fns. 5243-5244, lists as a "specified service trade or business" (SSTB) any trade or business involving the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, consulting, athletics, financial services, brokerage services, or any other trade or business where the principal asset of such trade or business is the reputation or skill of one or more of its employees. However, Code § 199A(d)(2)(A) specifically excludes engineering and architecture from this blacklist, so that those professions do qualify for QBI treatment. Also, Code § 199A(d)(2)(A) specifically looks to the work of not only employees but also owners.

This blacklisting of a specified service trade or business is relaxed or does not apply if taxable income is below certain thresholds.[844] See part II.E.1.c.v.(a) Taxable Income "Threshold.

Getting into details:

Prop. Reg. § 1.199A-5(e) provides the effective date of Prop. Reg. § 1.199A-5 (described below), regarding SSTBs and the trade or business of being an employee:[845]

(1) *General rule*. Except as provided in paragraph (e)(2) of this section, the provisions of this section apply to taxable years ending after the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register. However, taxpayers may rely on the rules of this section until the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register.

(2) *Exceptions*.

(i) *Anti-abuse rules*. The provisions of paragraphs (c)(2), (c)(3), and (d)(3) of this section apply to taxable years ending after December 22, 2017.

(ii) *Non-calendar year RPE*. For purposes of determining QBI, W-2 wages, and UBIA of qualified property, if an individual receives any of these items from an RPE with a taxable year that begins before January 1, 2018 and ends after December 31, 2017, such items are treated as having been incurred by the individual during the individual's taxable year in which or with which such RPE taxable year ends.

Reg. § 1.199A-5(e) provides the effective date of Reg. § 1.199A-5, regarding SSTBs and the trade or business of being an employee:

(1) *General rule*. Except as provided in paragraph (e)(2) of this section, the provisions of this section apply to taxable years ending after February 8, 2019.

[843] Code § 199A(d)(2).
[844] Code § 199A(d)(3).
[845] For the latter, see part II.E.1.c.ii.(b) Trade or Business of Being an Employee (Excluded from QBI).

(2) *Exceptions* –

(i) *Anti-abuse rules*. The provisions of paragraphs (c)(2) and (d)(3) of this section apply to taxable years ending after December 22, 2017.

(ii) *Non-calendar year RPE*. For purposes of determining QBI, W-2 wages, UBIA of qualified property, and the aggregate amount of qualified REIT dividends and qualified PTP income, if an individual receives any of these items from an RPE with a taxable year that begins before January 1, 2018, and ends after December 31, 2017, such items are treated as having been incurred by the individual during the individual's taxable year in which or with which such RPE taxable year ends.

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), provides:

V. Proposed § 1.199A-5: Specified Service Trade or Business and the Trade or Business of Performing Services as an Employee

Section 199A(c)(1) provides that only items attributable to a qualified trade or business are taken into account in determining the Section 199A deduction for QBI.
Section 199A(d)(1) provides that a "qualified trade or business" means any trade or business other than (A) an SSTB, or (B) the trade or business of performing services as an employee.

A. SSTB

This part V.A. explains the provisions under proposed § 1.199A-5 relating to SSTBs. First, the effect of classification as an SSTB is discussed. Second, the exceptions for taxpayers below the threshold amount and a de minimis exception are described. Third, guidance is provided on the meaning of the activities listed in the definition of SSTB. Fourth, the rules for determining whether a trade or business is treated as part of an SSTB are described. Finally, rules regarding classification as an employee for purposes of Section 199A are discussed.

1. Effect of being an SSTB

a. General Rule

Consistent with Section 199A, proposed § 1.199A-5(a)(2) provides that, unless an exception applies, if a trade or business is an SSTB, none of its items are to be taken into account for purposes of determining a taxpayer's QBI. In the case of an SSTB conducted by an entity, such as a partnership or an S corporation, if it is determined that the trade or business is an SSTB, none of the income from that trade or business flowing to an owner of the entity is QBI, regardless of whether the owner participates in the specified service activity. Therefore, a direct or indirect owner of a trade or business engaged in an SSTB is treated as engaged in the SSTB for purposes of Section 199A regardless of whether the owner is passive or participated in the SSTB. Similarly, none of the W-2 wages or UBIA of qualified property will be taken into account for purposes of Section 199A. For example, because the field of athletics is an SSTB, if a partnership owns a professional sports team, the partners' distributive shares of income from the partnership's athletics trade or business is not QBI, regardless of whether the partners participate in the partnership's trade or business. Proposed § 1.199A-5 contains further examples illustrating the operation of this rule.

b. Exceptions to the General Rule

Under Section 199A(d)(3), individuals with taxable income below the threshold amount are not subject to a restriction with respect to SSTBs. Therefore, if an individual or trust has taxable income below the threshold amount, the individual or trust is eligible to receive the deduction under Section 199A notwithstanding that a trade or business is an SSTB. As described in part I.C of this Explanation of Provisions, the exclusion of QBI, W-2 wages, and UBIA of qualified property from the computation of the Section 199A deduction is subject to a phase-in for individuals with taxable income within the phase-in range. The application of this phase-in is determined at the individual, trust, or estate level, which may not be where the trade or business is operated. Therefore, if a partnership or an S corporation operates an SSTB, the application of the threshold does not depend on the partnership or S corporation's taxable income but rather, the taxable income of the individual partner or shareholder claiming the Section 199A deduction. For example, if the partnership's taxable income is less than the threshold amount, but each of the partnership's individual partners have income that exceeds the threshold amount plus $50,000 ($100,000 in the case of a joint return) then none of the partners may claim a Section 199A deduction with respect to any income from the partnership's SSTB.

An RPE conducting an SSTB may not know whether the taxable income of any of its equity owners is below the threshold amount. However, the RPE is best positioned to make the determination as to whether its trade or business is an SSTB. Therefore, reporting rules under proposed § 1.199A-6(b)(3)(B) requires each RPE to determine whether it conducts an SSTB and disclose that information to its partners, shareholders, or owners. With respect to each trade or business, once it is determined that a trade or business is an SSTB, it remains an SSTB and cannot be aggregated with other trades or business. In the case of a trade or business conducted by an individual, such as a sole proprietorship, disregarded entity, or grantor trust, the determination of whether the business is an SSTB is made by the individual.

Section 199A defines an SSTB to include any trade or business that "involves the performance of services in" a specified service activity. Although the statute, read literally, does not suggest that a certain quantum of specified service activity is necessary to find an SSTB, the Treasury Department and the IRS believe that requiring all taxpayers to evaluate and quantify any amount of specified service activity would create administrative complexity and undue burdens for both taxpayers and the IRS. Therefore, analogous to the regulations under section 448, it is appropriate to provide a de minimis rule, under which a trade or business will not be considered to be an SSTB merely because it provides a small amount of services in a specified service activity.

Therefore, analogous to the regulations under section 448, it is appropriate to provide a de minimis rule, under which a trade or business will not be considered to be an SSTB merely because it provides a small amount of services in a specified service activity.

Accordingly, proposed § 1.199A-5(c)(1) provides that a trade or business (determined before the application of the aggregation rules in proposed § 1.199A-4) is not an SSTB if the trade or business has gross receipts of $25 million or less (in a taxable year) and less than 10 percent of the gross receipts of the trade or business is attributable to the performance of services in an SSTB. For trades or business with gross receipts greater than $25 million (in a taxable year), a trade or business is not an SSTB if less than 5 percent of the gross receipts of the trade or business are attributable to the performance of services in an SSTB.

2. Definition of Specified Service Trade or Business

The definition of an SSTB set forth in Section 199A incorporates, with modifications, the text of section 1202(e)(3)(A). The text of section 1202(e)(3)(A) substantially tracks the definition of 'qualified personal service corporation' under section 448. Therefore, consistent with ordinary rules of statutory construction, the guidance in proposed § 1.199A-5(b) is informed by existing interpretations and guidance under both sections 1202 and 448 when relevant. However, existing guidance under those sections is sparse and the scope and purpose of those sections and Section 199A are different. The Treasury Department and the IRS also note that, unlike sections 1202(e)(3)(A) and 448, the purpose of Section 199A is to provide a deduction based on the character of the taxpayer's trade or business. Distinct guidance for Section 199A is warranted. Therefore, the guidance in proposed § 1.199A-5(b) applies only to Section 199A, not sections 1202 and 448.

a. Guidance on the Meaning of the Listed Activities

Section 199A(d)(2)(A) provides that an SSTB is any trade or business described in section 1202(e)(3)(A) (applied without regard to the words "engineering [and] architecture") or that would be so described if the term "employees or owners" were substituted for "employees" therein. Section 199A(d)(2)(B) provides that an SSTB is any trade or business that involves the performance of services that consist of investing and investment management, trading, or dealing in securities (as defined in section 475(c)(2)), partnership interests, or commodities (as defined in section 475(e)(2)).

Section 1202 provides an exclusion from gross income for some or all of the gain on the sale of certain qualified small business stock. Section 1202 generally requires that, for stock to be qualified small business stock, the corporation must be engaged in a qualified trade or business. Section 1202(e)(3) provides that, for purposes of section 1201(e), the term 'qualified trade or business' means any trade or business other than any trade or business involving the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, consulting, athletics, financial services, brokerage services, or any trade or business where the principal asset of such trade or business is the reputation or skill of 1 or more of its employees; any banking, insurance, financing, leasing, investing, or similar business; any farming business (including the business of raising or harvesting trees); any business involving the production or extraction of products of a character with respect to which a deduction is allowable under section 613 or 613A, and; any business of operating a hotel, motel, restaurant, or similar business.

Thus, after application of the modifications described in Section 199A(d)(2)(A), the definition of an SSTB for purposes of Section 199A is (1) any trade or business involving the performance of services in the fields of health, law, accounting, actuarial science, performing arts, consulting, athletics, financial services, brokerage services, or any trade

> or business where the principal asset of such trade or business is the reputation or skill of one or more of its employees or owners, and (2) any trade or business that involves the performance of services that consist of investing and investment management, trading, or dealing in securities (as defined in section 475(c)(2)), partnership interests, or commodities (as defined in section 475(e)(2)).
>
> The Treasury Department and the IRS have received comments requesting guidance on the meaning and scope of the various trades or businesses described in the preceding paragraph. The Treasury Department and the IRS agree with commenters that guidance with respect to these trades or businesses is necessary for several reasons. Most importantly, Section 199A is a new Code provision intended to benefit a wide range of businesses, and taxpayers need certainty in determining whether their trade or business generates income that is eligible for the Section 199A deduction. As previously discussed, given the differing scope, objectives, and, in some respects, language of sections 199A, 448, and 1202, the guidance under sections 1202(e)(3)(A) and 448(d)(2) is not an appropriate substitute for clear and distinct guidance governing what constitutes an SSTB under Section 199A. In particular, some SSTBs are listed in section 1202(e)(3)(A), but not listed in section 448(d)(2), such as athletics, financial services, brokerage services, and any trade or business where the principal asset of such trade or business is the reputation or skill of one or more of its employees or owners. In addition, some activities are mentioned only in 199A, such as investment management, trading, and dealing. As described in the remainder of this part V.A.2., proposed § 1.199A-5(b) provides guidance on the definition of an SSTB based on the plain meaning of the statute, past interpretations of substantially similar language in other Code provisions, and other indicia of legislative intent.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.1. explains the general rules for the definition of a specified service trade or business:

> The proposed regulations provide definitional guidance on the meaning of a trade or business involving the performance of services in each of the fields listed in Section 199A(d)(2). Multiple commenters requested guidance on whether specific trades or businesses would constitute SSTBs. In many cases, the determination of whether a specific trade or business is an SSTB depends on whether the facts and circumstances demonstrate that the trade or business is in one of the listed fields. Although the Treasury Department and the IRS understand the desire for certainty, because the determination of whether a particular trade or business is an SSTB is factually dependent, this analysis is beyond the scope of these regulations.
>
> Several commenters argued that the meaning of performance of services in the various fields should be limited to the definitions provided in § 1.448-1T(e)(4). A few commenters noted that any expansion beyond these definitions is contrary to legislative intent as expressed in “Tax Cuts and Jobs Act,” Statement of Managers to the Conference Report to Accompany H.R. 1, H.R. Rept. 115-466 (Dec. 15, 2017), p. 216-222. These commenters argue that the Statement of Managers notes that the committee adopted the Senate Amendment and described the section 448 regulations as an indicator of the meaning of services in the health, performing arts, and consulting fields referenced in section 1202(e)(3)(A) as incorporated by Section 199A. The Treasury Department and the IRS decline to adopt these comments. While the Statement of Managers does reference § 1.448-1T(e)(4), nothing in the language of the report limits the definitions for purposes of Section 199A to those provided in § 1.448-

1T(e)(4). Section 199A does not reference section 448; instead, Section 199A incorporates section 1202(e)(3)(A) with modifications. The Treasury Department and the IRS believe it is appropriate to look to the definitions provided for in the regulations under section 448 because guidance under section 1202 is limited. However, as stated in the preamble to the proposed regulations, the existing guidance under section 448 is not a substitute for guidance under Section 199A.

The intent of section 448 and the intent of Section 199A are different. Section 448 prohibits certain taxpayers from computing taxable income under the cash receipts and disbursements method of accounting. Qualified personal services corporations are excluded from this prohibition. Section 448(d)(2) defines the term qualified personal service corporation to include certain employee-owned corporations, substantially all of the activities of which involve the performance of services in the fields of health, law, engineering architecture, accounting, actuarial sciences, performing arts, or consulting. By contrast, Section 199A provides a deduction based on QBI from a qualified trade or business. For taxpayers with taxable income above the phase-in range, an SSTB is not a qualified trade or business. Section 199A, through reference to section 1202, defines an SSTB as a trade or business involving the performance of services in the fields of health, law, accounting, actuarial science, performing arts, consulting, athletics, financial services, brokerage services, or any trade or business where the principal asset of such trade or business is the reputation or skill of one or more of its employees or owners. The trade or business of the performance of services that consist of investing and investment management, trading, or dealing in securities (as defined in (c)(2)), partnership interests, or commodities (as defined in section 475(e)(2)) is also defined as an SSTB for purposes of Section 199A. Further, Section 199A looks to the trade or business of performing services involving one or more of the listed fields, and not the performance of services themselves in determining whether a trade or business is an SSTB. The designation of a trade or business as an SSTB applies to owners of the trade or business, regardless of whether the owner is passive or participated in any specified service activity. Accordingly, it is both necessary and consistent with the statute and the legislative history to expand the definitions of the fields of services listed in Section 199A(d)(1) and (2) and § 1.199A-5 beyond those provided in § 1.448-1T(e)(4).

One commenter suggested that in order to provide certainty and further economic growth, the final regulations should include a franchising example to clarify that a franchisor will not be considered to be an SSTB based solely on the selling of a franchise in a listed field of service. The Treasury Department and the IRS adopt this comment and have included a franchising example in the final regulations.

Finally, the final regulations add two rules of general application. First, the final regulations specify that the rules for determining whether a business is an SSTB within the meaning of Section 199A(d)(2) apply solely for purposes of Section 199A and therefore, may not be taken into account for purposes of applying any other provision of law, except to the extent that another provision expressly refers to Section 199A(d). Second, the final regulations include a hedging rule that is applicable to any trade or business conducted by an individual or an RPE. The hedging rule provides that income, deduction, gain, or loss from a hedging transaction entered into in the normal course of a trade or business is included as income, deduction, gain, or loss from that trade or business. A hedging transaction for these purposes is defined in § 1.1221-2(b) and the timing rules of § 1.446-4 are also applicable.

The remainder of this part VI.A. responds to those comments advocating that a specific category of trade or business should be excluded from one of the listed fields in section 199(d)(2) or from the SSTB provisions entirely.

The preamble to the 2018 proposed regulations then provides an overview of parts II.E.1.c.iv.(b) Health, II.E.1.c.iv.(c) Law, II.E.1.c.iv.(d) Accounting, II.E.1.c.iv.(e) Actuarial Science, II.E.1.c.iv.(f) Performing Arts, II.E.1.c.iv.(g) Consulting, II.E.1.c.iv.(h) Athletics, II.E.1.c.iv.(i) Financial Services, II.E.1.c.iv.(j) Brokerage Services, and II.E.1.c.iv.(n) Any Trade or Business Where the Principal Asset of Such Trade or Business Is the Reputation or Skill of One or More of Its Employees or Owners:

i. SSTBs Listed in Section 199A(d)(2)(A)

The definition of an SSTB under Section 199A is substantially similar to the list of service trades or businesses provided in section 448(d)(2)(A) and § 1.448-1T(e)(4)(i), as the legislative history notes. See Joint Explanatory Statement of the Committee of Conference, footnotes 44-46. Section 448 prohibits certain taxpayers from computing taxable income under the cash receipts and disbursements method of accounting. Under section 448, qualified personal service corporations generally are not subject to the prohibition from using the cash method. Section 448(d)(2) defines the term qualified personal service corporation to include certain employee-owned corporations, substantially all of the activities of which involve the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting. The regulations under section 448(d)(2), found in § 1.448-1T(e)(4)(i), provide additional guidance on several of the terms, including health, performing arts, and consulting. In addition, there have been several court opinions, technical advice memoranda, and private letter rulings interpreting the various fields listed in section 448(d)(2) and § 1.448-1T(e)(4)(i).

In general, the guidance under section 448(d)(2) emphasizes the direct provision of services by the employees of a trade or business, rather than the application of capital. Commenters have suggested that the regulations under section 448 serve as a reasonable starting point for defining an SSTB for purposes of Section 199A. However, commenters also noted that the objectives and included categories of trades or businesses within section 448 and Section 199A are different. Consistent with ordinary rules of statutory construction and the legislative history of Section 199A, proposed § 1.199A-5(b) draws upon the existing guidance under section 448(d)(2) when appropriate for purposes of Section 199A. Proposed § 1.199A-5(b) generally follows the guidance issued under section 448(d)(2) with some modifications. In certain instances, the principles of section 448(d)(2) provide useful analogies in defining the particular fields listed in section 1202(e)(3)(A) (as modified by Section 199A(d)(2)(A)) for purposes of Section 199A.

In addition, section 1202(e)(3)(A) also includes 'any trade or business where the principal asset of such trade or business is the reputation of skill of 1 or more of its employees.' Section 199A(d)(2)(A) modifies this clause by adding the words 'or owners' to the end, to read as follows: 'any trade or business where the principal asset of such trade or business is the reputation or skill of 1 or more of its employees or owners.' The meaning of this clause is best determined by examining the language of section 1202(e)(3) (A) in light of the purpose of Section 199A.

> Case law under section 448 provides that whether a service is performed in a qualifying field under section 448(d)(2) is to be decided by examining all relevant indicia and is not controlled by state licensing laws. *See Rainbow Tax Serv., Inc. v. Commissioner*, 128 T.C. 42 (2007); *Kraatz & Craig Surveying Inc., v. Commissioner*, 134 T.C. 167 (2010). This approach also is appropriate for Section 199A purposes.
>
> Additionally, states can widely vary in what they require in terms of licensure or certification. The Treasury Department and the IRS believe that the Federal tax law should not treat similarly situated taxpayers differently based on a particular state's decision that for consumer protection purposes or otherwise a particular business type requires a license or certification. Thus, proposed § 1.199A-5(b) does not adopt a bright-line licensing rule for purposes of determining whether a trade or business is within a certain field for purposes of Section 199A.

The preamble to the 2018 proposed regulations then provides an overview of parts II.E.1.c.iv.(k) Investing and Investment Management, II.E.1.c.iv.(l) Trading, and II.E.1.c.iv.(m) Dealing in Securities, Partnership Interests, or Commodities:

> **ii. SSTBs Described in 199A(d)(2)(B)**
>
> As mentioned previously, Section 199A(d)(2)(B) provides that an SSTB also includes any trade or business that involves the performance of services that consist of investing and investment management, trading, or dealing in securities (as defined in section 475(c)(2)), partnership interests, or commodities (as defined in section 475(e)(2)). This rule does not appear in section 1202(e)(3)(A) or section 448(d)(2).
>
> Section 475(c)(2) provides a detailed list of interests treated as securities, including stock in a corporation; ownership interests in widely held or publicly traded partnerships or trusts; notes, bonds, debentures, or other evidences of indebtedness; interest rate, currency, or equity notional principal contracts; evidences of an interest in, or derivative financial instruments in any of the foregoing securities or any currency, including any option, forward contract, short position, or any similar financial instruments; and certain hedges with respect to any such securities. Section 475(e)(2) provides a similarly detailed list of property treated as a commodity, including any commodity which is actively traded (within the meaning of section 1092(d)(1)) or any notional principal contract with respect to any such commodity, evidences of an interest in, or derivative financial instruments in any of the foregoing commodities, and certain hedges with respect to any such commodities.

The preamble then provides some anti-abuse rules, which are in part II.E.1.c.iv.(o).

Implementing the above, Reg. § 1.199A-5(b), "Definition of specified service trade or business," provides:

> Except as provided in paragraph (c)(1) of this section, the term specified service trade or business (SSTB) means any of the following:
>
> (1) *Listed SSTBs*. Any trade or business involving the performance of services in one or more of the following fields:

(i) *Health* as described in paragraph (b)(2)(ii) of this section;

(ii) *Law* as described in paragraph (b)(2)(iii) of this section;

(iii) *Accounting* as described in paragraph (b)(2)(iv) of this section;

(iv) *Actuarial science* as described in paragraph (b)(2)(v) of this section;

(v) *Performing arts* as described in paragraph (b)(2)(vi) of this section;

(vi) *Consulting* as described in paragraph (b)(2)(vii) of this section;

(vii) *Athletics* as described in paragraph (b)(2)(viii) of this section;

(viii) *Financial services* as described in paragraph (b)(2)(ix) of this section;

(ix) *Brokerage services* as described in paragraph (b)(2)(x) of this section;

(x) *Investing and investment management* as described in paragraph (b)(2)(xi) of this section;

(xi) *Trading* as described in paragraph (b)(2)(xii) of this section;

(xii) *Dealing in securities (as defined in section 475(c)(2)), partnership interests, or commodities (as defined in section 475(e)(2))* as described in paragraph (b)(2)(xiii) of this section; or

(xiii) *Any trade or business where the principal asset of such trade or business is the reputation or skill of one or more of its employees or owners* as defined in paragraph (b)(2)(xiv) of this section.

(2) *Additional rules for applying Section 199A(d)(2) and paragraph (b) of this section*.

(i) *In general*.

(A) *No effect on other tax rules*. This paragraph (b)(2) provides additional rules for determining whether a business is an SSTB within the meaning of Section 199A(d)(2) and paragraph (b) of this section only. The rules of this paragraph (b)(2) apply solely for purposes of Section 199A and therefore may not be taken into account for purposes of applying any provision of law or regulation other than Section 199A and the regulations thereunder, except to the extent such provision expressly refers to Section 199A(d) or this section.

(B) *Hedging transactions*. Income, deduction, gain or loss from a hedging transaction (as defined in § 1.1221-2(b)) entered into by an individual or RPE in the normal course of the individual's or RPE's trade or business is treated as income, deduction, gain, or loss from that trade or business for purposes of this paragraph (b)(2). See also § 1.446-4.

Reg. § 1.199A-5(b)(3), "Examples," provides caveats to its examples that are reproduced below in various parts of this part II.E.1.c.iv:

> The following examples illustrate the rules in paragraphs (a) and (b) of this section. The examples do not address all types of services that may or may not qualify as specified services. Unless otherwise provided, the individual in each example has taxable income in excess of the threshold amount.

The distributive share of a person who provides SSTB services or property in exchange for an interest in an RPE may be recharacterized as an SSTB, even though the RPE itself is not engaged in an SSTB. See Reg. § 1.199A-5(b)(3)(xvi), Example (16) [click on citation for caveats].

II.E.1.c.iv.(b). Health

Footnote 44 of the Senate report commented about the services in the field of health:

> A similar list of service trades or business is provided in section 448(d)(2)(A) and Treas. Reg. sec. 1.448-1T(e)(4)(i). For purposes of section 448, Treasury regulations provide that the performance of services in the field of health means the provision of medical services by physicians, nurses, dentists, and other similar healthcare professionals. The performance of services in the field of health does not include the provision of services not directly related to a medical field, even though the services may purportedly relate to the health of the service recipient. For example, the performance of services in the field of health does not include the operation of health clubs or health spas that provide physical exercise or conditioning to their customers. See Treas. Reg. sec. 1.448-1T(e)(4)(ii).

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Health":

> Proposed § 1.199A-5(b)(2)(ii) is informed by the definition of 'health' under section 448 and provides that the term 'performance of services in the field of health' means the provision of medical services by physicians, pharmacists, nurses, dentists, veterinarians, physical therapists, psychologists, and other similar healthcare professionals who provide medical services directly to a patient. The performance of services in the field of health does not include the provision of services not directly related to a medical field, even though the services may purportedly relate to the health of the service recipient. For example, the performance of services in the field of health does not include the operation of health clubs or health spas that provide physical exercise or conditioning to their customers, payment processing, or research, testing, and manufacture and/or sales of pharmaceuticals or medical devices.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.2, "Health," explains:

> Multiple commenters submitted comments requesting additional guidance on the meaning of performance of services in the field of health. Several commenters recommended that the definition of the performance of services in the field of health should differentiate between institutional health care providers (such as skilled nursing homes), which bill on a fee-for-service or per diem-basis, versus health care providers who provide and bill for professional services (such as a physician's practice). Another commenter suggested a distinction between these types of providers based on whether the trade or business had made the capital investment necessary to function as a custodial institution. One commenter recommended the definition be restricted to health

care providers who derive a majority of their revenue from billing patients and third party payers for professional services, thereby excluding health care providers who derive a majority of their revenue from billing for institutional services (skilled nursing facilities, hospitals, ambulatory surgery centers, home health care agencies, outpatient radiology centers, and hospice agencies).

Commenters noted the many services that skilled nursing facilities and assisted living facilities provide are unrelated to health care, including housing, meals, laundry facilities, security, and socialization activities. In some cases, skilled nursing and similar facilities may make available independent contractors who provide services related to health care available to patients, without the facility receiving any payment or revenue with respect to such services. Another commenter suggested that skilled nursing facilities, assisted living, and similar facilities should be excluded from the definition of services in the field of health unless 95 percent or more of the time spent by employees of the facility are directly related to providing medical care.

The Treasury Department and the IRS agree that skilled nursing, assisted living, and similar facilities provide multi-faceted services to their residents. Whether such a facility and its owners are in the trade or business of performing services in the field of health requires a facts and circumstances inquiry that is beyond the scope of these final regulations. The final regulations provide an additional example of one such facility offering services that the Treasury Department and the IRS do not believe rises to the level of the performance of services in the field of health.

Several commenters asked for clarification regarding when two separate activities would generally be viewed separately, particularly in the context of health care facilities such as emergency centers, urgent care centers, and surgical centers that provide improved real estate and equipment but do not directly provide treatment or diagnostic care to service recipients. One commenter noted that there is precedent under section 469 for distinguishing between the provision of direct treatment and diagnostic care versus the business of providing services or facilities ancillary to direct care, even if the physicians own an interest in the entity owning the facilities. The commenter suggested that the final regulations provide examples or other clarification regarding when these and similar facilities will be treated as performing services in the field of health, particularly if one of the owners of a facility also performs medical services in the facility. The final regulations provide an additional example of an outpatient surgical center demonstrating a fact pattern that the Treasury Department and the IRS do not believe is a trade or business providing services in the field of health.

Several commenters requested clarification regarding whether a retail pharmacy selling pharmaceuticals or medical devices is engaged in a health service trade or business. One commenter suggested that final regulations include an example of when a pharmacist would be considered in the health profession. The commenter agreed that a pharmacist working as an independent contractor at various pharmacies, a pharmacist providing inoculations directly to the patient, and a consulting pharmacist working as an independent contractor would all be examples of a pharmacist engaged in an SSTB. Another commenter stated that the inclusion of pharmacists in the definition might be overbroad, suggesting that a pharmacist who was also a pharmacy owner generating revenue from selling pharmaceuticals or medical devices would not be engaged in an SSTB while a pharmacist operating as a consultant and paid as an independent contractor would be engaged in an SSTB. A third commenter suggested that a pharmacist working as an independent contractor for several pharmacies would not be performing services in the field of health unless the pharmacists provide medical services, such as inoculations, directly to a patient.

The Treasury Department and the IRS agree that the sale of pharmaceuticals and medical devices by a retail pharmacy is not by itself a trade or business performing services in the field of health. As the commenters note, however, some services provided by a retail pharmacy through a pharmacist are the performance of services in the field of health. The final regulations provide an additional example of a pharmacist performing services in the field of health.

Another commenter argued that gene therapy and similar injectable products such as stem cell therapy and RNA-based therapies manufactured or produced from the patient's body itself should be treated in the same manner as pharmaceuticals. The commenter argued that their manufacture and production should not be treated as an SSTB, regardless of whether they take place in a hospital or in a separate production facility. The Treasury Department and the IRS decline to adopt this recommendation as this is a question of facts and circumstances.

Another commenter argued that veterinary medicine should not be considered an SSTB. The commenter stated that delivery of veterinary care is different than delivery of human health care because veterinary patients are property and the nature of the animal may dictate the level of veterinary care provided by the owner. Most veterinary practices have other streams of income such as retail, laboratory and diagnostic services, boarding and grooming services, and pharmacies, and the commenter expressed concern that it would be difficult for veterinarians to segregate those other streams of income. The commenter noted that animal boarding and grooming would ordinarily generate income eligible for the deduction and that should not change when services are provided by a veterinarian. The commenter also stated that Federal health legislation does not apply to veterinarians unless the legislation specifically refers to veterinarians, veterinary medicine, or animal health. Finally, the commenter noted that § 1.448-1T(e)(4)(ii) does not reference veterinarians, suggesting that this is an indication that Congress did not intend for veterinary medicine to be treated as a business in the field of health.

Issued nearly three decades ago, Rev. Rul. 91-30, 1991-1 C.B. 61, described a corporation in which employees spend all of their time in the performance of veterinary services, including diagnostic and recuperative services as well as activities, such as the boarding and grooming of animals, that are incident to the performance of these services. The ruling also describes the definition of the performance of services in the field of health contained in § 1.448- 1T(e)(4)(ii) and holds that a corporation whose employees perform veterinary services is a qualified personal service corporation within the meaning of sections 448(d)(2) and 11(b)(2) and a personal service corporation within the meaning of section 441(i). Accordingly, the Treasury Department and the IRS believe that it is appropriate to continue the long-standing treatment of veterinary services as the performance of services in the field of health for purposes of Section 199A and these final regulations.

Another commenter noted that there is a dividing line between physical therapists and other health-related occupations. For example, reimbursement rates from third-party payers are higher for doctors, nurses, and dentists. The commenter also noted that

> Congress initially attempted to exclude physical therapists from participating in Medicare and Medicaid incentive programs and health service student loan forgiveness programs. The Treasury Department and the IRS decline to adopt this comment as multiple health services are reimbursed differently, but are still within the field of health.
>
> One commenter suggested that services are not performed in the field of health unless services are performed directly to a patient. As an example, the commenter argued that a physician who reads x-rays for another physician but does not work directly with the patient would not be performing a service in the field of health. Another commenter stated that defining services in the field of health by proximity to patients could lead to arbitrary results, pointing out that a radiologist who acts as an expert consultant to a physician engages in the same exercise of medical skills and judgment as a physician who sees patients. The commenter suggested that technicians who operate medical equipment or test samples, but are not required to exercise medical judgment should not be considered as performing services in the field of health. The Treasury Department and the IRS agree with the second commenter that proximity to patients is not a necessary component of providing services in the field of health. Accordingly, the final regulations remove the requirement that medical services be provided directly to the patient. The final regulations do not adopt the suggestion that technicians who operate medical equipment or test samples are not considered to be performing services in the field of health as this is a question of fact. However, the final regulations do include an additional example related to laboratory services.

For additional preamble on the selling of medical devices by a person in the field of health, see part II.E.1.c.iv.(o) SSTB Very Broad Gross Receipts Test and Anti-Abuse Rules.

Reg. § 1.199A-5(b)(2)(ii), "Meaning of services performed in the field of health," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(i) of this section only, the *performance of services in the field of health* means the provision of medical services by individuals such as physicians, pharmacists, nurses, dentists, veterinarians, physical therapists, psychologists, and other similar healthcare professionals performing services in their capacity as such. The performance of services in the field of health does not include the provision of services not directly related to a medical services field, even though the services provided may purportedly relate to the health of the service recipient. For example, the performance of services in the field of health does not include the operation of health clubs or health spas that provide physical exercise or conditioning to their customers, payment processing, or the research, testing, and manufacture and/or sales of pharmaceuticals or medical devices.

Reg. § 1.199A-5(b)(3)(i) [click on citation for caveats], Example (1) provides:

> B is a board-certified pharmacist who contracts as an independent contractor with X, a small medical facility in a rural area. X employs one full time pharmacist, but contracts with B when X's needs exceed the capacity of its full-time staff. When engaged by X, B is responsible for receiving and reviewing orders from physicians providing medical care at the facility; making recommendations on dosing and alternatives to the ordering physician; performing inoculations, checking for drug interactions, and filling pharmaceutical orders for patients receiving care at X. B is engaged in the performance of services in the field of health within the meaning of Section 199A(d)(2) and paragraphs (b)(1)(i) and (b)(2)(ii) of this section.

Reg. § 1.199A-5(b)(3)(ii) [click on citation for caveats], Example (2) provides:

> X is the operator of a residential facility that provides a variety of services to senior citizens who reside on campus. For residents, X offers standard domestic services including housing management and maintenance, meals, laundry, entertainment, and other similar services. In addition, X contracts with local professional healthcare organizations to offer residents a range of medical and health services provided at the facility, including skilled nursing care, physical and occupational therapy, speech-language pathology services, medical social services, medications, medical supplies and equipment used in the facility, ambulance transportation to the nearest supplier of needed services, and dietary counseling. X receives all of its income from residents for the costs associated with residing at the facility. Any health and medical services are billed directly by the healthcare providers to the senior citizens for those professional healthcare services even though those services are provided at the facility. X does not perform services in the field of health within the meaning of Section 199A(d)(2) and paragraphs (b)(1)(i) and (b)(2)(ii) of this section.

Reg. § 1.199A-5(b)(3)(iii) [click on citation for caveats], Example (3) provides:

> Y operates specialty surgical centers that provide outpatient medical procedures that do not require the patient to remain overnight for recovery or observation following the procedure. Y is a private organization that owns a number of facilities throughout the country. For each facility, Y ensures compliance with state and Federal laws for medical facilities and manages the facility's operations and performs all administrative functions. Y does not employ physicians, nurses, and medical assistants, but enters into agreements with other professional medical organizations or directly with the medical professionals to perform the procedures and provide all medical care. Patients are billed by Y for the facility costs relating to their procedure and by the healthcare professional or their affiliated organization for the actual costs of the procedure conducted by the physician and medical support team. Y does not perform services in the field of health within the meaning of Section 199A(d)(2) and paragraphs (b)(1)(i) and (b)(2)(ii) of this section.

Reg. § 1.199A-5(b)(3)(iv) [click on citation for caveats], Example (4) provides:[846]

> Z is the developer and the only provider of a patented test used to detect a particular medical condition. Z accepts test orders only from health care professionals (Z's clients), does not have contact with patients, and Z's employees do not diagnose, treat, or manage any aspect of patient care. A, who manages Z's testing operations, is the only employee with an advanced medical degree. All other employees are technical support staff and not healthcare professionals. Z's workers are highly educated, but the skills the workers bring to the job are not often useful for Z's testing methods. In order to perform the duties required by Z, employees receive more than a year of specialized training for working with Z's test, which is of no use to other employers. Upon completion of an ordered test, Z analyses the results and provides its clients a report summarizing the findings. Z does not discuss the report's results, or the patient's diagnosis or treatment with any health care provider or the patient. Z is not informed by the healthcare provider as to the healthcare provider's diagnosis or treatment. Z is not

---

[846] Example (4) also relates to part II.E.1.c.iv.(n) Any Trade or Business Where the Principal Asset of Such Trade or Business Is the Reputation or Skill of One or More of Its Employees or Owners.

> providing services in the field of health within the meaning of Section 199A(d)(2) and paragraphs (b)(1)(i) and (b)(2)(ii) of this section or where the principal asset of the trade or business is the reputation or skill of one or more of its employees within the meaning of paragraphs (b)(1)(xiii) and (b)(2)(xiv) of this section.

II.E.1.c.iv.(c). Law

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Law":

> Proposed § 1.199A-5(b)(2)(iii) is based on the ordinary meaning of 'services in the field of law' and provides that the term 'performance of services in the field of law' means the provision of services by lawyers, paralegals, legal arbitrators, mediators, and similar professionals in their capacity as such. The performance of services in the field of law does not include the provision of services that do not require skills unique to the field of law, for example, the provision of services in the field of law does not include the provision of services by printers, delivery services, or stenography services.

Reg. § 1.199A-5(b)(2)(iii), "Meaning of services performed in the field of law," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(ii) of this section only, the *performance of services in the field of law* means the performance of legal services by individuals such as lawyers, paralegals, legal arbitrators, mediators, and similar professionals performing services in their capacity as such. The performance of services in the field of law does not include the provision of services that do not require skills unique to the field of law; for example, the provision of services in the field of law does not include the provision of services by printers, delivery services, or stenography services.

II.E.1.c.iv.(d). Accounting

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Accounting":

> Proposed § 1.199A-5(b)(2)(iv) is based on the ordinary meaning of 'accounting' and provides that the term 'performance of services in the field of accounting' means the provision of services by accountants, enrolled agents, return preparers, financial auditors, and similar professionals in their capacity as such. Provision of services in the field of accounting is not limited to services requiring state licensure as a certified public accountant (CPA). The aim of proposed § 1.199A-5(b)(2)(iv) is to capture the common understanding of accounting, which includes tax return and bookkeeping services, even though the provision of such services may not require the same education, training, or mastery of accounting principles as a CPA. The field of accounting does not include payment processing and billing analysis.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.3, "Accounting," explains:

> One commenter suggested that real estate settlement agents should be excluded from the definition of those who perform services in the field of accounting. The commenter recommended that final regulations define the performance of services in the field of accounting as the performance of core accounting services such as bookkeeping (including data entry), write-up work, review services, and attest functions, as well as tax

> preparation and similar functions. As an alternative, the commenter recommends that settlement agents be added as not constituting the practice of accounting. A second commenter stated that the definition of accounting should be narrowed to the ordinary meaning of accounting. This comment noted that the field of accounting should include bookkeeping and financial statement preparation, but not tax return advice and preparation. A third commenter noted that the proposed regulations treat bookkeeping services, which do not require professional training or license, as an accounting service. The commenter argued that if the intent of Section 199A is to create parity between C corporations and passthrough entities, the regulations should narrowly define SSTBs, as was done for reputation and skill, and not expand the definitions beyond what was expressly contemplated by Congress.
>
> The Treasury Department and the IRS decline to adopt these comments. As noted in the preamble to the proposed regulations, the provision of services in the field of accounting is not limited to services requiring state licensure. It is based on a common understanding of accounting, which includes tax return and bookkeeping services. Whether a real estate settlement agent is engaged in the performance of services in the field of accounting depends on the facts and circumstances including the specific services offered and performed by the trade or business.

Reg. § 1.199A-5(b)(2)(iv), "Meaning of services performed in the field of accounting," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(iii) of this section only, the *performance of services in the field of accounting* means the provision of services by individuals such as accountants, enrolled agents, return preparers, financial auditors, and similar professionals performing services in their capacity as such.

II.E.1.c.iv.(e). Actuarial Science

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Actuarial Science":

> Proposed § 1.199A-5(b)(2)(v) is based on the ordinary meaning 'actuarial science' and provides that the term 'performance of services in the field of actuarial science' means the provision of services by actuaries and similar professionals in their capacity as such. Accordingly, the field of actuarial science does not include the provision of services by analysts, economists, mathematicians, and statisticians not engaged in analyzing or assessing the financial costs of risk or uncertainty of events.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.4, "Actuarial Science," explains:

> The proposed regulations provide that the performance of services in the field of actuarial science means the provision of services by individuals such as actuaries and similar professionals performing services in their capacity as such. One commenter stated that the definition creates uncertainty for businesses that employ actuaries but do not separately bill for the services (such as insurance businesses). The commenter recommended providing a rule similar to the rule for consulting services related to the manufacture and sale of goods for actuarial science. The Treasury Department and the IRS decline to adopt this comment as Section 199A looks to the trade or business of performing services rather than the performance of services themselves. As stated in

> the preamble to the proposed regulations, the field of actuarial science does not include the provision of services by analysts, economists, mathematicians, and statisticians not engaged in analyzing or assessing the financial cost of risk or uncertainty of events. The mere employment of an actuary does not itself cause a trade or business to be treated as performing services in the field of actuarial science. Whether a trade or business is providing actuarial services is a question of fact and circumstance.

Reg. § 1.199A-5(b)(2)(v), "Meaning of services performed in the field of actuarial science," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(iv) of this section only, the *performance of services in the field of actuarial science* means the provision of services by individuals such as actuaries and similar professionals performing services in their capacity as such.

II.E.1.c.iv.(f). Performing Arts

Footnote 45 of the Senate report commented about the services in the field of performing arts:

> For purposes of the similar list of services in section 448, Treasury regulations provide that the performance of services in the field of the performing arts means the provision of services by actors, actresses, singers, musicians, entertainers, and similar artists in their capacity as such. The performance of services in the field of the performing arts does not include the provision of services by persons who themselves are not performing artists (*e.g.*, persons who may manage or promote such artists, and other persons in a trade or business that relates to the performing arts). Similarly, the performance of services in the field of the performing arts does not include the provision of services by persons who broadcast or otherwise disseminate the performance of such artists to members of the public (*e.g.*, employees of a radio station that broadcasts the performances of musicians and singers). See Treas. Reg. sec. 1.448-1T(e)(4)(iii).

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Performing Arts":

> Proposed § 1.199A-5(b)(2)(vi) is informed by the definition of 'performing arts' under section 448 and provides that the term 'performance of services in the field of the performing arts' means the performance of services by individuals who participate in the creation of performing arts, such as actors, singers, musicians, entertainers, directors, and similar professionals performing services in their capacity as such. The performance of services in the field of performing arts does not include the provision of services that do not require skills unique to the creation of performing arts, such as the maintenance and operation of equipment or facilities for use in the performing arts. Similarly, the performance of services in the field of the performing arts does not include the provision of services by persons who broadcast or otherwise disseminate video or audio of performing arts to the public.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.5, "Performing Arts," explains:

> Multiple commenters stated that the definition of performance of services in the field of performing arts should be limited to the definition in § 1.448- 1T(e)(4)(iii). One

> commenter argued that the position in the proposed regulations that includes individuals who participate in the creation of the performing arts is not supported by the legislative history, namely the Statement of Managers that references the section 448 regulations. As described in part VII.A.1. of this Summary of Comments and Explanation of Revisions, the Treasury Department and the IRS decline to limit the definition of the performance of services in the field of performing arts to the definition in § 1.448-1T(e)(4)(iii). Another commenter suggested that writers should fall outside the definition of the performance of services in the field of performing arts because writing does not require a skill unique to the creation of performing arts. Further, writers create a wide variety of works not intended to be performed before an audience. The Treasury Department and the IRS also decline to adopt this comment. To the extent that a writer is paid for written material, such as a song or screenplay, that is integral to the creation of the performing arts, the writer is performing services in the field of performing arts.

Reg. § 1.199A-5(b)(2)(vi), "Meaning of services performed in the field of performing arts," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(v) of this section only, the *performance of services in the field of the performing arts* means the performance of services by individuals who participate in the creation of performing arts, such as actors, singers, musicians, entertainers, directors, and similar professionals performing services in their capacity as such. The performance of services in the field of performing arts does not include the provision of services that do not require skills unique to the creation of performing arts, such as the maintenance and operation of equipment or facilities for use in the performing arts. Similarly, the performance of services in the field of the performing arts does not include the provision of services by persons who broadcast or otherwise disseminate video or audio of performing arts to the public.

Reg. § 1.199A-5(b)(3)(v) [click on citation for caveats], Example (5) provides:

> A, a singer and songwriter, writes and records a song. A is paid a mechanical royalty when the song is licensed or streamed. A is also paid a performance royalty when the recorded song is played publicly. A is engaged in the performance of services in an SSTB in the field of performing arts within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(v) and (b)(2)(vi) of this section. The royalties that A receives for the song are not eligible for a deduction under Section 199A.

Reg. § 1.199A-5(b)(3)(vi) [click on citation for caveats], Example (6) provides:

> B is a partner in Movie LLC, a partnership. Movie LLC is a film production company. Movie LLC plans and coordinates film production. Movie LLC shares in the profits of the films that it produces. Therefore, Movie LLC is engaged in the performance of services in an SSTB in the field of performing arts within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(v) and (b)(2)(vi) of this section. B is a passive owner in Movie LLC and does not provide any services with respect to Movie LLC. However, because Movie LLC is engaged in an SSTB in the field of performing arts, B's distributive share of the income, gain, deduction, and loss with respect to Movie LLC is not eligible for a deduction under Section 199A.

II.E.1.c.iv.(g). Consulting

Footnote 46 of the Senate report commented about the services in the field of consulting:

> For purposes of the similar list of services in section 448, Treasury regulations provide that the performance of services in the field of consulting means the provision of advice and counsel. The performance of services in the field of consulting does not include the performance of services other than advice and counsel, such as sales or brokerage services, or economically similar services. For purposes of the preceding sentence, the determination of whether a person's services are sales or brokerage services, or economically similar services, shall be based on all the facts and circumstances of that person's business. Such facts and circumstances include, for example, the manner in which the taxpayer is compensated for the services provided (*e.g.*, whether the compensation for the services is contingent upon the consummation of the transaction that the services were intended to effect). See Treas. Reg. sec. 1.448-1T(e)(4)(iv).

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Consulting":

> Proposed § 1.199A-5(b)(2)(vii) is informed by the definition of 'consulting' under section 448 and provides that the term 'performance of services in the field of consulting' means the provision of professional advice and counsel to clients to assist the client in achieving goals and solving problems. Consulting includes providing advice and counsel regarding advocacy with the intention of influencing decisions made by a government or governmental agency and all attempts to influence legislators and other government officials on behalf of a client by lobbyists and other similar professionals performing services in their capacity as such. The performance of services in the field of consulting does not include the performance of services other than advice and counsel. This determination is made based on all the facts and circumstances of a person's business.
>
> Additionally, the Treasury Department and the IRS are aware of the concern noted by commenters that in certain kinds of sales transactions it is common for businesses to provide consulting services in connection with the purchase of goods by customers. For example, a company that sells computers may provide customers with consulting services relating to the setup, operation, and repair of the computers, or a contractor who remodels homes may provide consulting prior to remodeling a kitchen. As described previously in this Explanation of Provisions, proposed § 1.199A-5(c) provides a de minimis rule, under which a trade or business is not an SSTB if less than 10 percent of the gross receipts (5 percent if the gross receipts are greater than $25 million) of the trade or business are attributable to the performance of services in a specified service activity. However, this de minimis rule may not provide sufficient relief for certain trades or business that provide ancillary consulting services. The Treasury Department and the IRS believe that if a trade or business involves the selling or manufacturing of goods, and such trade or business provides ancillary consulting services that are not separately purchased or billed, then such trades or businesses are not in a trade or business in the field of consulting. Accordingly, proposed § 1.199A-5(b)(2)(vii) provides that the field of consulting does not include consulting that is embedded in, or ancillary to, the sale of goods if there is no separate payment for the consulting services.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.6, "Consulting," explains:

> One commenter suggested that proposed § 1.199A-5(b)(3), Example 3, should be modified to clarify that C, a taxpayer in the business of providing services that assist unrelated entities in making their personnel structures more efficient, does not provide any temporary workers, and C's compensation and fees are not affected by whether C's clients use temporary workers. The commenter argued that such a change would prevent the example from being interpreted as treating any recommendation for a business to use temporary workers as consulting services. The commenter also suggested that the final regulations include an additional example similar to Example 7 of § 1.448-1T(e)(4)(iv)(B) related to staffing firms. The commenter recommended that the example provide that a business that assists other businesses in meeting their personnel needs by referring job applicants to them does not engage in the performance of services in the field of consulting when the compensation for the business referring job applicants is based on whether the applicants accept employment positions with the businesses searching for employees. The final regulations adopt these suggestions.
>
> Another commenter suggested that final regulations clarify whether services provided by engineers and architects could be considered to be an SSTB if their services meet the definition of consulting services. The Treasury Department and the IRS adopt this comment. Section 1.199A- 5(b)(2)(vii) of the final regulations provides that services within the fields of architecture and engineering are not treated as consulting services for purposes of Section 199A.
>
> One commenter suggested that the definition of consulting should be narrowed to stand-alone advice and counsel with no link to production, manufacturing, sales, or licensing of products. The Treasury Department and the IRS decline to adopt this suggestion as it would be difficult to administer and subject to manipulation. Another commenter suggested that the phrase "provision of professional advice and counsel to clients to assist the client in achieving goals and solving problems" is overly broad as it could apply to almost any service-based business that assists clients in achieving goals and solving problems. The commenter stated that applying the ancillary rule would be difficult where a taxpayer is required to separately bill for embedded consulting services under state or local sales tax laws. The commenter suggested that the consulting field should be limited to taxpayers that fall under a consulting-related business activity code under the North American Industry Classification Systems (NAICS). The Treasury Department and the IRS agree with the commenter that many service-based businesses could be construed as providing professional advice and counsel to clients to assist the client in achieving goals and solving problems; however, the Treasury Department and the IRS decline to adopt the recommendation to limit the consulting field based on NAICS codes. Section 1.199A-5(b)(2)(vii) excludes the performance of services other than providing advice and counsel from the field of consulting. At issue is whether advice and counsel is provided in the context of the provision of goods or services (that are not otherwise SSTBs). This is a question of facts and circumstances. Consulting services that are separately billed are generally not considered to be provided in the context of the provisions of goods or services.

Reg. § 1.199A-5(b)(2)(vii), "Meaning of services performed in the field of consulting," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(vi) of this section only, the *performance of services in the field of consulting* means the provision of professional

> advice and counsel to clients to assist the client in achieving goals and solving problems. Consulting includes providing advice and counsel regarding advocacy with the intention of influencing decisions made by a government or governmental agency and all attempts to influence legislators and other government officials on behalf of a client by lobbyists and other similar professionals performing services in their capacity as such. The performance of services in the field of consulting does not include the performance of services other than advice and counsel, such as sales (or economically similar services) or the provision of training and educational courses. For purposes of the preceding sentence, the determination of whether a person's services are sales or economically similar services will be based on all the facts and circumstances of that person's business. Such facts and circumstances include, for example, the manner in which the taxpayer is compensated for the services provided. Performance of services in the field of consulting does not include the performance of consulting services embedded in, or ancillary to, the sale of goods or performance of services on behalf of a trade or business that is otherwise not an SSTB (such as typical services provided by a building contractor) if there is no separate payment for the consulting services. Services within the fields of architecture and engineering are not treated as consulting services.

Reg. § 1.199A-5(b)(3)(viii) [click on citation for caveats], Example (8) provides:

> D is in the business of providing services that assist unrelated entities in making their personnel structures more efficient. D studies its client's organization and structure and compares it to peers in its industry. D then makes recommendations and provides advice to its client regarding possible changes in the client's personnel structure, including the use of temporary workers. D does not provide any temporary workers to its clients and D's compensation and fees are not affected by whether D's clients used temporary workers. D is engaged in the performance of services in an SSTB in the field of consulting within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(vi) and (b)(2)(vii) of this section.

Reg. § 1.199A-5(b)(3)(ix) [click on citation for caveats], Example (9) provides:

> E is an individual who owns and operates a temporary worker staffing firm primarily focused on the software consulting industry. Business clients hire E to provide temporary workers that have the necessary technical skills and experience with a variety of business software to provide consulting and advice regarding the proper selection and operation of software most appropriate for the business they are advising. E does not have a technical software engineering background and does not provide software consulting advice herself. E reviews resumes and refers candidates to the client when the client indicates a need for temporary workers. E does not evaluate her clients' needs about whether the client needs workers and does not evaluate the clients' consulting contracts to determine the type of expertise needed. Rather, the client provides E with a job description indicating the required skills for the upcoming consulting project. E is paid a fixed fee for each temporary worker actually hired by the client and receives a bonus if that worker is hired permanently within a year of referral. E's fee is not contingent on the profits of its clients. E is not considered to be engaged in the performance of services in the field of consulting within the meaning of Section 199A(d)(2) or (b)(1)(vi) and (b)(2)(vii) of this section.

Reg. § 1.199A-5(b)(3)(x) [click on citation for caveats], Example (10) provides:

> F is in the business of licensing software to customers. F discusses and evaluates the customer's software needs with the customer. The taxpayer advises the customer on the particular software products it licenses. F is paid a flat price for the software license. After the customer licenses the software, F helps to implement the software. F is engaged in the trade or business of licensing software and not engaged in an SSTB in the field of consulting within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(vi) and (b)(2)(vii) of this section.

II.E.1.c.iv.(h). Athletics

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Athletics":

> The field of athletics is not listed in section 448(d)(2), and there is little guidance on its meaning as used in section 1202(e)(3)(A). However, commenters noted, and the Treasury Department and the IRS agree, that among the services specified in Section 199A(d)(2)(A) the field of athletics is most similar to the field of performing arts. Accordingly, proposed § 1.199A-5(b)(2) (viii) provides that the term 'performance of services in the field of athletics' means the performances of services by individuals who participate in athletic competition such as athletes, coaches, and team managers in sports such as baseball, basketball, football, soccer, hockey, martial arts, boxing, bowling, tennis, golf, skiing, snowboarding, track and field, billiards, and racing. The performance of services in the field of athletics does not include the provision of services that do not require skills unique to athletic competition, such as the maintenance and operation of equipment or facilities for use in athletic events. Similarly, the performance of services in the field of athletics does not include the provision of services by persons who broadcast or otherwise disseminate video or audio of athletic events to the public.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.7, "Athletics," explains:

> A few commenters suggested that the definition of a trade or business involving the performance of services in the field of athletics should not include the trade or business of owning a professional sports team. One commenter stated that the definition should be limited to entities that are either owned or controlled by, or whose primary beneficiaries are, professional athletes or that involve the performance of services by those athletes; in other words, the definition should apply solely to athletes' personal services companies.
>
> Another commenter recommended that § 1.199A-5(b)(3) Example 2 be revised to reflect that neither sports clubs nor club owners perform services described in section 1202(e)(3)(A). The commenter stated that a professional sports club and its owners do not perform services in the field of athletics. Instead, a sports club sells tickets, licenses, sponsorships, and other intellectual property, creates digital content, engages in community activities, manages a stadium, and produces an entertainment product. The commenter argued that Congress intended through the SSTB rules to prevent W-2 wage income from being converted to QBI and that only the trade or business of an athlete involves W-2 wage income from athletic performance. The commenter continued, stating that professional sports clubs are not described in section 1202(e)(3)(A) or provided in section 448(d)(2)(A).

> The Treasury Department and the IRS decline to adopt this comment. As described in part VII.A.1. of this Summary of Comments and Explanation of Revisions, the Treasury Department and the IRS do not believe that definitional guidance should be limited to that provided in § 1.448-1T(e)(4)(i) (by analogy to performing arts for athletics). While sports club and team owners are not performing athletic services directly, that is not a requirement of Section 199A, which looks to whether there is income attributable to a trade or business involving the performance of services in a specified activity, not who performed the services. A professional sports club may operate more than one trade or business. For example, a team may operate its concession services as a separate trade or business. The Treasury Department and the IRS agree that such concession services generally would not be a trade or business of performing services in the field of athletics. Nonetheless, a professional sports club's operation of an athletic team is a trade or business of performing services in the field of athletics. Income from that trade or business, including income from ticket sales and broadcast rights, is income from a trade or business of performing services in the field of athletics. The performance of services in the field of athletics does not include the provision of services by persons who broadcast or otherwise disseminate video or audio of athletic events to the public.

Reg. § 1.199A-5(b)(2)(viii), "Meaning of services performed in the field of athletics," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(vii) of this section only, the *performance of services in the field of athletics* means the performance of services by individuals who participate in athletic competition such as athletes, coaches, and team managers in sports such as baseball, basketball, football, soccer, hockey, martial arts, boxing, bowling, tennis, golf, skiing, snowboarding, track and field, billiards, and racing. The performance of services in the field of athletics does not include the provision of services that do not require skills unique to athletic competition, such as the maintenance and operation of equipment or facilities for use in athletic events. Similarly, the performance of services in the field of athletics does not include the provision of services by persons who broadcast or otherwise disseminate video or audio of athletic events to the public.

Reg. § 1.199A-5(b)(3)(vii) [click on citation for caveats], Example (7) provides:

> C is a partner in Partnership, which solely owns and operates a professional sports team. Partnership employs athletes and sells tickets and broadcast rights for games in which the sports team competes. Partnership sells the broadcast rights to Broadcast LLC, a separate trade or business. Broadcast LLC solely broadcasts the games. Partnership is engaged in the performance of services in an SSTB in the field of athletics within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(vii) and (b)(2)(viii) of this section. The tickets sales and the sale of the broadcast rights are both the performance of services in the field of athletics. C is a passive owner in Partnership and C does not provide any services with respect to Partnership or the sports team. However, because Partnership is engaged in an SSTB in the field of athletics, C's distributive share of the income, gain, deduction, and loss with respect to Partnership is not eligible for a deduction under Section 199A. Broadcast LLC is not engaged in the performance of services in an SSTB in the field of athletics.

II.E.1.c.iv.(i). Financial Services

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Financial Services":

> Commenters requested guidance as to whether financial services includes banking. These commenters noted that section 1202(e)(3)(A) includes the term financial services, but that banking in separately listed in section 1202(e)(3)(B) which suggests that banking is not included as part of financial services in section 1202(e)(3)(A). The Treasury Department and the IRS agree with such commenters that this suggests that financial services should be more narrowly interpreted here. Therefore, proposed § 1.199A-5(b)(2)(ix) limits the definition of financial services to services typically performed by financial advisors and investment bankers and provides that the field of financial services includes the provision of financial services to clients including managing wealth, advising clients with respect to finances, developing retirement plans, developing wealth transition plans, the provision of advisory and other similar services regarding valuations, mergers, acquisitions, dispositions, restructurings (including in title 11 or similar cases), and raising financial capital by underwriting, or acting as the client's agent in the issuance of securities, and similar services. This includes services provided by financial advisors, investment bankers, wealth planners, and retirement advisors and other similar professionals, but does not include taking deposits or making loans.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.8, "Financial Services," explains:

> Several commenters suggested that final regulations clarify that financing, including taking deposits, making loans, and entering into financing contracts, is not a financial service. One commenter requested an explicit rule clarifying that non-bank mortgage bankers are not SSTBs and that customary activities of mortgage bankers including mortgage loan origination, sales of mortgage loans, mortgage loan servicing, and sale of mortgage servicing rights are not financial services. The preamble to the proposed regulations provides that the provision of financial services does not include taking deposits or making loans. The final regulations clarify that the provision of financial services does not include taking deposits or making loans.
>
> One commenter stated that the determination that banking is not a financial service appears to be wrong and inconsistent with statutory construction since any common definition of financial services includes banking services. As stated in the preamble to the proposed regulations, banking is listed in section 1202(e)(3)(B) but not section 1202(e)(3)(A). As a matter of statutory construction, the Treasury Department and the IRS believe that banking must therefore be excluded from the definition of financial services for purposes of Section 199A. Another commenter suggested that insurance should be categorically excluded from the meaning of financial services because insurance is described in section 1202(e)(3)(B). The Treasury Department and the IRS agree that by operation of section 1202(e)(3)(B), insurance cannot be considered a financial service for purposes of Section 199A. The commenter also suggested that a rule similar to the ancillary services rule for consulting should be extended to cover financial services. Another commenter argued that insurance agents and others who provide investment advice are not in the field of financial services, unless the agent receives a fee for the advice, rather than a commission on the sale.

> The Treasury Department and the IRS decline to categorically exclude services provided by insurance agents from the definition of financial services as financial services such as managing wealth, advising clients with respect to finances, and the provision of advisory and other similar services that can be provided by insurance agents. However, the Treasury Department and the IRS note that the provision of these services to the extent that they are ancillary to the commission-based sale of an insurance policy will generally not be considered the provision of financial services for purposes of Section 199A.

Reg. § 1.199A-5(b)(2)(ix), "Meaning of services performed in the field of financial services," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(viii) of this section only, the *performance of services in the field of financial services* means he provision of financial services to clients including managing wealth, advising clients with respect to finances, developing retirement plans, developing wealth transition plans, the provision of advisory and other similar services regarding valuations, mergers, acquisitions, dispositions, restructurings (including in title 11 of the Code or similar cases), and raising financial capital by underwriting, or acting as a client's agent in the issuance of securities and similar services. This includes services provided by financial advisors, investment bankers, wealth planners, retirement advisors, and other similar professionals performing services in their capacity as such. Solely for purposes of Section 199A, the performance of services in the field of financial services does not include taking deposits or making loans, but does include arranging lending transactions between a lender and borrower.

Reg. § 1.199A-5(b)(3)(xi) [click on citation for caveats], Example (11) provides:

> G is in the business of providing services to assist clients with their finances. G will study a particular client's financial situation, including, the client's present income, savings, and investments, and anticipated future economic and financial needs. Based on this study, G will then assist the client in making decisions and plans regarding the client's financial activities. Such financial planning includes the design of a personal budget to assist the client in monitoring the client's financial situation, the adoption of investment strategies tailored to the client's needs, and other similar services. G is engaged in the performance of services in an SSTB in the field of financial services within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(viii) and (b)(2)(ix) of this section.

Reg. § 1.199A-5(b)(3)(xii) [click on citation for caveats], Example (12) provides:

> H is in the business of franchising a brand of personal financial planning offices, which generally provide personal wealth management, retirement planning, and other financial advice services to customers for a fee. H does not provide financial planning services itself. H licenses the right to use the business tradename, other branding intellectual property, and a marketing plan to third-party financial planner franchisees that operate the franchised locations and provide all services to customers. In exchange, the franchisees compensate H based on a fee structure, which includes a one-time fee to acquire the franchise. H is not engaged in the performance of services in the field of financial services within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(viii) and (b)(2)(ix) of this section.

II.E.1.c.iv.(j). Brokerage Services

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Brokerage Services":

> Proposed § 1.199A-5(b)(2)(x) uses the ordinary meaning of 'brokerage services' and provides that the field of brokerage services includes services in which a person arranges transactions between a buyer and a seller with respect to securities (as defined in section 475(c)(2)) for a commission or fee. This includes services provided by stock brokers and other similar professionals, but does not include services provided by real estate agents and brokers, or insurance agents and brokers.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.9, "Brokerage Services," explains:

> One commenter stated that the ordinary definition of a broker is any person who buys and sells goods or services for others, including agents, and argued that nothing in the statute limits this to stock brokers. The commenter said that the definition in the proposed regulations artificially narrows the standard to appease special interests without any justification. The definition provided for in the proposed regulations applies more broadly than stock brokers and includes all services in which a person arranges transactions between a buyer and a seller with respect to securities (as defined in section 475(c)(2)) for a commission or fee. While the term "broker" is sometimes used in a broad sense to include anyone who facilitates the purchase and sale of goods for a fee or commission, the term "brokerage services" is most commonly associated with services, such as those provided by brokerage firms, involving the facilitation of purchases and sales of stock and other securities.
>
> Another commenter suggested that final regulations clarify that life insurance products are not securities for purposes of Section 199A or that life insurance brokers engaged in their capacity as such are not brokers in securities for purposes of Section 199A. Other commenters requested the final regulations clarify that the business of financing or making loans, including the services provided by mortgage banking companies, does not fall within the definition of brokerage services. The Treasury Department and the IRS address this comment in the final regulations by explicitly stating that although the performance of services in the field of financial services does not include taking deposits or making loans, it does include arranging lending transactions between a lender and borrower. The final regulations define securities by reference to section 475(c)(2).

Reg. § 1.199A-5(b)(2)(x), "Meaning of services performed in the field of brokerage services," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(ix) of this section only, the *performance of services in the field of brokerage services* includes services in which a person arranges transactions between a buyer and a seller with respect to securities (as defined in section 475(c)(2)) for a commission or fee. This includes services provided by stock brokers and other similar professionals, but does not include services provided by real estate agents and brokers, or insurance agents and brokers.

Reg. § 1.199A-5(b)(3)(xiii) [click on citation for caveats], Example (13) provides:

> J is in the business of executing transactions for customers involving various types of securities or commodities generally traded through organized exchanges or other similar networks. Customers place orders with J to trade securities or commodities based on the taxpayer's recommendations. J's compensation for its services typically is based on completion of the trade orders. J is engaged in an SSTB in the field of brokerage services within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(ix) and (b)(2)(x) of this section.

II.E.1.c.iv.(k). Investing and Investment Management

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Investing and Investment Management":

> Proposed § 1.199A-5(b)(2)(xi) uses the ordinary meaning of 'investing and investment management' and provides that any trade or business that involves the 'performance of services that consist of investing and investment management' means a trade or business that earns fees for investment, asset management services, or investment management services including providing advice with respect to buying and selling investments. The performance of services that consist of investing and investment management would include a trade or business that receives either a commission, a flat fee, or an investment management fee calculated as a percentage of assets under management. The performance of services of investing and investment management does not include directly managing real property.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.10, "Investing and Investment Management," explains:

> One commenter recommended that the performance of services that consist of investing and investment management be limited to investment management and investment advisory businesses whose income is principally attributable to the performance of personal services involving the provision of investment advice or the regular and contemporaneous management of investors' assets by individual employees or owners of the business. The commenter recommended that the definition exclude large, diversified asset managers that invest significant capital in and derive significant income from the research, development, and sale of investment products. The commenter suggested that rather than making business-by-business determinations, the final regulations should look to rules such as the regulations under now repealed section 1348, which did not treat income from a business in which capital is a material income producing factor as earned income. As an alternative, the commenter suggested that the final regulations could provide a safe harbor for firms that research, develop, and sell investment products, including changes to the de minimis and incidental rules necessary to effectuate the safe harbor. An example of such a rule could be similar to the rule provided for ancillary consulting services.
>
> The Treasury Department and the IRS decline to adopt this comment as the regulations under now repealed section 1348 looked to earned income including fees received by taxpayers engaged in a professional occupation. Section 199A is focused on a trade or business, not a profession of an individual. Accordingly, the determination of whether a trade or business in an SSTB must be made on a business-by-business basis.

> Another commenter suggested that final regulations clarify that investing and investment management does not include the sale of life insurance products and that life insurance products are not investments for purposes of Section 199A. The Treasury Department and the IRS decline to define investment for purposes of Section 199A but note that commission-based sales of insurance policies generally will not be considered the performance of services in the field of investing and investing management for purposes of Section 199A.
>
> Another commenter recommended that final regulations clarify that directly managing real property includes management through agents and affiliates acting as agents for the property manager. The SSTB limitations apply to direct and indirect owners of a trade or business that is an SSTB, regardless of whether the owner is passive or participated in any specified service activity. Accordingly, direct and indirect management of real property includes management through agents, employees, and independent contractors.

Reg. § 1.199A-5(b)(2)(xi), "Meaning of the provision of services in investing and investment management," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(x) of this section only, the *performance of services that consist of investing and investment management* refers to a trade or business involving the receipt of fees for providing investing, asset management, or investment management services, including providing advice with respect to buying and selling investments. The performance of services of investing and investment management does not include directly managing real property.

II.E.1.c.iv.(l). Trading

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Trading":

> Proposed § 1.199A-5(b)(2)(xii) provides that any trade or business involving the 'performance of services that consist of trading' means a trade or business of trading in securities, commodities, or partnership interests. Whether a person is a trader is determined taking into account the relevant facts and circumstances. Factors that have been considered relevant to determining whether a person is a trader include the source and type of profit generally sought from engaging in the activity regardless of whether the activity is being provided on behalf of customers or for a taxpayer's own account. See *Endicott v. Commissioner*, T.C. Memo. 2013-199; *Nelson v. Commissioner*, T.C. Memo. 2013-259, *King v. Commissioner*, 89 T.C. 445 (1987). A person that is a trader under these principles will be treated as performing the services of trading for purposes of Section 199A(d)(2)(B).

Reg. § 1.199A-5(b)(2)(xii), "Meaning of the provision of services in trading," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(xi) of this section only, the *performance of services that consist of trading* means a trade or business of trading in securities (as defined in section 475(c)(2)), commodities (as defined in section 475(e)(2)), or partnership interests. Whether a person is a trader in securities, commodities, or partnership interests is determined by taking into account all relevant facts and circumstances, including the source and type of profit that is associated with

> engaging in the activity regardless of whether that person trades for the person's own account, for the account of others, or any combination thereof.

II.E.1.c.iv.(m). Dealing in Securities, Partnership Interests, or Commodities

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Dealing in Securities, Partnership Interests, and Commodities":

> For purposes of proposed § 1.199A-5(b)(2)(xiii), the 'performance of services that consist of dealing in securities (as defined in section 475(c)(2))' means regularly purchasing securities from and selling securities to customers in the ordinary course of a trade or business or regularly offering to enter into, assume, offset, assign, or otherwise terminate positions in securities with customers in the ordinary course of a trade or business. For purposes of the preceding sentence, a taxpayer that regularly originates loans in the ordinary course of a trade or business of making loans but engages in no more than negligible sales of the loans is not dealing in securities for purposes of Section 199A(d)(2). See § 1.475(c)-1(c)(2) and (4) for the definition of negligible sales.
>
> For purposes of proposed § 1.199A-5(b)(2)(xiii), 'the performance of services that consist of dealing in partnership interests' means regularly purchasing partnership interests from and selling partnership interests to customers in the ordinary course of a trade or business or regularly offering to enter into, assume, offset, assign, or otherwise terminate positions in partnership interests with customers in the ordinary course of a trade or business.
>
> For purposes of proposed § 1.199A-5(b)(2)(xiii), 'the performance of services that consist of dealing in commodities (as defined in section 475(e)(2))' means regularly purchasing commodities from and selling commodities to customers in the ordinary course of a trade or business or regularly offering to enter into, assume, offset, assign, or otherwise terminate positions in commodities with customers in the ordinary course of a trade or business.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.11, "Dealing," explains:

> **a. Mortgage Banking, Credit Sales, and Non-Bank Lending**
>
> Several commenters suggested that the provisions regarding dealing in securities should exclude mortgage banking and other lending activities in which lending is the primary business focus. Several of these commenters noted that the plain language meaning of "purchasing securities" does not include making loans. One commenter suggested that the reference to the definition of negligible sales should be clarified to explain that negligible sales as defined in § 1.475(c)-1(c)(2) and (4) does not apply if the loan is in connection with mortgage servicing contracts as excluded in section 451(b)(1)(B). Another commenter suggested that portfolio lenders should also be able to use the negligible sales exemption and all sales of loans outside the ordinary course of business should be excluded from consideration in applying the negligible sales test. A third commenter suggested that the regulation clarify that the negligible sales exception is simply an exception to the general definition of dealing in securities. Another commenter suggested that application of dealing in securities should be limited to taxpayers engaged in broker-dealer activities for which registration under Federal law would be required. Another commenter suggested that the creation of a loan should not be

construed as a purchase and a taxpayer should be considered a dealer in securities only if they both purchase and sell securities. As an alternative, this commenter suggested that negligible sales could be defined in terms of the number of customers that the lender sells loans to each year. For this purpose, the Government National Mortgage Association (GNMA) would be considered to be the customer for purpose of sales of GNMA mortgage pools through the issuance of mortgage backed securities. Another commenter suggested that sales of retail installment contracts or loans for purposes of liquidity, portfolio diversification, and similar purposes should be considered to be outside of recurring business activity and thus not dealing in securities. In response to these comments, the final regulations provide that for purposes of Section 199A and the definition of performing services that consist of dealing in securities, the performance of services to originate a loan is not treated as the purchase of a security from the borrower. Additionally, the final regulations remove the reference to the negligible sales exception under § 1.475(c)-1(c)(2) and (4) from the definition of dealing in securities.

Another commenter suggested that under Section 199A, the term “securities” should be defined by reference to section 475 but not the terms “dealer” or “dealer in securities.” The commenter suggested that a lender should be considered to be a dealer in securities for purposes of Section 199A only to the extent that loans, including retail sales contracts, acquired by the lender are held in inventory or held for sale to customers in the ordinary course of a trade or business within the meaning of section 1221. The commenter also suggested that when a loan is acquired with a view towards holding the loan to maturity in the lender’s portfolio and the loan is later sold outside the normal course of business; such a sale should not result in the lender being viewed as a dealer in securities. Another commenter suggested that the meaning of sales to customers should be clarified in the context of a mortgage finance business. This commenter requested that the regulations clarify that a mortgage loan originator which transfers mortgages to an agency or broker/dealer for cash or mortgage-backed securities does not engage in a sale by the originator to a customer for purposes of Section 199A.

In response to these comments, the final regulations provide that the performance of services to originate a loan is not treated as the purchase of a security from the borrower in determining whether the lender is performing services consisting of dealing in securities. The comment regarding the definition of a dealer in securities, however, is not accepted, as the definition of a securities dealer has never depended on whether securities were held in inventory. The final regulations also do not address loans that are sold outside the normal course of business, which is an inherently factual question. Similarly, the Treasury Department and the IRS decline to address the question of whether a person is a customer as this is a subject which is beyond the scope of these regulations.

b. Banking

Many commenters recommended that traditional banking activities be excluded entirely from the definition of an SSTB, including the performance of services that consist of dealing in securities. The commenters argued that Congress intended banks that elect under section 1362(a) to be S corporations (subchapter S banks) to have the same relative reduction in taxes as C corporation banks after enactment of the TCJA. Many commenters noted that subchapter S bank activities are already strictly limited by the Bank Holding Company Act and this effectively serves as a guardrail against abuse of the Section 199A deduction. As an alternative, commenters suggested that the definition of SSTB should be more narrowly drawn to exclude bank services such as trust or fiduciary services, securities brokerage, and the origination and sale of mortgages and loans. Commenters also expressed concern that the de minimis rule is insufficient to protect banks. These commenters suggested revisions including raising the de minimis threshold to 25 percent regardless of the amount of gross receipts and using net income rather than gross receipts for the measure.

The Treasury Department and the IRS decline to accept these comments. Although the final regulations continue to exclude taking deposits or making loans from the definition of an SSTB involving the performance of financial services, and exclude the origination of loans from the definition of dealing in securities for purposes of Section 199A, the Treasury Department and the IRS do not believe that there is a broad exemption from the listed SSTBs with respect to all services that may be legally permitted to be performed by banks. Therefore, to the extent a bank operates a single trade or business that involves the performance of services listed as SSTBs outside of the de minimis exception, such as investing and investment management, the bank's single trade or business will be treated as an SSTB. However, as noted previously, an RPE, including a subchapter S bank, may operate more than one trade or business. Thus, a subchapter S bank could segregate specified service activities from an existing trade or business and operate such specified service activities as an SSTB separate from its remaining trade or business, either within the same legal entity or in a separate entity.

c. Commodities

Several commenters suggested that the final regulations provide that a trade or business is not engaged in the performance of services of investing, trading, or dealing in commodities if it regularly takes physical possession of the underlying commodity in the ordinary course of its trade or business. These commenters also argued that a business that takes physical possession of the commodity should not be treated as an SSTB if it hedges its risk with respect to the commodity as part of the ordinary course of its trade or business. The commenters state that dealing in commodities for purposes of Section 199A should be understood to mean an activity similar to dealing in securities and should be limited to the dealing in financial instruments referenced to commodities, such as commodities futures or options that are traded on regulated exchanges. One commenter argued that if the regulations were to apply to physical commodities it would result in different tax treatment depending on whether the commodity is actively traded and that Congress intended the definition of commodities to apply only to commodities derivatives. Another commenter suggested that manufacturing activities as defined under the now repealed section 199 should be expressly excluded from the definition of both trading in commodities and dealing in commodities.

The Treasury Department and the IRS agree with commenters that the definition of dealing in commodities for purposes of Section 199A should be limited to a trade or business that is dealing in financial instruments or otherwise does not engage in substantial activities with respect to physical commodities. To distinguish a trade or business that performs substantial activities with physical commodities from a trade or business that engages in a commodities trade or business by dealing or trading in financial instruments that are commodities (within the meaning of section 475(e)(2)), or a trade or business that otherwise does not perform substantial activities with commodities, the final regulations adopt rules similar to the rules that apply to qualified active sales of commodities in § 1.954-2(f)(2)(iii). Those rules generally require a person to be engaged in the active conduct of a commodities business as a producer, processor, merchant, or handler of commodities and to perform certain activities with respect to those commodities.

Accordingly, for purposes of Section 199A, gains and losses from the sale of commodities in the active conduct of a commodities business as a producer, processor, merchant, or handler of commodities will be qualified active sales and gains and losses from qualified active sales are not taken into account in determining whether a person is engaged in the trade or business of dealing in commodities. Similarly, income, deduction, gain, or loss from a hedging transaction (as defined in § 1.1221-2(b)) entered into in the normal course of a commodities business conducted by a producer, processor, merchant, or handler of commodities will be treated as gains and losses from qualified active sales that are part of that trade or business. Qualified active sales generally require a taxpayer to hold commodities as inventory or similar property and to satisfy specified conditions regarding substantial and significant activities described in the final regulations. A sale by a trade or business of commodities held for investment or speculation is not a qualified active sale.

Reg. § 1.199A-5(b)(2)(xiii), "Meaning of the provision of services in dealing," provides:

(A) *Dealing in securities*. For purposes of Section 199A(d)(2) and paragraph (b)(1)(xii) of this section only, the *performance of services that consist of dealing in securities* (as defined in section 475(c)(2)) means regularly purchasing securities from and selling securities to customers in the ordinary course of a trade or business or regularly offering to enter into, assume, offset, assign, or otherwise terminate positions in securities with customers in the ordinary course of a trade or business. Solely for purposes of the preceding sentence, the performance of services to originate a loan is not treated as the purchase of a security from the borrower in determining whether the lender is dealing in securities.

(B) *Dealing in commodities*. For purposes of Section 199A(d)(2) and paragraph (b)(1)(xii) of this section only, *the performance of services that consist of dealing in commodities (as defined in section 475(e)(2))* means regularly purchasing commodities from and selling commodities to customers in the ordinary course of a trade or business or regularly offering to enter into, assume, offset, assign, or otherwise terminate positions in commodities with customers in the ordinary course of a trade or business. Solely for purposes of the preceding sentence, gains and losses from qualified active sales as defined in paragraph (b)(2)(xiii)(B)(1) of this section are not taken into account in determining whether a person is engaged in the trade or business of dealing in commodities.

(1) Qualified active sale. The term *qualified active sale* means the sale of commodities in the active conduct of a commodities business as a producer, processor, merchant, or handler of commodities if the trade or business is as an active producer, processor, merchant or handler of commodities. A hedging transaction described in paragraph (b)(2)(i)(B) of this section is treated as a qualified active sale. The sale of commodities held by a trade or business other than in its capacity as an active producer, processor, merchant, or handler of commodities is not a qualified active sale. For example, the sale by a trade or

business of commodities that were held for investment or speculation would not be a qualified active sale.

(2) *Active conduct of a commodities business*. For purposes of paragraph (b)(2)(xiii)(B)(1) of this section, a trade or business is engaged in the active conduct of a commodities business as a producer, processor, merchant, or handler of commodities only with respect to commodities for which each of the conditions described in paragraphs (b)(2)(xiii)(B)(3) through (5) of this section are satisfied.

(3) *Directly holds commodities as inventory or similar property*. The commodities trade or business holds the commodities directly, and not through an agent or independent contractor, as inventory or similar property. The term inventory or similar property means property that is stock in trade of the trade or business or other property of a kind that would properly be included in the inventory of the trade or business if on hand at the close of the taxable year, or property held by the trade or business primarily for sale to customers in the ordinary course of its trade or business.

(4) *Directly incurs substantial expenses in the ordinary course*. The commodities trade or business incurs substantial expenses in the ordinary course of the commodities trade or business from engaging in one or more of the following activities directly, and not through an agent or independent contractor -

(i) Substantial activities in the production of the commodities, including planting, tending or harvesting crops, raising or slaughtering livestock, or extracting minerals;

(ii) Substantial processing activities prior to the sale of the commodities, including the blending and drying of agricultural commodities, or the concentrating, refining, mixing, crushing, aerating or milling of commodities; or

(iii) Significant activities as described in paragraph (b)(2)(xiii)(B)(*5*) of this section.

(5) Significant activities for purposes of paragraph (b)(2)(xiii)(B)(4)(iii). The commodities trade or business performs significant activities with respect to the commodities that consists of -

(i) The physical movement, handling and storage of the commodities, including preparation of contracts and invoices, arranging transportation, insurance and credit, arranging for receipt, transfer or negotiation of shipping documents, arranging storage or warehousing, and dealing with quality claims;

(ii) Owning and operating facilities for storage or warehousing; or

(iii) Owning, chartering, or leasing vessels or vehicles for the transportation of the commodities.

(C) *Dealing in partnership interests*. For purposes of Section 199A(d)(2) and paragraph (b)(1)(xii) of this section only, the *performance of services that consist of* *dealing in partnership interests* means regularly purchasing partnership interests from and selling partnership interests to customers in the ordinary course of a trade or business or regularly offering to enter into, assume, offset, assign, or otherwise terminate positions in partnership interests with customers in the ordinary course of a trade or business.

II.E.1.c.iv.(n). Any Trade or Business Where the Principal Asset of Such Trade or Business Is the Reputation or Skill of One or More of Its Employees or Owners

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), describes "Any Trade or Business Where the Principal Asset of Such Trade or Business Is the Reputation or Skill of 1 or More of Its Employees or Owners":

> Guidance on the meaning of the 'reputation or skill' clause in section 1202(e)(3)(A) is limited to dicta in one case. In *John P. Owen v. Commissioner*, T.C. Memo. 2012-21, the Tax Court examined whether Mr. Owen, whose business was insurance, was entitled to benefits under section 1202 with respect to the sale of his interest in a corporation conducting such business. Under the facts described in the case, the corporation had extensive training programs and sales structures, but primarily relied on the services of independent contractors (including Mr. Owen) in conducting its business. Although the Tax Court acknowledged that the business' success was due to Mr. Owen's efforts, it found that the principal asset of the company in question was the training program and sales structure of the business rather than Mr. Owen's services.
>
> The Treasury Department and the IRS received several comments regarding the meaning of the 'reputation or skill' clause. Commenters described potential methods to give maximum effect to the literal language of the reputation or skill clause by describing ways to (1) determine the extent to which the reputation or skill of employees or owners constitutes an asset of the business under Federal tax accounting principles, and (2) measure whether such an asset is in fact the principal asset of the business.
>
> One commenter suggested using an activity-based standard under which no service-based businesses would qualify for the Section 199A deduction. An SSTB definition this broad would not comport with the statute and would deny a Section 199A deduction to businesses that the statute does not appear to exclude. If the 'reputation or skill' clause was intended to exclude all service businesses from Section 199A, there would have been no reason to enumerate specific types of businesses in Section 199A(d)(2); that language would be pure surplusage. A broad service-based test would also fail to provide a clear classification of businesses that combine services with sales of products, such as plumbing and HVAC services, if those businesses sell goods or equipment in the course of providing services. Therefore, the Treasury Department and the IRS do not believe it is consistent with the text, structure, or purpose of Section 199A to exclude all service businesses above the threshold amount from qualifying for the Section 199A deduction.
>
> Another commenter described a balance sheet test that would compare the value of assets other than goodwill and workforce in place to the value of such goodwill and workforce in place. The commenter acknowledged that such a test could also be broader than Congress intended. In addition, the commenter noted that such a test could easily lead to strange and unintuitive results, and may be difficult to apply in the case of small businesses that do not maintain audited financial statements and would

both be ripe for abuse, and could potentially result in many legal disputes between taxpayers and the IRS.

Finally, one commenter described a standard based on whether the trade or business involves the provision of highly-skilled services. The commenter argued that the primary benefit of a standard like this is that it would harmonize the meaning of the reputation or skill phrase with the trades or businesses listed in section 1202(e)(3)(A), each of which involve the provision of services by professionals who either received a substantial amount of training (for example, doctors, nurses, lawyers, and accountants), or who have otherwise achieved a high degree of skill in a given field (for example, professional athletes or performing artists).

Congress enacted Section 199A to provide a deduction from taxable income to trades or businesses conducted by sole proprietorships and passthrough entities that do not benefit from the income tax rate reduction afforded to C corporations under the TCJA. The Treasury Department and the IRS are concerned that a broad definition of the 'reputation or skill' phrase that relied on a balance sheet test or numerical ratios would have several consequences inconsistent with the intent of Section 199A. Testing businesses based on metrics, some of them subjective, that change over time could result in inappropriate year-over-year tax consequences and lead to distorted decision-making. As the commenters noted, such mechanical tests pose administrative difficulties and fail to provide taxpayers with needed certainty regarding the tax law necessary for conducting their business affairs. Most significantly, such mechanical rules might prevent trades or businesses that Congress intended to be eligible for the Section 199A deduction from claiming the Section 199A deduction.

In sum, the Treasury Department and the IRS believe that the 'reputation or skill' clause as used in Section 199A was intended to describe a narrow set of trades or businesses, not otherwise covered by the enumerated specified services, in which income is received based directly on the skill and/or reputation of employees or owners. Additionally, the Treasury Department and the IRS believe that 'reputation or skill' must be interpreted in a manner that is both objective and administrable. Thus, proposed § 1.199A-5(b)(2)(xiv) limits the meaning of the 'reputation or skill' clause to fact patterns in which the individual or RPE is engaged in the trade or business of: (1) receiving income for endorsing products or services, including an individual's distributive share of income or distributions from an RPE for which the individual provides endorsement services; (2) licensing or receiving income for the use of an individual's image, likeness, name, signature, voice, trademark, or any other symbols associated with the individual's identity, including an individual's distributive share of income or distributions from an RPE to which an individual contributes the rights to use the individual's image; or (3) receiving appearance fees or income (including fees or income to reality performers performing as themselves on television, social media, or other forums, radio, television, and other media hosts, and video game players). Proposed § 1.199A-5(b)(4) contains two examples illustrating the application of this definition. The Treasury Department and the IRS request comments on this rule, the clarity of definitions for the statutorily enumerated trades or businesses that are SSTBs under Section 199A(d)(2)(A), and the accompanying examples.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.A.13 [12?], "Reputation/Skill," explains:

> Many commenters expressed support for the position in the proposed regulations that reputation or skill was intended to describe a narrow set of trades or businesses not otherwise covered by the other listed SSTBs, often writing that a more broad interpretation would be inherently complex and unworkable. Other commenters disagreed with the definition in the proposed regulations, expressing concern that the narrowness of the definition is contrary to the language of the statute and Congressional intent.
>
> The Treasury Department and the IRS remain concerned that a broad interpretation of the reputation and skill clause would result in substantial uncertainty for both taxpayers and the IRS. As stated in the preamble to the proposed regulations, it would be inconsistent with the text, structure, and purpose of Section 199A to potentially exclude income from all service businesses from qualifying for the Section 199A deduction for taxpayers with taxable income above the threshold amount. If Congressional intent was to exclude all service businesses, Congress clearly could have drafted such a rule. Accordingly, the final regulations retain the proposed rule limiting the meaning of the reputation or skill clause to fact patterns in which an individual or RPE is engaged in the trade or business of receiving income from endorsements, the licensing of an individual's likeness or features, and appearance fees.
>
> One commenter requested additional clarification regarding whether advertising income received for on air advertising spots in which a program host reads a script describing the positive qualities of a product or service, and may also choose to describe his or her own positive experiences with the product, is endorsement income as described in § 1.199A- 5(b)(2)(xiv)(A). The commenter argued that such income should not be considered endorsement income because it is not received in connection with a separate trade or business of making endorsements. The Treasury Department and the IRS decline to adopt this suggestion as § 1.199A- 5(b)(2)(xiv)(A) looks to whether the individual or RPE is receiving income from the endorsement of products or services, not whether the income is received in connection with a separate trade or business of making endorsements. Whether a taxpayer endorses a product or services is dependent on the facts and circumstances.

Reg. § 1.199A-5(b)(2)(xiv), "Meaning of trade or business where the principal asset of such trade or business is the reputation or skill of one or more employees or owners," provides:

> For purposes of Section 199A(d)(2) and paragraph (b)(1)(xiii) of this section only, the term *any trade or business where the principal asset of such trade or business is the reputation or skill of one or more of its employees or owners* means any trade or business that consists of any of the following (or any combination thereof):
>
> (A) A trade or business in which a person receives fees, compensation, or other income for endorsing products or services;
>
> (B) A trade or business in which a person licenses or receives fees, compensation, or other income for the use of an individual's image, likeness, name, signature, voice, trademark, or any other symbols associated with the individual's identity; or

(C) Receiving fees, compensation, or other income for appearing at an event or on radio, television, or another media format.

(D) For purposes of paragraphs (b)(2)(xiv)(A) through (C) of this section, the term fees, compensation, or other income includes the receipt of a partnership interest and the corresponding distributive share of income, deduction, gain, or loss from the partnership, or the receipt of stock of an S corporation and the corresponding income, deduction, gain, or loss from the S corporation stock.

Reg. § 1.199A-5(b)(3)(iv), Example (4), dealing with a lab with highly skilled employees, is reproduced in the text accompanying fn 846 of part II.E.1.c.iv.(b) Health.

Reg. § 1.199A-5(b)(3)(xiv) [click on citation for caveats], Example (14) provides:

> K owns 100% of Corp, an S corporation, which operates a bicycle sales and repair business. Corp has 8 employees, including K. Half of Corp's net income is generated from sales of new and used bicycles and related goods, such as helmets, and bicycle-related equipment. The other half of Corp's net income is generated from bicycle repair services performed by K and Corp's other employees. Corp's assets consist of inventory, fixtures, bicycle repair equipment, and a leasehold on its retail location. Several of the employees and G have worked in the bicycle business for many years, and have acquired substantial skill and reputation in the field. Customers often consult with the employees on the best bicycle for purchase. K is in the business of sales and repairs of bicycles and is not engaged in an SSTB within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(xiii) and (b)(2)(xiv) of this section.

Reg. § 1.199A-5(b)(3)(xv) [click on citation for caveats], Example (15) provides:

> L is a well-known chef and the sole owner of multiple restaurants each of which is owned in a disregarded entity. Due to L's skill and reputation as a chef, L receives an endorsement fee of $500,000 for the use of L's name on a line of cooking utensils and cookware. L is in the trade or business of being a chef and owning restaurants and such trade or business is not an SSTB. However, L is also in the trade or business of receiving endorsement income. L's trade or business consisting of the receipt of the endorsement fee for L's skill and/or reputation is an SSTB within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(xiii) and (b)(2)(xiv) of this section.

Reg. § 1.199A-5(b)(3)(xvi) [click on citation for caveats], Example (16) provides:

> M is a well-known actor. M entered into a partnership with Shoe Company, in which M contributed her likeness and the use of her name to the partnership in exchange for a 50% interest in the partnership and a guaranteed payment. M's trade or business consisting of the receipt of the partnership interest and the corresponding distributive share with respect to the partnership interest for M's likeness and the use of her name is an SSTB within the meaning of Section 199A(d)(2) or paragraphs (b)(1)(xiii) and (b)(2)(xiv) of this section.

II.E.1.c.iv.(o). SSTB Very Broad Gross Receipts Test and Anti-Abuse Rules

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), "Defining What is Included in an SSTB," provides:

> The Treasury Department and the IRS are aware that some taxpayers have contemplated a strategy to separate out parts of what otherwise would be an integrated SSTB, such as the administrative functions, in an attempt to qualify those separated parts for the Section 199A deduction. Such a strategy is inconsistent with the purpose of Section 199A. Therefore, in accordance with Section 199A(f)(4), in order to carry out the purposes of Section 199A, proposed § 1.199A-5(c)(2) provides that an SSTB includes any trade or business with 50 percent or more common ownership (directly or indirectly) that provides 80 percent or more of its property or services to an SSTB. Additionally, if a trade or business has 50 percent or more common ownership with an SSTB, to the extent that the trade or business provides property or services to the commonly-owned SSTB, the portion of the property or services provided to the SSTB will be treated as an SSTB (meaning the income will be treated as income from an SSTB). For example, A, a dentist, owns a dental practice and also owns an office building. A rents half the building to the dental practice and half the building to unrelated persons. Under proposed § 1.199A-5(c)(2), the renting of half of the building to the dental practice will be treated as an SSTB.
>
> Additionally, proposed § 1.199A-5 provides a rule that if a trade or business (that would not otherwise be treated as an SSTB) has 50 percent or more common ownership with an SSTB and shared expenses, including wages or overhead expenses with the SSTB, it is treated as incidental to an SSTB and, therefore, as an SSTB, if the trade or business represents no more than five percent of gross receipts of the combined business.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.B, "De Minimis Rule," explains:

> The proposed regulations provide that for a trade or business with gross receipts of $25 million or less for the taxable year, a trade or business is not an SSTB if less than 10 percent of the gross receipts of the trade or business are attributable to a specified service field. The percentage is reduced to 5 percent in the case of trades or businesses with gross receipts in excess of $25 million. Several commenters requested clarification regarding whether the entire trade or business is designated an SSTB if the threshold is exceeded. Some of these commenters suggested that the rule be modified so that the deduction could be claimed on the portion of the trade or business activity that was not an SSTB. A few suggested that an allocation similar to that in now repealed section 199 could be used. One commenter suggested using the cost accounting principles of section 861 with a safe harbor allowing a simplified method for entities with average annual gross receipts less than $25 million. Another commenter stated that treating the entire trade or business as an SSTB is a trap for the unwary because well-advised taxpayers could avoid application of the rule by rearranging their activities into separate entities. One commenter suggested that the de minimis rule allow for minor year-to-year changes in gross receipts for businesses that are close to the de minimis thresholds. The commenter also suggested that the thresholds be increased and recommended an incremental approach in which the deduction is calculated based on the portion of the business that is not engaged in an SSTB. Another commenter suggested that if the rule is retained, it should be imposed only at a

greater than 50 percent threshold since only at that point would SSTB gross receipts predominate over non-SSTB gross receipts. The commenter also noted that a higher threshold would be easier to track. Several commenters also suggested that the de minimis threshold be raised. One commenter suggested that the de minimis threshold be raised to 20 percent for all qualified businesses, regardless of gross receipts. The commenter argued that a 20 percent threshold is supported by Congress's decision to use section 1202(e) for its definition of an SSTB, noting that section 1202(e)(1)(A) uses an at least 80 percent (by value) rule for determining whether a qualified trade or business satisfies the section's active business requirement. Other commenters recommended that the ten percent threshold should apply for purposes of the de minimis threshold regardless of the amount of gross receipts of the trade or business. Public comments lacked consensus regarding the 5-percent de minimis threshold. After considering all of the comments, the Treasury Department and the IRS chose to retain the 5-percent threshold in the final regulations as it is a de minimis threshold that is generally consistent with prior regulations under the Code in similar circumstances and therefore, such a standard should be familiar to affected entities.

Another commenter suggested that final regulations clarify whether revenue generated from the sale of medical products or devices should be excluded from the overall QBI for trades or businesses that provide services in the field of health. The commenter noted that physicians who provide their patients with medical devices should be able to use the deduction with respect to income from such devices and expressed concern that the de minimis thresholds could limit the ability of some practitioners to use the deduction. Another commenter suggested that a business with SSTB gross receipts in excess of the de minimis should not be entirely disqualified, but that the facts and circumstances should be analyzed to determine the true nature of the trade or business. The commenter also suggested that a safe harbor should be provided in which a business can make an election to deem the SSTB activity as a separate trade or business solely for the purposes of Section 199A. Finally, one commenter suggested that final regulations include an example of what result occurs if a taxpayer's SSTB revenue is not de minimis.

The Treasury Department and the IRS decline to adopt most of the recommendations in these comments. As stated in the preamble to the proposed regulations, the statutory language of Section 199A does not provide a certain quantum of activity before an SSTB is found. Rather, Section 199A looks to whether the trade or business involves the performance of services in the list of SSTBs. The use of the word "involving" suggests that any amount of specified service activity causes a trade or business to be an SSTB. Consequently, the Treasury Department and the IRS believe that it would be inappropriate to adopt a pro rata rule. However, requiring all taxpayers to evaluate and quantify any amount of specified service activity would be unduly burdensome and complex for both taxpayers and the IRS. Accordingly, the proposed rule provides a de minimis threshold under which a trade or business will not be considered an SSTB merely because it provides a small amount of services in a specified service activity. Trades or business with gross income from a specified service activity in excess of the de minimis threshold are considered to be SSTBs. The final regulations retain the proposed rule but add an additional example demonstrating the result in which a trade or business has income from a specified service activity in excess of the de minimis threshold.

> As discussed in part II of this Summary of Comments and Explanation of Revisions, the Treasury Department and the IRS acknowledge that an RPE can have more than one trade or business for purposes of section 162 and thus for Section 199A. However, each trade or business is required under Section 199A to be separately tested to determine whether that trade or business is an SSTB. Similarly, the de minimis threshold is applied to each trade or business of an RPE separately, not in the aggregate to all the trades or businesses of the RPE. Thus, to the extent that an individual or RPE has more than one trade or business, the presence of specified service activity in one of those trades or business will not cause the individual's or RPE's other trades or businesses to be considered SSTBs except to the extent that the rules in § 1.199A-5(c)(2) (services or property provided to an SSTB) apply.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.C, "Services or Property Provided to an SSTB," explains:

> The proposed regulations provide special rules for service or property provided to an SSTB by a trade or business with common ownership. A trade or business that provides more than 80 percent of its property or services to an SSTB is treated as an SSTB if there is 50 percent or more common ownership of the trades or businesses. In cases in which a trade or business provides less than 80 percent of its property or services to a commonly owned SSTB, the portion of the trade or business providing property to the commonly owned SSTB is treated as part of the SSTB with respect to the related parties.
>
> One commenter suggested that the provision is warranted because of abuse potential but is overbroad and prevents legitimate transactions. The commenter recommended that the rule be modified into a presumption that a taxpayer could rebut with evidence demonstrating that the property or services provided to the SSTB by the related RPE are (1) comparable to those available from competing organizations and (2) that prices charged by the RPE and paid by the SSTB are comparable to those charged in the market. The commenter also suggested that the IRS could examine the totality of facts and circumstances, including historic conduct between the SSTB and RPE. Another commenter suggested that the final rule add an exception to the rule for taxpayers that can demonstrate they have a substantial purpose (apart from Federal income tax effects) for structuring their trade or business in a particular manner. For example, title to a skilled nursing facility could be held by one passthrough entity that is operated by a related passthrough entity in order to satisfy Department of Housing and Urban Development lending requirements. The Treasury Department and the IRS decline to adopt these recommendations. Creating a presumption or substantial purpose test would lead to greater complexity and administrative burden for both taxpayers and the IRS.

As the preamble to the final regulations, T.D. 9847 (2/8/2019), summarizes in the section explaining economic impact:[847]

> The final regulations removed the "incidental to an SSTB" rule requiring that businesses with majority ownership and shared expenses with an SSTB be considered as part of the

[847] T.D. 9847 (2/8/2019), Special Analyses, part I, "Regulatory Planning and Review – Economic Analysis," subpart C, "Economic Analysis of Changes in Final Regulations," paragraph 3, "Anti-abuse Rules."

same trade or business for purposes of the Section 199A deduction. This anti-abuse rule was intended to limit the ability of taxpayers to separate their SSTB and non-SSTB income into two trades or businesses in order to receive the deduction on their non-SSTB income. In response to comments, the rule was removed from the final regulations for a number of reasons. First, defining when two businesses have shared expenses is difficult to administer and could be overly inclusive. Second, there was a concern that start-up businesses could be excluded from the Section 199A deduction if they shared expenses and ownership with a larger business that could be considered an SSTB.

The final regulations modify the anti-abuse rule concerning services or property provided to an SSTB. The rule is meant to disallow SSTBs from splitting their trade or business into two pieces with one providing services or leasing property to the other. For example, imagine a dentist office that owns a building. The dental practice would be considered an SSTB. Suppose the dentist split the business into two trades or businesses, the first of which was the dental practice and the second of which owned the building and leased it to the dental practice. This rule states that the income from leasing the building to the dental practice would also be considered SSTB income and ineligible for the Section 199A deduction. Under the proposed regulations, a trade or business that provides more than 80 percent of its property or services to an SSTB is treated as an SSTB if there is 50 percent or more common ownership of the trades or businesses. In cases in which a trade or business provides less than 80 percent of its property or services to a commonly owned SSTB, the portion of the trade or business providing property to the commonly owned SSTB is treated as part of the SSTB with respect to the related parties. The final regulations remove the 80 percent threshold and allow any portion that is not provided to an SSTB to be eligible for the Section 199A deduction. For example, if the dentist's leasing trade or business leased 90 percent of the building to the dental office and 10 percent to a coffee shop, the 10 percent would now be eligible for the Section 199A deduction. This change removed a threshold in the anti-abuse rule, which will remove any incentive to stay below the 80 percent threshold, while still disallowing the income from providing property or services to related SSTBs to be eligible for the deduction.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VI.D, "Incidental to a Specified Service Trade or Business," explains:

The proposed regulations provide that if a trade or business (that would not otherwise be treated as an SSTB) has both 50 percent or more common ownership with an SSTB and shared expenses with an SSTB, then the trade or business is treated as incidental to and, therefore, part of the SSTB, if the gross receipts of the trade or business represent no more than five percent of the total combined gross receipts of the trade or business and the SSTB in a taxable year. One commenter recommended that this rule be removed because it is unnecessary and causes administrative difficulties for taxpayers who must determine whether a trade or business is incidental in order to apply the rule. If the rule is retained, the commenter recommended that final regulations define gross receipts and shared expenses, make adjustments to avoid double counting the same gross receipts, clarify what businesses are taken into account for purposes of the rule, and treat a trade or business to which the anti-abuse rule applies as a separate SSTB rather than as part of the SSTB. Another commenter suggested that the final regulations add an exception for start-ups such as a three to five year grace period and also clarify the ownership standard, how the rule would apply if the trades or business have different tax years, and how shared expenses would be determined. In accordance with the comments, the rule is removed from the final regulations.

Reg. § 1.199A-5(c), "Special rules," provides:

(1) *De minimis rule*.

(i) *Gross receipts of $25 million or less*. For a trade or business with gross receipts of $25 million or less for the taxable year, a trade or business is not an SSTB if less than 10 percent of the gross receipts of the trade or business are attributable to the performance of services in a field described in paragraph (b) of this section. For purposes of determining whether this 10 percent test is satisfied, the performance of any activity incident to the actual performance of services in the field is considered the performance of services in that field.

(ii) *Gross receipts of greater than $25 million*. For a trade or business with gross receipts of greater than $25 million for the taxable year, the rules of paragraph (c)(1)(i) of this section are applied by substituting "5 percent" for "10 percent" each place it appears.

(iii) *Examples*. The following examples illustrate the provisions of paragraph (c)(1) of this section.

(A) *Example 1*. Landscape LLC sells lawn care and landscaping equipment and also provides advice and counsel on landscape design for large office parks and residential buildings. The landscape design services include advice on the selection and placement of trees, shrubs, and flowers and are considered to be the performance of services in the field of consulting under paragraphs (b)(1)(vi) and (b)(2)(vii) of this section. Landscape LLC separately invoices for its landscape design services and does not sell the trees, shrubs, or flowers it recommends for use in the landscape design. Landscape LLC maintains one set of books and records and treats the equipment sales and design services as a single trade or business for purposes of sections 162 and 199A. Landscape LLC has gross receipts of $2 million. $ 250,000 of the gross receipts is attributable to the landscape design services, an SSTB. Because the gross receipts from the consulting services exceed 10 percent of Landscape LLC's total gross receipts, the entirety of Landscape LLC's trade or business is considered an SSTB.

(B) *Example 2*. Animal Care LLC provides veterinarian services performed by licensed staff and also develops and sells its own line of organic dog food at its veterinarian clinic and online. The veterinarian services are considered to be the performance of services in the field of health under paragraphs (b)(1)(i) and (b)(2)(ii) of this section. Animal Care LLC separately invoices for its veterinarian services and the sale of its organic dog food. Animal Care LLC maintains separate books and records for its veterinarian clinic and its development and sale of its dog food. Animal Care LLC also has separate employees who are unaffiliated with the veterinary clinic and who only work on the formulation, marketing, sales, and distribution of the organic dog food products. Animal Care LLC treats its veterinary practice and the dog food development and sales as separate trades or businesses for purposes of section 162 and 199A. Animal Care LLC has gross receipts of $3,000,000. $1,000,000 of the gross receipts is attributable to the veterinary services, an SSTB. Although the gross receipts from the services in the field of health exceed 10 percent of Animal Care LLC's total gross receipts, the dog food development and sales business is not considered an SSTB due to the fact that the veterinary practice and the dog food development and sales are separate trades or businesses under section 162.

(2) *Services or property provided to an SSTB*.

(i) *In general*. If a trade or business provides property or services to an SSTB within the meaning of this section and there is 50 percent or more common ownership of the trades or businesses, that portion of the trade or business of providing property or services to the 50 percent or more commonly-owned SSTB will be treated as a separate SSTB with respect to the related parties.

(ii) *50 percent or more common ownership*. For purposes of paragraph (c)(2)(i) and (ii) of this section, 50 percent or more common ownership includes direct or indirect ownership by related parties within the meaning of sections 267(b) or 707(b).

(iii) *Examples*. The following examples illustrate the provisions of paragraph (c)(2) of this section.

(A) *Example 1*. Law Firm is a partnership that provides legal services to clients, owns its own office building and employs its own administrative staff. Law Firm divides into three partnerships. Partnership 1 performs legal services to clients. Partnership 2 owns the office building and rents the entire building to Partnership 1. Partnership 3 employs the administrative staff and through a contract with Partnership 1 provides administrative services to Partnership 1 in exchange for fees. All three of the partnerships are owned by the same people (the original owners of Law Firm). Because Partnership 2 provides all of its property to Partnership 1, and Partnership 3 provides all of its services to Partnership 1, Partnerships 2 and 3 will each be treated as an SSTB under paragraph (c)(2) of this section.

(B) *Example 2*. Assume the same facts as in Example 1 of this paragraph (c)(2), except that Partnership 2, which owns the office building, rents 50 percent of the building to Partnership 1, which provides legal services, and the other 50 percent to various unrelated third party tenants. Because Partnership 2 is owned by the same people as Partnership 1, the portion of Partnership 2's leasing activity related to the lease of the building to Partnership 1 will be treated as a separate SSTB. The remaining 50 percent of Partnership 2's leasing activity will not be treated as an SSTB.

Code § 267(b) is reproduced in part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses. For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

Reg. § 1.199A-5(c)(1) is a snake in the grass. The corollary of ignoring SSTB components of a business if gross receipts are less than 5% or 10% of gross receipts is that a business can have as much as 95% or 90% gross receipts be from non-SSTB sources and be counted as an SSTB.

To minimize or avoid an SSTB's contamination, consider segregating business that involve SSTBs from those that do not involve SSTBs. For how to segregate businesses, see part II.E.1.c.iii.(b) Multiple Trades or Businesses Within an Entity – Identification of Businesses and Allocation of Items. Reg. § 1.199A-5(c)(1)(iii)(B) above confirms the efficacy of this strategy.

II.E.1.c.v. Calculation of Deduction Generally

The preamble to final regulations explains:[848]

> As noted in the preamble to the proposed regulations, Section 199A was enacted on December 22, 2017, by section 11011 of "An Act to provide for reconciliation pursuant to titles II and V of the concurrent resolution on the budget for fiscal year 2018," Public Law 115-97 (TCJA), and was amended on March 23, 2018, retroactively to January 1, 2018, by section 101 of Division T of the Consolidated Appropriations Act, 2018, Public Law 115-141, (2018 Act). Section 199A applies to taxable years beginning after 2017 and before 2026.
>
> Section 199A provides a deduction of up to 20 percent of income from a domestic business operated as a sole proprietorship or through a partnership, S corporation, trust, or estate. The Section 199A deduction may be taken by individuals and by some estates and trusts. A Section 199A deduction is not available for wage income or for business income earned through a C corporation (as defined in section 1361(a)(2)). For taxpayers whose taxable income exceeds a statutorily-defined amount (threshold amount), Section 199A may limit the taxpayer's Section 199A deduction based on (i) the type of trade or business engaged in by the taxpayer, (ii) the amount of W-2 wages paid with respect to the trade or business (W-2 wages), and/or (iii) the UBIA of qualified property held for use in the trade or business (UBIA of qualified property). These statutory limitations are subject to phase-in rules based upon taxable income above the threshold amount.
>
> Section 199A also allows individuals and some trusts and estates (but not corporations) a deduction of up to 20 percent of their combined qualified REIT dividends and qualified PTP income, including qualified REIT dividends and qualified PTP income earned through passthrough entities. This component of the Section 199A deduction is not limited by W-2 wages or UBIA of qualified property.
>
> The Section 199A deduction is the lesser of (1) the sum of the combined amounts described in the prior two paragraphs or (2) an amount equal to 20 percent of the excess (if any) of taxable income of the taxpayer for the taxable year over the net capital gain of the taxpayer for the taxable year.
>
> Additionally, Section 199A(g), as amended by the 2018 Act effective as of January 1, 2018, provides that specified agricultural or horticultural cooperatives may claim a special entity-level deduction that is substantially similar to the domestic production activities deduction under former section 199. The Treasury Department and

[848] T.D. 9847 (2/8/2019), part I.A.

the IRS intend to issue a future notice of proposed rulemaking describing proposed rules for applying Section 199A to specified agricultural and horticultural cooperatives and their patrons.

Finally, the statute expressly grants the Secretary authority to prescribe such regulations as are necessary to carry out the purposes of Section 199A (Section 199A(f)(4)), and provides specific grants of authority with respect to: The treatment of acquisitions, dispositions, and short taxable years (Section 199A(b)(5)); certain payments to partners for services rendered in a non-partner capacity (Section 199A(c)(4)(C)); the allocation of W-2 wages and UBIA of qualified property (Section 199A(f)(1)(A)(iii)); restricting the allocation of items and wages under Section 199A and such reporting requirements as the Secretary determines appropriate (Section 199A(f)(4)(A)); the application of Section 199A in the case of tiered entities (Section 199A(f)(4)(B); preventing the manipulation of the depreciable period of qualified property using transactions between related parties (Section 199A(h)(1)); and determining the UBIA of qualified property acquired in like-kind exchanges or involuntary conversions (Section 199A(h)(2)).

Taxpayers other than C corporations may deduct a portion of qualified business income ("QBI") and qualified cooperative dividends ("QCDs"). Code § 199A(a) provides:

In general. In the case of a taxpayer other than a corporation, there shall be allowed as a deduction for any taxable year an amount equal to the sum of—

(1) the lesser of -

(A) the combined qualified business income amount of the taxpayer, or

(B) an amount equal to 20 percent of the excess (if any) of-

(i) the taxable income of the taxpayer for the taxable year, over

(ii) the sum of any net capital gain (as defined in section 1(h)), plus the aggregate amount of the qualified cooperative dividends, of the taxpayer for the taxable year, plus

(2) the lesser of -

(A) 20 percent of the aggregate amount of the qualified cooperative dividends of the taxpayer for the taxable year, or

(B) taxable income (reduced by the net capital gain (as so defined)) of the taxpayer for the taxable year.

The amount determined under the preceding sentence shall not exceed the taxable income (reduced by the net capital gain (as so defined)) of the taxpayer for the taxable year.

Thus, the deduction relating to QBI is effectively limited to taxable income that is not taxed as long-term capital gain.[849]

The deduction for QCDs[850] is not a focus of this document,[851] nor do Prop. Reg. §§ 1.199A-1 through 1.199A-6 or Reg. §§ 1.199A-1 through 1.199A-6 address it,[852] except to provide special rules for QBI from any trade or business of a patron of a specified agricultural or horticultural cooperative.[853] Note the limitation related to net capital gain; it includes qualified dividends and also includes capital gains and qualified dividends that do not receive capital gain rates because they are treated as investment income under Code § 163(d)(4)(B)(iii).[854] This limitation seems

---

849 This is a major limitation among others listed in part II.E.1.c.i.(a) Summary of Federal Impact of Deduction, especially fn 771.

850 Code § 199A(e)(4) provides:

> *Qualified Cooperative Dividend*. The term "qualified cooperative dividend" means any patronage dividend (as defined in section 1388(a)), any per-unit retain allocation (as defined in section 1388(f)), and any qualified written notice of allocation (as defined in section 1388(c)), or any similar amount received from an organization described in subparagraph (B)(ii), which—
>
> (A) is includible in gross income, and
>
> (B) is received from—
>
> (i) an organization or corporation described in section 501(c)(12) or 1381(a), or
>
> (ii) an organization which is governed under this title by the rules applicable to cooperatives under this title before the enactment of subchapter T.

851 The Senate report explained (footnotes omitted) (remember that the Conference Committee reduced the deduction from 23% to 20%):

> A deduction is allowed under the provision for 23 percent of the taxpayer's aggregate amount of qualified REIT dividends, qualified cooperative dividends, and qualified publicly traded partnership income for the taxable year. Qualified REIT dividends do not include any portion of a dividend received from a REIT that is a capital gain dividend or a qualified dividend. A qualified cooperative dividend means a patronage dividend, per-unit retain allocation, qualified written notice of allocation, or any similar amount, provided it is includible in gross income and is received from either (1) a tax-exempt benevolent life insurance association, mutual ditch or irrigation company, cooperative telephone company, like cooperative organization, or a taxable or tax-exempt cooperative that is described in section 1381(a), or (2) a taxable cooperative governed by tax rules applicable to cooperatives before the enactment of subchapter T of the Code in 1962. Qualified publicly traded partnership income means (with respect to any qualified trade or business of the taxpayer), the sum of the (a) the net amount of the taxpayer's allocable share of each qualified item of income, gain, deduction, and loss (that are effectively connected with a U.S. trade or business and are included or allowed in determining taxable income for the taxable year and do not constitute excepted enumerated investment-type income, and not including the taxpayer's reasonable compensation, guaranteed payments for services, or (to the extent provided in regulations) section 707(a) payments for services) from a publicly traded partnership not treated as a corporation, and (b) gain recognized by the taxpayer on disposition of its interest in the partnership that is treated as ordinary income (for example, by reason of section 751).

852 Each of Prop. Reg. § 1.199A-1(a)(1) and Reg. § 1.199A-1(a)(1) concludes with:

> This section and §§ 1.199A-2 through 1.199A-6 do not apply for purposes of calculating the deduction in section 199A(g) for specified agricultural and horticultural cooperatives.

853 See Reg. § 1.199A-1(e)(7).

854 Although Code § 199A(a)(1)(B)(ii) refers to Code § 1(h) to define "net capital gain," Code § 1(h) does not define the term. "Net capital gain" means the excess of the net long-term capital gain for the taxable year over the net short-term capital loss for such year. Code § 1222(11), which applies for purposes of subtitle A (Code §§ 1-1563). The preamble to the final regulations, T.D. 9847 (2/8/2019), part II.A.1, reasons:

designed to keep the capital gain rate as the floor for a taxpayer's rate and not let the QBI/QCD deduction reduce that rate. Capital gains cannot be QBI.[855] In understanding how this limitation works, note that the QBI/QCD deduction is not a deduction in arriving at gross income, is not a deduction in arriving at adjusted gross income, and is not an itemized deduction.[856] When one calculates income tax, one calculates it on taxable income with and without net capital gain.[857] Thus, this limit on the QBI deduction is applied after all business and nonbusiness income and deductions are calculated to determine taxable income. Therefore, if capital gain can be QBI, the related deduction can be applied against any business or nonbusiness income that is not net capital gain.

The QBI-based deduction is the lesser of the taxpayer's combined QBI amount or 20% of the excess (if any) of (i) the taxpayer's taxable income over (ii) the sum of the taxpayer's net capital gain and aggregate QCDs.[858]

The combined QBI amount is (A) the sum of certain QBI-related amounts for each qualified trade or business the taxpayer carries on, plus (B) "20 percent of the aggregate amount of the qualified REIT dividends and qualified publicly traded partnership income of the taxpayer for the

---

The final regulations provide a definition of net capital gain for purposes of section 199A. Section 1(h) establishes the maximum capital gains rates imposed on individuals, trusts, and estates that have a net capital gain for the taxable year. Section 1222(11) defines net capital gain as the excess of net long-term capital gain for the taxable year over the net short-term capital loss for such year. Section 1(h)(11) provides that for purposes of section 1(h), net capital gain means net capital gain (determined without regard to section 1(h)(11)) increased by qualified dividend income. Accordingly, § 1.199A-1(b)(3) defines net capital gain for purposes of section 199A as net capital gain within the meaning of section 1222(11) plus any qualified dividend income (as defined in section 1(h)(11)(B)) for the taxable year.

The Treasury Department and the IRS note that under section 1(h)(2), net capital gain is reduced by the amount that the taxpayer takes into account as investment income under section 163(d)(4)(B)(iii). This reduction does not change the definition of net capital gain for purposes of section 1(h). Instead, it reduces the amount of gains that can be taxed at the maximum capital gains rates as a tradeoff for allowing a taxpayer to elect to deduct more investment interest under section 163(d). Consequently, capital gains and qualified dividends treated as investment income are net capital gain for purposes of determining the section 199A deduction.

[855] See Reg. § 1.199A-3(b)(2)(ii)(A), reproduced in part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.

[856] See fns 763-764 in part II.E.1.c.i.(a) Summary of Federal Impact of Deduction.

[857] Code § 1(h).

[858] Code § 199A(a)(1).

taxable year."[859] By "qualified" I mean not a specified service trade or business (SSTB)[860] unless taxable income is below certain thresholds.[861]

All of the analysis in this part II.E.1.c.v Calculation of Deduction Generally needs to be viewed in light of part II.E.1.c.vii Effect of Losses from Qualified Trades or Businesses on the Code § 199A Deduction.

Parts II.E.1.c.v.(b) and II.E.1.c.v.(c) below provide details on this part II.E.1.c.v and refer to the threshold amount, which is described in part II.E.1.c.v.(a) Taxable Income "Threshold.

An overview of Reg. § 1.199A-6, "Relevant passthrough entities (RPEs), publicly traded partnerships (PTPs), trusts, and estates," is provided in Reg. § 1.199A-6(a):

> This section provides special rules for RPEs, PTPs, trusts, and estates necessary for the computation of the Section 199A deduction of their owners or beneficiaries. Paragraph (b) of this section provides computational and reporting rules for RPEs necessary for individuals who own interests in RPEs to calculate their Section 199A deduction. Paragraph (c) of this section provides computational and reporting rules for PTPs necessary for individuals who own interests in PTPs to calculate their Section 199A deduction. Paragraph (d) of this section provides computational and reporting rules for trusts (other than grantor trusts) and estates necessary for their beneficiaries to calculate their Section 199A deduction.

See the introduction to part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income for general rules regarding RPEs. For trusts and estates, see part II.E.1.f Trusts/Estates and the Code § 199A Deduction.

[859] Code § 199A(b)(1). Fn 780 defines "qualified REIT dividend" and "qualified publicly traded partnership income." Reg. § 1.199A-1(d)(3)(i) provides:

> (i) *In general*. The qualified REIT dividend/qualified PTP income component is 20 percent of the combined amount of qualified REIT dividends and qualified PTP income received by the individual (including the individual's share of qualified REIT dividends and qualified PTP income from RPEs).
>
> (ii) *SSTB exclusion*. If the individual's taxable income is within the phase-in range, then only the applicable percentage of qualified PTP income generated by an SSTB is taken into account for purposes of determining the individual's section 199A deduction, including the determination of the combined amount of qualified REIT dividends and qualified PTP income described in paragraph (d)(1) of this section. If the individual's taxable income exceeds the phase-in range, then none of the individual's share of qualified PTP income generated by an SSTB may be taken into account for purposes of determining the individual's section 199A deduction.

Reg. § 1.199A-1(d)(3)(iii), "Negative combined qualified REIT dividends/qualified PTP income," is reproduced in part II.E.1.c.vii Effect of Losses from Qualified Trades or Businesses on the Code § 199A Deduction.

[860] See part II.E.1.c.iv Specified Service Trade or Business (SSTB).

[861] For the latter, see part II.E.1.c.v.(a) Taxable Income "Threshold.

II.E.1.c.v.(a). Taxable Income "Threshold Amount"

The wage limitation[862] and the disqualification of SSTBs[863] are eased up or do not apply if the taxpayer's taxable income, computed without regard to the Code § 199A deduction,[864] is below the "threshold amount." The "threshold amount" is $315,000 for a joint return and $157,500 for any other return.[865] The "threshold amount" will be indexed for inflation in a manner similar to indexing the income tax brackets.[866] For taxable years beginning in 2019, the threshold amount is $321,400 for married filing joint returns, $160,725 for married filing separate returns, and $160,700 for any other returns.[867] For taxable years beginning in 2020, the threshold amount is $326,600 for married filing joint returns, $163,300 for married filing separate returns, and $163,300 for all other returns.[868] For taxable years beginning in 2021, the threshold amount is $329,800 for married filing joint returns, $164,925 for married filing separate returns, and $164,900 for all other returns.[869] For taxable years beginning in 2022, the threshold amount is $340,100 for married filing joint returns, $170,050 for married filing separate returns, and $170,050 for all other returns.[870] For taxable years beginning in 2023, the threshold amount is $364,200 for married filing joint returns, $182,100 for married filing separate returns, and $182,100 for all other returns.[871] For taxable years beginning in 2024, the threshold amount is $383,900 for married filing joint returns, $191,950 for married filing separate returns, and $191,950 for all other returns.[872]

Reg. § 1.199A-1(b)(11) provides:

> *Threshold amount* means, for any taxable year beginning before 2019, $157,500 (or $315,000 in the case of a taxpayer filing a joint return). In the case of any taxable year beginning after 2018, the threshold amount is the dollar amount in the preceding sentence increased by an amount equal to such dollar amount, multiplied by the cost-of-living adjustment determined under section 1(f)(3) of the Code for the calendar year in which the taxable year begins, determined by substituting "calendar year 2017" for "calendar year 2016" in section 1(f)(3)(A)(ii). The amount of any increase under the preceding sentence is rounded as provided in section 1(f)(7) of the Code.

---

862 See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

The preamble to Prop. Reg. § 1.199A-2, REG-107892-18 (8/16/2018), explains:

B. Computation of the Section 199A Deduction for Individuals With Taxable Income Below the Threshold Amount

1. Basic Computational Rules

An individual with income attributable to one or more domestic trades or businesses, other than as a result of owning stock of a C corporation or engaging in the trade or business of being an employee, and with taxable income (before computing the Section 199A deduction) at or below the threshold amount, is entitled to a Section 199A deduction equal to the lesser of (i) 20 percent of the QBI (generally defined as the net amount of qualified items of income, gain, deduction, and loss with respect to a qualified trade or business of the taxpayer) from the individual's trades or businesses plus 20 percent of the individual's combined qualified REIT dividends and qualified PTP income or (ii) 20 percent of the excess (if any) of the individual's taxable income over the individual's net capital gain. Proposed § 1.199A-1(c) contains guidance on calculating the amount of the deduction in these circumstances. If an individual's combined QBI is negative or combined qualified REIT dividends and PTP income is less than zero, proposed § 1.199A-1(c)(2) provides rules for the carryover of the losses.

2. Carryover Loss Rules for Negative Total QBI Amounts

If an individual has multiple trades or businesses, the individual must calculate the QBI from each trade or business and then net the amounts. Section 199A(c)(2) provides that, for purposes of Section 199A, if the net QBI with respect to qualified trades or businesses of the taxpayer for any taxable year is less than zero, such amount shall be treated as a loss from a qualified trade or business in the succeeding taxable year. Proposed § 1.199A-1(c)(2)(i) repeats this rule and provides that the Section 199A carryover rules do not affect the deductibility of the losses for purposes of other provisions of the Code.

3. Carryover Loss Rules if Combined Qualified REIT Dividends and Qualified PTP Income is Less Than Zero

One commenter stated it was not clear whether, if a taxpayer has an overall loss from combined qualified REIT dividends and qualified PTP income (because a loss from a PTP exceeds REIT dividends and PTP income), the negative amount should be netted against any net positive QBI (regardless of source), or whether the negative amount should be segregated and subject to its own loss carryforward rule distinct from but analogous to the QBI loss carryforward rule. Section 199A contemplates that qualified REIT dividends and qualified PTP income are computed and taken into account separately from QBI and should not affect QBI. If overall losses attributable to qualified REIT dividends and qualified PTP income were netted against QBI, these losses would affect QBI. Therefore, a separate loss carryforward rule is needed to segregate an overall loss attributable to qualified REIT dividends and qualified PTP income from QBI. Additionally, commenters have expressed concern that losses in excess of income could create a negative Section 199A deduction, a result incompatible with the statute. Accordingly, proposed § 1.199A-1(c)(2)(ii) provides that if an individual has an overall loss after qualified REIT dividends and qualified PTP income are combined, the portion of the individual's Section 199A deduction related to qualified REIT dividends and qualified PTP income is zero for the taxable year. In addition, the overall loss does not affect the amount of the taxpayer's QBI. Instead, such overall loss is carried forward and must be used to offset combined qualified REIT dividends and qualified PTP income in the succeeding taxable year or years for purposes of Section 199A.

Reg. § 1.199A-1(c), "Computation of the § 199A deduction for individuals with taxable income not exceeding threshold amount," provides:

(1) *In general*. The Section 199A deduction is determined for individuals with taxable income for the taxable year that does not exceed the threshold amount by adding 20 percent of the total QBI amount (including the individual's share of QBI from an RPE and QBI attributable to an SSTB) and 20 percent of the combined amount of qualified REIT dividends and qualified PTP income (including the individual's share of qualified REIT dividends and qualified PTP income from RPEs and qualified PTP income attributable to an SSTB). That sum is then compared to 20 percent of the amount by which the individual's taxable income exceeds net capital gain. The lesser of these two amounts is the individual's Section 199A deduction.

(2) *Carryover rules*.

(i) *Negative total QBI amount*. If the total QBI amount is less than zero, the portion of the individual's Section 199A deduction related to QBI is zero for the taxable year. The negative total QBI amount is treated as negative QBI from a separate trade or business in the succeeding taxable years of the individual for purposes of Section 199A and this section. This carryover rule does not affect the deductibility of the loss for purposes of other provisions of the Code.

(ii) *Negative combined qualified REIT dividends/qualified PTP income*. If the combined amount of REIT dividends and qualified PTP income is less than zero, the portion of the individual's Section 199A deduction related to qualified REIT dividends and qualified PTP income is zero for the taxable year. The negative combined amount must be carried forward and used to offset the combined amount of REIT dividends and qualified PTP income in the succeeding taxable years of the individual for purposes of Section 199A and this section. This carryover rule does not affect the deductibility of the loss for purposes of other provisions of the Code.

Reg. § 1.199A-1(c)(3), "Examples," provides:

The following examples illustrate the provisions of this paragraph (c). For purposes of these examples, unless indicated otherwise, assume that all of the trades or businesses are trades or businesses as defined in paragraph (b)(14) of this section and all of the tax items are effectively connected to a trade or business within the United States within the meaning of section 864(c). Total taxable income does not include the Section 199A deduction.

Reg. § 1.199A-1(c)(3)(i), Example (1), provides:

A, an unmarried individual, owns and operates a computer repair shop as a sole proprietorship. The business generates $100,000 in net taxable income from operations in 2018. A has no capital gains or losses. After allowable deductions not relating to the business, A's total taxable income for 2018 is $81,000. The business's QBI is $100,000, the net amount of its qualified items of income, gain, deduction, and loss. A's Section 199A deduction for 2018 is equal to $16,200, the lesser of 20% of A's QBI from the business ($100,000*20% = $20,000) and 20% of A's total taxable income for the taxable year ($81,000*20% = $16,200).

Reg. § 1.199A-1(c)(3)(ii), Example (2), provides:

> Assume the same facts as in *Example 1* of paragraph (c)(3)(i) of this section, except that A also has $7,000 in net capital gain for 2018 and that, after allowable deductions not relating to the business, A's taxable income for 2018 is $74,000. A's taxable income minus net capital gain is $67,000 ($74,000¥$7,000). A's Section 199A deduction is equal to $13,400, the lesser of 20% of A's QBI from the business ($100,000*20% = $20,000) and 20% of A's total taxable income minus net capital gain for the taxable year ($67,000*20% = $13,400).

Reg. § 1.199A-1(c)(3)(iii), Example (3), provides:

> B and C are married and file a joint individual income tax return. B earns $50,000 in wages as an employee of an unrelated company in 2018. C owns 100% of the shares of X, an S corporation that provides landscaping services. X generates $100,000 in net income from operations in 2018. X pays C $150,000 in wages in 2018. B and C have no capital gains or losses. After allowable deductions not related to X, B and C's total taxable income for 2018 is $270,000. B's and C's wages are not considered to be income from a trade or business for purposes of the Section 199A deduction. Because X is an S corporation, its QBI is determined at the S corporation level. X's QBI is $100,000, the net amount of its qualified items of income, gain, deduction, and loss. The wages paid by X to C are considered to be a qualified item of deduction for purposes of determining X's QBI. The Section 199A deduction with respect to X's QBI is then determined by C, X's sole shareholder, and is claimed on the joint return filed by B and C. B and C's Section 199A deduction is equal to $20,000, the lesser of 20% of C's QBI from the business ($100,000*20% = $20,000) and 20% of B and C's total taxable income for the taxable year ($270,000*20% = $54,000).

Reg. § 1.199A-1(c)(3)(iv), Example (4), provides:

> Assume the same facts as in *Example 3* of paragraph (c)(3)(iii) of this section except that B also earns $1,000 in qualified REIT dividends and $500 in qualified PTP income in 2018, increasing taxable income to $271,500. B and C's Section 199A deduction is equal to $20,300, the lesser of:
>
> (A) 20% of C's QBI from the business ($100,000*20% = $20,000) plus 20% of B's combined qualified REIT dividends and qualified PTP income ($1,500*20% = $300); and
>
> (B) 20% of B and C's total taxable for the taxable year ($271,500*20% = $54,300).

II.E.1.c.v.(b). Calculation When Taxable Income Does Not Exceed the Threshold Amount

Reg. § 1.199A-1(c)(1) combines the above, as well as the benefits of taxable income not exceeding the threshold amount:[873]

> *In general*. The Section 199A deduction is determined for individuals with taxable income for the taxable year that does not exceed the threshold amount by adding 20 percent of the total QBI amount (including the individual's share of QBI from an RPE and QBI attributable to an SSTB) and 20 percent of the combined amount of qualified REIT dividends and qualified PTP income (including the individual's share of qualified REIT dividends and qualified PTP income from RPEs and qualified PTP income attributable to an SSTB). That sum is then compared to 20 percent of the amount by which the individual's taxable income exceeds net capital gain. The lesser of these two amounts is the individual's Section 199A deduction.

Reg. § 1.199A-1(b)(13) provides:

> *Total QBI amount* means the net total QBI from all trades or businesses (including the individual's share of QBI from trades or business conducted by RPEs).

Reg. § 1.199A-1(c)(3), "Examples," provides:

> The following examples illustrate the provisions of this paragraph (c). For purposes of these examples, unless indicated otherwise, assume that all of the trades or businesses are trades or businesses as defined in paragraph (b)(14) of this section and all of the tax items are effectively connected to a trade or business within the United States within the meaning of section 864(c). Total taxable income does not include the Section 199A deduction.

Reg. § 1.199A-1(c)(3)(i), Example (1) provides:

> A, an unmarried individual, owns and operates a computer repair shop as a sole proprietorship. The business generates $100,000 in net taxable income from operations in 2018. A has no capital gains or losses. After allowable deductions not relating to the business, A's total taxable income for 2018 is $81,000. The business's QBI is $100,000, the net amount of its qualified items of income, gain, deduction, and loss. A's Section 199A deduction for 2018 is equal to $16,200, the lesser of 20% of A's QBI from the business ($100,000*20% = $20,000) and 20% of A's total taxable income for the taxable year ($81,000*20% = $16,200).

Reg. § 1.199A-1(c)(3)(ii), Example (2) provides:

> Assume the same facts as in *Example 1* of paragraph (c)(3)(i) of this section, except that A also has $7,000 in net capital gain for 2018 and that, after allowable deductions not relating to the business, A's taxable income for 2018 is $74,000. A's taxable income minus net capital gain is $67,000 ($74,000-$7,000). A's Section 199A deduction is equal to $13,400, the lesser of 20% of A's QBI from the business ($100,000*20% =

[873] For the latter, see part II.E.1.c.v.(a) Taxable Income "Threshold.

> \$20,000) and 20% of A's total taxable income minus net capital gain for the taxable year (\$67,000*20% = \$13,400).

The difference between the facts in the two examples is that A's total taxable income minus net capital gain in Example (2) was only \$67,000, which is \$14,000 less than \$81,000 in Example (1). Because in each example the total QBI amount exceeded total taxable income minus net capital gain, the change in total taxable income minus net capital gain is the sole difference accounting for the difference in the deduction. Multiplying this \$14,000 difference by 20% equals \$2,800, which equals the difference between the \$16,200 deduction in Example (1) and the \$13,400 deduction in Example (2).

Reg. § 1.199A-1(c)(3)(iii), Example (3) provides:

> B and C are married and file a joint individual income tax return. B earns \$50,000 in wages as an employee of an unrelated company in 2018. C owns 100% of the shares of X, an S corporation that provides landscaping services. X generates \$100,000 in net income from operations in 2018. X pays C \$150,000 in wages in 2018. B and C have no capital gains or losses. After allowable deductions not related to X, B and C's total taxable income for 2018 is \$270,000. B's and C's wages are not considered to be income from a trade or business for purposes of the Section 199A deduction. Because X is an S corporation, its QBI is determined at the S corporation level. X's QBI is \$100,000, the net amount of its qualified items of income, gain, deduction, and loss. The wages paid by X to C are considered to be a qualified item of deduction for purposes of determining X's QBI. The Section 199A deduction with respect to X's QBI is then determined by C, X's sole shareholder, and is claimed on the joint return filed by B and C. B and C's Section 199A deduction is equal to \$20,000, the lesser of 20% of C's QBI from the business (\$100,000*20% = \$20,000) and 20% of B and C's total taxable income for the taxable year (\$270,000*20% = \$54,000).

Example (3) points out that, even though B and C have income that is significantly higher than the \$315,000 (subject to future indexing) threshold amount, their \$270,000 taxable income is below that. For B's and C's wages not being QBI, see part II.E.1.c.ii.(b) Trade or Business of Being an Employee.

Reg. § 1.199A-1(c)(3)(iv), Example (4) provides:

> Assume the same facts as in *Example 3* of paragraph (c)(3)(iii) of this section except that B also earns \$1,000 in qualified REIT dividends and \$500 in qualified PTP income in 2018, increasing taxable income to \$271,500. B and C's Section 199A deduction is equal to \$20,300, the lesser of:
>
> (A) 20% of C's QBI from the business (\$100,000*20% = \$20,000) plus 20% of B's combined qualified REIT dividends and qualified PTP income (\$1,500*20% = \$300); and
>
> (B) 20% of B and C's total taxable for the taxable year (\$271,500*20% = \$54,300).

II.E.1.c.v.(c). Calculation When Taxable Income Exceeds the Threshold Amount

Parts II.E.1.c.iv Specified Service Trade or Business (SSTB) and II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds apply when not fully protected by part II.E.1.c.v.(a) Taxable Income "Threshold Amount".

If the wage limitation reduces the QBI-related amount (20% of QBI income)[874] with respect to any qualified trade or business, and the taxpayer's taxable income does not exceed the threshold amount by $100,000 for a joint return or $50,000 for other returns, then the reduction is pro-rated.[875] The reduction is multiplied by the excess over the threshold divided by $100,000 or $50,000, as applicable.[876] Thus, the phase-out of the benefit of modest taxable income occurs initially from $315,000-$415,000 for married filing jointly and $157,500-$207,500 for all others (all subject to future indexing).

If an SSTB is excluded from being QBI, the taxpayer having taxable income below the threshold removes the exclusion, so that the trade or business qualifies for the deduction.[877] If the taxpayer's taxable exceeds the threshold, the deduction is phased out using a $100,000 or $50,000 calculation similar to that described above:[878]

> only the applicable percentage of qualified items of income, gain, deduction, or loss, and the W-2 wages and the unadjusted basis immediately after acquisition of qualified property, of the taxpayer allocable to such specified service trade or business shall be taken into account in computing the qualified business income, W-2 wages, and the

---

[874] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

[875] Code § 199A(b)(3)(B)(i), "Phase-in of limit for certain taxpayers," provides:

> *In general*. If-
> (I) the taxable income of a taxpayer for any taxable year exceeds the threshold amount, but does not exceed the sum of the threshold amount plus $50,000 ($100,000 in the case of a joint return), and
> (II) the amount determined under paragraph (2)(B) (determined without regard to this subparagraph) with respect to any qualified trade or business carried on by the taxpayer is less than the amount determined under paragraph (2)(A) with respect such trade or business,
>
> then paragraph (2) shall be applied with respect to such trade or business without regard to subparagraph (B) thereof and by reducing the amount determined under subparagraph (A) thereof by the amount determined under clause (ii).

[876] Code § 199A(b)(3)(B)(ii) and (iii) provide:

> (ii) *Amount of reduction*. The amount determined under this subparagraph is the amount which bears the same ratio to the excess amount as-
> (I) the amount by which the taxpayer's taxable income for the taxable year exceeds the threshold amount, bears to
> (II) $50,000 ($100,000 in the case of a joint return).
>
> (iii) *Excess amount*. For purposes of clause (ii), the excess amount is the excess of-
> (I) the amount determined under paragraph (2)(A) (determined without regard to this paragraph), over
> (II) the amount determined under paragraph (2)(B) (determined without regard to this paragraph).

[877] Code § 199(d)(3)(A)(i) provides, "any specified service trade or business of the taxpayer shall not fail to be treated as a qualified trade or business due to paragraph (1)(A)," so one needs to go to Code § 199(d)(1)(A).

[878] Code § 199A(d)(3)(A)(ii).

unadjusted basis immediately after acquisition of qualified property of the taxpayer for the taxable year for purposes of applying this section.

The "applicable percentage" is 100% minus the ratio of the excess taxable income to the $100,000 or $50,000 threshold.[879]

Applying these concepts, Reg. § 1.199A-1(b) includes the following definitions:

(2) *Applicable percentage* means, with respect to any taxable year, 100 percent reduced (not below zero) by the percentage equal to the ratio that the taxable income of the individual for the taxable year in excess of the threshold amount, bears to $50,000 (or $100,000 in the case of a joint return).

(4) *Phase-in range* means a range of taxable income between the threshold amount and the threshold amount plus $50,000 (or $100,000 in the case of a joint return).

(9) *Reduction amount* means, with respect to any taxable year, the excess amount multiplied by the ratio that the taxable income of the individual for the taxable year in excess of the threshold amount, bears to $50,000 (or $100,000 in the case of a joint return). For purposes of this paragraph (b)(9), the *excess amount* is the amount by which 20 percent of QBI exceeds the greater of 50 percent of W-2 wages or the sum of 25 percent of W-2 wages plus 2.5 percent of the UBIA of qualified property.

Reg. § 1.199A-1(d)(1) explains:

In general. The Section 199A deduction is determined for individuals with taxable income for the taxable year that exceeds the threshold amount by adding the QBI component described in paragraph (d)(2) of this section and the qualified REIT dividends/qualified PTP income component described in paragraph (d)(3) of this section (including the individual's share of qualified REIT dividends and qualified PTP income from RPEs). That sum is then compared to 20 percent of the amount by which the individual's taxable income exceeds net capital gain. The lesser of these two amounts is the individual's Section 199A deduction.

Note the reference to "the QBI component" for individuals with taxable income above the threshold amount, contrasted with Reg. § 1.199A-1(c)(1) referring to "20 percent of the total QBI amount" for individuals with taxable income below the threshold amount. Reg. § 1.199A-1(d)(2), "QBI component," provides:

An individual with taxable income for the taxable year that exceeds the threshold amount determines the QBI component using the following computational rules, which are to be applied in the order they appear.

---

[879] Code § 199A(d)(3)(B) provides:

Applicable percentage. For purposes of subparagraph (A), the term "applicable percentage" means, with respect to any taxable year, 100 percent reduced (not below zero) by the percentage equal to the ratio of-

(i) the taxable income of the taxpayer for the taxable year in excess of the threshold amount, bears to

(ii) $50,000 ($100,000 in the case of a joint return).

(i) *SSTB exclusion*. If the individual's taxable income is within the phase-in range, then only the applicable percentage of QBI, W-2 wages, and UBIA of qualified property for each SSTB is taken into account for all purposes of determining the individual's Section 199A deduction, including the application of the netting and carryover rules described in paragraph (d)(2)(iii) of this section. If the individual's taxable income exceeds the phase-in range, then none of the individual's share of QBI, W-2 wages, or UBIA of qualified property attributable to an SSTB may be taken into account for purposes of determining the individual's Section 199A deduction.

(ii) *Aggregated trade or business*. If an individual chooses to aggregate trades or businesses under the rules of § 1.199A-4, the individual must combine the QBI, W-2 wages, and UBIA of qualified property of each trade or business within an aggregated trade or business prior to applying the netting and carryover rules described in paragraph (d)(2)(iii) of this section and the W-2 wage and UBIA of qualified property limitations described in paragraph (d)(2)(iv) of this section.

Reg. § 1.199A-1(d)(2)(iv), "QBI component calculation," provides:

(A) *General rule*. Except as provided in paragraph (d)(2)(iv)(B) of this section, the QBI component is the sum of the amounts determined under this paragraph (d)(2)(iv)(A) for each trade or business (or aggregated trade or business). For each trade or business (or aggregated trade or business) (including trades or businesses operated through RPEs) the individual must determine the lesser of -

(1) 20 percent of the QBI for that trade or business (or aggregated trade or business); or

(2) The greater of—

(i) 50 percent of W-2 wages with respect to that trade or business (or aggregated trade or business), or

(ii) the sum of 25 percent of W-2 wages with respect to that trade or business (or aggregated trade or business) plus 2.5 percent of the UBIA of qualified property with respect to that trade or business (or aggregated trade or business).

(B) *Taxpayers with taxable income within phase-in range*. If the individual's taxable income is within the phase-in range and the amount determined under paragraph (d)(2)(iv)(A)(2) of this section for a trade or business (or aggregated trade or business) is less than the amount determined under paragraph (d)(2)(iv)(A)(1) of this section for that trade or business (or aggregated trade or business), the amount determined under paragraph (d)(2)(iv)(A) of this section for such trade or business (or aggregated trade or business) is modified. Instead of the amount determined under paragraph (d)(2)(iv)(A)(2) of this section, the QBI component for the trade or business (or aggregated trade or business) is the amount determined under paragraph (d)(2)(iv)(A)(1) of this section reduced by the reduction amount as defined in paragraph (b)(9) of this section. This reduction amount does not apply if the amount determined in paragraph (d)(2)(iv)(A)(2) of this section is greater than the amount determined under paragraph (d)(2)(iv)(A)(1) of this section (in which circumstance the QBI component for the trade or business (or aggregated trade or business) will be the unreduced amount determined in paragraph (d)(2)(iv)(A)(1) of this section).

Reg. § 1.199A-1(d)(3)(iii), "Negative combined qualified REIT dividends/qualified PTP income," is discussed in part II.E.1.c.vii Effect of Losses from Qualified Trades or Businesses on the Code § 199A Deduction.

Reg. § 1.199A-1(d)(4), "Examples," provides:

> The following examples illustrate the provisions of this paragraph (d). For purposes of these examples, unless indicated otherwise, assume that all of the trades or businesses are trades or businesses as defined in paragraph (b)(14) of this section, none of the trades or businesses are SSTBs as defined in paragraph (b)(11) of this section and § 1.199A-5(b); and all of the tax items associated with the trades or businesses are effectively connected to a trade or business within the United States within the meaning of section 864(c). Also assume that the taxpayers report no capital gains or losses or other tax items not specified in the examples. Total taxable income does not include the Section 199A deduction.

Reg. § 1.199A-1(d)(4)(i) provides Example (1):

> D, an unmarried individual, operates a business as a sole proprietorship. The business generates $1,000,000 of QBI in 2018. Solely for purposes of this example, assume that the business paid no wages and holds no qualified property for use in the business. After allowable deductions unrelated to the business, D's total taxable income for 2018 is $980,000. Because D's taxable income exceeds the applicable threshold amount, D's Section 199A deduction is subject to the W-2 wage and UBIA of qualified property limitations. D's Section 199A deduction is limited to zero because the business paid no wages and held no qualified property.

This example illustrates part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

Reg. § 1.199A-1(d)(4)(ii) provides Example (2):

> Assume the same facts as in *Example 1* of paragraph (d)(4)(i) of this section, except that D holds qualified property with a UBIA of $10,000,000 for use in the trade or business. D reports $4,000,000 of QBI for 2020. After allowable deductions unrelated to the business, D's total taxable income for 2020 is $3,980,000. Because D's taxable income is above the threshold amount, the QBI component of D's Section 199A deduction is subject to the W-2 wage and UBIA of qualified property limitations. Because the business has no W-2 wages, the QBI component of D's Section 199A deduction is limited to the lesser of 20% of the business's QBI or 2.5% of its UBIA of qualified property. Twenty percent of the $4,000,000 of QBI is $800,000. Two and one-half percent of the $10,000,000 UBIA of qualified property is $250,000. The QBI component of D's Section 199A deduction is thus limited to $250,000. D's Section 199A deduction is equal to the lesser of:
>
> (A) 20% of the QBI from the business as limited ($250,000); or

(B) 20% of D's taxable income ($3,980,000*20% = $796,000). Therefore, D's Section 199A deduction for 2020 is $250,000.

See part II.E.1.c.vi.(b) Unadjusted Basis Immediately after Acquisition (UBIA) of Qualified Property under Code § 199A.

Reg. § 1.199A-1(d)(4)(iii) provides Example (3):

> E, an unmarried individual, is a 30% owner of LLC, which is classified as a partnership for Federal income tax purposes. In 2018, the LLC has a single trade or business and reports QBI of $3,000,000. The LLC pays total W-2 wages of $1,000,000, and its total UBIA of qualified property is $100,000. E is allocated 30% of all items of the partnership. For the 2018 taxable year, E reports $900,000 of QBI from the LLC. After allowable deductions unrelated to LLC, E's taxable income is $880,000. Because E's taxable income is above the threshold amount, the QBI component of E's Section 199A deduction will be limited to the lesser of 20% of E's share of LLC's QBI or the greater of the W- 2 wage or UBIA of qualified property limitations. Twenty percent of E's share of QBI of $900,000 is $180,000. The W-2 wage limitation equals 50% of E's share of the LLC's wages ($300,000) or $150,000. The UBIA of qualified property limitation equals $75,750, the sum of 25% of E's share of LLC's wages ($300,000) or $75,000 plus 2.5% of E's share of UBIA of qualified property ($30,000) or $750. The greater of the limitation amounts ($150,000 and $75,750) is $150,000. The QBI component of E's Section 199A deduction is thus limited to $150,000, the lesser of 20% of QBI ($180,000) and the greater of the limitations amounts ($150,000). E's Section 199A deduction is equal to the lesser of 20% of the QBI from the business as limited ($150,000) or 20% of E's taxable income ($880,000*20% = $176,000). Therefore, E's Section 199A deduction is $150,000 for 2018.

Reg. § 1.199A-1(d)(4)(iv) provides Example (4):

> F, an unmarried individual, owns a 50% interest in Z, an S corporation for Federal income tax purposes that conducts a single trade or business. In 2018, Z reports QBI of $6,000,000. Z pays total W-2 wages of $2,000,000, and its total UBIA of qualified property is $200,000. For the 2018 taxable year, F reports $3,000,000 of QBI from Z. F is not an employee of Z and receives no wages or reasonable compensation from Z. After allowable deductions unrelated to Z and a deductible qualified net loss from a PTP of ($10,000), F's taxable income is $1,880,000. Because F's taxable income is above the threshold amount, the QBI component of F's Section 199A deduction will be limited to the lesser of 20% of F's share of Z's QBI or the greater of the W-2 wage and UBIA of qualified property limitations. Twenty percent of F's share of Z's QBI ($3,000,000) is $600,000. The W-2 wage limitation equals 50% of F's share of Z's W-2 wages ($1,000,000) or $500,000. The UBIA of qualified property limitation equals $252,500, the sum of 25% of F's share of Z's W-2 wages ($1,000,000) or $250,000 plus 2.5% of E's share of UBIA of qualified property ($100,000) or $2,500. The greater of the limitation amounts ($500,000 and $252,500) is $500,000. The QBI component of F's Section 199A deduction is thus limited to $500,000, the lesser of 20% of QBI ($600,000) and the greater of the limitations amounts ($500,000). F reports a qualified loss from a PTP and has no qualified REIT dividend. F does not net the ($10,000) loss from the PTP against QBI. Instead, the portion of F's Section 199A deduction related to qualified REIT dividends and qualified PTP income is zero for 2018. F's section is 199A deduction is equal to the lesser of 20% of the QBI from the business as limited

($500,000) or 20% of F's taxable income over net capital gain ($1,880,000 x 20% = $376,000). Therefore, F's Section 199A deduction is $376,000 for 2018. F must also carry forward the ($10,000) qualified loss from a PTP to be netted against F's qualified REIT dividends and qualified PTP income in the succeeding taxable year.

Reg. § 1.199A-1(d)(4)(v) provides Example (5), "Phase-in range":

(A) B and C are married and file a joint individual income tax return. B is a shareholder in M, an entity taxed as an S corporation for Federal income tax purposes that conducts a single trade or business. M holds no qualified property. B's share of the M's QBI is $300,000 in 2018. B's share of the W-2 wages from M in 2018 is $40,000. C earns wage income from employment by an unrelated company. After allowable deductions unrelated to M, B and C's taxable income for 2018 is $375,000. B and C are within the phase-in range because their taxable income exceeds the applicable threshold amount, $315,000, but does not exceed the threshold amount plus $100,000, or $415,000. Consequently, the QBI component of B and C's Section 199A deduction may be limited by the W-2 wage and UBIA of qualified property limitations but the limitations will be phased in.

(B) Because M does not hold qualified property, only the W-2 wage limitation must be calculated. In order to apply the W-2 wage limitation, B and C must first determine 20% of B's share of M's QBI. Twenty percent of B's share of M's QBI of $300,000 is $60,000. Next, B and C must determine 50% of B's share of M's W-2 wages. Fifty percent of B's share of M's W-2 wages of $40,000 is $20,000. Because 50% of B's share of M's W- 2 wages ($20,000) is less than 20% of B's share of M's QBI ($60,000), B and C must determine the QBI component of their Section 199A deduction by reducing 20% of B's share of M's QBI by the reduction amount.

(C) B and C are 60% through the phase-in range (that is, their taxable income exceeds the threshold amount by $60,000 and their phase-in range is $100,000). B and C must determine the excess amount, which is the excess of 20% of B's share of M's QBI, or $60,000, over 50% of B's share of M's W-2 wages, or $20,000. Thus, the excess amount is $40,000. The reduction amount is equal to 60% of the excess amount, or $24,000. Thus, the QBI component of B and C's Section 199A deduction is equal to $36,000, 20% of B's $300,000 share M's QBI (that is, $60,000), reduced by $24,000. B and C's Section 199A deduction is equal to the lesser of 20% of the QBI from the business as limited ($36,000) or 20% of B and C's taxable income ($375,000*20% = $75,000). Therefore, B and C's Section 199A deduction is $36,000 for 2018.

Reg. § 1.199A-1(d)(4)(vi) uses Example (6) to explain how the phase-in works when the business is an SSTB and has insufficient wages (or wages and UBIA):

(A) Assume the same facts as in *Example 5* of paragraph (d)(4)(v) of this section, except that M is engaged in an SSTB. Because B and C are within the phase-in range, B must reduce the QBI and W-2 wages allocable to B from M to the applicable percentage of those items. B and C's applicable percentage is 100% reduced by the percentage equal to the ratio that their taxable income for the taxable year ($375,000) exceeds their threshold amount ($315,000), or $60,000, bears to $100,000. Their applicable percentage is 40%. The applicable percentage of B's QBI is ($300,000*40% =) $120,000, and the applicable percentage of B's share of

W-2 wages is ($40,000*40% =) $16,000. These reduced numbers must then be used to determine how B's Section 199A deduction is limited.

(B) B and C must apply the W-2 wage limitation by first determining 20% of B's share of M's QBI as limited by paragraph (d)(4)(vi)(A) of this section. Twenty percent of B's share of M's QBI of $120,000 is $24,000. Next, B and C must determine 50% of B's share of M's W-2 wages. Fifty percent of B's share of M's W-2 wages of $16,000 is $8,000. Because 50% of B's share of M's W-2 wages ($8,000) is less than 20% of B's share of M's QBI ($24,000), B and C's must determine the QBI component of their Section 199A deduction by reducing 20% of B's share of M's QBI by the reduction amount.

(C) B and C are 60% through the phase-in range (that is, their taxable income exceeds the threshold amount by $60,000 and their phase-in range is $100,000). B and C must determine the excess amount, which is the excess of 20% of B's share of M's QBI, as adjusted in paragraph (d)(4)(vi)(A) of this section or $24,000, over 50% of B's share of M's W-2 wages, as adjusted in paragraph (d)(4)(vi)(A) of this section, or $8,000. Thus, the excess amount is $16,000. The reduction amount is equal to 60% of the excess amount or $9,600. Thus, the QBI component of B and C's Section 199A deduction is equal to $14,400, 20% of B's share M's QBI of $24,000, reduced by $9,600. B and C's Section 199A deduction is equal to the lesser of 20% of the QBI from the business as limited ($14,400) or 20% of B's and C's taxable income ($375,000*20% = $75,000). Therefore, B and C's Section 199A deduction is $14,400 for 2018.

The $14,400 deduction in Example (6) is 40% of the $36,000 deduction in Example (5). Being 60% through the phase-in range leaves 40% of the benefit of the threshold remaining when applying the SSTB limitation.

Reg. § 1.199A-1(d)(4)(vii) provides Example (7):

(A) F, an unmarried individual, owns as a sole proprietor 100 percent of three trades or businesses, Business X, Business Y, and Business Z. None of the businesses hold qualified property. F does not aggregate the trades or businesses under § 1.199A-4. For taxable year 2018, Business X generates $1 million of QBI and pays $500,000 of W-2 wages with respect to the business. Business Y also generates $1 million of QBI but pays no wages. Business Z generates $2,000 of QBI and pays $500,000 of W-2 wages with respect to the business. F also has $750,000 of wage income from employment with an unrelated company. After allowable deductions unrelated to the businesses, F's taxable income is $2,722,000.

(B) Because F's taxable income is above the threshold amount, the QBI component of F's Section 199A deduction is subject to the W-2 wage and UBIA of qualified property limitations. These limitations must be applied on a business-by-business basis. None of the businesses hold qualified property, therefore only the 50% of W-2 wage limitation must be calculated. Because QBI from each business is positive, F applies the limitation by determining the lesser of 20% of QBI and 50% of W-2 wages for each business. For Business X, the lesser of 20% of QBI ($1,000,000*20 percent = $200,000) and 50% of Business X's W-2 wages ($500,000*50% = $250,000) is $200,000. Business Y pays no W-2 wages. The lesser of 20% of Business Y's QBI ($1,000,000*20% = $200,000) and 50% of its W-2 wages (zero) is zero. For

Business Z, the lesser of 20% of QBI ($2,000*20% = $400) and 50% of W-2 wages ($500,000*50% = $250,000) is $400.

(C) Next, F must then combine the amounts determined in paragraph (d)(4)(vii)(B) of this section and compare that sum to 20% of F's taxable income. The lesser of these two amounts equals F's Section 199A deduction. The total of the combined amounts in paragraph (d)(4)(vii)(B) of this section is $200,400 ($200,000 + zero + 400). Twenty percent of F's taxable income is $544,400 ($2,722,000*20%). Thus, F's Section 199A deduction for 2018 is $200,400.

Note that $100,000 of Business X's wages were wasted, in that Business X needed only $400,000 of wages to support a $200,000 deduction. Similarly, all but $800 ($400 deduction divided by 50%) of Business Z's $500,000 of wages were wasted. Thus, $599,200 of wages are wasted ($100,000 + $500,000 minus $800).

Reg. § 1.199A-1(d)(4), Example (8) provides:

(A) Assume the same facts as in *Example 7* of paragraph (d)(4)(vii) of this section, except that F aggregates Business X, Business Y, and Business Z under the rules of § 1.199A-4.

(B) Because F's taxable income is above the threshold amount, the QBI component of F's Section 199A deduction is subject to the W-2 wage and UBIA of qualified property limitations. Because the businesses are aggregated, these limitations are applied on an aggregated basis. None of the businesses holds qualified property, therefore only the W-2 wage limitation must be calculated. F applies the limitation by determining the lesser of 20% of the QBI from the aggregated businesses, which is $400,400 ($2,002,000*20%) and 50% of W-2 wages from the aggregated businesses, which is $500,000 ($1,000,000 x 50%). F's Section 199A deduction is equal to the lesser of $400,400 and 20% of F's taxable income ($2,722,000*20% = $544,400). Thus, F's Section 199A deduction for 2018 is $400,400.

Example (8) shows the benefit of irrevocably electing to aggregate, as described in part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A – a $400,400 deduction in Example (8) instead of the $200,400 deduction in Example (7). Although Example (8) has more wages than necessary to support the $400,400 deduction, aggregation enabled F to use most of wages that were wasted in Example (7).

Reg. § 1.199A-1(d)(4), Examples (9) through (12) are reproduced in part II.E.1.c.vii Effect of Losses from Qualified Trades or Businesses on the Code § 199A Deduction.

II.E.1.c.v.(d). Rules for Cooperatives and Their Patrons

SUPPLEMENTARY INFORMATION in T.D. 9947 (1/19/2021) begins with:

Background

This document contains amendments to the Income Tax Regulations (26 CFR part 1) under sections 199A, 1382, and 1388 of the Code.

Section 199A was enacted on December 22, 2017, by section 11011 of Public Law 115-97, 131 Stat. 2054, 2063, commonly referred to as the Tax Cuts and Jobs Act (TCJA). Parts of Section 199A were amended on March 23, 2018, effective as if included in the TCJA, by section 101 of Division T of the Consolidated Appropriations Act, 2018, Public Law 115-141, 132 Stat. 348, 1151 (2018 Act). Section 199A applies to taxable years beginning after 2017 and before 2026. Unless otherwise indicated, all references to Section 199A are to Section 199A as amended by the 2018 Act.

In addition, section 13305 of the TCJA repealed section 199 (former section 199), which provided a deduction for income attributable to domestic production activities (section 199 deduction). Public Law 115-97, 131 Stat. 2054, 2126. The repeal of former section 199 is effective for all taxable years beginning after 2017.

Section 199A(a) provides taxpayers a deduction of up to 20 percent of QBI from a domestic business operated as a sole proprietorship or through a partnership, S corporation, trust, or estate, and up to 20 percent of qualified real estate investment trust (REIT) dividends and publicly traded partnership (PTP) income (Section 199A(a) deduction). Section 199A(b)(7) requires patrons of Specified Cooperatives to reduce their Section 199A(a) deduction if those patrons receive certain payments from Specified Cooperatives.

Section 199A(g) provides a deduction for Specified Cooperatives and their patrons (Section 199A(g) deduction) that is based on the former section 199 deduction. Section 199A(g)(4)(A) defines a Specified Cooperative, in part, as an organization to which part I of subchapter T of chapter 1 of the Code (subchapter T) applies. Under section 1381(a)(2), subchapter T applies to any corporation operating on a cooperative basis, with certain exceptions not relevant here. Section 1382 provides rules regarding the taxable income of Cooperatives and section 1388 provides definitions applicable for purposes of subchapter T.

The Department of the Treasury (Treasury Department) and the IRS published proposed regulations (REG-107892-18) providing guidance on the Section 199A(a) deduction in the Federal Register (83 FR 40884) on August 16, 2018. A second notice of proposed rulemaking providing guidance (REG-134652-18) and final regulations implementing the Section 199A(a) deduction (TD 9847) were published in the Federal Register (84 FR 3015 and 84 FR 2952, respectively) on February 8, 2019, with corrections to TD 9847 published in the Federal Register (84 FR 15954) on April 17, 2019. TD 9847, which promulgated §§ 1.199A-1 through 1.199A-6 to implement the Section 199A(a) deduction, does not include all the rules needed for patrons of Cooperatives to calculate their particular Section 199A(a) deductions. Specifically, the rules included in TD 9847 do not address patrons' treatment of payments received from Cooperatives for purposes of Section 199A(a) or the Section 199A(g) deduction for Specified Cooperatives, though § 1.199A-1(e)(7) restates the reduction to a patron's Section 199A(a) deduction required under Section 199A(b)(7).

To address these matters, on June 19, 2019, the Treasury Department and the IRS published a notice of proposed rulemaking (REG-118425-18) in the Federal Register (84 FR 28668) containing proposed regulations under sections 199A and 1388, with corrections published in the Federal Register (84 FR 38148) on August 6, 2019 (together, Proposed Regulations). The Proposed Regulations set forth rules to address patrons' treatment of payments received from Cooperatives for purposes of

Section 199A(a) and the Section 199A(g) deduction for Specified Cooperatives in proposed §§ 1.199A-7 through 1.199A-12, as well as proposed rules under section 1388 regarding patronage and nonpatronage sources of income of Cooperatives. The Proposed Regulations also withdrew all proposed regulations issued under former section 199 that had not been finalized and proposed to remove the final and temporary regulations under former section 199.

The Summary of Comments and Explanation of Revisions of the final regulations summarizes the provisions of the Proposed Regulations, which are explained in greater detail in the preamble to the Proposed Regulations. After full consideration of the comments received on the Proposed Regulations, this Treasury decision adopts the Proposed Regulations with modifications in response to such comments as described in the Summary of Comments and Explanation of Revisions.

Summary of Comments and Explanation of Revisions

The purpose and scope of the final regulations is limited to providing guidance regarding the application of sections 199A(a), 199A(b)(7), 199A(g), 1382, and 1388. Section 199A(a) is generally applicable to patrons of all Cooperatives, whereas sections 199A(b)(7) and 199A(g) apply only to Specified Cooperatives and their patrons. Section 1388 generally applies to all Cooperatives and their patrons….

"3. Economic Analysis of Specific Provisions" in T.D. 9947 (1/19/2021) explains:

The final regulations embody certain regulatory decisions that reflect necessary regulatory discretion. These decisions specify more fully how the 2018 Act is to be implemented.

i. Determining Section 199A(g) Deduction for Specified Cooperatives

The final regulations outline the process by which Specified Cooperatives calculate their Section 199A(g) deductions. The rules concern two types of Specified Cooperatives, those that are exempt (qualified as a Cooperative under section 521) and those that are nonexempt (qualified under subchapter T of the Code), and two sources of income, patronage and nonpatronage. The patronage and nonpatronage income of Specified Cooperatives is taxed differently depending on whether the Specified Cooperative is exempt or nonexempt. In the case of exempt Specified Cooperatives, patronage and nonpatronage source income is subject to a single level of tax at the patron level. Whereas, for nonexempt Specified Cooperatives only patronage source income is subject to a single level of tax at the patron level; nonpatronage source income is subject to a double level of tax, similar to other C corporation income.

Because the Code does not define patronage and nonpatronage sourced items, § 1.1388-1(f) of these final regulations sets forth a definition that is consistent with the current state of federal case law. Specifically, the definition adopts the directly related test, which is a fact specific test for determining whether income and deductions of a Cooperative are patronage or nonpatronage. The final regulations also make revisions to clarify patronage versus nonpatronage items. In response to a commenter, the final regulations remove the last sentence in the proposed definition, because the Treasury Department and the IRS agree that the sentence is not needed to define patronage and nonpatronage. Specifying a definition that is consistent with current case law will help to minimize the economic impacts of these regulations that may arise from lack of clarity.

The final regulations adopt the proposed rule requiring Specified Cooperatives to identify gross receipts, COGS, deductions, W-2 wages, etc. as patronage or nonpatronage, and only allows the patronage activities of nonexempt Specified Cooperatives to be included in the calculation of the Section 199A(g) deduction, unless the Specified Cooperative falls under the expanded de minimis rules, which are discussed later. The TCJA reduced the corporate tax rate for C corporations under section 11 and provided the Section 199A deduction for domestic businesses operating as sole proprietorships or through partnerships, S corporations, trusts, or estates. The TCJA also repealed section 199, which did not preclude deductions on income earned by C corporations. The 2018 Act amended Section 199A to address concerns that the TCJA created an unintended incentive for farmers to sell their agricultural or horticultural products to Specified Cooperatives over independent buyers. Specifically, the 2018 Act amended Section 199A(g) to allow Specified Cooperatives and their patrons a deduction similar to the former section 199 deduction. Because the Section 199A(g) deduction is not intended to benefit C corporations and their shareholders, in general, the final regulations specify that the Section 199A(g) deduction can be claimed only on income that can be subject to tax only at the patron level. Under the final regulations, a non-exempt Specified Cooperative may not claim the Section 199A(g) deductions on income that cannot be paid to patrons and deducted under section 1382(b) and exempt Specified Cooperatives may not claim Section 199A(g) deductions on income that cannot be paid to patrons and deducted under sections 1382(b) or 1382(c)(2).

In the absence of these regulations, a Specified Cooperative may have uncertainty as to whether nonpatronage source income, which would be taxed in the same manner as a C corporation, could receive both the lower corporate tax rate and be further offset by a Section 199A(g) deduction. Other C corporations performing identical activities would only benefit from the lower corporate tax rate. This would confer an unintended economic benefit to Specified Cooperatives over other C corporations and undermine the intent of the 2018 Act's amendments of Section 199A to reduce competitive distortions between C corporations and Specified Cooperatives.

The Treasury Department and the IRS have determined that this potential uncertainty as to tax treatment could distort economic decisions in the agricultural or horticultural sector. The final regulations avoid this outcome, promoting a more efficient allocation of resources by providing more uniform incentives across taxpayers.

ii. Definition of Agricultural or Horticultural Products

The Section 199A(g) deduction is focused solely on dispositions of agricultural or horticultural products. As a result, the Treasury Department and the IRS determined that it was necessary to provide a definition. Because there is no definition of agricultural or horticultural products in the Code or Income Tax Regulations, the Treasury Department and the IRS looked to the United States Department of Agriculture (USDA) for definitions because the USDA has expertise concerning Specified Cooperatives, and Specified Cooperatives are likely familiar with USDA law. The proposed regulations defined agricultural or horticultural products within the meaning of the Cooperative Marketing Act of 1926 as agricultural, horticultural, viticultural, and dairy products, livestock and the products thereof, the products of poultry and bee raising, the edible products of forestry, and any and all products raised or produced on farms and processed or manufactured products thereof. Agricultural or horticultural products also include aquatic products that are farmed as well as fertilizer, diesel fuel, and other supplies used in agricultural or horticultural production that are manufactured, produced, grown, or extracted by the Specified Cooperative. Agricultural or horticultural products, however, do not include intangible property, since agricultural or horticultural products were considered a subset of tangible property under former section 199. Intangible property (defined in § 1.199-3(j)(2)(iii)) was a separate category of property and gross receipts from intangible property did not qualify as domestic production gross receipts (DPGR).

The final regulations made clarifying changes to the definition of agricultural or horticultural products in response to commenters. The final regulations provide examples (without limitation) of products that are considered agricultural or horticultural products, including specific agricultural or horticultural products, livestock products, edible forestry products, and farmed aquatic products. The final regulations also provide language further clarifying that agricultural or horticultural products do not include intangible property. Finally, the final regulations include more examples of "other supplies" being agricultural or horticultural products.

The Treasury Department and the IRS considered a similar but alternative definition of agricultural or horticultural products within the meaning of the Agricultural Marketing Act of 1946 as agricultural, horticultural, viticultural, and dairy products, livestock and poultry, bees, forest products, fish and shellfish, and any products thereof, including processed and manufactured products, and any and all products raised or produced on farms and any processed or manufactured product thereof. While very similar to the definition in the rules adopted in these final regulations, the rules under the Agricultural Marketing Act of 1946 concern the marketing and distribution of agricultural products without reference to Cooperatives.

The Treasury Department and the IRS also considered an alternative definition of agricultural or horticultural products based on the definition of agricultural commodities within the meaning of general regulations under the Commodity Exchange Act. The Treasury Department and the IRS concluded that this definition was too narrow, because it is limited to products that can be commodities. The use of this narrow definition would have restricted the range of products for which the Section 199A(g) deduction would be otherwise available.

The Treasury Department and the IRS did not attempt to provide quantitative estimates of the economic consequences of different designations of agricultural or horticultural products because suitable data are not readily available at this level of detail.

iii. De Minimis Threshold for Domestic Production Gross Receipts of Specified Cooperatives

In general, § 1.199A-9 of the final regulations requires that Specified Cooperatives allocate gross receipts between DPGR and non-DPGR. However, § 1.199A-9(c)(3) of the proposed regulations includes a de minimis provision that allows Specified Cooperatives to allocate total gross receipts to DPGR if less than 5 percent of total gross receipts are non-DPGR or to allocate total gross receipts to non-DPGR if less than 5 percent of total gross receipts are DPGR. The thresholds provided in the proposed regulations are based on the thresholds set forth in § 1.199-1(d)(3) under former section

199. The Treasury Department and the IRS chose to include a de minimis rule to reduce compliance costs and simplify tax filing relative to an alternative of no de minimis rule.

The Treasury Department and the IRS considered changes to the de minimis provisions in the proposed regulations, but determined that materially changing these rules from provisions that were previously available would lead to taxpayer confusion. The final regulations generally maintain the rules of the proposed regulations, but increase the threshold. Thus, under § 1.199A-9(c)(3) of the final regulations, Specified Cooperatives when calculating the patronage Section 199A(g) deduction may allocate total gross receipts to DPGR if less than 10 percent of total gross receipts are non-DPGR (which now can include nonpatronage gross receipts as well as patronage non-DPGR pursuant to § 1.199A-8(b)(2)(ii)), or alternatively, may allocate total gross receipts to non-DPGR if less than 10 percent of total gross receipts are DPGR. The de minimis threshold modestly reduces compliance costs for businesses with relatively small amounts of non-DPGR or DPGR by allowing them to avoid allocating receipts between DPGR and non-DPGR activities. The de minimis threshold is unlikely to create any substantial effects on market activity because any change in the ratio of DPGR to non-DPGR will be localized around the threshold, meaning that the movement will be a small fraction of receipts to get below the de minimis threshold. Because the de minimis provision exempts taxpayers from having to perform certain allocations and therefore reporting these allocations, the Treasury Department and the IRS do not have information on taxpayers' use of this exemption under former section 199 to perform a quantitative analysis of the impacts of the de minimis provision.

iv. Reporting Requirements for Cooperatives

Final regulations § 1.199A-7(c) and (d) provide that, when a patron conducts a trade or business that receives distributions from a Cooperative, the Cooperative is required to provide the patron with qualified items of income, gain, deduction, and loss and specified service trade or business (SSTB) determinations with respect to those distributions. This increases the compliance burden on such Cooperatives. However, in the absence of these regulations, the burden for determining of the amount of distributions from a Cooperative that constitute qualified items of income, gain, deduction, and loss from a non-SSTB and an SSTB would lie with the patron. Because patrons are less well positioned to acquire the relevant information to determine whether distributions from a Cooperative are qualified items of income, gain, deduction, and loss and whether items that would otherwise qualify are from an SSTB, the Treasury Department and the IRS expect that these regulations will reduce overall compliance costs relative to an alternative approach of not introducing a reporting requirement. After consideration of comments, the reporting requirements of Cooperatives have been modified to simplify the Cooperatives' reporting obligations in order to balance the burden on the Cooperatives and the patrons' need to receive information to determine their Section 199A(a) deduction.

v. Allocation Safe Harbor

If a patron receives both income or gain related to qualified payments and income or gain that is not related to qualified payments in a qualified trade or business, the patron must allocate those items and related deductions, losses, and W-2 wages using a reasonable method based on all of the facts and circumstances. The final regulations provide a safe harbor that allows patrons who receive income or gain related to qualified payments in addition to income or gain that is not related to qualified payments to use a simpler method to allocate deductions, losses, and W-2 wages between income or gain related to qualified payments and income or gain that is not related to qualified payments to calculate the Section 199A(b)(7) reduction to the Section 199A(a) deduction. The safe harbor allocation method allows patrons to allocate by ratably apportioning deductions, losses, and W-2 wages based on the proportion that the amount of income or gain related to qualified payments bears to the total income or gain used to determine QBI. This safe harbor is available to patrons with taxable incomes below the threshold amounts set forth in Section 199A(e)(2).

The Treasury Department and the IRS considered an alternative of not allowing a safe harbor but determined that a safe harbor could reduce compliance costs and simplify tax filing. The threshold was set at amounts set forth in Section 199A(e)(2) to avoid a proliferation of thresholds applicable to taxpayers claiming a Section 199A(a) deduction. Because the threshold amounts are relatively low, the Treasury Department and the IRS expect that the safe harbor would not distort business decisions or reduce revenue to any meaningful extent.

i. Patrons May Allocate Expenses to Specified Service Trade or Business Items of Income Reported by Cooperative

A commenter asked the Treasury Department and the IRS to revise proposed reporting requirements in circumstances where a Cooperative engages in a specified service trade or business (SSTB) business with patrons. In response to the commenter's request, the final regulations allow patrons to allocate expenses between qualified trade or business income and any SSTB income received from the Cooperative up to the amount of the income from the SSTB. The final regulations more accurately track the substance of the transaction. In the absence of these regulations, the patron may calculate lower qualified business income, resulting in a lower Section 199A(a) deduction.

ii. Specified Cooperatives May Pass Through All, Some, or None of the Section 199A(g) Deduction

Section 199A(g) permits Specified Cooperatives to pass through their Section 199A(g) deduction, and allows eligible taxpayers to claim the deduction passed through. The proposed regulations required Specified Cooperatives to identify whether the patrons are eligible taxpayers and only pass through the deduction to those patrons. Commenters requested that the rule be modified so that patrons, and not Specified Cooperatives, have to identify whether the patrons are eligible taxpayers for purposes of using the Section 199A(g) deduction. The rules have been modified in the final regulations to provide Specified Cooperatives with maximum flexibility. If a Specified Cooperative does not identify the eligibility status of all of its patrons, it may pass through all, some, or none of the Section 199A(g) deduction. Only patrons that are eligible taxpayers may use the Section 199A(g) deduction passed through to them. If a Specified Cooperative does determine the eligibility status of its patrons, it has the discretion to retain the Section 199A(g) deduction attributable to any ineligible taxpayer, and pass out the remainder to eligible taxpayers.

In the absence of these regulations, a Specified Cooperative may have uncertainty as to whether to distribute the Section 199A(g) deduction to eligible taxpayers. The final regulations provide Specified Cooperatives with the option of retaining and using the amounts equal to the Section 199A(g) deduction attributable to ineligible taxpayers, or passing out the deduction, which only eligible taxpayers may claim. This allows Specified Cooperatives to choose whether to engage in information gathering regarding patrons' eligibility to use the deduction. The Treasury Department and the IRS have determined that this increased flexibility promotes a more efficient allocation of resources by allowing Specified Cooperatives to choose the extent to which they engage in information gathering in relation to the use of the Section 199A(g) deduction at the Specified Cooperative level or the patron level.

iii. Special Rule for Specified Cooperative Partners

The final regulations provide special rules for Specified Cooperatives that are partners in a partnership. A commenter recommended that the proposed regulations be modified to permit partnerships to pass through W-2 wages to Specified Cooperative partners, thereby increasing the Specified Cooperatives' Section 199A(g) deduction. A commenter also recommended that, to the extent a partnership conducts activities that result in gross receipts, a Specified Cooperative partner in that partnership should be permitted to treat those activities as conducted directed by the Specified Cooperative. The Treasury Department and the IRS agree with these comments. The final regulations permit the partnerships to pass through W-2 wages and COGS to Specified Cooperative partners. Additionally, the final regulations allow for two-way attribution, meaning: (1) A partnership's activities alone with respect to an agricultural or horticultural product can qualify as gross receipts for the Specified Cooperative partner and (2) a partnership can be attributed the activities of the Specified Cooperative partner. These rules permit additional activities and the resulting income, as well as additional W-2 wages and COGS, to be considered in the calculation of the Section 199A(g) deduction.

This stipulation allows for greater flexibility in determining deductions when Specified Cooperatives are partners. Flexibility will increase economic efficiency by making it more likely that Specified Cooperatives comply with regulations by lowering the compliance burden.

The Treasury Department and the IRS anticipate that these regulations in aggregate will have a marginal impact on economic activity. Compared to the economic impacts resulting from the 2018 Act, the final regulations' primary impact will be through increasing comprehension of the tax code. Increased understanding will reduce the risk that firms and the IRS will disagree on tax reporting and allocation and therefore engage in costly legal transactions. Increased comprehension will also reduce the possibility that firms will engage in activities that would yield negative economic impacts if clarity were stronger. These final regulations also respond to commenters by adding additional examples to further increase comprehension.

II.E.1.c.vi. Wage Limitation If Taxable Income Is Above Certain Thresholds

After considering part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A,[880] the wage limitation is the greater of:[881]

(i) 50 percent of the W-2 wages with respect to the qualified trade or business, or

(ii) the sum of 25 percent of the W-2 wages with respect to the qualified trade or business, plus 2.5 percent of the unadjusted basis immediately after acquisition of all qualified property.

For details on the wage limitation, see parts II.E.1.c.vi.(a) W-2 wages under Code § 199A and II.E.1.c.vi.(b) Unadjusted Basis Immediately after Acquisition (UBIA) of Qualified Property under Code § 199A, which generally are effectuated under Reg § 1.199A-2. Prop. Reg § 1.199A-2(d), "Effective/applicability date," provides:

> (1) *General rule*. Except as provided in paragraph (d)(2) of this section, the provisions of this section apply to taxable years ending after the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register. However, taxpayers may rely on the rules of this section until the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register.
>
> (2) *Exceptions*.
>
> (i) *Anti-abuse rules*. The provisions of paragraph (c)(1)(iv) of this section apply to taxable years ending after December 22, 2017.
